"nethermost darkness". Already, however, in the later Vedas, where these beliefs and developed expression, retribution begins to be ruled more by ceremonial observances than by strictly moral tests. On the other hand, there is no trace as yet of the dreary doctrine of transmigration, but critics profess to discover the germs of later pantheism.

In Brahminism (q.v.) retribution gains in prominence and severity, but becomes hopelessly involved in transmigration, and is made more and more dependent either on sacrificial observances or on theosophical knowledge. Though after death there are numerous heavens and hells for the reward and punishment of every degree of merit and demerit, these are not final states, but only so many preludes to further rebirths in higher or lower forms. Pantheistic absorption in Brahma, the world-soul and only reality, with the consequent extinction of individual personalities - this is the only final solution of the problem of existence, the only salvation to which man may ultimately look forward. But it is a salvation which only a few may hope to reach after the present life, the few who have acquired a perfect knowledge of Brahma. The bulk of men who cannot rise to this high philosophic wisdom may succeed, by means of sacrificial observances, in gaining a temporary heaven, but they are destined to further births and deaths.

Buddhist eschatology still further develops and modifies the philosophical side of the Brahministic doctrine of salvation, and culminates in what is, strictly speaking, the negation of eschatology and of all theology -- a religion without a God, and a lofty moral code without hope of reward or fear of punishment hereafter. Existence itself, or at least individual existence, is the primary evil; and the craving for existence, with the many forms of desire it begets, is the source of all the misery in which life is inextricably involved. Salvation, or the state of Nirvana, is to be attained by the utter extinction of every kind of desire, and this is possible by knowledge -- not the knowledge of God or the soul, as in Brahminism, but the purely philosophical knowledge of the real truth of things. For all who do not reach this state of philosophic enlightenment or who fail to live up to its requirements -- that is to say for the vast bulk of mankind -- there is nothing in prospect save a dreary cycle of deaths and rebirths with intercalated heavens and hells; and in Buddhism this doctrine takes on a still more dread and inexorable character than pre-Buddhistic Brahminism. (See BUDDHISM)

(d) Persian

In the ancient Persian religion (Zoroastrianism, Mazdaism, Parseeism) we meet with what is perhaps, in its better elements, the highest type of ethnic eschatology. But as we know it in the Parsee literature, it contains elements that were probably borrowed from other religions; and as some of this literature is certainly post-Christian, the possibility of Jewish and even Christian ideas having influenced the later eschatological developments is not to be lost sight of. The radical defect of the Persian religion was

its dualistic conception of deity. The physical and moral world is the theatre of a perpetual conflict between Ahura Mazda (Ormuzd), the good, and Angra-Mainyu (Ahriman), the evil, principle, co-creators of the universe and of man. Yet the evil principle is not eternal *ex parte post*; he will finally be vanquished and exterminated. A pure monotheistic Providence promises at times to replace dualism, but never quite succeeds -- the latest effort in this direction being the belief in Zvran Akarana, or Boundless Time as the supreme deity above both Ahriman and Ormuzd. Morality has its sanction not merely in future retribution, but in the present assurance that every good and pious deed is a victory for the cause of Ahura Mazda; but the call to the individual to be active in this cause, though vigorous and definite enough, is never quite free from ritual and ceremonial conditions, and as time goes on becomes more and more complicated by these observances, especially by the laws of purity. Certain elements are holy (fire, earth, water), certain others unholy or impure (dead bodies, the breath, and all that leaves the body, etc.); and to defile oneself or the holy elements by contact with the impure is one of the deadliest sins. Consequently corpses could not be buried or cremated, and were accordingly exposed on platforms erected for the purpose, so that birds of prey might devour them. When the soul leaves the body it has to cross the bridge of Chinvat (or Kinvad), the bridge of the Gatherer, or Accountant. For three days good and evil spirits contend for the possession of the soul, after which the reckoning is taken and the just man is rejoiced by the apparition, in the form of a fair maiden, of his good deeds, words, and thoughts, and passes over safely to a paradise of bliss, while the wicked man is confronted by a hideous apparition of his evil deeds, and is dragged down to hell. If the judgment is neutral the soul is reserved in an intermediate state (so at least in the Pahlavi books) till the decision at the last day. The developed conception of the last days, as it appears in the later literature, has certain remarkable affinities with Jewish Messianic and millennial expectations. A time during which Ahriman will gain the ascendancy is to be followed by two millennial periods, in each of which a great prophet will appear to herald the coming of Soshyant (or Sosioch), the Conqueror and Judge who will raise the dead to life. The resurrection will occupy fifty-seven years and will be followed by the general judgement, the separation of the good from the wicked, and the passing of both through a purgatorial fire gentle for the just, terrible for sinners, but leading to the restoration of all. Next will follow the final combat between the good and the evil spirits, in which the latter will perish, all except Ahriman and the serpent Azhi, whose destruction is reserved to Ahura Mazda and Scraosha, the priest-god. And last of all hell itself will be purged, and the earth renewed by purifying fire.

(e) Greek

Greek eschatology as reflected in the Homeric poems remains at a low level. It is only very vaguely retributive and is altogether cheerless in its outlook. Life on earth, for all its shortcomings, is the highest good for men, and death the worst of evils. Yet death is not extinction. The *psyche* survives - not the purely spiritual soul of later Greek and Christian thought, but an attenuated, semi-material ghost, or shade, or image, of the earthly man; and the life of this shade in the underworld is a dull, impoverished, almost functionless existence. Nor is there any distinction of fates either by way of happiness or of misery in Hades. The judicial office of Minos is illusory and has nothing to do with earthly conduct; and there is only one allusion to the Furies suggestive of their activity among the dead (*Iliad* XIX, 258-60). Tartarus, the lower hell, is reserved for a few special rebels against the gods, and the Elysian Fields for a few special favourites chosen by divine caprice.

In later Greek thought touching the future life there are notable advances beyond the Homeric state, but it is doubtful whether the average popular faith ever reached a much higher level. Among early philosophers Anaxagoras contributes to the notion of a purely spiritual soul; but a more directly religious contribution is made by the Eleusinian and Orphic mysteries, to the influence of which in brightening and moralizing the hope of a future life we have the concurrent witness of philosophers, poets, and historians. In the Eleusinian mysteries there seems to have been no definite doctrinal teaching - merely the promise or assurance for the initiated of the fullness of life hereafter. With the Orphic, on the other hand, the divine origin and pre-existence of the soul, for which the body is but a temporary prison, and the doctrine of a retributive transmigration are more or less closely associated. It is hard to see how far the common belief of the people was influenced by these mysteries, but in poetical and philosophical literature their influence is unmistakable. This is seen especially in Pindar among the poets, and in Plato among the philosophers. Pindar has a definite promise of a future life of bliss for the good or the initiated, and not merely for a few, but for all. Even for the wicked who descend to Hades there is hope; having, purged their wickedness they obtain rebirth on earth, and if, during three successive existences, they prove themselves worthy of the boon, they will finally attain to happiness in the Isles of the Blest. Though Plato's teaching is vitiated by the doctrine of pre-existence, metempsychosis, and other serious errors it represents the highest achievement of pagan philosophic speculation on the subject of the future life. The divine dignity, spirituality, and essential immortality of the soul being established, the issues of the future for every soul are made clearly dependent on its moral conduct in the present life in the body. There is a divine judgment after death, a heaven, a hell, and an intermediate state for penance and purification; and rewards and punishments are graduated according to the merits and demerits of each. The incurably wicked are condemned to everlasting punishment

in Tartarus; the less wicked or indifferent go also to Tartarus or to the Acherusian Lake, but only for a time; those eminent for goodness go to a happy home, the highest reward of all being for those who have purified themselves by philosophy.

From the foregoing sketch we are able to judge both of the merits and defects of ethnic systems of eschatology. Their merits are perhaps enhanced when they are presented, as above, in isolation from the other features of the religions to which they belonged. Yet their defects are obvious enough; and even those of them that were best and most promising turned out, historically, to be failures. The precious elements of eschatological truth contained in the Egyptian religion were associated with error and superstition, and were unable to save the religion from sinking to the state of utter degeneration in which it is found at the approach of the Christian Era. Similarly, the still richer and more profound eschatologies of the Persian religion, vitiated by dualism and other corrupting influences, failed to realize the promise it contained, and has survived only as a ruin in modern Parseeism. Plato's speculative teaching failed to influence in any notable degree the popular religion of the Greco-Roman world; it failed to convert even the philosophical few; and in the hands of those who did profess to adopt it, Platonism, uncorrected by Christianity ran to seed in Pantheism and other forms of error.

II. OLD-TESTAMENT ESCHATOLOGY

Without going into details either by way of exposition or of criticism, it will be sufficient to point out how Old Testament eschatology compares with ethnic systems, and how notwithstanding its deficiencies in point of clearness and completeness, it was not an unworthy preparation for the fullness of Christian Revelation.

(1) Old Testament eschatology, even in its earliest and most imperfect form, shares in the distinctive character which belongs to Old Testament religion generally. In the first place, as a negative distinction, we note the entire absence of certain erroneous ideas and tendencies that have a large place in ethnic religions. There is no pantheism or dualism no doctrine of pre-existence (*Wisdom*, viii, 17-20 does not necessarily imply this doctrine, as has sometimes been contended) or of metempsychosis; nor is there any trace, as might have been expected, of Egyptian ideas or practices. In the next place, on the positive side, the Old Testament stands apart from ethnic religions in its doctrine of God and of man in relation to God. Its doctrine of God is pure and uncompromising monotheism; the universe is ruled by the wisdom, Justice, and omnipotence of the one, true God. And man is created by God in His own image and likeness, and destined to relations of friendship and fellowship with Him. Here we have revealed in clear and definite terms the basal doctrines which are at the root of eschatological truth, and which, once they had taken hold of the life of a people, were bound, even without new additions to the revelation, to safeguard the purity of an inadequate

eschatology and to lead in time to richer and higher developments. Such additions and developments occur in Old Testament teaching; but before noticing them it is well to call attention to the two chief defects, or limitations, which attach to the earlier eschatology and continue, by their persistence in popular belief, to hinder more or less the correct understanding and acceptance by the Jewish people as a whole of the highest eschatological utterances of their own inspired teachers.

(2) The first of these defects is the silence of the earlier and of some of the later books on the subject of moral retribution after death, or at least the extreme vagueness of such passages in these books as might be understood to refer to this subject. Death is not extinction; but Sheol, the underworld of the dead, in early Hebrew thought is not very different from the Babylonian Aralu or the Homeric Hades, except that Jahve is God even there. It is a dreary abode in which all that is prized in life, including friendly intercourse with God, comes to an end without any definite promise of renewal. Dishonour incurred in life or in death, clings to a man in Sheol, like the honour he may have won by a virtuous life on earth; but otherwise conditions in Sheol are not represented as retributive, except in the vaguest way. Not that a more definite retribution or the hope of renewal to a life of blessedness is formally denied and excluded; it simply fails to find utterance in earlier Old Testament records. Religion is pre-eminently an affair of this life, and retribution works out here on earth. This idea which to us seems so strange, must, to be fairly appreciated, be taken in conjunction with the national as opposed to the individual viewpoint [see under (3) of this section]; and allowance must also be made for its pedagogic value for a people like the early Hebrews. Christ himself explains why Moses permitted divorce ("by reason of the hardness of your heart" Matt., xix 8); revelation and legislation had to be tempered to the capacity of a singularly practical and unimaginative people, who were more effectively confirmed in the worship and service of God by a vivid sense of His retributive providence here on earth than they would have been but a higher and fuller doctrine of future immortality with its postponement of moral rewards. Nor must we exaggerate the insufficiency of this early point of view. It gave a deep religious value and significance to every event of the present life, and raised morality above the narrow, utilitarian standpoint. Not worldly prosperity as such was the ideal of the pious Israelite, but prosperity bestowed by God as the gracious reward of fidelity in keeping His Commandments. Yet, when all has been said, the inadequacy of this belief for the satisfaction of individual aspirations must be admitted; and this inadequacy was bound to prove itself sooner or later in experience. Even the substitution of the national for the individual standpoint could not indefinitely hinder this result.

(3) The tendency to sink the individual in the nation and to treat the latter as the religious unit was one of the most marked characteristics of Hebrew faith. And this

helped very much to support and prolong the other limitation just noticed, according to which retribution was looked for in this life. Deferred and disappointed personal hopes could be solaced by the thought of their present or future realization in the nation. It was only when the national calamities, culminating in the exile, had shattered for a time the people's hope of a glorious theocratic kingdom that the eschatology of the individual became prominent; and with the restoration there was a tendency to revert to the national point of view. It is true of the O.T. as a whole that the eschatology of the people overshadows that of the individual, though it is true at the same time that, in and through the former, the latter advances to a clear and definite assurance of a personal resurrection from the dead, at least for the children of Israel who are to share, if found worthy, in the glories of the Messianic Age.

It is beyond the scope of this article to attempt to trace the growth or describe the several phases of this national eschatology, which centres in the hope of the establishment of a theocratic and Messianic kingdom on earth (see MESSIAS). However spiritually this idea may be found expressed in Old Testament prophecies, as we read them now in the light of their progressive fulfillment in the New Testament Dispensation, the Jewish people as a whole clung to a material and political interpretation of the kingdom, coupling their own domination as a people with the triumph of God and the worldwide establishment of His rule. There is much, indeed, to account for this in the obscurity of the prophecies themselves. The Messiah as a distinct person is not always mentioned in connexion with the inauguration of the kingdom, which leaves room for the expectation of a theophany of Jahve in the character of judge and ruler. But even when the person and place of the Messiah are distinctly foreshadowed, the fusion together in prophecy of what we have learned to distinguish as His first and His second coming tends to give to the whole picture of the Messianic kingdom an eschatological character that belongs in reality only to its final stage. It is thus the resurrection of the dead in *Isaias*, xxvi, 19, and *Daniel*, xii, 2, is introduced; and many of the descriptions foretelling "the day of the Lord", the judgment on Jews and Gentiles, the renovation of the earth and other phenomena that usher in that day while applicable in a limited sense to contemporary events and to the inauguration of the Christian Era, are much more appropriately understood of the end of the world. It is not, therefore, surprising that the religious hopes of the Jewish nation should have become so predominantly eschatological, and that the popular imagination, foreshortening the perspective of Divine Revelation, should have learned to look for the establishment on earth of the glorious Kingdom of God, which Christians are assured will be realized only in heaven at the close of the present dispensation.

(4) Passing from these general observations which seem necessary for the true understanding of Old Testament eschatology, a brief reference will be made to the

passages which exhibit the growth of a higher and fuller doctrine of immortality. The recognition of individual as opposed to mere corporate responsibility and retribution may be reckoned, at least remotely, as a gain to eschatology, even when retribution is confined chiefly to this life; and this principle is repeatedly recognized in the earliest books. (See Gen., xviii, 25; Ex., xxxii, 33; Num., xvi, 22; Deut., vii, 10; xxiv, 16; II K., xxiv, 17; IV K., xiv, 6; Is., iii, 10 sq.; xxxiii, 15 sq.; Jer., xii, 1 sq.; xvii, 5-10; xxxii, 18 sq.; Ezech. xiv, 12-20; xviii, 4, 18 sq.; Psalms, *passim*; Prov., ii, 21 sq.; x, 2; xi, 19, 31; etc.) It is recognized also in the very terms of the problem dealt with in the Book of Job.

But, coming to higher things, we find in the Psalms and in Job the clear expression of a hope or assurance for the just of a life of blessedness after death. Here is voiced, under Divine inspiration, the innate craving of the righteous soul for everlasting fellowship with God, the protest of a strong and vivid faith against the popular conception of Sheol. Omitting doubtful passages, it is enough to refer to Psalms xv (A.V. xvi), xvi (A.V. xvii), xlviii (A.V. xlix), and lxxii (A.V. lxxiii). Of these it is not impossible to explain the first two as prayers for deliverance from some imminent danger of death, but the assurance they express is too absolute and universal to admit this interpretation as the most natural. And this assurance becomes still more definite in the other two psalms, by reason of the contrast which death is asserted to introduce between the fates of the just and the impious. The same faith emerges in the Book of Job, first as a hope somewhat questionably expressed, and then as an assured conviction. Despairing of vindication in this life and rebelling against the thought that righteousness should remain finally unrewarded, the sufferer seeks consolation in the hope of a renewal of God's friendship beyond the grave: "O that thou wouldest hide me in Sheol, that thou wouldest keep me secret, until thy wrath be past, that thou wouldest appoint me a set time, and remember me. If a man die, shall he live again? All the days of my warfare would I wait, till my release should come" (xiv, 13 sq.). In xvii, 18 - xvii, 9, the expression of this hope is more absolute; and in xix, 23-27, it takes the form of a definite certainty that he will see God, his Redeemer: "But I know that my Redeemer liveth and that he shall stand up at the last upon the earth [dust]; and after this my skin has been destroyed, yet from [al. without] my flesh shall I see God, whom I shall see for myself and my eyes shall behold, and not another" (25 - 27). In his risen body he will see God, according to the Vulgate (LXX) reading: "and in the last day I shall rise out of the earth. And I shall be clothed again with my skill, and in my flesh I shall see my God" (25 - 26).

The doctrine of the resurrection finds definite expression in the Prophets; and in Isaias, xxvi, 19: "thy dead shall live, my dead bodies shall rise again. Awake and sing, ye that dwell in the dust" etc.; and Daniel, xii, 2: "and many of those that sleep in the

dust of the earth shall awake: some unto everlasting life, and others to everlasting shame and contempt" etc., it is clearly a personal resurrection that is taught -- in Isaiah a resurrection of righteous Israelites; in Daniel, of both the righteous and the wicked. The judgment, which in Daniel is connected with the resurrection, is also personal; and the same is true of the judgment of the living (Jews and Gentiles) which in various forms the prophecies connect with the "day of the Lord". Some of the Psalms (e. g. xlviii) seem to imply a judgment of individuals, good and bad, after death; and the certainty of a future judgment of "every work, whether it be good or evil", is the final solution of the moral enigmas of earthly life offered by Ecclesiastes (xii, 13-14; cf. iii, 17). Coming to the later (deuterocanonical) books of the O. T. we have clear evidence in II Mach. of Jewish faith not only in the resurrection of the body (vii, 9-14), but in the efficacy of prayers and sacrifices for the dead who have died in godliness (xi, 43 sqq.). And in the second and first centuries B.C., in the Jewish apocryphal literature, new eschatological developments appear, chiefly in the direction of a more definite doctrine of retribution after death. The word *Sheol* is still most commonly understood of the general abode of the departed awaiting the resurrection, this abode having different divisions for the reward of the righteous and the punishment of the wicked; in reference to the latter, *Sheol* is sometimes simply equivalent to *hell*. *Gehenna* is the name usually applied to the final place of punishment of the wicked after the last judgment, or even immediately after death; while *paradise* is often used to designate the intermediate abode of the souls of the just and *heaven* their home of final blessedness. Christ's use of these terms shows that the Jews of His day were sufficiently familiar with their New Testament meanings.

III. CATHOLIC ESCHATOLOGY

In this article there is no critical discussion of New Testament eschatology nor any attempt to trace the historical developments of Catholic teaching from Scriptural and traditional data; only a brief conspectus is given of the developed Catholic system. For critical and historical details and for the refutation of opposing views the reader is referred to the special articles dealing with the various doctrines. The eschatological summary which speaks of the "four last things" (death, judgment, heaven, and hell) is popular rather than scientific. For systematic treatment it is best to distinguish between (A) individual and (B) universal and cosmic eschatology, including under (A):

- death;
- the particular judgment;
- heaven, or eternal happiness;

- purgatory, or the intermediate state;
- hell, or eternal punishment;

and under (B):

- the approach of the end of the world;
- the resurrection of the body;
- the general judgment; and
- the final consummation of all things.

The superiority of Catholic eschatology consists in the fact that, without professing to answer every question that idle curiosity may suggest, it gives a clear, consistent, satisfying statement of all that need at present be known, or can profitably be understood, regarding the eternal issues of life and death for each of us personally, and the final consummation of the cosmos of which we are a part.

(A) Individual Eschatology

Death

Death, which consists in the separation of soul and body, is presented under many aspects in Catholic teaching, but chiefly

- as being actually and historically, in the present order of supernatural Providence, the consequence and penalty of Adam's sin (Gen., ii, 17; Rom., v, 12, etc.);
- as being the end of man's period of probation, the event which decides his eternal destiny (II Cor., v, 10; John, ix, 4; Luke, xii, 40; xvi, 19 sqq.; etc.), though it does not exclude an intermediate state of purification for the imperfect who die in God's grace; and
- as being universal, though as to its absolute universality (for those living at the end of the world) there is some room for doubt because of I Thess., iv, 14 sqq.; I Cor., xv, 51; II Tim., iv, 1.

Particular Judgment

That a particular judgment of each soul takes place at death is implied in many passages of the New Testament (Luke, xvi, 22 sqq.; xxiii, 43; Acts, i, 25; etc.), and in the teaching of the Council of Florence (Denzinger, *Enchiridion*, no. 588) regarding the speedy entry of each soul into heaven, purgatory, or hell.

Heaven

Heaven is the abode of the blessed, where (after the resurrection with glorified bodies) they enjoy, in the company of Christ and the angels, the immediate vision of God face to face, being supernaturally elevated by the light of glory so as to be capable of such a vision. There are infinite degrees of glory corresponding to degrees of merit, but all are unspeakably happy in the eternal possession of God. Only the perfectly pure and holy can enter heaven; but for those who have attained that state, either at death or after a course of purification in purgatory, entry into heaven is not deferred, as has sometimes been erroneously held, till after the General Judgment.

Purgatory

Purgatory is the intermediate state of unknown duration in which those who die imperfect, but not in unrepented mortal sin, undergo a course of penal purification, to qualify for admission into heaven. They share in the communion of saints (q. v.) and are benefited by our prayers and good works (see DEAD, PRAYERS FOR THE). The denial of purgatory by the Reformers introduced a dismal blank in their eschatology and, after the manner of extremes, has led to extreme reactions.

Hell

Hell, in Catholic teaching, designates the place or state of men (and angels) who, because of sin, are excluded forever from the Beatific Vision. In this wide sense it applies to the state of those who die with only original sin on their souls (Council of Florence, Denzinger, no. 588), although this is not a state of misery or of subjective punishment of any kind, but merely implies the objective privation of supernatural bliss, which is compatible with a condition of perfect natural happiness. But in the narrower sense in which the name is ordinarily used, hell is the state of those who are punished eternally for unrepented personal mortal sin. Beyond affirming the existence of such a state, with varying degrees of punishment corresponding to degrees of guilt and its eternal or unending duration, Catholic doctrine does not go. It is a terrible and mysterious truth, but it is clearly and emphatically taught by Christ and the Apostles. Rationalists may deny the eternity of hell in spite of the authority of Christ, and professing Christians, who are unwilling to admit it, may try to explain away Christ's words; but it remains as the Divinely revealed solution of the problem of moral evil. (See HELL.) Rival solutions have been sought for in some form of the theory of restitution or, less commonly, in the theory of annihilation or conditional immortality. The restitutionist view, which in its Origenist form was condemned at the Council of Constantinople in 543, and later at the Fifth General Council (see APOCATASTASIS), is the cardinal dogma of modern Universalism (q. v.), and is favoured more or less by liberal Protestants and Anglicans. Based on an exaggerated optimism for which present experience offers no guarantee, this view assumes the all-conquering efficacy of the ministry of

grace in a life of probation after death, and looks forward to the ultimate conversion of all sinners and the voluntary disappearance of moral evil from the universe. Annihilationists, on the other hand, failing to find either in reason or Revelation any grounds for such optimism, and considering immortality itself to be a grace and not the natural attribute of the soul, believe that the finally impenitent will be annihilated or cease to exist -- that God will thus ultimately be compelled to confess the failure of His purpose and power.

(B) Universal and Cosmic Eschatology

The Approach of the End of the World

Notwithstanding Christ's express refusal to specify the time of the end (Mark, xiii, 32; Acts, i, 6 sq.), it was a common belief among early Christians that the end of the world was near. This seemed to have some support in certain sayings of Christ in reference to the destruction of Jerusalem, which are set down in the Gospels side by side with prophecies relating to the end (Matt., xxiv; Luke, xxi), and in certain passages of the Apostolic writings, which might, not unnaturally, have been so understood (but see II Thess., ii, 2 sqq., where St. Paul corrects this impression). On the other hand, Christ had clearly stated that the Gospel was to be preached to all nations before the end (Matt., xxiv, 14), and St. Paul looked forward to the ultimate conversion of the Jewish people as a remote event to be preceded by the conversion of the Gentiles (Rom., xi, 25 sqq.). Various others are spoken of as preceding or ushering in the end, as a great apostasy (II Thess., ii, 3 sqq.), or falling away from faith or charity (Luke, xviii, 8; xvii, 26; Matt., xxiv, 12), the reign of Antichrist, and great social calamities and terrifying physical convulsions. Yet the end will come unexpectedly and take the living by surprise.

The Resurrection of the Body

The visible coming (*parousia*) of Christ in power and glory will be the signal for the rising of the dead (see RESURRECTION). It is Catholic teaching that all the dead who are to be judged will rise, the wicked as well as the Just, and that they will rise with the bodies they had in this life. But nothing is defined as to what is required to constitute this identity of the risen and transformed with the present body. Though not formally defined, it is sufficiently certain that there is to be only one general resurrection, simultaneous for the good and the bad. (See MILLENNIUM.) Regarding the qualities of the risen bodies in the case of the just we have St. Paul's description in I Cor., xv (cf. Matt., xiii, 43; Phil., iii, 21) as a basis for theological speculation; but in the case of the damned we can only affirm that their bodies will be incorruptible.

The General Judgment

Regarding the general judgment there is nothing of importance to be added here to the graphic description of the event by Christ Himself, who is to be Judge (Matt., xxv; etc.). (See JUDGMENT, GENERAL.)

The Consummation of All Things

There is mention also of the physical universe sharing in the general consummation (II Pet., iii, 13; Rom., viii, 19 sqq.; Apoc., xxi, 1 sqq.). The present heaven and earth will be destroyed, and a new heaven and earth take their place. But what, precisely, this process will involve, or what purpose the renovated world will serve is not revealed. It may possibly be part of the glorious Kingdom of Christ of which "there shall be no end". Christ's militant reign is to cease with the accomplishment of His office as Judge (I Cor., xv, 24 sqq.), but as King of the elect whom He has saved He will reign with them in glory forever.

P. J. TONER

Ven. Marina de Escobar

Ven. Marina de Escobar

Mystic and foundress of a modified branch of the Brigittine Order b. at Valladolid, Spain, 8 Feb., 1554; d. there 9 June, 1633. Her father, Iago de Escobar, was professor of civil and canon law and for a time governor of Osuna, a man noted for his learning and his saintly life; her mother was Margaret Montana, daughter of Charles V's physician. She was an apt scholar and even in youth showed powers of reflection beyond her age. Until her forty-fifth year her attention was given mainly to her own perfection, then she devoted herself more to promoting the piety of others. At fifty her continual bodily afflictions became so severe that she was confined to her bed for the remainder of her life. Providence provided her with an admirable spiritual guide, in the Venerable Luis de Ponte (1554-1624). The special external work entrusted to her was to establish a branch of the Order of the Holy Saviour or Brigittines but with the rules greatly modified to suit the times and the country. With the revelation of the work came the knowledge that she would not live to see its accomplishment. By divine command, as she believed, she wrote her revelations, and when too feeble she dictated them. Luis de Ponte arranged them and left them for publication after her death. In his preface he declares his belief in their genuineness because she advanced in virtue and was preserved free from temptations against purity, showed no pride, and had peace in prayer, feared deception, desired no extraordinary favours, loved suffering, was zealous for souls and, lastly, was obedient to her confessor. The writings were published in one large volume and are divided into six books containing his remarks and her own, interspersed between the visions themselves. Book I treats of the extraordinary means

by which God had led her; II contains revelations about the mysteries of redemption; III about God and the Blessed Trinity; IV about Guardian Angels and the B.V. Mary's prerogatives; V gives means to help souls in purgatory and to save souls on earth; and VI reveals her perfection as shown under terrible sufferings. The style of the work is free and flowing and she speaks with simplicity and naïve frankness. The visions, always picturesque, and pleasing or alarming according to their subject, are all instructive and at times distinctly curious; but the descriptions are mere outlines, leaving much to the imagination, and never going into details. Their variety is great. For some the following would have special interest: Daily communion and Satan's objection to it; mystic espousals; how the bodies of saints can appear in visions; internal stigmata; some saints with whom modern hagiographers have dealt harshly, as St. Christopher. Their brevity of detail may account in part for the oblivion into which they have fallen. Her life, so far as de Ponte had prepared it, was published at Madrid in 1664; the second part appeared there in 1673. It was translated into Latin by M. Hanel, S.J., and published again at Prague in 1672-1688, and in an enlarged edition at Naples 1690. All these editions are now very rare. A German translation in four volumes, appeared in 1861. (See BRIGITTINES.)

EDWARD P. GRAHAM

Antonio Escobar y Mendoza

Antonio Escobar y Mendoza

Born at Valladolid in 1589; died there, 4 July, 1669. In his sixteenth year he entered the Society of Jesus. Talent and untiring labour won him distinction for scholarship among the leaders of the ecclesiastical science in his age. His writings are recognized as classical and challenge criticism as far as orthodoxy is concerned. For this reason Pascal's effort (Fifth and Sixth Provincial Letters) to fasten the charge of laxism on Escobar's "Manuals of Cases of Conscience", together with his unscrupulous insinuations of adroit hypocrisy on Escobar's part, are too base and cowardly to merit serious consideration. At the same time it is only fair to add that Escobar's writings are not entirely beyond the pale of criticism. Unprejudiced critics find him inexact in quotations, subtle in discussion, obscure and loose in reasoning. Besides the "Manual", Escobar's chief works are "Summula Casuum conscientiae" (Pamplona, 1626); "Examen et praxis confessoriorum" (Lyons, 1647); "Theologia Moralis" (Lyons, 1650; Venice, 1652); "Universae Theologicae Moralis receptae sententiae" (Lyons, 1663); "De Triplici Statu Ecclesiastico" (Lyons, 1663); "De Justitiâ et de legibus" (Lyons, 1663).

Escobar was also a preacher of note. For fifty consecutive years he delivered a series of Lenten sermons with signal success.

J.D. O'NEILL

The Escorial

The Escorial

A remarkable building in Spain situated on the south-eastern slope of the Sierra Guadarrama about twenty-seven miles north-west of Madrid. Its proper title is El Real Monasterio de San Lorenzo del Escorial, Escorial being the name of a small town in the vicinity. The structure comprises a monastery, church, pantheon or royal mausoleum, a palace intended as summer and autumn residence of the court, college, library, art-galleries, etc., and is called by Spaniards the eighth wonder of the world. It was begun in 1563, at the order of Philip II, by the architect Juan Bautista de Toledo, assisted by Lucas de Escalante and Pedro de Tolosa, and was intended to commemorate the Spanish victory over the French at the battle of St-Quinten in 1557. Probably another reason was that Philip II was obliged by the will of Charles V to erect a royal mausoleum.

Bautista's plan was ambitious and eccentric; he was influenced by Renaissance ideals and used the Doric style in its severest forms. He died in 1567 and was succeeded by Juan de Herrera and Juan de Minjores. The plan of the building is somewhat in the shape of a gridiron, and is thought thus to commemorate the fate of its patron saint, St. Laurence, upon whose feast day, 10 August, the battle of St-Quinten was fought. The church was consecrated in 1586, and the pantheon was completed in 1654. Charles III built some additions and the building generally was restored under Ferdinand VII. The Escorial has twice been devastated by fire, and in 1807 it was looted by the French troops. It is built of a light-coloured stone resembling granite, for the most part highly polished. The general plan is a parallelogram with a perimeter of 3000 feet; its area is about 500,000 square feet. There are four facades, the finest external aspect being on the southern side. The western or principal front is 744 feet long and 72 feet high, while the towers at each end rise about 200 feet. The main entrance is in the centre of this façade. Monegro's figure of Saint Laurence stands above the door. The vestibule is about eighty feet wide and leads into the Court of the Kings. To the right are the library, refectory, and convent; the college is on the left. The church is the finest of the several buildings contained within the walls of the Escorial. Its tall towers on either side, the immense dome, with its superimposed massive lantern and cross, and the portals of the vestibule, at once attract attention. The church is of stone throughout, huge in plan, and severe in its Doric simplicity. Pompeo Leoni designed and cast the

metal statues that ornament the splendid screen. A hall behind the ante-choir is known as the library. On the south side of the church is the Court of the Evangelists, a square of 166 feet with two-storied cloisters in the Grecian style. Adjoining it is the monastery of Saint Laurence. Both the monastery and the church were served by Hieronymite monks until 1835; in 1885 Augustinians took charge. The Augustinian monks also conduct the college, the building of which formed an important part of the great structure. On 10 Feb., 1909, it was slightly damaged by fire. The small room which Philip II occupied during the latter part of his life and in which he died adjoins the choir of the church. Through an opening in the wall he could see the celebration of the Mass when ill. The corridor of the Hall of the Caryatides is supposed to represent the handle of the gridiron.

The Escorial is a treasure-house of art and learning. The civilized world was searched to stock the library with great books and fine manuscripts. Greece, Arabia, and Palestine contributed, and the collection was at one time the finest in Europe, the Arabic documents being among the most remarkable of the manuscripts. From the Inquisition the library received about one hundred and forty works. It contains 7000 engravings and 35,006 volumes, including 4627 manuscripts; among the last named are 1886 Arabic, 582 Greek, and 73 Hebrew manuscripts, besides 2086 in Latin and other languages (cf. Casiri, *Bibliotheca arab.-hisp. Escur.*, Madrid, 1760-1770, 2 vols.). Among its manuscript treasures are a copy of the Gospels illuminated in gold on vellum, and the Apocalypse of Saint John richly illustrated. It also contains a large collection of church music, included in which are compositions of the monks, del Valle, Torrijos, and Corduba, besides many of the musical works of Antonio Soler. The most important tapestries of the Escorial are in the palace; many of them were designed by Goya and Maella. The weaving was done chiefly in Madrid, but those designed by Teniers were made in Holland. Since 1837 the finest pictures of the large collection of paintings have been placed in the museum at Madrid. Among the famous artists whose works were or still are in the Escorial are: Carducci, Giordano, Goya, Holbein, Pantoja, Reni, Ribera, Teniers, Tibaldo, Tintoretto, Titian, Velasquez, Zuccaro, and Zurburán.

THOMAS H. POOLE

Esdras (Ezra)

Esdras

(Or EZRA.)

I. ESDRAS THE MAN

Esdras is a famous priest and scribe connected with Israel's restoration after the Exile. The chief sources of information touching his life are the canonical books of Esdras and Nehemias. A group of apocryphal writings is also much concerned with him, but they can hardly be relied upon, as they relate rather the legendary tales of a later age. Esdras was of priestly descent and belonged to the line of Sardoc (I Esdras, vii, 1-5). He styles himself "son of Saraïas" (vii, 1), an expression which is by many understood in a broad sense, as purporting that Saraïas, the chief priest, spoken of in IV Kings, xxv, 18-21, was one of Esdras's ancestors. Nevertheless he is known rather as "the scribe" than as "priest": he was "a ready scribe [a scribe skilled] in the law of Moses", and therefore especially qualified for the task to which he was destined among his people.

The chronological relation of Esdras's work with that of Nehemias is, among the questions connected with the history of the Jewish Restoration, one of the most mooted. Many Biblical scholars still cling to the view suggested by the traditional order of the sacred text (due allowance being made for the break in the narrative -- I Esdras, iv, 6-23), and place the mission of Esdras before that of Nehemias. Others, among whom we may mention Professor Van Hoonacker of Louvain, Dr. T.K. Cheyne in England, and Professor C.F. Kent in America, to do away with the numberless difficulties arising from the interpretation of the main sources of this history, maintain that Nehemias's mission preceded that of Esdras. The former view holds that Esdras came to Jerusalem about 458 B.C., and Nehemias first in 444 and the second time about 430 B.C.; whereas, according to the opposite opinion, Esdras's mission might have taken place as late as 397 B.C. However this may be, since we are here only concerned with Esdras, we will limit ourselves to summarizing the principal features of his life and work, without regard to the problems involved, which it suffices to have mentioned.

Many years had elapsed after permission had been given to the Jews to return to Palestine; amidst difficulties and obstacles the restored community had settled down again in their ancient home and built a new temple; but their condition, both from the political and the religious point of view, was most precarious: they chafed under the oppression of the Persian satraps and had grown indifferent and unobservant of the Law. From Babylon, where this state of affairs was well known, Esdras longed to

go to Jerusalem and use his authority as a priest and interpreter of the Law to restore things to a better condition. He was in favour at the court of the Persian king; he not only obtained permission to visit Judea, but a royal edict clothing him with ample authority to carry out his purpose, and ample support from the royal treasury. The rescript, moreover, ordered the satraps "beyond the river" to assist Esdras liberally and enacted that all Jewish temple officials should be exempt from toll, tribute, or custom. "And thou, Esdras, appoint judges and magistrates, that they may judge all the people, that is beyond the river" (I Esdras, vii, 25). Finally, the Law of God and the law of the king were alike to be enforced by severe penalties. The edict left all Jews who felt so inclined free to go back to their own country. Some 1800 men, including a certain number of priests, Levites, and Nathinites, started with Esdras from Babylon, and after five months the company safely reached Jerusalem. Long-neglected abuses had taken root in the sacred city. These Esdras set himself vigorously to correct, after the silver and gold he had carried from Babylon were brought into the Temple and sacrifices offered. The first task which confronted him was that of dealing with mixed marriages. Regardless of the Law of Moses, many, even the leading Jews and priests, had intermarried with the idolatrous inhabitants of the country. Horror-stricken by the discovery of this abuse -- the extent of which was very likely unknown heretofore to Esdras -- he gave utterance to his feelings in a prayer which made such an impression upon the people that Sechenias, in their names, proposed that the Israelites should put away their foreign wives and the children born of them. Esdras seized his opportunity, and exacted from the congregation an oath that they would comply with this proposition. A general assembly of the people was called by the princes and the ancients; but the business could not be transacted easily at such a meeting and a special commission, with Esdras at its head, was appointed to take the matter in hand. For three full months this commission held its sessions; at the end of that time the "strange wives" were dismissed.

What was the outcome of this drastic measure we are not told; Esdras's memoirs are interrupted here. Nor do we know whether, his task accomplished, he returned to Babylon or remained in Jerusalem. At any rate we find him again in the latter city at the reading of the Law which took place after the rebuilding of the walls. No doubt this event had rekindled the enthusiasm of the people; and to comply with the popular demand, Esdras brought the Book of the Law. On the first day of the seventh month (Tishri), a great meeting was held "in the street that was before the watergate", for the purpose of reading the Law. Standing on a platform, Esdras read the book aloud "from the morning until midday". At hearing the words of the Law, which they had so much transgressed, the congregation broke forth into lamentations unsuited to the holiness of the day; Nehemias therefore adjourned the assembly. The reading was resumed on

the next day by Esdras, and they found in the Law the directions concerning the feast of the Tabernacles. Thereupon steps were at once taken for the due celebration of this feast, which was to last seven days, from the fifteenth to the twenty-second day of Tishri. Esdras continued the public reading of the Law every day of the feast; and two days after its close a strict fast was held, and "they stood, and confessed their sins, and the iniquities of their fathers" (II Esdras, ix, 2). There was a good opportunity to renew solemnly the covenant between the people and God. This covenant pledged the community to the observance of the Law, the abstention from intermarriage with heathens, the careful keeping of the Sabbath and of the feasts, and to various regulations agreed to for the care of the Temple, its services, and the payment of the tithes. It was formally recited by the princes, the Levites, and the priests, and signed by Nehemias and chosen representatives of the priests, the Levites, and the people (strange as it may appear, Esdras's name is not to be found in the list of the subscribers -- II Esdras, x, 1-27). Henceforth no mention whatever is made of Esdras in the canonical literature. He is not spoken of in connection with the second mission of Nehemias to Jerusalem, and this has led many to suppose that he was dead at the time. In fact both the time and place of his death are unknown, although there is on the banks of the Tigris, near the place where this river joins the Euphrates, a monument purporting to be Esdras's tomb, and which, for centuries, has been a place of pilgrimage for the Jews.

Esdras's role in the restoration of the Jews after the exile left a lasting impression upon the minds of the people. This is due mostly to the fact that henceforth Jewish life was shaped on the lines laid down by him, and in a way from which, in the main, it never departed. There is probably a great deal of truth in the tradition which attributes to him the organization of the synagogues and the determination of the books hallowed as canonical among the Jews. Esdras's activity seems to have extended still further. He is credited by the Talmud with having compiled "his own book" (that is to say Esd.-Nehem.), "and the genealogies of the book of Chronicles as far as himself" (Treat. "Baba bathra", 15a). Modern scholars, however, differ widely as to the extent of his literary work: some regard him as the last editor of the Hexateuch, whereas, on the other hand, his part in the composition of Esdras-Nehemias and Paralipomenon is doubted. At any rate, it is certain that he had nothing to do with the composition of the so-called Third and Fourth books of Esdras. As is the case with many men who played an important part at momentous epochs in history, in the course of time Esdras's personality and activity assumed, in the minds of the people, gigantic proportions; legend blended with history and supplied the scantiness of information concerning his life; he was looked upon as a second Moses to whom were attributed all institutions which could not possibly be ascribed to the former. According to Jewish traditions, he restored from memory -- an achievement little short of miraculous -- all the books of the Old

Testament, which were believed to have perished during the Exile; he likewise replaced, in the copying of Holy Writ, the old Phoenician writing by the alphabet still in use. Until the Middle Ages, and even the Renaissance, the crop of legendary achievements attributed to him grew up; it was then that Esdras was hailed as the organizer of the famous Great Synagogue -- the very existence of which seems to be a myth -- and the inventor of the Hebrew vocal signs.

II. THE BOOKS OF ESDRAS

Not a little confusion arises from the titles of these books. Esdras A of the Septuagint is III Esdras of St. Jerome, whereas the Greek Esdras B corresponds to I and II Esdras of the Vulgate, which were originally united into one book. Protestant writers, after the Geneva Bible, call I and II Esdras of the Vulgate respectively Ezra and Nehemiah, and III and IV Esdras of the Vulgate respectively I and II Esdras. It would be desirable to have uniformity of titles. We shall follow here the terminology of St. Jerome.

I Esdras

(Gr. Esdras B, first part; A.V. Ezra). As remarked above, this book formed in the Jewish canon, together with II Esdras, a single volume. But Christian writers of the fourth century adopted the custom -- the origin of which is not easy to assign -- of considering them as two distinct works. This custom prevailed to such an extent that it found its way even into the Hebrew Bible, where it has remained in use. On the other hand, the many and close resemblances undeniably existing between Esd.-Neh. and Par., and usually accounted for by unity of authorship, have suggested that possibly all these books formed, in the beginning, one single volume, for which the title of "Ecclesiastical Chronicle of Jerusalem" has been proposed as fairly expressing its contents. Should these books be regarded as independent, or as parts of a larger work? There is little discussion as to the union of I and II Esdras, which may well be considered as a single book. As to the opinion holding Esd.-Neh. and Par. to be only one work, although it seems gaining ground among Biblical students, yet it is still strongly opposed by many who deem its arguments unable to outweigh the evidence in the opposite direction. We should not expect to find in I Esdras, any more than in II Esdras, a complete account of the events connected with the Restoration, even a complete record of the lives of Esdras and Nehemias. The reason for this lies in the author's purpose of simply narrating the principal steps taken in the re-establishment of the theocracy in Jerusalem. Thus, in two parallel parts, our book deals

- with the return of the Jews under the leadership of Zorobabel;
- with the return of another band commanded by Esdras.

In the former, with the decree of Cyrus (i, 1-4) and the enumeration of the most prominent members of the caravan (ii), we read a detailed account of the rebuilding of the Temple and its successful completion, in spite of bitter opposition (iii-iv). The events therein contained cover twenty-one years (536-515). The latter part deals with facts belonging to a much later date (458 or 397). Opening with the decree of Artaxerxes (vii) and the census of the members of the party, it briefly relates the journey across the desert (viii), and gives all the facts connected with the enforcement of the law concerning marriages with foreign women (ix-x).

I Esd. is a compilation the various parts of which differ in nature, in origin, and even in language. At least three of the parts may be recognized:

- the personal memoirs of Esdras (vii, 27-ix, 15);
- lists very likely taken from public documents (ii, 1-70; vii, 1-5);
- Aramaic writings (iv, 7-vi, 18; vii, 12-26), supposed with some probability to be a portion of "a more comprehensive history of the restored community" (Stade).

These the compiler put together into the present shape, adding, of course, now and then some remarks of his own, or some facts borrowed from sources otherwise unknown to us. This compilatory character does not, as some might believe, lessen in any way the high historical value of the work. True, the compiler was very likely not endowed with a keen sense of criticism, and he has indiscriminately transcribed side by side all his sources "as if all were alike trustworthy" (L.W. Batten); but we should not forget that he has preserved for us pages of the highest value; even those that might be deemed of inferior trustworthiness are the only documents available with which to reconstruct the history of those times; and the compiler, even from the standpoint of modern scientific research, could hardly do anything more praiseworthy than place within our reach, as he did, the sources of information at his disposal. The composition of the work has long been attributed without discussion to Esdras himself. This view, taught by the Talmud, and still admitted by scholars of good standing, is, however, abandoned by several modern Biblical students, who, although their opinions are widely at variance on the question of the date, fairly agree, nevertheless, that the book is later than 330 B.C.

II Esdras See the Book of Nehemiah.

III Esdras (Gr. Esdras A; Protestant writers, I Esdras) Although not belonging to the Canon of the Sacred Scriptures, this book is usually found, *ne prorsus intereat*, in an appendix to the editions of the Vulgate. It is made up almost entirely from materials

existing in canonical books. The following scheme will show sufficiently the contents and point out the canonical parallels:

- III Esdras, i and II Par., xxxv, xxxvi -- History of the Kingdom of Juda from the great Passover of Josias to the Captivity.
- III Esdras, ii, 1-15 (Greek text, 14) and I Esdras, i -- Cyrus's decree. Return of Sassa-basar.
- III Esdras, ii, 16 (Gr. 15)-31 (Gr. 25) and I Esdras, iv, 6-24 -- Opposition to the rebuilding of the Temple.
- III Esdras, iii, 1-v, 6 -- Original portion. Story of the three pages. Return of Zorobabel.
- III Esdras, v, 7-46 (Gr. 45) and I Esdras, ii -- List of those returning with Zorobabel.
- III Esdras, v, 47 (Gr. 46)-73 (Gr. 70) and I Esdras, iii, 1-iv, 5 -- Altar of holocausts. Foundation of the Temple laid. Opposition.
- III Esdras, vi, vii and I Esdras, v, vi -- Completion of the Temple.
- III Esdras, viii, 1-ix, 36 and I Esdras, vii-x -- Return of Esdras.
- III Esdras, ix, 37-56 (Gr. 55) and II Esdras, vii, 73-viii, 12 -- Reading of the Law by Esdras.

The book is incomplete, and breaks off in the middle of a sentence. True, the Latin version completes the broken phrase of the Greek; but the book in its entirety probably contained also the narrative of the feast of Tabernacles (II Esdras, viii). A very strange feature in the work is its absolute disregard of chronological order; the history, indeed, runs directly backwards, mentioning first Artaxerxes (ii, 16-31), then Darius (iii-v, 6), finally Cyrus (v, 7-73). All this makes it difficult to detect the real object of the book and the purpose of the compiler. It has been suggested that we possess here a history of the Temple from the time of Josias down to Nehemias, and this view is well supported by the subscription of the old Latin version. Others suppose that, in the main, the book is rather an early translation of the chronicler's work, made at a time when Par., Esdras, and Neh. still formed one continuous volume. Be this as it may, there seems to have been, up to St. Jerome, some hesitation with regard to the reception of the book into the Canon; it was freely quoted by the early Fathers, and included in Origen's "Hexapla". This might be accounted for by the fact that III Esd. may be considered as another re-cension of canonical Scriptures. Unquestionably our book cannot claim to be Esdras's

work. From certain particulars, such as the close resemblance of the Greek with that of the translation of Daniel, some details of vocabulary, etc., scholars are led to believe that III Esd. was compiled, probably in Lower Egypt, during the second century B.C. Of the author nothing can be said except, perhaps, that the above-noted resemblance of style to Dan. might incline one to conclude that both works are possibly from the same hand.

IV Esdras Such is the title of the book in most Latin manuscripts; the (Protestant) English apocrypha, however, give it as II Esdras, from the opening words: "The second book of the prophet Esdras". Modern authors often call it the Apocalypse of Esdras. This remarkable work has not been preserved in the original Greek text; but we possess translations of it in Latin, Syriac, Arabic (two independent versions), Ethiopian, and Armenian. The Latin text is usually printed in the appendix to the editions of the Vulgate; but these editions miss seventy verses between vii, 35, and vii, 36. The missing fragment, which was read in the other versions, was discovered in a Latin manuscript by R.L. Bensly, in 1874, and has been since repeatedly printed. In the Latin the book is divided into sixteen chapters. The two opening (i, ii) and the two concluding (xv, xvi) chapters, however, which are not to be found in the Eastern translations, are unhesitatingly regarded by all as later additions, foreign to the primitive work.

The body of the Fourth Book, the unity of which appears to be unquestionable, is made up of seven visions which Esdras is supposed to have seen at Babylon, the thirtieth year after the destruction of Jerusalem (the date given is wrong by about a century).

- In the first vision (iii, 1-v, 20), Esdras is lamenting over the affliction of his people. Why does not God fulfil his promises? Is not Israel the elect nation, and better, despite her "evil heart", than her heathen neighbours? The angel Uriel chides Esdras for inquiring into things beyond his understanding; the "prophet" is told that the time that is past exceeds the time to come, and the signs of the end are given him.
- In another vision (v, 21-vi, 34), he learns, with new signs of the end, why God "doeth not all at once".
- Then follows (vi, 35-ix, 25) a glowing picture of the Messianic age. "My son" shall come in his glory, attended by those who did not taste death, Moses, Henoah, Elias, and Esdras himself; they shall reign 400 years, then "my son" and all the living shall die; after seven days of "the old silence", the Resurrection and the Judgment.
- Next (ix, 26-x, 60) Esdras beholds, in the appearance of a woman mourning for her son who died on his wedding day, an apocalyptic description of the past and future of Jerusalem.

- This vision is followed by another (xi, 1-xii, 39) representing the Roman Empire, under the figure of an eagle, and by a third (xiii) describing the rise of the Messianic kingdom.
- The last chapter (xiv) narrates how Esdras restored the twenty-four books of the Old Testament that were lost, and wrote seventy books of mysteries for the wise among the people.

The Fourth Book of Esdras is reckoned among the most beautiful productions of Jewish literature. Widely known in the early Christian ages and frequently quoted by the Fathers (especially St. Ambrose), it may be said to have framed the popular belief of the Middle Ages concerning the last things. The liturgical use shows its popularity. The second chapter has furnished the verse *Requiem oeternam* to the Office of the Dead (24-25), the response *Lux perpetua lucebit sanctis tuis* of the Office of the Martyrs during Easter time (35), the introit *Accipite jucunditatem* for Whit-Tuesday (36-37), the words *Modo coronantur* of the Office of the Apostles (45); in like manner the verse *Crastine die* for Christmas eve, is borrowed from xvi, 53. However beautiful and popular the book, its origin is shrouded in mystery. The introductory and concluding chapters, containing evident traces of Christianity, are assigned to the third century (about A.D. 201-268). The main portion (iii-xiv) is undoubtedly the work of a Jew -- whether Roman, or Alexandrian, or Palestinian, no one can tell; as to its date, authors are mostly widely at variance, and all dates have been suggested, from 30 B.C. to A.D. 218; scholars, however, seem to rally more and more around the year A.D. 97.

CHARLES L. SOUVAY

Louis-Philippe Mariauchau d'Esglis

Louis-Philippe Mariauchau d'Esglis

Eighth Bishop of Quebec, Canada; born Quebec, 24 April, 1710; died 7 June, 1788. After completing his studies at the Quebec Seminary, he was ordained priest in 1734 and appointed pastor of Saint-Pierre-d'Orléans. After thirty-five years of humble ministry, he was called to the episcopate and consecrated coadjutor of Quebec, 12 July, 1772, the first native of Canada to attain to the dignity of bishop. On the resignation of Bishop Briand, he succeeded to the See of Quebec 29 Nov., 1784. In his first pastoral letter he alludes to the appointment of a coadjutor, a precaution justified by age, infirmity, and the necessity of securing a successor. Bishop Jean-François Hubert was nominated coadjutor that same year, but the approval of the British Government was withheld till 1786. Bishop d'Esglis tried unsuccessfully to supply the dearth of clergy

by obtaining priests from France. The British Government favoured preferably the emigration of priests for the settlements in Upper Canada and the Maritime Provinces. Pending the arrival of a missionary for the Acadians, a layman was authorized to baptize and witness marriage contracts. Bishop d'Esgris issued (1787) a pastoral letter to all the faithful of the lower provinces, exhorting them to union and steadfastness in the Faith. He died in the fifty-fifth year of his priesthood and was buried at Saint-Pierre.

LIONEL LINDSAY

Eskil

Eskil

Archbishop of Lund, Skåne, Sweden; b. about 1100; d. at Clairvaux, 6 (7?) Sept., 1181; one of the most capable and prominent princes of the Church in Scandinavia. A man of profound piety, he was always zealous for the welfare of the church, and was a courageous and unselfish defender of the rights of the hierarchy in its struggle against the civil power and clerical usurpers. His father Christian was descended from an illustrious dynastic family of Jutland and was related to several royal families. When twelve years of age the young Eskil was received into the renowned cathedral school at Hildesheim. Here, during a dangerous illness, he was honoured by a vision of the Mother of God, who, chiding him with his frivolous conduct, saved him from imminent perdition and restored his health, demanding five measures of different varieties of corn as a thank-offering. This vision was interpreted to mean that Eskil would attain high ecclesiastical dignity and establish five confraternities. In 1131, his uncle, Asser (Asger), the first Archbishop of Lund, nominated him provost of the cathedral. In 1134 he was consecrated Bishop of Roskilde, and after Asser's death (1137) succeeded him as archbishop. He successfully defended the metropolitan rights of his see in spite of the protestations of the archbishops of Bremen. He received the pallium from Innocent II through the papal legate, Cardinal Theodignus, who, with many Scandinavian bishops, was present at the provincial Synod of Lund (1139). Eskil completed the new cathedral (Romanesque), which he consecrated in 1145. On this occasion he increased the membership and the endowments of the cathedral chapter, and improved the condition of the cathedral school.

On various occasions Eskil was involved in the internal political disputes of rival kings, even to the extent of being temporarily held captive in his own cathedral, for which he was, however, later indemnified by various land-grants. During the Crusades, Eskil, animated by the example of St. Bernard, also preached a crusade against the pagan Wends, which, unfortunately, proved unsuccessful. He, nevertheless, continued

his campaign with youthful ardour, even in his old age, till, after the conquest of Rügen, the Wends accepted Christianity. In 1152 Cardinal Nicholas Breakspear, as papal legate, was sent to Scandinavia to settle ecclesiastical affairs. Norway was constituted a separate ecclesiastical province with its metropolitan see at Trondhjem (Nidaros). Eskil remained Archbishop of Lund. He was also nominated Primate of Sweden and papal legate for the North. By a proper selection of persons for the higher ecclesiastical offices he effected an immense improvement in the standard of religious life. In 1161 he drew up a code of canon law for Skåne, which, ten years later, was introduced into Seeland. The monastic orders are especially indebted to Eskil. As Bishop of Roskilde he called the Benedictines to Næstved; and the monastery of the Regular Augustinians at Eskilsö near Roskilde most probably traces its origin to him. Later he established the Premonstratensian monastery in Tommerup, Skåne; the Knights of St. John also settled in Lund during his time. There was also, in Seeland, an establishment of Carthusian monks, but only for a short time. The Cistercian monks were especial favourites of Eskil, who founded their first monastery in 1144 at Herivadum near Helsingborg, which was soon followed by one at Esrom in Nordseeland (1154). From both of these various branches were established. Eskil corresponded with St. Bernard, whom he admired and revered. With a view to being admitted to the Cistercian Order he visited St. Bernard at Clairvaux in 1152. Bernard refused him admission, pointing out that his services as bishop would be more beneficial to the Church at large.

Hearing of Bernard's death (1153), Eskil made a pilgrimage to the saint's grave and thence to Rome, where all his archiepiscopal privileges were ratified by Pope Adrian IV (Breakspear). Returning he was imprisoned at Thionville (at the instigation of the Archbishop of Bremen?). In a dignified letter to the kings and the bishops of Denmark Eskil expressed his willingness rather to suffer innocently in defence of the Church's prerogatives than to be ransomed. Having obtained his liberty in 1158, Eskil returned home, where he found King Waldemar sole sovereign. When the latter took the part of Victor, the antipope, Eskil, faithful to Alexander III, took refuge in foreign parts. Excepting a pilgrimage to Jerusalem, he lived in France (Clairvaux), in close proximity to the pope. In 1164 he consecrated Stephen of Alvastra, a Cistercian monk, first Archbishop of Upsala. After Waldemar's reconciliation with Alexander III, Eskil returned home (1168). Subsequent to the solemn translation of the relics of the canonized (1169) martyr-duke, Knud Lavard (d. 1131), Waldemar's father, Eskil crowned the king's seven-year-old son at Ringsted, 1170. After another sojourn at Clairvaux (1174-76), the venerable archbishop received permission from the pope to resign and to nominate a successor. In the spring of 1177, in the presence of the king, numerous prelates, and a great concourse of people assembled in the cathedral of Lund, Eskil, having read the papal decree, declared that he resigned on his own initiative, laid the

official insignia on the altar, and, all consenting, designated Bishop Absalon of Roskilde as his successor. He then retired to Clairvaux, spending his last days as a simple monk. The Cistercians honour him as venerable. The question whether Eskil was married and had a daughter is a subject of controversy. Although the celibacy of the clergy did not generally obtain during his time, we may, nevertheless, infer from his strictly religious principles that Eskil did not ignore the provisions of canon law by marrying after his admission to Sacred orders.

PHILIPP BARON VON KETTENBURG

Eskimo

Eskimo

A littoral race occupying the entire Arctic coast and outlying islands of America from below Cook Inlet in Alaska to the mouth of the St. Lawrence, a distance of more than five thousand miles, including the coasts of Labrador, Baffin Land, and Ellesmere Land, with the west and south-east coasts of Greenland, the northern shores of Hudson Bay, and the Aleutian Islands, while one body, the Yuit, has even crossed Bering Strait, and is now permanently established on the extreme point of Siberia. Traditional and historical evidence go to show that the Eskimo formerly extended considerably farther south along Hudson Bay and the St. Lawrence, and perhaps even into New England. With the exception of the Aleut, who differ very considerably from the rest, the various small bands scattered throughout the vast stretch of territory are practically homogeneous, both linguistically and ethnologically, indicating long ages of slow development under similar and highly specialized conditions. In physique they are of medium stature, but strong and hardy, with yellow-brown skin and features, suggesting the Mongolian rather than the Indian, although there is no reason to suppose them of other than American origin. The only apparent admixture with the Indian occurs on their extreme southern frontier in Alaska. Owing to their constant exposure in the chilling waters, they are not long-lived. In character they are generally peaceable, cheerful, and honest, but with the common savage disregard of morality. The Aleut of the Alaskan peninsula and the Aleutian Islands speak a distinct language in two

dialects, while the others, including the Yuit of Siberia, speak practically but one language, in several dialects. The name by which they are commonly known is derived from an Algonkian term signifying "eaters of raw flesh". They call themselves Inuit, in various dialectic forms, meaning simply "people".

Living in a land of perpetual snow and ice, the Eskimo depend entirely upon hunting and fishing for a living, while the seafaring habit has made them perhaps the most expert and daring boatmen in the world. In summer they hunt the caribou and musk-ox on land; in winter they hunt the seal and polar bear in the water or on the ice floes. In travelling by sledge, and to some extent in hunting and sealing, they rely much upon an intelligent breed of dogs trained to harness. Their houses are grouped into little settlements never more than a day's journey from the ocean. Those for temporary summer use are generally simple tents of deer or seal-skin. Their winter homes are either subterranean excavations roofed over with sod and earth laid upon a framework of timber or whale ribs, or the dome-shaped structures built of blocks cut from the hardened snow, with passage-ways and smaller rooms of the same material, with sheets of clear ice for windows. The roof of the snow-house is sometimes lined on the inside with skins to prevent dripping from the melting snow. Besides the bed platforms extending around the sides of the rooms, with the spears, harpoons, and other hunting equipment, the most important items of furniture are the stone lamps, fed with whale oil, for heating, lighting, and cooking purposes. The characteristic woman's tool is the ulu or skin-dressing knife.

Their clothing is of skins with the hair outside, or of the intestinal membranes of the larger sea animals, there being little difference between the costumes of men and women. Tattooing is common among the women, labrets are used in some tribes, but trinkets are seldom worn and the face is not painted. Their food consists of meat and fish, commonly boiled in a stone kettle, with an abundance of blubber and oil, together with berries gathered in the short summer season. From lack of running water, crowded quarters and greasy environment, they are as a rule extremely filthy in person and habit. They are very ingenious and expert in the dressing of skins, the shaping of their fishing and hunting implements, and the construction of their skin canoes; they also display great artistic instinct and ability in the carving of designs in walrus ivory. The peculiar Eskimo kaiak or skin boat, made of dressed seal hides stretched around a framework of whale ribs or wood, with an opening in the top only large enough to accommodate the sitting body of one man, is one of the most perfect contrivances in the world for water travel, being light, swift, and practically unsinkable. It is propelled by means of a double paddle. The sledge is commonly a framework of drift-wood, but is sometimes made from the rib bones of whales, or even of a cigar-shaped mass of dried salmon wrapped in skins and frozen solid. The social organization is very simple,

each little village community being usually distinct and independent from the others, with little of tribal cohesion or chiefly authority, the head man being rather an adviser than a ruler. Established custom, however, has all the force of law. The bond of affection between parent and children is very strong, children being seldom corrected or punished, and old people being held in respect. Monogamy is the rule, but polygamy and polyandry are sometimes found. Violations of law, including murder, are punished by the injured individual or his nearest relations.

Their religion, like that of most primitive peoples, is a simple animism, interpreted by the *angakoks* or medicine-men and enforced by numerous taboos. All the powers of nature, animate and inanimate, on sea and land, are invoked or propitiated as the occasion arises. A special deity in the central region is an old woman of the sea, who presides over storms and sea-animals, the latter having been created from her own fingers. Some tribes believe in two souls, one of which remains near the dead body until it can enter that of a little child, while the other goes to one of several soul lands, either above or below the earth. There are numerous hunting and eating taboos and ceremonial precautions. Singing, music, story-telling, hand-games, mask-dances, and athletic competitions make up a large part of the home life. A peculiar institution among the central and eastern tribes is that of the so-called "nith song" (Norse *nith*, contention), or duel or satire, in which two rivals exhaust upon each other their capacity for ridicule until one or the other is declared victor by the company.

The history of the Eskimo goes back beyond the Columbian period as far at least as their first contact with the Scandinavians about the year 1000, almost simultaneously in Greenland and on the coast of Labrador or New England. They do not seem to have approached the neighbourhood of the Scandinavian settlements in South Greenland until about the end of the thirteenth century. In 1379 they made their first attack upon the Greenland colony, and a war began, of which all details are lost, but which ended in the complete destruction of the colony towards the close of the next century, so that even the way to Greenland was entirely forgotten, and on the second discovery of the island in 1585, by Davis, it was found occupied only by Eskimo, who remained in sole possession until the second colonization from Denmark in 1721, under the leadership of the missionary Hans Egede. Since then most of the Greenland Eskimo have been gradually civilized and Christianized under Lutheran and Moravian auspices.

In 1752 a Moravian missionary party made a landing on the Eskimo coast of Labrador, but was at once attacked by the natives, who killed six of them. In 1771, however, they attempted a mission settlement at Nain, this time with success, Nain now being the chief station on the Labrador coast, with five other subordinate stations, counting altogether some 1200 Christian Eskimo. Regular mission work in Alaska was begun among the Aleut by the Russian Orthodox church in 1794, resulting in a few

years in the complete Christianization of the Aleut, who had already, however, been terribly reduced by the wanton cruelty of the fur traders. Russian mission work is still carried on successfully both on the islands and along the west coast of Alaska. Protestant workers entered the field about 1880, beginning with the Presbyterians, followed successively by the Moravians, Episcopalians, the Swedish Evangelical Union, Congregationalists, Lutherans, and Friends, numbering now altogether about fifteen stations along the Eskimo coast of Alaska, besides others among the neighbouring Indians. Of special note in connexion with this work is the successful introduction of Siberian reindeer by Rev. Sheldon Jackson, Presbyterian, under government patronage, to supplement the diminishing food supply of the natives. In 1865 the noted Oblate missionary explorer Father Emil Petitot, descending the Mackenzie, visited the Eskimo at the mouth of the Anderson River on the Arctic coast of the British North-West, preached to them, and afterwards to those at the mouths of Mackenzie and Peel Rivers, and crossed over in 1870 into Alaska. Among the ethnologic results of his work in this region are a grammar and vocabulary of the Tchighit Eskimo (Paris, 1876). In 1886 the Jesuits entered Alaska, establishing their first mission among the Indians at Nulato on the Yukon, and proceeding later to the Eskimo, among whom they have now a number of flourishing stations, the principal being those of Holy Cross (Koserefsky), St. Mary's (Akularak), and one at Nome. They are assisted by the Sisters of St. Anne and the Lamennais Brothers and count some 1300 converts among the Eskimo, exclusive of Indians. The Eskimo grammar and dictionary of Father Francis Barnum, S.J. (1901) ranks as standard. No permanent mission work has ever been attempted by any denomination along the Arctic and Hudson Bay coast from Alaska to Labrador (see Alaska). The total number of Eskimo is estimated at about 29,000, viz. Greenland 11,000; Labrador 1400; Central Region 1100; Alaska Eskimo proper 13,000; Aleut 1000; Yuit of Siberia 1200.

JAMES MOONEY

Pierre Belain, Sieur d'Esnambuc

Pierre Belain, Sieur d'Esnambuc

Captain in the French marine, b. 1565, at Allouville, near Yvetot (Seine-Inferieure); d. at St. Christopher in Dec., 1636. He was the founder of the French colonies in the Antilles, and their first governor. Sailing from Dieppe, in 1625, on a brigantine of four guns with a crew of thirty-five men, he took possession of the island of St. Christopher. Returning to France in the following year he brought about the formation by Richelieu of the Company of the American Islands (Oct., 1626). At this time he was authorized to occupy St. Christopher and Barbadoes. Once established at St. Christopher he wished to make the influence of France felt throughout the Antilles, and for ten years directed all his energies to the accomplishment of this great work. Owing to his efforts, colonists were recruited throughout Lower Normandy, chiefly in the vicinity of Dieppe, Honfleur, and Havre-de-Grâce, and these established flourishing settlements in Guadeloupe, Dominica, Les Saintes, and Marie Galante. In September, 1635, d'Esnambuc recruited at St. Christopher one hundred and fifty determined men, and landing at Martinique, built in the following year the town of St.-Pierre. He died in the same year at St. Christopher, leaving to his nephews the government of the kingdom beyond the sea, which he had merely inaugurated. On hearing of his death Richelieu declared that the king and his realm had lost one of their best servants.

J. EDMOND ROY

Antonio Espejo

Antonio Espejo

A Spanish explorer, whose fame rests upon a notable expedition which he conducted into New Mexico and Arizona in 1582-3. According to his own statement, he was b. in Cordova, but the dates both of his b. and d. are unknown. Following the reports brought to Mexico from the north by Cabeza de Vaca and the Franciscan monk, Marcos de Nizza, a powerful expedition had been fitted out under the governor, Coronado, in 1540, which after passing through the territories of the Pueblo tribes of the Rio Grande, had penetrated as far as the province of Quivira, probably the country of the Wichita Indians on the Middle Arkansas, returning in the summer of 1542. Two

Franciscan volunteers, Father Juan de Padilla and a lay brother, Luis, remained behind, of whom the first was afterwards murdered by the tribe — the first missionary martyr of the United States — while the fate of the other nothing was ever known. Forty years later three other Franciscans undertook to establish missions among the Tigua, about the present Bernalillo, New Mexico. Soon rumours of their death at the hands of the Indians came back to Mexico, and finding the authorities dilatory in the matter, Espejo, a wealthy mining proprietor, offered to equip and lead a search expedition at his own expense. The offer was accepted and, being regularly commissioned, with only fourteen soldiers, a number of Christian Indians, and a cavalcade of horses and mules, he left San Bartolomé, Chihuahua, for the north on 10 Nov., 1582. From the junction of the Concho with the Rio Grande he ascended the latter stream, through populous tribes, to the pueblo of Puara, where he learned definitely of the murder of the three missionaries. Fearing punishment, the Indians had deserted their pueblo, and fled to the mountains.

Having accomplished his first purpose, Espejo determined to explore the unknown country beyond. After visiting several of the neighbouring pueblos he crossed over to the Zuni, near the present Arizona line, where he found three Christian Indians of Coronado's earlier expedition. Here several of the party decided to return, and with only nine soldiers and a party of Indians he pushed on to the Hopi (Moqui) villages in northern Arizona, where he met a friendly reception and was given guides to a mountain country farther on — apparently some fifty miles northward from the site of Prescott — where he procured some rich specimens of silver ore. Returning to the Rio Grande, he visited several other pueblos farther up the river and then went over to the Pecos, noting other mines by the way. In consequence of the threatening attitude of the Tanos tribe he finally decided to return to Mexico, arriving at his starting-point in September, 1583, having accomplished, without bloodshed and with a handful of men, as great results as had been obtained by Coronado with a whole army and at the cost of an exterminating warfare upon the Indians. He soon afterwards submitted a report, with a map of the regions explored, but his later proposition to organize a colonizing expedition was defeated by the jealousy of the viceroy.

JAMES MOONEY

Espen, Zeger Bernhard Van

Zeger Bernhard van Espen

(also called ESPENIUS)

A Belgian canonist, born at Louvain, 9 July, 1646; died at Amersfoort, Netherlands, 2 Oct., 1728. He completed his higher studies at Louvain, became priest in 1673, and

doctor of civil and canon law in 1675. He soon began to teach canon law at the University of Louvain where he was obliged to lecture only for six weeks during the summer vacation; the professor might explain one or other important chapter of the decretals, at his choice. He never accepted any other chair at the university, and he resigned even this position in order to devote himself entirely to study. He was consulted by all classes on account of his profound learning in canon law, and his famous work, "*Jus canonicum universum*", although it raised numerous just criticisms, still remains remarkable. The author is accused, not without reason, of having borrowed considerably from the works of his predecessors, notably from Thomassin, yet it must be recognized that Van Espen possessed the art of setting forth in a lucid and intelligible way the discipline of the ancient Church; he also cast light upon questions which up to his time had been very obscure. His clear and concise style gives to his work a value which the labours of his predecessors do not possess. He collected the most recent legislative decisions of the Church and discussed them with judgment, except where party spirit blinded him. He had also the incontestable merit of showing with precision the special law of Belgium. Benedict XIV recognized his authority in this matter. On the other hand he was a strenuous defender of the Gallican theories. He misconstrued the right of religious authority and exaggerated beyond measure the right of the civil power. It may be added, however, that he exalted and combated in turn all power, even the civil power. He exalted the power of the bishops in order to lessen that of the religious orders, and the rights of an extinct chapter in order to combat the powers of the pope. He gained for himself unpleasant notoriety in the Jansenist conflicts, by denying the importance of the famous distinction between right and fact with regard to the doctrine of Jansen; he declared that it was of little consequence to admit that Jansen had taught the propositions condemned by the Bull "*Unigenitus*" (1713) provided the doctrine itself was rejected.

The Jansenist quarrels led to Van Espen's ruin. On being consulted by the Jansenists of Holland with regard to the ordination of the Jansenist Bishop of Utrecht, Cornelius Steenoven, he pronounced in favour of this ordination, which had been performed without the authorization of the Holy See. An unsuccessful attempt has been made to justify Van Espen's conduct in this matter, on the ground that he merely declared that episcopal ordination performed by a single bishop was valid. This was not the whole question, nor was it indeed the principal question, viz. to determine whether an episcopal ordination, performed without the pope's consent, was admissible. His action in this matter and his Jansenist doctrines brought about his suspension *a divinis* by the Bishop of Mechlin. The latter summoned him to make a declaration of orthodox faith. At the order of the civil power, the University of Louvain condemned and deprived (1728) Van Espen of his university functions. In the meantime he fled,

and took refuge first at Maastricht, and afterwards at Amersfoort, where he found protection in the Jansenist community, and where he died. The Augustinian Désirant, professor at the University of Louvain, is accused of having fabricated false documents in the controversy with Van Espen. This struggle is known as the "Forgery of Louvain". Désirant was condemned by the academical authorities and banished forever from his native country. The best edition of the works of Van Espen, all of which are on the Index, is that published in four volumes at Louvain, 1753. A fifth volume, "Supplementum ad varias collectiones operum", was published at Brussels in 1768, and contains numerous biographical details.

DU PAC DE BELLEGARDE, *Vi de Van Espen* (Brussels, 1767); LAURENT, *Van Espen* (Paris, 1860); DE BAVAY, *Van Espen, jurisconsulte et canoniste Belge in Belgique Judiciaire* (Brussels, 1846), IV, 1463; VERHOEVEN, *Van Espen in Revue Catholique* (Louvain, 1846-47), IV, 497; DE RAM in BAKHUISEN, *Acta Zezeri Bernardi Van Espen circa missionem Hollandicam* (Mechlin, 1827).

A. VAN HOVE.

Claude d'Espence

Claude D' Espence

(ESPENCÆUS)

A French theologian, born in 1511 at Châlons-sur-Marne; died 5 Oct., 1571, at Paris. He entered the Collège de Navarre in 1536, and four years later was made rector of the University of Paris, even before receiving the doctorate, which was conferred on him in 1542. He was then called to the court of Cardinal de Lorraine. Some propositions in his Lenten sermons of 1543 were referred to the Sorbonne, and d'Espence was asked to explain or retract them. He was one of the theologians called to the consultation held at Mélnun in 1544 in relation to the Council of Trent. In 1547, having been sent to the council itself, then transferred to Bologna, he returned to France almost immediately, as the council was again adjourned. He went to another consultation held at Orléans in 1560. At the Conference of Poissy (1561) he argued against Beza in favour of tradition, the infallibility of the Church, the Sacrament of Order, etc. The same year an anonymous work was published on the veneration of images. This work was censured by the Sorbonne, and as d'Espence was believed to be its author, he was required to subscribe to the sixteenth article of the faculty, which was directed against Protestants.

D'Espence's works, collected in one volume (Paris, 1619), are: "Traité contre l'erreur vieil et renouvelé des Prédestinés" (Lyons, 1548); "Institution d'un prince chrétien" (Lyons, 1548), dedicated to Henry II; "De clandestinis matrimoniiis" (Paris, 1561), in

which the parents' consent is held to be necessary for the validity of marriage; "Cinq sermons ou traités . . ." (Paris, 1562); "Libellus de privatâ et publicâ missâ", which shows that in the primitive Church Mass was not celebrated unless some of the faithful were present; "De continentia" (Paris, 1565); "Commentarius in epistolam primam ad Timotheum" (Paris, 1561); "Comm. in posteriorem epist. ad Timotheum" (Paris, 1564); "Comm. in epist. ad Titum" (Paris, 1568). To these are added a few other works, treatises, discourses, sermons, conferences, and poems.

HURTER, *Nomenclator*, I, 6; DUPIN, *Nouvelle Bibliothèque des auteurs ecclésiastiques* (Paris, 1710), XVI, 104; SIMON, *Hist. crit. des principaux commentaires du N. T.* (Rotterdam, 1693), 591; KERKER in *Kirchenlex.*, IV, 906; BARTHÉLEMY, *Etude biog. sur Claude d'Espence* (Châlons-sur-Marne, 1853).

C. A. DUBRAY.

Vincent Espinel

Vincent Espinel

Poet and novelist; born at Ronda (Malaga), Spain, 1544; died at Madrid, 1634. He studied at Salamanca and while still young went as a soldier to Italy and Flanders. Returning to Ronda, he took Holy orders and was made chaplain of the hospital at that place. Later, he went to Madrid, where he lived with Lope de Vega whose friend and teacher he was, and died there in poverty, as we are told by Lope in his "Laurel de Apolo". In 1618 he published at Barcelona a romance descriptive of Spanish manners entitled "Relaciones de la Vida y Hechos del Escudero Marcos de Obregón". The work attracted attention at the time, and afterwards became famous because of several imitations and because of the controversies which it caused. It has been thought that many of the adventures of the hero are to a great extent drawn from those in the life of Espinel himself. The work is admirably written, is filled with wise maxims, and the language is pure and simple. Le Sage, the author of "Gil Blas de Santillana", has been accused of borrowing many incidents and characters from Espinel's work. As a poet, Espinel also enjoyed some reputation. He translated Horace's "Art of Poetry", and published his own "Diversas Rimas" in Madrid in 1591. He was the inventor of the measure known at first as the "espinela" and later as the "decima", because it hasten syllables. He was also noted for his musical taste. He added the fifth string to the national guitar. The "Marcos de Obregón" was translated into English by Algernon Langton (London, 1816), into German by Tieck (Breslau, 1827), with a preface and notes, and into French by Vidal d'Audiguier (1816).

TIECK, *Kritische Schriften* (1848); *Biblioteca de Autores Españoles* (1848-86).

VENTURA FUENTES.

Alonso de Espinosa

Alonso De Espinosa

Spanish priest and historian of the sixteenth century. Little is known of his early life. He is first heard of towards the end of the sixteenth century in Guatemala where he had become a Dominican. It was while he was in Central America that he first heard of the miracles of Our Lady of Candelaria. This was an image of the Virgin and Child that had been among the Guanches of Tenerife since long before their conversion to Christianity, and had been venerated not only by the Guanches, but later by their conquerors, the Spaniards. Inspired by the fame of this image, Espinosa soon found a member of the fraternity which had possession of it, and resolved to make researches and write a history of the image and its miracles. The result was his "Guanches of Tenerife" published at Seville in 1594. Although the author's main purpose was to record the history of Our Lady of Candelaria, the work is important as being on the whole the best account of the Guanches, a lost race which has left scarcely any remains, even of their language; and also, though less significant, because he gives a good account of the conquest and settlement of the Canary Islands by the Spaniards. He divides his work into four books, in the first of which he describes the Island of Tenerife, gives its early history, and an account of its inhabitants, their customs, food and dress, marriages, training for war, and mode of interment. The second book gives a detailed history of the image, from its mysterious appearance, on the east coast of the island, to Espinosa's own time. The third book is devoted to the invasion, conquest, and settlement of the island by the Spaniards. The fourth and last book contains an enumeration of various cures and other miracles performed by the image. A reprint of Espinosa's book appeared at Santa Cruz in 1848, as one of the "Biblioteca Isleña" series. A translation by Sir Clements Markham was published by the Hakluyt Society in London in 1907.

VENTURA FUENTES.

Espousals

Espousals

An Espousal is a contract of future marriage between a man and a woman, who are thereby affianced. The ecclesiastical law governing this contract was amended by the pontifical decree "Ne Temere", on espousals and marriages, which was published

2 Aug., 1907, and took effect 19 April (Easter), 1908. For the old legislation see BETROTHAL; the present article will be confined to the new.

Regarding espousals the decree enacts as follows: "Only those espousals are held to be valid and to beget canonical effects which are made in writing, signed by both parties, and either by the parish priest or the ordinary of the place, or at least by two witnesses. In case one or both of the parties be unable to write, this fact is to be noted in the document, and another witness is to add his signature to the contract as above, together with that of the parish priest or the ordinary of the place, or the two witnesses. Until Easter of 1908, there was no written document prescribed for espousals, except for Spain. Like other contracts, the promise of marriage was supposed to bind the parties making it according to prevailing law or custom. That caused many difficulties which necessitated this law. Private, clandestine espousals are henceforth of no value in the eyes of the Church. In the United States engagements were, as a rule, not considered effective enough to entail the impediment of public honesty which, unless the engagement were properly revoked, would render null and void the marriage of either affianced party with a blood-relation in the first degree of the other affianced party, and make sinful marriage with any other person not so related, unless the engagement had been rightly broken. These are the canonical effects which are not begotten unless the espousals are made in writing, whether by filling out a blank formula or by writing the document entirely.

As to the obligation of contracting espousals in writing, it is to be noted that the law does not concern itself with the promise of marriage as a matter of conscience; only with establishing the fact that espousals have no legal value and will not be considered in case of contention by ecclesiastical courts, unless they are in writing. Hence, *in foro interno* the Church leaves the matter to the confessor. The law suggests no particular formula for the contract of espousals. It must, however, express the promise of future marriage. There must be no condition attached contrary to the nature or laws of Christian marriage. No time is assigned by the law within which the promise must be fulfilled; still the time should be reasonable and accord with the common teaching of competent authorities. The document must be signed by both parties — man and woman — promising to marry each other on or within some definite date. If either or both are unable to write their names, that must be noted in the document. They must, of course, affix their signatures somehow, which must be attested by a special witness. In addition, either the parish priest or ordinary must sign it; both need not sign it; the signature of one only is required. By ordinary is meant the bishop of the diocese where the parties happen to be, or his vicar-general, or any one exercising episcopal jurisdiction, as for instance, the administrator when the see is vacant. By parish priest, as used in the present decree, is to be understood not only the priest who

legitimately presides over a parish that is canonically erected, but also, in localities where parishes are not canonically erected, the priest to whom the care of souls has been legitimately entrusted in any specified district, and who is equivalent to a parish priest; and also, in missions where the territory has not yet been perfectly divided, every priest generally deputed for the care of souls in any station by the superior of the mission. The ordinary or parish priest cannot depute any other priest to sign in their stead (Reply of S. Congregation of Council, 30 March, 1908). If the signature of the ordinary or of the parish priest cannot be obtained, then at least two witnesses must sign. Their signatures are not needed if either of the foregoing have signed. The witnesses should of course be competent, though they differ in age and sex. The local ecclesiastical authorities are to decide where the document is to be deposited. The new law does not provide for the annulment of espousals. The reasons that formerly sufficed to annul them still remain. If espousals were made as prescribed by the new law, their binding force continues until they shall have been dissolved by proof of either or both parties claiming their dissolution.

JOSEPH SELINGER.

Espousals of the Blessed Virgin Mary

Espousals of the Blessed Virgin Mary

(DESPONSATIO BEATÆ MARLÆ VIRGINIS)

A feast of the Latin Church. It is certain that a real matrimony was contracted by Joseph and Mary. Still Mary is called "espoused" to Joseph ("his mother Mary was espoused to Joseph", Matt., i, 18) because the matrimony was never consummated. The term *spouse* is applied to married people until their marriage is consummated (Colvenerius, Cal. Marian., 23 Jan.). Peter d'Ailly, chancellor of the University of Paris. (died 1420), and his famous disciple, Jean Charlier, called Gerson, were the first energetic propagators of the devotion in honour of St. Joseph. Gerson worked many years to effect the institution of a special votive feast (Thursday of ember week in Advent), the object of which should be the virginal espousal of Mary and Joseph. Gerson's friend, Henry Chicoti, canon of the cathedral chapter of Chartres, had bequeathed a certain sum for the celebration in the cathedral of this votive feast, for which Gerson had composed a proper Office. It seems that Gerson carried out the will of his friend, but tradition does not tell us on what day the feast was celebrated.

The first definite knowledge of a feast in honour of the espousals of Mary dates from 29 Aug., 1517, when with nine other Masses in honour of Mary, it was granted by Leo X to the Nuns of the Annunciation, founded by Sainte Jeanne de Valois. This feast was celebrated on 22 October as a double of the second class. Its Mass, however, honoured the Blessed Virgin exclusively; it hardly mentioned St. Joseph and therefore did not correspond to the idea of Gerson. Also purely as a feast of Mary it appears in the Missal of the Franciscans, to whom it was granted 21 Aug., 1537, for 7 March (double major). About the same time the Servites obtained the feast for 8 March. The Office of the Nativity of Mary was recited, changing the word *Nativitas* to *Desponsatio*. After the religious orders, among the dioceses which adopted the feast of the Espousals of Mary, Arras takes the lead. It has been kept there since 23 Jan., 1556. The first proper Office was composed by Pierre Doré, O. P. (died 1569), confessor of Duke Claude of Lorraine. This Office followed the outlines given by Gerson and commemorated both Joseph and Mary. Pierre Doré in 1546 unsuccessfully petitioned Paul III to extend the feast of the *Desponsatio B. M. V.* to the Universal Church. But even without the recommendation of the Apostolic See, the feast was adopted by many Churches. In Moravia it was in the sixteenth century kept on 18. July. In subsequent times Rome did not favour any further extension of the feast, but after it had been refused (1655) to the King of Spain, it was granted to the German Emperor for Austria, 27 Jan., 1678 (23. Jan.); in 1680 it was conceded to Spain, but transferred (13 July, 1682) to 26 Nov., because in Spain the feast of St. Ildephonsus or St. Raymond is kept 23. Jan. In 1680 it was extended to the entire German Empire, 1689 to the Holy Land (double, second class), 1702 to the Cistercians (20 Feb.), 1720 to Tuscany, and 1725 to the Pontifical States. In our days it is kept in nearly the entire Latin Church on 23 Jan., in the Spanish-speaking countries on 26 Nov., but it has never been extended to the Universal Church. Since Pius V abolished the Office of Pierre Doré and introduced the modern Office, it is again a feast of Mary. The commemoration of St. Joseph in Mass, Vespers, Lauds (decree 5 May, 1736) can only be made by a special privilege.

Essence and Existence

Essence and Existence

(Lat. *essentia, existentia*)

Since they are transcendentals, it is not possible to put forward a strict definition of either of the subjects of the present article. *Essence*, however, is properly described

as that whereby a thing is what it is. *Existence* is that whereby the essence is an actuality in the line of being.

ESSENCE

Essence is properly described as that whereby a thing is what it is, an equivalent of the *to ti en einai* of Aristotle (Metaph., VII, 7). The essence is thus the radical or ground from which the various properties of a thing emanate and to which they are necessarily referred. Thus the notion of the essence is seen to be the abstract counterpart of the concrete entity; the latter signifying that which is or may be (*ens actu, ens potentiâ*), while the former points to the reason or ground why it is precisely what it is. As furnishing in this manner an answer to the question What? (*Quid?*) — as, e.g., What is man? — essence is equivalent to *quiddity*; and thus, as St. Thomas remarks (I, Q. iii, a. 3), the essence of a thing is that which is expressed by its definition.

Synonyms

Nature

Essence and nature express the same reality envisaged in the two points of view as being or acting. As the essence is that whereby any given thing is that which it is, the ground of its characteristics and the principle of its being, so its nature is that whereby it acts as it does, the essence considered as the foundation and principle of its operation. Hence again St. Thomas: "Nature is seen to signify the essence of a thing according as it has relation to its proper operation" (De ente et essentia, cap. i).

Form

Furthermore, essence is also in a manner synonymous with form, since it is chiefly by their formal principle that beings are segregated into one or other of the species. Thus, while created spiritual things, because they are not composed of matter and form, are specifically what they are by reason of their essences or "forms" alone, the compounded beings of the corporeal world receive their specification and determination of nature, or essence, principally from their substantial forms.

Species

A further synonym of essence is species; but it is to be carefully noted that essence in this connexion is used rather with a logical or metaphysical connotation than with a real or physical one. This distinction is of considerable importance. The real or physical essence of compound entities consists in, or results from, the union of the constituent parts. Thus if we consider man as a being composed of matter and form, body and soul, the physical essence will be the body and soul. Apart from any act of abstraction, body and soul exist in the physical order as the constituents of man. On the other hand, we may consider man as the result of a composition of *genus proximum* and *differentia ultima*, i. e. of his animality and his rationality. Here the essence, humanity, is metaphysical or logical. Thus, while the real essence, to speak still only of

composite beings, consists in the collection of all those physical component parts that are required to constitute the entity what it is, either actually or potentially existent, without which it can be neither actual nor potential, the logical essence is no more than the composition of ideas or notions, abstracted mentally and referred together in what are known as "second intentions".

Distinction between metaphysical and physical essence

This consideration provides a basis for the distinction of essences according to the degree of physical and metaphysical complexity or simplicity which they severally display. The Supreme Being has — or rather is — a unique and utterly simple essence, free from all composition, whether physical or metaphysical. Moreover, in God — otherwise, as we shall see, than in creatures — there is no distinction of any kind between His essence and His existence. Spiritual created beings, however, as free from the composition of matter and form, have physically simple essences; yet they are composite in that their essences are the result of a union of genus and differentia, and are not identical with their existence. In the angel the essence is the species consequent on this union. Corporeal creatures not only share in metaphysical complexity of essence, but have, on account of their material composition, a physical complexity as well.

The characteristic attributes of the essence are immutability, indivisibility, necessity, and infinity.

Immutability.— Since the essence of anything is that whereby the thing is what it is, it follows directly from the principle of contradiction that essences must be immutable. This, of course, is not true in the sense that physical essences cannot be brought into being or cease to exist, nor that they cannot be decomposed into their constituent parts, nor yet that they are not subject to accidental modification. The essence of God alone, as stated above, is so entirely free from any sort of composition that it is in the strictest sense immutable. Every essence, however, is immutable in this, that it cannot be changed or broken up into its constituent parts and yet remain the same essence. The attribute is transcendental and is applied to essence precisely as it is essence. Thus, while the essence of any given man may be broken up into body and soul, animality and rationality, man as man and humanity as humanity is changeless. One individual ceases to exist; the essence itself, whether verified or not in concrete actuality, persists. The definition, "man is a rational animal", is an eternally immutable truth, verifiable whenever and wherever the subject man is given, either as a concrete and existent entity, or as a mere potentiality.

Indivisibility.— Similarly, essences are said to be indivisible; that is to say, an essence ceases to be what it is when it is broken up into its constituents. Neither body nor soul alone is man. Neither animality nor rationality, taken separately, is humanity. Therefore, precisely as essence, it is indivisible.

Necessity.— In like manner necessity is predicated of essences. They are necessary in that, though they may be merely possible and contingent, each must of necessity always be itself. In the order of actual being, the real essence is necessarily what it is, since it is that whereby the thing is what it is; in the order of the merely possible, it must necessarily be identical with itself.

Infinity.— Finally, essences are said to be eternal and infinite in the negative sense that, as essences, there is no reason for their non-existence, nor for their limitation to a given number of individuals in any species.

From what has been said, the distinction between essence considered as physical and as metaphysical will be apparent. It is the metaphysical essence that is eternal, immutable, indivisible, necessary, etc.; the physical essence that is temporal, contingent, etc. In other words, the metaphysical essence is a formal universal, while the physical essence is that real particularization of the universal that provides the basis for the abstraction.

Non-Scholastic views

So far the present article has been occupied in exhibiting the Scholastic view with regard to essence, and in obtaining a certain precision of thought rather than in raising any problems intimately connected with the subject. Notice must be taken, however, of a philosophical tradition which has found adherents mainly among British philosophers and which is at variance with the Scholastic. This tradition would treat as futile and illusory any investigation or discussion concerning the essences of things. By those who hold it, either

- the fact of essence is flatly denied and what we conceive of under that name is relegated to the region of purely mental phenomena;
- or, what practically amounts to the same thing, that fact is judged to be doubtful and consequently irrelevant;
- or again, while the fact itself may be fully admitted, essence is declared to be unknowable, except in so far as we may be said to know that it is a fact.

Of those who take up one or other of these positions with regard to the essence of things, the most prominent may be cited.

Hobbes and Locke, Mill, Hume, Reid, and Bain, the Positivists and the Agnostics generally, together with a considerable number of scientists of the present day, would not improperly be described as either doubtful or dogmatically negative as to the reality, meaning, and cognoscibility of essence. The proponents and defenders of such a position are by no means always consistent. While they make statements of their

case, based for the most part on purely subjective views of the nature of reality, that the essences of beings are nonentities, or at least unknowable, and, as a consequence, that the whole science of metaphysics is no more than a jargon of meaningless terms and exploded theories, they, on the other hand, express opinions and make implicit admissions that tell strongly against their own thesis. Indeed, it would generally seem that these philosophers, to some extent at least, misunderstand the position which they attack, that they combat a sort of intuitive knowledge of essences, erroneously supposed by them to be claimed by Scholastics, and do not at all grasp the theory of the natures of things as derived from a painstaking consideration of their characteristic properties. Thus even Bain admits that there may in all probability be some one fundamental property to which all the others might be referred; and he even uses the words "real essence" to designate that property. Mill tells us that "to penetrate to the more hidden agreement on which these more obvious and superficial agreements (the *differentiæ* leading to the greatest number of interesting *propria*) depend, is often one of the most difficult of scientific problems. And as it is among the most difficult, so it seldom fails to be among the most important". Father Rickaby in his "General Metaphysics" gives the citations from both Mill and Bain, as well as an important admission from Comte, that the natural tendency of man is to inquire for persistent types, a synonym, in this context, for essences. The philosophical tradition, or school, to which allusion is made — although we have anticipated its assertions by the admissions into which its professors have allowed themselves to be drawn by the exigencies of reason and human language — may be divided roughly into two main classes, with their representatives in Locke and Mill. Locke got rid of the old doctrine by making the "supposed essences" no more than the bare significations of their names. He does not, indeed, deny that there are real essences; on the contrary, he fully admits this. But he asserts that we are incapable of knowing more than the nominal or logical essences which we form mentally for ourselves. Mill, though, as we have seen, he occasionally abandons his standpoint for one more in keeping with the Scholastic view, professedly goes further than Locke in utterly rejecting real essences, a rejection quite in keeping with his general theory of knowledge, which eliminates substance, causality, and necessary truth.

The considerations previously advanced will serve to indicate a line of argument used against scepticism in this matter. The Scholastics do not and never have claimed any direct or perfect acquaintance with the intimate essences of all things. They recognize that, in very many cases, no more than an approximate knowledge can be obtained, and this only through accidental characteristics and consequently by a very indirect method. Still, though the existence of the concrete beings, of which the essences are in question, is contingent and mutable, human knowledge, especially in the field of

mathematics, reaches out to the absolute and necessary. For example, the properties of a circle or triangle are deducible from its essence. That the one differs specifically from the other, and each from other figures, that their diverse and necessary attributes, their characteristic properties, are dependent upon their several natures and can be inferred by a mathematical process from these — so much we know. The deductive character of certain geometrical proofs, proceeding from essential definitions, may at least be urged as an indication that the human mind is capable of grasping and of dealing with essences.

Similarly, and even from the admissions of the opponents of the Scholastic tradition given above, it may reasonably be maintained that we have a direct knowledge of essence, and also an indirect, or inductive knowledge of the physical natures existent in the world about us. The essences thus known do not necessarily point to the fact of existence; they may or may not exist; but they certify to us what the things in question are. The knowledge and reality of essences emerges also from the doctrine of universals, which, although formally subjective in character, are true expressions of the objective realities from which they are abstracted. As Father Rickaby remarks: "In the rough the form of expression could hardly be rejected, that science seeks to arrive at the very nature of things and has some measure of success in the enterprise"; and again, "In short, the very admission that there is such a thing as physical science, and that science is *cognitio rerum per causas* — a knowledge of things, according to the *rationale* of them — is tantamount to saying that some manner of acquaintance with essences is possible; that the world does present its objects ranged according to at least a certain number of different kinds, and that we can do something to mark off one kind from another." (General Metaphysics, c. III.)

EXISTENCE

Existence is that whereby the essence is an actuality in the line of being. By its actuation the essence is removed from the merely possible, is placed outside its causes, and exists in the world of actual things. St. Thomas describes it as the first or primary act of the essence as contrasted with its secondary act or operation (I Sent., dist. xxxiii, Q. i, a. 1, ad 1); and again, as "the actuality of all form or nature" (Summa, I, Q. iii, a. 4). Whereas the essence or quiddity gives an answer to the question as to *what* the thing is, the existence is the affirmative to the question as to *whether* it is. Thus, while created essences are divided into both possible and actual, existence is always actual and opposed by its nature to simple potentiality.

With regard to the existence of things, the question has been raised as to whether, in the ideal order, the possible is antecedent to the actual. The consideration here does not touch on the real or physical order, in which it is conceded by Scholastics that the potentiality of creatures precedes their actuality. The unique actuality, pure and simple

(as against such theorists as von Hartmann, maintaining an absolute primitive potentiality of *all* existence), that necessarily precedes all potentiality, is that of God, in Whom essence and existence are identical. We are concerned with the question: Is the concept of a possible entity prior to that of an existing one? Rosmini answers this question in the affirmative. The School generally takes the opposite view, maintaining the thesis that the primitive idea is of existent entity — that is, essence as actualized and placed outside of its causes — in the concrete, though confused and indeterminate. Such an idea is of narrow intension, but extensively it embraces all being. The thesis is supported by various considerations, such as that the essence is related to its existence as potential to actual, that the act generally is prior to potentiality, and that this latter is known, and only known, through its corresponding actuality. Or, we know the possible being as that which may be, or may exist; and this necessary relation to actual existence, without which the possible is not presented to the mind, indicates the priority, in the line of thought, of the actually existent over the merely possible. Existence is thus seen to be in some sense distinguished from the essence which it actualizes.

The question agitated in the School arises at this point: What is the nature of the distinction that obtains between the physical essence and the existence of creatures? It is to be borne in mind that the controversy turns not upon a distinction between the merely possible essence and the same essence as actualized, and thus physically existent; but on the far different and extremely nice point as to the nature of the distinction to be drawn between the actualized and physically existent essence and its existence or actuality, by which it is existent in the physical order. That there is no such distinction in God is conceded by all. With regard to creatures, several opinions have been advanced. Many Thomists hold that a real distinction obtains here and that the essence and existence of creatures differ as different entities. Others, among them Dominicus Soto, Lepidi, etc., seem to prefer a distinction other than real. The Scotists, affirming their "formal distinction", which is neither precisely logical nor real, but practically equivalent to virtual, decide the point against a real distinction. Suarez, with many of his school, teaches that the distinction to be made is a logical one. The principal arguments in favour of the two chief views may be summarized as follows:

—

Thomists:

- If essence and existence were but one thing, we should be unable to conceive the one without conceiving the other. But we are as a fact able to conceive of essence by itself.
- If there be no real distinction between the two, then the essence is identical with the existence. But in God alone are these identical.

Suarez:

- A real physical essence is actual in the line of being and not merely possible. But this actuality must belong to it, as a physical essence; for it is, *ex hypothesi*, neither nothing nor merely possible, and the actuality of an essence is its existence. Cardinal Franselin cast the argument in this form: "Est omnino evidens in re positâ extra suas causas, in statu actualitatis, ne ratione quidem abstrahi posse formalem existentiam" (De Verbo Incarnato).
- It is inconceivable how the existence of a real or physical essence should differ from the essence of its existence.

These positions are maintained, not only by argument, but by reference to the authority and teaching of St. Thomas, as to whose genuine doctrine there is considerable difference of opinion and interpretation. It does not, however, appear to be a matter of great moment, as Soto remarks, whether one holds or rejects the doctrine of a real distinction between essence and existence, so long as the difference between God and His creatures is safe-guarded, in that existence is admitted to be of the essence of God and not of the essence of creatures. And this would seem to be sufficiently provided for even in the supposition that created essences are not distinct from their existences as one thing is from another, but as a thing from its mode.

FRANCIS AVELING

Essenes

Essenes

One of three leading Jewish sects mentioned by Josephus as flourishing in the second century B.C., the others being the Pharisees and the Sadducees.

Concerning their origin, history, and tenets there has been much inconclusive controversy. The only ancient authorities we have are a few paragraphs in Philo Judeaeus, a somewhat lengthier description in Josephus, and a scanty notice in Pliny. The following synopsis is derived mainly from the first two.

They are styled *Essæi* by Philo, who derives it from *hosios*, "holy", and *Essæi* and *Esseni* by Josephus. Their numbers according to both authors was about 4000 and their chief place of residence along the west side, but away from the shore, of the Dead Sea. They also dwelt in other, but mostly secluded, parts and small towns of Palestine; yet some were found in cities. The sect arose about 150 B.C. (the first-named Essene is Judas, 110 B.C.) and disappeared towards the end of the first century A.D. They worshipped one God, Creator and Ruler of all things, omnipotent and omniscient. Moses was held in very high esteem and to blaspheme his name meant death. The sun was held in such reverence as to awaken a suspicion of idolatry. An all-disposing Fate was admitted, yet free will, apparently, was not denied. They refused to join in the Temple sacrifices through fear of pollution, though they sent gifts thither; it seems that no blood-sacrifice was offered by them, as they claimed that a reverent mind was the best offering to God. The Sabbath was observed with the most rigorous exactitude, not even the calls of nature being answered. Assembled in their meeting-places, where they sat according to seniority, the scripture was read and explained, generally in an allegorical manner, by some wise member. They washed frequently, as extreme importance was attached to ceremonial purity, and they followed scrupulously the prescriptions against levitical defilements; even for a junior to touch a senior was pollution for the latter. What their esoteric doctrines were is not known. Death was welcomed, as they held "that their bodies were corruptible, and the matter composing them is not lasting, but souls are immortal and live forever, and proceeding from the most subtle ether having been drawn into bodies as into prisons by some natural longing. But when they are set free from the bonds of flesh, then they rejoice as being freed from a long servitude and mount upwards. And agreeing with the opinion of the Greeks they declare that the good dwell beyond the ocean in a place which is never oppressed by snow or rainstorms or intense heat, but is always calm and refreshed by a cool breeze breathing from the ocean. To bad souls they allot a gloomy, tempestuous cave full of never-ending torments" (Jos. Bell. Jud. I, ii, 8). Some conclude from the words just quoted that the Essenes disbelieved in the resurrection of the body.

Among the virtues the Essenes cultivated especially obedience, truthfulness, continence, justice, and temperance; they paid great attention to the sick, respect to the aged, and showed marked kindness and hospitality to strangers. All men were regarded as equal, and slavery was regarded as contrary to nature. Those guilty of great crimes were punished by long exclusion or complete excommunication which, since they

were not allowed to eat anything prepared by outsiders, entailed always great hardship and often death. Philosophy was rejected as useless and beyond man's capacity, but ethics was studied with zeal. They searched for medicinal remedies in nature, as they devoted special care to the sick irrespective of creed, and investigated the properties of minerals. They laid claim to magical powers and ability to predict. For the latter some cases are given by Josephus, among them that of the Essene, Manahem, who foretold Herod the Great's kingship when he was a boy without any royal prospects. All things were held in common, their very houses not being their own. They laboured principally at agricultural pursuits or made farm implements or household articles, but never weapons of war, which they were not allowed to carry, except a staff for defense when travelling. Harvests and wages went to the stewards, who gave as each needed. Clothes and shoes were retained until worn out. No trading was allowed except barter. Anointing with oil was considered a defilement. Servants were forbidden as tempting men to injustice. Their rulers or presidents were elected, likewise their priests -- if they can be so called -- and their stewards. In towns an officer was appointed to look after travelling brethren. One-hundred members constituted a court of justice whose unanimous decision was irrevocable. The members were divided into four classes. The daily routine is given as follows: They were up before daybreak and spoke of no profane subject before the sun, and to it they addressed a prayer as if soliciting it to rise. Each was sent then to his appointed employment at which he worked until the fifth hour, i.e., eleven o'clock, when all assembled and having bathed in water specially exorcised, and clothed themselves in white, they entered the common dining room quietly and silently. Before each of them was placed some bread and a dish of one sort of food. A priest said grace and then, but not before, they might eat. At the end of the repast prayer was again said, their white garments laid aside, and resuming their ordinary attire they worked until evening, when they supped in the same manner. At the noonday meal, which was regarded apparently as a sacrificial feast, being prepared by their priests, no stranger was admitted, but at supper it was otherwise. As they spoke only in turn and observed great moderation in food and drink, the silence at the meals appeared to outsiders, so we are told, something very solemn and mysterious. Many of the Essenes reached a great age and they acquired such fortitude of mind and body that the worst torments inflicted on them by the Romans failed to shake their constancy and they met death with a smile.

Most of the Essenes rejected marriage, not on account of any wrong in it but because they did not trust women and desired peace and harmony. They perpetuated their sect by adopting children and admitting adults who were "wearying of battling with the rough sea of life", as Pliny says. At their coming they received an apron to wear at their ablutions, a white garment, and a little spade-like instrument with which

to dig a hole and cover their excrement from the rays of the sun. For one year their temperance was tested by observing outside the community its ascetic rules. Then came a fresh trial of two years, during which they shared in the lustral rites, but not in the meals, of the initiated. If found satisfactory they were chosen full members and bound themselves to fearful oaths to honour God, observe justice, to be loyal to all, but especially to those in authority, and if ever in authority themselves not to outshine others by dress, to love truth and honesty, to conceal nothing from their fellows, and to reveal nothing to strangers, also to keep secret at all costs their books and the names of their angels. This was the only time when Essenes took oaths, their word being regarded by all as so sacred that Herod excused them from the oath of allegiance. Some of them observed the same rules yet married, but merely for the order's sake, and only after three year's probation and if the woman appeared healthy and likely to bear children.

The Essenes have received attention during the last three centuries out of all proportion to their numbers, their influence upon contemporary life, or their importance as factors in religious development. This sprang from two causes, one external and the other internal. The latter was the curious mixture of Jewish and foreign elements in their tenets and customs. This peculiarity aroused the curiosity and exercised the ingenuity of the learned to account for the combination. that the Essenes were really Jews, though speaking very likely Greek (Jews by *race*, says Josephus), is admitted. Their belief in one God, reverence for one God, strict observance of the Sabbath, fanatic adherence to circumcision (Hippolytus), etc., all show this; while their attitude toward the sun, election of priests, mode of life, likened to the Pythagorean by Josephus himself, etc., seemed to show outside influence. The source of this influence, like everything Essenic, begets controversy, but so far no one has succeeded in determining it satisfactorily. Buddhism, Parseism, Pythagoreanism (old, new, and Orphic) Hellenism, etc., have all had their claims put forth as one of the parents of this hybrid sect. Suffice it to say that Persian-Babylonian influence through the Captivity, and Hellenism filtering in through Alexandria and the use of the Greek tongue can amply account for foreign elements. the contention that their elements, if divested of their Greek appearance, could be proved to have their roots in Biblical ground is not lightly to be set aside. The external cause of attention was the bias of English deists and Continental Rationalists who strove to metamorphize the Essenes into predecessors from whom gradually and quite naturally Christians developed; and Freemasons pretended to find in Essenism pure Christianity. In reference to such chimeras it is enough to say that between Essenism and Christianity there are some points of resemblance; it could not very well be otherwise because Essenism was Judaic in its foundation and Christianity was not destructive but progressive. On the other hand, the differences

are fundamental. That John the Baptist and Christ were Essenes are mere assumptions based on similarities which spring naturally and independently from asceticism and voluntary poverty. So likewise the vaunted dependence between Essenism and monasticism can be resolved into necessary traits of any ascetic, communistic life (see "Wuku" in "Studien u. Mittheilungen d. Ben. Cist. ordens", 1890, I 223-30; Berlière in "Revue Bénéd", 1891, VIII, 12-190). "The attitude of Jesus and his disciples is altogether anti-Essenic" (Jewish Encyc.). The strict silence about any Messiah is due partly perhaps to the secrecy of the Essenes and mainly no doubt to His rejection by their chronicler, Josephus. In fine, our present knowledge of the Essenes is slight and not at all trustworthy, as its sources are scanty, coloured, and unreliable.

E.P. GRAHAM

Willem Hessels van Est

Willem Hessels van Est

(ESTIUS.)

A famous commentator on the Pauline epistles, born at Gorcum, Holland, in 1542; died at Douai, 20 September, 1613. Gorcum at that time contained about 5000 inhab-

itants, among who the most illustrious belonged to the family of Est, both on his father's and mother's side. Est was born at a time of great excitement, and though the mildest of men his whole life was spent amidst scenes of controversy and civil war. Luther was still in full vigour, though he had only four years to live. Calvin was active at Geneva, and Europe was flooded with books and pamphlets violently attacking the Church. Very few writers did more to show (and that in quite and unostentatious manner) the hollowness of the reformer's Biblical arguments than Est. He received his early education at home, after which he went to Utrecht, where he studied classics and thence proceeded to Louvain, where he spent about twenty years in the study of philosophy, theology and Holy Scripture. During the last ten years there he was professor of philosophy in one of the colleges. In 1580 he received the degree of Doctor of Theology. He was throughout distinguished by sincere piety, great ability, and application to study. During this time he was frequently the bearer of pecuniary aid to his uncle, Nicolas Pieck, O.S.F., who was giving missions in Belgium; but the latter would never accept any help. In 1572, while Est was still at Louvain, a great catastrophe befell his native town, which was captured by the Calvinist. His father, brother, and uncle were made prisoners and were in eminent danger of their lives. The father and brother escaped, but Nicolas Pieck, who was then Superior of the Franciscan convent at Gorcum, and eighteen other ecclesiastics, were taken to Brielle, on the sea-coast, and put to death for the Catholic Faith, with revolting brutality. Est wrote what is considered the best history of the Martyrs of Gorcum, who were canonized by Pius IX in 1867. From this history we learn many details about Est and his relatives.

When Est first arrived at Louvain he found the place in a ferment owing to the recently broached opinions of Baius, one of the professors of Holy Scripture, and who held a leading position in the university all the time that Est was there. Violent controversy raged round the person of Baius during all that time. It is evident from the commentaries of Est that he was much influenced on questions of grace and free will by the teaching of his old professor, Baius; and on these points he has to be read with some caution. After having been made doctor, he continued teaching philosophy at Louvain two years longer. In 1582 he was made professor of theology at Douai, a position which he retained for thirty-one years. He was also for many years rector of the diocesan seminary and during the last eighteen years of his life chancellor of the University of Douai. He was noted for his piety, modesty, and compassion for the poor, and greatly admired for his vast learning, solid judgement, and eloquence. He was afterwards styled *doctor fundatissimus* by the learned Pope Benedict XIV. Soon after he left Louvain a fresh controversy broke out there, into which he appears to have been drawn. About 1586 Lessius began to refute the errors of Baius in his ordinary course of lectures. The friends of Baius, who admired him for his edifying life, great learning,

and manly submission, felt annoyed that his shortcomings should have been thus pointedly accentuated by their opponents. They attacked certain propositions of Lessius, resembling those of Molina and Suarez, and had them condemned by the university as savouring of Semipelagianism. The sister university of Douai added its condemnation (said to have been obtained under a misapprehension), and its terms were in still more violent language. It has been said, though on no very clear evidence, that the form of condemnation was drawn up by Est. There can be little doubt that but he was in favour of the condemnation. The whole controversy finally led up to the *Congregatio de Auxilis* (q.v.). On maturer examination the teaching of Lessius on grace etc; was found to be innocuous.

Most of Est's works, which were written in Latin, were not published until after his death. His greatest work is his "In omnes Divi Pauli et Catholicas Epistolas Commentarii" (Douai, 1614-15; Mainz, 1858-60). There are several later editions, that of Mainz (1841-45, 7 vols.) Being one of the best. To this work was prefixed the author's protestation of loyalty to the Church in which he declares that he desires to submit all things to the judgement of the Catholic Church and its supreme pastor and judge on earth, the Roman pontiff, and if anything has been spoken in error that it be considered as unsaid. In his commentaries he everywhere endeavours to arrive at the literal meaning of the author, with great judgement, acumen, and erudition. He refutes objections, as occasion arises, with calmness and freedom from passion. No serious student of the Epistles can afford to neglect this work. Horne, a Protestant writer (*Introd.*, London, 1834, II, 293), says that it is "a most valuable work, which Romanists and Protestants alike concur to recommend as an excellent critical help to the exposition of the Apostolic Epistles. The prefaces of Est are particularly valuable." His other works are: "Commentarii in IV libros Sententiarum Petri Lombardi" (Douai, 1615); "Annotationes in praecipua et difficiliora S. Scripturae loca" (Douai, 1617); "Historia Martyrum Garcomiensium" (Douai, 1603; also in the "Acta SS." for July, II, 754-847). He also translated the life of St. Edmund Campion, S.J., from French into Latin, and left copious notes for a new edition of the works of St. Augustine.

Historia Martyrum Garcomiensium (Douai, 1603); MEUFFELS, *Les Martyrs de Garcum* (Paris, 1908); short Life prefixed to the Louvain ed. Of his commentary, and the Eulogium by Hoy, *ibid.*; HURTER, *Nomenclator*, s.v. Estius and Lessius; RAPIN, *Histoire du Jans nisme* (Paris, 1840), i.

C. AHERNE

The Establishment

The Establishment

(Or ESTABLISHED CHURCH)

The union of Church and State setting up a definite and distinctive relation between the two is frequently expressed in English by the use of the word "establishment", applied to such union in both Catholic and Protestant States, in spite of the fundamental differences of principle which characterize them. "The Establishment", or "the Established Church" is often used as a distinctive name for the ecclesiastical system established by law in Scotland, in Ireland (until 1869), but especially in England. The pre-Reformation Church of England was the religion of the people and its establishment was the spontaneous act of the people; the distinctive feature of the post-Reformation Church is that it was imposed upon the people by legal enactment, and based upon the principle of royal supremacy. Papal jurisdiction was not simply swept away but was transferred entire to the Crown. And except for the brief return to Catholic unity under Mary (1553-1558) and during the Commonwealth (1649-1660), the arrangements then made have continued to limit the liberty of action of the Anglican body alike in matters doctrinal and disciplinary. Convocation cannot meet, discuss, or enact new canons without royal permission (25 Hen. VIII, c. 19); the effective nomination of archbishops and bishops, etc., rests with the Crown (25 Hen. VIII, c. 19); supreme spiritual and ecclesiastical jurisdiction is annexed to the Crown (25 Hen. VIII, 19, cf. 1 Eliz., c. 1). Moreover, no modification of its formularies or doctrines has been permitted without the sanction of an act of Parliament. The term "by law established", as applied to the Church of England, is first met with in the canons of the Convocation of 1604 (c. iii), which declares "that the Church of England by law established under the King's Majesty" is a true and Apostolic Church. It is of frequent occurrence in subsequent statutes. The term "established" was applied to the prescribing and settling by law of the liturgical formularies of the English Church in the Act of Uniformity, 1558 (1 Eliz., c. 2, §27). (See ANGLICANISM; CONVOCATION OF THE ENGLISH CLERGY.)

BERNARD WARD.

Comte d'Estaing

Comte d'Estaing

JEAN-BAPTISTE-CHARLES-HENRI-HECTOR, COMTE D'ESTAING (MARQUIS DE SAILLANS).

A French admiral, b. at the chateau de Ravel (Auvergne), 28 November, 1729; d. at Paris, 28 April, 1794. He first served in the army as a colonel of infantry. In 1757, having obtained the rank of brigadier-general, he went to the East Indies, with Lally-Tollendal. Made a prisoner at the siege of Madras (1759), he was set free on parole, entered the service of the French East Indian Company, and (with two vessels) destroyed the British factories in Sumatra and the Persian Gulf. He was on his way to France, in 1760, when he fell into the hands of the English and was sent to Plymouth. Released a second time, he was appointed lieutenant-general of the navy in 1763, and vice-admiral in 1777. One year later, he left Toulon in command of a fleet of twelve battleships and fourteen frigates with the intention of assisting the struggling American colonies against Great Britain. Unfavourable winds delayed him and so Admiral Howe's fleet escaped his pursuit and d'Estaing took possession of Newport (8 August). A great naval battle was about to take place, when a violent storm arose and dispersed the two fleets. After a short sojourn in Boston harbour, he sailed to the West Indies where he took St. Vincent and Grenada (4 July, 1779) and badly damaged Admiral Byron's fleet. His attempts to retake Savannah, in concert with the Americans, were unsuccessful; a severe wound obliged him to give up the enterprise. On his return to France, in 1780, he fell into disfavour at the court. Three years later, however, he was placed at the head of the Franco-Spanish fleet assembled before Cadiz, but peace was signed and no operations took place. He was then made a grandee of Spain. When the French Revolution broke out, he favoured the new ideas. A member of the Assembly of Notables, he was named commandant of the National Guard at Versailles in 1789, and admiral in 1792. He constantly endeavoured to protect the king, and at the trial of Marie Antoinette in 1793 spoke in her favour. He was charged with being a reactionary and was sent to the scaffold, 28 April, 1794. In his moments of leisure, he wrote a poem, "Le Rêve" (1755), a tragedy "Les Thermopyles" (1789), and a book on the colonies.

LOUIS N. DELAMARRE

Esther

Esther

(From the Hebrew meaning *star, happiness*); Queen of Persia and wife of Assuerus, who is identified with Xerxes (485-465 B.C.). She was a Jewess of the tribe of Benjamin, daughter of Abihail, and bore before her accession to the throne the name of Edissa (*Hádássah*, myrtle). Her family had been deported from Jerusalem to Babylon in the time of Jechonias (599 B.C.). On the death of her parents she was adopted by her father's brother, Mardochai, who then dwelt in Susa, the capital of Persia. King Assuerus being angered at the refusal of his wife Vasthi to respond to his invitation to attend a banquet that he gave in the third year of his reign, divorced her and ordered the most attractive maidens of the kingdom brought before him that he might select her successor from among them. Among these was Esther, whose rare beauty captivated the king and moved him to place her on the throne. Her uncle Mardochai remained constantly near the palace so that he might advise and counsel her. While at the gate of the palace he discovered a plot of two of the king's eunuchs to kill their royal master. This plot he revealed to Esther, who in turn informed the king. The plotters were executed, and a record of the services of Mardochai was entered in the chronicles of the kingdom. Not long thereafter, Aman, a royal favourite before whom the king had ordered all to bow, having frequently observed Mardochai at the gate of the palace and noticed that he refused to prostrate himself before him, cunningly obtained the king's consent for a general massacre in one day of all the Jews in the kingdom. Following a Persian custom, Aman determined by lot (*pûr*, pl. *pûrîm*), that the massacre should take place a twelvemonth hence. A royal decree was thereupon sent throughout the Kingdom of Persia. Mardochai informed Esther of this and begged her to use her influence with the king and thus avert the threatening danger. At first she feared to enter the presence of the king unsummoned, for to do so was a capital offence. But, on the earnest entreaty of her uncle, she consented to approach after three days, which with her maids she would pass in fasting and prayer, and during which she requested her uncle to have all the Jews in the city fast and pray.

On the third day Esther appeared before the king, who received her graciously and promised to grant her request whatever it might be. She then asked him and Aman to dine with her. At the banquet they accepted her invitation to dine with her again on the following day. Aman, carried away by the joy that this honour gave him, issued orders for the erection of a gallows on which he purposed to hang the hated Mardochai. But that night the king, being sleepless, ordered the chronicles of the nation to be read to him. Learning that Mardochai had never been rewarded for his service in revealing

the plot of the eunuchs, he asked Aman, the next day, to suggest a suitable reward for one "whom the king desired to honour". Thinking it was himself that the king had in mind, Aman suggested the use of the king's apparel and insignia. These the king ordered to be bestowed on Mardochai. At the second banquet, when the king repeated to Esther his offer to grant her whatever she might ask, she informed him of the plot of Aman which involved the destruction of the whole Jewish people to which she belonged, and pleaded that they should be spared. The king ordered that Aman should be hanged on the gibbet prepared for Mardochai, and, confiscating his property, bestowed it upon the intended victim. He charged Mardochai to address to all the governors of Persia letters authorizing the Jews to defend themselves and to kill all those who, by virtue of the previous decree, should attack them. During two days the Jews took a bloody revenge on their enemies in Susan and other cities. Mardochai then instituted the feast of Purim (lots) which he exhorted the Jews to celebrate in memory of the day which Aman had determined for their destruction, but which had been turned by Esther into a day of triumph. The foregoing story of Esther is taken from the Book of Esther as found in the Vulgate. Jewish traditions place the tomb of Esther at Hamadân (Ecbatana). The Fathers of the Church considered Esther as a type of the Blessed Virgin Mary. In her poets have found a favourite subject.

BOOK OF ESTHER

In the Hebrew Bible and the Septuagint the Book of Esther bears only the word "Esther" as title. But the Jewish rabbis called it also the "volume of Esther", or simply "the volume" (*megillah*) to distinguish it from the other four volumes (*megilloth*), written on separate rolls, which were read in the synagogues on certain feast days.

As this one was read on the feast of Purim and consisted largely of epistles (cf. Esth., ix, 20, 29), it was called by the Jews of Alexandria the "Epistle of Purim". In the Hebrew canon the book was among the Hagiographa and placed after Ecclesiastes. In the Latin Vulgate it has always been classed with Tobias and Judith, after which it is placed. The Hebrew text that has come down to us varies considerably from those of the Septuagint and the Vulgate. The Septuagint, besides showing many unimportant divergencies, contains several additions in the body of the book or at the end. The additions are the portion of the Vulgate text after ch. x, 3. Although no trace of these fragments is found in the Hebrew Bible, they are most probably translations from an original Hebrew or Chaldaic text. Origen tells us that they existed in Theodotion's version, and that they were used by Josephus in his "Antiquities" (XVI).

St. Jerome, finding them in the Septuagint and the Old Latin version, placed them at the end of his almost literal translation of the existing Hebrew text, and indicated the place they occupied in the Septuagint. The chapters being thus rearranged, the book may be divided into two parts: the first relating the events which preceded and

led up to the decree authorizing the extermination of the Jews (i-iii, 15; xi, 2; xiii,7); the second showing how the Jews escaped from their enemies and avenged themselves (iv-v, 8; xiii-xv).

The Book of Esther, thus taken in part from the Hebrew Canon and in part from the Septuagint, found a place in the Christian Canon of the Old Testament. The chapters taken from the Septuagint were considered deuterocanonical, and, after St. Jerome, were separated from the ten chapters taken from the Hebrew which were called protocanonical. A great many of the early Fathers clearly considered the entire work as inspired, although no one among them found it to his purpose to write a commentary on it. Its omission in some of the early catalogues of the Scriptures was accidental or unimportant. The first to reject the book was Luther, who declared that he so hated it that he wished that it did not exist (Table Talk, 59). His first followers wished only to reject the deuterocanonical parts, whereupon these, as well as other deuterocanonical parts of the Scriptures, were declared by the Council of Trent (Sess. IV, de Can. Scripturæ) to be canonical and inspired. With the rise of rationalism the opinion of Luther found many supporters. When modern rationalists argue that the Book of Esther is irreligious in character, unlike the other books of the Old Testament, and therefore to be rejected, they have in mind only the first or protocanonical part, not the entire book, which is manifestly religious. But, although the first part is not explicitly religious, it contains nothing unworthy of a place in the Sacred Scriptures. And any way, as Driver points out (Introduc. to the Lit. of the Testament), there is no reason why every part of the Biblical record should show the "same degree of subordination of human interests to the spirit of God".

As to the authorship of the Book of Esther there is nothing but conjecture. The Talmud (Baba Bathra 15a) assigns it to the Great Synagogue; St. Clement of Alexandria ascribes it to Mardochai; St. Augustine suggests Esdras as the author. Many, noting the writer's familiarity with Persian customs and institutions and with the character of Assuerus, hold that he was a contemporary of Mardochai, whose memoirs he used. But such memoirs and other contemporary documents showing this familiar knowledge could have been used by a writer at a later period. And, although the absence in the text of allusion to Jerusalem seems to lead to the conclusion that the book was written and published in Persia at the end of the reign of Xerxes I (485-465 B.C.) or during the reign of his son Artaxerxes I (465-425 B.C.), the text seems to offer several facts which may be adduced with some show of reason in favour of a later date. They are:

- an implied statement that Susan had ceased to be the capital of Persia, and a vague description of the extent of the kingdom (i, 1);

- an explanation of Persian usages that implies unfamiliarity with them on the part of the readers (i, 13, 19; iv, 11; viii, 8);
- the revengeful attitude of the Jews towards the Gentiles, by whom they felt they had been wronged, and with whom they wished to have little to do (iii, 8 sqq.);
- a diction showing many late words and a deterioration in syntax;
- references to "the Macedonians" and to the plot of Aman as an attempt to transfer "the kingdom of the Persians to the Macedonians" (xvi, 10, 14).

On the strength of these passages various modern critics have assigned late dates for the authorship of the book, as, 135 B.C., 167 B.C., 238 B.C., the beginning of the third century B.C., or the early years of the Greek period which began 332 B.C. The majority accept the last opinion.

Some of the modern critics who have fixed upon late dates for the composition of the book deny that it has any historical value whatever, and declare it to be a work of the imagination, written for the purpose of popularizing the feast of Purim. In support of their contention they point out in the text what appear to be historical improbabilities, and attempt to show that the narrative has all the characteristics of a romance, the various incidents being artfully arranged so as to form a series of contrasts and to develop into a climax. But what seem to be historical improbabilities are in many cases trivial. Even advanced critics do not agree as to those which seem quite serious. While some, for instance, consider it wholly improbable that Assuerus and Aman should have been ignorant of the nationality of Esther, who was in frequent communication with Mardochai, a well-known Jew, others maintain that it was quite possible and probable that a young woman, known to be a Jewess, should be taken into the harem of a Persian king, and that with the assistance of a relative she should avert the ruin of her people, which a high official had endeavoured to effect. The seeming improbability of other passages, if not entirely explained, can be sufficiently explained to destroy the conclusion, on this ground, that the book is not historical. As to artful contrasts and climax to which appeal is made as evidences that the book is the work of a mere romancer, it may be said with Driver (*op. cit.*) that fact is stranger than fiction, and that a conclusion based upon such appearances is precarious. There is undoubtedly an exercise of art in the composition of the work, but no more than any historian may use in accumulating and arranging the incidents of his history. A more generally accepted opinion among contemporary critics is that the work is substantially historical. Recognizing the author's close acquaintance with Persian customs and institutions, they hold that the main elements of the work were supplied to him by=20tradition,

but that, to satisfy his taste for dramatic effect, he introduced details which were not strictly historical. But the opinion held by most Catholics and by some Protestants is, that the work is historical in substance and in detail. They base their conclusions especially on the following:

- the vivacity and simplicity of the narrative;
- the precise and circumstantial details, as, particularly, the naming of unimportant personages, the noting of dates and events;
- the references to the annals of the Persians;
- the absence of anachronisms;
- the agreement of proper names with the time in which the story is placed;
- the confirmation of details by history and archeology;
- the celebration of the feast of Purim in commemoration of the deliverance of the Jews by Esther and Mardochai at the time of the Machabees (II Mach., xv, 37), at the time of Josephus (*Antiq of the Jews*, XI, vi, 13), and since.

The explanation of some that the story of Esther was engrafted on a Jewish feast already existing and probably connected with a Persian festival, is only a surmise. Nor has any one else succeeded better in offering an explanation of the feast than that it had its origin as stated in the Book of Esther.

(See also HERODOTUS, *History*, VII, 8, 24, 35, 37-39; IX, 108)

A.L. MCMAHON

For Esther Woodall

Claude Estiennot de la Serre

Claude Estiennot de la Serre

Benedictine of the Congregation of Saint-Maur, b. at Varennes, France, 1639; d. at Rome, 1699. He joined the Benedictines at Vendome and was professed there in 1658. After teaching humanities for a short time to the junior monks at Pontlevoy, he was, at the instance of Dom Lue d'Achery, sent to the Abbey of St-Germain-des-Pres, Paris, where his aptitude for study and research was quickly discovered by Dom Mabillon, whose intimate friend and fellow-worker he became. Together they journeyed on foot through Flanders, visiting all its chief monastic libraries. In 1670 he was made sub-prior of St-Martin's, Pontoise, a history of which abbey, in three volumes, was his

first published work. Between 1673 and 1682 he compiled his chief work, entitled "Antiquités Bénédictines", in which the monastic traditions of France are treated under the headings of the different dioceses. In 1684 he was appointed procurator for his congregation in the Curia Romana, which post required his residence in Rome for the remainder of his life. On his way thither from Paris he visited numerous monasteries and collected a great quantity of literary material, which he sent back to Dom Mabillon and most of which found its way into the "Annales O.S.B." or the "Gallia Christiana". During the fifteen years he lived in Italy he laboured fruitfully on behalf of his congregation, and he was also greatly trusted by the French bishops, for whom he acted in many matters of ecclesiastical business. He enjoyed the entire confidence of several popes and other high officials of the Church, and he is described as combining all the qualities of a man of letters with great business ability. Besides the history of Pontoise and the "Antiquités", already mentioned, he collected sixteen volumes of "Fragments historiques", but though he did not publish much under his own name, he worked incessantly in the chief libraries of Italy, all of which were open to him, and the results of his researches he forwarded to Dom Mabillon and others at St- Germain-des-Prés, to whom they were of great service. He was buried in the church of the Minims of SS. Trinità de' Monti.

TASSIN, Hist. Lit. de la cong. De St-Maur (Brussels, 1770).

G. CYPRIAN ALSTON

Eternity

Eternity

(*aeternum*, originally *aeviternum*, *aionion*, *aeon* -- long).

Eternity is defined by Boetius (De Consol. Phil., V, vi) as "possession, without succession and perfect, of interminable life" (*interminabilis vitae tota simul et perfecta possessio*). The definition, which was adopted by the Schoolmen, at least as applying to eternity properly so called, that of God, implies four things: that eternity is

- a life,
- without beginning or end,
- or succession, and
- of the most perfect kind.

God not only is or exists, but lives. The notion of life, like all notions however abstract or spiritual, is, when applied to God, but analogous. He not only does not live precisely as anything else with which we are acquainted lives; He does not even exist as anything else exists. Our notions of life and existence are derived from creatures, in which life implies change, and existence is something added to essence, thus involving composition. In God there can be no composition or change or imperfection of any kind, but all is pure act or being. The agnostic, however, is not thereby justified in saying that we can know nothing and should predicate nothing of God. It is true that, however we conceive Him or in whatever terms we speak of Him, our ideas and terminology are utterly beneath and unworthy of Him. Yet, even while arguing in this way, the agnostic thinks and speaks of Him as really as we do; nor can he or we do otherwise, compelled as we are to trace things back to their first cause. Yielding to this necessity, we can but think and speak of Him in the highest and most spiritual terms known to us; not merely as existing, for instance, but as living; correcting at once, as far as we can, the form of our thought and predication, by adding that the Divine life is perfect, free from the least trace of defect. That is how and why we represent the Divine existence as a life. It is a life, moreover, not only without beginning or end but also without succession -- *tota simul*, that is without past or future; a never-changing instant or "now". It is not so difficult to form some faint notion of a duration which never began and shall never end. We hope that our own life shall be endless; and materialists have accustomed us to the notion of a series stretching backward without limit in time, to the notion of a material universe that never came into being but was always there. The Divine existence is that and much more; excluding all succession, past and future time--indeed all time, which is succession--and to be conceived as an ever-enduring and unchanging "now".

In forming this notion of eternity it is well to think of the Divine immensity in its relation to space and extended things. One may conceive first a broken straight line - - a line of separate dots; then a continuous line within two limits, beginning and end. The line can be, but is not, divided into parts, shorter lines or dots, and the whole is finite both ways. It is like and yet unlike a finite spirit; like, since it has no actual parts of divisions and is limited; yet unlike since it may be divided, whereas a spirit cannot be divided. Spirit exists whole and entire wherever it exists at all; and though it may fill the space occupied by a human body, let us say, it is whole and entire in every possible part of it; not quite unlike the continuous line. If we further think of the end or limits of the line as removed, of the earth's axis, for instance, as extending indefinitely into space, the line is not only continuous or unbroken but infinite, without end or beginning, yet still divisible; like, but so unlike, the immensity of God. For God is a spirit, and as the human soul fills the space occupied by the body to which it is united,

yet is whole and entire in every possible part of that space, so God fills all space whatsoever, extending without limit in all directions, and yet is whole and entire everywhere, in the smallest conceivable point, in the very loose or improper sense in which we may think of speak of God as being "whole." Even the spatial relations of the soul to the body are coarse as compared to those which God's existence bears to that of creatures and the spaces in which they exist or may exist. For however free from extension created spirits may be, they are not incapable of real internal change, real motion of some kind within themselves; whereas God, filling all space, is incapable of the least change or motion, but is so truly the same throughout that He is best conceived as an infinitely extended point, the same here, there, everywhere.

If, now, we apply to the time-line what we have been attempting in that of space, the infinite, unchangeable point which was immensity becomes eternity; not a real succession of separate acts or changes (which is known as "time"); nor even the continuous duration of a being which is changeless in its substance, however it may vary in its actions (which is what St. Thomas understands by an *aeuum*); but an endless line of existence and action which not only is not actually interrupted, but is incapable of interruption or of the least change or movement whatsoever. And as, if one instant should pass away and another succeed, the present becoming past and the future present, there is necessarily a change or movement of instants; so, if we are not to be irreverent in our concept of God, but to represent Him as best we can, we must try to conceive Him as excluding all, even the least, change or succession; and his duration, consequently, as being without even a possible past or future, but a never beginning and a never-ending, absolutely unchangeable "now." This is how eternity is presented in Catholic philosophy and theology. The notion is of special interest in helping us to realize, however, faintly, the relations of God to created things, especially with regard to His foreknowledge. In Him there is no before or after, and therefore no foreknowledge, objectively; the distinction which we are wont to draw between His knowledge of intelligence or science or prescience and His knowledge of vision is merely our way of representing things, natural enough to us, but not by any means objective or real in Him. There is no real objective difference between His intelligence and His vision, not between either of these and the Divine substance in which there is no possibility of difference or change. That infinitely perfect substantial intelligence, immense as it is eternal, and withal existing entire and immutable as an indivisible point in space and as an indivisible instant in time, is coextensive, in the sense of being intimately present, with the space-extension and the time-succession of all creatures; not beside them, nor parallel with them, nor before or after them; but present in and with them, sustaining them, co-operating with them, and therefore seeing -- not foreseeing -- what they may do at any particular point of the space-extension, or at any instant of

the time-extension, in which they may exist or operate. God may be considered as an immovable point in the centre of a world which, whether as a more or less closely connected group of granulated individuals, or as an absolutely continuous ether mass, turns round Him as a sphere may be supposed to turn in all directions round its centre (St. Thomas, *Cont. Gent.*, I, c. lxvi). The imagery, however, must be corrected by noting that while in the time-line God's duration is an ever-enduring point or "now", his immensity in the space-line is not at all like the centre of a circle or sphere; but is a point, rather, which is coextensive with, in the sense of being intimately present to, every other point, actual or possible, in the continuous or discontinuous mass that is supposed to move around Him.

Bearing this correcting notion well in mind, we may conceive Him as this immovable point in the centre of an ever-moving, though here and there continuous, circle or sphere. The space and time relations are constantly changing between Him and the moving things around Him, not through any change in Him, but only by reason of the constant change in them. In them there is before and after, but not in Him, Who is equally present to them all, no matter how or when they may have come into being, or how they may succeed one another in time or in space. Some of them are free acts; and almost from the time the human mind began to speculate on these questions, and wherever still there are any even rudimentary speculations, the question has arisen and does arise as to how an act can be free not to happen if, as we suppose, God's absolutely infallible foresight saw from all eternity that it was to be. To this Catholic philosophy supplies the only answer which can be given; that it is not true to say that God either saw or foresaw anything, or that He will see it, but only that He sees it. And as my seeing you act does not interfere with your freedom of action, but I see you acting freely or necessarily, as the case may be, so God sees all finite things, quiescent or active, acting of necessity or freely, according to what may be objectively real, without in the least interfering thereby with the mode or equality of their existence or of their action. Here again, however, care must be taken not to conceive the Divine knowledge as being determined by what the finite may be or do; somewhat as we see things because the knowledge is borne in upon us from what we see. It is not from the infinite that God gets His knowledge, but from His own Divine essence, in which all things are represented or mirrored as they are, existing or merely possible, necessary or free. On this aspect of the question see *GOD*. When, therefore, one is asked or tempted to ask, what God did or where He was before time and place began, with the creation of the world, the answer must be a denial of the legitimacy of the supposition that He was "before". It is only in relation to the finite and mutable that there can be a before and after. And when we say, that, as faith teaches, the world was created in time and was not from eternity, our meaning should not be that the existence of the Creator stretched

back infinitely before He brought the world into being; but rather that while His existence remains an unchangeable present, without possibility of before or after, of change or succession, as regards itself, the succession outside the Divine existence, to each instant of which it corresponds as the centre does to any point in the circumference, had a beginning, and might have extended indefinitely further backward, without, however, escaping the omnipresence of the eternal "now" (See Billot, *De Deo Uno et Trino*, q. 10, p. 122).

So far for the strict or proper notion of eternity, as applying solely to the Divine existence. There is a wide or improper sense in which we are wont to represent as eternal what is merely endless succession in time, and this even though the time in question should have had a beginning, as when we speak of the reward of the good and the punishment of the wicked as eternal, meaning by eternity only time or succession without end or limit in the future. In the Apocalypse there is a well-known passage in which a great angel is represented as standing with one foot on sea and one on land, and swearing by Him that liveth forever that time shall be no more. Whatever the meaning of the oath may be, it has found an echo in our religious terminology, and we are wont to think and say that with death, and especially with the Last Judgment, time shall cease. The meaning is not that there will be no more succession of any kind; but that there will be not substantial change or corruption in what survives death, the soul; or in the body that shall have been raised from the dead; or in the heavens and earth as they shall be renewed after Christ's second coming. There is, moreover, an implication or connotation of the doctrine that in the future life of souls, whether in heaven or in hell, succession will be accidental, the act in which their essential happiness or misery will consist being continuous and unbroken vision and love, or blinded wrong vision and hatred, of God. This kind of duration is in our ordinary language spoken of as life or death eternal, by a kind of participation, in a wide or improper sense, in the character of the Divine eternity (Billot, *op. cit.*, 119). Questions of the greatest importance have been raised as to the possibility of an eternal world, in the sense of a world of matter, such as we know, having never had a beginning and therefore not needing a first cause; also as to the possibility of eternal creation, in the sense of a being, with or without succession, having had no beginning of existence and yet having been created by God (*see* CREATION). For other questions as to eternity see HEAVEN, HELL. "Eternal life" is a term sometimes applied to the state and life of grace, even before death; this being the initial stage or seed, as it were, or the never-ending life of bliss in heaven, which, by a species of metonymy, is regarded as being present in its first stage, that of grace. This, if we are true to ourselves and to God, is sure to pass into the second stage, the life eternal.

The basis of all later treatment of the question of eternity is that of ST. THOMAS, I, Q. x. For a fuller exposition see SUAREZ, *De Deo*, I, iv; IDEM, *Metaphysica*, disp. I, ss. 4 sq.; LESSIUS, *De perfectionibus divinis*, IV. For the teaching of early non-Christian philosophers (PLATO, ARISTOTLE, and the NEO-PLATONISTS), as also of the FATHERS, see PETAVIUS, *De Deo*, III, iii, iv. In the same chapters he discusses the meaning of the term *aevum*. For the testimony of the FATHERS as to the possibility of creation from eternity, see PETAVIUS, *op. cit.*, vi. Briefer expositions may be found in the ordinary handbooks of philosophy, on ontology and natural theology; also in the various treatises *De Deo Uno*.

WALTER MCDONALD

St. Ethelbert

St. Ethelbert

Date of birth unknown; d. 794; King of the East Angles, was, according to the "Speculum Historiale" of Richard of Cirencester (d. about 1401), the son of King Ethelred and Leofrana, a lady of Mercia. Brought up in piety, he was a man of singular humility. Urged to marry, he declared his preference for a life of celibacy, but at length consented to woo Altrida (Alfrida), daughter of Offa, King of the Mercians. Leofrana foreboded evil and tried to dissuade Ethelbert; but in spite of an earthquake, an eclipse of the sun, and a warning vision, he proceeded from Bury St. Edmunds to Villa Australis, where Offa resided. On his arrival Altrida expressed her admiration for Ethelbert, declaring that Offa ought to accept him as suzerain. Cynethryth, the queen-mother, urged by hatred of Ethelbert, so poisoned Offa's mind against him, that he accepted the offer of a certain Grimbert to murder their guest. Ethelbert, having come for an interview with Offa, was bound and beheaded by Grimbert. The body was buried ignominiously, but, revealing itself by a heavenly light, was translated to the cathedral at Hereford, where many miracles attested Ethelbert's sanctity. The head was enshrined at Westminster Abbey.

The "Chronicon" of John Brompton (fl. 1437) adds a few particulars: the body with the head was first buried on the banks of the Lugg. On the third night the saint commanded one Brithfrid, a nobleman, to convey his relics to Stratus-way. During the journey the head fell out of the cart and healed a man who had been blind for eleven years. Finally the body was entombed at Fernley, the present Hereford. According to Brompton, Altrida became a recluse at Croyland. Offa repented of his sin (Matthew of Paris represents Offa as ignorant of the plot till after Ethelbert's murder), gave much land to the martyr, "which the church of Hereford holds to the present day", founded St. Albans and other monasteries, and made his historic pilgrimage to Rome.

St. Ethelbert figures largely in the Missal, Breviary, and Hymnal of the Use of Hereford. His feast is on 20 May. Thirteen English churches, besides Hereford cathedral, are dedicated in honour of Ethelbert; and one of the gateways of Norwich cathedral bears his name.

PATRICK RYAN

St. Ethelbert (King of Kent)

St. Ethelbert

King of Kent; b. 552; d. 24 February, 616; son of Eormenric, through whom he was descended from Hengest. He succeeded his father, in 560, as King of Kent and made an unsuccessful attempt to win from Ceawlin of Wessex the overlordship of Britain. His political importance was doubtless advanced by his marriage with Bertha, daughter of Charibert, King of the Franks (see BERTHA I). A noble disposition to fair dealing is argued by his giving her the old Roman church of St. Martin in his capital of Cantwaraburh (Canterbury) and affording her every opportunity for the exercise of her religion, although he himself had been reared, and remained, a worshipper of Odin. The same natural virtue, combined with a quaint spiritual caution and, on the other hand, a large instinct of hospitality, appears in his message to St. Augustine when, in 597, the Apostle of England landed on the Kentish coast (see AUGUSTINE OF CANTERBURY).

In the interval between Ethelbert's defeat by Ceawlin and the arrival of the Roman missionaries, the death of the Wessex king had left Ethelbert, at least virtually, supreme in southern Britain, and his baptism, which took place on Whitsunday next following the landing of Augustine (2 June, 597) had such an effect in deciding the minds of his wavering countrymen that as many as 10,000 are said to have followed his example within a few months. Thenceforward Ethelbert became the watchful father of the infant Anglo-Saxon Church. He founded the church which in after-ages was to be the primatial cathedral of all England, besides other churches at Rochester and Canterbury. But, although he permitted, and even helped, Augustine to convert a heathen temple into the church of St. Pancras (Canterbury), he never compelled his heathen subjects to accept baptism. Moreover, as the lawgiver who issued their first written laws to the

English people (the ninety "Dooms of Ethelbert", A.D. 604) he holds in English history a place thoroughly consistent with his character as the temporal founder of that see which did more than any other for the upbuilding of free and orderly political institutions in Christendom. When St. Mellitus had converted Sæbert, King of the East Saxons, whose capital was London, and it was proposed to make that see the metropolitan, Ethelbert, supported by Augustine, successfully resisted the attempt, and thus fixed for more than nine centuries the individual character of the English church. He left three children, of whom the only son, Eadbald, lived and died a pagan.

E. MACPHERSON

Ethelbert, Archbishop of York

Ethelbert, Archbishop of York

Archbishop of York, England, date of birth uncertain; d. 8 Nov., 781 or 782. The name also appears as ALBERT, ADALBERHT, ÆLBERHT, ALDBERHT, ALUBERHT, EADBERHT and ELCHBERT. He was the teacher and intimate friend of Alcuin, whose poem on the saints and prelates of the Church of York, "*De Sanctis et Pontificibus Ecclesiae Eboracensis*", is the principal source of information concerning Ethelbert's life. He was a kinsman of his predecessor Archbishop Egbert (brother to Eadberht, King of Northumbria) and a pupil in the school which Egbert founded at York. When he reached man's estate, Egbert ordained him priest and made him master of the school. Among his pupils were Alcuin, who has left us an affectionate description of him, from which we learn how varied his erudition was grammar, rhetoric, law, poetry, astronomy, natural history, and Sacred Scripture being all mentioned as subjects in which he instructed his pupils. He is described as severe to the stubborn, gentle to the docile, while of those who were scholars after his own heart it is said "*Hos sibi conjunxit, docuit, nutrit, amavit*". His ready sympathy won the affection of his students, while his strenuous energy urged them on to further progress. Even after Egbert became archbishop, he reserved to himself the duty of lecturing on the New Testament, while he entrusted the work of explaining the Old Testament to Ethelbert. As a keen scholar he loved books ardently and spared no pains in forming a library at York, which was probably the largest collection of books to be found outside of Rome. Alcuin, in enumerating many of these, mentions several Latin and Greek classical authors, as well as the Fathers and other Christian writers. Ethelbert, in his search for books, travelled far, and we know that he visited Rome among other places. Everywhere his learning

and power of sympathy won for him friends, so that his influence for good was widespread and he ranks as one of the foremost among the promoters of education in the eighth century.

In 766 Archbishop Egbert died, and Ethelbert was unanimously chosen to succeed him. He was consecrated 24 April, 767, and received the pallium from Adrian I in 773. As archbishop he continued his simple and laborious life, working with such success that he is regarded as one of the founders of the Church of York. He set himself to rebuild the minster which had been destroyed by fire in 741. It is impossible to obtain certain information as to the extent of his work, but Alcuin speaks as though he began, finished, and consecrated it:

Ast nova basilicæ miræ structura diebus
Præsulis hujus erat jam coepta, peracta, sacrata.

He speaks of its magnificence, the columns and crypts, bright windows and ceilings, the tall crucifix of precious metals, the thirty altars it contained, and the gold, silver, and jewels employed in the decoration of sacred vessels and altars. Eanbald and Alcuin were employed by the archbishop to superintend its construction. From York Ethelbert developed both missionary work and educational effort. He sent out from his school both preachers and teachers, the latter of whom founded new schools while the former spread the truths of Christianity among the heathen. Thus we find Ethelbert holding a council in Northumbria at which it was decided to send Willehad as a missionary to the Frisians and Saxons. From the York school, too, came Alubert and Liudger, the Apostles of North Germany. In 780 Ethelbert, desiring to prepare for death, consecrated Eanbald as his coadjutor bishop and committed to Alcuin the care of the school and library. He then retired to a cell where he spent some time in devotion. Shortly before his death, in the autumn of 781 or 782, he appeared once more in public that he might consecrate the cathedral which was now complete. Ten days later he died and was buried in his church at York. Alcuin mourned his loss as that of a father, and composed in his honour the splendid panegyric (lines 1394-1595) which is the gem of the poem of the Church of York. To him Ethelbert — or Aelbert, as he calls him — was both pontiff and saint, "Jam cui Christus amor, potus, cibus, omnia Christus".

ALCUIN, *Poema de Pontificibus et Sanctis Ecclesiæ Eboracensis* in P.L., CI, 814 sqq., also in *The Historians of the Church of York and its Archbishops* (Rolls Series, London, 1879), I. In Vol. II of the same publication there are short notices from three medieval chronicles. See also RAINE in *Dict. Christ. Biog.*, II, 217. Ethelbert is referred to in the *Dict. Nat. Biog.* as Æthelberht, s.v. Eanbald I, but has no separate notice.

EDWIN BURTON

St. Ethelreda

St. Etheldreda

Queen of Northumbria; born (probably) about 630; died at Ely, 23 June, 679. While still very young she was given in marriage by her father, Anna, King of East Anglia, to a certain Tonbert, a subordinate prince, from whom she received as morning gift a tract of land locally known as the Isle of Ely. She never lived in wedlock with Tonbert, however, and for five years after his early death was left to foster her vocation to religion. Her father then arranged for her a marriage of political convenience with Egfrid, son and heir to Oswy, King of Northumbria. From this second bridegroom, who is said to have been only fourteen years of age, she received certain lands at Hexham; through St. Wilfrid of York she gave these lands to found the minster of St. Andrew. St. Wilfrid was her friend and spiritual guide, but it was to him that Egfrid, on succeeding his father, appealed for the enforcement of his marital rights as against Etheldreda's religious vocation. The bishop succeeded at first in persuading Egfrid to consent that Etheldreda should live for some time in peace as a sister of the Coldingham nunnery, founded by her aunt, St. Ebba, in what is now Berwickshire. But at last the imminent danger of being forcibly carried off by the king drove her to wander southwards, with only two women in attendance. They made their way to Etheldreda's own estate of Ely, not, tradition said, without the interposition of miracles, and, on a spot hemmed in by morasses and the waters of the Ouse, the foundation of Ely Minster was begun. This region was Etheldreda's native home, and her royal East Anglian relatives gave her the material means necessary for the execution of her holy design. St. Wilfrid had not yet returned from Rome, where he had obtained extraordinary privileges for her foundation from Benedict II, when she died of a plague which she herself, it is said, had circumstantially foretold. Her body was, throughout many succeeding centuries, an object of devout veneration in the famous church which grew up on her foundation. (See ELY, ANCIENT DIOCESE OF.) One hand of the saint is now venerated in the church of St. Etheldreda, Ely Place, London, which enjoys the distinction of being the first—and at present (1909) the only—pre-Reformation church in Great Britain restored to Catholic worship. Built in the thirteenth century as a private chapel attached to the town residence of the Bishop of Ely, the structure of St. Etheldreda's passed through many vicissitudes during the centuries following its desecration, until, in 1873-74, it was purchased by Father William Lockhart and occupied by the Institute of Charity, of whose English mission Father Lockhart was then superior.

E. MACPHERSON

Ethelhard

Ethelhard

(ÆTHELHEARD, ETHELREARD)

The fourteenth Archbishop of Canterbury, England, date of birth unknown; died 12 May, 805. Much obscurity surrounds the details of his life previous to his election. He is described by Symeon of Durham as "Abbas Hludensis Monasterii", but it is uncertain what monastery is thus designated. It has been variously located at Louth in Lincolnshire (the most probable identification), Lydd, and Luddersdown in Kent, and at Malmesbury. William of Malmesbury is certainly mistaken in identifying him with Ethelhard, ninth Bishop of Winchester.

The rise of Offa, King of the Mercians (757-796), had divided England into three great states: Northumbria, Mercia, and Wessex. The king sought to consolidate his kingdom by giving it an independent ecclesiastical organization; for although Northumbria had its own archbishopric at York, Mercia, after conquering Kent, was still ecclesiastically subject to the powerful see of Canterbury, then ruled over by Jaenbert (766-791). Offa's scheme was to weaken Canterbury's influence by dividing the southern province, and creating a Mercian archbishopric at Lichfield: this he successfully accomplished when on the occasion of the Legatine visit of George and Theophylact, sent by Pope Hadrian I (772-795) in 786-788, Higbert received the pallium as Archbishop of Lichfield, and Canterbury was left with only London, Winchester, Sherborne, Rochester, and Selsey as suffragan sees. On the death of Jaenbert (12 Aug., 791), Ethelhard was raised to the see through the influence of Offa, which makes it likely that he was a Mercian abbot. Although he was elected in 791, his consecration only took place on 21 July, 793: the delay being probably due to the unwillingness of the Kentish clergy and people to receive a Mercian archbishop, and to his being consecrated by the Archbishop of Lichfield. Had Offa's policy of separate ecclesiastical organization prevailed, it would have impeded the attainment of national unity, and its defeat by Ethelhard is an event of the greatest importance in the history of the making of the English nation. During Offa's lifetime little could be done to restore Canterbury's rights and prestige. The year 796 was full of incident: the nobles of Kent rose in arms, and rallying round Eadbert Praen, a cleric and a member of their royal house, endeavoured to shake off the yoke of the Mercian Offa. As Ethelhard's difficulties increased Alcuin exhorted him not to desert his Church; but after taking severe eccle-

siastical measures against the recalcitrant cleric he was obliged to flee. Offa died on 26 July. His successor Egfrith died after a very short reign, about 13 Dec.; Cenwulf succeeded in Mercia, but the struggle continued in Kent until the capture of Eadbert in 798.

The co-operation of Ethelhard and Cenwulf in deposing Eadbert, and in upholding the Mercian cause in Kent, increased the importance of Canterbury, and the archiepiscopal authority of Higbert waned. Cenwulf restored an estate taken from Canterbury by Offa, and wrote in 798 to Pope Leo asking him to examine into the question of the diminution of the rights of that see, and enclosing a letter from Ethelhard and his suffragans. Ethelhard meanwhile had returned to his see, and Alcuin wrote exhorting him to do penance for having deserted it. The success of Abbot Wada's mission to Rome, the tone of the letter of Leo III to Cenwulf, and the successful conference with Eanbald II of York, with reference to the restoration of the rights of his see, determined Ethelhard to set out for Rome in 801. Alcuin's friendship once more stood him in good stead; he sent a servant to meet him at St. Josse-sur-mer, and furnished him with letters of recommendation to Charles the Great. Success attended his efforts in Rome. Pope Leo III (795-816) granted his request, and ended the dispute between Canterbury and Lichfield by depriving Lichfield of its recently acquired honours and powers. The pope's decision was officially acknowledged by the Council of Clovesho on 12 Oct., 803, in presence of Cenwulf and his Witan, and Higbert was deprived of his pallium, in spite of Alcuin's plea that so good a man should be spared that humiliation.

It is during Ethelhard's occupancy of the See of Canterbury that we first meet with official records of the profession of faith and obedience made by the English bishops-elect to their metropolitan. The first document of that type is the profession of obedience to the See of Canterbury made in 796 by Bishop Eadulf of Linsey, who, as a suffragan of Lichfield, ought to have been consecrated by Higbert: it would appear to coincide with the collapse of Higbert's archiepiscopal authority at the death of Offa.

SYMEON OF DURHAM (*Rolls Series*), II, 53; WILLIAM OF MALMESBURY, *Gesta Pontificum* (*Rolls Series*), 57-59; STUBBS, s. v. *Ethelhard* in *Dict. Christ. Biog.*; IDEM in *Dict. Nat. Biog.* The extant documents concerning Ethelhard are collected in HADDAN AND STUBBS, *Councils and Ecclesiastical Documents*, III, 467-555 (Oxford, 1871).

EDWARD MYERS.

St. Ethelwold

St. Ethelwold

St. Ethelwold, Bishop of Winchester, was born there of good parentage in the early years of the tenth century; d. 1 Aug., 984. After a youth spent at the court of King Athelstan, Ethelwold placed himself under Elphege the Bald, Bishop of Winchester, who gave him the tonsure and ordained him priest along with Dunstan. At Glastonbury, where he was dean under Saint Dunstan, he was a mirror of perfection. In 955 he became Abbot of Abingdon; and 29 November, 963, was consecrated Bishop of Winchester by Dunstan, with whom and Oswald of Worcester he worked zealously in combating the general corruption occasioned by the Danish inroads. At Winchester, both in the old and in his new minster (see SWITHIN, SAINT), he replaced the evil-living seculars with monks and refounded the ancient nunnery. His labours extended to Chertsey, Milton (Dorsetshire), Ely, Peterborough, and Thorney; expelling the unworthy, rebuilding and restoring; to the rebellious "terrible as a lion", to the meek "gentler than a dove". The epithets "father of monks" and "benevolent bishop" summarize Ethelwold's character as reformer and friend of Christ's poor. Though he suffered much from ill-health, his life as scholar, teacher, prelate, and royal counsellor was ever austere. He was buried in Winchester cathedral, his body being translated later by Elphege, his successor. Abingdon monastery in the twelfth century had relics of Ethelwold. He is said to have written a treatise on the circle and to have translated the "Regularis Concordia". His feast is kept on 1 August.

Not to be confounded with the foregoing are (2) St. Ethelwold, monk of Ripon, anchorite at Lindisfarne, d. about 720; feast kept 23 March; and (3) St. Ethelwold, Abbot of Melrose, Bishop of Lindisfarne, d. c. 740; feast kept 12 February.

PATRICK RYAN

Hugh and Leo Etherianus

Hugh and Leo Etherianus

Brothers, Tuscans by birth, employed at the court of Constantinople under the Emperor Manuel I (Comnenus, 1143-1180). Their name is spelled in various ways: Ætherianus, Heterianus, Eretrianus, etc. Leo is of little importance. We know from his brother (Adv. Graec. I, 20) that he was "occupied in translating the imperial letters", evidently an interpreter for Latin correspondence. Hugh, who does not seem to have held any official post at court, but was a very learned theologian, had many opportu-

ities of discussing the questions at issue between the Orthodox and Catholics (so he tells us: Adv. Graec., Praef. I., Migne, P.L., CCII, 165). As a result of these disputes he wrote a work in three books: "De haeresibus quas Graeci in Latinos devolvunt, sive quod Spiritus Sanctus ex utroque Patre et Filio procedit" (P.L., CCII, generally quoted as "Adv. Graecos"). This work, the first exhaustive and scientific defence of the *Filioque*, was composed in both languages, Latin and Greek. The author sent copies to the Orthodox Patriarch of Antioch, Aimerikos, and to Pope Alexander III (1159-1181), whose letter of acknowledgment is still extant (Ep. xlix, Baronius, an. 1177, n. 37, 38). Hugh Etherianus by this treatise obtains a very important place among Catholic controversialists against the Eastern Church. It appears that the emperor, who was well disposed towards Latins, had suggested that he should write it, having asked him whether they have "any authorities of saints who say that the Holy Ghost proceeds from the Son" (ib., Praef. I, CCII, col. 165). Hugh had used his knowledge of Greek and his opportunities of studying their Fathers so well that he was able to produce texts from nearly all the recognized authorities on both sides. He quotes especially Sts. Athanasius, Cyril of Alexandria, Basil, Gregory Nazianzen, Chrysostom, John Damascene, etc. From the Latins he produced witnesses from Sts. Augustine, Jerome, Gregory I, Ambrose, Hilary. He was also well acquainted with the writings of his adversaries and quotes Photius, Nicetas of Thessalonica, Theophylactus of Achrida, etc. The Latin version is very corrupt and untrustworthy. There are also some incorrect expressions noted by the later editors, such as that God the Father is the cause of the Son (this is a concession to the Greeks that was, however, tolerated by the Council of Florence; Denzinger, Enchiridion, n. 586). Nevertheless, since it was written this work has been the foundation of nearly all Latin controversy with the Greeks. St. Thomas Aquinas used it for his "Opusc. I, contra errores Graecorum" and Cardinal Bessarion refers to it with great praise (Ep. ad Alex., P.L., CLXI, 328). Hugh Etherianus also wrote a treatise "De regressu animarum ab inferis", in answer to a petition of the clergy of Pisa, and (probably) a short work "De Graecorum malis consuetudinibus". A "Liber de immortali Deo", written by him, is lost.

Ethics

Ethics

1. Definition

Many writers regard ethics (Gr. *ethike*) as any scientific treatment of the moral order and divide it into theological, or Christian, ethics (moral theology) and philosophical ethics (moral philosophy). What is usually understood by ethics, however, is

philosophical ethics, or moral philosophy, and in this sense the present article will treat the subject. Moral philosophy is a division of practical philosophy. Theoretical, or speculative, philosophy has to do with being, or with the order of things not dependent on reason, and its object is to obtain by the natural light of reason a knowledge of this order in its ultimate causes. Practical philosophy, on the other hand, concerns itself with what ought to be, or with the order of acts which are human and which therefore depend upon our reason. It is also divided into logic and ethics. The former rightly orders the intellectual activities and teaches the proper method in the acquirement of truth, while the latter directs the activities of the will; the object of the former is the true; that of the latter is the good. Hence ethics may be defined as the science of the moral rectitude of human acts in accordance with the first principles of natural reason. Logic and ethics are normative and practical sciences, because they prescribe norms or rules for human activities and show how, according to these norms, a man ought to direct his actions. Ethics is pre-eminently practical and directive; for it orders the activity of the will, and the latter it is which sets all the other faculties of man in motion. Hence, to order the will is the same as to order the whole man. Moreover, ethics not only directs a man how to act if he wishes to be morally good, but sets before him the absolute obligation he is under of doing good and avoiding evil.

A distinction must be made between ethics and morals, or morality. Every people, even the most uncivilized and uncultured, has its own morality or sum of prescriptions which govern its moral conduct. Nature had so provided that each man establishes for himself a code of moral concepts and principles which are applicable to the details of practical life, without the necessity of awaiting the conclusions of science. Ethics is the scientific or philosophical treatment of morality. The subject-matter proper of ethics is the deliberate, free actions of man; for these alone are in our power, and concerning these alone can rules be prescribed, not concerning those actions which are performed without deliberation, or through ignorance or coercion. Besides this, the scope of ethics includes whatever has reference to free human acts, whether as principle or cause of action (law, conscience, virtue), or as effect or circumstance of action (merit, punishment, etc.). The particular aspect (formal object) under which ethics considers free acts is that of their moral goodness or the rectitude of order involved in them as human acts. A man may be a good artist or orator and at the same time a morally bad man, or, conversely, a morally good man and a poor artist or technician. Ethics has merely to do with the order which relates to man as man, and which makes of him a good man.

Like ethics, moral theology also deals with the moral actions of man; but unlike ethics it has its origin in supernaturally revealed truth. It presupposes man's elevation to the supernatural order, and, though it avails itself of the scientific conclusions of

ethics, it draws its knowledge for the most part from Christian Revelation. Ethics is distinguished from the other natural sciences which deal with moral conduct of man, as jurisprudence and pedagogy, in this, that the latter do not ascend to first principles, but borrow their fundamental notions from ethics, and are therefore subordinate to it. To investigate what constitutes good or bad, just or unjust, what is virtue, law, conscience, duty, etc., what obligations are common to all men, does not lie within the scope of jurisprudence or pedagogy, but of ethics; and yet these principles must be presupposed by the former, must serve them as a ground-work and guide; hence they are subordinated to ethics. The same is true of political economy. The latter is indeed immediately concerned with man's social activity inasmuch as it treats of the production, distribution and consumption of material commodities, but this activity is not independent of ethics; industrial life must develop in accordance with the moral law and must be dominated by justice, equity, and love. Political economy was wholly wrong in trying to emancipate itself from the requirements of ethics. Sociology is at the present day considered by many as a science distinct from ethics. If, however, by sociology is meant a philosophical treatment of society, it is a division of ethics; for the enquiry into the nature of society in general, into the origin, nature, object and purpose of natural societies (the family, the state) and their relations to one another forms an essential part of Ethics. If, on the other hand, sociology be regarded as the aggregate of the sciences which have reference to the social life of man, it is not a single science but a complexus of sciences; and among these, so far as the natural order is concerned, ethics has the first claim.

II. Sources and Methods of Ethics

The sources of ethics are partly man's own experience and partly the principles and truths proposed by other philosophical disciplines (logic and metaphysics). Ethics takes its origin from the empirical fact that certain general principles and concepts of the moral order are common to all people at all times. This fact has indeed been frequently disputed, but recent ethnological research has placed it beyond the possibility of doubt. All nations distinguish between what is good and what is bad, between good men and bad men, between virtue and vice; they are all agreed in this: that the good is worth striving for, and that evil must be shunned, that the one deserves praise, the other, blame. Though in individual cases they may not be one in denominating the same thing good or evil, they are nevertheless agreed as to the general principle, that good is to be done and evil avoided. Vice everywhere seeks to hide itself or to put on the mask of virtue; it is a universally recognized principle, that we should not do to others what we would not wish them to do to us. With the aid of the truths laid down in logic and metaphysics, ethics proceeds to give a thorough explanation of this undeniable fact, to trace it back to its ultimate causes, then to gather from fundamental

moral principles certain conclusions which will direct man, in the various circumstances and relations of life, how to shape his own conduct towards the attainment of the end for which he was created. Thus the proper method of ethics is at once speculative and empirical; it draws upon experience and metaphysics. Supernatural Christian Revelation is not a proper source of ethics. Only those conclusions properly belong to ethics which can be reached with the help of experience and philosophical principles. The Christian philosopher, however, may not ignore supernatural revelation, but must at least recognise it as a negative norm, inasmuch as he is not to advance any assertion in evident contradiction to the revealed truth of Christianity. God is the fountain-head of all truth -- whether natural as made known by Creation, or supernatural as revealed through Christ and the Prophets. As our intellect is an image of the Divine Intellect, so is all certain scientific knowledge the reflex and interpretation of the Creator's thoughts embodied in His creatures, a participation in His eternal wisdom. God cannot reveal supernaturally and command us to believe on His authority anything that contradicts the thoughts expressed by Him in his creatures, and which, with the aid of the faculty of reason which he has given us, we can discern in His works. To assert the contrary would be to deny God's omniscience and veracity, or to suppose that God was not the source of all truth. A conflict, therefore, between faith and science is impossible, and hence the Christian philosopher has to refrain from advancing any assertion which would be evidently antagonistic to certain revealed truth. Should his researches lead to conclusions out of harmony with faith, he is to take it for granted that some error has crept into his deductions, just as the mathematician whose calculations openly contradict the facts of experience must be satisfied that his demonstration is at fault.

After what has been said the following methods of ethics must be rejected as unsound.

- 1 Pure Rationalism. -- This system makes reason the sole source of truth, and therefore at the very outset excludes every reference to Christian Revelation, branding any such reference as degrading and hampering free scientific investigation. The supreme law of science is not freedom, but truth. It is not derogatory to the true dignity and freedom of science to abstain from asserting what, according to Christian Revelation, is manifestly erroneous.
- 2 Pure Empiricism, which would erect the entire structure of ethics exclusively on the foundation of experience, must also be rejected. Experience can tell us merely of present or past phenomena; but as to what, of necessity, and universal, must, or ought to, happen in the future, experience can give us no clue without bringing in the aid of necessary and universal principles. Closely allied to Empiricism is

Historicism, which considers history as the exclusive source of ethics. What has been said of Empiricism may also be applied to Historicism. History is concerned with what has happened in the past and only too often has to rehearse the moral aberrations of mankind.

- 3 Positivism is a variety of Empiricism; it seeks to emancipate ethics from metaphysics and base it on facts alone. No science can be constructed on the mere foundation of facts, and independently of metaphysics. Every science must set out from evident principles, which form the basis of all certain cognition. Ethics especially is impossible without metaphysics, since it is according to the metaphysical view we take of the world that ethics shapes itself. Whoever considers man as nothing else than a more highly developed brute will hold different ethical views from one who discerns in man a creature fashioned to the image and likeness of God, possessing a spiritual, immortal soul and destined to eternal life; whoever refuses to recognize the freedom of the will destroys the very foundation of ethics. Whether man was created by God or possesses a spiritual, immortal soul which is endowed with free will, or is essentially different from brute creation, all these are questions pertaining to metaphysics. Anthropology, moreover, is necessarily presupposed by ethics. No rules can be prescribed for man's actions, unless his nature is clearly understood.
- 4 Another untenable system is Traditionalism, which in France, during the last half of the nineteenth century, counted many adherents (among others, de Bonald, Bautain), and which advanced the doctrine that complete certainty in religious and moral questions was not to be attained by the aid of reason alone, but only by the light of revelation as made known to us through tradition. They failed to see that for all reasonable belief certain knowledge of the existence of God and of the fact of revelation is necessarily presupposed, and this knowledge cannot be gathered from revelation. Fideism, or, as Paulsen designated it, the Irrationalism of many Protestants, also denies the ability of reason to furnish certainty in matters relating to God and religion. With Kant, it teaches that reason does not rise above the phenomena of the visible world; faith alone can lead us into the realm of the supersensible and instruct us in matters moral and religious. This faith, however, is not the acceptance of truth on the strength of external authority, but rather consists in certain appreciative judgments, i.e. assumptions or convictions which are the result of each one's own inner experiences, and which have, therefore, for him a precise worth, and correspond to his own peculiar temperament. Since these persuasions are not supposed to come within the range of reason, exception to them cannot be taken on scientific grounds. According to this opinion, religion and

morals are relegated to pure subjectivism and lose all their objectivity and universality of value.

III. Historical View of Ethics

As ethics is the philosophical treatment of the moral order, its history does not consist in narrating the views of morality entertained by different nations at different times; this is properly the scope of the history of civilisation, and of ethnology. The history of ethics is concerned solely with the various philosophical systems which in the course of time have been elaborated with reference to the moral order. Hence the opinions advanced by the wise men of antiquity, such as Pythagoras (582-500 B.C.), Heraclitus (535-475 B.C.), Confucius (558-479 B.C.), scarcely belong to the history of ethics; for, though they proposed various moral truths and principles, they did so in a dogmatic and didactic, and not in a philosophically systematic manner. Ethics properly so-called is first met with among the Greeks, i.e. in the teaching of Socrates (470-399 B.C.). According to him the ultimate object of human activity is happiness, and the necessary means to reach it, virtue. Since everybody necessarily seeks happiness, no one is deliberately corrupt. All evil arises from ignorance, and the virtues are one and all but so many kinds of prudence. Virtue can, therefore, be imparted by instruction. The disciple of Socrates, Plato (427-347 B.C.) declares that the *summum bonum* consists in the perfect imitation of God, the Absolute Good, an imitation which cannot be fully realised in this life. Virtue enables man to order his conduct, as he properly should, according to the dictates of reason, and acting thus he becomes like unto God. But Plato differed from Socrates in that he did not consider virtue to consist in wisdom alone, but in justice, temperance, and fortitude as well, these constituting the proper harmony of man's activities. In a sense, the State is man writ large, and its function its function is to train its citizens in virtue. For his ideal State he proposed the community of goods and of wives and the public education of children. Though Socrates and Plato had been to the fore in this mighty work and had contributed much valuable material to the upbuilding of ethics; nevertheless, Plato's illustrious disciple, Aristotle (384-322 B.C.), must be considered the real founder of systematic ethics. With characteristic keenness he solved, in his ethical and political writings, most of the problems with which ethics concerns itself. Unlike Plato, who began with ideas as the basis of his observation, Aristotle chose rather to take the facts of experience as his starting-point; these he analysed accurately, and sought to trace to their highest and ultimate causes. He set out from the point that all men tend to happiness as the ultimate object of all their endeavours, as the highest good, which is sought for its own sake, and to which all other goods merely serve as means. This happiness cannot consist in external goods, but only in the activity proper to human nature - not indeed in such a lower activity

of the vegetative and sensitive life as man possesses in common with plants and brutes, but in the highest and most perfect activity of his reason, which springs in turn from virtue. This activity, however, has to be exercised in a perfect and enduring life. The highest pleasure is naturally bound up with this activity, yet, to constitute perfect happiness, external goods must also supply their share. True happiness, though prepared for him by the gods as the object and reward of virtue, can be attained only through a man's own individual exertion. With keen penetration Aristotle therupon proceeds to investigate in turn each of the intellectual and moral virtues, and his treatment of them must, even at the present time, be regarded as in great part correct. The nature of the State and of the family were, in the main, rightly explained by him. The only pity is that his vision did not penetrate beyond this earthly life, and that he never saw clearly the relations of man to God.

A more hedonistic (*edone*, "pleasure") turn in ethics begins with Democritus (about 460-370 B.C.), who considers a perpetually joyous and cheerful disposition as the highest good and happiness of man. The means thereto is virtue, which makes us independent of external goods -- so far as that is possible -- and which wisely discriminates between the pleasures to be sought after and those that are to be shunned. Pure Sensualism or Hedonism was first taught by Aristippus of Cyrene (435-354 B.C.), according to whom the greatest possible pleasure, is the end and supreme good of human endeavour. Epicurus (341-270 B.C.) differs from Aristippus in holding that the largest sum total possible of spiritual and sensual enjoyments, with the greatest possible freedom from displeasure and pain, is man's highest good. Virtue is the proper directive norm in the attainment of this end.

The Cynics, Antisthenes (444-369 B.C.) and Diogenes of Sinope (414-324 B.C.), taught the direct contrary of Hedonism, namely that virtue alone suffices for happiness, that pleasure is an evil, and that the truly wise man is above human laws. This teaching soon degenerated into haughty arrogance and open contempt for law and for the remainder of men (Cynicism). The Stoics, Zeno (336-264 B.C.) and his disciples, Cleanthes, Chrysippus, and others, strove to refine and perfect the views of Antisthenes. Virtue, in their opinion, consist in man's living according to the dictates of his rational, and, as each one's individual nature is but a part of the entire natural order, virtue is, therefore, the harmonious agreement with the Divine Reason, which shapes the whole course of nature. Whether they conceived this relation of God to the world in a pantheistic or a theistic sense, is not altogether clear. Virtue is to be sought for its own sake, and it suffices for man's happiness. All other things are indifferent and are, as circumstances require, to be striven after or shunned. The passions and affections are bad, and the wise man is independent of them. Among the Roman Stoics were Seneca (4 B.C. -- A.D. 65), Epictetus (born about A.D. 50), and the Emperor Marcus Aurelius

(A.D. 121-180), upon whom however, at least upon the latter two, Christian influences had already begun to make themselves felt. Cicero (106-43 B.C.) elaborated no new philosophical system of his own, but chose those particular views from the various systems of Grecian philosophy which appeared best to him. He maintained that moral goodness, which is the general object of all virtues, consists in what is becoming to man as a rational being as distinct from the brute. Actions are often good or bad, just or unjust, not because of human institutions or customs, but of their own intrinsic nature. Above and beyond human laws, there is a natural law embracing all nations and all times, the expression of the rational will of the Most High God, from obedience to which no human authority can exempt us. Cicero gives an exhaustive exposition of the cardinal virtues and the obligations connected with them; he insists especially on devotion to the gods, without which human society could not exist.

Parallel with the above-mentioned Greek and Roman ethical systems runs a sceptical tendency, which rejects every natural moral law, bases the whole moral order on custom or human arbitrariness, and frees the wise man from subjection to the ordinary precepts of the moral order. This tendency was furthered by the Sophists, against whom Socrates and Plato arrayed themselves, and later on by Carneades, Theodorus of Cyrene, and others.

A new epoch in ethics begins with the dawn of Christianity. Ancient paganism never had a clear and definite concept of the relation between God and the world, of the unity of the human race, of the destiny of man, of the nature and meaning of the moral law. Christianity first shed full light on these and similar questions. As St. Paul teaches (Rom., ii, 24 sq.), God has written his moral law in the hearts of all men, even of those outside the influence of Christian Revelation; this law manifests itself in the conscience of every man and is the norm according to which the whole human race will be judged on the day of reckoning. In consequence of their perverse inclinations, this law had to a great extent become obscured and distorted among the pagans; Christianity, however, restored it to its pristine integrity. Thus, too, ethics received its richest and most fruitful stimulus. Proper ethical methods were now unfolded, and philosophy was in a position to follow up and develop these methods by means supplied from its own store-house. This course was soon adopted in the early ages of the Church by the Fathers and ecclesiastical writers, as Justin Martyr, Irenaeus, Tertullian, Clement of Alexandria, Origen, but especially the illustrious Doctors of the Church, Ambrose, Jerome, and Augustine, who, in the exposition and defence of Christian truth, made use of the principles laid down by the pagan philosophers. True, the Fathers had no occasion to treat moral questions from a purely philosophical standpoint, and independently of Christian Revelation; but in the explanation of Catholic doctrine their discussions naturally led to philosophical investigations. This is particularly true of St

Augustine, who proceeded to thoroughly develop along philosophical lines and to establish firmly most of the truths of Christian morality. The eternal law (*lex aeterna*), the original type and source of all temporal laws, the natural law, conscience, the ultimate end of man, the cardinal virtues, sin, marriage, etc. were treated by him in the clearest and most penetrating manner. Hardly a single portion of ethics does he present to us but is enriched with his keen philosophical commentaries. Late ecclesiastical writers followed in his footsteps.

A sharper line of separation between philosophy and theology, and in particular between ethics and moral theology, is first met with in the works of the great Schoolmen of the Middle Ages, especially of Albert the Great (1193-1280), Thomas Aquinas (1225-1274), Bonaventure (1221-1274), and Duns Scotus (1274-1308). Philosophy and, by means of it, theology reaped abundant fruit from the works of Aristotle, which had until then been a sealed treasure to Western civilization, and had first been elucidated by the detailed and profound commentaries of St. Albert the Great and St. Thomas Aquinas and pressed into the service of Christian philosophy. The same is particularly true as regards ethics. St. Thomas, in his commentaries on the political and ethical writings of the Stagirite, in his "*Summa contra Gentiles*" and his "*Quaestiones disputatae*", treated with his wonted clearness and penetration nearly the whole range of ethics in a purely philosophical manner, so that even to the present day his works are an inexhaustible source whence ethics draws its supply. On the foundations laid by him the Catholic philosophers and theologians of succeeding ages have continued to build. It is true that in the fourteenth and fifteenth centuries, thanks especially to the influence of the so-called Nominalists, a period of stagnation and decline set in, but the sixteenth century is marked by a revival. Ethical questions, also, though largely treated in connexion with theology, are again made the subject of careful investigation. We mention as examples the great theologians Victoria, Dominicus Soto, L. Molina, Suarez, Lessius, and De Lugo. Since the sixteenth century special chairs of ethics (moral philosophy) have been erected in many Catholic universities. The larger, purely philosophical works on ethics, however do not appear until the seventeenth and eighteenth centuries, as an example of which we may instance the production of Ign. Schwarz, "*Institutiones juris universalis naturae et gentium*" (1743).

Far different from Catholic ethical methods were those adopted for the most part by Protestants. With the rejection of the Church's teaching authority, each individual became on principle his own supreme teacher and arbiter in matters appertaining to faith and morals. True it is that the Reformers held fast to Holy Writ as the infallible source of revelation, but as to what belongs or does not belong to it, whether, and how far, it is inspired, and what is its meaning -- all this was left to the final decision of the individual. The inevitable result was that philosophy arrogantly threw to the winds all

regard for revealed truth, and in many cases became involved in the most pernicious errors. Melancthon, in his "Elementa philosophiae moralis", still clung to the Aristotelean philosophy; so, too, did Hugo Grotius, in his work, "De jure belli et pacis". But Cumberland and his follower, Samuel Pufendorf, moreover, assumed, with Descartes, that the ultimate ground for every distinction between good and evil lay in the free determination of God's will, a view which renders the philosophical treatment of ethics fundamentally impossible. Quite an influential factor in the development of ethics was Thomas Hobbes (1588-1679). He supposes that the human race originally existed in a rude condition (*status naturae*) in which every man was free to act as he pleased, and possessed a right to all things, whence arose a war of all against all. Lest destruction should be the result, it was decided to abandon this condition of nature and to found a state in which, by agreement, all were to be subject to one common will (one ruler). This authority ordains, by the law of the State, what is to be considered by all as good and as evil, and only then does there arise a distinction between good and evil of universal binding force on all. The Pantheist Baruch Spinoza (1632-1677) considers the instinct to self-preservation as the foundation of virtue. Every being is endowed with the necessary impulse to assert itself, and, as reason demands nothing contrary to nature, it requires each one to follow this impulse and to strive after whatever is useful to him. And each individual possesses power and virtue just in so far as he obeys this impulse. Freedom of the will consists merely in the ability to follow unrestrainedly this natural impulse. Shaftesbury (1671-1713) bases ethics on the affections or inclinations of man. There are sympathetic, idiopathic, and unnatural inclinations. The first of these regard the common good, the second the private good of the agent, the third are opposed to the other two. To lead a morally good life, war must be waged upon the unnatural impulses, while the idiopathic and sympathetic inclinations must be made to harmonize. This harmony constitutes virtue. In the attainment of virtue the subjective guiding principle of knowledge is the "moral sense", a sort of moral instinct. This "moral sense" theory was further developed by Hutcheson (1694-1747); meanwhile "common sense" was suggested by Thoms Reid (1710-1796) as the highest norm of moral conduct. In France the materialistic philosophers of the eighteenth century -- as Helvetius, de la Mettrie, Holbach, Condillac, and others -- disseminated the teachings of Sensualism and Hedonism as understood by Epicurus.

A complete revolution in ethics was introduced by Immanuel Kant (1724-1804). From the wreck of pure theoretical reason he turned for rescue to practical reason, in which he found an absolute, universal, and categorical moral law. This law is not to be conceived as an enactment of external authority, for this would be heteronomy, which is foreign to true morality; it is rather the law of our own reason, which is, therefore, autonomous, that is, it must be observed for its own sake, without regard

to any pleasure or utility arising therefrom. Only that will is morally good which obeys the moral law under the influence of such a subjective principle or motive as can be willed by the individual to become the universal law for all men. The followers of Kant have selected now one now another doctrine from his ethics and combined therewith various pantheistical systems. Fichte places man's supreme good and destiny in absolute spontaneity and liberty; Schleiermacher, in co-operating with the progressive civilization of mankind. A similar view recurs substantially in the writings of Wilhelm Wundt and, to a certain extent, in those of the pessimist, Edward von Hartmann, though the latter regards culture and progress merely as means to the ultimate end, which, according to him, consists in delivering the Absolute from the torment of existence.

The system of Cumberland, who maintained the common good of mankind to be the end and criterion of moral conduct, was renewed on a positive basis in the nineteenth century by Auguste Comte and has counted many adherents, e.g., in England, John Stuart Mill, Henry Sidgwick, Alexander Bain; in Germany, G.T. Fechner, F.E. Beneke, F. Paulsen, and others. Herbert Spencer (1820-1903) sought to effect a compromise between social Utilitarianism (Altruism) and private Utilitarianism (Egoism) in accordance with the theory of evolution. In his opinion, that conduct is good which serves to augment life and pleasure without any admixture of displeasure. In consequence, however, of man's lack of adaptation to the conditions of life, such absolute goodness of conduct is not as yet possible, and hence various compromises must be made between Altruism and Egoism. With the progress of evolution, however, this adaptability to existing conditions will become more and more perfect, and consequently the benefits accruing to the individual from his own conduct will be most useful to society at large. In particular, sympathy (in joy) will enable us to take pleasure in altruistic actions.

The great majority of non-Christian moral philosophers have followed the path trodden by Spencer. Starting with the assumption that man, by a series of transformations, was gradually evolved from the brute, and therefore differs from it in degree only, they seek the first traces and beginnings of moral ideas in the brute itself. Charles Darwin had done some preparatory work along these lines, and Spencer did not hesitate to descant on brute-ethics, on the pre-human justice, conscience, and self-control of brutes. Present-day Evolutionists follow his view and attempt to show how animal morality has in man continually become more perfect. With the aid of analogies taken from ethnology, they relate how mankind originally wandered over the face of the earth in semi-savage hordes, knew nothing of marriage or the family, and only by degrees reached a higher level of morality. These are the merest creations of fancy. If man is nothing more than a highly developed brute, he cannot possess a spiritual and immortal soul, and there can no longer be question of the freedom of the will, of the

future retribution of good and evil, nor can man in consequence be hindered from ordering his life as he pleases and regarding the well-being of others only in so far as it redounds to his own profit.

As the Evolutionists, so too the Socialists favour the theory of evolution from their ethical viewpoint; yet the latter do not base their observations on scientific principles, but on social and economic considerations. According to K. Marx, F. Engels, and other exponents of the so-called "materialistic interpretation of history", all moral, religious, juridical and philosophical concepts are but the reflex of the economical conditions of society in the minds of men. Now these social relations are subject to constant change; hence the ideas of morality, religion, etc. are also continually changing. Every age, every people, and even each class in a given people forms its moral and religious ideas in accordance with its own peculiar economical situation. Hence, no universal code of morality exists binding on all men at all times; the morality of the present day is not of Divine origin, but the product of history, and will soon have to make room for another system of morality. Allied to this materialistic historical interpretation, though derived from other sources, is the system of Relativism, which recognizes no absolute and unchangeable truths in regard to ethics or anything else. Those who follow this opinion aver that nothing objectively true can be known by us. Men differ from one another and are subject to change, and with them the manner and means of viewing the world about them also change. Moreover the judgments passed on matters religious and moral depend essentially on the inclinations, interests, and character of the person judging, while these latter are constantly varying. Pragmatism differs from Relativism inasmuch as that not only is to be considered true which is proven by experience to be useful; and, since the same thing is not always useful, unchangeable truth is impossible.

In view of the chaos of opinions and systems just described, it need not surprise us that, as regards ethical problems, scepticism is extending its sway to the utmost limits, in fact many exhibit a formal contempt for the traditional morality. According to Max Nordau, moral precepts are nothing but "conventional lies"; according to Max Stirner, that alone is good which serves my interests, whereas the common good, the love for all men, etc. are but empty phantoms. Men of genius and superiority in particular are coming more and more to be regarded as exempt from the moral law. Nietzsche is the originator of a school whose doctrines are founded on these principles. According to him, goodness was originally identified with nobility and gentility of rank. Whatever the man of rank and power did, whatever inclinations he possessed were good. The down-trodden proletariat, on the other hand were bad, i.e. lowly and ignoble, without any other derogatory meaning being given to the word bad. It was only by a gradual process that the oppressed multitude through hatred and envy evolved the distinction

between good and bad, in the moral sense, by denominating the characteristics and conduct of those in power and rank as bad, and their own behaviour as good. And thus arose the opposition between the morality of the master and that of the slave. Those in power still continued to look upon their own egoistic inclinations as noble and good, while the oppressed populace lauded the "instincts of the common herd", i.e. all those qualities necessary and useful to its existence -- as patience, meekness, obedience and love of one's neighbour. Weakness became goodness, cringing obsequiousness became humility, subjection to hated oppressors was obedience, cowardice meant patience. "All morality is one long and audacious deception." Hence, the value attached to the prevailing concepts of morality must be entirely re-arranged. Intellectual superiority is above and beyond good and evil as understood in the traditional sense. There is no higher moral order to which men of such calibre are amenable. The end of society is not the common good of its members; the intellectual aristocracy (the over-man) is its own end; in its behalf the common herd, the "too many", must be reduced to slavery and decimated. As it rests with each individual to decide who belongs to this intellectual aristocracy, so each man is at liberty to emancipate himself from the existing moral order.

In conclusion, one other tendency in ethics may be noted, which has manifested itself far and wide; namely, the effort to make all morality independent of all religion. It is clear that many of the above-mentioned ethical systems essentially exclude all regard for God and religion, and this is true especially of materialistic, agnostic, and in the last analysis, of all pantheistic systems. Apart, also, from these systems, "independent morality", called also "lay morality", has gained many followers and defenders. Kant's ideas formed the basis of this tendency, for he himself founded a code of morality on the categorical imperative and expressly declared that morality is sufficient for itself, and therefore has no need of religion. Many modern philosophers -- Herbart, Eduard von Hartmann, Zeller, Wundt, Paulsen, Ziegler, and a number of others -- have followed Kant in this respect. For several decades practical attempts have been made to emancipate morality from religion. In France religious instruction was banished from the schools in 1882 and moral instruction substituted. This tendency manifests a lively activity in what is known as the "ethical movement", whose home, properly speaking, is in the United States. In 1876, Felix Adler, professor at Cornell University, founded the "Society for Ethical Culture", in New York City. Similar societies were formed in other cities. These were consolidated in 1887 into the "Union of the Societies for Ethical Culture." Besides Adler, the chief propagators of the movement by word of mouth and writing were W.M. Salter and Stanton Coit. The purpose of these societies is declared to be "the improvement of the moral life of the members of the societies and of the community to which they belong, without any regard to theological or philosoph-

ical opinions". In most of the European countries ethical societies were founded on the model of the American organization. All these were combined in 1894 into the "International Ethical Association". Their purpose, i.e. the amelioration of man's moral condition, is indeed praiseworthy, but it is erroneous to suppose that any such moral improvement can be brought about without taking religion into consideration. In fact many members of the ethical societies are openly antagonistic to all religions, and would therefore do away with denominational schools and supplant religious teaching by mere moral instruction. Even upon purely ethical considerations such attempts must be unhesitatingly rejected. If it be true that even in the case of adults moral instruction without religion, without any higher obligation or sanction, is a nonentity, a meaningless sham, how much more so is it in the case of the young? It is evident that, judged from the standpoint of Christianity, these efforts must meet with a still more decided condemnation. Christians are bound to observe not only the prescriptions of the natural law, but also all the precepts given by Christ concerning faith, hope, love, Divine worship, and the imitation of Himself. The Christian, moreover, knows that without Divine grace and, hence, without prayer and the frequent reception of the sacraments, a morally good life for any considerable length of time is impossible. >From their earliest years, therefore, the young must not only receive thorough instruction in all the Commandments, but must be exercised and trained in the practical use of the means of grace. Religion must be the soil and atmosphere in which education develops and flourishes.

While, among non-Catholics ever since the Reformation, and especially since Kant, there has been an increasing tendency to divorce ethics from religion, and to dissolve it into countless venturesome and frequently contradictory systems, Catholics for the most part have remained free from these errors, because, in the Church's infallible teaching authority, the Guardian of Christian Revelation, they have always found secure orientation. It is true that towards the end of the eighteenth, and at the beginning of the nineteenth century, Illuminism and Rationalism penetrated here and there into Catholic circles and attempted to replace moral theology by purely philosophical ethics, and in turn to transform the latter according to the Kantian autonomy. This movement, however, was but a passing phase. With a reawakening of the Church's activity, fresh impetus was given to Catholic science, which was of benefit to ethics also and produced in its domain some excellent fruits. Recourse was again had to the illustrious past of Catholicism, while, at the same time, modern ethical systems gave occasion to a thorough investigation and verification of principles of the moral order. Taparelli d'Azeglio led the way with his great work "Saggio teoretico di diritto naturale appoggiato sul fatto" (1840-43). Then followed, in Italy, Audisio, Rosmini, Liberatore, Sanseverino, Rosselli, Zigliara, Signoriello, Schiffini, Ferretti, Talamo, and others. In Spain this revival of

ethics was due to, among others, J. Balmes, Donoso Cortés, Zefirio Gonzalez, Mendive, R. de Cepeda; in France and Belgium, to de Lehen (Institutes de droit naturel), de Margerie, Onclair, Ath, Vallet, Charles Périn, Piat, de Pascal, Moulart, Castelein; in England and America, to Joseph Rickaby, Jouin, Russo, Hollaind, J.J. Ming. In German-speaking countries the reawakening of Scholasticism in general begins with Kleutgen (*Theologie der Vorzeit*, 1853); *Philosophie der Vorzeit*, 1860), and of ethics in particular with Th. Meyer (*Die Grundsätze der Sittlichkeit und des Rechts*, 1868; *Institutiones juris naturalis seu philosophiae moralis universae*, 1885-1900). After them came A. Stöckl, Ferd. Walter, Moy de Sons, C. Gutberlet, Fr. J. Stein, Brandis, Costa-Rossetti, A.M. Weiss, Renninger, Lehmen, Willems, V. Frins, Heinrich Pesch, and others. We pass over numerous Catholic writers, who have made a specialty of sociology and political economy.

IV. Outlines of Ethics

It is clear that the following statement cannot pretend to treat thoroughly all ethical questions; it is intended rather to afford the reader an insight into the most important problems dealt with by ethics, as well as into the methods adopted in their treatment. Ethics is usually divided into two parts: general, or theoretical ethics, and special, or applied ethics. General ethics expounds and verifies the general principles and concepts of the moral order; special ethics applies these general principles to the various relations of man, and determines his duties in particular.

Reason itself can rise from the knowledge of the visible creation to the certain knowledge of the existence of God, the origin and end of all things. On this fundamental truth the structure of ethics must be based. God created man, as he created all things else, for His own honour and glory. The ultimate end is the proper motive of the will's activity. If God were not the ultimate object and end of His own activity, he would depend upon His creatures, and would not be infinitely perfect. He is, then, the ultimate end of all things, they are created for His sake, not, indeed, that he can derive any benefit from them, which would be repugnant to an infinitely perfect being, but for His glory. They are to manifest His goodness and perfection. Irrational creatures cannot of themselves directly glorify God, for they are incapable of knowing Him. They are intended as means to the end for which rational man was created. The end of man, however, is to know God, to love Him and serve Him, and thereby attain to perfect and unending happiness. Every man has within him an irresistible, indestructible desire for perfect happiness; he seeks to be free from every evil and to possess every attainable good. This impulse to happiness is founded on man's nature; it is implanted there by his Maker; and hence will be duly realised, if nothing is wanting on the part of man's own individual endeavour. But perfect happiness is unattainable in the present life, if for no other reason, at least for this, that inexorable death puts an early end to

all earthly happiness. There is reserved for man a better life, if he freely chooses to glorify God here on earth. It will be the crown of victory to be conferred upon him hereafter, if at present he remains subject to God and keeps His Commandments. Only from the viewpoint of eternity do this earthly life and the moral order acquire their proper significance and value. But how does man, considered in the natural order, or apart from every influence of supernatural revelations, come to know what God requires of him here below, or how he is to serve and glorify Him, in order to arrive at eternal happiness? -- By means of the natural law.

From eternity there existed in the mind of God the idea of the world, which he determined to create, as well as the plan of government according to which He wished to rule the world and direct it to its end. This ordination existing in the mind of God from all eternity, and depending on the nature and essential relations of rational beings, is the eternal law of God (*lex aeterna Dei*), the source from which all temporal laws take their rise. God does not move and govern His creatures by a mere external directive impetus, as the archer does the arrow, but by means of internal impulses and inclinations, which He has bound up with their natures. Irrational creatures are urged, by means of physical forces or natural impulses and instincts to exercise the activity peculiar to them and keep the order designed for them. Man, on the other hand, is a being endowed with reason and free will; as such, he cannot be led by blind impulses and instincts in a manner conformable to his nature, but must needs depend on practical principles and judgments, which point out to him how he is to order his conduct. These principles must somehow or other be manifested to him by nature. All created things have implanted in their natures certain guiding principles, necessary to their corresponding activities. Man must be no exception to this rule. He must be led by a natural inborn light, manifesting to him what he is to do, or not to do. This natural light is the natural law. When we speak of man as possessing a natural, inborn light, it is not to be understood in the sense that man has innate ideas. Innate ideas do not exist. It is true, nevertheless, that the Creator has endowed man with the ability and the inclination to form many concepts and develop principles. As soon as he comes to the use of reason, he forms, by a natural necessity, on the basis of experience, certain general concepts of theoretical reason -- e.g. those of being and not being, of cause and effect, of space and time -- and so he arrives at universal principles, e.g. that "nothing can exist and not exist at the same time", that "every effect has its cause", etc. As it is in the theoretical, so also in the practical order. As soon as reason has been sufficiently developed, and the individual can somehow or other practically judge that he is something more than a mere animal, by an intrinsic necessity of his nature he forms the concept of good and evil, i.e. of something that is proper to the rational nature which distinguishes him from the brute, and which is therefore worth striving

for, and something which is unbecoming and therefore to be avoided. Adn, as by nature he feels himself attracted by what is good, and repelled by what is evil, he naturally forms the judgments, that "good is to be done and evil avoided", that "man ought to live according to the dictates of reason", etc. From his own reflections, especially when assisted by instruction from others, he easily comes to the conclusion that in these judgments the will of a superior being, of the Creator and Designer of nature, has its expression. Around about him he perceives that all things are well ordered, so that it is very easy for him to discern in them the handiwork of a superior and all-wise power. He himself has been appointed to occupy in the domain of nature the position of lord and master; he, too, must lead a well regulated life, as befits a rational being, not merely because he himself chooses to do so, but also in obedience to his Creator. Man did not give himself his nature with all its faculties and inclinations; he received it from a superior being, whose wisdom and power are everywhere manifest to him in Creation.

The general practical judgments and principles: "Do good and avoid evil", "Lead a life regulated according to reason", etc., from which all the Commandments of the Decalogue are derived, are the basis of the natural law, of which St. Paul (Rom., ii, 14) says, that it is written in the hearts of all men. This law is an emanation of the Divine law, made known to all men by nature herself; it is the expression of the will of nature's Author, a participation of the created rational being in the eternal law of God. Hence the obligation it imposes does not arise from man's own autonomy, as Kant held, nor from any other human authority, but from the will of the Creator; and man cannot violate it without rebelling against God, his master, offending Him, and becoming amenable to his justice. How deeply rooted among all nations this conviction of the higher origin of the natural law was, is shown by the fact that for various violations of it (as murder, adultery, perjury, etc.) they did their utmost to propitiate the angered deity by means of prayers and sacrifices. Hence they looked upon the deity as the guardian and protector of the moral order, who would not let the contempt of it to go unpunished. The same conviction is manifested by the value all nations have attached to the moral order, a value far surpassing that of all other earthly goods. The noblest among the nations maintained that it was better to undergo any hardship, even death itself, rather than prove recreant to one's duty. They understood, therefore, that, over and above earthly treasures, there were higher and more lasting goods whose attainment was dependent upon the observance of the moral order, and this not by reason of any ordinance of man, but because of the law of God. This being premised, it is clearly impossible to divorce morality from religion without robbing it of its true obligation and sanction, of its sanctity and inviolability and of its importance as transcending every other earthly consideration.

The natural law consists of general practical principles (commands and prohibitions) and the conclusion necessarily flowing therefrom. It is the peculiar function of man to formulate these conclusions himself, though instruction and training are to assist him in doing so. Besides this, each individual has to take these principles as a guide of his conduct and apply them to his particular actions. This, to a certain extent, everybody does spontaneously, by virtue of an innate tendency. As in the case of all practical things, so in regard to what concerns the moral order, reason uses syllogistic processes. When a person, e.g., is on the point of telling a lie, or saying what is contrary to his convictions, there rises before his mental vision the general precept of the natural law: "Lying is wrong and forbidden." Hence he avails himself, at least virtually, of the following syllogism: "Lying is forbidden; what you are about to say is a lie; therefore, what you are about to say is forbidden." The conclusion thus arrived at is our conscience, the proximate norm of our conduct. Conscience, therefore, is not an obscure feeling or a sort of moral instinct, but a practical judgment of our reason on the moral character of individual acts. If we follow the voice of conscience, our reward is peace and calm of soul, if we resist this voice, we experience disquiet and remorse.

The natural law is the foundation of all human laws and precepts. It is only because we recognize the necessity of authority for human society, and because the natural law enjoins obedience to regularly constituted authority, that it is possible for a human superior to impose laws and commands binding in conscience. Indeed all human laws and precepts are fundamentally the conclusions, or more minute determinations, of the general principles of the natural law, and for this very reason every deliberate infraction of a law or precept binding in conscience is a sin, i.e. the violation of a Divine commandment, a rebellion against God, an offence against Him, which will not escape punishment in this life or in the next, unless duly repented of before death.

The problems hitherto mentioned belong to general, or theoretical, ethics, and their investigation in nearly all cases bear upon the natural law, whose origin, nature, subject-matter, obligation, and properties it is the scope of ethics to explain thoroughly and verify. The general philosophical doctrine of right is usually treated in general ethics. Under no circumstances may the example of Kant and others be imitated in severing the doctrine of right from ethics, or moral philosophy, and developing it as a separate and independent science. The juridical order is but a part of the moral order, even as justice is but one of the moral virtues. The first principle of right: "Give every man his due"; "Commit no injustice"; and the necessary conclusions from these: "Thou shalt not kill"; "Thou shalt not commit adultery", and the like, belong to the natural law, and cannot be deviated from without violating one's duty and one's neighbour's rights, and staining one's conscience with guilt in the sight of God.

Special ethics applies the principles of general, or theoretical, ethics to the various relations of man, and thus deduces his duties in particular. General ethics teaches that man must do good and avoid evil, and must inflict injury upon no one. Special ethics descends to particulars and demonstrates what is good or bad, right or wrong, and therefore to be done or avoided in the various relations of human life. First of all, it treats of man as an individual in his relations to God, to himself, and to his fellow-men. God is the Creator, Master, and ultimate end of man; from these relations arise man's duties toward God. Presupposing his own individual efforts, he is, with God's assistance, to hope for eternal happiness from Him; he must love God above all things as the highest, infinite good, in such a manner that no creature shall be preferred to Him; he must acknowledge Him as his absolute lord and master, adore and reverence Him, and resign himself entirely to His holy Will. The first, highest, and most essential business of man is to serve God. In case it is God's good pleasure to reveal a supernatural religion and to determine in detail the manner and means of our worship of Him, man is bound by the natural law to accept this revelation in a spirit of faith, and to order his life accordingly. Here, too, it is plain that to divorce morality from religion is impossible. Religious duties, those, namely, which have direct reference to God, are man's principal and most essential moral duties. Linked to these duties to God are man's duties regarding himself. Man loves himself by an intrinsic necessity of his nature. From this fact Schopenhauer drew the conclusion that the commandment concerning self-love was superfluous. This would be true, if it were a matter of indifference how man loved himself. But such is not the case; he must love himself with a well-ordered love. He is to be solicitous for the welfare of his soul and to do what is necessary to attain to eternal happiness. He is not his own master, but was created for the service of God; hence the deliberate arbitrary destruction of one's own life (suicide), as well as the freely intended mutilation of self, is a criminal attack on the proprietary right God has to man's person. Furthermore, every man is supposed to take a reasonable care to preserve his health. He has certain duties also as regards temperance; for the body must not be his master, but an instrument in the service of the soul, and hence must be cared for in so far only as is conducive to this purpose. A further duty concerns the acquisition of external material goods, as far as they are necessary for man's support and the fulfillment of his other obligations. This again involves the obligation to work; furthermore, God has endowed man with the capacity for work in order that he might prove himself a beneficial member of society; for idleness is the root of all evil. Besides these self-regarding duties, there are similar ones regarding our fellow-men: duties of love, justice, fidelity, truthfulness, gratitude, etc. The commandment of the love of our neighbour first received its true appreciation in the Christian Dispensation. Though doubtless contained to a certain extent in the natural law, the pagans had so lost sight

of the unity of the human race, and of the fact that all men are members of one vast family dependent upon God, that they looked on every stranger as an enemy. Christianity restored to mankind the consciousness of its unity and solidarity, and supernaturally transfigured the natural precept to love our neighbour, by demonstrating that all men are children of the same Father in heaven, were redeemed by the same blood of the same Saviour, and are destined to the same supernatural salvation. And, better still, Christianity provided man with the grace necessary to the fulfillment of this precept and thus renewed the face of the earth. In man's intercourse with his fellow-men the precepts of justice and of the other allied virtues go hand in hand with the precept of love. There exists in man the natural tendency to assert himself when there is question of his goods or property. He expects his fellow-men to respect what belongs to him, and instinctively resists any unjust attempt to violate this proprietorship. He will brook an injury from no one in all that regards his life or health, his wife or child, his honour or good name; he resents faithlessness and ingratitude on the part of others, and the lie by which they would lead him into error. Yet he clearly understands that only then can he reasonably expect others to respect his rights when he in turn respects theirs. Hence the general maxim: "Do not do to others, what you would not wish them to do to you"; from which are naturally deduced the general commandments known to all men: "Thou shalt not kill, nor commit adultery, nor steal, nor bear false witness against thy neighbour", etc. In this part of ethics it is customary to investigate the principles of right as regards private ownership. Has every man the right to acquire property? Or, at least, may not society (the State) abolish private ownership and assume possession and control of all material goods either wholly or in part, in order to thus distribute among the members of the community the products of their joint industry? This latter question is answered in the affirmative by the Socialists; and yet, it is the experience of all ages that the community of goods and of ownership is altogether impracticable in larger commonwealths, and would, if realized in any case, involve widespread slavery.

The second part of special, or applied, ethics, called by many sociology, considers man as a member of society, as far as this can be made the subject of philosophical investigation. Man is by nature a social being; out of his innate needs, inclinations, and tendencies the family and State necessarily arise. And first of all the Creator had to provide for the preservation and propagation of the human race. Man's life is brief, were no provision made for the perpetuation of the human species, the world would soon become an uninhabited solitude, a well-appointed abode without occupants. Hence God has given man the power and propensity to propagate his kind. The generative function was not primarily intended for man's individual well-being, but for the general good of his species, and in its exercise, therefore, he must be guided accord-

ingly. This general good cannot be perfectly realized except in a lasting indissoluble monogamy. The unity and indissolubility of the marriage bond are requirements of the natural law, at least in the sense that man may not on his own authority set them aside. Marriage is a Divine institution, for which God Himself has provided by means of definite laws, and in regard to which, therefore, man has not the power to make any change. The Creator might, of course, dispense for a time from the unity and indissolubility of the marriage tie; for, though the perfection of the married state demands these qualities, they are not of absolute necessity; the principal end of marriage may be attained to a certain degree without them. God could, therefore, for wise reasons grant a dispensation in regard to them for a certain length of time. Christ, however, restored marriage to the original perfection consonant with its nature. Moreover He raised marriage to the dignity of a sacrament and made it symbolic of His own union with the Church; and had he done nothing more in this respect than restore the natural law to its pristine integrity, mankind would be bound to Him by an eternal debt of gratitude. For it was chiefly by means of the unity and indissolubility of the married life that the sanctuary of the Christian family was established, from which mankind has reaped the choicest blessings, and compared with which paganism has no equivalent to offer. This exposition of the nature of marriage from a theistic standpoint is diametrically opposed to the views of modern Darwinists. According to them, men did not primitively recognize any such institution as the married state, but lived together in complete promiscuity. Marriage was the result of gradual development, woman was originally the centre about which the family crystallized, and from this latter circumstance there arises an explanation of the fact that many savage tribes reckon heredity and kinship between families according to the lineal descent of the female. We cannot dwell long upon these fantastic speculations, because they do not consider man as essentially different from the brute, but as gradually developed from a purely animal origin. Although marriage is of Divine institution, not every individual is obliged, as a human being, to embrace the married state. God intends marriage for the propagation of the human race. To achieve this purpose it is by no means necessary for each and every member of the human family to enter upon marriage, and this particularly at the present time, when the question of over-population presents so many grave difficulties to social economists. In this connexion certain other considerations from a Christian point of view arise, which do not, however, belong to philosophical ethics. Since the principal end of marriage is the procreation and education of children, it is incumbent upon both parents to co-operate according to the requirements of sex in the attainment of this end. From this it may readily be gathered what duties exist between husband and wife, and between parents and their children.

The second natural society, the State, is a logical and necessary outcome of the family. A completely isolated family could scarcely support itself, at all events it could never rise above the lowest grade of civilization. Hence we see that at all times and in all places, owing to natural needs and tendencies, larger groups of families are formed. A division of labour takes place. Each family devotes itself to some industry in which it may improve and develop its resources, and then exchanges its products for those of other families. And now the way is opened to civilization and progress. This grouping of families, in order to be permanent, has need of authority, which makes for security, order, and peace, and in general provides for what is necessary to the common good. Since God intends men to live together in harmony and order, He likewise desires such authority in the community as will have the right to procure what is needful for the common good. This authority, considered in itself and apart from the human vehicle in which it is placed, comes immediately from God, and hence, within its proper sphere, it imposes upon the consciences of the subjects the duty of obedience. In the light of this interpretation, the exercise of public power is vested with its proper dignity and inviolability, and at the same time is circumscribed by necessary limitations. A group of families under a common authoritative head, and not subject to any similar aggregation, forms the primitive State, however small this may be. By further development, or by coalition with other States, larger States gradually come into existence. It is not the purpose of the State to supplant the families, but to safeguard their rights, to protect them, and to supplement their efforts. It is not to forfeit their rights or to abandon their proper functions that individuals and families combine to form the State, but to be secured in these rights, and to find support and encouragement in the discharge of the various duties assigned them. Hence the State may not deprive the family of its right to educate and instruct the children, but must simply lend its assistance by supplying, whenever needful, opportunities for the better accomplishment of this duty. Only so far as the order and prosperity of the body politic requires it, may the State circumscribe individual effort and activity. In other words, the State is to posit the conditions under which, provided private endeavour be not lacking, each individual and each family may attain to true earthly happiness. By true earthly happiness is meant such as not only does not interfere with the free performance of the individual's moral duties, but even upholds and encourages him therein.

Having defined the end and aim of the State, we are now in a position to examine in detail its various functions and extent. Private morality is not subject to State interference; but it is the proper function of the State to concern itself with the interests of public morality. It must not only prevent vice from parading in public and becoming a snare to many (e.g. through immoral literature, theatres, plays, or other means of

seduction), but also see to it that the public ordinances and laws facilitate and advance morally good behaviour. The State may not affect indifference as regards religion; the obligation to honour God publicly is binding upon the State as such. It is true that the direct supervision of religious matters in the present supernatural order was entrusted by Christ to His Church; nevertheless, it is the duty of the Christian State to protect and uphold the Church, the one true Church founded by Christ. Of course, owing to the unfortunate division of Christians into numerous religious systems, such an intimate relation between Church and State is at the present day but rarely maintained. The separation of Church and State, with complete liberty of conscience and worship, is often the only practical *modus vivendi*. In circumstances such as these the State must be satisfied to leave the affairs of religion to various bodies, and to protect the latter in those rights which have reference to the general public order. The education and instruction of children belongs *per se* to the family, and should not be monopolized by the State. The State has, however, the right and the duty to suppress schools which disseminate immoral doctrine or foster the practice of vice; beyond such control it may not set limits to free individual endeavour. It may, however, assist the individual in his efforts to secure an education, and, in case these do not suffice, it may establish schools and institutions for his benefit. Finally, the State has to exercise important economical functions. It must protect private property and see to it that in man's industrial life the laws affecting justice be carried out in all their force and vigour. But its duties do not stop here. It should pass such laws as will enable its subjects to procure what is needed for their respectable sustenance and even to attain a moderate competency. Both excessive wealth and extreme poverty involve many dangers to the individual and to society. Hence the State should pass such laws as will favour the sturdy middle class of citizens and add to their numbers. Much can be done to bring about this desirable condition by the enactment of proper tax and inheritance laws, of laws which protect the labouring, manufacturing, and agricultural interests, and which supervise and control trusts, syndicates, etc.

Although the authority of the State comes immediately from God, the person who exercises it is not immediately designated by Him. This determination is left to the circumstances of men's progress and development or of their modes of social aggregation. According as the supreme power resides in one individual, or in a privileged class, or in the people collectively, governments are divided into three forms: the monarchy; the aristocracy; the democracy. The monarchy is hereditary or elective, according as succession to supreme power follows the right of primogeniture of a family (dynasty) or is subject to suffrage. At the present day the only existing kind of monarchy is the hereditary, the elective monarchies, such as Poland and the old German Sovereignty, having long since disappeared. Those States in which the sovereign power

resides in the body of the people are called polycracies, or more commonly, republics, and are divided into aristocracies and democracies. In republics sovereignty is vested in the people. The latter elect from their number representatives who frame their laws and administer the affairs of government in their name. The almost universally prevailing form of government in Europe, fashioned upon the model created in England, is the constitutional monarchy, a mixture of the monarchical, aristocratic, and democratic forms. The law-making power is vested in the king and two chambers. The members of one chamber represent the aristocratic and conservative element, while the other chamber, elected from the body of citizens, represents the democratic element. The monarch himself is responsible to no one, yet his governmental acts require the counter-signature of the ministers, who in turn are responsible to the chamber.

With regard to its appointed functions the government of the State is divided into the legislative, judiciary, and executive powers. It is of primary importance that the State enact general and stable laws governing the activities of its subjects, as far as this is required for the good order and well-being of the whole body. For this purpose it must possess the right to legislate; it must, moreover, carry out these laws and provide, by means of the administrative, or rather executive, power for what is needful to the general good of the community; finally, it has to punish infractions of the laws and authoritatively settle legal disputes, and for this purpose it has need of the judiciary power (in civil and criminal courts). This right of the State to impose penalties is founded on the necessity to preserve good order and of providing for the security of the whole body politic. In a community there are always found those who can in no other way be effectually forced to observe the laws and respect the rights of others than by the infliction of punishment. Hence the State must have the right to enact penal statutes, calculated to deter its subjects from violating the laws, and the right, moreover, to actually inflict punishment after the violation has occurred. Among the legitimate modes of punishment is capital punishment. It is considered, and rightly so, a step forward in civilization, that nowadays a milder practice has been adopted in this regard, and that capital punishment is more rarely inflicted, and then only for such heinous crimes as murder and high treason. Nevertheless humanitarian sentimentalism has no doubt been carried to an exaggerated degree, so much so that many would on principle do away with capital punishment altogether. And yet, this is the only sanction sufficiently effective to deter some men from committing the gravest crimes.

When it is asserted, with Aristotle, that the State is a society sufficient for itself, this is to be considered true in the sense that the State needs no further development to complete its organization, but not in the sense that it is independent in every respect. The greater the advance of mankind in progress and civilization, the more necessary and frequent the communication between nations becomes. Hence the question arises

as to what rights and duties mutually exist between nation and nation. That portion of ethics which treats this question from a philosophical standpoint is called the theory of international law, or of the law of nations. Of course, many writers of the present day deny the propriety of a philosophical treatment of international law. According to them the only international rights and duties are those which have been established by some positive measure either implicitly or explicitly agreed upon. This, indeed, is the position that must be taken by all who reject the natural law. On the other hand, this position precludes the possibility of any positive international law whatever, for lasting and binding compacts between various States are possible only when the primary principle of right is recognized -- that it is just and obligatory to stand by lawful agreements. Now this is a principle of natural law; hence, those who deny the existence of natural law (e.g. E. von Hartmann) must consequently reject any international law properly so called. In their opinion any international agreements are mere conventions, which each one observes as long as he finds it necessary or advantageous. And so we are eventually led back to the principle of ancient paganism, which, in the intercourse between nations, too often identified right with might. But Christianity brought the nations into a closer union and broke down the barriers of narrow-minded policy. It proclaimed, moreover, the duties of love and justice as binding on all nations, thus restoring and perfecting the natural law. The fundamental principles: "Give each one his due", "Do injury to no man", "Do not to others what you would not have them do to you", etc., have an absolute and universal value, and hence must obtain also in the intercourse between nations. Purely natural duties and rights are common to all nations; the acquired or positive ones may vary considerably. Various, too, are the rights and duties of nations in peace and in war. Since, however, there are, under this head, many details of a doubtful and changeable character, the codification of international law is a most urgent desideratum. Besides this an international court should be established to attend to the execution of the various measures promulgated by the law and to arbitrate in case of dispute. The foundations of such an international court of arbitration have been laid at The Hague; unfortunately, its competence has been hitherto very much restricted, and besides, it exercises its functions only when the Powers at variance appeal to it of their own accord. In the codification of international law no one would be more competent to lend effective cooperation and to maintain the principles of justice and love which should exist between nations in their intercourse with one another, than the pope. No one can offer sounder guarantees for the righteousness of the principles to be laid down, and no one can exert greater moral influence towards carrying them into effect. This is even recognized by unprejudiced Protestants. At the Vatican Council not only the many Catholic bishops present, but the Protestant David Urquhart appealed to the pope to draw up a schedule of the more important principles

of international law, which were to be binding on all Christian nations. Religious prejudice, however, places many difficulties in the way of realizing this plan.

V. CATHREIN

Ethiopia

Ethiopia

The name of this region has been derived, through the Greek form, *aithiopia*, from the two words *aitho*, "I burn", and *ops*, "face". It would thus mean the coloured man's land -- the land of the scorched faces. But a different origin is claimed for the name by many modern writers, some of whom say that the Greeks borrowed the word from the Egyptians, and that as early as the Twelfth Dynasty the Egyptians knew the land under the name *Ksh*, or *Kshi*. One form of this word, with the aleph prefix, Ekoshi (the Coptic *eshoosh*, *eshôsh*, *ethosh*) would thus be the real root-word. Others maintain that it is derived from the Arabic word *atyab*, the plural form of *tib*, which means "spices", "perfumes" (Glaser, "Die Abissinier in Arabien und Afrika", Munich, 1895), or from an Arabo-Sabeian word, *atyub*, which has the same meaning. (Halévy in "Revue Sémitique", IV.)

Geography

It is not easy to determine to what part of the world the name Ethiopia properly applies in the course of history. The territory it covered, and even the use of the word to denote a territory, have varied in ages and at the hands of different writers. In the early pages of the Bible Ethiopia is used to designate the lands inhabited by the sons of Cush, and is therefore applied to all the scattered regions inhabited by that family. Such a use of the word is purely ethnographical. Elsewhere, however, in the Bible it is applied to a definite region of the globe without consideration of race, and is thus used geographically. It is in this sense that we find it mentioned in all Egyptian documents (Brugsch, *Geographische Inschriften alt-ägyptischer Denkmäler*). It denoted the region of Africa south of Egypt, and its boundaries were by no means constant. Generally speaking, it comprised the countries known in our day as Nubia, Kordofan, Senaar, and Northern Abyssinia. It had one unvarying landmark, however; its northern boundary always began at Syene. We know from the writings of Pliny, Strabo, and Pomponius Mela that in the eyes of Greek geographers Ethiopia included not only all the territory south of Syene on the African continent, but embraced all that part of Asia below the same parallel of latitude. Hence it came to pass that there were two regions with but one name: Eastern Ethiopia, including all the races dwelling to the east of the Red Sea as far as India; Western Ethiopia stretching southward from Egypt and westward as far as the southern boundary of Mauritania. Of all the vast tracks of

country to which the name Ethiopia was given at one or other period of history, there are two to which the name has more particularly attached itself: the one is modern Nubia and the Egyptian Sudan (the ancient Ethiopia of the Pharaohs); the other modern Abyssinia (the Ethiopia of our own day), the last of all these regions to preserve the ancient name.

NUBIAN ETHIOPIA

In Egyptian inscriptions the name Ethiopia is applied to the region of the Upper Nile lying between the First Cataract and the sources of the Atbara and of the Blue Nile. Greek writers often call this region the kingdom of Napata, or of Meroë, after two cities that were successively the centre of its political life during the second period of its history. The name *Island of Meroë*, sometimes met with, is an allusion to the rivers that enclose it.

Ethnology

The races which peopled these regions differed considerably. In the valley of the Syene as far as the junction of the Arbara the population consisted for the most part of husbandmen of Egyptian extraction. In the plains of the Upper Nile, side by side with some negro tribes, were a people allied to the Himyarites, and who had migrated thither from southern Arabia, while others again showed that they owed their origin to the Egyptians and Berbers.

History

Of the history of this country we know only what has been handed down to us through the documents of Egypt and those erected by the inhabitants of the country itself in the vicinity of the Cataracts. It was the almost unanimous opinion of ancient historians that this was the cradle of the people occupying all the Nile Valley; and in proof thereof they pointed out the evident analogy of manners and religion between the kingdom of Meroë and Egypt proper. But to-day we know without a doubt that the Ethiopia known to the Greeks, far from the the cradle of Egyptian civilization, owed to Egypt all the civilization she ever had. The chronological evidence of the monuments makes this quite clear. Whereas the most ancient monuments are to be found along the Delta, those in the neighbourhood of Meroë are comparatively modern. The antiquity attributed to Ethiopian civilization was disproved as soon as the hieroglyphics had been interpreted. What its beginnings were, we do not know.

During the first Egyptian dynasties -- i.e. for nearly thirteen centuries -- its history is hidden behind a veil. It is only under the Sixth Dynasty that this country comes within the ken of history. At that time King Meryra, better known as Pepi I, marched as far south as the Second Cataract, but did not establish a permanent foothold. Ethiopia's real occupation by Egypt did not begin until the Twelfth Dynasty, when the Pharaohs, being once more in peaceful possession of the Nile Valley, began an era of

conquest, and the country of the cataracts became their earliest prey. Amenemhat I and his son Usertsen I, having driven out the priests of Amun-Ra who ruled at Thebes, and having exiled them beyond Philæ, continued their march as far as Wadi-Halfa. Their successors, encouraged by these victories, carried on the work of conquest, and Usertsen III pushed as far as the Fourth Cataract and even beyond Napata, as far as the junction of the Atbara. At his death the frontiers of the Egyptian empire extended as far as Semneh, and Ethiopia was a tributary province of Egypt. The darkness which envelopes the Thirteenth Dynasty does not permit of our tracing the results of this conquest, but it would seem that the victories of the Egyptian monarchs were far from decisive, and that Ethiopia always retained enough liberty to aspire to independence. Up unto the time of the Eighteenth Dynasty this aspiration persisted, if, indeed, the country did not at times enjoy independence.

After the advent of the Eighteenth dynasty, and the overthrow of the shepherd kings, Egypt undertook a series of wars against her isolated neighbours. The tribes along the Upper Nile, though harassed by her troops, resisted stubbornly. In spite of the campaigns of Amenhotep I, son of Amosis, who advanced as far as Napata and Senaar -- in spite of the violence of Thotmes I, his successor, who covered the country with devastation and ruin, it was not until the days of Thotmes II that Ethiopia seems to have become resigned to the loss of her liberty. The country was thereupon divided into *nomes* on the Egyptian system, and was placed under a viceroy whose power extended from the first Cataract to the Mountains of Abyssinia. The office, entrusted at first to high functionaries, soon became one of the most important in the State, and the custom arose at court of nominating to it the heir presumptive to the throne, with the title Prince of Cush. The glorious reigns of Ramses II, of the Nineteenth Dynasty, and of Ramses III, of the Twentieth Dynasty, served to consolidate this conquest for a time, but for a time only. Egypt, worn out, was weary of war, and even of victory, and the era of her campaigns ended with the Ramseid dynasty. Ethiopia, always alert to note the doings of her enemies, profited by this respite to recover her strength. She collected her forces, and soon, having won back her independence, an unexpected event left her mistress of her former conqueror.

The descendants of the royal priesthood of Amun-Ra, exiled from Thebes to Ethiopia by the Pharaohs of the Twenty-second dynasty, had infused a new life into the land of their exile. They had reorganized its political institutions and centralized them at Napata, which city, in the hands of its new lords, became a sort of Ethiopian Thebes modelled on the Thebes of Egypt. With the co-operation of the native peoples Napata was soon reckoned among the great political powers. While Ethiopia was developing and flourishing, Egypt, so disintegrated as to be a mere collection of feudal states, was being more and more weakened by incessant revolutions. Certain Egyptian

princes having at this period appealed to the King of Napata for help, he crossed over into the Thebaid, and established order there; then, to the surprise of those who had appealed to him, he continued his way northward and went as far as Memphis, nor did he halt until he had subjugated the country and proclaimed the suzerainty of Ethiopia over the whole Nile Valley. Piankhy, to whom belongs the honour of this achievement, caused an account of it to be engraved at Jebel-Barkal, near Napata. After his reign, the throne passed to a native family, and during the Twenty-fourth and Twenty-fifth Dynasties Ethiopia had the glory of giving birth to the Pharaohs who ruled all the land from Abyssinia to the shores of the Mediterranean.

But at the very time when the Ethiopian armies were advancing from the South to subdue the North, the victorious Assyrian armies of the King of Nineveh were already encamped on the borders of Phoenicia. Menaced by Sargon II in the days of Shabaka, Egypt was invaded for the first time by Sennacherib's army during the reign of Shabataka. Taharqa, his successor, was defeated by Earsarhaddon, and forced to retreat as far as Napata, pursued by the Ninevite hosts. The victory, however, was dearly bought by the Assyrians, and the Ethiopians, even in retreat, proved so dangerous that the pursuit was abandoned. Taharqa, encouraged by the fear he inspired in his enemies, tried to win back the Nile Valley. He assumed the offensive a few years after this, and soon entered Memphis almost without striking a blow. But the princes of the Delta, of whom Nechao was the most powerful, far from extending him a welcome, joined forces with the King of Nineveh. Asurbanipal, who had now succeeded his father Earsarhaddon, straightway attacked Taharqa, and the King of Ethiopia fell back once more toward the Cataracts. His son-in-law, Tanuat-Amen, once more victorious, went up as far as Memphis, where he defeated the delta princes, allies of the Assyrians, but a fresh expedition under Asurbanipal completely broke his power. Thereafter Tanuat-Amen remained in his Kingdom of Napata; and thus Ethiopian sway over Egypt was brought to a close.

Restricted to its natural limits, the Ethiopian kingdom did not cease to be a powerful State. Attacked by Psamettichus I and Psamettichus II, it was able to maintain its independence and break the ties which bound it to the northern kingdom. In the following century, Cambyses, conqueror of Egypt, attracted by the marvelous renown of the countries along the Upper Nile, set on foot an expedition against Ethiopia, but in spite of the numbers and prowess of his troops he was obliged to retreat. When Artaxerxes II, surnamed *Ochus*, invaded the Delta, Nectanebo II, King of Egypt, could find no safer refuge than Ethiopia, and in the days of the Ptolemies, one of its kings, Arq-Amen (the Ergamenes of Diodorus Siculus), was powerful enough to commemorate his exploits in the decorations of the temple at Philæ. Nevertheless these last rays of glory were to fade quickly. Abandoned to itself, removed from the civilizing influ-

ences of the north, the country fell back, step by step, into its primitive barbarism, and defeat is written upon the last page of its history. The last invasion of Ethiopia was by Roman legions; led by Petronious, they advanced as far as Napata, where a queen occupied the throne, and the city was destroyed. After this, darkness falls upon all these countries of the Upper Nile, and ancient Ethiopia disappears -- to appear again transformed by a new civilization which begins with the history of modern Nubia.

Institutions

The only civilization we know of in Ethiopia is that which was borrowed from Egypt. We find no record of really native institutions on any of the monuments that have come down to us, and the earliest records extant do not take us beyond the founding of the priestly dynasty of Thebes. At Napata Amun-Ra, King of the Gods, ruled supreme with Maut and Khonsu. The temple there was built on the model of the Karnak sanctuaries; the ceremonies performed there were those of the Theban cult. The priest-kings, above all, as formerly in their native land, were the heads of a purely sacerdotal polity. It was only later in history that the monarchy became elective in Ethiopia. The election took place at Napata, in the great temple, under the supervision of the priests of Amun-Ra, and in the presence of a number of special delegates chosen by the magistrates, the literati, the soldiers, and the officers of the palace. The members of the reigning family, "the royal brethren", were brought into the sanctuary and presented one after another to the statue of the god, who indicated his choice by a signal previously agreed upon. The choice of the priests could undertake nothing without the priests' consent, and was subject to them for life. Arq-Amen seems to have broken through this tutelage and secured complete independence for the throne.

Language

The tongues in the land of Kush were as varied as the people who dwelt there, but Egyptian is the language of the Ethiopian inscriptions. On a few monuments dating from the last epoch of Ethiopian history we find a special idiom. It is written by means of hieroglyphics, of which the alphabetical values, however, have been modified. Hitherto undecipherable, this language has recently been held to be related to Egyptian, with a large admixture of foreign (doubtless Nubian) words. The development of the study of demotic, as well as more intimate knowledge of the speech of later times, will, perhaps, eventually bring a fuller knowledge of this idiom.

ABYSSINIAN ETHIOPIA

Geography

This region corresponds to a group of territories nowadays known as Abyssinia, extending from the Italian colony of Eritrea to the shores of the Greta Lakes. Yet the ancient empire of this name did not by any means occupy the whole of this area, the boundaries of which rather indicate its greatest extent at any period of its history.

Among the countries that have been known under the name Ethiopia, this alone took the name for itself, and calls itself by that name to this day. It rejects the name *Abyssinia* which is constantly given it by Arab writers. Western writers have often employed both terms, *Abyssinia* and *Ethiopia*, indifferently, but in our own day a distinction seems to be growing up in their use. It seems that with the name of *Ethiopia* we should connect that portion of the country's history the documents of which are supplied by the Gheez literature alone; with that of *Abyssinia*, what belongs to the modern period since the definitive appearance of Amharic among the written languages.

Ethnology

The modern Tigré, formerly the kingdom of Axum, would seem to have been the kernel of this State. It was founded by refugees who came to the African continent when the Arsacidæ were extending their sway in the Arabian peninsula, and the power of the Ptolemies was declining in Egypt. These refugees belonged to the Sabeian tribes engaged in the gold and spice trade between Arabia and the Roman Empire; their dealings with civilized races had developed them, and, thanks to their more advanced stage of mental culture, they acquired a preponderating influence over the people among whom they had come to dwell. Still, the descendants of these immigrants form a minority of the Ethiopian people, which mainly composed of Cushite tribes, together with an aboriginal race called by the Ethiopians themselves *Shangala*.

History

From native sources we know nothing accurately of the political beginnings of the State. Its annals open with the rule of monsters in that land, and for many centuries Aruë, the serpent, is the only ruler mentioned. Many writers see in this but a personification of idolatry or barbarism, and the explanation seems probable. According to certain tales written in Gheez, the Ethiopians embraced the Jewish religion at the time of Solomon, and received a prince of that monarch's family to rule over it. The Queen of Shaba (Sheba), spoken of in the First Book of Kings, was an Ethiopian queen, according to the legend of *Kebranagasht* (the glory of the kings) and it was through her that Ethiopia received this double honour. But this tradition is of comparatively recent origin, and finds no confirmation in the most ancient native documents, nor in any foreign writings. History still waits for some foundation on which to base this appropriation of the sacred text, as well as for proof to justify the variants with which Ethiopian chroniclers have embellished it.

The first thing we know with certainty of the history of Ethiopia is its conversion to Christianity. This work was accomplished in the early half of the fourth century by St. Frumentius, known in that country as Abba Salama. Rufinus of Aquileia has preserved the story for us in his history. According to him, a Christian of Tyre, named Merope, had gone on a journey to India with two children, Edesius and Frumentius,

his nephews. On their return journey the ship that carried them was captured by pirates off the Ethiopian coast, and everyone on board was put to death except the two children. They were sent as captives to the king and were afterwards appointed tutors to his son, whom they converted to Christianity. Later they returned to their own country. But Frumentius had but one ambition: to be consecrated bishop by the Patriarch of Alexandria. This wish having been fulfilled, he returned to Axum, organized Christian worship, and, under the title of *Abba Salama*, became the first metropolitan of the Ethiopian church. Missionary monks coming later from neighbouring countries (in the sixth century) completed the work of his apostolate by establishing the monastic life. National traditions speak of these missionaries as the nine saints; they are the *abbas* Alé, Shema, Aragawi, Garima, Pantalewon, Liqanos, Afsi, Gougo, and Yemata. Henceforth Ethiopia takes its place among the Christian States of the East. One of its kings, Caleb, contemporary with the nine saints, and canonized as St. Elesban, is famous in oriental literature for an expedition he led against the Jewish kingdom of Yemen. The authority of the Ethiopian kings then extended over Tigré, Shoa, and Amhara, and the seat of government was the Kingdom of Axum.

But from this time forward the history of this country is enveloped in darkness, and remains almost unknown to us until the thirteenth century. We have nothing to guide us but long, and for the most part, mutually conflicting lists of kings with the indication of a dynastic revolution, which perhaps explains the brevity of the chronicles. Perhaps, in the midst of these troubles, the historical documents of preceding ages were purposely destroyed; and this seems likely since the dynasty of the Zagues, which at that time usurped the throne of the pretended descendants of the son of Solomon, would feel constrained to destroy the prestige of the supplanted dynasty in order to establish itself. According to the abridged chronicle published by Bruce, the Falashas, a tribe professing Judaism, were the cause of this insurrection; but we have no other evidence in support of this assertion. The chronicles we have are silent about the matter; they merely tell us that at the close of the thirteenth century, in the reign of Yekuno Amlak, after a period of exile, the length of which we do not know, the Solomonian dynasty regained power through the aid of the monk Takla Hâymânôt. After the restoration of the ancient national dynasty, the country, once more at peace within itself, had to concentrate its whole energy upon resisting the southward progress of Mohammedan conquest. For nearly three centuries Ethiopia had to wage wars without respite for liberty and faith, and it alone, of all the African kingdoms, was able to maintain both. The most famous of these wars was against the Emit of Harar, Ahmed Ibn Ibrahim, surnamed the Left-handed. It took place during the reigns of Kings Lebna Dengel (1508-40) and Galawdéwos (1540-59), and the exhausted country was only saved by the timely help of Portuguese armies. Delivered from its foes, it might have

become a great power in the East, but it lacked a capable leader, and its people, deriving but little moral support from a corrupt religion, fell rapidly away until, after a long series of civil wars, Ethiopia became a land of anarchy.

Under Minas (1159-63), Sarsa Dengel (1563-97), and Ya'eqob Za Dengel (1597-1607), civil war was incessant. There was a brief respite under Susneos (1607-32), but war broke out afresh under Fasiladas (1632-67), and the clergy, moreover, increased the trouble by their theological disputes as to the two natures of Christ. These disputes, often, indeed, but a cloak for ambitious intrigues, were always occasions of revolution. Under the successors of Fasiladas the general disorder passed beyond all bounds. Of the seven kings that followed him but two died a natural death. There was a short period of peace under Bakafa (1721-30), and Yasu II (1730-55), Yoas (1755) and Yo-hannes were again victims of an ever-spreading revolution. The end of the eighteenth century left Ethiopia a feudal kingdom. The land and its government belonged to its *Ras*, or feudal chieftains. The unity of the nation had disappeared, and its kings reigned, but did not govern. The *Ras* became veritable Mayors of the Palace, and the monarchs were content to be *rois fainéants*. Side by side with these kings who have left in history only their names, the real masters of events, as the popular whim happened to favour them, were Ras Mikael, Ras Abeto of the Godjam, Ras Gabriel of the Samen, Ras Ali of Begameder, Ras Gabra of Masqal of Tigré, Ras Walda-Sellase of the Shoa, Ras Ali of Amhara, Ras Oubié of Tigré, and the like. But war among these chiefs was incessant; ever dissatisfied, jealous of each other's power, each one sought to be supreme, and it was only after a century of strife that peace was at length established. A son of the governor of Kowara, named Kasa, succeeded in bringing it about, to his own profit; and he made it permanent by causing himself to be named king under the name of Theodore (1855). With him the ancient Ethiopia took its place as one of the nations to be reckoned with in the international affairs of the West, and Abyssinia may be said to date its origin from his reign.

Religion

Previous to the conversion of the country to Christianity, the worship of the serpent was perhaps the religion of a portion of Ethiopia, i. e., of the aboriginal Cushite tribes. From inscriptions at Axum and Adulis it would seem that the Semites, on the other hand, had a religion similar to that of Chaldea and Syria. Among the gods mentioned we find Astar, Beher, and Medr -- perhaps representing the triad of sky, sea, and land. As to the Jewish religion, and its introduction in the time of Solomon, we have only the assertion found in some recent documents, which, as we have already said, cannot be received as history. The origin of the Judaistic tribe called the Falashas, who nowadays occupy the country, is quite hidden from us, and there is no reason to regard them as representatives of a national religion which has disappeared. After the evan-

gelization by St. Frumentius, and in spite of the resulting general conversion of the people, Paganism always retained some adherents in Ethiopia, and has its representatives there even to this day. Moreover at the time of the Mussulman wars Islam succeeded in securing a foothold here and there. Nevertheless Christianity has always been the really national religion, always practiced and defended by the rulers of the nation.

Although converted to Christianity by missionaries of the Catholic Church, Ethiopia today professes Monophysitism. But subject to the influence of Egypt, it has adopted in the course of time the theory of the Egyptian Church regarding the human nature of Christ. Our lack of information about the country prior to the thirteenth century hinders us from following the history of its separation from Rome, or even fixing the date of that event. Like the Egyptians, the Ethiopian Church anathematizes Eutyches as a heretic, yet remains monophysite, and rejects the Catholic teaching as to the two natures. United in their statement of belief, the Ethiopian theologians have divided into two great schools in its explanation. On the one hand, the *Walda-Qeb* ("Sons of Unction", as they are nowadays called), hold that the most radical unification (*tawahedo*) exists between the two natures, such being the absorption of the human by the Divine nature that the former may be said to be merely a fantasm. The unification is the work of the Unction of the Son Himself according to the general teaching of Walda-Qeb. Some among them, however, known as the *Qeb'at* (Unction), teach that it is the work of the Father. Others again, the *Sega-ledj* or *Walda-sega* (Sons of Grace), hold that the unification takes place in such a way that the nature of Christ becomes a special nature (*bahrey*), and this is attributed to the Father, as in the teachings of the *Qe'bat*. But, as the mere fact of the unction does not effect a radical unification (for this school rejects absorption), the unification is made perfect, according to them, by what they call the adoptive birth of Christ -- the ultimate result of the unction of the Father. In effect, they recognize in the incarnation three kinds of birth: the first, the Word begotten of the Father; the second, Christ, begotten of Mary; the third, the Son of Mary, begotten the Son of God the Father by adoption, or by his elevation to the Divine dignity -- the work of the Father anointing his Son with the Holy Spirit, whence the name *Sons of Grace*. However, while rejecting absorption, this latter school refuses to admit the distinction of the two natures. Both schools, moreover, assert that the unification takes place without any blending, with change, without confusion. It is contradiction itself set up as a dogma.

The difficulties following from this teaching in regard to the reality of the Redemption, the Monophysite Church calls mysteries; her theologians confess themselves unable to explain them, and simply dismiss them with the word *Ba faqadu*; it is so, they say, "by the will of God". In sympathy with the Church of Constantinople, as soon

as it was separated from Rome, the Ethiopian Church in the course of time adopted the Byzantine teaching as to the procession of the Holy Ghost; but this question never was as popular as the Incarnation, and in reference to it the contradictions to be found in the texts of native theologians are even more numerous than those touching on the question of the two natures. Adrift from the Catholic Church on the dogma of the humanity of Christ and the procession of the Holy Spirit, the Ethiopian Church professes all the other articles of faith professed by the Roman Church. We find there seven sacraments, the cultus of the Blessed Virgin and of the saints; prayers for the dead are held in high honour and fasts without number occur during the liturgical year.

The Bible, translated into Gheez, with a collection of decisions of the Councils, called the *Synodos*, make up the ground-work of all moral and dogmatic teaching. The work of translating the Bible began in Ethiopia about the end of the fifth century, according to some authorities (Guidi, G. Rossini), or, in the opinion of others, (Méchineau), in the fourth century at the very beginning of the evangelization. Notwithstanding the native claims, their Old Testament is not a translation from the Hebrew, neither is its Arabic origin any more capable of demonstration; Old and New Testaments alike are derived from the Greek. The work was done by many translators, no doubt, and the unity of the version seems to have been brought about only by deliberate effort. At the same time as the Solomonian restoration in the thirteenth century, the whole Bible was revised under the care of the Metropolitan Abba Salama (who is often confounded with St. Frumentius), and the text followed for the Old Testament was the Arabic of Rabbi Saadias Gaon of Fayûm. There was perhaps a second revision in the seventeenth century at the time of the Portuguese missions to the country; it has recently been noticed (Littman, *Geschichte der äthiopischen Literatur*). But, just as the great number of translators employed caused the Bible text to be unusual, so also the revision of it was not uniform and official, and consequently the number of variant readings became multiplied. Its canon, too, is practically unsettled and fluctuating. A host of apocryphal or falsely ascribed writings are placed on the same level as the inspired books, among the most esteemed of which we may mention the Book of Henoch, the *Kufale*, or Little Genesis, the Book of the Mysteries of Heaven and Earth, the Combat of Adam and Eve, the Ascension of Isaias. The Hâymanotâ Abaw (Faith of the Fathers), the "Mashafa Mestir" (Book of the Mystery), the "Mashafa Hawi" (Book of the Compilations), "Qérlos" (Cyrillius), "Zênâ hâymanot" (Tradition of the Faith) are among the principal works dealing with matters moral and dogmatic. But, besides the fact that many of the quotations from the Fathers in these works have been modified, many of the canons of the "Synodos" are, to say the least, not historical.

Liturgy

In the general effect of its liturgical rules the Ethiopian Church is allied to the Coptic Rite. Numerous modifications, and especially additions, have, in the course of time, been introduced into its ritual; but the basic text remains that of Egypt, from which, in many places, it differs only in the language. Its calendar and the distribution of festivals are regulated as in the Coptic Church, though the Ethiopians do not follow the era of the martyrs. The year has 365 days, with a leap year every four years, as in the Julian calendar. Its ordinary year begins on 29 August of the Julian calendar, which corresponds to 11 September of the Gregorian calendar. After a leap year the new year begins on the 30th of August (or 12 September). The year has twelve months of thirty days each, and an added month of six days or of five days -- according as the year is a leap year or not. The era followed is seven years behind ours, during the last four months of our year, and eight years during the remaining months. The calendar for each year is arranged in an ecclesiastical synod held in the springtime. It is at this gathering that the dates of the principal movable feasts are settled, as well as the period for the fasts to be observed during the course of the year. The greater feasts of the Ethiopian church are Christmas, the Baptism of Christ, Palm Sunday, Holy Week, Ascension Day, Pentecost, the Transfiguration. A great number of feasts are scattered throughout the year, either on fixed or movable dates, and their number together with the two days every week (Saturday and Sunday) on which work is forbidden reduces by almost one-third the working days of the year. Fasts are observed every Wednesday and Friday, and five times annually during certain periods preceding the great festivals; the fast of Advent, is kept during forty days; of Ninevah, three days; of Lent, fifty-five days; of the Apostles, fifteen days; the fast of the Assumption, fifteen days. Most of the saints honoured in Ethiopia are to be found in the Roman Martyrology. Among the native saints (about forty in all) only a few are recognized by the Catholic Church -- St. Frumentius, St. Elesban, the Nine Saints, and St. Taklu Hâymânôt. But, deprived of religious instruction, the Ethiopian people mingle with their Christianity many practices which are often opposed to the teaching of the Gospel; some of these seem to have a Jewish origin, such, for instance, as the keeping of the Sabbath, the distinction of animals as clean and unclean, and the custom of marrying a widow to the nearest relative of her deceased husband.

Ecclesiastical Hierarchy

The Ethiopian Hierarchy is subject to the Coptic Patriarch of Alexandria. This dependence on the Coptic Church is regulated by one of the Arabic canons found in the Coptic edition of the Council of Nicea. A delegate from this patriarch, chosen from among the Egyptian bishops, and called the Abouna, governs the Church. All-powerful in matters spiritual, his influence is nevertheless very limited in other directions, owing to the fact that he is a stranger. The administrative authority is vested in the Etchagué,

who also has jurisdiction over the regular clergy. This functionary is always chosen from among the monks and is a native. Legislation concerning the clergy is always regulated by a special code, of which the fundamental principles are contained in the *Fetha nagasht*. Only the regular clergy observe celibacy, and the facility with which orders are conferred makes the number of priests very large.

Language and Literature

Although the races inhabiting Ethiopia have very different origins, only the Semitic family of tongues is represented among them. This is one of the results of the conquest made in olden days by immigrants from the African Continent. Two dialects were spoken by these tribes, the Gheez, which is akin to Sabean, and a speech which is more akin to Mineran, the tongue which later developed into Amharic. In the course of time, Gheez ceased to be a spoken language, but it gave rise to two vernacular dialects, Tigré and Tigraï, which have supplanted it. No longer in popular use, Gheez has always remained the language of the Church and of literature. Amharic did not become a literary language till much later. As for the other two, even in our own day they have hardly begun to be written. The beginnings of Gheez literature are connected with the evangelization of the country. The earliest document we possess is the translation of the Bible, which dates from the fifth, or perhaps the fourth century. Christian in its origins, Gheez literature has remained so in its productions, most of which are apocryphal, hagiographical compositions, or theological works. History and poetry have only a secondary place in it, and these are the only subjects in which we find any original effort; almost everything else is translation from the Greek, Coptic, or Arabic. Most of its manuscripts have come down to us without date or author's name, and it is no easy task to follow the history of letters in this country. As far as we know at present, the fifteenth seems to have been the great literary century of Ethiopia. To the reign of Zar'a Ya'qob (1434-68) belong the principle compositions of which the history is known. The wars against Adal and against Ahmed Ibn Ibrahim, in the sixteenth century, arrested this literary movement. The decline began after the civil wars of the seventeenth and eighteenth century, and the coming of Amharic as a literary language completed it. The earliest writings in Amharic date from the fourteenth century, and about the time of the Portuguese mission it was beginning to supplant Gheez. The Jesuits made use of it to reach the people more surely, and henceforward Gheez tends to become almost exclusively a liturgical language. At the present day it is nothing else, Amharic having altogether taken its place in other departments, and it may be that at no distant date Amharic may supplant Gheez even as the language of the Church.

Job Ludolf, a German, in the seventeenth century, was the first to organize the study of Ethiopian subjects. To him we owe the first grammar and the first dictionary of the Gheez language. After a period of neglect these studies were taken up once more

in the second half of the nineteenth century by Professor Dillman, of Berlin, and besides incomparable works on the grammar and lexicography, we are indebted to him for the publication of many texts. Thanks to the extension of philological, historical, and patristic studies, the study of this language has spread in our own times to a greater and greater degree. Works of the first importance have been published on the literature by Professors Basset, Bezold, Guidi, Littman, and Prætorius, as also by Charles, Esteves-Pereira, Perruchon, and Touraiso. The Amharic, too, has inspired a number of studies, whether of its grammar, of its lexicography, or of its texts; the works of Massaja, Isenberg, d'Abbadic, Prætorius, Guidi, Mondon-Kidailhet, and Afework have served to definitively place it within the domain of Oriental studies.

M. CHAINE

Etschmiadzin

Etschmiadzin

A famous Armenian monastery, since 1441 the ecclesiastical capital of the schismatic Armenians, and seat of their patriarch or catholicos, whom the greater part of the Non-Uniat Armenian Church acknowledge as their head. It is situated in Russian territory, in the extreme south of the Caucasus, on the River Aras near the city of Erivan. As early as the fifth or sixth century, if not earlier, a monastery existed there attached to the royal residence of Valarshapat, itself the immemorial national centre of Armenia. According to national tradition, more or less reliable, the primatial see of Armenia was founded here by Saint Gregory Illuminator, the Apostle of Armenia, early in the fourth century. On the site of his famous vision of "the descent of the only Begotten One" (*Descendit Unigenitus* = in Armenian, Etschmiadzin), the anniversary of which is still kept as a national feast, he built a chapel, and in time a splendid church and a monastery arose there, around which centred the national and religious life of

Armenia until the middle of the fifth century, when, owing first to the invasions of Caucasian hordes and then to Persian ambition and persecution, there began the long series of wanderings that recall the story of the monks of Durham with St. Cuthbert's body. During these centuries both clergy and people valued most highly the right arm of St. Gregory; its possessor was practically considered the legitimate patriarch. After many removals, first to Dowin (Duin, Tvin) and then to other places, the patriarchal see was eventually located in the city of Sis, in Cilicia (Lesser Armenia), where it remained from 1293 to 1441; at the former date the relic was said to have been miraculously brought to Sis from Egypt, whither it had been taken by the Mamelukes. When the small Christian principality of Lesser Armenia, long upheld by the Crusades (1097-1375), was at last destroyed, the national and religious life of its people naturally turned again towards the earlier venerable centre, in Northern or Greater Armenia. After the death, at Sis (1440), of Patriarch Joseph II, irregularities occurred in the election of the new patriarch, Gregory Musapekian, which northern bishops were willing to overlook if he would transfer his see to Greater Armenia. On his refusal a new election was held at Etschmiadzin where, it is said, about seven hundred bishops and archpriests (*vartapeds*) assembled and elected Kirakos Virabetzi, with whom begins the series of patriarchs of Etschmiadzin. By some stratagem the monastery is said to have secured from Sis the possession of the famous relic of St. Gregory. A patriarchal succession, however, was, and is still, maintained at Sis, where what purport to be the selfsame relics are shown and venerated. There are, moreover, Armenian (schismatic) patriarchs at Aghtamar, Jerusalem (1311) and Constantinople (1461), the latter for the Armenians of the Ottoman Empire, also an independent Archbishop of Lemberg. Several patriarchs of Etschmiadzin, Stephen V (1541), Michael of Sebaste (1564), David IV (1587), Melchisedek (1593), Moses (1629), Philibos (1633), Agbob IV (1655), and others, took steps towards reunion with Rome, and some made profession of the Catholic Faith before death. Catholic Armenians finally abandoned Etschmiadzin as their religious centre, and obtained a Uniat patriarchate, first at Aleppo (1742), later at Constantinople (1830-667). The Armenians subject to Etschmiadzin underwent bitter persecution when Greater Armenia passed into the power of Persia; even the right hand of St. Gregory and other prized relics and images of the national apostle, and of King Tiridates and St. Rhipsime, were carried away (1604) to the Persian capital; these were finally restored to Etschmiadzin in 1638. Since 1828 the monastery and its district have passed into Russian hands, whereby the independence of the patriarch has been naturally diminished. He is not, however, subject to the Holy Synod of Russia, but presides over his own holy synod of seven members. In 1836 the Russian Government issued an official constitution for the administration of the Gregorian (i.e. Armenian) Church in Russia. It comprises 141 articles regulating the election of patriarchs and the ruling

of Gregorian dioceses. In 1882 non-Russian Armenians refused to recognize the Russian nomination of the Armenian Archbishop of Smyrna to Etschmiadzin, but in 1884 they yielded. Thus a Russian ecclesiastical functionary residing at Etschmiadzin is, in theory, the "Supreme Patriarch and Catholicos of all the Armenians". Even in fact, the great majority of the schismatic Armenians acknowledge his authority; only a small minority adhere to Sis, Aghtamar, Constantinople, and Lemberg. In the United States, the Armenian Bishop of Worcester is subject to Etschmiadzin, and has as quasi-suffragans the Vartapeds of Boston, New York, Providence, and Chicago. In England, the Vartaped of Manchester is subject to the Armenian Bishop of Paris. Since Kirakos Virapetzi (1441) some thirty-eight successors have ruled at Etschmiadzin, not however without numerous schisms. The patriarchs are often assisted by a coadjutor, or rather co-titular bishop, whose name sometimes erroneously gets inserted in the list of patriarchs proper. The Patriarch of Etschmiadzin alone consecrates the *myron* (chrism) and also the bishops for the schismatic Armenians. His curia is formed by (a) a patriarchal synod (two archbishops, five archpriests); (b) a board of administration (one bishop, two archpriests); (c) an editorial committee (two archpriests and a deacon). The monastery consists of about twenty monks; since 1874 a seminary has been maintained for the training of the higher Armenian clergy. Though prominent in a hierarchical sense, as a centre of Armenian literary and theological activity Etschmiadzin ranks far behind Venice, Vienna, Moscow, and Constantinople (see **Mechitarists**), though of late some life and energy are evident. Etschmiadzin is richly endowed. Externally it resembles a great fortress; within its walls are the monastery proper, the magnificent church dedicated to the Blessed Virgin, and six chapels, one of them said to stand on the site of the apparition of Jesus Christ to St. Gregory. Outside the walls are several churches, among them three dedicated to the earliest Armenian martyrs, St. Rhipsime and her companions and St. Gaiane, hence the Turkish name Ütsch Kilisse (Three Churches). The numerous buildings either restored or rebuilt, date mostly from the last three centuries, and make an imposing appearance. (See **Armenia**; **Gregory Illuminator**; **Sis**.)

For the earliest history of the site of Etschmiadzin, see Weber, *Die katholische Kirche in Armenien* (Freiburg, 1903); Geller, *Die Anfänge der armenischen Kirche* (1895). The monastery is described at length by Brosset, *Description d'Etschmiadzin* in *Rev. Archéol.* (1859), XV, 427-37; *Etschmiadzin, ou la Rome des Arméniens* in *Rev. Générale* (1892), LV, 701-24. See also Macdonald, *The Land of Ararat* (London, 1893); Issaverdantz, *Hist. de l'Arménie* (Venice, 1888); Idem, *Armenia and the Armenians* (Venice, 1875); Ter Gregor, *History of Armenia* (London, 1897); Indshidshian, *Antiquités Arméniennes* (Venice, 1885); Skrine, *The Expansion of Russia, 1815-1900* (London, 1903). J.P. Arendzen

Euaria

Euaria

A titular see of Phoenicia Secunda or Libanensis, in Palestine. The true name of this city seems to have been Hawârin; as such it appears in a Syriac inscription of the fourth to the sixth century of the Christian Era. According to Ptolemy (V, xiv) it was situated in the Palmyrene province. Georgius Cyprius calls it Euarios or Justinianopolis. The "Notitiae episcopatum" of the Patriarchate of Antioch (sixth century) gives it as a suffragan see of Damascus. [See *Echos d'Orient*, X (1907), 145.] One of its bishops, Thomas, is known in 451; there is some uncertainty about another, John, who lived a little later (Lequien, *Oriens christ.*, II, 847). It is to-day El Hawârin, a large Mohammedan village, a three-hour journey north of Karyatein and on the road from Damascus to Palmyra; there are still visible the ruins of a Roman *castellum* and of a basilica. Euaria (Hawârin) is to be distinguished from Hauara or Havara, another titular see in Palaestina Tertia, south of Petra.

S. VAILHÉ

Eucarpia

Eucarpia

A titular see of Phrygia Salutaris in Asia Minor. Eucarpia (*Eukarpia*), mentioned by Strabo (XII, 576) and several other geographers, was situated on a road from Dorylaeum to Eumenia, between the Dorylaeum-Acmonia and Dorylaeum-Synnada roads, probably at the modern village of Emin Hissar, in the vilayet of Brusa. The imposing ruins, seen by Hamilton in 1837, have almost disappeared. Nothing is known about the history of the city. It struck its own coins from the time of Augustus till the reign of Volusianus. The bishopric, being a suffragan of Synnada, figures in the "Notitiae episcopatum" until the twelfth or thirteenth century. Six bishops are known: Eugenius, present at the Council of Nicaea (325), Auxomenus in 381, Cyriacus in 451,

Dionysius in 536, Constantine or Constans in 787 (not mentioned by Lequien), and Constantine in 879.

S. PÉTRIDÈS

Eucharist

Eucharist

(Gr. *eucharistia*, thanksgiving).

The name given to the Blessed Sacrament of the Altar its twofold aspect of sacrament and Sacrifice of Mass, and in which Jesus Christ is truly present under the bread and wine. Other titles are used, such as "Lord's Supper" (*Coena Domini*), "Table of the Lord" (*Mensa Domini*), the "Lord's Body" (*Corpus Domini*), and the "Holy of Holies" (*Sanctissimum*), to which may be added the following expressions, and somewhat altered from their primitive meaning: "Agape" (Love-Feast), "Eulogia" (Blessing), "Breaking of Bread", "Synaxis" (Assembly), etc.; but the ancient title "Eucharistia" appearing in writers as early as Ignatius, Justin, and Irenæus, has taken precedence in the technical terminology of the Church and her theologians. The expression "Blessed Sacrament of the Altar", introduced by Augustine, is at the present day almost entirely restricted to catechetical and popular treatises. This extensive nomenclature, describing the great mystery from such different points of view, is in itself sufficient proof of the central position the Eucharist has occupied from the earliest ages, both in the Divine worship and services of the Church and in the life of faith and devotion which animates her members.

The Church honors the Eucharist as one of her most exalted mysteries, since for sublimity and incomprehensibility it yields in nothing to the allied mysteries of the Trinity and Incarnation. These three mysteries constitute a wonderful triad, which causes the essential characteristic of Christianity, as a religion of mysteries far transcending the capabilities of reason, to shine forth in all its brilliance and splendor, and elevates Catholicism, the most faithful guardian and keeper of our Christian heritage, far above all pagan and non-Christian religions.

The organic connection of this mysterious triad is clearly discerned, if we consider Divine grace under the aspect of a personal communication of God. Thus in the bosom of the Blessed Trinity, God the Father, by virtue of the eternal generation, communicates His Divine Nature to God the Son, "the only begotten Son who is in the bosom of the Father" (John, i, 18), while the Son of God, by virtue of the hypostatic union, communicates in turn the Divine Nature received from His Father to His human nature formed in the womb of the Virgin Mary (John, i, 14), in order that thus as God-man, hidden under the Eucharistic Species, He might deliver Himself to His Church, who, as a

tender mother, mystically cares for and nurtures in her own bosom this, her greatest treasure, and daily places it before her children as the spiritual food of their souls. Thus the Trinity, Incarnation, and Eucharist are really welded together like a precious chain, which in a wonderful manner links heaven with earth, God with man, uniting them most intimately and keeping them thus united. By the very fact that the Eucharistic mystery does transcend reason, no rationalistic explanation of it, based on a merely natural hypothesis and seeking to comprehend one of the sublimest truths of the Christian religion as the spontaneous conclusion of logical processes, may be attempted by a Catholic theologian.

The modern science of comparative religion is striving, wherever it can, to discover in pagan religions "religio-historical parallels", corresponding to the theoretical and practical elements of Christianity, and thus by means of the former to give a natural explanation of the latter. Even were an analogy discernible between the Eucharistic repast and the ambrosia and nectar of the ancient Greek gods, or the haoma of the Iranians, or the soma of the ancient Hindus, we should nevertheless be very cautious not to stretch a mere analogy to a parallelism strictly so called, since the Christian Eucharist has nothing at all in common with these pagan foods, whose origin is to be found in the crassest idol- and nature-worship. What we do particularly discover is a new proof of the reasonableness of the Catholic religion, from the circumstance that Jesus Christ in a wonderfully condescending manner responds to the natural craving of the human heart after a food which nourishes unto immortality, a craving expressed in many pagan religions, by dispensing to mankind His own Flesh and Blood. All that is beautiful, all that is true in the religions of nature, Christianity has appropriated to itself, and like a concave mirror has collected the dispersed and not infrequently distorted rays of truth into their common focus and again sent them forth resplendently in perfect beams of light.

It is the Church alone, "the pillar and ground of truth", imbued with and directed by the Holy Spirit, that guarantees to her children through her infallible teaching the full and unadulterated revelation of God. Consequently, it is the first duty of Catholics to adhere to what the Church proposes as the "proximate norm of faith" (*regula fidei proxima*), which, in reference to the Eucharist, is set forth in a particularly clear and detailed manner in Sessions XIII, XXI, and XXII of the Council of Trent. The quintessence of these doctrinal decisions consists in this, that *in the Eucharist the Body and Blood of the God-man are truly, really, and substantially present for the nourishment of our souls, by reason of the transubstantiation of the bread and wine into the Body and Blood of Christ, and that in this change of substances the unbloody Sacrifice of the*

New Testament is also contained. These three principle truths -- Sacrifice, Sacrament, and Real Presence -- are given a more detailed consideration in the following articles:

- The Sacrifice of the Mass
- The Eucharist as a Sacrament
- The Real Presence of Christ in the Eucharist

J. POHLE

The Real Presence of Christ in the Eucharist

The Real Presence of Christ in the Eucharist

In this article we shall consider:

- the fact of the Real Presence, which is, indeed, the central dogma;
- the several allied dogmas grouped about it, namely:
 - ☒ Totality of Presence,
 - ☒ Transubstantiation,
 - ☒ Permanence of Presence and the Adorableness of the Eucharist;
- the speculations of reason, so far as speculative investigation regarding the august mystery under its various aspects is permissible, and so far as it is desirable to illumine it by the light of philosophy.

I. THE REAL PRESENCE AS A FACT

According to the teaching of theology a revealed fact can be proved solely by recurrence to the sources of faith, viz. Scripture and Tradition, with which is also bound up the infallible magisterium of the Church.

A. Proof from Scripture

This may be adduced both from the words of promise ([John 6:26](#) sqq.) and, especially, from the words of Institution as recorded in the Synoptics and St. Paul ([I Cor. 11:23](#) sqq.).

The words of promise ([John 6](#))

By the miracles of the loaves and fishes and the walking upon the waters, on the previous day, Christ not only prepared His hearers for the sublime discourse containing

the promise of the Eucharist, but also proved to them that He possessed, as Almighty God-man, a power superior to and independent of the laws of nature, and could, therefore, provide such a supernatural food, none other, in fact, than His own Flesh and Blood. This discourse was delivered at Capharnaum ([John 6:26-72](#)), and is divided into two distinct parts, about the relation of which Catholic exegetes vary in opinion. Nothing hinders our interpreting the first part [[John 6:26-48](#) (51)] metaphorically and understanding by "bread of heaven" Christ Himself as the object of faith, to be received in a figurative sense as a spiritual food by the mouth of faith. Such a figurative explanation of the second part of the discourse ([John, vi, 52-72](#)), however, is not only unusual but absolutely impossible, as even Protestant exegetes (Delitzsch, Kostlin, Keil, Kahnis, and others) readily concede. First of all the whole structure of the discourse of promise demands a literal interpretation of the words: "eat the flesh of the Son of man, and drink his blood". For Christ mentions a threefold food in His address, the manna of the past ([John 6:31, 32, 49, 59](#)), the heavenly bread of the present ([John 6:32](#) sq.), and the Bread of Life of the future ([John 6:27, 52](#)). Corresponding to the three kinds of food and the three periods, there are as many dispensers — Moses dispensing the manna, the Father nourishing man's faith in the Son of God made flesh, finally Christ giving His own-Flesh and Blood. Although the manna, a type of the Eucharist, was indeed eaten with the mouth, it could not, being a transitory food, ward off death. The second food, that offered by the Heavenly Father, is the bread of heaven, which He dispenses *hic et nunc* to the Jews for their spiritual nourishment, inasmuch as by reason of the Incarnation He holds up His Son to them as the object of their faith. If, however, the third kind of food, which Christ Himself promises to give only at a future time, is a new refection, differing from the last-named food of faith, it can be none other than His true Flesh and Blood, to be really eaten and drunk in Holy Communion. This is why Christ was so ready to use the realistic expression "to chew" ([John 6:54, 56, 58: trogein](#)) when speaking of this, His Bread of Life, in addition to the phrase, "to eat" ([John 6:51, 53: phagein](#)). Cardinal Bellarmine (*De Euchar.*, I, 3), moreover, calls attention to the fact, and rightly so, that if in Christ's mind the manna was a figure of the Eucharist, the latter must have been something more than merely blessed bread, as otherwise the prototype would not substantially excel the type. The same holds true of the other figures of the Eucharist, as the bread and wine offered by Melchisedech, the loaves of proposition (*panes propositionis*), the paschal lamb. The impossibility of a figurative interpretation is brought home more forcibly by an analysis of the following text: "Except you eat the flesh of the Son of man, and drink his blood, you shall not have life in you. He that eateth my flesh and drinketh my blood, hath everlasting life: and I will raise him up in the last day. For my flesh is meat indeed: and my blood is drink indeed" ([John 6:54-56](#)). It is true that even among the Semites, and in Scripture

itself, the phrase, "to eat some one's flesh", has a figurative meaning, namely, "to persecute, to bitterly hate some one". If, then, the words of Jesus are to be taken figuratively, it would appear that Christ had promised to His enemies eternal life and a glorious resurrection in recompense for the injuries and persecutions directed against Him. The other phrase, "to drink some one's blood", in Scripture, especially, has no other figurative meaning than that of dire chastisement (cf. [Isaias 49:26](#); [Apocalypse 16:6](#)); but, in the present text, this interpretation is just as impossible here as in the phrase, "to eat some one's flesh". Consequently, eating and drinking are to be understood of the actual partaking of Christ in person, hence literally.

This interpretation agrees perfectly with the conduct of the hearers and the attitude of Christ regarding their doubts and objections. Again, the murmuring of the Jews is the clearest evidence that they had understood the preceding words of Jesus literally ([John 6:53](#)). Yet far from repudiating this construction as a gross misunderstanding, Christ repeated them in a most solemn manner, in [John \(6:54 sqq.\)](#). In consequence, many of His Disciples were scandalized and said: "This saying is hard, and who can hear it?" ([John 6:61](#)); but instead of retracting what He had said, Christ rather reproached them for their want of faith, by alluding to His sublimer origin and His future Ascension into heaven. And without further ado He allowed these Disciples to go their way ([John 6:62 sqq.](#)). Finally He turned to His twelve Apostles with the question: "Will you also go away?"

Then Peter stepped forth and with humble faith replied: "Lord, to whom shall we go? thou hast the words of eternal life. And we have believed and have known, that thou art the Christ, the Son of God" ([John 6:68 sqq.](#)). The entire scene of the discourse and murmurings against it proves that the Zwinglian and Anglican interpretation of the passage, "It is the spirit that quickeneth", etc., in the sense of a glossing over or retraction, is wholly inadmissible. For in spite of these words the Disciples severed their connection with Jesus, while the Twelve accepted with simple faith a mystery which as yet they did not understand. Nor did Christ say: "My flesh is spirit", i.e. to be understood in a figurative sense, but: "My words are spirit and life". There are two views regarding the sense in which this text is to be interpreted. Many of the Fathers declare that the true Flesh of Jesus (*sarx*) is not to be understood as separated from His Divinity (*spiritus*), and hence not in a cannibalistic sense, but as belonging entirely to the supernatural economy. The second and more scientific explanation asserts that in the Scriptural opposition of "flesh and blood" to "spirit", the former always signifies carnal-mindedness, the latter mental perception illumined by faith, so that it was the intention of Jesus in this passage to give prominence to the fact that the sublime mystery of the Eucharist can be grasped in the light of supernatural faith alone, whereas it cannot be understood by the carnal-minded, who are weighed down under the burden

of sin. Under such circumstances it is not to be wondered at that the Fathers and several Ecumenical councils (Ephesus, 431; Nicæa, 787) adopted the literal sense of the words, though it was not dogmatically defined (cf. Council of Trent, Sess. XXI, c. i). If it be true that a few Catholic theologians (as Cajetan, Ruardus Tapper, Johann Hessel, and the elder Jansenius) preferred the figurative interpretation, it was merely for controversial reasons, because in their perplexity they imagined that otherwise the claims of the Hussite and Protestant Utraquists for the partaking of the Chalice by the laity could not be answered by argument from Scripture. (Cf. Patrizi, "De Christo pane vitæ", Rome, 1851; Schmitt, "Die Verheissung der Eucharistie bei den Vütern", 2 vols., Würzburg, 1900-03.)

The words of Institution

The Church's Magna Charta, however, are the words of Institution, "This is my body — this is my blood", whose literal meaning she has uninterruptedly adhered to from the earliest times. The Real Presence is evinced, positively, by showing the necessity of the literal sense of these words, and negatively, by refuting the figurative interpretations. As regards the first, the very existence of four distinct narratives of the Last Supper, divided usually into the Petrine ([Matthew 26:26](#) sqq.; [Mark 14:22](#) sqq.) and the double Pauline accounts ([Luke 22:19](#) sq.; [I Cor. 11:24](#) sq.), favors the literal interpretation. In spite of their striking unanimity as regards essentials, the Petrine account is simpler and clearer, whereas Pauline is richer in additional details and more involved in its citation of the words that refer to the Chalice. It is but natural and justifiable to expect that, when four different narrators in different countries and at different times relate the words of Institution to different circles of readers, the occurrence of an unusual figure of speech, as, for instance, that bread is a sign of Christ's Body, would, somewhere or other, betray itself, either in the difference of word-setting, or in the unequivocal expression of the meaning really intended, or at least in the addition of some such mark as: "He spoke, however, of the sign of His Body." But nowhere do we discover the slightest ground for a figurative interpretation. If, then, natural, literal interpretation were false, the Scriptural record alone would have to be considered as the cause of a pernicious error in faith and of the grievous crime of rendering Divine homage to bread (*artolatria*) — a supposition little in harmony with the character of the four Sacred Writers or with the inspiration of the Sacred Text. Moreover, we must not omit the important circumstance, that one of the four narrators has interpreted his own account literally. This is St. Paul ([I Cor. 11:27](#) sq.), who, in the most vigorous language, brands the unworthy recipient as "guilty of body and of the blood of the Lord". There can be no question of a grievous offense against Christ Himself unless we suppose that the true Body and the true Blood of Christ are really present in the Eucharist. Further, if we attend only to the words themselves their natural sense is so

forceful and clear that Luther wrote to the Christians of Strasburg in 1524: "I am caught, I cannot escape, the text is too forcible" (De Wette, II, 577). The necessity of the natural sense is not based upon the absurd assumption that Christ could not in general have resorted to use of figures, but upon the evident requirement of the case, which demand that He did not, in a matter of such paramount importance, have recourse to meaningless and deceptive metaphors. For figures enhance the clearness of speech only when the figurative meaning is obvious, either from the nature of the case (e.g. from a reference to a statue of Lincoln, by saying: "This is Lincoln") or from the usages of common parlance (e.g. in the case of this synecdoche: "This glass is wine"), Now, neither from the nature of the case nor in common parlance is bread an apt or possible symbol of the human body. Were one to say of a piece of bread: "This is Napoleon", he would not be using a figure, but uttering nonsense. There is but one means of rendering a symbol improperly so called clear and intelligible, namely, by, conventionally settling beforehand what it is to signify, as, for instance, if one were to say: "Let us imagine these two pieces of bread before us to be Socrates and Plato". Christ, however, instead of informing His Apostles that he intended to use such a figure, told them rather the contrary in the discourse containing the promise: "the bread that I will give, is my flesh, for the life of the world" (John 6:52), Such language, of course, could be used only by a God-man; so that belief in the Real Presence necessarily presupposes belief in the true Divinity of Christ, The foregoing rules would of themselves establish the natural meaning with certainty, even if the words of Institution, "This is my body — this is my blood", stood alone, But in the original text *corpus* (body) and *sanguis* (blood) are followed by *significant* appositional additions, the Body being designated as "given for you" and the Blood as "shed for you [many]"; hence the Body given to the Apostles was the self same Body that was crucified on Good Friday, and the Chalice drunk by them, the self same Blood that was shed on the Cross for our sins, Therefore the above-mentioned appositional phrases directly exclude every possibility of a figurative interpretation.

We reach the same conclusion from a consideration of the concomitant circumstances, taking into account both the hearers and the Institutor, Those who heard the words of Institution were not learned Rationalists, possessed of the critical equipment that would enable them, as philologists and logicians, to analyze an obscure and mysterious phraseology; they were simple, uneducated fishermen, from the ordinary ranks of the people, who with childlike *naïveté* hung upon the words of their Master and with deep faith accepted whatever He proposed to them, This childlike disposition had to be reckoned with by Christ, particularly on the eve of His Passion and Death, when He made His last will and testament and spoke as a dying father to His deeply afflicted children. In such a moment of awful solemnity, the only appropriate mode

of speech would be one which, stripped of unintelligible figures, made use of words corresponding exactly to the meaning to be conveyed. It must be remembered, also, that Christ as omniscient God-man, must have foreseen the shameful error into which He would have led His Apostles and His Church by adopting an unheard-of metaphor; for the Church down to the present day appeals to the words of Christ in her teaching and practice. If then she practices idolatry by the adoration of mere bread and wine, this crime must be laid to the charge of the God-man Himself. Besides this, Christ intended to institute the Eucharist as a most holy sacrament, to be solemnly celebrated in the Church even to the end of time. But the content and the constituent parts of a sacrament had to be stated with such clearness of terminology as to exclude categorically every error in liturgy and worship. As may be gathered from the words of consecration of the Chalice, Christ established the New Testament in His Blood, just as the Old Testament had been established in the typical blood of animals (cf. Ex., xxiv, 8; Heb., ix, 11 sqq.). With the true instinct of justice, jurists prescribe that in all debatable points the words of a will must be taken in their natural, literal sense; for they are led by the correct conviction, that every testator of sound mind, in drawing up his last will and testament, is deeply concerned to have it done in language at once clear and unencumbered by meaningless metaphors. Now, Christ, according to the literal purport of His testament, has left us as a precious legacy, not mere bread and wine, but His Body and Blood. Are we justified, then, in contradicting Him to His face and exclaiming: "No, this is not your Body, but mere bread, the sign of your Body!"

The refutation of the so-called Sacramentarians, a name given by Luther to those who oppmpossibility of a figurative meaning. Once the manifest literal sense is abandoned, occasion is given to interminable controversies about the meaning of an enigma which Christ supposedly offered His followers for solution. There were no limits to the dispute in the sixteenth century, for at that time Christopher Rasperger wrote a whole book on some 200 different interpretations: "Ducentæ verborum, 'Hoc est corpus meum' interpretationes" (Ingolstadt, 1577). In this connection we must restrict ourselves to an examination of the most current and widely known distortions of the literal sense, which were the butt of Luther's bitter ridicule even as early as 1527. The first group of interpreters, with Zwingli, discovers a figure in the copula *est* and renders it: "This signifies (*est = significat*) my Body". In proof of this interpretation, examples are quoted from scripture, as: "The seven kine are seven years" (Gen., xli, 26) or: "Sara and Agar are the two covenants" (Gal., iv, 24), Waiving the question whether the verb "to be" (*esse, einai*) of itself can ever be used as the "copula in a figurative relation" (Weiss) or express the "relation of identity in a metaphorical connection" (Heinrici), which most logicians deny, the fundamental principles of logic firmly establish this truth, that all propositions may be divided into two great categories, of which the first and

most comprehensive denominates a thing as it is in itself (e.g. "Man is a rational being"), whereas the second designates a thing according as it is used as a sign of something else (e.g. "This picture is my father"). To determine whether a speaker intends the second manner of expression, there are four criteria, whose joint concurrence alone will allow the verb "to be" to have the meaning of "signify". Abstracting from the three criteria, mentioned above, which have reference either to the nature of the case, or to the usages of common parlance, or to some convention previously agreed upon, there remains a fourth and last of decisive significance, namely: when a complete substance is predicated of another complete substance, there can exist no logical relation of identity between them, but only the relation of similarity, inasmuch as the first is an image, sign, symbol, of the other. Now this last-named criterion is inapplicable to the Scriptural examples brought forward by the Zwinglians, and especially so in regard to their interpretation of the words of Institution; for the words are not: "This bread is my Body", but indefinitely: "This is my Body". In the history of the Zwinglian conception of the Lord's Supper, certain "sacramental expressions" (*locutiones sacramentales*) of the Sacred Text, regarded as parallelisms of the words of Institution, have attracted considerable attention. The first is to be found in **I Cor. 10:4**: "And the rock was [signified] Christ", Yet it is evident that, if the subject rock is taken in its material sense, the metaphor, according to the fourth criterion just mentioned, is as apparent as in the analogous phrase "Christ is the vine". If, however, the word *rock* in this passage is stripped of all that is material, it may be understood in a spiritual sense, because the Apostle himself is speaking of that "spiritual rock" (*petra spiritalis*), which in the Person of the Word in an invisible manner ever accompanied the Israelites in their journeyings and supplied them with a spiritual fountain of waters. According to this explanation the copula would here retain its meaning "to be". A nearer approach to a parallel with the words of Institution is found apparently in the so-called "sacramental expressions": "Hoc est pactum meum" (Gen., xvii, 10), and "est enim Phase Domini" (Ex., xii, 11). It is well known how Zwingli by a clever manipulation of the latter phrase succeeded in one day in winning over to his interpretation the entire Catholic population of Zurich. And yet it is clear that no parallelism can be discerned between the aforesaid expressions and the words of Institution; no real parallelism, because there is question of entirely different matters. Not even a verbal parallelism can be pointed out, since in both texts of the Old Testament the subject is a ceremony (circumcision in the first case, and the rite of the paschal lamb in the second), while the predicate involves a mere abstraction (covenant, Passover of the Lord). A more weighty consideration is this, that on closer investigation the copula *est* will be found to retain its proper meaning of "is" rather than "signifies". For just as the circumcision not only signified the nature or object of the Divine covenant, but really was such, so the rite of the

Paschal lamb was really the Passover (*Phase*) or Pasch, instead of its mere representation. It is true that in certain Anglican circles it was formerly the custom to appeal to the supposed poverty of the Aramaic tongue, which was spoken by Christ in the company of His Apostles; for it was maintained that no word could be found in this language corresponding to the concept "to signify". Yet, even prescind from the fact that in the Aramaic tongue the copula *est* is usually omitted and that such an omission rather makes for its strict meaning of "to be", Cardinal Wiseman (*Horæ Syriacæ*, Rome, 1828, pp. 3-73) succeeded in producing no less than forty Syriac expressions conveying the meaning of "to signify" and thus effectually exploded the myth of the Semitic tongue's limited vocabulary.

A second group of Sacramentarians, with Oecolampadius, shifted the diligently sought-for metaphor to the concept contained in the predicate *corpus*, giving to the latter the sense of "signum corporis", so that the words of Institution were to be rendered: "This is a sign [symbol, image, type] of my Body". Essentially tallying with the Zwinglian interpretation, this new meaning is equally untenable. In all the languages of the world the expression "my body" designates a person's natural body, not the mere sign or symbol of that body. True it is that the Scriptural words "Body of Christ" not infrequently have the meaning of "Church", which is called the mystical Body of Christ, a figure easily and always discernible as such from the text or context (cf. Col., i, 24). This mystical sense, however, is impossible in the words of Institution, for the simple reason that Christ did not give the Apostles His Church to eat, but His Body, and that "body and blood", by reason of their real and logical association, cannot be separated from one another, and hence are all the less susceptible of a figurative use. The case would be different if the reading were: "This is the bread of my Body, the wine of my Blood". In order to prove at least this much, that the contents of the Chalice are merely wine and, consequently, a mere sign of the Blood, Protestants have recourse to the text of St. Matthew, who relates that Christ, after the completion of the Last Supper, declared: "I will not drink from henceforth of this fruit of the vine [*genimen vitis*]" ([Matt 26:29](#)). It is to be noted that St. Luke (22:18 sqq.), who is chronologically more exact, places these words of Christ before his account of the Institution, and that the true Blood of Christ may with right still be called (consecrated) wine, on the one hand, because the Blood was partaken of after the manner in which wine is drunk and, on the other, because the Blood continues to exist under the outward appearances of the wine. In its multifarious wanderings from the old beaten path being consistently forced with the denial of Christ's Divinity to abandon faith in the Real Presence, also, modern criticism seeks to account for the text along other lines. With utter arbitrariness, doubting whether the words of Institution originated from the mouth of Christ, it traces them to St. Paul as their author, in whose ardent soul something original sup-

posedly mingled with his subjective reflections on the value attached to "Body" and on the "repetition of the Eucharistic banquet". From this troubled fountain-head the words of Institution first found their way into the Gospel of St. Luke and then, by way of addition, were woven into the texts of St. Matthew and St. Mark. It stands to reason that the latter assertion is nothing more than a wholly unwarrantable conjecture, which may be passed over as gratuitously as it was advanced. It is, moreover, essentially untrue that the value attached to the Sacrifice and the repetition of the Lord's Supper are mere reflections of St. Paul, since Christ attached a sacrificial value to His Death (cf. [Mark 10:45](#)) and celebrated His Eucharistic Supper in connection with the Jewish Passover, which itself had to be repeated every year. As regards the interpretation of the words of Institution, there are at present three modern explanations contending for supremacy — the symbolical, the parabolical, and the eschatological. According to the symbolical interpretation, *corpus* is supposed to designate the Church as the mystical Body and *sanguis* the New Testament. We have already rejected this last meaning as impossible. For is it the Church that is eaten and the New Testament that is drunk? Did St. Paul brand the partaking of the Church and of the New Testament as a heinous offense committed against the Body and Blood of Christ? The case is not much better in regard to the parabolical interpretation, which would discern in the pouring out of the wine a mere parable of the shedding of the Blood on the Cross. This again is a purely arbitrary explanation, an invention, unsupported by any objective foundation. Then, too, it would follow from analogy, that the breaking of the bread was a parable of the slaying of Christ's Body, a meaning utterly inconceivable. Rising as it were out of a dense fog and laboring to take on a definite form, the incomplete eschatological explanation would make the Eucharist a mere anticipation of the future heavenly banquet. Supposing the truth of the Real Presence, this consideration might be open to discussion, inasmuch as the partaking of the Bread of Angels is really the foretaste of eternal beatitude and the anticipated transformation of earth into heaven. But as implying mere symbolical anticipation of heaven and a meaningless manipulation of unconsecrated bread and wine the eschatological interpretation is diametrically opposed to the text and finds not the slightest support in the life and character of Christ.

B. Proof from Tradition

As for the cogency of the argument from tradition, this historical fact is of decided significance, namely, that the dogma of the Real Presence remained, properly speaking, unmolested down to the time of the heretic Berengarius of Tours (d. 1088), and so could claim even at that time the uninterrupted possession of ten centuries. In the course of the dogma's history there arose in general three great Eucharistic controversies, the first of which, begun by Paschasius Radbertus, in the ninth century, scarcely extended beyond the limits of his audience and concerned itself solely with the philo-

sophical question, whether the Eucharistic Body of Christ is identical with the natural Body He had in Palestine and now has in heaven. Such a numerical identity could well have been denied by Ratramnus, Rabanus Maurus, Ratherius, Lanfranc, and others, since even nowadays a true, though accidental, distinction between the sacramental and the natural condition of Christ's Body must be rigorously maintained. The first occasion for an official procedure on the part of the Church was offered when Berengarius of Tours, influenced by the writings of Scotus Eriugena (d. about 884), the first opponent of the Real Presence, rejected both the latter truth and that of Transubstantiation. He repaired, however, the public scandal he had given by a sincere retraction made in the presence of Pope Gregory VII at a synod held in Rome in 1079, and died reconciled to the Church. The third and the sharpest controversy was that opened by the Reformation in the sixteenth century, in regard to which it must be remarked that Luther was the only one among the Reformers who still clung to the old Catholic doctrine, and, though subjecting it to manifold misrepresentations, defended it most tenaciously. He was diametrically opposed by Zwingli of Zurich, who, as was seen above, reduced the Eucharist to an empty, meaningless symbol. Having gained over to his views such friendly contemporary partisans as Carlstadt, Bucer, and Oecolampadius, he later on secured influential allies in the Arminians, Mennonites, Socinians, and Anglicans, and even today the rationalistic conception of the doctrine of the Lord's Supper does not differ substantially from that of the Zwinglians. In the meantime, at Geneva, Calvin was cleverly seeking to bring about a compromise between the extremes of the Lutheran literal and the Zwinglian figurative interpretations, by suggesting instead of the substantial presence in one case or the merely symbolical in the other, a certain mean, i.e. "dynamic", presence, which consists essentially in this, that at the moment of reception, the efficacy of Christ's Body and Blood is communicated from heaven to the souls of the predestined and spiritually nourishes them. Thanks to Melanchthon's pernicious and dishonest double-dealing, this attractive intermediary position of Calvin made such an impression even in Lutheran circles that it was not until the Formula of Concord in 1577 that the "crypto-Calvinistic venom" was successfully rejected from the body of Lutheran doctrine. The Council of Trent met these widely divergent errors of the Reformation with the dogmatic definition, that the God-man is "truly, really, and substantially" present under the appearances of bread and wine, purposely intending thereby to oppose the expression *vere* to Zwingli's *signum*, *realiter* to Oecolampadius's *figura*, and *essentialiter* to Calvin's *virtus* (Sess. XIII, can. i). And this teaching of the Council of Trent has ever been and is now the unwavering position of the whole of Catholic Christendom.

As regards the doctrine of the Fathers, it is not possible in the present article to multiply patristic texts, which are usually characterized by wonderful beauty and

clearness. Suffice it to say that, besides the Didache (ix, x, xiv), the most ancient Fathers, as Ignatius (Ad. Smyrn., vii; Ad. Ephes., xx; Ad. Philad., iv), Justin (Apol., I, lxvi), Irenæus (Adv. Hær., IV, xvii, 5; IV, xviii, 4; V, ii, 2), Tertullian (De resurrect. carn., viii; De pudic., ix; De orat., xix; De bapt., xvi), and Cyprian (De orat. dom., xviii; De lapsis, xvi), attest without the slightest shadow of a misunderstanding what is the faith of the Church, while later patristic theology bears witness to the dogma in terms that approach exaggeration, as Gregory of Nyssa (Orat. catech., xxxvii), Cyril of Jerusalem (Catech. myst., iv, 2 sqq.), and especially the Doctor of the Eucharist, Chrysostom [Hom. lxxxii (lxxxiii), in Matt., 1 sqq.; Hom. xlvi, in Joan., 2 sqq.; Hom. xxiv, in I Cor., 1 sqq.; Hom. ix, de pœnit., 1], to whom may be added the Latin Fathers, Hilary (De Trinit., VIII, iv, 13) and Ambrose (De myst., viii, 49; ix, 51 sq.). Concerning the Syriac Fathers see Th. Lamy "De Syrorum fide in re eucharisticâ" (Louvain, 1859).

The position held by St. Augustine is at present the subject of a spirited controversy, since the adversaries of the Church rather confidently maintain that he favored their side of the question in that he was an out-and-out "Symbolist". In the opinion of Loofs ("Dogmengeschichte", 4th ed., Halle, 1906, p. 409), St. Augustine never gives, the "reception of the true Body and Blood of Christ" a thought; and this view Ad. Harnack (Dogmengeschichte, 3rd ed., Freiburg, 1897, III, 148) emphasizes when he declares that St. Augustine "undoubtedly was one in this respect with the so-called pre-Reformation and with Zwingli". Against this rather hasty conclusion Catholics first of all advance the undoubted fact that Augustine demanded that Divine worship should be rendered to the Eucharistic Flesh (In Ps. xxxiii, enarr., i, 10), and declared that at the Last Supper "Christ held and carried Himself in His own hands" (In Ps. xcvi, n. 9). They insist, and rightly so, that it is not fair to separate this great Doctor's teaching concerning the Eucharist from his doctrine of the Holy Sacrifice, since he clearly and unmistakably asserts that the true Body and Blood are offered in the Holy Mass. The variety of extreme views just mentioned requires that an attempt be made at a reasonable and unbiased explanation, whose verification is to be sought for and found in the acknowledged fact that a gradual process of development took place in the mind of St. Augustine. No one will deny that certain expressions occur in Augustine as forcibly realistic as those of Tertullian and Cyprian or of his intimate literary friends, Ambrose, Optatus of Mileve, Hilary, and Chrysostom. On the other hand, it is beyond question that, owing to the determining influence of Origen and the Platonic philosophy, which, as is well known, attached but slight value to visible matter and the sensible phenomena of the world, Augustine did not refer what was properly real (*res*) in the Blessed Sacrament to the Flesh of Christ (*caro*), but transferred it to the quickening principle (*spiritus*), i.e. to the effects produced by a worthy Communion. A logical consequence of this was that he allowed to *caro*, as the vehicle and antitype of *res*, not indeed a mere

symbolical worth, but at best a transitory, intermediary, and subordinate worth (*signum*), and placed the Flesh and Blood of Christ, present under the appearances (*figuræ*) of bread and wine, in too decided an opposition to His natural, historical Body. Since Augustine was a strenuous defender of personal co-operation and effort in the work of salvation and an enemy to mere mechanical activity and superstitious routine, he omitted insisting upon a lively faith in the real personality of Jesus in the Eucharist, and called attention to the spiritual efficiency of the Flesh of Christ instead. His mental vision was fixed, not so much upon the saving *caro*, as upon the *spiritus*, which alone possessed worth. Nevertheless a turning-point occurred in his life. The conflict with Pelagianism and the diligent perusal of Chrysostom freed him from the bondage of Platonism, and he thenceforth attached to *caro* a separate, individual value independent of that of *spiritus*, going so far, in fact, as to maintain too strongly that the Communion of children was absolutely necessary to salvation.

If, moreover, the reader finds in some of the other Fathers difficulties, obscurities, and a certain inaccuracy of expression, this may be explained on three general grounds:

- because of the peace and security there is in their possession of the Church's truth, whence resulted a certain want of accuracy in their terminology;
- because of the strictness with which the Discipline of the Secret, expressly concerned with the Holy Eucharist, was maintained in the East until the end of the fifth, in the West down to the middle of the sixth century;
- because of the preference of many Fathers for the allegorical interpretation of Scripture, which was especially in vogue in the Alexandrian School (Clement of Alexandria, Origen, Cyril), but which found a salutary counterpoise in the emphasis laid on the literal interpretation by the School of Antioch (Theodore of Mopsuestia, Theodoret). Since, however, the allegorical sense of the Alexandrians did not exclude the literal, but rather supposed it as a working basis, the realistic phraseology of Clement (*Pæd.*, I, vi), of Origen (*Contra Celsum* VIII, xiii 32; *Hom.* ix, in *Levit.*, x) and of Cyril (in *Matt.*, xxvi, xxvii; *Contra Nestor.*, IV, 5) concerning the Real Presence is readily accounted for. (For the solution of patristic difficulties, see Pohle, "Dogmatik", 3rd ed., Paderborn, 1908, III, 209 sqq.)

The argument from tradition is supplemented and completed by the argument from prescription, which traces the constant belief in the dogma of the Real Presence through the Middle Ages back to the early Apostolic Church, and thus proves the anti-Eucharistic heresies to have been capricious novelties and violent ruptures of the true faith as handed down from the beginning. Passing over the interval that has elapsed

since the Reformation, as this period receives its entire character from the Council of Trent, we have for the time of the Reformation the important testimony of Luther (*Wider etliche Rottengeister*, 1532) for the fact that the whole of Christendom then believed in the Real Presence. And this firm, universal belief can be traced back uninterruptedly to Berengarius of Tours (d. 1088), in fact — omitting the sole exception of Scotus Eriugena — to Paschasius Radbertus (831). On these grounds, therefore, we may proudly maintain that the Church has been in legitimate possession of this dogma for fully eleven centuries. When Photius started the Greek Schism in 869, he took over to his Church the inalienable treasure of the Catholic Eucharist, a treasure which the Greeks, in the negotiations for reunion at Lyons in 1274 and at Florence in 1439, could show to be still intact, and which they vigorously defended in the schismatical Synod of Jerusalem (1672) against the sordid machinations of the Calvinistic-minded Cyril Lucar, Patriarch of Constantinople (1629). From this it follows conclusively that the Catholic dogma must be much older than the Eastern Schism under Photius. In fact, even the Nestorians and Monophysites, who broke away from Rome in the fifth century, have, as is evident from their literature and liturgical books, preserved their faith in the Eucharist as unwaveringly as the Greeks, and this in spite of the dogmatic difficulties which, on account of their denial of the hypostatic union, stood in the way of a clear and correct notion of the Real Presence. Therefore the Catholic dogma is at least as old as Nestorianism (A.D. 431). But is it not of even greater antiquity? To decide this question one has only to examine the oldest Liturgies of the Mass, whose essential elements date back to the time of the Apostles (*see* articles on the various liturgies), to visit the Roman Catacombs, where Christ is shown as present in the Eucharistic food under the symbol of a fish (*see* *Early Symbols of the Eucharist*), to decipher the famous Inscription of Abercius of the second century, which, though composed under the influence of the Discipline of the Secret, plainly attests the faith of that age. And thus the argument from prescription carries us back to the dim and distant past and thence to the time of the Apostles, who in turn could have received their faith in the Real Presence from no one but Christ Himself.

II. THE TOTALITY OF THE REAL PRESENCE

In order to forestall at the very outset, the unworthy notion, that in the Eucharist we receive merely the Body and merely the Blood of Christ but not Christ in His entirety, the Council of Trent defined the Real Presence to be such as to include with Christ's Body and His Soul and Divinity as well. A strictly logical conclusion from the words of promise: "he that eateth me the same also shall live by me", this Totality of Presence was also the constant property of tradition, which characterized the partaking of separated parts of the Savior as a sarcophagy (flesh-eating) altogether derogatory to God. Although the separation of the Body, Blood, Soul, and Logos, is, absolutely

speaking, within the almighty power of God, yet then actual inseparability is firmly established by the dogma of the indissolubility of the hypostatic union of Christ's Divinity and Humanity. In case the Apostles had celebrated the Lord's Supper during the *triduum mortis* (the time during which Christ's Body was in the tomb), when a real separation took place between the constitutive elements of Christ, there would have been really present in the Sacred Host only, the bloodless, inanimate Body of Christ as it lay in tomb, and in the Chalice only the Blood separated from His Body and absorbed by the earth as it was shed, both the Body and the Blood, however, hypostatically united to His Divinity, while His Soul, which sojourned in Limbo, would have remained entirely excluded from the Eucharistic presence. This unreal, though not impossible, hypothesis, is well calculated to throw light upon the essential difference designated by the Council of Trent (Sess, XIII, c. iii), between the meanings of the words *ex vi verborum* and *per concomitantiam*. By virtue of the words of consecration, or *ex vi verborum*, that only is made present which is expressed by the words of Institution, namely the Body and the Blood of Christ. But by reason of a natural concomitance (*per concomitantiam*), there becomes simultaneously present all that which is physically inseparable from the parts just named, and which must, from a natural connection with them, always be their accompaniment. Now, the glorified Christ, Who "dieth now no more" (Rom, vi, 9) has an animate Body through whose veins courses His life's Blood under the vivifying influence of soul. Consequently, together with His Body and Blood and Soul, His whole Humanity also, and, by virtue of the hypostatic union, His Divinity, i.e. Christ whole and entire, must be present. Hence Christ is present in the sacrament with His Flesh and Blood, Body and Soul, Humanity and Divinity,

This general and fundamental principle, which entirely abstracts from the duality of the species, must, nevertheless, be extended to each of the species of bread and wine. For we do not receive in the Sacred Host one part of Christ and in the Chalice the other, as though our reception of the totality depended upon our partaking of both forms; on the contrary, under the appearance of bread alone, as well as under the appearance of wine alone, we receive Christ whole and entire (cf. Council of Trent, Sess. XIII, can. iii). This, the only reasonable conception, finds its Scriptural verification in the fact, that St. Paul ([I Cor. 11:27, 29](#)) attaches the same guilt "of the body and the blood of the Lord" to the unworthy "eating or drinking", understood in a disjunctive sense, as he does to "eating and drinking", understood in a copulative sense. The traditional foundation for this is to be found in the testimony of the Fathers and of the Church's liturgy, according to which the glorified Savior can be present on our altars only in His totality and integrity, and not divided into parts or distorted to the form of a monstrosity. It follows, therefore, that supreme adoration is separately due to the

Sacred Host and to the consecrated contents of the Chalice. On this last truth are based especially the permissibility and intrinsic propriety of Communion only under one kind for the laity and for priests not celebrating Mass (*see* Communion Under Both Kinds). But in particularizing upon the dogma, we are naturally led to the further truth, that, at least after the actual division of either Species into parts, Christ is present in each part in His full and entire essence. If the Sacred Host be broken into pieces or if the consecrated Chalice be drunk in small quantities, Christ in His entirety is present in each particle and in each drop. By the restrictive clause, *separatione factâ* the Council of Trent (Sess. XIII, can. iii) rightly raised this truth to the dignity of a dogma. While from Scripture we may only judge it improbable that Christ consecrated separately each particle of the bread He had broken, we know with certainty, on the other hand, that He blessed the entire contents of the Chalice and then gave it to His disciples to be partaken of distributively (cf. [Matthew 26:27](#) sq.; [Mark 14:23](#)). It is only on the basis of the Tridentine dogma that we can understand how Cyril of Jerusalem (Catech. myst. v, n. 21) obliged communicants to observe the most scrupulous care in conveying the Sacred Host to their mouths, so that not even "a crumb, more precious than gold or jewels", might fall from their hands to the ground; how Cæsarius of Arles taught that there is "just as much in the small fragment as in the whole"; how the different liturgies assert the abiding integrity of the "indivisible Lamb", in spite of the "division of the Host"; and, finally, how in actual practice the faithful partook of the broken particles of the Sacred Host and drank in common from the same cup.

While the three foregoing theses contain dogmas of faith, there is a fourth proposition which is merely a theological conclusion, namely, that even before the actual division of the Species, Christ is present wholly and entirely in each particle of the still unbroken Host and in each drop of the collective contents of the Chalice. For were not Christ present in His entire Personality in every single particle of the Eucharistic Species even before their division took place, we should be forced to conclude that it is the process of dividing which brings about the Totality of Presence, whereas according to the teaching of the Church the operative cause of the Real and Total Presence is to be found in Transubstantiation alone. No doubt this last conclusion directs the attention of philosophical and scientific inquiry to a mode of existence peculiar to the Eucharistic Body, which is contrary to the ordinary laws of experience. It is, indeed, one of those sublime mysteries, concerning which speculative theology attempts to offer various solutions [see below under (5)].

III. TRANSUBSTANTIATION

Before proving dogmatically the fact of the substantial change here under consideration, we must first outline its history and nature.

(a) The scientific development of the concept of Transubstantiation can hardly be said to be a product of the Greeks, who did not get beyond its more general notes; rather, it is the remarkable contribution of the Latin theologians, who were stimulated to work it out in complete logical form by the three Eucharistic controversies mentioned above. The term *transubstantiation* seems to have been first used by Hildebert of Tours (about 1079). His encouraging example was soon followed by other theologians, as Stephen of Autun (d. 1139), Gaufred (1188), and Peter of Blois (d. about 1200), whereupon several ecumenical councils also adopted this significant expression, as the Fourth Council of the Lateran (1215), and the Council of Lyons (1274), in the profession of faith of the Greek Emperor Michael Palæologus. The Council of Trent (Sess. XIII, cap. iv; can. ii) not only accepted as an inheritance of faith the truth contained in the idea, but authoritatively confirmed the "aptitude of the term" to express most strikingly the legitimately developed doctrinal concept. In a closer logical analysis of Transubstantiation, we find the first and fundamental notion to be that of conversion, which may be defined as "the transition of one thing into another in some aspect of being". As is immediately evident, conversion (*conversio*) is something more than mere change (*mutatio*). Whereas in mere changes one of the two extremes may be expressed negatively, as, e.g., in the change of day and night, conversion requires two positive extremes, which are related to each other as thing to thing, and must have, besides, such an intimate connection with each other, that the last extreme (*terminus ad quem*) begins to be only as the first (*terminus a quo*) ceases to be, as, e.g., in the conversion of water into wine at Cana. A third element is usually required, known as the *commune tertium*, which, even after conversion has taken place, either physically or at least logically unites one extreme to the other; for in every true conversion the following condition must be fulfilled: "What was formerly A, is now B." A very important question suggests itself as to whether the definition should further postulate the previous non-existence of the last extreme, for it seems strange that an existing terminus a quo, A, should be converted into an already existing terminus ad quem, B. If the act of conversion is not to become a mere process of substitution, as in sleight-of-hand performances, the terminus ad quem must unquestionably in some manner newly exist, just as the terminus a quo must in some manner really cease to exist. Yet as the disappearance of the latter is not attributable to annihilation properly so called, so there is no need of postulating creation, strictly so called, to explain the former's coming into existence. The idea of conversion is amply realized if the following condition is fulfilled, viz., that a thing which already existed in substance, acquires an altogether new and previously non-existing *mode of being*. Thus in the resurrection of the dead, the dust of the human bodies will be truly converted into the bodies of the risen by their previously existing souls, just as at death they had been truly converted into corpses by the departure of

the souls. This much as regards the general notion of conversion. Transubstantiation, however, is not a conversion simply so called, but a substantial conversion (*conversio substantialis*), inasmuch as one thing is *substantially* or *essentially* converted into another. Thus from the concept of Transubstantiation is excluded every sort of merely accidental conversion, whether it be purely natural (e.g. the metamorphosis of insects) or supernatural (e.g. the Transfiguration of Christ on Mount Tabor). Finally, Transubstantiation differs from every other substantial conversion in this, that *only* the substance is converted into another — the accidents remaining the same — just as would be the case if wood were miraculously converted into iron, the substance of the iron remaining hidden under the external appearance of the wood.

The application of the foregoing to the Eucharist is an easy matter. First of all the notion of conversion is verified in the Eucharist, not only in general, but in all its essential details. For we have the two extremes of conversion, namely, bread and wine as the terminus a quo, and the Body and Blood of Christ as the terminus ad quem. Furthermore, the intimate connection between the cessation of one extreme and the appearance of the other seems to be preserved by the fact, that both events are the results, not of two independent processes, as, e.g. annihilation and creation, but of one single act, since, according to the purpose of the Almighty, the substance of the bread and wine departs in order to make room for the Body and Blood of Christ. Lastly, we have the commune tertium in the unchanged appearances of bread and wine, under which appearances the pre-existent Christ assumes a new, sacramental mode of being, and without which His Body and Blood could not be partaken of by men. That the consequence of Transubstantiation, as a conversion of the total substance, is the transition of the entire substance of the bread and wine into the Body and Blood of Christ, is the express doctrine of the Church (Council of Trent, Sess. XIII, can. ii). Thus were condemned as contrary to faith the antiquated view of Durandus, that only the substantial form (*forma substantialis*) of the bread underwent conversion, while the primary matter (*materia prima*) remained, and, especially, Luther's doctrine of Consubstantiation, i.e. the coexistence of the substance of the bread with the true Body of Christ. Thus, too, the theory of Impanation advocated by Osiander and certain Berengarians, and according to which a hypostatic union is supposed to take place between the substance of the bread and the God-man (*impanatio = Deus panis factus*), is authoritatively rejected. So the Catholic doctrine of Transubstantiation sets up a mighty bulwark around the dogma of the Real Presence and constitutes in itself a distinct doctrinal article, which is not involved in that of the Real Presence, though the doctrine of the Real Presence is necessarily contained in that of Transubstantiation. It was for this very reason that Pius VI, in his dogmatic Bull "Auctorem fidei" (1794)

against the Jansenistic pseudo Synod of Pistoia (1786), protested most vigorously against suppressing this "scholastic question", as the synod had advised pastors to do.

(b) In the mind of the Church, Transubstantiation has been so intimately bound up with the Real Presence, that both dogmas have been handed down together from generation to generation, though we cannot entirely ignore a dogmatico-historical development. The total conversion of the substance of bread is expressed clearly in the words of Institution: "This is my body". These words form, not a theoretical, but a practical proposition, whose essence consists in this, that the objective identity between subject and predicate is effected and verified only after the words have all been uttered, not unlike the pronouncement of a king to a subaltern: "You are a major", or, "You are a captain", which would immediately cause the promotion of the officer to a higher command. When, therefore, He Who is All Truth and All Power said of the bread: "This is my body", the bread became, through the utterance of these words, the Body of Christ; consequently, on the completion of the sentence the substance of bread was no longer present, but the Body of Christ under the outward appearance of bread. Hence the bread must have become the Body of Christ, i.e. the former must have been converted into the latter. The words of Institution were at the same time the words of Transubstantiation. Indeed the actual manner in which the absence of the bread and the presence of the Body of Christ is effected, is not read into the words of Institution but strictly and exegetically deduced from them. The Calvinists, therefore, are perfectly right when they reject the Lutheran doctrine of Consubstantiation as a fiction, with no foundation in Scripture. For had Christ intended to assert the coexistence of His Body with the Substance of the bread, He would have expressed a simple identity between *hoc* and *corpus* by means of the copula *est*, but would have resorted to some such expression as: "This bread contains my body", or, "In this bread is my Body." Had He desired to constitute bread the sacramental receptacle of His Body, He would have had to state this expressly, for neither from the nature of the case nor according to common parlance can a piece of bread be made to signify the receptacle of a human body. On the other hand, the synecdoche is plain in the case of the Chalice: "This is my blood", i.e. the contents of the Chalice are my blood, and hence no longer wine.

Regarding tradition, the earliest witnesses, as Tertullian and Cyprian, could hardly have given any particular consideration to the genetic relation of the natural elements of bread and wine to the Body and Blood of Christ, or to the manner in which the former were converted into the latter; for even Augustine was deprived of a clear conception of Transubstantiation, so long as he was held in the bonds of Platonism. On the other hand, complete clearness on the subject had been attained by writers as early as Cyril of Jerusalem, Theodoret of Cyrrihus, Gregory of Nyssa, Chrysostom, and

Cyril of Alexandria in the East, and by Ambrose and the later Latin writers in the West. Eventually the West became the classic home of scientific perfection in the difficult doctrine of Transubstantiation. The claims of the learned work of the Anglican Dr. Pusey (*The Doctrine of the Real Presence as contained in the Fathers*, Oxford, 1855), who denied the cogency of the patristic argument for Transubstantiation, have been met and thoroughly answered by Cardinal Franzelin (*De Euchar.*, Rome, 1887, xiv). The argument from tradition is strikingly confirmed by the ancient liturgies, whose beautiful prayers express the idea of conversion in the clearest manner. Many examples may be found in Renaudot, "Liturgiæ orient." (2nd ed., 1847); Assemani, "Codex liturg." (13 vols., Rome 1749-66); Denzinger, "Ritus Orientalium" (2 vols., Würzburg, 1864), Concerning the Adduction Theory of the Scotists and the Production Theory of the Thomists, see Pohle, "Dogmatik" (3rd ed., Paderborn, 1908), III, 237 sqq.

IV. THE PERMANENCE AND ADORABLENESS OF THE EUCHARIST

Since Luther arbitrarily restricted Real Presence to the moment of reception (*in usu, non extra*), the Council of Trent (Sess. XIII, can. iv) by a special canon emphasized the fact, that after the Consecration Christ is truly present and, consequently, does not make His Presence dependent upon the act of eating or drinking. On the contrary, He continues His Eucharistic Presence even in the consecrated Hosts and Sacred particles that remain on the altar or in the ciborium after the distribution of Holy Communion. In the deposit of faith the Presence and the Permanence of Presence are so closely allied, that in the mind of the Church both continue on as an undivided whole. And rightly so; for just as Christ promised His Flesh and blood as meat and drink, i.e. as something permanent (cf. [John 6:50](#) sqq.), so, when He said: "Take ye, and eat. This is my body", the Apostles received from the hand of the Lord His Sacred Body, which was already objectively present and did not first become so in the act of partaking. This non-dependence of the Real Presence upon the actual reception is manifested very clearly in the case of the Chalice, when Christ said: "Drink ye all of this. For [*enim*] this is my Blood." Here the act of drinking is evidently neither the cause nor the *conditio sine qua non* for the presence of Christ's Blood.

Much as he disliked it, even Calvin had to acknowledge the evident force of the argument from tradition (Instit. IV, xvii, sect. 739). Not only have the Fathers, and among them Chrysostom with special vigor, defended in theory the permanence of the Real Presence, but the constant practice of the Church has also established its truth. In the early days of the Church the faithful frequently carried the Blessed Eucharist with them to their homes (cf. Tertullian, "Ad uxor.", II, v; Cyprian, "De lapsis", xxvi) or upon long journeys (Ambrose, *De excessu fratris*, I, 43, 46), while the deacons were accustomed to take the Blessed Sacrament to those who did not attend Divine service (cf. Justin, *Apol.*, I, n. 67), as well as to the martyrs, the incarcerated, and the infirm

(cf. Eusebius, *Hist. Eccl.*, VI, xlv). The deacons were also obliged to transfer the particles that remained to specially prepared repositories called *Pastophoria* (cf. *Apostolic Constitutions*, VIII, xiii). Furthermore, it was customary as early as the fourth century to celebrate the Mass of the Presanctified (cf. *Synod of Laodicea*, can. xlix), in which were received the Sacred Hosts that had been consecrated one or more days previously. In the Latin Church the celebration of the Mass of the Presanctified is nowadays restricted to Good Friday, whereas, ever since the Trullan Synod (692), the Greeks celebrate it during the whole of Lent, except on Saturdays, Sundays, and the feast of the Annunciation (25 March). A deeper reason for the permanence of Presence is found in the fact, that some time elapses between the confection and the reception of the sacrament, i.e. between the Consecration and the Communion, whereas in the case of the other sacraments both the confection and the reception take place at the same instant. Baptism, for instance, lasts only as long as the baptismal action or ablution with water, and is, therefore, a transitory sacrament; on the contrary, the Eucharist, and the Eucharist alone, constitutes a permanent sacrament (cf. *Council of Trent*, Sess. XIII, cap. iii). The permanence of Presence, however, is limited to an interval of time of which the beginning is determined by the instant of Consecration and the end by the corruption of the Eucharistic Species. If the Host has become moldy or the contents of the Chalice sour, Christ has discontinued His Presence therein. Since in the process of corruption those elementary substances return which correspond to the peculiar nature of the changed accidents, the law of the indestructibility of matter, notwithstanding the miracle of the Eucharistic conversion, remains in force without any interruption.

The Adorableness of the Eucharist is the practical consequence of its permanence. According to a well known principle of Christology, the same worship of latria (*cultus latriæ*) as is due to the Triune God is due also to the Divine Word, the God-man Christ, and in fact, by reason of the hypostatic union, to the Humanity of Christ and its individual component parts, as, e.g., His Sacred Heart. Now, identically the same Lord Christ is truly present in the Eucharist as is present in heaven; consequently He is to be adored in the Blessed Sacrament, and just so long as He remains present under the appearances of bread and wine, namely, from the moment of Transubstantiation to the moment in which the species are decomposed (cf. *Council of Trent*, Sess. XIII, can. vi).

In the absence of Scriptural proof, the Church finds a warrant for, and a propriety in, rendering Divine worship to the Blessed Sacrament in the most ancient and constant tradition, though of course a distinction must be made between the dogmatic principle and the varying discipline regarding the outward form of worship. While even the East recognized the unchangeable principle from the earliest ages, and, in fact, as late as the schismatical Synod of Jerusalem in 1672, the West has furthermore shown an

untiring activity in establishing and investing with more and more solemnity, homage and devotion to the Blessed Eucharist. In the early Church, the adoration of the Blessed Sacrament was restricted chiefly to Mass and Communion, just as it is today among the Orientals and the Greeks. Even in his time Cyril of Jerusalem insisted just as strongly as did Ambrose and Augustine on an attitude of adoration and homage during Holy Communion (cf. Ambrose, *De Sp. Sancto*, III, ii, 79; Augustine, *In Ps. xcvi*, n. 9). In the West the way was opened to a more and more exalted veneration of the Blessed Eucharist when the faithful were allowed to Communicate even outside of the liturgical service. After the Berengarian controversy, the Blessed Sacrament was in the eleventh and twelfth centuries elevated for the express purpose of repairing by its adoration the blasphemies of heretics and, strengthening the imperiled faith of Catholics. In the thirteenth century were introduced, for the greater glorification of the Most Holy, the "theophoric processions" (*circumgestatio*), and also the feast of Corpus Christi, instituted under Urban IV at the solicitation of St. Juliana of Liège. In honor of the feast, sublime hymns, such as the "Pange Lingua" of St. Thomas Aquinas, were composed. In the fourteenth century the practice of the Exposition of the Blessed Sacrament arose. The custom of the annual Corpus Christi procession was warmly defended and recommended by the Council of Trent (Sess. XIII, cap. v). A new impetus was given to the adoration of the Eucharist through the visits to the Blessed Sacrament (*Visitatio SS. Sacramenti*), introduced by St. Alphonsus Liguori; in later times the numerous orders and congregations devoted to Perpetual Adoration, the institution in many dioceses of the devotion of "Perpetual Prayer", the holding of International Eucharistic Congresses, e.g. that of London in September, 1908, have all contributed to keep alive faith in Him Who has said: "behold I am with you all days, even to the consummation of the world" ([Matthew 28:20](#)).

V. SPECULATIVE DISCUSSION OF THE REAL PRESENCE

The principal aim of speculative theology with regard to the Eucharist, should be to discuss philosophically, and seek a logical solution of, three apparent contradictions, namely:

- (a) the continued existence of the Eucharistic Species, or the outward appearances of bread and wine, without their natural underlying subject (*accidentia sine subjecto*);
- (b) the spatially uncircumscribed, spiritual mode of existence of Christ's Eucharistic Body (*existentia corporis ad modum spiritus*);
- (c) the simultaneous existence of Christ in heaven and in many places on earth (*multilocatio*).

(a) The study of the first problem, viz. whether or not the accidents of bread and wine continue their existence without their proper substance, must be based upon the clearly established truth of Transubstantiation, in consequence of which the entire

substance of the bread and the entire substance of the wine are converted respectively into the Body and Blood of Christ in such a way that "only the appearances of bread and wine remain" (Council of Trent, Sess. XIII, can. ii: *manentibus dumtaxat speciebus panis et vini*). Accordingly, the continuance of the appearances without the substance of bread and wine as their connatural substratum is just the reverse of Transubstantiation. If it be further asked, whether these appearances have any subject at all in which they inhere, we must answer with St. Thomas Aquinas (III:77:1), that the idea is to be rejected as unbecoming, as though the Body of Christ, in addition to its own accidents, should also assume those of bread and wine. The most that may be said is, that from the Eucharistic Body proceeds a miraculous sustaining power, which supports the appearances bereft of their natural substances and preserves them from collapse. The position of the Church in this regard may be readily determined from the Council of Constance (1414-1418). In its eighth session, approved in 1418 by Martin V, this synod condemned the following articles of Wyclif:

- "Substantia panis materialis et similiter substantia vini materialis remanent in Sacramento altaris", i.e. the material substance of bread and likewise the material substance of wine remain in the Sacrament of the Altar;
- "Accidentia panis non manent sine subjecto", i.e. the accidents of the bread do not remain without a subject.

The first of these articles contains an open denial of Transubstantiation. The second, so far as the text is concerned, might be considered as merely a different wording of the first, were it not that the history of the council shows that Wyclif had directly opposed the Scholastic doctrine of "accidents without a subject" as absurd and even heretical (cf, De Augustinis, *De re sacramentariâ*, Rome, 1889, II, 573 sqq.). Hence it was the intention of the council to condemn the second article, not merely as a conclusion of the first, but as a distinct and independent proposition; wherefore we may gather the Church's teaching on the subject from the contradictory proposition; "Accidentia panis manent sine subjecto," i.e. the accidents of bread do remain without a subject. Such, at least, was the opinion of contemporary theologians regarding the matter; and the Roman Catechism, referring to the above-mentioned canon of the Council of Trent, tersely, explains: "The accidents of bread and wine inhere in no substance, but continue existing by themselves." This being the case, some theologians in the seventeenth and eighteenth centuries, who inclined to Cartesianism, as E, Maignan, Drouin, and Vitasse, displayed but little theological penetration when they asserted that the Eucharistic appearances were optical illusions, phantasmagoria, and make-believe accidents, ascribing to Divine omnipotence an immediate influence

upon the five senses, whereby a mere subjective impression of what seemed to be the accidents of bread and wine was created. Since Descartes (d. 1650) places the essence of corporeal substance in its actual extension and recognizes only modal accidents metaphysically united to their substance, it is clear, according to his theory, that together with the conversion of the substance of bread and wine, the accidents must also be converted and thereby made to disappear. If the eye nevertheless seems to behold bread and wine, this is to be attributed to an optical illusion alone. But it is clear at first blush, that no doubt can be entertained as to the physical reality, or in fact, as to the identity of the accidents before and after Transubstantiation. This physical, and not merely optical, continuance of the Eucharistic accidents was repeatedly insisted upon by the Fathers, and with such excessive rigor that the notion of Transubstantiation seemed to be in danger. Especially against the Monophysites, who based on the Eucharistic conversion an a pari argument in behalf of the supposed conversion of the Humanity of Christ into His Divinity, did the Fathers retort by concluding from the continuance of the unconverted Eucharistic accidents to the unconverted Human Nature of Christ. Both philosophical and theological arguments were also advanced against the Cartesians, as, for instance, the infallible testimony of the senses, the necessity of the commune tertium to complete the idea of Transubstantiation [see above, (3)], the idea of the Sacrament of the Altar as the visible sign of Christ's invisible Body, the physical signification of Communion as a real partaking of food and drink the striking expression "breaking of bread" (*fractio panis*), which supposes the divisible reality of the accidents, etc. For all these reasons, theologians consider the physical reality of the accidents as an incontrovertible truth, which cannot without temerity be called in question.

As regards the philosophical possibility of the accidents existing without their substance, the older school drew a fine distinction between modal and absolute accidents. By the modal accidents were understood such as could not, being mere modes, be separated from their substance without involving a metaphysical contradiction, e.g. the form and motion of a body. Those accidents were designated absolute, whose objective reality was adequately distinct from the reality of their substance, in such a way that no intrinsic repugnance was involved in their separability, as, e.g., the quantity of a body. Aristotle, himself taught (*Metaphys.*, VI, 3rd ed. of Bekker, p. 1029, a. 13), that quantity was not a corporeal substance, but only a phenomenon of substance. Modern philosophy, on the other hand, has endeavored since the time of John Locke, to reject altogether from the realm of ideas the concept of substance as something imaginary, and to rest satisfied with qualities alone as the excitants of sensation, a view of the material world which the so-called psychology of association and actuality is trying to carry out in its various details. The Catholic Church does not feel called upon to follow

up the ephemeral vagaries of these new philosophical systems, but bases her doctrine on the everlasting philosophy of sound reason, which rightly distinguishes between the thing in itself and its characteristic qualities (color, form, size, etc.). Though the "thing in itself" may even remain imperceptible to the senses and therefore be designated in the language of Kant as a noumenon, or in the language of Spencer, the Unknowable, yet we cannot escape the necessity of seeking beneath the appearances the thing which appears, beneath the colour that which is colored beneath the form that which has form, i.e. the substratum or subject which sustains the phenomena. The older philosophy designated the appearances by the name of accidents, the subject of the appearances, by that of substance. It matters little what the terms are, provided the things signified by them are rightly understood. What is particularly important regarding material substances and their accidental qualities, is the necessity of proceeding cautiously in this discussion, since in the domain of natural philosophy the greatest uncertainty reigns even at the present day concerning the nature of matter, one system pulling down what another has reared, as is proved in the latest theories of atomism and energy, of ions and electrons.

The old theology tried with St. Thomas Aquinas (III:77) to prove the possibility of absolute accidents on the principles of the Aristotelean-Scholastic hylomorphism, i.e. the system which teaches that the essential constitution of bodies consists in the substantial union of *materia prima* and *forma substantialis*. Some theologians of today would seek to come to an understanding with modern science, which bases all natural processes upon the very fruitful theory of energy, by trying with Leibniz to explain the Eucharistic *accidentia sine subjecto* according to the dynamism of natural philosophy. Assuming, according to this system, a real distinction between force and its manifestations, between energy and its effects, it may be seen that under the influence of the First Cause the energy (substance) necessary for the essence of bread is withdrawn by virtue of conversion, while the effects of energy (accidents) in a miraculous manner continue. For the rest it may be said, that it is far from the Church's intention to restrict the Catholic's investigation regarding the doctrine of the Blessed Sacrament to any particular view of natural philosophy or even to require him to establish its truth on the principles of medieval physics; all that the Church demands is, that those theories of material substances be rejected which not only contradict the teaching of the Church, but also are repugnant to experience and sound reason, as Pantheism, Hylozoism, Monism, Absolute Idealism, Cartesianism, etc.

(b) The second problem arises from the Totality of Presence, which means that Christ in His entirety is present in the whole of the Host and in each smallest part thereof, as the spiritual soul is present in the human body [see above, (2)]. The difficulty reaches its climax when we consider that there is no question here of the Soul or the

Divinity of Christ, but of His Body, which, with its head, trunk, and members, has assumed a mode of existence spiritual and independent of space, a mode of existence, indeed, concerning which neither experience nor any system of philosophy can have the least inkling. That the idea of conversion of corporeal matter into a spirit can in no way be entertained, is clear from the material substance of the Eucharistic Body itself. Even the above-mentioned separability of quantity from substance gives us no clue to the solution, since according to the best founded opinions not only the substance of Christ's Body, but by His own wise arrangement, its corporeal quantity, i.e. its full size, with its complete organization of integral members and limbs, is present within the diminutive limits of the Host and in each portion thereof. Later theologians (as Rossignol, Legrand) resorted to the unseemly explanation, according to which Christ is present in diminished form and stature, a sort of miniature body; while others (as Oswald, Fernandez, Casajoana) assumed with no better sense of fitness the mutual compenetration of the members of Christ's Body to within the narrow compass of the point of a pin. The vagaries of the Cartesians, however, went beyond all bounds. Descartes had already, in a letter to P. Mesland (ed. Emery, Paris, 1811), expressed the opinion, that the identity of Christ's Eucharistic with His Heavenly Body was preserved by the identity of His Soul, which animated all the Eucharistic Bodies. On this basis, the geometrician Varignon suggested a true multiplication of the Eucharistic Bodies upon earth, which were supposed to be most faithful, though greatly reduced, miniature copies of the prototype, the Heavenly Body of Christ. Nor does the modern theory of n-dimensions throw any light upon the subject; for the Body of Christ is not invisible or impalpable to us because it occupies the fourth dimension, but because it transcends and is wholly independent of space. Such a mode of existence, it is clear, does not come within the scope of physics and mechanics, but belongs to a higher, supernatural order, even as does the Resurrection from the sealed tomb, the passing in and out through closed doors, the Transfiguration of the future glorified risen Body. What explanation may, then, be given of the fact?

The simplest treatment of the subject was that offered by the Schoolmen, especially St. Thomas (III:76:4), They reduced the mode of being to the mode of becoming, i.e. they traced back the mode of existence peculiar to the Eucharistic Body to the Transubstantiation; for a thing has to so "be" as it was in "becoming", Since *ex vi verborum* the immediate result is the presence of the Body of Christ, its quantity, present merely *per concomitantiam*, must follow the mode of existence peculiar to its substance, and, like the latter, must exist without division and extension, i.e. entirely in the whole Host and entirely in each part thereof. In other words, the Body of Christ is present in the sacrament, not after the manner of "quantity" (*per modum quantitatis*), but of "substance" (*per modum substantiæ*), Later Scholasticism (Bellarmine, Suarez, Billuart, and

others) tried to improve upon this explanation along other lines by distinguishing between internal and external quantity. By internal quantity (*quantitas interna seu in actu primo*) is understood that entity, by virtue of which a corporeal substance merely possesses "aptitudinal extension", i.e. the "capability" of being extended in tri-dimensional space. External quantity, on the other hand (*quantitas externa seu in actu secundo*), is the same entity, but in so far as it follows its natural tendency to occupy space and *actually* extends itself in the three dimensions. While aptitudinal extension or internal quantity is so bound up with the essences of bodies that its separability from them involves a metaphysical contradiction, external quantity is, on the other hand, only a natural consequence and effect, which can be so suspended and withheld by the First Cause, that the corporeal substance, retaining its internal quantity, does not extend itself into space. At all events, however plausibly reason may seem to explain the matter, it is nevertheless face to face with a great mystery.

(c) The third and last question has to do with the multilocation of Christ in heaven and upon thousands of altars throughout the world. Since in the natural order of events each body is restricted to one position in space (*unilocatio*), so that before the law proof of an alibi immediately frees a person from the suspicion of crime, multilocation without further question belongs to the supernatural order. First of all, no intrinsic repugnance can be shown in the concept of multilocation. For if the objection be raised, that no being can exist separated from itself or show forth local distances between its various selves, the sophism is readily detected; for multilocation does not multiply the individual object, but only its external relation to and presence in space. Philosophy distinguishes two modes of presence in creatures:

- the circumscriptive, and
- the definitive.

The first, the only mode of presence proper to bodies, is that by virtue of which an object is confined to a determinate portion of space in such wise that its various parts (atoms, molecules, electrons) also occupy their corresponding positions in that space. The second mode of presence, that properly belonging to a spiritual being, requires the substance of a thing to exist in its entirety in the whole of the space, as well as whole and entire in each part of that space. The latter is the soul's mode of presence in the human body. The distinction made between these two modes of presence is important, inasmuch as in the Eucharist both kinds are found in combination. For, in the first place, there is verified a *continuous* definitive multilocation, called also replication, which consists in this, that the Body of Christ is totally present in each part of the continuous and as yet unbroken Host and also totally present throughout

the whole Host, just as the human soul is present in the body. And precisely this latter analogy from nature gives us an insight into the possibility of the Eucharistic miracle. For if, as has been seen above, Divine omnipotence can in a supernatural manner impart to a body such a spiritual, unextended, spatially uncircumscribed mode of presence, which is natural to the soul as regards the human body, one may well surmise the possibility of Christ's Eucharistic Body being present in its entirety in the whole Host, and whole and entire in each part thereof.

There is, moreover, the *discontinuous* multilocation, whereby Christ is present not only in one Host, but in numberless separate Hosts, whether in the ciborium or upon all the altars throughout the world. The intrinsic possibility of discontinuous multilocation seems to be based upon the non-repugnance of continuous multilocation. For the chief difficulty of the latter appears to be that the same Christ is present in two different parts, A and B, of the continuous Host, it being immaterial whether we consider the distant parts A and B joined by the continuous line AB or not. The marvel does not substantially increase, if by reason of the breaking of the Host, the two parts A and B are now completely separated from each other. Nor does it matter how great the distance between the parts may be. Whether or not the fragments of a Host are distant one inch or a thousand miles from one another is altogether immaterial in this consideration; we need not wonder, then, if Catholics adore their Eucharistic Lord at one and the same time in New York, London, and Paris. Finally, mention must be made of *mixed* multilocation, since Christ with His natural dimensions reigns in heaven, whence he does not depart, and at the same time dwells with His Sacramental Presence in numberless places throughout the world. This third case would be in perfect accordance with the two foregoing, were we *per impossible* permitted to imagine that Christ were present under the appearances of bread exactly as He is in heaven and that He had relinquished His natural mode of existence. This, however, would be but one more marvel of God's omnipotence. Hence no contradiction is noticeable in the fact, that Christ retains His natural dimensional relations in heaven and at the same time takes up His abode upon the altars of earth.

There is, furthermore, a fourth kind of multilocation, which, however, has not been realized in the Eucharist, but would be, if Christ's Body were present in its natural mode of existence both in heaven and on earth. Such a miracle might be assumed to have occurred in the conversion of St. Paul before the gates of Damascus, when Christ in person said to him: "Saul, Saul, why persecutest thou me?" So too the bilocation of saints, sometimes read of in the pages of hagiography, as, e.g., in the case of St. Alphonsus Liguori, cannot be arbitrarily cast aside as untrustworthy. The Thomists and some later theologians, it is true, reject this kind of multilocation as intrinsically impossible and declare bilocation to be nothing more than an "apparition" without corporeal

presence. But Cardinal De Lugo is of opinion, and justly so, that to deny its possibility might reflect unfavorably upon the Eucharistic multilocation itself. If there were question of the vagaries of many Nominalists, as, e.g., that a bilocated person could be living in Paris and at the same time dying in London, hating in Paris and at the same time loving in London, the impossibility would be as plain as day, since an individual, remaining such as he is, cannot be the subject of contrary propositions, since they exclude one another. The case assumes a different aspect, when wholly external contrary propositions, relating to position in space, are used in reference to the bilocated individual. In such a bilocation, which leaves the principle of contradiction intact, it would be hard to discover an intrinsic impossibility.

J. POHLE

The Blessed Eucharist as a Sacrament

The Blessed Eucharist as a Sacrament

Since Christ is present under the appearances of bread and wine in a sacramental way, the Blessed Eucharist is unquestionably a sacrament of the Church. Indeed, in the Eucharist the definition of a Christian sacrament as "an outward sign of an inward grace instituted by Christ" is verified.

The investigation into the precise nature of the Blessed Sacrament of the Altar, whose existence Protestants do not deny, is beset with a number of difficulties. Its essence certainly does not consist in the Consecration or the Communion, the former being merely the sacrificial action, the latter the reception of the sacrament, and not the sacrament itself. The question may eventually be reduced to this whether or not the sacramentality is to be sought for in the Eucharistic species or in the Body and Blood of Christ hidden beneath them. The majority of theologians rightly respond to the query by saying, that neither the species themselves nor the Body and Blood of Christ by themselves, but the union of both factors constitute the moral whole of the Sacrament of the Altar. The species undoubtedly belong to the essence of the sacrament, since it is by means of them, and not by means of the invisible Body of Christ, that the Eucharist possesses the outward sign of the sacrament. Equally certain is it, that the Body and the Blood of Christ belong to the concept of the essence, because it is not the mere unsubstantial appearances which are given for the food of our souls but Christ concealed beneath the appearances. The twofold number of the Eucharistic elements of bread and wine does not interfere with the unity of the sacrament; for the idea of refectio embraces both eating and drinking, nor do our meals in consequence double their number. In the doctrine of the Holy Sacrifice of the Mass, there is a question of even higher relation, in that the separated species of bread and wine also represent the

mystical separation of Christ's Body and Blood or the unbloody Sacrifice of the Eucharistic Lamb. The Sacrament of the Altar may be regarded under the same aspects as the other sacraments, provided only it be ever kept in view that the Eucharist is a permanent sacrament. Every sacrament may be considered either in itself or with reference to the persons whom it concerns.

Passing over the Institution, which is discussed elsewhere in connection with the words of Institution, the only essentially important points remaining are the outward sign (matter and form) and inward grace (effects of Communion), to which may be added the necessity of Communion for salvation. In regard to the persons concerned, we distinguish between the minister of the Eucharist and its recipient or subject.

(1) The Matter or Eucharistic Elements

There are two Eucharistic elements, bread and wine, which constitute the remote matter of the Sacrament of the Altar, while the proximate matter can be none other than the Eucharistic appearances under which the Body and Blood of Christ are truly present.

(a) The first element is wheaten bread (*panis triticeus*), without which the "confection of the Sacrament does not take place" (Missale Romanum: De defectibus, sect. 3), Being true bread, the Host must be baked, since mere flour is not bread. Since, moreover, the bread required is that formed of wheaten flour, not every kind of flour is allowed for validity, such, e.g., as is ground from rye, oats, barley, Indian corn or maize, though these are all botanically classified as grain (*frumentum*), On the other hand, the different varieties of wheat (as spelt, amel-corn, etc.) are valid, inasmuch as they can be proved botanically to be genuine wheat. The necessity of wheaten bread is deduced immediately from the words of Institution: "The Lord took bread" (*ton arton*), in connection with which it may be remarked, that in Scripture *bread* (*artos*), without any qualifying addition, always signifies wheaten bread. No doubt, too, Christ adhered unconditionally to the Jewish custom of using only wheaten bread in the Passover Supper, and by the words, "Do this for a commemoration of me", commanded its use for all succeeding times. In addition to this, uninterrupted tradition, whether it be the testimony of the Fathers or the practice of the Church, shows wheaten bread to have played such an essential part, that even Protestants would be loath to regard rye bread or barley bread as a proper element for the celebration of the Lord's Supper.

The Church maintains an easier position in the controversy respecting the use of fermented or unfermented bread. By leavened bread (*fermentum, zymos*) is meant such wheaten bread as requires leaven or yeast in its preparation and baking, while unleavened bread (*azyma, azymon*) is formed from a mixture of wheaten flour and water, which has been kneaded to dough and then baked. After the Greek Patriarch Michael Cærularius of Constantinople had sought in 1053 to palliate the renewed

rupture with Rome by means of the controversy, concerning unleavened bread, the two Churches, in the Decree of Union at Florence, in 1439, came to the unanimous dogmatic decision, that the distinction between leavened and unleavened bread did not interfere with the confection of the sacrament, though for just reasons based upon the Church's discipline and practice, the Latins were obliged to retain unleavened bread, while the Greeks still held on to the use of leavened (cf. Denzinger, *Enchirid.*, Freiburg, 1908, no. 692). Since the Schismatics had before the Council of Florence entertained doubts as to the validity of the Latin custom, a brief defense of the use of unleavened bread will not be out of place here. Pope Leo IX had as early as 1054 issued a protest against Michael Cærolarius (cf. Migne, P. L., CXLIII, 775), in which he referred to the Scriptural fact, that according to the three Synoptics the Last Supper was celebrated "on the first day of the azymes" and so the custom of the Western Church received its solemn sanction from the example of Christ Himself. The Jews, moreover, were accustomed even the day before the fourteenth of Nisan to get rid of all the leaven which chanced to be in their dwellings, that so they might from that time on partake exclusively of the so-called *mazzoth* as bread. As regards tradition, it is not for us to settle the dispute of learned authorities, as to whether or not in the first six or eight centuries the Latins also celebrated Mass with leavened bread (Sirmond, Döllinger, Kraus) or have observed the present custom ever since the time of the Apostles (Mabillon, Probst). Against the Greeks it suffices to call attention to the historical fact that in the Orient the Maronites and Armenians have used unleavened bread from time immemorial, and that according to Origen (In Matt., XII, n. 6) the people of the East "sometimes", therefore not as a rule, made use of leavened bread in their Liturgy. Besides, there is considerable force in the theological argument that the fermenting process with yeast and other leaven, does not affect the substance of the bread, but merely its quality. The reasons of congruity advanced by the Greeks in behalf of leavened bread, which would have us consider it as a beautiful symbol of the hypostatic union, as well as an attractive representation of the savor of this heavenly Food, will be most willingly accepted, provided only that due consideration be given to the grounds of propriety set forth by the Latins with St. Thomas Aquinas (III:74:4) namely, the example of Christ, the aptitude of unleavened bread to be regarded as a symbol of the purity of His Sacred Body, free from all corruption of sin, and finally the instruction of St. Paul (I Cor., v,8) to keep the Pasch not with the leaven of malice and wickedness, but with the unleavened bread of sincerity and truth".

(b) The second Eucharistic element required is wine of the grape (*vinum de vite*). Hence are excluded as invalid, not only the juices extracted and prepared from other fruits (as cider and perry), but also the so-called artificial wines, even if their chemical constitution is identical with the genuine juice of the grape. The necessity of wine of

the grape is not so much the result of the authoritative decision of the Church, as it is presupposed by her (Council of Trent, Sess. XIII, cap. iv), and is based upon the example and command of Christ, Who at the Last Supper certainly converted the natural wine of grapes into His Blood, This is deduced partly from the rite of the Passover, which required the head of the family to pass around the "cup of benediction" (*calix benedictionis*) containing the wine of grapes, partly, and especially, from the express declaration of Christ, that henceforth He would not drink of the "fruit of the vine" (*genimen vitis*). The Catholic Church is aware of no other tradition and in this respect she has ever been one with the Greeks. The ancient Hydroparastatæ, or Aquarians, who used water instead of wine, were heretics in her eyes. The counter-argument of Ad. Harnack ["Texte und Untersuchungen", new series, VII, 2 (1891), 115 sqq.], that the most ancient of Churches was indifferent as to the use of wine, and more concerned with the action of eating and drinking than with the elements of bread and wine, loses all its force in view not only of the earliest literature on the subject (the Didache, Ignatius, Justin, Irenæus, Clement of Alexandria, Origen, Hippolytus, Tertullian, and Cyprian), but also of non-Catholic and apocryphal writings, which bear testimony to the use of bread and wine as the only and necessary elements of the Blessed Sacrament. On the other hand, a very ancient law of the Church which, however, has nothing to do with the validity of the sacrament, prescribes that a little water be added to the wine before the Consecration (Decr. pro Armenis: *aqua modicissima*), a practice, whose legitimacy the Council of Trent (Sess. XXII, can. ix) established under pain of anathema. The rigor of this law of the Church may be traced to the ancient custom of the Romans and Jews, who mixed water with the strong southern wines (see [Proverbs 9:2](#)), to the expression of *calix mixtus* found in Justin (Apol., I, lxxv), Irenæus (Adv. hæ., V, ii, 3), and Cyprian (Ep. lxxiii, ad Cæcil., n. 13 sq.), and especially to the deep symbolical meaning contained in the mingling, inasmuch as thereby are represented the flowing of blood and water from the side of the Crucified Savior and the intimate union of the faithful with Christ (cf. Council of Trent, Sess. XXII, cap. vii).

(2) The Sacramental Form or the Words of Consecration

In proceeding to verify the form, which is always made up of words, we may start from the dubitable fact, that Christ did not consecrate by the mere fiat of His omnipotence, which found no expression in articulate utterance, but by pronouncing the words of Institution: "This is my body . . . this is my blood", and that by the addition: "Do this for a commemoration of me", He commanded the Apostles to follow His example. Were the words of Institution a mere declarative utterance of the conversion, which might have taken place in the "benediction" unannounced and articulately unexpressed, the Apostles and their successors would, according to Christ's example and mandate, have been obliged to consecrate in this mute manner also, a consequence

which is altogether at variance with the deposit of faith. It is true, that Pope Innocent III (*De Sacro altaris myst.*, IV, vi) before his elevation to the pontificate did hold the opinion, which later theologians branded as "temerarious", that Christ consecrated without words by means of the mere "benediction". Not many theologians, however, followed him in this regard, among the few being Ambrose Catharinus, Cheffontaines, and Hoppe, by far the greater number preferring to stand by the unanimous testimony of the Fathers. Meanwhile, Innocent III also insisted most urgently that at least in the case of the celebrating priest, the words of Institution were prescribed as the sacramental form. It was, moreover, not until its comparatively recent adherence in the seventeenth century to the famous "*Confessio fidei orthodoxa*" of Peter Mogilas (cf. Kimmel, "*Monum. fidei eccl. orient.*", Jena, 1850, I, p. 180), that the Schismatical Greek Church adopted the view, according to which the priest does not at all consecrate by virtue of the words of Institution, but only by means of the Epiklesis occurring shortly after them and expressing in the Oriental Liturgies a petition to the Holy Spirit, "that the bread and wine may be converted into the Body and Blood of Christ". Were the Greeks justified in maintaining this position, the immediate result would be, that the Latins who have no such thing as the Epiklesis in their present Liturgy, would possess neither the true Sacrifice of the Mass nor the Holy Eucharist. Fortunately, however, the Greeks can be shown the error of their ways from their own writings, since it can be proved, that they themselves formerly placed the form of Transubstantiation in the words of Institution. Not only did such renowned Fathers as Justin (*Apol.*, I, lxvi), Irenæus (*Adv. hæc.*, V, ii, 3), Gregory of Nyssa (*Or. catech.*, xxxvii), Chrysostom (*Hom. i. de prod. Judæ*, n. 6), and John Damascene (*De fid. orth.*, IV, xiii) hold this view, but the ancient Greek Liturgies bear testimony to it, so that Cardinal Bessarion in 1439 at Florence called the attention of his fellow-countrymen to the fact, that as soon as the words of Institution have been pronounced, supreme homage and adoration are due to the Holy Eucharist, even though the famous Epiklesis follows some time after.

The objection that the mere historical recitation of the words of Institution taken from the narrative of the Last Supper possesses no intrinsic consecratory force, would be well founded, did the priest of the Latin Church merely intend by means of them to narrate some historical event rather than pronounce them with the practical purpose of effecting the conversion, or if he pronounced them in his own name and person instead of the Person of Christ, whose minister and instrumental cause he is. Neither of the two suppositions holds in the case of a priest who really intends to celebrate Mass. Hence, though the Greeks may in the best of faith go on erroneously maintaining that they consecrate exclusively in their Epiklesis, they do, nevertheless, as in the case of the Latins, actually consecrate by means of the words of Institution contained in their Liturgies, if Christ has instituted these words as the words of Consecration and

the form of the sacrament. We may in fact go a step farther and assert, that the words of Institution constitute the only and wholly adequate form of the Eucharist and that, consequently, the words of the Epiklesis possess no inherent consecratory value. The contention that the words of the Epiklesis have joint essential value and constitute the partial form of the sacrament, was indeed supported by individual Latin theologians, as Toutée, Renaudot, and Lebrun. Though this opinion cannot be condemned as erroneous in faith, since it allows to the words of Institution their essential, though partial, consecratory value, appears nevertheless to be intrinsically repugnant. For, since the act of Consecration cannot remain, as it were, in a state of suspense, but is completed in an instant of time, there arises the dilemma: Either the words of Institution alone and, therefore, not the Epiklesis, are productive of the conversion, or the words of the Epiklesis alone have such power and not the words of Institution. Of more considerable importance is the circumstance that the whole question came up for discussion in the council for union held at Florence in 1439. Pope Eugene IV urged the Greeks to come to a unanimous agreement with the Roman faith and subscribe to the words of Institution as alone constituting the sacramental form, and to drop the contention that the words of the Epiklesis also possessed a partial consecratory force. But when the Greeks, not without foundation, pleaded that a dogmatic decision would reflect with shame upon their whole ecclesiastical past, the ecumenical synod was satisfied with the oral declaration of Cardinal Bessarion recorded in the minutes of the council for 5 July, 1439 (P. G., CLXI, 491), namely, that the Greeks follow the universal teaching of the Fathers, especially of "blessed John Chrysostom, familiarly known to us", according to whom the "Divine words of Our Redeemer contain the full and entire force of Transubstantiation".

The venerable antiquity of the Oriental Epiklesis, its peculiar position in the Canon of the Mass, and its interior spiritual unction, oblige the theologian to determine its dogmatic value and to account for its use. Take, for instance, the Epiklesis of the Ethiopian Liturgy: "We implore and beseech Thee, O Lord, to send forth the Holy Spirit and His Power upon this Bread and Chalice and convert them into the Body and Blood of Our Lord Jesus Christ." Since this prayer always follows after the words of Institution have been pronounced, the theological question arises, as to how it may be made to harmonize with the words of Christ, which alone possess the consecrated power. Two explanations have been suggested which, however, can be merged in one. The first view considers the Epiklesis to be a mere declaration of the fact, that the conversion has already taken place, and that in the conversion just as essential a part is to be attributed to the Holy Spirit as Co-Consecrator as in the allied mystery of the Incarnation. Since, however, because of the brevity of the actual instant of conversion, the part taken by the Holy Spirit could not be expressed, the Epiklesis takes us back

in imagination to the precious moment and regards the Consecration as just about to occur. A similar purely psychological retrospective transfer is met with in other portions of the Liturgy, as in the Mass for the Dead, wherein the Church prays for the departed as if they were still upon their bed of agony and could still be rescued from the gates of hell. Thus considered, the Epiklesis refers us back to the Consecration as the center about which all the significance contained in its words revolves. A second explanation is based, not upon the enacted Consecration, but upon the approaching Communion, inasmuch as the latter, being the effective means of uniting us more closely in the organized body of the Church, brings forth in our hearts the mystical Christ, as is read in the Roman Canon of the Mass: "Ut *nobis* corpus et sanguis fiat", i.e. that it may be made *for us* the body and blood. It was in this purely mystical manner that the Greeks themselves explained the meaning of the Epiklesis at the Council of Florence (Mansi, Collect. Concil., XXXI, 106). Yet since much more is contained in the plain words than this true and deep mysticism, it is desirable to combine both explanations into one, and so we regard the Epiklesis, both in point of liturgy and of time, as the significant connecting link, placed midway between the Consecration and the Communion in order to emphasize the part taken by the Holy Spirit in the Consecration of bread and wine, and, on the other hand, with the help of the same Holy Spirit to obtain the realization of the true Presence of the Body and Blood of Christ by their fruitful effects on both priest and people.

(3) The Effects of the Holy Eucharist

The doctrine of the Church regarding the effects or the fruits of Holy Communion centres around two ideas: (a) the union with Christ by love and (b) the spiritual repast of the soul. Both ideas are often verified in one and same effect of Holy Communion.

(a) The union with Christ by love

The first and principal effect of the Holy Eucharist is union with Christ by love (Decr. pro Armenis: *adunatio ad Christum*), which union as such does not consist in the sacramental reception of the Host, but in the spiritual and mystical union with Jesus by the theological virtue of love. Christ Himself designated the idea of Communion as a union love: "He that eateth my flesh, and drinketh blood, abideth in me, and I in him" (John, vi, 57). St. Cyril of Alexandria (Hom. in Joan., IV, xvii) beautifully represents this mystical union as the fusion of our being into that of the God-man, as "when melted wax is fused with other wax". Since the Sacrament of Love is not satisfied with an increase of habitual love only, but tends especially to fan the flame of actual love to an intense ardor, the Holy Eucharist is specifically distinguished from the other sacraments, and hence it is precisely in this latter effect that Suarez, recognizes the so-called "grace of the sacrament", which otherwise is so hard to discern. It stands to reason that the essence of this union by love consists neither in a natural union with

Jesus analogous to that between soul and body, nor in a hypostatic union of the soul with the Person of the Word, nor finally in a pantheistical deification of the communicant, but simply in a moral but wonderful union with Christ by the bond of the most ardent charity. Hence the chief effect of a worthy Communion is to a certain extent a foretaste of heaven, in fact the anticipation and pledge of our future union with God by love in the Beatific Vision. He alone can properly estimate the precious boon which Catholics possess in the Holy Eucharist, who knows how to ponder these ideas of Holy Communion to their utmost depth. The immediate result of this union with Christ by love is the bond of charity existing between the faithful themselves as St. Paul says: "For we being many, are one bread, one body, all that partake of one bread" (I Cor., x, 17). And so the Communion of Saints is not merely an ideal union by faith and grace, but an eminently real union, mysteriously constituted, maintained, and guaranteed by partaking in common of one and the same Christ.

(b) The spiritual repast of the soul

A second fruit of this union with Christ by love is an increase of sanctifying grace in the soul of the worthy communicant. Here let it be remarked at the outset, that the Holy Eucharist does not *per se* constitute a person in the state of grace as do the sacraments of the dead (baptism and penance), but presupposes such a state. It is, therefore, one of the sacraments of the living. It is as impossible for the soul in the state of mortal sin to receive this Heavenly Bread with profit, as it is for a corpse to assimilate food and drink. Hence the Council of Trent (Sess. XIII. can. v), in opposition to Luther and Calvin, purposely defined, that the "chief fruit of the Eucharist does not consist in the forgiveness of sins". For though Christ said of the Chalice: "This is my blood of the new testament, which shall be shed for many unto remission of sins" (Matt., xxvi, 28), He had in view an effect of the sacrifice, not of the sacrament; for He did not say that His Blood would be drunk unto remission of sins, but shed for that purpose. It is for this very reason that St. Paul (I Cor., xi, 28) demands that rigorous "self-examination", in order to avoid the heinous offense of being guilty of the Body and the Blood of the Lord by "eating and drinking unworthily", and that the Fathers insist upon nothing so energetically as upon a pure and innocent conscience. In spite of the principles just laid down, the question might be asked, if the Blessed Sacrament could not at times *per accidens* free the communicant from mortal sin, if he approached the Table of the Lord unconscious of the sinful state of his soul. Presupposing what is self-evident, that there is question neither of a conscious sacrilegious Communion nor a lack of imperfect contrition (*attritio*), which would altogether hinder the justifying effect of the sacrament, theologians incline to the opinion, that in such exceptional cases the Eucharist can restore the soul to the state of grace, but all without exception deny the possibility of the reviviscence of a sacrilegious or unfruitful Communion after the restoration of

the soul's proper moral condition has been effected, the Eucharist being different in this respect from the sacraments which imprint a character upon the soul (baptism, confirmation, and Holy orders). Together with the increase of sanctifying grace there is associated another effect, namely, a certain spiritual relish or delight of soul (*delectatio spiritualis*). Just as food and drink delight and refresh the heart of man, so does this "Heavenly Bread containing within itself all sweetness" produce in the soul of the devout communicant ineffable bliss, which, however, is not to be confounded with an emotional joy of the soul or with sensible sweetness. Although both may occur as the result of a special grace, its true nature is manifested in a certain cheerful and willing fervor in all that regards Christ and His Church, and in the conscious fulfillment of the duties of one's state of life, a disposition of soul which is perfectly compatible with interior desolation and spiritual dryness. A good Communion is recognized less in the transitory sweetness of the emotions than in its lasting practical effects on the conduct of our daily lives.

(c) Forgiveness of venial sin and preservation from mortal sin

Though Holy Communion does not *per se* remit mortal sin, it has nevertheless the third effect of "blotting out venial sin and preserving the soul from mortal sin" (Council of Trent, Sess. XIII, cap. ii). The Holy Eucharist is not merely a food, but a medicine as well. The destruction of venial sin and of all affection to it, is readily understood on the basis of the two central ideas mentioned above. Just as material food banishes minor bodily weaknesses and preserves man's physical strength from being impaired, so does this food of our souls remove our lesser spiritual ailments and preserve us from spiritual death. As a union based upon love, the Holy Eucharist cleanses with its purifying flame the smallest stains which adhere to the soul, and at the same time serves as an effective prophylactic against grievous sin. It only remains for us to ascertain with clearness the manner in which this preservative influence against relapse into mortal sin is exerted. According to the teaching of the Roman Catechism, it is effected by the allaying of concupiscence, which is the chief source of deadly sin, particularly of impurity. Therefore it is that spiritual writers recommend frequent Communion as the most effective remedy against impurity, since its powerful influence is felt even after other means have proved unavailing (cf. St. Thomas: III:79:6). Whether or not the Holy Eucharist is directly conducive to the remission of the temporal punishment due to sin, is disputed by St. Thomas (III:79:5), since the Blessed Sacrament of the Altar was not instituted as a means of satisfaction; it does, however, produce an indirect effect in this regard, which is proportioned to the communicant's love and devotion. The case is different as regards the effects of grace in behalf of a third party. The pious custom of the faithful of "offering their Communion" for relations, friends, and the souls departed, is to be considered as possessing unquestionable value, in the

first place, because an earnest prayer of petition in the presence of the Spouse of our souls will readily find a hearing, and then, because the fruits of Communion as a means of satisfaction for sin may be applied to a third person, and especially *per modum suffragii* to the souls in purgatory.

(d) The pledge of our resurrection

As a last effect we may mention that the Eucharist is the "pledge of our glorious resurrection and eternal happiness" (Council of Trent, Sess. XIII, cap. ii), according to the promise of Christ: "He that eateth my flesh and drinketh my blood, hath everlasting life: and I will raise him up on the last day." Hence the chief reason why the ancient Fathers, as Ignatius (Ephes., 20), Irenæus (Adv. haer., IV, xviii, 4), and Tertullian (De resurr. carn., viii), as well as later patristic writers, insisted so strongly upon our future resurrection, was the circumstance that it is the door by which we enter upon unending happiness. There can be nothing incongruous or improper in the fact that the body also shares in this effect of Communion, since by its physical contact with the Eucharist species, and hence (indirectly) with the living Flesh of Christ, it acquires a moral right to its future resurrection, even as the Blessed Mother of God, inasmuch as she was the former abode of the Word made flesh, acquired a moral claim to her own bodily assumption into heaven. The further discussion as to whether some "physical quality" (Contenson) or a "sort of germ of immortality" (Heimbucher) is implanted in the body of the communicant, has no sufficient foundation in the teaching of the Fathers and may, therefore, be dismissed without any injury to dogma.

(4) The Necessity of the Holy Eucharist for Salvation

We distinguish two kinds of necessity,

- the necessity of means (*necessitas medii*) and
- the necessity of precept (*necessitas præcepti*).

In the first sense a thing or action is necessary because without it a given end cannot be attained; the eye, e.g. is necessary for vision. The second sort of necessity is that which is imposed by the free will of a superior, e.g. the necessity of fasting. As regards Communion a further distinction must be made between infants and adults. It is easy to prove that in the case of infants Holy Communion is not necessary to salvation, either as a means or as of precept. Since they have not as yet attained to the use of reason, they are free from the obligation of positive laws; consequently, the only question is whether Communion is, like Baptism, necessary for them as a means of salvation. Now the Council of Trent under pain of anathema, solemnly rejects such a necessity (Sess. XXI, can. iv) and declares that the custom of the primitive Church of giving Holy Communion to children was not based upon the erroneous belief of its

necessity to salvation, but upon the circumstances of the times (Sess. XXI, cap. iv). Since according to St. Paul's teaching (Rom., viii, 1) there is "no condemnation" for those who have been baptized, every child that dies in its baptismal innocence, even without Communion, must go straight to heaven. This latter position was that usually taken by the Fathers, with the exception of St. Augustine, who from the universal custom of the Communion of children drew the conclusion of its necessity for salvation (*see* COMMUNION OF CHILDREN). On the other hand, Communion is prescribed for adults, not only by the law of the Church, but also by a Divine command (John, vi, 50 sqq.), though for its absolute necessity as a means to salvation there is no more evidence than in the case of infants. For such a necessity could be established only on the supposition that Communion per se constituted a person in the state of grace or that this state could not be preserved without Communion. Neither supposition is correct. Not the first, for the simple reason that the Blessed Eucharist, being a sacrament of the living, presupposes the state of sanctifying grace; not the second, because in case of necessity, such as might arise, e.g., in a long sea-voyage, the Eucharistic graces may be supplied by actual graces. It is only when viewed in this light that we can understand how the primitive Church, without going counter to the Divine command, withheld the Eucharist from certain sinners even on their deathbeds. There is, however, a moral necessity on the part of adults to receive Holy Communion, as a means, for instance, of overcoming violent temptation, or as a viaticum for persons in danger of death. Eminent divines, like Suarez, claim that the Eucharist, if not absolutely necessary, is at least a relatively and morally necessary means to salvation, in the sense that no adult can long sustain his spiritual, supernatural life who neglects on principle to approach Holy Communion. This view is supported, not only by the solemn and earnest words of Christ, when He Promised the Eucharist, and by the very nature of the sacrament as the spiritual food and medicine of our souls, but also by the fact of the helplessness and perversity of human nature and by the daily experience of confessors and directors of souls.

Since Christ has left us no definite precept as to the frequency with which He desired us to receive Him in Holy Communion, it belongs to the Church to determine the Divine command more accurately and prescribe what the limits of time shall be for the reception of the sacrament. In the course of centuries the Church's discipline in this respect has undergone considerable change. Whereas the early Christians were accustomed to receive at every celebration of the Liturgy, which probably was not celebrated daily in all places, or were in the habit of Communicating privately in their own homes every day of the week, a falling-off in the frequency of Communion is noticeable since the fourth century. Even in his time Pope Fabian (236-250) made it obligatory to approach the Holy Table three times a year, viz, at Christmas, Easter,

and Pentecost, and this custom was still prevalent in the sixth century [cf. Synod of Agde (506), c. xviii]. Although St. Augustine left daily Communion to the free choice of the individual, his admonition, in force even at the present day, was: *Sic vive, ut quotidie possis sumere* (De dono persev., c. xiv), i e "So live that you may receive every day." From the tenth to the thirteenth century, the practice of going to Communion more frequently during the year was rather rare among the laity and obtained only in cloistered communities. St. Bonaventure reluctantly allowed the lay brothers of his monastery to approach the Holy Table weekly, whereas the rule of the Canons of Chrodegang prescribed this practice. When the Fourth Council of Lateran (1215), held under Innocent III, mitigated the former severity of the Church's law to the extent that all Catholics of both sexes were to communicate at least once a year and this during the paschal season, St. Thomas (III:80:10) ascribed this ordinance chiefly to the "reign of impiety and the growing cold of charity". The precept of the yearly paschal Communion was solemnly reiterated by the Council of Trent (Sess. XIII, can. ix). The mystical theologians of the later Middle Ages, as Tauler, St. Vincent Ferrer, Savonarola, and later on St Philip Neri, the Jesuit Order, St. Francis de Sales and St. Alphonsus Liguori were zealous champions of frequent Communion; whereas the Jansenists, under the leadership of Antoine Arnauld (De la fréquente communion, Paris, 1643), strenuously opposed and demanded as a condition for every Communion the "most perfect penitential dispositions and the purest love of God". This rigorism was condemned by Pope Alexander VIII (7 Dec., 1690); the Council Trent (Sess. XIII, cap. viii; Sess. XXII, cap. vi) and Innocent XI (12 Feb., 1679) had already emphasized the permissibility of even daily Communion. To root out the last vestiges of Jansenistic rigorism, Pius X issued a decree (24 Dec., 1905) wherein he allows and recommends daily Communion to the entire laity and requires but two conditions for its permissibility, namely, the state of grace and a right and pious intention. Concerning the non-requirement of the twofold species as a means necessary to salvation see COMMUNION UNDER BOTH KINDS.

(5) The Minister of the Eucharist

The Eucharist being a permanent sacrament, and the confection (*confectio*) and the reception (*susceptio*) thereof being separated from each other by an interval of time, the minister may be and in fact is twofold: (a) the minister of consecration and (b) the minister of administration.

(a) The minister of consecration

In the early Christian Era the Peputians, Collyridians, and Montanists attributed priestly powers even to women (cf. Epiphanius, De hær., xlix, 79); and in the Middle Ages the Albigenses and Waldenses ascribed the power to consecrate to every layman of upright disposition. Against these errors the Fourth Lateran Council (1215) con-

firmed the ancient Catholic teaching, that "no one but the priest [*sacerdos*], regularly ordained according to the keys of the Church, has the power of consecrating this sacrament". Rejecting the hierarchical distinction between the priesthood and the laity, Luther later on declared, in accord with his idea of a "universal priesthood" (cf. I Peter, ii, 5), that every layman was qualified, as the appointed representative of the faithful, to consecrate the Sacrament of the Eucharist. The Council of Trent opposed this teaching of Luther, and not only confirmed anew the existence of a "special priesthood" (Sess. XXIII, can. i), but authoritatively declared that "Christ ordained the Apostles true priests and commanded them as well as other priests to offer His Body and Blood in the Holy Sacrifice of the Mass" (Sess. XXII, can. ii). By this decision it was also declared that the power of consecrating and that of offering the Holy Sacrifice are identical. Both ideas are mutually reciprocal. To the category of "priests" (*sacerdos, iereus*) belong, according to the teaching of the Church, only bishops and priests; deacons, subdeacons, and those in minor orders are excluded from this dignity.

Scripturally considered, the necessity of a special priesthood with the power of validly consecrating is derived from the fact that Christ did not address the words, "Do this", to the whole mass of the laity, but exclusively to the Apostles and their successors in the priesthood; hence the latter alone can validly consecrate. It is evident that tradition has understood the mandate of Christ in this sense and in no other. We learn from the writings of Justin, Origen, Cyprian, Augustine, and others, as well as from the most ancient Liturgies, that it was always the bishops and priests, and they alone, who appeared as the property constituted celebrants of the Eucharistic Mysteries, and that the deacons merely acted as assistants in these functions, while the faithful participated passively therein. When in the fourth century the abuse crept in of priests receiving Holy Communion at the hands of deacons, the First Council of Nicæa (325) issued a strict prohibition to the effect, that "they who offer the Holy Sacrifice shall not receive the Body of the Lord from the hands of those who have no such power of offering", because such a practice is contrary to "rule and custom". The sect of the Luciferians was founded by an apostate deacon named Hilary, and possessed neither bishops nor priests; wherefore St. Jerome concluded (*Dial. adv. Lucifer.*, n. 21), that for want of celebrants they no longer retained the Eucharist. It is clear that the Church has always denied the laity the power to consecrate. When the Arians accused St. Athanasius (d. 373) of sacrilege, because supposedly at his bidding the consecrated Chalice had been destroyed during the Mass which was being celebrated by a certain Ischares, they had to withdraw their charges as wholly untenable when it was proved that Ischares had been invalidly ordained by a pseudo-bishop named Colluthos and, therefore, could neither validly consecrate nor offer the Holy Sacrifice.

(b) The minster of administration

The dogmatic interest which attaches to the minister of administration or distribution is not so great, for the reason that the Eucharist being a permanent sacrament, any communicant having the proper dispositions could receive it validly, whether he did so from the hand of a priest, or layman, or woman. Hence, the question is concerned, not with the validity, but with the liceity of administration. In this matter the Church alone has the right to decide, and her regulations regarding the Communion rite may vary according to the circumstances of the times. In general it is of Divine right, that the laity should as a rule receive only from the consecrated hand of the priest (cf. Trent, Sess. XIII, cap. viii). The practice of the laity giving themselves Holy Communion was formerly, and is today, allowed only in case of necessity. In ancient Christian times it was customary for the faithful to take the Blessed Sacrament to their homes and Communicate privately, a practice (Tertullian, *Ad uxor.*, II, v), to which, even as late as the fourth century, St. Basil makes reference (*Ep.* xciii, ad *Cæsariam*). Up to the ninth century, it was usual for the priest to place the Sacred Host in the right hand of the recipient, who kissed it and then transferred it to his own mouth; women, from the fourth century onward, were required in this ceremony to have a cloth wrapped about their right hand. The Precious Blood was in early times received directly from the Chalice, but in Rome the practice, after the eighth century, was to receive it through a small tube (*fistula*); at present this is observed only in the pope's Mass. The latter method of drinking the Chalice spread to other localities, in particular to the Cistercian monasteries, where the practice was partially continued into the eighteenth century.

Whereas the priest is both by Divine and ecclesiastical right the ordinary dispenser (*minister ordinarius*) of the sacrament, the deacon is by virtue of his order the extraordinary minister (*minister extraordinarius*), yet he may not administer the sacrament except *ex delegatione*, i.e. with the permission of the bishop or priest. As has already been mentioned above, the deacons were accustomed in the Early Church to take the Blessed Sacrament to those who were absent from Divine service, as well as to present the Chalice to the laity during the celebration of the Sacred Mysteries (cf. Cyprian, *De lapsis*, nn. 17, 25), and this practice was observed until Communion under both kinds was discontinued. In St. Thomas' time (III:82:3), the deacons were allowed to administer only the Chalice to the laity, and in case of necessity the Sacred Host also, at the bidding of the bishop or priest. After the Communion of the laity under the species of wine had been abolished, the deacon's powers were more and more restricted. According to a decision of the Sacred Congregation of Rites (25 Feb., 1777), still in force, the deacon is to administer Holy Communion only in case of necessity and with the approval of his bishop or his pastor. (Cf. Funk, "Der Kommunionritus"

in his "Kirchengeschichtl. Abhandlungen und Untersuchungen", Paderborn, 1897, I, pp. 293 sqq.; see also "Theol. praktische Quartalschrift", Linz, 1906, LIX, 95 sqq.)

(6) The Recipient of the Eucharist

The two conditions of objective capacity (*capacitas, aptitudo*) and subjective worthiness (*dignitas*) must be carefully distinguished. Only the former is of dogmatic interest, while the latter is treated in moral theology (see COMMUNION and COMMUNION OF THE SICK). The first requisite of aptitude or capacity is that the recipient be a "human being", since it was for mankind only that Christ instituted this Eucharistic food of souls and commanded its reception. This condition excludes not only irrational animals, but angels also; for neither possess human souls, which alone can be nourished by this food unto eternal life. The expression "Bread of Angels" (Ps, lxxvii, 25) is a mere metaphor, which indicates that in the Beatific Vision where He is not concealed under the sacramental veils, the angels spiritually feast upon the Godman, this same prospect being held out to those who shall gloriously rise on the Last Day. The second requisite, the immediate deduction from the first, is that the recipient be still in the "state of pilgrimage" to the next life (*status viatoris*), since it is only in the present life that man can validly Communicate. Exaggerating the Eucharist's necessity as a means to salvation, Rosmini advanced the untenable opinion that at the moment of death this heavenly food is supplied in the next world to children who had just departed this life, and that Christ could have given Himself in Holy Communion to the holy souls in Limbo, in order to "render them apt for the vision of God". This evidently impossible view, together with other propositions of Rosmini, was condemned by Leo XIII (14 Dec., 1887). In the fourth century the Synod of Hippo (393) forbade the practice of giving Holy Communion to the dead as a gross abuse, and assigned as a reason, that "corpses were no longer capable of eating". Later synods, as those of Auxerre (578) and the Trullan (692), took very energetic measures to put a stop to a custom so difficult to eradicate. The third requisite, finally, is baptism, without which no other sacrament can be validly received; for in its very concept baptism is the "spiritual door" to the means of grace contained in the Church. A Jew or Mohammedan might, indeed, materially receive the Sacred Host, but there could be no question in this case of a sacramental reception, even though by a perfect act of contrition or of the pure love of God he had put himself in the state of sanctifying grace. Hence in the Early Church the catechumens were strictly excluded from the Eucharist.

J. POHLE

Early Symbols of the Eucharist

Early Symbols of the Eucharist

Among the symbols employed by the Christians of the first ages in decorating their tombs, those which relate to the Eucharist hold a place of the first importance. The monuments of greatest consequence on which these symbols are depicted exist, principally, in the subterranean cemeteries of early Christian Rome, better known as the Roman catacombs. Their discovery and reopening in the latter half of the nineteenth century have thrown great light on more or less obscure allusions in early Christian literature. In this way Catholic theology now possesses supplementary information of appreciable value bearing on the belief in, and the manner of celebrating, the Eucharist in the sub-Apostolic age. According to Wilpert, an expert scholar in this field of Christian archaeology, the symbolic representations of the catacombs which refer to the Eucharist form three groups, inspired by three of Christ's miracles, namely the miraculous multiplication of the loaves and fishes, the banquet of the seven Disciples by the Sea of Galilee after the Resurrection, and the miracle of Cana. It is to the first two of these miracles, probably, that we owe the famous fish symbol, which briefly summed up the chief articles of the Christian belief. The earliest and always the favourite symbol of the Eucharist in the monuments was that inspired by the miracle of the multiplication of the loaves and fishes; the banquet of the seven Disciples appears only in one (second-century) catacomb scene; the miracle of Cana in two, one of which is of the early third, the other of the fourth, century.

I. THE MIRACLE OF THE MULTIPLICATION

On two occasions Christ fed with loaves and fishes, miraculously multiplied, a large concourse of people who had followed Him into the desert. On the first of these occasions, recorded by all four Evangelists, five loaves and two fishes supplied the needs of five thousand people, while on the second occasion, mentioned only by St. Matthew (xv, 32 sq.), seven loaves and a "few" fishes more than sufficed for four thousand persons. In accordance with the practice of depicting only those features which were necessary to convey the meaning of a symbol, the Christian artists of the catacombs represented the miraculous multiplication as a banquet, in which the guests are seen partaking of a repast of loaves and fishes. In frescoes of this category, the source of the artist's inspiration is clearly indicated by the baskets of fragments on the right and left of the banquet scene. The number of baskets represented is not always historical, this being regarded as a matter of indifference so far as the symbol was concerned; six Eucharist frescoes show each seven baskets, but in three others the

number is two, eight, and twelve, respectively. The number of guests in all symbolical repasts of the Eucharist is invariably seven, a peculiarity which Wilpert regards as due to the early Christian fondness for the symbolism of numbers. According to St. Augustine (Tract. cxxiii, in Joan.), the number seven represented the totality of the Christian world. The most ancient representations of the Eucharist in the catacombs is the fresco known as the "Fractio Panis", an ornament of the Capella Greca, in the cemetery of St. Priscilla. Wilpert attributes this, with other paintings of that chapel, to the early part of the second century, and his opinion is generally accepted. The scene represents seven persons at table, reclining on a semi-circular divan, and is depicted on the wall above the apse of this little underground chapel, consequently in close proximity to the place where once stood the altar. One of the banqueters is a woman. The place of honour, to the right (*in cornu dextro*), is occupied by the "president of the Brethren" (described about 150-155 by Justin Martyr in his account of Christian worship), i.e. the bishop, or a priest deputed in his place for the occasion (Apol., I, lxvi). The "president" (*proestos*), a venerable, bearded personage is depicted performing the function described in the Acts of the Apostles (ii, 42, 46; xx, 7) as "breaking bread"; hence the name "Fractio Panis" (*he klasis tou artou*), appropriately given to the fresco by its discoverer. It is to be noted that these words are frequently used in the earliest non-inspired Christian literature as a synonym for the Eucharist (for the texts see Wilpert, *Fractio Panis*, Freiburg, 1895). The moment represented, therefore, is that immediately before the Communion, when the celebrant, then as now, divided the Sacred Host. And, as though to exclude all doubt as to the character of his subject, the artist added a detail found in no other representation of the Eucharist; in front of the celebrant he placed a two-handled cup, evidently the chalice (*calix ministerialis*) of the second century. Such is the earliest representation in Christian art of the offering of the Mass. A recent writer regards the scene as representing the celebration of the Eucharist in connection with the funeral agape on the anniversary of some person interred in the chapel. The guests partaking of the banquet, in this view, represent the relations of the deceased assisting at an anniversary Mass (*sacrificium pro dormitione*) for the repose of his soul (Wieland, *Mensa und Confessio*, p. 139). In addition to these unique details showing a real celebration of the Mass in the early second century, the author of this fresco depicted, side by side with the reality, a symbol of the Eucharist. In the centre of the table are two plates, one containing five loaves, the other two fishes, while on the right and left of the divan seven baskets of bread are distributed symmetrically.

After the "Fractio Panis" the most remarkable frescoes in which the miraculous multiplication is employed as a symbol of the Eucharist are two in the crypt of Lucina, the most ancient part of the catacomb of St. Callistus. Each consists of a fish and a

basket of bread on a green field. At first view it would seem as though the fishes were represented each carrying a basket of bread, in the act of swimming. A closer examination of the frescoes made by Wilpert, however, has shown that the baskets are placed very close to, but not on, the fishes, and that the supposed blue surface is really green. The subject, therefore, is the miraculous multiplication, the green surface representing a field. As a symbol these pictures are particularly striking from the introduction of two glasses, containing a red substance, into the baskets. Evidently the artist in this detail had in mind the Eucharistic matter of wine. Consequently, the frescoes as a whole conveyed to an onlooker in the second century a meaning somewhat as follows: the miraculously multiplied bread, together with wine, formed the matter of the Eucharist, which, in turn, by a still greater miracle, became the substance of the Body and Blood of the Divine Ichthys, Jesus Christ.

The various Eucharistic banquet scenes of the catacombs appropriately symbolized the reception of Holy Communion. In one early instance the artist portrayed, besides a representation of this character, a new symbol having special reference to the Consecration. This consists of a scene showing two persons beside a tripod, on which are placed a loaf and fish. One of the figures is clad in the tunic and pallium reserved in early Christian art to persons of sacred character, while the other, at the opposite side of the tripod, stands in the attitude of an orans. The sacred personage holds his hands extended over the loaf and the fish, somewhat after the manner of a priest holding his hands over the chalice before the Consecration. Wilpert's interpretation of the scene is that the figure with extended hands represents Christ performing the miracle of the multiplication, which act, in the intention of the artist, is symbolic of the Consecration. The orans, on the other hand, is a symbol of the deceased, who, through the reception of Holy Communion, has obtained eternal happiness: "He that eateth this bread shall live forever" (St. John, vi, 59). The representation described forms one of a series comprising three subjects, all relating to the Eucharist. The second of the series is the usual banquet of seven persons, symbolizing Communion, while the third depicts Abraham and Isaac in the orans attitude. In the symbolism of the time Isaac was regarded as a figure of Christ, whence the inference that this representation of Abraham's sacrifice was figurative of the Sacrifice of the Cross.

II. THE BANQUET OF THE SEVEN DISCIPLES

The repast of the seven Disciples by the Sea of Galilee is recorded by the Evangelist St. John (xxi, 9 sqq.). St. Peter and his fellow-fishermen, seven altogether, after taking the miraculous draught of fishes, drew their boats on shore, where they found "hot coals lying, and a fish laid thereon, and bread". The risen Saviour then invited them to eat, "and none of them . . . durst ask him: Who art thou? knowing that it was the Lord". The incident thus recorded was just as appropriate a symbol of the Eucharist

as the miracle of the multiplication, and as such it is once depicted in a painting of the second century. In this, as in all Eucharistic frescoes, the symbol of Communion appears in close proximity with a baptismal symbol. The banquet scene itself at first view seems in no wise different from the category of Eucharistic representations already described: seven persons are partaking of food, which consists of loaves and fishes. Two details, however, differentiate this particular picture (Sacrament Chapel A 2, cemetery of Callistus), from the symbolic banquets based on the miraculous multiplication. The first of these details is the absence of the basket of fragments always present in frescoes inspired by the latter subject, and the second consists in the fact that the seven banqueters are depicted nude, the manner in which fishermen were invariably represented in classic art. The author of this fresco, we may safely conclude, drew his inspiration from the repast by the Sea of Galilee, which he depicted as a symbol of the Eucharist. St. Augustine alludes to this symbol when he speaks of the "roasted fish" on the hot coals as representing Christ crucified (*Piscis assus Christus est Passus*, Tract. cxxiii, in Joan.).

During the first and second centuries, with the one exception noted, the only symbol of the Eucharist adopted in Christian art was that inspired by the miraculous multiplication. The mode of representing the symbol, also, during this period scarcely varied; seven guests partake of the symbolic loaves and fishes, while baskets of bread are distributed at the sides. In one instance, however, the guests are omitted, and only a tripod with loaves and fishes and the baskets of bread are depicted. This fresco, which occupies a lunette of the Sacrament Chapel containing the symbol of the seven Disciples, Wilpert regards as a sort of compendium of the two symbols of the Consecration and the Communion described above. In the third century a new mode of representing the favourite Eucharistic symbol was adopted in a number of frescoes. This consisted in a scene showing Christ performing the miracle of multiplication by touching with a rod one of several baskets of bread placed before Him. In the loaves, also, incisions, sometimes made in the form of a cross, are seen. Paintings of this class were symbols of the Consecration. One of them (chamber III in the catacomb of St. Domatilla) is of more than ordinary interest. Unfortunately it has suffered serious injury at the hands of collectors. By the aid of a design made for Bosio, Wilpert has been able to reproduce the picture. It consists of three scenes. In the centre Christ is performing the miracle of multiplication with a rod. To the right of this He is again represented, His right hand raised in the oratorical gesture, while within the folds of His pallium five loaves marked with a cross are visible. Balancing this figure on the left is the Samaritan woman drawing water from the well of Jacob. According to the general principles underlying early Christian art, some relationship was here intended between the three groups. Ordinarily the Samaritan woman was a symbol of the *refrigerium* (refreshment) peti-

tioned for in the Memento for the Dead at Mass. In the present instance Wilpert regards it as more probable that she is intended as a symbol of the soul in the enjoyment of eternal happiness; the Eucharist, like the fountain of water (John, iv, 14) "springing up into life everlasting", being a pledge of immortality. In the catacomb of St. Callistus there is a fourth painting of the miracle of the multiplication which conforms more closely to historical narrative than the representations of an earlier date; Christ is here depicted with both hands held over the loaves and fishes presented to Him by two Apostles. It may be added that more than thirty frescoes of the miraculous multiplication still exist in the Roman catacombs. For an exact and reliable reproduction of them see Wilpert, "Le Pitture delle catacombe Romane", Rome, 1903.

III. THE WEDDING AT CANA

The custom introduced in the third century of representing the multiplication of the loaves to the exclusion of the fishes is thought to have been indirectly instrumental in bringing about a new and beautiful symbol of the Eucharist in early Christian painting. Previous to this time only two frescoes contained any allusions to the Eucharistic wine; the chalice of the "Fractio Panis" and the red substance in the baskets of the crypt of Lucina. But the epitomizing of the multiplication symbol by the omission of the fishes (leaving only bread, one of the two species required for the Eucharist) probably suggested the idea of a special symbol for the Eucharistic wine. No more appropriate symbol for this purpose was to be desired than the miracle of Cana (John, ii, 1-11), which was actually adopted. As Christ at the marriage feast changed water into wine, so on another occasion He changed wine into His blood. Quite apropos in this relation is a o Eucharistic symbols of the first Christian age are reproduced in a new and striking manner. The picture occupies the frieze of the apse in a small cemeterial basilica and is, consequently, above the place formerly occupied by the altar. The stone bench for the clergy in the sanctuary is still in place. Three scenes, separated by trees, are represented. The central subject is the miraculous multiplication; Christ, identified by the nimbus, is seated on a throne and is in the act of blessing loaves and fishes presented by St. Peter and St. Andrew (identified by inscriptions). At His feet twelve baskets of bread are distributed symmetrically. To the right and left of this picture were two banquet scenes. The former is almost wholly destroyed, but a Greek inscription gives a clue to the subject. This reads: "Those partaking of the *eulogia* of Christ". *Eulogia* is the term used by St. Paul (I Cor., x, 16) in references to the Eucharist: "the chalice of eulogia [benediction] which we bless, is it not the communion of the blood of Christ?" The application of this term, therefore, to the food set before the banqueters, points to the inference that here was depicted a Eucharistic scene in which the guests partook of the symbolic loaves and fishes. The scene on the right, we learn from inscriptions ("Jesus", "Mary", "Servants"), represented the miracle of Cana.

The author of this fresco, who was well acquainted with the symbolism of the first centuries, evidently reproduced (1) the favourite symbol of the Eucharist, i.e. the miraculous multiplication of the loaves and fishes, and (2) the later symbol of the Eucharistic wine, inspired by the miracle at the wedding feast.

WILPERT, *Fractio Panis* (Freiburg, 1895); IDEM, *Le pitture delle catacombe Romane* (Freiburg im Br. and Rome, 1903), large folio, replaces for completeness and trustworthiness all previous similar works, e.g. DE ROSSI, GARRUCCI, etc.; WIELAND, *Mensa und Confessio* (Munich, 1906); KRAUS in *Real-Encyklopédie*, etc. (Freiburg, 1882), 433-41; MARUCCHI, *Eléments d'archéol. chrét.* (Paris, 1905), I, 291-307, also new edition (1908); NORTHCOTE AND BROWNLOW, *Roma Sotterranea* (London, 1878), passim; LOWRIE, *Monuments of the Early Ch.* (New York, 1901), non-Catholic.

MAURICE M. HASSETT

Eucharistic Congresses

Eucharistic Congresses

Eucharistic Congresses are gatherings of ecclesiastics and laymen for the purpose of celebrating and glorifying the Holy Eucharist and of seeking the best means to spread its knowledge and love throughout the world. The Real Presence of Jesus Christ in the Eucharist is one of the principal dogmas of the Catholic Faith and is therefore of paramount importance as the most precious treasure that Christ has left to His Church as the centre of Catholic worship and as the source of Christian piety. The main advantages of these congresses have been in the concentration of the thoughts of the faithful upon the mystery of the altar, and in making known to them the means by which devotion towards the Holy Eucharist may be promoted and implanted in the hearts of the people. The promoters of Eucharistic congresses believe that, if during recent years devotion to the Holy Eucharist has become more widespread, if works of adoration, Confraternities of the Blessed Sacrament, and the practice of frequent Communion have spread rapidly and extensively, it must be ascribed in great part to these gatherings.

The first congress owed its inspiration to Bishop Gaston de Ségur, and was held at Lille, France, 21 June, 1881. The idea at first was merely local and met with few adherents, but it grew from year to year with an ever-increasing importance. The second gathering was at Avignon, in 1882, and the third at Liège, in the following year. When from the 9th to the 13th of September, 1885, the fourth congress met at Fribourg in Switzerland, under the presidency of the famous Mgr. Mermillod, Bishop of Lausanne and Geneva, his influence and example drew to the platform members of the Cantonal

Government, officials of the municipality of Fribourg, officers of the army, judges of the courts, while thousands of Catholics from all over Europe joined in the formal procession. Toulouse, in the South of France, was the place of meeting of the fifth congress, from the 20th to the 25th of June, 1886, and about 1500 ecclesiastics and 30,000 laymen were present at the closing exercises.

The sixth congress met in Paris, 2-6 July, 1888, and the great memorial church of the Sacred Heart on Monmartre was the centre of the proceedings. Antwerp, in Belgium, entertained the next congress, 15-21 August, 1890; an immense altar of repose was erected in the Place de Meir, and it was estimated that 150,000 persons were gathered about it when Cardinal Goossens, Archbishop of Mechlin, gave the solemn Benediction. Bishop Doutreloux of Liège was then president of the Permanent Committee for the Organization of Eucharistic Congresses, the body which has charge of the details of these meetings.

Special importance was attached to the eighth congress, which went to Jerusalem to hold its sessions from the 14th to the 21st of May, 1893. Pope Leo XIII sent as legate Cardinal Langénieux, Archbishop of Reims. Here the reunion of the Orient was advocated, and an adoration of the Blessed Sacrament was preached on the very spot where tradition says the Agony in the Garden took place. Next year the congress was held at Reims, 25-29 July, and the different churches of the East were largely represented. A place was given in the deliberations for the first time to the study of social questions affecting the working classes. Paray-le-Monial, the city of the Sacred Heart, 20-24 September, 1897, was the scene of the tenth congress; and the eleventh, the best organized and most numerously attended of the series, met at Brussels, 13-17 July, 1898. Cardinal Langénieux was again the pope's legate at the twelfth congress which had Lourdes, the city of Eucharistic miracles, as its meeting place, 7-11 August, 1889. This gathering was notable for the number of priests who took part in the procession. When the thirteenth congress met at Angers, 4-8 September, 1901, a special section was formed for young men to read and discuss papers having reference to such works as young men ought to undertake for the promotion of devotion to the Holy Eucharist and the solution of social questions. Namur, Belgium, 3-7 September, 1902, was chosen as the location for the fourteenth congress, and the fifteenth, 20-24 July, 1904, went to Angoulême where the operations of French law forbade the usual procession of the Blessed Sacrament.

Pope Pius X having expressed a wish that the Eucharistic Congress should be held in Rome, the delegates met there, 1-6 June, 1905. He added to the solemnity of the occasion by celebrating Mass, at the opening of the sessions, by giving a special audience to the delegates, and by being present at the procession that closed the proceedings.

It was the dawn of the movement that led to his decree, "Tridentina Synodus", 20 December, 1905, advising daily communions.

Tournai, in Belgium, saw the seventeenth congress, 15-19 August, 1906; and the next one went to Metz, in Lorraine, 7-11 August, 1907. Cardinal Vincenzo Vannutelli was the pope's legate, and the German Government suspended the law of 1870, forbidding processions, in order that the usual solemn procession of the Blessed Sacrament might be held. Each year the congress had become more and more definitely international, and at the invitation of Archbishop Bourne of Westminster it was decided to hold the nineteenth congress in London, the first under the auspices of, and among, English-speaking members of the Church.

In addition to these general congresses there had also grown up, in all countries where Catholics were numerous, local gatherings of the Eucharistic leagues which were potent factors in the spread of the devotion. These were held in France, Germany, Belgium, Spain, Italy, England, Canada, Australia, and the United States. The first of these in the United States was at St. Louis, in September, 1901; the second at New York, in 1905; and the third at Pittsburg, in 1907. The presidents of the Permanent Committee of the International Eucharistic Congresses, under whose direction all this progress was made were: Bishop Gaston de Ségur, of Lille; Archbishop de La Bouillerie, titular of Perga and coadjutor of Bordeaux; Archbishop Duquesnay of Cambrai; Cardinal Mermillod, Bishop of Lausanne and Geneva; Bishop Doutreloux of Liège, and Bishop Thomas Heylen of Namur, Belgium. After each congress this committee prepared and published a volume giving a report of all the papers read and the discussions on them in the various sections of the meeting, the sermons preached, the addresses made at the public meetings, and the details of all that transpired.

As the most representative and important of all the congresses, the whole Catholic world was at once interested in the nineteenth, which was held in London, 9-13 September, 1908, and regarded as the greatest religious triumph of its generation. In an affectionate letter voicing anew his interest in these congresses, the pope once more designated Cardinal Vincenzo Vannutelli as his legate to attend the sessions. More than three hundred and fifty years had elapsed since a legate from the pope had been seen in England. With him were six other cardinals, fourteen archbishops, seventy bishops and a host of priests. No such gathering of ecclesiastics had ever been seen outside of Rome in modern times, and English Catholics prepared to make it locally even more memorable. The seeds of "the Second Spring", one of them aptly said, awakened by the tears and blood of persecution, and strengthened by the prayers of the remnant of the faithful in the dreary years of the penal laws, bore flower and fruit.

A distinguished escort met Cardinal Vannutelli when he landed at Dover, and an enormous crowd assembled to witness the arrival of a papal legate in London for the

first time in more than three centuries. On the next day, 9 September, the congress was solemnly opened in the cathedral at Westminster, by the legate, supported by Cardinals Gibbons of Baltimore, Logue of Ireland, Sancha y Hervàs of Toledo, Ferrari of Milan, Mathieu of France, and Mercier of Belgium. Bishops, priests, and laymen from all quarters of the globe were about them. The regular sessions began on 10 September, Archbishop Amette of Paris celebrating the Mass. Two sectional meetings in English and one in French then listened to the papers and discussions. In the evening there was a great meeting of 15,000 people at the Albert Hall, to greet the papal legate, at which meeting resolutions pledging all to promote devotion to the Eucharist and unalterable fidelity to the Holy See were passed. The speakers included Archbishops Carr of Melbourne and Bruchesi of Montreal. On 11 September Archbishop Van der Wetering, of Utrecht, was the celebrant of the Mass, and the next day Mass was celebrated according to the Byzantine Rite by the Very Reverend Arsenius Atiyeh, archimandrite of the church of Saint-Julienle-Pauvre of Paris, assisted by several Greek Assumptionist priests from Constantinople. The Mass on Sunday, 13 September, celebrated by the papal legate, and at which Cardinal Gibbons preached, closed the series of splendid ceremonies that marked the congress. Vespers followed, and then the solemn procession took place.

It had been intended to carry the Blessed Sacrament through the streets, but, owing to a protest and public clamour against this, made by the societies composing the Protestant Alliance, the Prime Minister, Mr. Asquith, sent a formal request to Archbishop Bourne on the part of "His Majesty's Government", for the abandonment of this programme, and this was complied with. The legate, attended by a guard of honour headed by the Duke of Norfolk, Earl Marshal of England, and made up of eleven English noblemen and the Duke of Orleans and the Comte d'Eu and some members of the French Chamber of Deputies, after passing over the route, gave solemn benediction from the balcony of the cathedral to the multitude below. Telegraphing after the ceremony to Rome, Cardinal Vannutelli said to the Cardinal Secretary of State: "The Congress concluded with a great triumph to-day when the procession passed through the streets of London packed with crowds raising continuous cheers for the cardinal legate and the other cardinals and prelates. The Sacred Host was not carried in the procession, but I gave a final benediction with the Sacrament to the crowd from three open balconies on the facade of the cathedral. Members of the House of Lords formed an escort of honour for me. Perfect order was kept."

The pope sent a special letter to the Archbishop of Westminster after the congress concluded, stating that, though it was the first of its kind in England, it must be looked on as the greatest of all, for its concourse of illustrious men, for the weight of its deliberations, for its display of faith, and for the magnificence of its religious functions. He

thanked the archbishop and all who had taken any part in the proceedings. Before it closed the congress decided to have the session of 1909 meet at Cologne, and that of 1910 at Montreal.

François Désiré, Cardinal Mathieu, Archbishop of Toulouse, France, who had attended the Congress, was stricken with an illness that necessitated an operation shortly after his arrival in London. He died in London from the effects of this on the 25th of October following. Another great dignitary of the Church who was called to his reward shortly after assisting at this memorable congress was Ciriaco Maria, Cardinal Sancha y Hervàs, Archbishop of Toledo and Patriarch of the West Indies, who died at Toledo, 25 February, 1909, in the seventy-first year of his age.

Official reports of the several Eucharistic Congresses; SÉGUR, *Biog. nouvelle de Mgr. de Ségur* (Paris, 1885); *The Tablet*, *Catholic Times*, *Catholic Herald* (London), files, Oct., Sept., 1908; *The Catholic World* (New York, November, 1908); *The Rosary Magazine* (Somerset, Ohio, Oct., Nov., 1908); *The Messenger* (New York, Oct., Nov., 1908).

THOMAS F. MEEHAN.

Saint Eucharis

St. Eucharis

First Bishop of Trier (Treves) in the second half of the third century. According to an ancient legend, he was one of the seventy-two disciples of Christ, and was sent to Gaul by St. Peter as bishop, together with the deacon Valerius and the subdeacon Maternus, to preach the Gospel. They came to the Rhine and to Eleggia (Ehl) in Alsace, where Maternus died. His two companions hastened back to St. Peter and begged him to restore the dead man to life. St. Peter gave his pastoral staff to Eucharis, and, upon being touched with it, Maternus, who had been in his grave for forty days, returned to life. The Gentiles were then converted in large numbers. After founding many churches the three companions went to Trier where the work of evangelization progressed so rapidly that Eucharis chose that city for his episcopal residence. Among other miracles related in the legend he raised a dead person to life. An angel announced to him his approaching death and pointed out Valerius as his successor. Eucharis died 8 Dec., having been bishop for twenty-five years, and was interred in the church of St. John outside the city. Valerius was bishop for fifteen years and was succeeded by Maternus, who had in the meantime founded the dioceses of Cologne and Tongres, being bishop altogether for forty years. The staff of St. Peter, with which he had been raised to life, was preserved at Cologne till the end of the tenth century when the upper

half was presented to Trier, and was afterwards taken to Prague by Emperor Charles IV.

In the Middle Ages it was believed that the pope used no crozier, because St. Peter had sent his episcopal staff to St. Eucharius; Innocent III concurs in this opinion (*De Sacrif. Missæ*, I, 62). The same instance, however, is related of several other alleged disciples of St. Peter, and more recent criticism interprets the staff as the distinctive mark of an envoy, especially of a missionary. Missionaries in subsequent centuries, e. g. St. Boniface, were occasionally called ambassadors of St. Peter, the pope who sent them being the successor of Peter. Moreover, in medieval times the foundation of a diocese was often referred to as early a date as possible, in order thereby to increase its reputation, perhaps also its rights. Thus Paris gloried in Dionysius Areopagita as its first bishop; similarly ancient origins were claimed by other Frankish dioceses. In time, especially through the ravages of the Normans, the more reliable earlier accounts were lost. When at a later period the lives of primitive holy founders, e. g. the saints of ancient Trier, came to be written anew, the gaps in tradition were filled out with various combinations and fanciful legends. In this way there originated in the monastery of St. Matthias near Trier the famous chronicle of Trier (*Gesta Treverorum*, ed. Waitz in *Mon. Germ. Hist.*; script., VIII, 111-174) in which there is a curious mixture of truth and error. It contains the account of the life of St. Eucharius given above. An amplification thereof, containing the lives of the three saints in question, is said to have been written by the monk Goldscher or Golscher, who lived in that monastery about the year 1130. From the "Gesta" the narrative passed unchallenged into numerous medieval works. More recent criticism has detected many contradictions and inaccuracies in these ancient records, and it is almost universally believed at present that, with few exceptions, the first Christian missionaries came to Gaul, to which Trier then belonged, not earlier than about 250. Following Hontheim, Calmet and others, the Bollandists, with Marx, Lütolf, and other historians refer these holy bishops of Trier to a period following 250, though not all of them consider this as fully established. The feast of St. Eucharius is celebrated on 8 Dec.

The lives of the three saints may be found in the *Acta SS.* Jan., II, 917-22 (feast of St. Valerius), and in the *Mon. Ger. Hist., Scriptorum*, VIII, 111-174. See also RETTBERG, *Kirchengeschichte Deutschlands*, I, 74-82; HAUCK, *Kirchengeschichte Deutschlands*, 2d ed., I, 4 sqq.; MARX, *Geschichte des Erzstifts Trier* (Trier, 1858), I, 32-60; BEISSEL, *Geschichte der Trierer Kirchen* (Trier, 1888), I, 10 sqq.

GABRIEL MEIER.

St. Eucherius (4th Century)

St. Eucherius

Bishop of Lyons, theologian, born in the latter half of the fourth century; died about 449. On the death of his wife he withdrew to the monastery of Lérins, where his sons, Veranius and Salonius, lived, and soon afterward to the neighbouring island of Lerona (now Sainte-Marguerite), where he devoted his time to study and mortification. Desirous of joining the anchorites in the deserts of the East, he consulted John Cassian, who, in reply, sent him some of his "Collationes", describing the daily lives of the hermits of the Thebaid. It was at this time that Eucherius wrote his beautiful letter "De laude Eremiti" to St. Hilary of Aries (c. 428). Though imitating the virtues of the Egyptian solitaries, he kept in touch with men renowned for learning and piety, e. g. Cassian, St. Hilary of Arles, St. Honoratus, later Bishop of Marseilles, and Valerian, to whom he wrote his "Epistola parænetica de contemptu mundi". The fame of Eucherius was soon so widespread in southeastern Gaul, that he was chosen Bishop of Lyons. This was probably in 434; it is certain, at least that he attended the First Council of Orange (441) as Metropolitan of Lyons, and that he retained this dignity until his death. In addition to the above-mentioned letters, Eucherius wrote "Formularium spiritualis intelligentiæ ad Veranium", and "Institutiones ad Salonium", besides many homilies. His works have been published both separately and among the writings of the Fathers. There is no critical edition but the text is most accessible in Migne, "P. L.", L, 685-894. In the same volume (appendix, 893-1214) is to be found a long series of works attributed to Eucherius, some of doubtful authenticity, others certainly apocryphal.

Eucherii Lugdunensis episcopi* (Lyons, 1877); *Rev. du Lyonnais* (Lyons, 1868), CVI, 422-46; BARDENHEWER, *Patrology*, tr. SHAHAN (Freiburg-im-Br., St. Louis, 1908), 518-19.

LÉON CLUGNET.

Euchologion

Euchologion

The name of one of the chief Service-books of the Byzantine Church; It corresponds more or less to our Missal and Ritual. The Euchologion contains first, directions for the deacon at the *Hesperinon* (Vespers), *Orthros* (Lauds), and Liturgy. The priest's

prayers and the deacon's litanies for those two hours follow; Then come the Liturgies; first, rubrics for the holy Liturgy in general, and a long note about the arrangement of the breads at the Proskomide. The Liturgy of St. John Chrysostom is the frame into which the others are fitted. The Euchologion contains only the parts of priest and deacon at full length, first for the Chrysostom-liturgy, then for those parts of St. Basil's Liturgy that differ from it, then for the Presanctified-Liturgy, beginning with the Hesperinon that always precedes it; After the Liturgies follow a collection of sacraments and sacramentals with various rules, canons, and blessings. First the rite of churching the mother after child-birth (*euchai eis gynaike lecho*), adapted for various conditions, then certain "canons of the Apostles and Fathers" about baptism, prayers to be said over catechumens, the rite of baptism, followed by the washing (*apolousis*) of the child, seven days later, certain exorcisms of St. Basil and St. John Chrysostom, and the rite of consecrating chrism (*myron*) on Maundy Thursday. Then follow the ordination services for deacon, priest, and bishop (there is a second rite of ordaining bishops "according to the exposition of the most holy Lord Metrophanes, Metropolitan of Nyssa"), the blessing of a hegumenos (abbot) and of other superiors of monasteries, a prayer for those who begin to serve in the Church, and the rites for minor orders (reader, singer, and subdeacon).

The ceremonies for receiving novices, clothing monks in the mandyas (the "little habit") and in the "great and angelic habit" come next, the appointing of a priest to be confessor (*pneumatikos*) and the manner of hearing confessions, prayers to be said over persons who take a solemn oath, for those who incur canonical punishments, and for those who are absolved from them. Then comes a collection of prayers for various necessities. A long hymn to Our Lady for "forgiveness of sins", written by a monk, Euthymius, follows, and we come to the rites of espousal, marriage (called the "crowning", *Stephanoma*, from the most striking feature of the ceremony), the prayers for taking off the crowns eight days later, the rite of second marriages (called, as by us, "bigamy", *digamia*, in which the persons are not crowned), and the very long unction of the sick (*to hagian elaion*), performed normally by seven priests. Next, blessings for new churches and antiminsia (the corporal containing relics they use for the Liturgy; it is really a kind of portable altar), the ceremony of washing the altar on Maundy Thursday, erection of a Stauropegion (exempt monastery), the short blessing of waters (*hagiasmos*), and the great one (used on the Epiphany) followed by a sacramental which consists of bathing (*nipter*) afterwards. After one or two more ceremonies, such as a curious rite of kneeling (*gonyklisis*, otherwise a rare gesture in the Eastern Churches) on the evening of Whitsunday, exorcisms, prayers for the sick and dying, come the burial services for laymen, monks, priests. Then follows a very miscellaneous collection of prayers and hymns (marked *euchai diaphoroi*), canons of penance, against

earthquakes, for time of pestilence, and war, and two addressed to Our Lady. More prayers for various occasions end the book; In modern Euchologia, however, it is usual to add the "Apostles" (the Epistles) and Gospels for the chief feasts (these are taken from the two books that contain the whole collection of liturgical lessons), and lastly the arrangement of the court of the œcumenical patriarch in choir, with rubrical directions for their various duties during the Liturgy. This last chapter is found, of course, only in the Orthodox book.

It will be seen, then, that the Euchologion is the handbook for bishops, priests, and deacons; It contains only the short responses of the choir, who have to use their own choir-books (Triodion, Pentekostarion, Oktoechos, Parakletike, Menologion). The Euchologion, in common with all Byzantine service-books, suffers from an amazing want of order. One discerns a certain fundamental system in the order of its chief parts; but the shorter services, blessings, prayers, hymns, etc. are thrown together pell-mell.

The first printed edition was published at Venice in 1526; The Orthodox official edition in Greek is printed (as are all their books) at the Phoenix press (*typographeion ho Phoinix*) at Venice (7th ed., edited by Spiridion Zerbos, 1898). There is also an Athenian edition and one of Constantinople. The Churches that use other liturgical languages have presses (generally at the capital of the country, St. Petersburg, Bukarest, Jerusalem) for their translations. Provost Alexios Maltzew of the Russian Embassy Church at Berlin has edited the Euchologion in Old Slavonic and German with notes (Vienna, 1861, reprinted at Berlin, 1892). Uniats use the Propaganda edition and have a compendium (*mikron euchologion*) containing only the Liturgies, Apostles and Gospels, baptism, marriage, unction, and confession (Rome, 1872). J. Goar, O. P., edited the Euchologion with very complete notes, explanations, and illustrations (Euchologion, sive Rituale Græcorum, 2nd ed., Venice, fol., 1720); this is still the standard work of reference for Byzantine rites.

ADRIAN FORTESCUE.

Blessed Jean Eudes

Blessed Jean Eudes

French missionary and founder of the Eudists and of the Congregation of Our Lady of Charity; author of the liturgical worship of the Sacred Hearts of Jesus and Mary; b. at Ri, France, 14 Nov., 1601; d. at Caen, 19 Aug., 1680. He was a brother of the French historian, François Eudes de Nèzeray. At the age of fourteen he took a vow of chastity. After brilliant studies with the Jesuits at Caen, he entered the Oratory, 25 March, 1623. His masters and models in the spiritual life were Fathers de Bérulle and

de Condren. He was ordained priest 20 Dec., 1025, and began his sacerdotal life with heroic labours for the victims of the plague, then ravaging the country. As a missionary, Father Eudes became famous. Since the time of St. Vincent Ferrer, France had probably not seen a greater. He was called by Olier "the prodigy of his age". In 1641 he founded the Congregation of Our Lady of Charity of the Refuge, to provide a refuge for women of ill-fame who wished to do penance. The society was approved by Alexander VII, 2 Jan., 1666. With the approbation of Cardinal de Richelieu and a great number of others, Father Eudes severed his connection with the Oratory to establish the Society of Jesus and Mary for the education of priests and for missionary work. This congregation was founded at Caen, 25 March, 1643, and was considered a most important and urgent work (*see* EUDISTS).

Father Eudes, during his long life, preached not less than one hundred and ten missions, three at Paris, one at Versailles, one at St-Germain-en-Laye, and the others in different parts of France. Normandy was the principal theatre of his apostolic labours. In 1674 he obtained from Clement X six Bulls of indulgences for the Confraternities of the Sacred Heart already erected or to be erected in the seminaries. He also established the Society of the Heart of the Mother Most Admirable -- which resembles the Third Orders of St. Francis and St. Dominic. This society now numbers from 20,000 to 25,000 members. Father Eudes dedicated the seminary chapels of Caen and Coutances to the Sacred Hearts. The feast of the Holy Heart of Mary was celebrated for the first time in 1648, and that of the Sacred Heart of Jesus in 1672, each as a double of the first class with an octave. The Mass and Office proper to these were composed by Father Eudes, who thus had the honour of preceding the Blessed Margaret Mary in establishing the devotion to the Sacred Hearts. For this reason, Pope Leo XIII, in proclaiming his virtues heroic in 1903, gave him the title of "Author of the Liturgical Worship of the Sacred Heart of Jesus and Holy Heart of Mary". Father Eudes wrote a number of books remarkable for elevation of doctrine and simplicity of style. His principal works are:--"Le Royaume de Jésus"; "Le contrat de l'homme avec Dieu par le Saint Baptême"; "Le Mémorial de la vie Ecclésiastique"; "Le Bon Confesseur"; "Le Prédicateur Apostolique"; "Le Cœur Admirable de la Très Sainte Mère de Dieu". This last is the first book ever written on the devotion to the Sacred Hearts. His virtues were declared heroic by Leo XIII, 6 Jan., 1903. The miracles proposed for his beatification were approved by Pius X, 3 May, 1908, and he was beatified 25 April, 1909.

[John Eudes was canonized in 1925. -- *Ed.*]

Charles Lebrun

Eudists, or Society of Jesus and Mary

Eudists

(Society of Jesus and Mary)

An ecclesiastical society instituted at Caen, France, 25 March, 1643, by the Venerable Jean Eudes. The principal works of the society are the education of priests in seminaries and the giving of missions. The end which Father Eudes assigned to his society made him decide not to introduce religious vows. He was persuaded that, better than religious, priests, finding in the very dignity with which they were invested the reason and means of rising to eminent perfection, were in a position to inspire young clerics with a high idea of the priesthood and of the sanctity which it required. He also felt that bishops would not so willingly give their seminaries over to priests who were not entirely subject to them. Father Eudes shared the opinions of Cardinal de Bérulle and Father Olier, who did not think it proper to admit religious vows in the orders which they founded. Even St. Vincent de Paul did so only after great hesitation and on the condition, ratified by the sovereign pontiff, that the Priests of the Mission should not form a religious order, properly so called, but an ecclesiastical society.

The Society of Jesus and Mary is not, therefore, a religious order, but an ecclesiastical body under the immediate jurisdiction of the bishops, to aid in the formation of the clergy. It is composed of priests, and of postulants who are admitted after a probation of three years and three months. There are also lay brothers employed in temporal affairs, but who do not wear the ecclesiastical habit. To develop the spirit of Jesus Christ in the members of the society, Father Eudes caused to be celebrated every year in his seminaries the feast of the Holy Priesthood of Jesus Christ and of all Holy Priests and Levites. After the feast of the Sacred Hearts of Jesus and Mary it is one of the principal in the community. The solemnity begins on 13 November and is celebrated with an octave. It thus serves as a preparation for the renewal of the clerical promises on 21 November, the feast of the Presentation of the Blessed Virgin. As early as 1649 Father Eudes had prepared an Office proper to the feast. Some years later the feast and office were adopted by the Sulpician Fathers. Although not a religious order, the Society of Jesus and Mary is subject to discipline which does not differ from that of orders with simple vows. The administration is modelled on that of the Oratory to which Father Eudes had belonged for twenty years. The supreme authority resides in a gen-

eral assembly which names the superior general and which is called, at intervals, to control his administration. It alone can make permanent laws. In the intervals between the general assemblies, the superior general, named for life, exercises full authority in matters spiritual and temporal; He has the right to name and depose local superiors, to fix the personnel of each house, to make the annual visit, to admit, and, in case of necessity, to dismiss, subjects, to accept or to give up foundations, and, in general, to perform, or at least to authorize, all important acts. He is aided by assistants, named by the general assembly, who have a deciding vote in temporal affairs, and a consulting vote only in other questions.

During the lifetime of Father Eudes, the society founded seminaries at Caen (1643), Coutances (1650), Lisieux (1653), Rouen (1658), Evreux (1667), and Rennes (1670). These were all "grand" seminaries; Father Eudes never thought of founding any other. He admitted, however, besides clerical Students, priests with newly granted benefices who came for further study, those who wished to make retreats, and even lay students who followed the courses of the Faculty of Theology. After his death directors were appointed for the Seminaries of Valognes, Avranches, Dol, Senlis, Blois, Domfront, and Séez. At Rennes, Rouen, and some other cities seminaries were conducted for students of a poorer class who were called to exercise the ministry in country places. These were sometimes called "little" seminaries. The postulants were admitted early and made both their profane and ecclesiastical studies. During the French Revolution, three Eudists, Fathers Hébert, Potier, and Lefranc, perished at Paris in the massacres of September, 1792. The cause of their beatification with that of some other victims of September has been introduced in Rome. Father Hébert was the confessor of King Louis XVI, and shortly before his death he made the king promise to consecrate his kingdom to the Sacred Heart if he escaped from his enemies. After the Revolution the society had great difficulty in establishing itself again, and it was only in the second half of the nineteenth century that it began to prosper. Too late to take over again the direction of seminaries formerly theirs, the Eudists entered upon missionary work and secondary education in colleges. The "Law of Associations" (1906) brought about the ruin of the establishments which they had in France. Besides the scholasticates which they have opened in Belgium and in Spain, they direct seminaries at Carthage, at Antioquia, at Pamplona, at Panamá (South America), and at San Domingo, West Indies. In Canada they have the Vicariate Apostolic of the Gulf of St. Lawrence, a seminary at Halifax, N. S., a college at Church Point, N. S., and at Caraquet, N. B., and a number of other establishments less important. They number about fifteen establishments and about one hundred and twenty priests in Canada. In France, where the majority still remains, the Eudists continue to preach missions and to take part in various other works.

CHARLES LEBRUN.

Eudocia

Eudocia

(Eudokia).

Ælia Eudocia, sometimes wrongly called Eudoxia, was the wife of Theodosius II; died c. 460. Her original name was Athenais, and she was the daughter of Leontius, one of the last pagans who taught rhetoric at Athens. Malalas and the other Byzantine chroniclers make the most of the romantic story of her marriage. Leontius when dying left nearly all his property to his two sons. To Athenais he bequeathed only 100 pieces of gold with the explanation that she would not need more, since "her luck was greater than that of all women". She came to Constantinople to dispute this will, and was there seen by Pulcheria, the elder sister of Theodosius II, who ruled for him till he should be of age. The emperor had already expressed his wish to marry (he was just twenty years old); both he and Pulcheria were greatly delighted with Athenais. Malalas (*op. cit.*, p. 353) enlarges on her beauty. She was instructed in the Christian Faith and baptized by the Patriarch Atticus. On 7 June, 421, she married Theodosius. At her baptism she had taken the name Eudocia. Pulcheria took charge of her education in the deportment that was expected of an empress. Theodosius and Eudocia had one daughter, Eudoxia, who married the Western Cæsar, Valentinian III (425-455). It seems that after the wedding a certain rivalry began between Pulcheria and Eudocia and that this was the beginning of the empress's troubles. In 438 Eudocia made her first pilgrimage to Jerusalem; on the way she stopped at Antioch and made a speech with a quotation from Homer that greatly delighted the citizens—so much so that they set up a golden statue in her honour. From Jerusalem she brought back St. Peter's chains, of which she sent half to her daughter in the West, who gave it to the pope. The basilica of St. Peter ad Vincula was built to receive this chain (*Brev. Rom.*, 1 Aug., Lect. 4-6).

In 441 Eudocia fell into disgrace through an unjust suspicion of infidelity with Paulinos, the "Master of the Offices". Paulinos was murdered and Eudocia banished. In 442 she went back to Jerusalem and lived there till her death. She became for a time an ardent Monophysite. In 453 St. Leo I of Rome wrote to convert her. She then returned to the Catholic Faith and used her influence in Palestine in favour of the Council of Chalcedon (451). Theodosius II died in 450, Pulcheria in 453; another

dynasty under Marcian took the place of the line of Theodosius the Great. Eudocia, forgotten by the world, spent her last years in good works and quiet meditation at the holy places of Jerusalem. She was buried in the church of St. Stephen, built by her outside the northern gate. Byzantine history offers few so strange or picturesque stories as that of the little pagan Athenian who, after having been mistress of the civilized world, ended her days as an ardent mystic, almost a nun, by the tomb of Christ. Eudocia wrote much poetry. As empress she composed a poem in honour of her husband's victory over the Persians; later at Jerusalem she wrote religious verse, namely, a paraphrase of a great part of the Bible (warmly praised by Photius, *Bibliotheca*, 183), a life of Christ in Homeric hexameters, and three books telling the story of Sts. Cyprian and Justina (a legend about a converted magician that seems to be one version of the Faust story; see Th. Zahn, "Cyprian von Antiochien und die deutsche Faustsage", 1887). The extant fragments of these poems were edited by A. Ludwich, "Eudociæ Augustæ ... carminum græcorum reliquiæ" (Leipzig, 1897). See also fragments in P.G., LXXXV, 832 sqq.

Another Byzantine empress of the same name (d. 404), like the above often wrongly called Eudoxia, daughter of the Frank general Bauto, and wife of Emperor Arcadius, was the cause of the first and second exile of St. John Chrysostom. After the fall of the eunuch Eutropius this beautiful but proud and avaricious woman dominated Arcadius. She was the mother of Pulcheria and Theodosius II. The homily against her attributed to St. John Chrysostom (P.G., LIX, 485) is not genuine. Cf. Tillemont, "Hist. des Empereurs" (Paris, 1701), V, 785.

Adrian Fortescue

Eudoxias

Eudoxias

A titular see of Galatia Secunda in Asia Minor, suffragan of Pessinus. Eudoxias is mentioned only by Hierocles (Synecdemus, 698, 2) and Parthey (Notit. episc., I, VIII, IX). Two bishops are known, Aquilas in 451 and Menas in 536 (Lequien, Or. christ., I, 495). Another is spoken of in the life of St. Theodore of Sycæ, about the end of the sixth century. The original name of the town is unknown, Eudoxias being the name given to it in honour either of the mother or of the daughter of Theodosius II. It was

perhaps Gordion, where Alexander the Great cut the famous knot, and stood perhaps at the modern Yürme, in the vilayet of Angora. Others, however, identify Eudoxias with Akkilaion, whose site is unknown, and place Germe at Yürme.

RAMSAY, *Asia Minor*, 224-226; ANDERSON in *Journal of Hellen. Studies*, XIX, 88; IDEM in *Annual of the British School at Athens*, IV, 66.

S. PÉTRIDÈS.

St. Eugendus

St. Eugendus

(AUGENDUS; Fr. OYAND, OYAN)

Fourth Abbot of Condat (Jura), b. about 449, at Izernore, Ain, Franche-Comté; d. 1 Jan., 510 at Condat. He was instructed in reading and writing by his father, who had become a priest, and at the age of seven was given to Sts. Romanus and Lupicinus to be educated at Condat, in the French Jura. Thenceforth he never left the monastery. He imitated the example of the above-named saints with such zeal that it was difficult to tell which of the two he resembled more. Eugendus acquired much learning, read the Greek and Latin authors, and was well versed in the Scriptures. He led a life of great austerity, but out of humility did not want to be ordained priest. Abbot Minausius made him his coadjutor, and after the former's death (about 496) Eugendus became his successor. He always remained the humble religious that he had been before, a model for his monks by his penitence and piety, which God deigned to acknowledge by miracles. After the monastery, which St. Romanus had built of wood, was destroyed by fire, Eugendus erected another of stone, and improved the community life; thus far the brethren had lived in separate cells after the fashion of the Eastern ascetics. He built a beautiful church in honour of the holy Apostles Peter, Paul, and Andrew, and enriched it with precious relics. The order, which had been founded on the rules of the Oriental monasteries, now took on more of the active character of the Western brethren; the rule of Tarnate is thought to have served as a model. Condat began to flourish as a place of refuge for all those who suffered from the misfortunes and afflictions of those eventful times, a school of virtue and knowledge amid the surrounding darkness, an oasis in the desert. When Eugendus felt his end approaching he had his breast anointed by a priest, took leave of his brethren, and died quietly after five days.

A few years after his death, his successor, St. Viventiolus, erected a church over his tomb, to which numerous pilgrims travelled. A town was founded, which was called, after the saint, Saint-Oyand de Joux, and which retained that name as late as the sixteenth and seventeenth centuries, while its former name of Condat passed into oblivion. But when St. Claudius had, in 687, resigned his Diocese of Besançon and had

died, in 696, as twelfth abbot, the number of pilgrims who visited his grave was so great that, since the thirteenth century, the name Saint-Claude came more and more into use and has to-day superseded the other. the feast of St. Eugendus was at first transferred to 2 Jan.; in the Dioceses of Besançon and Saint Claude it is now celebrated on 4 Jan.

GABRIEL MEIER

Pope Saint Eugene I

Pope St. Eugene I

Eugene I was elected 10 Aug., 654, and died at Rome, 2 June, 657. Because he would not submit to Byzantine dictation in the matter of Monothelitism, St. Martin I was forcibly carried off from Rome (18 June, 653) and kept in exile till his death (September, 655). What happened in Rome after his departure is not well known. For a time the Church was governed in the manner usual in those days during a vacancy of the Holy See, or during the absence of its occupant, viz., by the archpriest, the archdeacon, and the primicerius of the notaries. But after about a year and two months a successor was given to Martin in the person of Eugene (10 Aug., 654). He was a Roman of the first ecclesiastical region of the city, and was the son of Rufinianus. He had been a cleric from his earliest years, and is set down by his biographer as distinguished for his gentleness, sanctity, and generosity. With regard to the circumstances of his election, it can only be said that if he was forcibly placed on the Chair of Peter by the power of the emperor, in the hope that he would follow the imperial will, these calculations miscarried; and that, if he was elected against the will of the reigning pope in the first instance, Pope Martin subsequently acquiesced in his election (Ep. Martini xvii in P.L., LXXXVII).

One of the first acts of the new pope was to send legates to Constantinople with letters to the Emperor Constans II, informing him of his election, and presenting a profession of his faith. But the legates allowed themselves to be deceived, or gained over, and brought back a synodical letter from Peter, the new Patriarch of Constantinople (656-666), while the emperor's envoy, who accompanied them, brought offerings for St. Peter, and a request from the emperor that the pope would enter into communion with the Patriarch of Constantinople. Peter's letter proved to be written in the most obscure style, and avoided making any specific declaration as to the number of "wills or operations" in Christ. When its contents were communicated to the clergy and people in the church of St. Mary Major, they not only rejected the letter with indignation, but would not allow the pope to leave the basilica until he had promised that he would not on any account accept it (656). So furious were the Byz-

antine officials at this contemptuous rejection of the wishes of their emperor and patriarch that they threatened, in their coarse phraseology, that when the state of politics allowed it, they would roast Eugene, and all the talkers at Rome along with him, as they had roasted Pope Martin I (Disp. inter S. Maxim. et Theod. in P.L., CXXXIX, 654). Eugene was saved from the fate of his predecessor by the advance of the Moslems who took Rhodes in 654, and defeated Constans himself in the naval battle of Phoenix (655). It was almost certainly this pope who received the youthful St. Wilfrid on the occasion of his first visit to Rome (c. 654). He went thither because he was anxious to know "the ecclesiastical and monastic rites which were in use there". At Rome he gained the affection of Archdeacon Boniface, a counsellor of the apostolic pope, who presented him to his master. Eugene "placed his blessed hand on the head of the youthful servant of God, prayed for him, and blessed him" (Bede, Hist. Eccles., V, 19; Eddius, In vit. Wilf., c. v). Nothing more is known of Eugene except that he consecrated twenty-one bishops for different parts of the world, and that he was buried in St. Peter's. In the Roman Martyrology he is reckoned among the saints of that day.

Liber Pontificalis, ed. Duchesne, I, 341-2; various documents in *P.L.*, CXXXIX, LXXXVII; Papebroch in *Acta SS.* (1695), 1 June, 220-2 (2a. 214-6); Mann, *Lives of the Early Popes*, I, pt. I, 406 sqq.

Pope Eugene II

Pope Eugene II

Elected 6 June, 824; died 27 Aug., 827. On the death of Pascal I (Feb.-May, 824) there took place a divided election. The late pope had wisely endeavoured to curb the rapidly increasing power of the Roman nobility, who, to strengthen their positions against him, had turned for support to the Frankish power. When he died these nobles made strenuous efforts to replace him by a candidate of their own; and despite the fact that the clergy put forward a candidate likely to continue the policy of Paschal the nobles were successful in their attempt. They secured the consecration of Eugene, archpriest of S. Sabina on the Aventine, although by a decree of the Roman Council of 769, under Stephen IV, they had no right to a real share in a papal election. Their candidate is stated, in earlier editions of the "Liber Pontificalis" to have been the son of Boemund; but in the recent and better editions his father's name is not given. Whilst archpriest of the Roman Church he is credited with having fulfilled most conscientiously the duties of his position and after he became pope he beautified his ancient church of S. Sabina with mosaics and with metal work bearing his name, which were intact in the sixteenth century. Eugene is described by his biographer as simple and humble,

learned and eloquent, handsome and generous, a lover of peace, and wholly occupied with the thought of doing what was pleasing to God.

The election of Eugene II was a triumph for the Franks, and they resolved to improve the occasion. Emperor Louis the Pious accordingly sent his son Lothair to Rome to strengthen the Frankish influence. Those of the Roman nobles who had been banished during the preceding reign, and who had fled to Frankland (Francia), were recalled, and their property was restored to them. A concordat or constitution was then agreed upon between the pope and the emperor (824). The "Constitutio Romana", in nine articles, was drawn up seemingly with a view of advancing the imperial pretensions in the city of Rome, but at the same time of checking the power of the nobles. It decreed that those who were under the special protection of the pope or emperor were to be inviolable, and that proper obedience be rendered to the pope and his officials; that church property be not plundered after the death of a pope; that only those to whom the right had been given by the deceased Stephen IV, in 769, should take part in papal elections; that two commissioners (*missi*) were to be appointed, the one by the pope and the other by the emperor, who should report to them how justice was administered, so that any failure in the administration might be corrected by the pope, or, in the event of his not doing so, by the emperor; that the people should be judged according to the law (Roman, Salic, or Lombard) they had elected to live under; that its property be restored to the Church; that robbery with violence be put down; that when the emperor was in Rome the chief officials should appear before him to be admonished to do their duty; and, finally, that all must obey the Roman pontiff. By command of the pope and Lothair the people had to swear that, saving the fidelity they had promised the pope, they would obey the Emperors Louis and Lothair; would not allow a papal election to be made contrary to the canons; and would not suffer the pope-elect to be consecrated save in the presence of the emperor's envoys.

Seemingly before Lothair left Rome, there arrived ambassadors from Emperor Louis, and from the Greeks concerning the image-question. At first the Greek emperor, Michael II, showed himself tolerant towards the image-worshippers, and their great champion, Theodore the Studite, wrote to him to exhort him "to unite us [the Church of Constantinople] to the head of the Churches of God, viz. Rome, and through it with the three Patriarchs" (Epp., II, lxxiv); and in accordance with ancient custom to refer any doubtful points to the decision of Old Rome (II, lxxxvi; cf. II, cxxix). But Michael soon forgot his tolerance, bitterly persecuted the image-worshippers, and endeavoured to secure the co-operation of Louis the Pious. He also sent envoys to the pope to consult him on certain points connected with the worship of images (Einhard, Annales, 824). Before taking any steps to meet the wishes of Michael, Louis sent to ask the pope's permission for a number of his bishops to assemble, and make a selection of passages

from the Fathers to elucidate the question the Greeks had put before them. The leave was granted, but the bishops who met at Paris (825) were incompetent for their work. Their collection of extracts from the Fathers was a mass of confused and ill-digested lore, and both their conclusions and the letters they wished the pope to forward to the Greeks were based on a complete misunderstanding of the decrees of the Second Council of Nicæa (cf. P.L., XCVIII, p. 1293 sqq.). Their labours do not appear to have accomplished much; nothing at any rate is known of their consequences.

In 826 Eugene held an important council at Rome of sixty-two bishops, in which thirty-eight disciplinary decrees were issued. One or two of its decrees are noteworthy as showing that Eugene had at heart the advance of learning. Not only were ignorant bishops and priests to be suspended till they had acquired sufficient learning to perform their sacred duties, but it was decreed that, as in some localities there were neither masters nor zeal for learning, masters were to be attached to the episcopal palaces, cathedral churches and other places, to give instruction in sacred and polite literature (can. xxxiv). To help in the work of the conversion of the North, Eugene wrote commending St. Ansgar, the Apostle of the Scandinavians, and his companions "to all the sons of the Catholic Church" (Jaffé, 2564). Coins of this pope are extant bearing his name and that of Emperor Louis. It is supposed, for no document records the fact, that, in accordance with the custom of the time, he was buried in St. Peter's.

Horace K. Mann

Pope Blessed Eugene III

Pope Blessed Eugene III

Bernardo Pignatelli, born in the neighbourhood of Pisa, elected 15 Feb., 1145; d. at Tivoli, 8 July, 1151. On the very day that Pope Lucius II succumbed, either to illness or wounds, the Sacred College, foreseeing that the Roman populace would make a determined effort to force the new pontiff to abdicate his temporal power and swear allegiance to the *Senatus Populusque Romanus*, hastily buried the deceased pope in the Lateran and withdrew to the remote cloister of St. Cæsarius on the Appian Way. Here, for reasons unascertained, they sought a candidate outside their body, and un-animously chose the Cistercian monk, Bernard of Pisa, abbot of the monastery of Tre Fontane, on the site of St. Paul's martyrdom. He was enthroned as Eugene III without delay in St. John Lateran, and since residence in the rebellious city was impossible, the

pope and his cardinals fled to the country. Their rendezvous was the monastery of Farfa, where Eugene received the episcopal consecration. The city of Viterbo, the hospitable refuge of so many of the afflicted medieval popes, opened its gates to welcome him; and thither he proceeded to await developments. Though powerless in face of the Roman mob, he was assured by embassies from all the European powers that he possessed the sympathy and affectionate homage of the entire Christian world.

Concerning the parentage, birth-place, and even the original name of Eugene, each of his biographers has advanced a different opinion. All that can be affirmed as certain is that he was of the noble family of Pignatelli, and whether he received the name of Bernardo in baptism or only upon entering religion, must remain uncertain. He was educated in Pisa, and after his ordination was made a canon of the cathedral. Later he held the office of *vice-dominus* or steward of the temporalities of the diocese. In 1130 he came under the magnetic influence of St. Bernard of Clairvaux; five years later when the saint returned home from the Synod of Pisa, the *vice dominus* accompanied him as a novice. In course of time he was employed by his order on several important affairs; and lastly was sent with a colony of monks to repeople the ancient Abbey of Farfa; but Innocent II placed them instead at the Tre Fontane.

St. Bernard received the intelligence of the elevation of his disciple with astonishment and pleasure, and gave expression to his feelings in a paternal letter addressed to the new pope, in which occurs the famous passage so often quoted by reformers, true and false: "Who will grant me to see, before I die, the Church of God as in the days of old when the Apostles let down their nets for a draught, not of silver and gold, but of souls?" The saint, moreover, proceeded to compose in his few moments of leisure that admirable handbook for popes called "De Consideratione". Whilst Eugene sojourned at Viterbo, Arnold of Brescia, who had been condemned by the Council of 1139 to exile from Italy, ventured to return at the beginning of the new pontificate and threw himself on the clemency of the pope. Believing in the sincerity of his repentance, Eugene absolved him and enjoined on him as penance fasting and a visit to the tombs of the Apostles. If the veteran demagogue entered Rome in a penitential mood, the sight of democracy based on his own principles soon caused him to revert to his former self. He placed himself at the head of the movement, and his incendiary philippics against the bishops, cardinals, and even the ascetic pontiff who treated him with extreme lenity, worked his hearers into such fury that Rome resembled a city captured by barbarians. The palaces of the cardinals and of such of the nobility as held with the pope were razed to the ground; churches and monasteries were pillaged; St. Peter's church was turned into an arsenal; and pious pilgrims were plundered and maltreated.

But the storm was too violent to last. Only an idiot could fail to understand that medieval Rome without the pope had no means of subsistence. A strong party was

formed in Rome and the vicinity consisting of the principal families and their adherents, in the interests of order and the papacy, and the democrats were induced to listen to words of moderation. A treaty was entered into with Eugene by which the Senate was preserved but subject to the papal sovereignty and swearing allegiance to the supreme pontiff. The senators were to be chosen annually by popular election and in a committee of their body the executive power was lodged. The pope and the senate should have separate courts, and an appeal could be made from the decisions of either court to the other. By virtue of this treaty Eugene made a solemn entry into Rome a few days before Christmas, and was greeted by the fickle populace with boundless enthusiasm. But the dual system of government proved unworkable. The Romans demanded the destruction of Tivoli. This town had been faithful to Eugene during the rebellion of the Romans and merited his protection. He therefore refused to permit it to be destroyed. The Romans growing more and more turbulent, he retired to Castel S. Angelo, thence to Viterbo, and finally crossed the Alps, early in 1146.

Problems lay before the pope of vastly greater importance than the maintenance of order in Rome. The Christian principalities in Palestine and Syria were threatened with extinction. The fall of Edessa (1144) had aroused consternation throughout the West, and already from Viterbo Eugene had addressed a stirring appeal to the chivalry of Europe to hasten to the defence of the Holy Places. St. Bernard was commissioned to preach the Second Crusade, and he acquitted himself of the task with such success that within a couple of years two magnificent armies, commanded by the King of the Romans and the King of France, were on their way to Palestine. That the Second Crusade was a wretched failure cannot be ascribed to the saint or the pope; but it is one of those phenomena so frequently met with in the history of the papacy, that a pope who was made to subdue a handful of rebellious subjects could hurl all Europe against the Saracens. Eugene spent three busy and fruitful years in France, intent on the propagation of the Faith, the correction of errors and abuses, and the maintenance of discipline. He sent Cardinal Breakspear (afterwards Adrian IV) as legate to Scandinavia; he entered into relations with the Orientals with a view to reunion; he proceeded with vigour against the nascent Manichean heresies. In several synods (Paris, 1147, Trier, 1148), notably in the great Synod of Reims (1148), canons were enacted regarding the dress and conduct of the clergy. To ensure the strict execution of these canons, the bishops who should neglect to enforce them were threatened with suspension. Eugene was inexorable in punishing the unworthy. He deposed the metropolitans of York and Mainz, and he for a cause which St. Bernard thought not sufficiently grave, he withdrew the pallium from the Archbishop of Reims. But if the saintly pontiff could at times be severe, this was not his natural disposition.

"Never", wrote Ven. Peter of Cluny to St. Bernard, "have I found a truer friend, a sincerer brother, a purer father. His ear is ever ready to hear, his tongue is swift and mighty to advise. Nor does he comport himself as one's superior, but rather as an equal or an inferior... I have never made him a request which he has not either granted, or so refused that I could not reasonably complain." On the occasion of a visit which he paid to Clairvaux, his former companions discovered to their joy that "he who externally shone in the pontifical robes remained in his heart an observant monk".

The prolonged sojourn of the pope in France was of great advantage to the French Church in many ways and enhanced the prestige of the papacy. Eugene also encouraged the new intellectual movement to which Peter Lombard had given a strong impulse. With the aid of Cardinal Pullus, his chancellor, who had established the University of Oxford on a lasting basis, he reduced the schools of theology and philosophy to better form. He encouraged Gratian in his herculean task of arranging the Decretals, and we owe to him various useful regulations bearing on academic degrees. In the spring of 1148, the pope returned by easy stages to Italy. On 7 July, he met the Italian bishops at Cremona, promulgated the canons of Reims for Italy, and solemnly excommunicated Arnold of Brescia, who still reigned over the Roman mob. Eugene, having brought with him considerable financial aid, began to gather his vassals and advanced to Viterbo and thence to Tusculum. Here he was visited by King Louis of France, whom he reconciled to his queen, Eleanor. With the assistance of Roger of Sicily, he forced his way into Rome (1149), and celebrated Christmas in the Lateran. His stay was not of long duration. During the next three years the Roman court wandered in exile through the Campagna while both sides looked for the intervention of Conrad of Germany, offering him the imperial crown. Aroused by the earnest exhortations of St. Bernard, Conrad finally decided to descend into Italy and put an end to the anarchy in Rome. Death overtook him in the midst of his preparations on 15 Feb., 1152, leaving the task to his more energetic nephew, Frederick Barbarossa. The envoys of Eugene having concluded with Frederick at Constance, in the spring of 1153, a treaty favourable to the interests of the Church and the empire, the more moderate of the Romans, seeing that the days of democracy were numbered, joined with the nobles in putting down the Arnoldists, and the pontiff was enabled to spend his concluding days in peace.

Eugene is said to have gained the affection of the people by his affability and generosity. He died at Tivoli, whither he had gone to avoid the summer heats, and was buried in front of the high altar in St. Peter's, Rome. St. Bernard followed him to the grave (20 Aug.). "The unassuming but astute pupil of St. Bernard", says Gregorovius, "had always continued to wear the coarse habit of Clairvaux beneath the purple; the stoic virtues of monasticism accompanied him through his stormy career, and invested him with that power of passive resistance which has always remained the most effec-

tual weapon of the popes." St. Antoninus pronounces Eugene III "one of the greatest and most afflicted of the popes". Pius IX by a decree of 28 Dec., 1872, approved the cult which from time immemorial the Pisans have rendered to their countryman, and ordered him to be honoured with Mass and Office *ritu duplici* on the anniversary of his death.

James F. Loughlin

Pope Eugene IV

Pope Eugene IV

Gabriello Condulmaro, or Condulmerio, b. at Venice, 1388; elected 4 March, 1431; d. at Rome, 23 Feb., 1447. He sprang from a wealthy Venetian family and was a nephew, on the mother's side, of Gregory XII. His personal presence was princely and imposing. He was tall, thin, with a remarkably winning countenance. Coming at an early age into the possession of great wealth, he distributed 20,000 ducats to the poor and, turning his back upon the world, entered the Augustinian monastery of St. George in his native city. At the age of twenty-four he was appointed by his uncle Bishop of Siena; but since the people of that city objected to the rule of a foreigner, he resigned the bishopric and, in 1408, was created Cardinal-Priest of St. Clement. He rendered signal service to Pope Martin V by his labours as legate in Picenum (March of Ancona) and later by quelling a sedition of the Bolognesi. In recognition of his abilities, the conclave, assembled at Rome in the church of the Minerva after the death of Martin V, elected Cardinal Condulmaro to the papacy on the first scrutiny. He assumed the name of Eugene IV, possibly anticipating a stormy pontificate similar to that of Eugene III. Stormy, in fact, his reign was destined to be; and it cannot be denied that many of his troubles were owing to his own want of tact, which alienated all parties from him. By the terms of the capitulation which he signed before election and afterwards confirmed by a Bull, Eugene secured to the cardinals one-half of all the revenues of the Church, and promised to consult with them on all questions of importance relating to the spiritual and temporal concerns of the Church and the Papal States. He was crowned at St. Peter's, 11 March, 1431.

Eugene continued on the throne his simple routine of monastic life and gave great edification by his regularity and unfeigned piety. But his hatred of nepotism, the solitary

defect of his great predecessor, led him into a fierce and sanguinary conflict with the house of Colonna, which would have resulted disastrously for the pope, had not Florence, Venice, and Naples come to his aid. A peace was patched up by virtue of which the Colonnese surrendered their castles and paid an indemnity of 75,000 ducats. Scarcely was this danger averted when Eugene became involved in a far more serious struggle, destined to trouble his entire pontificate. Martin V had convoked the Council of Basle which opened with scant attendance 23 July, 1431. Distrusting the spirit which was reigning at the council, Eugene, by a Bull dated 18 Dec., 1431, dissolved it, to meet eighteen months later in Bologna. There is no doubt that this exercise of the papal prerogative would sooner or later have become imperative; but it seems unwise to have resorted to it before the council had taken any overt steps in the wrong direction. It alienated public opinion, and gave colour to the charge that the Curia was opposed to any measures of reform. The prelates at Basle refused to separate, and issued an encyclical to all the faithful in which they proclaimed their determination to continue their labours. In this course they had the assurance of support from all the secular powers, and on 15 Feb., 1432, they reasserted the Gallican doctrine of the superiority of the council to the pope (see Council of Constance). All efforts to induce Eugene to recall his Bull of dissolution having failed, the council, on 29 April, formally summoned the pope and his cardinals to appear at Basle within three months, or to be punished for contumacy. The schism which now seemed inevitable was for the time averted by the exertions of Sigismund, who had come to Rome to receive the imperial crown, 31 May, 1433. The pope recalled the Bull and acknowledged the council as œcumenical, 15 Dec., 1433. In the following May, 1434, a revolution, fomented by the pope's enemies, broke out in Rome. Eugene, in the garb of a monk, and pelted with stones, escaped down the Tiber to Ostia, whence the friendly Florentines conducted him to their city and received him with an ovation. He took up his residence in the Dominican convent of Santa Maria Novella, and sent Vitelleschi, the militant Bishop of Recanati, to restore order in the States of the Church.

The prolonged sojourn of the Roman Court in Florence, then the centre of the literary activity of its age, gave a strong impetus to the Humanistic movement. During his stay in the Tuscan capital, Eugene consecrated the beautiful cathedral, just then finished by Brunelleschi. Meanwhile, the rupture between the Holy See and the revolutionists at Basle, now completely controlled by the radical party under the leadership of Cardinal d'Allemand, of Arles, became complete. This time our sympathies are entirely on the side of the pontiff, for the proceedings of the little coterie which assumed the name of authority of a general council were utterly subversive of the Divine constitution of the Church. By abolishing all sources of papal revenue and restricting in every way the papal prerogative, they sought to reduce the head of the Church to a

mere shadow. Eugene answered with a dignified appeal to the European powers. The struggle came to a crisis in the matter of the negotiations for union with the Greeks. The majority at Basle were in favour of holding a council in France or Savoy. But geography was against them. Italy was much more convenient for the Greeks; and they declared for the pope. This so provoked the radical party at Basle that on 3 July, 1437, they issued a *monitum* against Eugene, heaping all sorts of accusations upon him. In reply the pope published (18 Sept.) a Bull in which he transferred the council to Ferrara. Though the council declared the Bull invalid, and threatened the pope with deposition, yet the Bull dealt a deadly blow to the adversaries of papal supremacy. The better disposed leaders, notably Cardinals Cesarini and Cusa, left them and repaired to Ferrara, where the council convened by Eugene opened, 8 Jan., 1438, under the presidency of Cardinal Albergati.

The deliberations with the Greeks lasted for over a year, and were concluded at Florence, 5 July, 1439, by the Decree of Union. Though the union was not permanent, it vastly enhanced the prestige of the papacy. The union with the Greeks was followed by that of the Armenians, 22 Nov., 1439, the Jacobites, 1443, and the Nestorians, 1445. Eugene exerted himself to the utmost in rousing the nations of Europe to resist the advances of the Turks. A powerful array was formed in Hungary, and a fleet was despatched to the Hellespont. The first successes of the Christians were followed, in 1444, by the crushing defeat at Varna. In the mean time, the dwindling conventicle at Basle proceeded on the path of schism. On 24 Jan., 1438, Eugene was pronounced suspended, and this step was followed by his deposition on 25 June, 1439, on the charge of heretical conduct towards a general council. To crown their infamy, the sectaries, now reduced to one cardinal and eleven bishops, elected an antipope, Duke Amadeus of Savoy, as Felix V. But Christendom, having recently experienced the horrors of a schism, repudiated the revolutionary step, and, before his death, Eugene had the happiness of seeing the entire Christian world, at least in theory, obedient to the Holy See. The decrees of Florence have since been the solid basis of the spiritual authority of the papacy.

Eugene secured his position in Italy by a treaty, 6 July, 1443, with Alfonso of Aragon, whom he confirmed as monarch of Naples, and after an exile of nearly ten years he made a triumphant entry into Rome, on 28 Sept., 1443. He devoted his remaining years to the amelioration of the sad condition of Rome, and to the consolidation of his spiritual authority among the nations of Europe. He was unsuccessful in his efforts to induce the French court to cancel the anti-papal Pragmatic Sanction of Bourges (7 July, 1438), but, by prudent compromises and the skill of Æneas Silvius, he gained a marked success in Germany. On the eve of his death he signed (5, 7 Feb., 1447) with the German nation the so-called Frankfort, or Princes', Concordat, a series of four

Bulls, in which, after long hesitancy and against the advice of many cardinals, he recognized, not without diplomatic reserve, the persistent German contentions for a new council in a German city, the mandatory decree of Constance (Frequens) on the frequency of such councils, also its authority (and that of other general councils), but after the manner of his predecessors, from whom he declared that he did not intend to differ. On the same day he issued another document, the so-called "Bulla Salvatoria", in which he asserted that notwithstanding these concessions, made in his last illness when unable to examine them with more care, he did not intend to do aught contrary to the teachings of the Fathers, or the rights and authority of the Apostolic See (Hergenröther-Kirsch, II, 941-2). James F. Loughlin

Eugenius I

Eugenius I

Archbishop of Toledo, successor in 636 of Justus in that see; d. 647. Like his predecessor he had been a disciple of Helladius in the monastery of Agli. He is famous as an astronomer and astronomical mathematician. As a bishop he was virtuous and intelligent. At this period, under the Gothic kings, the councils of Toledo were national diets convoked by the monarch, attended by lay lords; they regulated, to some extent, not only spiritual but temporal affairs. Of these councils Eugenius presided at the fifth, convoked in 636 by King Chintil to confirm his elevation to the throne; he assisted at the sixth, convoked by the same king to take precautions against the disorders of royal elections. This council, contrary to the principles later put in practice by St. Ildephonsus, banished all Jews who did not embrace the Catholic Faith. Eugenius attended the seventh council of Toledo, which was summoned by King Chindaswith and decreed that the bishops of Toledo should reside one month every year in that city.

GOSCHLER, *Dict. encycl. de la théol. cath.* (Paris, 1860); LABBE, *Sacrosancta Concilia* (Paris, 1671), V, 1738, 1749, 1841.

MARK J. MCNEAL

Eugenius II

Eugenius II (the Younger)

Archbishop of Toledo from 647 to 13 Nov., 657, the date of his death. He was the son of a Goth named Evantius, became a cleric in the cathedral of Toledo, and at the death of Eugenius I was elected his successor. The office was so little to his taste that he fled to Saragossa to lead a monastic life, but was forced to return to Toledo by King Chindaswith and take up the government of that see. Though of small stature and feeble health he was a zealous prelate. He undertook the reform of the ecclesiastical chant of the Divine Office and achieved distinction as a writer of prose and poetry. His style is natural and clear, and his exposition easy and agreeable. His poems, though lacking polish and elegance, are full of fire, spirit, and poetic movement. Piety breathes throughout, and the orthodoxy of his faith is notable. His thought is solid, fertile, and gives evidence of a well-trained mind. His feast is kept on 13 November.

Eugenius left two books in prose and verse, published (Paris, 1619) by Father Sirmont, S.J., containing his poems on religious and secular subjects, his recension of the poem of Dracontius on "The Six days of Creation" (Hexaemeron), to which he added a "Seventh Day", and a letter to King Chindaswith explaining the plan of the entire work; he also edited the metrical "Satisfactio" of Dracontius, an account of the writer's misfortunes. Of this work Bardenhewer says (Patrology, tr. St. Louis, 1908, p. 619) that it "underwent a substantial revision at the hands of Eugenius II, Bishop of Toledo, in keeping with the wish of the Visigothic King Chindaswith (642-49); not only were the poetical form and the theology of the poem affected by this treatment, but probably also its political sentiments. It is this revision that was usually printed as Dracontii Elegia (Migne, P.L., LXXVIII, 383-88), until the edition of Arevalo (Rome, 1791, 362-402, and 901-32) made known the original text". He also wrote a treatise on the Trinity probably against the Arian Visigoths. Ferrera mentions a letter of Eugenius to the king and one to Protasius, the Metropolitan of Tarragona, promising if possible to write a mass of St. Hippolytus and some festal sermons, but disclaiming the ability to equal his former productions.

MARK J. MCNEAL

Saint Eugenius of Carthage

St. Eugenius of Carthage

Unanimously elected Bishop of Carthage in 480 to succeed Deogratias (d. 456); d. 13 July, 505. The election was deferred owing to the opposition of the Arian Vandal kings and was only permitted by Huneric at the instance of Zeno and Placidia, into whose family the Vandals had married. The bishop's wise government, charity to the poor, austerity of life, and courage under persecution, won the admiration of the Arians. In his uncompromising defence of the Divinity of the Word he was imitated by the members of his flock, many of whom were exiled with him, after he had admitted Vandals into the Catholic Church, contrary to royal edict, and had worsted in argument Arian theologians, whom the king pitted against the Catholics. Both sides claimed the name "Catholic", the Arians calling their opponents "Homoousians". The conference was held some time between 481 and February, 484, and ended by the withdrawal of the chief Arian bishop on the plea that he could not speak Latin. The Arians being enraged, Huneric persecuted the Catholics, exiling forty-six bishops to Corsica, and three hundred and two to the African deserts. Among the latter was Eugenius, who under the custody of a ruffian named Antonius dwelt in the desert of Tripoli. On setting out he wrote a letter of consolation and exhortation to the faithful of Carthage which is still extant in the works of Gregory of Tours (P.L., LVII, 769-71). Gunthamund, who succeeded Huneric allowed Eugenius to return to Carthage and permitted him to reopen the churches. After eight years of peace Thrasamund succeeded to the throne, revived the persecution, arrested Eugenius, and condemned him to death, but commuted the sentence into exile at Vienne, near Albi (Languedoc), where the Arian Alaric was king. Eugenius built here a monastery over the tomb of St. Amaranthus, the martyr, and led a penitential life till his death. He is said to have miraculously cured a man who was blind.

He wrote: "*Expositio Fidei Catholicae*", demanded of him by Huneric, probably the one submitted by the Catholic bishops at the conference. It proves the consubstantiality of the Word and Divinity of the Holy Ghost. He wrote also an "*Apologeticus pro Fide*"; "*Altercatio cum Arianis*", fragments of which are quoted by Victor de Vita; also pleas for the Catholics, addressed to Huneric or his successors. His letter to the faithful of Carthage has been mentioned above.

MARK J. McNEAL

St. Eulalia of Barcelona

St. Eulalia of Barcelona

A Spanish martyr in the persecution of Diocletian (12 February, 304), patron of the cathedral and city of Barcelona, also of sailors. The Acts of her life and martyrdom were copied early in the twelfth century, and with elegant conciseness, by the learned ecclesiastic Renallus Grammaticus (*Bol. acad. hist.*, Madrid, 1902, XLI, 253-255). Their chief historical source is a Latin hymn of the middle of the seventh century by Quiricus, Bishop of Barcelona, friend and correspondent of St. Ildephonsus of Toledo and of Tajo, Bishop of Saragossa. This hymn, identical with that of Prudentius (*Peridstephanon*, III) for the feast of St. Eulalia of Merida (10 December, 304), was preserved in the Visigothic Church and has reached us through the Mozarabic Liturgy.

There is no reason to doubt the existence of two distinct saints of this name, despite the over-hasty and hypercritical doubts of some. The aforesaid Quiricus of Barcelona and Oroncius of Merida were present at the tenth council of Toledo (656). The latter had already founded (651) a convent of nuns close by the basilica of the celebrated martyr of his episcopal city, had written a rule for its guidance, and given it for abbess the noble lady Eugenia. Quiricus now did as much for the basilica and sepulchre of the martyr of Barcelona, close to whom he wished to be buried, as we read in the last lines of the hymn. The inscriptions on many Visigothic altars show that they contained relics of St. Eulalia; except in the context, however, they do not distinguish between the martyr of Barcelona and the one of Merida. On an altar in the village of Morera, Province of Badajoz, we find enumerated consecutively Sts. Fructuosus and Augurius (Tarragona), St. Eulalia (Barcelona), St. Baudilius (Nimes, and St. Paulus (Narbonne). The Visigothic archeology of Eastern Spain has been hitherto poor in hagiological remains; nevertheless, a trans-Pyrenean inscription found at Montady near Béziers mentions a basilica dedicated to the martyrs Sts. Vincentius, Iñes, and Eulalia (of Barcelona). Until 23 November, 874, the body of the Barcelona martyr reposed outside the walls of the city in the church of Santa Maria del Mar. On that date both the body and the tomb were transferred to his cathedral by Bishop Frodoinus. In memory of this act he set up an inscription yet preserved in the *Muséo Provincial* of Barcelona (no. 864); see also volume XX of Florez, "*España Sagrada*", for a reproduction of the same. Not long before this the martyr, St. Eulogius, having occasion to defend the martyrs of Cordova for their spontaneous confession of the Christian Faith before the Muslim magistrates, quoted the example of St. Eulalia of Barcelona, and referred to the ancient Acts of her martyrdom. Her distinct personality is also confirmed by the existence of an ancient church and monastery in Cordova that bear the name of the

Barcelona martyr; this important evidence is borne out by the Mozarabic calendars examined by the learned Dom Ferotin (below).

F. FITA

Eulogia

Eulogia

(Greek *eulogia*, "a blessing").

The term has been applied in ecclesiastical usage to the object blessed. It was occasionally used in early times to signify the Holy Eucharist, and in this sense is especially frequent in the writings of St. Cyril of Alexandria. The origin of this use is doubtless to be found in the words of St. Paul (I Cor., x, 16); *to poterion tes eulogias ho eulogoumen*. But the more general use is for such objects as bread, wine, etc., which it was customary to distribute after the celebration of the Divine Mysteries. Bread so blessed, we learn from St. Augustine (*De peccat. merit.*, ii, 26), was customarily distributed in his time to catechumens, and he even gives it the name of *sacramentum*, as having received the formal blessing of the Church: "Quod acceperunt catechumeni, quamvis non sit corpus Christi, sanctum tamen est, et sanctius quam cibi quibus alimur, quoniam sacramentum est" (What the catechumens receive, though it is not the Body of Christ, is holy — holier, indeed, than our ordinary food, since it is a *sacramentum*). For the extension of this custom in later ages, see ANTIDORON; BREAD, LITURGICAL USE OF.

The word *eulogia* has a special use in connexion with monastic life. In the Benedictine Rule monks are forbidden to receive "litteras, eulogias, vel quaelibet munuscula" without the abbot's leave. Here the word may be used in the sense of blessed bread only, but it seems to have a wider signification, and to designate any kind of present. There was a custom in monasteries of distributing in the refectories, after Mass, the *eulogiae* of bread blessed at the Mass.

ARTHUR S. BARNES

Saint Eulogius of Alexandria

St. Eulogius of Alexandria

Patriarch of that see from 580 to 607. He was a successful combatant of the heretical errors then current in Egypt, notably the various phases of Monophysitism. He was a warm friend of St. Gregory the Great, corresponded with him, and received from that pope many flattering expressions of esteem and admiration. Among other merits the pope makes special mention of his defence of the primacy of the Roman See (Baronius, *Ann. Eccl.*, ad an. 597, no. 9). Eulogius refuted the Novatians, some communities of which ancient sect still existed in his diocese, and vindicated the hypostatic union of the two natures in Christ, against both Nestorius and Eutyches. Baronius (ad ann. 600, no. 5) says that Gregory wished Eulogius to survive him, recognizing in him the voice of truth. It has been rightly said that he restored for a brief period to the church of Alexandria that life and youthful vigour characteristic of those churches only which remain closely united to Rome. Besides the above works and a commentary against the various sects of the Monophysites (Severians, Theodosians, Cainites, Acephali) he left eleven discourses in defence of Leo I and the council of Chalcedon, also a work against the Agnoetae, submitted by him before publication to Gregory I, who after some observations authorized it unchanged. With exception of one sermon and a few fragments all the writings of Eulogius have perished.

M.J. McNEAL

Eulogius of Cordova

St. Eulogius of Cordova

Spanish martyr and writer who flourished during the reigns of the Cordovan Caliphs, Abd-er-Rahman II and Mohammed I (822-886). It is not certain on what date or in what year of the ninth century he was born; it must have been previous to 819, because in 848 he was a priest highly esteemed among the Christians of Catalonia and Navarre, and priesthood was then conferred only on men thirty years of age. The family of the saint was of the nobility and held land in Cordova from Roman times. The Mussulman rulers of Spain, at the beginning of the eighth century, tolerated the creed of the Christians and left them, with some restrictions, their civil rule, ecclesiastical hierarchy, monasteries, and property, but made them feel the burden of subjection in the shape of pecuniary exactions and military service. In the large cities like Toledo and Cordova, the civil rule of the Christians did not differ from that of the Visigothic

epoch. The government was exercised by the *comes* (count), president of the council of senators, among whom we meet a similarly named ancestor of Eulogius. The saint, like his five brothers, received an excellent education in accord with his good birth and under the guardianship of his mother Isabel. The youngest of the brothers, Joseph, held a high office in the palace of Abd-er-Rahman II; two other brothers, Alvarus and Isidore, were merchants and traded on a large scale as far as Central Europe. Of his sisters, Niola and Anulona, the first remained with her mother; the second was educated from infancy in a monastery where she later became a nun.

After completing his studies in the monastery of St. Zoilus, Eulogius continued to live with his family the better to care for his mother; also, perhaps, to study with famous masters, one of whom was Abbot Speraindeo, an illustrious writer of that time. In the meantime he found a friend in the celebrated Alvarus Paulus, a fellow-student, and they cultivated together all branches of science, sacred and profane, within their reach. Their correspondence in prose and verse filled volumes; later they agreed to destroy it as too exuberant and lacking in polish. Alvarus married, but Eulogius preferred the ecclesiastical career, and was finally ordained a priest by Bishop Recared of Cordova. Alvarus has left us a portrait of his friend: "Devoted", he says, "from his infancy to the Scriptures, and growing daily in the practice of virtue, he quickly reached perfection, surpassed in knowledge all his contemporaries, and became the teacher even of his masters. Mature in intelligence, though in body a child, he excelled them all in science even more than they surpassed him in years. Fair in feature [*clarus vultu*], honest and honourable, he shone by his eloquence, and yet more by his works. What books escaped his avidity for reading? What works of Catholic writers, of heretics and Gentiles, chiefly philosophers? Poets, historians, rare writings, all kinds of books, especially sacred hymns, in the composition of which he was a master, were read and digested by him; his humility was none the less remarkable and he readily yielded to the judgment of others less learned than himself." This humility shone particularly on two occasions. In his youth he had decided to make a foot pilgrimage to Rome; notwithstanding his great fervour and his devotion to the sepulchre of the Prince of the Apostles (a notable proof of the union of the Mozarabic Church with the Holy See), he gave up his project, yielding to the advice of prudent friends. Again, during the Saracenic persecution, in 850, after reading a passage of the works of St. Epiphanius he decided to refrain for a time from saying Mass that he might better defend the cause of the martyrs; however, at the request of his bishop, Saul of Cordova, he put aside his scruples. His extant writings are proof that Alvarus did not exaggerate. They give an account of what is most important from 848 to 859 in Spanish Christianity, both without and within the Mussulman dominions, especially of the lives of the martyrs who suffered during the Saracenic persecution, *quorum para ipse magna fuit*. He was elected Arch-

bishop of Toledo shortly before he was beheaded (11 March, 859). He left a perfect account of the orthodox doctrine which he defended, the intellectual culture which he propagated, the imprisonment and sufferings which he endured; in a word, his writings show that he followed to the letter the exhortation of St. Paul: *Imitatores mei estote sicut et ego Christi*. He is buried in the cathedral of Oviedo.

E. Fita

Eumenia

Eumenia

A titular see of Phrygia Pacatiana in Asia Minor, and suffragan to Hierapolis. It was founded by Attalus II Philadelphus (159-138 B.C.) at the sources of the Cludrus and near the Glaucus, on the site of the modern Ishekli, the centre of a nahie in the vilayet of Brusa (1000 inhabitants). The new city was named by its founder after his brother Eumenes. Numerous inscriptions and many coins remain to show that Eumenia was an important and prosperous city under Roman rule. On its coins it boasts of its Achaean origin. The spread of Christianity is, however, the most interesting fact in its history. As early as the third century its population was in great part Christian, and it seems to have suffered much during the persecution of Diocletian. Its bishop and martyr, St. Thraseas (Euseb., H.E., V, xxiv), must belong to this period. Another bishop, Metrodorus, known by an inscription, lived probably soon after Emperor Constantine. Four other bishops are known by their subscriptions to proceedings of councils — Theodore in 361, Leo in 787, Paul and Epiphanius in 879 (Lequien, *Oriens christ.*, I, 807). The see is mentioned in the "Notitiae episcopatum" as late as the twelfth or thirteenth centuries.

S. PÉTRIDÈS

Eunomianism

Eunomianism

A phase of extreme Arianism prevalent amongst a section of Eastern churchmen from about 350 until 381; as a sect it is not heard of after the middle of the fifth century. The teaching of Arius was condemned by the Council of Nicaea, and the word *homoousion* adopted as the touchstone of orthodoxy. The subsequent history of the Arian history is the history of the endeavours of arianizing sympathizers to get rid of the obnoxious word. The diplomacy of court intriguers forms the dark background against which stand out Eusebians and Semi-Arians. Imperial influence had been all-powerful too long in the official religion to allow imperial ingerence in church affairs to cease with the imperial change of attitude towards Christianity. That influence was exercised through the court prelates tinged with the fundamental rationalism underlying Arianism. They skilfully avoided the real issue, represented the whole affair as merely a question of the propriety of using particular terms, and for a time deluded those who were unfamiliar with the metaphysics of the question. St. Athanasius was represented as a political fire-brand whose watchword was *homoousion*. The Emperor Constantius (337-361), to his great personal annoyance, was obliged to allow Athanasius to return from his second exile (339-346) to Alexandria (31 October, 346). The lull which seemed to follow the return of Athanasius was due to the political circumstances arising out of the disastrous Persian War and the civil war against Maxentius; and it was not until the victory of Mount Seleucus (13 August, 353) that the emperor's hands were freed.

In the meantime a new and more defiant Arian school was arising, impatient of diplomacy, and less pliant to imperial dictation. It frankly returned to the fullest expression of the errors of Arius, and sought to defend it on the rationalizing basis of Aristotelean dialectics. The history of the new school coincides with the life-history of Aetius and Eunomius. Aetius, its founder, successively a goldsmith, physician, and grammarian, turned his attention to theology under Arian influences at Antioch and Alexandria. Aristotle's categories henceforth formed the limits of his knowledge, and the abuse of the syllogism his principal weapon. Ordained deacon at Antioch in 350, he was deposed by Leontius and sought refuge at Alexandria, where he found a disciple in Eunomius. Radical and uncompromising in their heretical thinking, they asserted that in substance and in all else the Son is unlike the Father: *animoios*, "unlike", became their watchword as against the *homoousios* of the Orthodox, the *homoiousios* of the Semi-Arians, and the later *homoios* of the Acacians. Hence the Arian extremists became known as Aetians, and later as Eunomians and Anomoeans. Their doctrines were received favourably by Eudoxius of Antioch and the Synod of Antioch in 358; but the

formulation of their tenets produced a reaction, and in the same year they were condemned by the Semi-Arians at Ancyra and at the Third Synod of Sirmium, and the leaders were exiled for a short time to Pepuza. They reappeared, however, at the Semi-Arian Synod of Seleucia (September, 359), where Acacius of Caesarea rejected the *animoios* and the triumph of the Homoeans led to the exile of Aetius to Mopsuestia in Cilicia and later to Amblada in Pisidia. After 360 the Anomoean Arians ceased to be formidable. Julian the Apostate (361-363) allowed Aetius to return; he was rehabilitated in an Arian synod, and died c.370. Meanwhile Eunomius, supported by his friend Eudoxius, transferred from Antioch to Constantinople (January, 360), became Bishop of the Orthodox See of Cyzicus in Mysia. His flock appealed to Constantius, who obliged Eudoxius to take action against him. Deposed in his absence and banished, Eunomius founded a sect of his own, ordained and consecrated some of his followers. Julian recalled both Aetius and Eunomius, who acquired considerable importance in Constantinople. The Synod of Antioch, 362, explicitly set forth the Anomoean doctrine that "the Son is in all things unlike (*kata panta anomoios*) the Father, as well in will as in substance". The death of Eudoxius in 370 marks the beginning of the end of Eunomianism. The sectaries were excluded from the benefit of Gratian's edict of toleration (end of 378), were directly condemned by the Council of Constantinople (381), and were the objects of special repressive measures in addition to those directed against Arians and heretics in general. Moreover, disruptive forces were at work within the sect. Eunomius died about 395, and for all practical purposes the sect may be said to have died with him.

The dogmatic system of Eunomius is characterized at once by its presumptuous dialectics and its shallowness. His errors concerning Christ are founded upon his erroneous theodicy, which involves the assertion that a God of simplicity cannot be a God of mystery at all, for even man is as competent as God to comprehend simplicity. Eunomius proclaims the absolute intelligibility of the Divine Essence: "God knows no more of His own substance, than we do; nor is this more known to Him, and less to us: but whatever we know about the Divine substance, that precisely is known to God; on the other hand, whatever He knows, the same also you will find without any difference in us" (Socrates, Hist. Eccl., IV, vii). *Agennesia*, he maintains, perfectly expresses the Divine Essence: as the Unbegotten, God is an absolutely simple being: an act of generation would involve a contradiction of His essence, by introducing duality into the Godhead. The Father is *agennetos*, the Son *gennetos*; hence, he held, there must be diversity of substance. The general line of his sophistical reasoning against the Orthodox was as follows: You allow *agennesia* to be a Divine attribute. Now the simplicity of God excludes all multiplicity of attributes. Consequently *agennesia* is the only attribute which befits the Divine nature, the only one therefore essential to Him. In other words,

God is essentially incapable of being begotten. Hence it is folly to speak of a God begotten, of a Son of God. The one God, *agennetos* and *anarchos*, unbegotten and without beginning, could not communicate His own substance, nor beget even a consubstantial Son; consequently there could be no question of identity of substance (*homoousios*) or of likeness of substance (*homoiousios*) between the Father and the Son. There could be no essential resemblance (*kat ousian*), but at most a moral resemblance. For the Son is a being drawn forth from nothing by the will of the Father, yet superior to all Creation inasmuch as He alone was created by the One God to be the Creator of the world. He does not share in the incommunicable Divine Essence (*ousia*), but he does partake in the communicable Divine creative power (*energeia*), and it is that partaking which constitutes the Son's Divinity and establishes Him, as regards creation, in the position of Creator: and as the principle of paternity in God is not the *ousia* but the *energeia*, the sense in which the term *Son of God* may be used is clear.

The works of Eunomius are of less importance in themselves than in the fact that they called forth the best efforts of St. Basil and St. Gregory of Nyssa. His Commentary on the Romans and his letters have perished. His "Apologeticus" (P.G., XXX, 835), written before 365, seeks to refute the Nicene teaching concerning the coeternal and consubstantial Divinity of the Son. It is extremely obscure, and has been frequently misunderstood. For example, Tillemont, VI, 501-516, needs careful checking. It was against this work of Eunomius that St. Basil wrote his "Adversus Eunomium" (*Antiretikon*) in five books. (It is clear, however, that books IV and V are from another pen.) Eunomius retorted with his *Apologia hyper apologias* (Defence of the Defence), written after the death of St. Basil (1 January, 379), wherein he does his best to defend more fully and by new arguments his teaching concerning the nature of God. This work was elaborately refuted by St. Gregory of Nyssa in his lengthy "Adversus Eunomium", of which some twelve books have come down to us preserving the fragmentary remains of the *Apologia*, which are gathered in Rettberg's "Marcelliana" (Gottingen, 1794, pp.124-147). A very full analysis of it is found in Diekamp, "Gotteslehre des hl. Gregor von Nyssa" (1896), I, 123 sqq. The third extant work is his *ekthesis pisteos*, or "Confession of Faith", presented by order to the Emperor Theodosius in 383. (See ARIANISM.)

EDWARD MYERS

Euphemius of Constantinople

Euphemius of Constantinople

Euphemius of Constantinople (490-496) succeeded as patriarch Flavitas (or Fravitas, 489-490), who succeeded Acacius (471-489). The great Acacian schism (484-519), therefore, lasted during his reign. The Emperor Zeno (474-491) had published

a decree called the "Henotikon" (482) that forbade in the current theological discussions any other criterion but that of Nicaea-Constantinople (ignoring the decrees of Chalcedon), carefully avoided speaking of Christ's two natures, and used ambiguous formulae that were meant to conciliate the Monophysites. The "Henotikon" really satisfied no one. Consistent Monophysites disliked it as much as Catholics. But Acacius at the capital, Peter Mongus of Alexandria, and Peter Fullo (Gnapheus) of Antioch, signed it. Pope Felix III (or II, 483-492) in a Roman synod of sixty-seven bishops (484) condemned the emperor's decree, deposed and excommunicated Acacius, Peter Mongus, and Peter Fullo. Acacius retorted by striking the pope's name from his diptychs and persecuted Catholics at Constantinople. When he died, Flavitas, his successor, applied for recognition at Rome, but in vain, since he would not give up communion with Peter Mongus. Euphemius recognized the Council of Chalcedon, restored the pope's name to his diptychs, and broke with Peter Mongus, who died in the year of Euphemius's accession (490). He was therefore a well-meaning person who wanted to restore the union with the Holy See. Unfortunately he still refused to erase the names of his two predecessors (Acacius and Flavitas) from the diptychs, where they occurred among the faithful departed. The pope insisted that heretics and favourers of heresy should not be prayed for publicly in the Liturgy; so during the reign of Euphemius the union he desired was not brought about. But Euphemius was always a Catholic at heart. Before the accession of the Emperor Anastasius I (491-518) he had made him sign a Catholic profession of faith (Evagrius, H.E., III, xxxii). After the death of Pope Felix, Euphemius wrote to his successor, Gelasius I (492-496), again asking for intercommunion on any terms but the condemnation of Acacius. This time, too, the pope refused to modify his condition (Gelasii Epist. et Decret.; P.L., LIX, 13). The patriarch had already summoned a synod at Constantinople in which he confirmed the decrees of Chalcedon (Mansi, VII, 1180). Eventually he fell foul of the emperor. A war against the Bulgars and Slavs was then going on, and Euphemius was accused of treason by revealing the emperor's plans to his enemies. A soldier tried, unsuccessfully, to murder the patriarch, apparently by order of Anastasius. The emperor further wanted to have back his written profession of faith, which Euphemius refused to give up. so he was deposed (496) in spite of the resistance of the people, and Macedonius II (496-511) was appointed successor. Macedonius seems to have been unwilling to take his place and refused to wear patriarchal vestments in his presence. Euphemius was exiled to Asia Minor and died in 515 at Ancyra. He was recognized to the end as lawful patriarch by Catholics in the East (Elias of Jerusalem, Flavian of Antioch, etc.).

ADRIAN FORTESCUE

Saint Euphrasia

St. Euphrasia (Eupraxia)

Virgin, b. in 380; d. after 410. She was the daughter of Antigonus, a senator of Constantinople, and a relation of Emperor Theodosius. Her father died shortly after her birth, and her mother, also Euphrasia, devoted her life thenceforth exclusively to the service of God. To carry out this ideal she abandoned the capital, and, with her seven-year-old daughter, repaired to Egypt, where she dwelt on one of her estates, near a convent, and adopted the nuns' austere mode of life. This example aroused in her daughter the desire to enter the convent, and her mother gave her into the care of the superior, that she might be trained in the ascetic life. After her mother's death she declined an offer of marriage made, by the Emperor Theodosius, on behalf of a senator's son, transferred to the emperor her entire fortune, to be used for charitable purposes, and took up, with a holy ardour, the rigorous practices of Christian perfection. She was about thirty when she died. Her feast is celebrated in the Greek Church on 25 July, and in the Latin Church on 13 March. She is mentioned by St. John Damascene, in his third "Oratio de imaginibus".

J.P. KIRSCH

St. Euphrosyne

St. Euphrosyne

Died about 470. Her story belongs to that group of legends which relate how Christian virgins, in order the more successfully to lead the life of celibacy and asceticism to which they had dedicated themselves, put on male attire and passed for men. According to the narrative of her life in the "Vitæ Patrum", Euphrosyne was the only daughter of Paphnutius, a rich man of Alexandria, who desired to marry her to a wealthy youth. But having consecrated her life to God and apparently seeing no other means of keeping this vow, she clothed herself as a man and under the name of Smaragdus gained admittance into a monastery of men near Alexandria, where she lived for thirty-eight years after. She soon attracted the attention of the abbot by the rapid strides which she made toward a perfect ascetic life, and when Paphnutius appealed to him for comfort in his sorrow, the abbot committed the latter to the care of the alleged young man Smaragdus. The father received from his own daughter, whom he failed to recognize, helpful advice and comforting exhortation. Not until she was dying did she reveal herself to him as his lost daughter Euphrosyne. After her death

Paphnutius also entered the monastery. Her feast is celebrated in the Greek Church on 25 September, in the Roman Church on 16 January (by the Carmelites on 11 February).

Mombritius, *Sanctuarium*, I, 253-255; *Acta SS.*, Feb., II, 535-541; Boucherie in *Revue des langues romanes* (1870), II, 26-40; *Analecta Bollandiana*, II, 195-205. J.P. Kirsch

Euroea

Euroea

A titular see of Epirus Vetus in Greece, suffragan of Nicopolis. Euroea is mentioned by Hierocles (Synecdemus, 651, 6). Justinian transferred its inhabitants to an islet in a neighbouring lake and built there a strong city (Procop., *De aedif.*, IV, 1). We know five bishops of Euroea; the first, St. Donatus, lived under Theodosius I, the last is mentioned in a letter of Pope St. Gregory the Great about 603 (Lequien, *Or. christ.*, II, 143). The site of the city is unknown; Lequien identifies it with Paramythia, which is called Aï Donal (St. Donatus) by the Turks, in the vilayet of Janina. Others have placed it at Limboni, now proved to be Photice, others at Janina itself.

S. PÉTRIDÈS

Europe

Europe

NAME

The conception of Europe as a distinct division of the earth, separate from Asia and Africa, had its origin in ancient times. The sailors of the Aegean Sea applied the Semitic designations Ereb (sunset, west) and Acu (sunrise, east) to the countries lying respectively west and east of the sea; in this way it became customary to call Greece and the territory back of it Europe, while Asia Minor and the parts beyond were named Asia. At a later date the mass of land lying to the south of the Mediterranean was set off as a distinct division of the earth with the name of Libya or Africa.

POSITION, BOUNDARIES, AND AREA

Europe is a large peninsula forming the western part of the northern continent of the Eastern Hemisphere. On the north and west it is separated from North America by the Arctic and North Atlantic Oceans; on the south by the Mediterranean Sea from

Africa and Western Asia. In the east there is no clear natural division from the continental mass of Asia. Such a dividing line may be drawn along the crest of the Ural and Mugadzhar Mountains, the Emba River, Caspian Sea, and the lowlands of the Manitch River, or through the depression that, starting from the Gulf of Obi, extends through the valleys of the Obi, Irtysh, Tobol, and Emba Rivers. The political boundary extends beyond the Ural Mountains towards the east, and beyond the Ural River to the south and west runs along the range called Obtschei Syrt and the Usen River, and encloses within the eastern boundary of Europe the whole of the Caucasus. The most northern point of Europe is North Cape (71 deg. 12 min. N. lat.) on the Island of Mageroe belonging to Norway; the most western point is Cape da Roca (9 deg. 31 min. west of Greenwich) in Portugal; the most southern is Cape Tarifa (35 deg. 59 min. 53 sec. N.) in Spain; the Continent extends as far to the east as 65 deg. longitude east of Greenwich. Its greatest length from north to south is 2,398 miles, from west to east, 3,455 miles. The statement as to the extent of its area varies, according to the position assigned to its eastern boundary, from 3,672,969 sq. miles to 4,092,660 sq. miles. This measurement includes the polar islands Iceland, Nova Zembla, and Spitzbergen, but not the Canary, Madeira, and Azores Is.

GEOLOGICAL FORMATION

Three leading tectonic divisions are to be distinguished in the geological formation of Europe. These appeared in the middle Tertiary period. Western Europe, as far south as the Alps, the Pyrenees, and, reaching beyond the Pyrenees, into the Spanish Peninsula, to the east as far as the Baltic and the Vistula River, is formed of debris and sedimentary deposits. This has been produced by the breaking up and overflowing with water of mountain chains that now exist as secondary ranges, as the Scotch Highlands, the central plateau of France, and the mountain chain of Central Germany. Towards the east is low-lying land that has remained the same from early times. Sweden and Finland form together a great level called the Plain of the Baltic, south-east from which spreads the great Russian plain which is limited by the Ural and Carpathian Mountains, the Crimea, and the Caucasus Mountains. The whole of Southern Europe and a part of Middle Europe is a region of late folded mountain ranges. These begin with the Pyrenees, which have remarkable spurs in the ranges of Provence, in Corsica, and Sardinia. The ranges of Andalusia in Southern Spain find their continuation in the Atlas range, which bends to the east and reappears in Europe in the mountains of the northern coast of Sicily and the Apennines. The north-western Apennines pass into the Alpine system. In the east the Alps are divided into three chains; of these the middle one passes into the Hungarian plain; the Carpathian and Balkan ranges unite in a great bend with the northern chain, and the southern one is continued by the Dinaric Alps and the western chains of the Balkan Peninsula as far as Crete and the south-western

part of Asia Minor. Numerous islands belong to the Continent of Europe. The separation of the islands from the mainland arose in two ways. In the north and west, the encroachment of the sea produced bays and peninsulas and formed islands. In the south, the western and eastern basins of the Mediterranean, those of the Adriatic and Aegean Seas, the Sea of Marmora, and the southern part of the Black and Caspian Seas, were formed by folding; and in this way also were formed the Iberian, Italian, and Balkan Peninsulas and the archipelago lying between Greece and Asia Minor. The rivers of Europe belong to three different basins, namely, to the Caspian Sea, the Atlantic Ocean, including the Mediterranean and Black Seas, and the Arctic Ocean. The courses of the rivers of Europe are much shorter than the courses of those of Asia, Africa, or America. The largest of the European rivers, the Volga (1,978 miles), the Danube (1,771 miles), Dnieper (1,329 miles), Don (1,120 miles), Petchora (1,023 miles), and the Dniester (835 miles), flow into seas that are almost entirely cut off from the ocean, consequently from the world's traffic. They offer, however, little obstruction to navigation, and numerous canals are cut through the main watershed that extends from Gibraltar to the northern Urals. The largest number of lakes is found in the region, formerly covered with glaciers, lying north of 50 deg. N. lat. -- Finland, Scandinavia, Scotland, and Ireland, and the region of the Alps. Besides this lake region, lakes have also been formed in the Alps by folding, in the Balkan by the breaking in of the surface, and in the Apennine Peninsula by volcanic outbreaks.

CLIMATE, FLORA, FAUNA

The climatic conditions of Europe are very favourable. Almost the entire continent, excepting the northern point, belongs to the temperate zone. At the same time it is much warmer than other countries in the same latitude, as, for instance, than eastern North America, because along its western coast flows the Gulf Stream, which leaves the coast of Florida with a temperature of 68 deg. Fahr. and raises the normal temperature on the Portuguese and Spanish coast about 7.2 Fahr. deg., of the British coast by 9 to 14.4 Fahr. deg., and of the Norwegian coast, about 14.4 to 18 Fahr. deg. Since there is no chain of mountains traversing Europe from north to south, as is the case with North America, the influence of the Gulf Stream extends far into the interior of the mainland. On the borders of the Arctic Ocean a rigorous climate prevails, summer is short, and during the greater of the year the temperature is below freezing. This northern region has polar vegetation; the rolling plains called tundras are found on the peninsulas of Kanin and Kola and at the mouth of the Petchora. The sub-arctic zone is found south of this in the Scandinavian Peninsula down to 60 deg. N. lat.; here the climate of the coast, influenced by the sea, is milder in winter and cool in summer. The part of Europe properly included in the temperate zone is divided into the following regions: the countries lying on the Atlantic, Great Britain, Brittany, the Channel, and

northwestern Spain; this section has moderate temperature and large rainfall; west and middle Europe, with an inland climate, less heavy rainfall (about 19.7 inches), and moderate changes of temperature (27 to 45 Fahr. deg.); in this section the southern part of France forms an exception, as also the depression of the Upper Rhine, and the mountains. Beyond this is the section of Eastern Europe or Russia, with a completely inland climate, the variations of temperature amounting to 45 Fahr. deg., and the rainfall to less than 23.6 inches. Finally comes the section of the Euxine comprising the great Hungarian plain, the plain of the Balkan provinces, and southern Russia; in this division the spring is moist and warm and midsummer, hot and dry. The depression of the Caspian belongs to the dry zone of Asia.

The forests of Europe flourish in the temperate zone. In Norway they are composed chiefly of pine; the only deciduous tree found in the highest latitudes is the birch (*betula odorata*); the forests of pines and deciduous trees are found south of 61 deg. N. lat.; this region is further characterized by grass-lands, heaths, and moors. The cultivated land, which in Central and Western Europe is about sixty to seventy per cent, is divided into farm land, cultivated forest land, grass and pasture land. From north to south the succession of grains is as follows: barley, rye and oats, wheat, especially in France and Hungary, and maize. Potatoes are cultivated on less fruitful soil. In this region native fruits are the apple, pear, and cherry; finer kinds of fruit trees, as the peach, apricot, plum, and of nut trees, the walnut and almond, have been introduced from the south. In this region the grape is also cultivated; its northern limit, extending from the mouth of the Loire, passes to Paris and the Rhine near Bonn, then towards the Unstrut and Saale Rivers, and reaches its most northerly point on the Oder below 52 deg. N. lat.; the limit of its cultivation here turns to the south-east until it reaches the Sea of Azov. The region of the Mediterranean, that is the Iberian Peninsula, Provence, Italy to the foot of the Alps, and the Balkan Peninsula south of 42 deg. N. lat., has a subtropical climate. Here flourish trees and bushes which are always green; among those that are cultivated for their products are the citron, orange, fig, almond, mulberry, and pomegranate trees. The fauna of Europe is in accord with the climate and vegetation. In Northern Europe are found the polar bear, polar fox, and reindeer; in the region of forests live the bear, wolf, and lynx, which have, however, almost disappeared; the region of the Mediterranean contains numerous reptiles.

POPULATION, POLITICAL DIVISIONS, AND RELIGIONS

The greater part of the population of Europe belong to the European or Mediterranean race. The main race-groups are the Teutonic, Romanic, and Slavonic. To the Teutonic division belong: the Germans, Dutch, Flemish, English, and Scandinavians; it contains in all 127,800,000 souls, or 32.1 per cent of the whole population; included in the Romanic group are: the French, Walloons, Italians, Friulians, natives of the

Rhaetian Alps, Maltese, Spaniards, Portuguese, and Rumanians, in all 108,100,000, or 27.1 per cent; included in the Slavonic are: the Russians, Ruthenians, Poles, Czechs, Slovaks, Wends, Slovenes, Croats, Serbs, Bulgarians, Letts, and Lithuanians, in all 124,600,000, or 31.3 per cent. A smaller number, about 9,500,000 souls, or 2.4 per cent is composed of other Aryan races: Celts, Greeks, Albanians, Gypsies, Armenians, etc. There are also about 27,900,000, or some 7 per cent, of non-Aryan races: Basques, Magyars, Finns, the tribes of the Ural region, Turks, Kalmucks, and Jews. The total population of Europe amounts to about 420,000,000.

The organization of the present States of Europe may be traced back to the Middle Ages. Most of the States are limited by natural boundaries within which each has developed its own individual character. The States vary greatly in size and population; most of them are constitutional monarchies, the only republics being France and Switzerland. The British Isles, united as Great Britain and Ireland, have a total area of 121,622 sq. miles and 43,722,000 inhabitants; as a natural consequence of the geographical position of the islands, the nation is largely interested in colonial enterprises. The Scandinavian Peninsula is halved by an uninhabited mountain range, thus permitting the existence of two countries, Norway and Sweden. Norway, lying on the Atlantic, has an area of 123,938 miles and 2,300,000 inhabitants; Sweden, on the Baltic, has an area of 172,973 sq. miles and 5,261,000 inhabitants. The peninsula and islands lying south of Norway and Sweden form the third Scandinavian state, Denmark, that controls the entrance to the Baltic. Denmark has an area of 14,672 sq. miles and 2,450,000 inhabitants. France, the western part of the continental mass, has an area of 206,950 sq. miles and a population of 39,060,000; it has the advantage, excepting towards the north-east, of having for its boundaries either seas or mountain ranges. Between Western and Central Europe lie the so-called "buffer" States: Belgium with an area of 11,197 sq. miles and 7,075,000 inhabitants; the Netherlands, area 12,741 sq. miles, inhabitants 5,510,000; Switzerland, area 15,830 sq. miles, inhabitants 3,425,000. The German Empire, area 208,880 sq. miles inhabitants 60,605,000, covers the greater part of central Europe. Germany borders upon nearly all the great powers of Europe and has, therefore, developed a large army. The State having the least organic union geographically and ethnographically, and consequently in constant danger of internal disorganization, is the Austro-Hungarian Monarchy. Its area is 261,004 sq. miles, population 49,092,000 souls. Russia, area 2,081,079 sq. miles, inhabitants 119,115,000, occupies the lowland of Europe and, in its largest extent, stretches beyond Europe into the Asiatic plain. Southern Europe embraces numerous states with sharply defined boundaries. The Iberian Peninsula is divided between Portugal and Spain; Portugal, a country lying on the ocean and having a great maritime past, has an area of 43,363 sq. miles, inhabitants 5,016,000; Spain, area 191,892 sq. miles, inhabitants 18,249,000.

Italy belongs completely to the lands of the Mediterranean; its area is 110,811 sq. miles, population 33,604,000. The physical contour of the Balkan Peninsula is so broken up by mountain ranges that it fails to show any one organically large State. Its divisions at the present time are: Bulgaria, 37,066 sq. miles, population 3,744,400; Montenegro, 3,475 sq. miles, population 228,000; Rumania, 50,579 sq. miles, population 6,392,000; Servia, 18,533 sq. miles, population 2,677,000; European Turkey, 65,251 sq. miles, population 6,130,000; Greece, 25,000 sq. miles, population 2,440,000.

By far the greater proportion of the inhabitants of Europe belong to the Christian Faith. One-fourth of the population are Protestants, somewhat over one-fourth belong to the Oriental Christian Churches, nearly 45 per cent are Catholics, 41 per cent are non-Christian. In the Romanic States 99 per cent of the population are Catholic; in the Teutonic States 74 per cent are Protestant and less than one per cent non-Christian. In the States of Eastern Europe, Austria-Hungary, Russia, and the Balkan provinces, 57 percent belong to the Oriental Churches, 9.2 per cent are non-Christian, 6 per cent are Protestant, and 27 per cent are Catholic. The only heathen are the Kalmucks living between the Ural and Caucasus mountains, the Finns of the Volga, and the Samoyedes. About 8,250,000 persons or 2.1 per cent of the whole population of Europe are Mohammedans in belief; these are limited to several tribes of the Uralo-Altai family in Russia, and to the former territories of the Ottoman Empire; among the Mohammedans are a large portion of the Albanians, some of the Serbs in Bosnia and Herzegovina, and a part of the Bulgarians. The Jews of Europe number 9,000,000 or 2.2 per cent; they are to be found chiefly in Russia, in the Austro-Hungarian Monarchy, Rumania, and Turkey. (The above figures are based on Hettner, *op.cit. infra.*)

CHRISTIANITY

European civilization is founded on that of the East; from Western Asia and Egypt Europe received its food-plants, domestic animals, method of writing, numerals, the beginnings of art and science, and the higher forms of state organization and religion. The various States of Greece, the European neighbour of Asia, transmitted these by trade and the foundation of colonies to the countries lying on the shores of the eastern Mediterranean and to Southern Italy. Rome from its central position imparted them to Western and Northern Europe and united the civilized parts of the continent into a great empire. At the time of its greatest extent imperial Rome included, on European soil, the present countries of Italy, Spain, France, England, Germany west of the Rhine and south of the Danube, the countries bordering on the Danube as far as the Black Sea, and the whole Balkan Peninsula, besides all the islands of the Mediterranean. Christianity, too, came from the East by way of Greece and Rome. The connexion existing between the various Roman provinces and the wide prevalence of the Latin and Greek tongues were most favourable to its spread. When the structure erected by the

Caesars fell to pieces, the Christian Faith not only entered into its inheritance but also subdued all those barbarian peoples that had up to then defied the imperial power. The Gospel was brought to Rome by colonies of Jewish Christians who kept up close relations with Palestine, their mother country. St. Paul brought Christianity to Greece on his second journey (49-52 A.D.) when he founded, with the aid of Silas, Timothy, and Luke, Christian communities in Philippi, Thessalonica, Beroea, Athens, and Corinth. St. Paul's great letters and his journeys to Italy, perhaps also to Spain, prepared the way for the close connexion between the Roman and Greek Christians and strengthened them for the work of spreading the Gospel. In fact the first persecution under Nero in 64 was not able to crush the new movement, and the same is true of the many other later persecutions.

Towards the end of the first century, under Clement, the head of the Church at that time, there was a close bond between Rome and Corinth. It is also to be assumed that in the meantime all the commercial cities on the coasts of the Mediterranean had Christians in their midst, and that before long the regions adjoining these cities accepted the Gospel. According to tradition the Church in Gaul was founded by Trophimus, who was sent there by St. Paul; to Crescentius, a disciple of the Apostles, is ascribed the preaching of the Gospel in Vienne and Mainz; and to Dionysius the Areopagite, the founding of the Church of Paris. To Eucharius and Maternus, two disciples of St. Paul, are attributed the founding of the Churches of Trier and Cologne. It is certain that flourishing dioceses arose in Lyons and Vienne during the reign of Marcus Aurelius (161-80). At the beginning of the third century, according to the testimony of Tertullian (*Adv. Judaeos*, i), various tribes of Gaul had accepted Christianity. At about the same date Irenaeus (*Adv. haereses*) speaks of Churches in Germany, and the new faith had at that time spread into all the provinces of the Spanish Peninsula. According to the Venerable Bede (*Histor. gentis Angl.*, I, iii), the first missionaries came to England during the reign of Pope Eleutherius (177-90). By the opening of the third century the British Church had spread beyond the Roman possessions in Britain and may even have embraced Ireland. In the meantime the barbarians living along the northern boundaries of the Roman Empire had begun their migrations and predatory incursions. Along this border lived the tribes of the Teutonic family, divided by the Oder into the East Germans and West Germans. The East Germans included the Ostrogoths and Visigoths, Burgundians, Vandals, Heruli, Rugii, and Scyrri. The West Germans were divided into the Ingvaeones or Germans on the sea-coast, including the later Frisians and Anglo-Saxons; the Istvaeones or the Germans of the Rhine, including the Franks between the Weser and Rhine; the Hermiones, among whom were the later Thuringians and the upper German tribes of the Alamanni and Bavarians (*Bajuvarii*). As early as the years 161-80 the Marcomanni, a West German tribe, ad-

vanced as far as Aquileia; they were defeated, but introduced northern elements into the population. After this failure the current of the migration divided into two streams: one to the south-east, the migration of the East Germans; one to the south-west, the migration of the West Germans. Of the East Germans, the Goths reached the lower Danube and the Black Sea and divided, according to these respective positions, into the Ostrogoths and Visigoths. In 375, on account of the pouring in of Asiatic hordes through the gateway of the nations between the Urals and the Caspian, the Ostrogoths came under the power of the Huns. The Visigoths, who were also hard pressed, retreated towards Transylvania and received land somewhat south of this from the Emperors Valens and Theodosius. When, after the death of Theodosius, the Roman Empire was divided in 395 into the Western and Eastern Empires, ruled respectively by his sons Honorius and Arcadius, the Visigoths under Alaric plundered Thrace and Greece and, with the permission of Arcadius, settled in Illyria. From here they pressed toward Italy and in 410 even entered Rome. They then turned towards South-Eastern Gaul and in 419 founded the first German kingdom on Roman soil, its capital being Toulouse; they also conquered a large part of Spain. In 507 the Visigoths were forced to give up their possessions in Gaul to the Franks, and in 531 the capital of the Visigothic Kingdom was transferred to Toledo.

The recall from the Rhine of the Roman legions needed for the struggle against Alaric left the way to the south-west open to two other East German peoples, the Burgundians and the Vandals. The Burgundians, who had formerly lived between the Oder and the Vistula, crossed the Rhine in 406 and founded a kingdom having its capital at Worms; in 437 this kingdom was broken up by the Roman governor Aetius, but another arose in 443 around Geneva and Lyons; this, however, in 532, was absorbed into the Kingdom of the Franks. In 406 the Vandals left their home on the northern slope of the mountains called Riesengebirge, and in union with the Alani and Suevi passed through Gaul into Spain; the Visigoths drove them out of Spain into the Roman provinces in Africa, whence for a long time they controlled the Mediterranean and in 455 ravaged Rome. In 476 Odoacer, the leader of the mercenaries made up of Heruli, Rugii, and Scyrri, seized the government and called himself King of Italy. At almost the same time the Ostrogoths in Pannonia were again free, as the power of the Huns was broken in the great battle on the Catalaunian Fields near Châlons-sur-Marne in 451. Theodoric, the King of the Ostrogoths, conquered Odoacer in 489 and created a kingdom (493-526) that embraced Italy, Sicily, a part of Pannonia, Rhaetia, and the Province; this kingdom went to pieces in 553. The Ostrogoths were followed by the Lombards, a tribe of the lower Elbe, who, passing through Pannonia, reached Italy in 568 under their King Alboin; it was not until 771 that the Lombards were brought under subjection by the Franks. All these peoples were to disappear in order, by their

absorption into the civilization of Rome, to bring about the union of Christianity, the state religion of Rome since the time of Constantine the Great, with a more stable power, the united West Germans.

The West Germans, although their migrations were not very extended, had changed their habitations as follows: in the fourth century the Alamanni advanced into Alsace and in the fifth century took entire possession of it, spreading towards the north as far as Coblenz. The Franks were divided into the Ripuarian and Salian Franks; the former settled on both sides of the middle and lower Rhine, the latter advanced from the Scheldt to the Somme. Towards the end of the third century the Saxons advanced from the Elbe to the Rhine; in the fifth century, with the aid of the Angles, they conquered Britain; the former inhabitants of Britain took refuge in Wales and France and gave their name to Brittany. The Frisians settled on the coast and islands of Schleswig-Holstein; the Thuringians spread from the lower Elbe to the southern bank of the Main. The Bajuvarii went farthest south. At the time of the birth of Christ they lived in modern Bohemia; about 500 their territory extended from the Lech to the Enns and from the Danube to the junction of the Eisack and the Adige. The region occupied by the tribes just named enlarged the scene of European history; all that was now needed was the political and spiritual union of these peoples to make them the leading people of Europe. The political union was brought about by the Franks, the spiritual union by Christianity. In the end these were combined into a form of theocracy which, by a rapid series of victories, conquered not only Southern Europe, but also Middle and Eastern Europe as well.

Just as the fifth century passed into the sixth (481-511) Clovis, King of the Salian Franks, forcibly subdued the most important of the surrounding tribes; he led them to embrace Christianity after his own conversion. Clovis first united what was left of the Roman Empire on the Seine and Loire with his own domain and made Paris his capital. After this he subdued the Alamanni on the Rhine, Mosel, Lower Main, and Neckar; as the champion of the doctrines of Roman Christianity, he conquered the King of the Arian Visigoths near Poitiers (507) and seized the Visigothic territory between the Loire and the Garonne. By overthrowing the petty Salian chiefs and the royal family of the Ripuarian Franks, he made himself the ruler of all the Frankish tribes. The work was completed by his four sons, who seized the territories of the Thuringians and Burgundians, forced the Ostrogoths to give up Provence and Rhaetia, and obtained by treaties sovereignty over the Bajuvarii.

Thus was laid the foundation of the Franco-Christian Empire which opened to Christianity a new missionary field to be won over to the Faith only by properly trained apostles. The training was given in the monastic institutions which, in imitation of the East, had now spread over all of Western Europe. One of the chief factors in the

conversion of the heathen was the Order of St. Benedict of Nursia, encouraged by Gregory the Great. The precursors of the Benedictines were St. Patrick (432) and St. Columba (about 550), who converted Ireland and Scotland, while the Anglo-Saxons received Christianity from the Benedictine Augustine (596), who had been specially sent by Rome. At the death of St. Patrick there were in Ireland several bishops, numerous priests and many monasteries; his own see was Armagh. Columba founded the celebrated monastery on the Island of Iona, between Ireland and Scotland, which was the centre of the Scotch missions and dioceses. The Abbot Augustine and his companions erected the metropolitan Sees of Canterbury (Durovernum), York (Eboracum), and the see of London; in the course of the seventh century the successors of Augustine, Mellitus and Theodore of Tarsus, completed his work.

A glorious band of self-sacrificing apostles of the Faith, from Columbanus and Gallus to Boniface, carried Christianity from the British Isles to the Continent. They founded their work on what scanty remains of Christianity still existed in the former Roman provinces. In the fifth century Severinus and Valentinus laboured in south-eastern Germany. They found the remains of nearly obliterated sees in Lorch, Pettau, Windisch in Switzerland, Chur, Basle, Strasburg, Avenches in Switzerland, Martigny, and Geneva, but the Teutonic migrations and the disorders consequent on them had almost destroyed the life of the Church. About 610 Columbanus crossed the Vosges mountains, where he had founded the monasteries of Annegray and Luxeuil, and came to Lake Constance; here from Bregenz as a centre he preached Christianity, while his companion St. Gall became the founder of the celebrated monastery of St. Gall. In the early part of the seventh century the monks Agilus and Eustasius, of the monastery of Luxeuil, preached the Gospel in Bavaria; they were followed by Rupert of Worms and Emmeram of Aquitaine. St. Corbinian laboured as the first Bishop of Freising, and Kilian in Würzburg. Ecclesiastical life on the Rhine was largely developed by Bishops Nicetius of Trier, Cunibert of Cologne, Dragobodo of Speyer, Amandus, Lambert, and Hugo of Maastricht. The Gospel was brought to the Frisians by Wilfrid of York and Willibrord of Northumbria; the latter erected a see at Utrecht. Willibrord's companion, Suidbert, went into the countship of Mark in the region of the Weser, Lippe, and Ruhr Rivers; the brothers Ewald laboured with little success among the Saxons. An organization including all these countries was not established until the appearance of the greatest of the apostles of the Germans, St. Boniface. He entered on his career in the time of the Carolingian Mayors of the Palace, who were destined to realize the union of Church and State in Western Europe.

Repeated divisions of the kingdom, disputes as to succession, civil wars, and the power of the nobles almost brought the great Frankish kingdom to dissolution. It was saved from utter ruin by Pepin of Heristal, Mayor of the Palace (*Major domus*), who

gradually took control of the government. In 687 Pepin won for himself the position of Mayor of the Palace of Neustria and Burgundy, in addition to that for Austrasia which he already held; in this way he reunited the kingdom. He then undertook the conquest of the tribes which had broken loose from the Frankish rule and encouraged the missions to the West Frisians. His son, Charles Martel, who was not less active, held a position of such power that he was able, in the great battle of Poitiers, 732, to protect Christian German civilization against the attempt of Islam to conquer the world. Pepin the Short, the son of Charles, brought about the union of Church and State which had so great an influence on the history of the world. Having obtained the title of king in 752, his first task was to defend Pope Stephen II, who had appealed to him for aid, from the attacks of the Lombards; this was followed by the so-called "Donation of Pepin," a grant of territory to the pope which was the foundation of the later States of the Church. Their mutual engagements fixed not only their own policy but also that of their successors. Like Pepin, his famous son, Charlemagne, lent his support to the Holy See, and all his conquests were undertaken for the good of the Church and Christianity. By successful campaigns against Aquitaine, the Lombards, Avars, Saxons, and Danes, and by treaties with the Slavic peoples, Charlemagne increased his domain until it extended from the Ebro and the Apennines to the Eider River in Schleswig-Holstein, and from the Atlantic to the Elbe and the Raab. His kingdom became a world-empire and he himself one of the great rulers of history, worthy of reviving the Western Roman Empire. He was crowned, Christmas Day, 800, by the pope, and the new empire rested essentially on the basis of an alliance with the Church. Its ideal was the Kingdom of God on earth, in which the emperor by Divine appointment is God's viceroy in order to lead and rule all races as divided into nations, classes, and distinctions of rank according to Divine will.

Pepin the Short had been filled with this lofty conception; consequently extraordinary success attended the missionary labours of the Church under both rulers. As early as 716, under the rule of Charles Martel, the Anglo-Saxon monk Winfrid, better known as Boniface, landed on the Continent; he was to be the reformer and organizer of German ecclesiastical life. He always laboured in union with Rome, and was himself a missionary in Frisia with Willibrord, then, in 722, in Hesse and Thuringia, and in 736, in Bavaria. Having been made an archbishop and having received authority from Rome, he founded a number of monasteries, e.g., that of Fulda, and the Bishoprics of Eichstätt, Würzburg, Buraburg, and Erfurt. By means of synods held every five years he brought about the closer union between the old and new dioceses, and placed the newly founded sees in Thuringia and Hesse, as well as those of Speyer, Worms, Cologne, Utrecht, Tongern, Augsburg, Chur, Constance, and Strasburg, under Mainz as metropolitan see, of which he became archbishop in 746. In the reign of Charlemagne the

large territories of the Saxons and Avars were added to the lands thus organized, and these new regions also received missionaries and bishops. The result was the founding of the Dioceses of Bremen (787), Paderborn (806), Werden, and Minden in the country of the Engern, Osnabrück and Münster (785) in Westphalia, Halberstadt and Hildesheim (817) in Eastphalia; the metropolitan of all the Saxon sees was Bremen (834). The conversion of the Avars had been attempted by the Bavarian Duke Tassilo II; when the East Mark was founded the Avars came under the influence of the sees and monasteries established in this country; after their subjugation they were placed partly under the jurisdiction of the Bishop of Salzburg and partly under that of the Patriarch of Aquileia.

From these points, Christianity, as formerly in the Roman Empire, extended beyond the boundaries of Charlemagne's dominions, and new tribes and peoples were evangelized, while, at the same time, Christian civilization was peacefully established within the Frankish Empire. The monastery of Corvey on the Weser, and the Sees of Bremen and Hamburg (831) were the mission centres for the northern provinces. The monk Anschar of Corvey, first Archbishop of Hamburg, laboured with great zeal as Apostolic legate in Denmark, Sweden, and Norway; his successors were equally active as missionaries and bishops. However it was not until the reign of Canute the Great (1014-35) that the victory of Christianity in Denmark was assured; in 1104 Lund was made the metropolitan See of Scandinavia; in 1163 Upsala became the metropolitan See of Sweden, and about the middle of the twelfth century Trondhjem was made the same for Norway. Iceland was won for Christianity about the year 1000 and was divided into the two sees of Skalhöld and Hólm. The inhabitants of the Orkneys, Hebrides, Faroe, and Shetland Islands were converted about the same time as Iceland; they were at first placed under the metropolitan See of Hamburg-Bremen, which had been united in 849, and later under the jurisdiction of the metropolitan See of Norway.

During the period of the Teutonic migrations the Slavs had come into contact with Christianity and were converted partly by Christian rulers, as in Thrace, Macedonia, Greece and Dalmatia, partly through the influence of neighbouring Christian countries, as in Carinthia. In 806 the Bishop of Passau undertook the conversion of Moravia; that of Pannonia was attempted by Archbishop Adalram of Salzburg (821-36). In both these countries a great missionary work was done by Cyril and Methodius; the latter, Methodius, became Archbishop of Moravia and Pannonia. The work of converting Bohemia began in the year 845; the country was at first under the care of Ratisbon; in 973 a diocese was founded in Bohemia itself at Prague, which was suffragan to Mainz. Poland was brought to Christianity by its ruler Duke Mieczyslaw (963), and in 968 he erected the Bishopric of Posen. In the year 1000 Gnesen was made a metropolitan see, its suffragan sees were Kolberg (1065), Breslau (1000), and Cracow (1000).

Finally, in the reigns of Heinrich I and Otto I the northern Slavs, living in regions subsequently German, namely the Wends, including those living in Pomerania, as well as the Obotrites and Sorbs on the Oder, Vistula, and Elbe, in Lausitz, and Saxony were forcibly Christianized. The new Sees of Havelberg, Brandenburg, Meissen, Zeitz, Merseburg, and Oldenburg (Stargard) served as points from which the work of conversion could be carried on; Magdeburg was the centre of the entire Slavonic mission.

It was during this same period that the Greek Church spread through the eastern part of Europe. In 955 the first Christian princess of Russia, Olga, was baptized at Constantinople; during the reign of her grandson Vladimir, baptized 989, Christianity became the religion of the country. In 864 the Bulgars, at the command of their prince Bogoris, accepted Christianity as a people, and from 870 were under the ecclesiastical control of Constantinople. A bishop sent from Constantinople introduced Christianity among the Magyars, or Hungarians; the work was completed by German missionaries sent in pursuance of the masterful policy of the Saxon emperors. The first Christian ruler of Hungary was Stephen (997-1038).

Many sacrifices, however, were still necessary in order to keep what had been gained for Christianity and to protect these gains against the threatened dangers of Mohammedanism and heathenism. These sacrifices were freely made by medieval Christian Europe. Under the careful training of their appointed guardians, the Catholic orders, the various nations and their rulers were filled with Christian thoughts and feelings. Although the conception of their respective positions held by the human representatives of the secular and spiritual power inevitably led to friction, especially in the age of the Hohenstaufen emperors, nevertheless all were conscious of their common duty to protect faith and civilization against foes both in Europe and outside of it. A convincing proof of this was the courageous struggle of Europe against the attempted inroads of Islam, and especially the expeditions of conquest to the Holy Land repeatedly undertaken by the various nations of Europe acting together. Spain, which since 711 had been almost entirely under the control of the Arabs, was able in 1212 to drive them as far back as Granada; in 1492 Granada also fell. From 878 Sicily had been in the hands of the Saracens, but it was freed by the courageous Normans (1061-91). The so-called Crusades (1061-1244) continued with interruptions for nearly two hundred years; among those who shared in them were monks, as Peter of Amiens and St. Bernard; bishops, as Otto of Freising; rulers of the greatest nations of Western Europe, as the German emperors, Frederick Barbarossa and Frederick II; the French kings, St. Louis and Philip II, and the English Richard the Lion-Hearted. Orders of knights, as the Order of St. John, were formed to take part in these expeditions. The original aim of the Crusades, the freeing of Palestine from the control of non-Christians, it is true, was not attained. But the power of Mohammedanism was weakened for a

long time to come; the civilization of Western Europe, moreover, gained from the Orient the best the East had to give and thus was greatly aided in its development.

A more lasting success, however, followed the attempts, patterned on the Crusades, to carry on wars of conversion and conquest in those territories of northeastern Europe peopled by tribes that had lapsed from the Faith or that were still heathen; among such pagans were the Obotrites, Pomeranians, Wiltzi, Sorbs, Letts, Livonians, Finns, and Prussians. The preparatory work was done in the twelfth century by missionaries of the Premonstratensian and Cistercian Orders. They were aided with armed forces by Duke Henry the Lion of Saxony, Albert the Bear of Brandenburg, Boleslaw of Poland, and St. Erik IX of Sweden. From the beginning of the thirteenth century Crusades were undertaken against Livonia, Semgall, a division of the present Courland, and Esthonia; Teutonic Knights conquered Prussia after a struggle that lasted more than fifty years. In Lithuania Christianity did not win the victory until 1368. After this only the Turks, in the south-eastern corner of the Continent, were a cause of alarm to Christian Europe for centuries. The decline of the power of the Eastern Empire drew the Turks over the Bosphorus; in 1365 they had control of Adrianople; in the course of the fourteenth century the Serbs, Bulgars, Macedonians, and the inhabitants of Thessaly became their subjects. In 1453 the Turks took Constantinople, in 1461 Trebizond, in 1480 even Otranto in Apulia; after 1547 they owned half of Hungary. It was not until the eighteenth and nineteenth centuries that their possessions were reduced to their present boundaries, thus limiting Mohammedanism to a small part of the population of Europe.

At the beginning of modern times a great change took place in the boundaries of the European States. The cause was that ecclesiastical movement known as the Reformation, which placed in opposition to the unity of Catholicism in Western Europe the numerous religious associations that together form Protestantism. The apostasy of the various countries and cities, which began soon after Luther first appeared, was brought about by the most varied causes, described elsewhere, and was facilitated by the violent procedure of the petty princes who had absolute sovereign power over their subjects. The first of the ruling princes to make the change was Albert of Brandenburg, Grand Master of the Teutonic Knights (1525); he was followed by the Elector John of Saxony, Philip, Landgrave of Hesse (1527), and at almost the same date by nearly all the German imperial cities. The movement soon gained the northern countries, Denmark, Sweden, Norway, and the Baltic provinces; these all gave their adherence (1530) to the so-called Augsburg Confession, while the upper German imperial cities, Strasburg, Constance, Lindau, Memmingen, held to the Tetrapolitan Confession of the so-called Reformed Church founded by Zwingli and especially strong in Switzerland. The Reformed Church also found adherents in the Palatinate, and at the beginning of the seventeenth century

in Hesse-Cassel and Brandenburg. The Anglican Church was established in 1549 in Great Britain; in 1559 the French Reformed Church adopted the "Confessio Gallicana"; in 1560 the Scotch Reformed the "Confessio Scottica"; from 1592 the Reformation in Scotland adopted a Presbyterian form of government. Since 1562 the Reformation in the Netherlands has held to the "Confessio Belgica," and the Reformed Church in Hungary since 1567, to the "Confessio Hungarica." Soon the Counter-Reformation, called into life by the Council of Trent (1545-63) to prevent the loss of the whole of middle Europe, appeared; its success was assured by the aid of the Society of Jesus. In this way various princes and bishops who were desirous of doing their duty were enabled to hold their countries to the Catholic Church, as the Duke of Cleves, the Electors of Mainz and Trier, the Bishops of Augsburg, Würzburg, Bamberg, Münster, Constance, Basle, the Abbey of Fulda, but especially the Dukes of Bavaria and the Hapsburg dynasty within their Austrian provinces. Soon the hostility between the two ecclesiastical parties grew so bitter that a trifling incident sufficed to bring on a terrible religious conflict, the Thirty Years War (1616-48). Two religious confessional leagues confronted each other in Germany: the Catholic League, which was formed in 1609 among the Catholic States of the German Empire and had for its leader the vigorous Duke Maximilian of Bavaria, and the Union in which, from 1609, most of the Protestant and cities combined under the leadership of Frederick IV of the Palatinate. Foreign powers -- Denmark, Sweden, and France -- also took part in the war. The result of the Thirty Years' War, confirmed in the Peace of Westphalia, laid the foundation of confessional relations as they now exist. Neither internal commotions nor seemingly mighty political revolutions, such as the illuminism of the French Encyclopedists and the German neo-classicists, the temporary supremacy of rationalism, and the French Revolution, with its consequent wars, greatly changed these relations. The present condition as developed during the course of the nineteenth century and up to the present time is as follows.

PRESENT CONDITION OF RELIGION IN EUROPE

(1) Relations of the Different States to the Religious Communion

In the German Empire the formation of religious denominations and their religious worship are subject to the legislation of the several States. Some States allow complete freedom, as Prussia, Würtemberg, Hesse, and Saxe-Coburg-Gotha; others supervise religious worship, as Baden, Waldeck, and Mecklenburg; others again make the establishment of religious denominations depend on the Government, as in Bavaria, Saxony, Brunswick, Saxe-Meiningen, and Alsace-Lorraine. The Catholic and the Evangelical Churches are regarded as privileged and public corporations. In England and Wales the Anglican is the State Church, its head being the king; the fundamental principles are defined by Parliament. There is a similar arrangement for the Presbyterian State Church in Scotland where, however, the organization is somewhat freer. On the other

hand the Anglican Church of Ireland is, since 1869, no longer a State Church. The Dissenters, who in 1689 were only conditionally tolerated, have now equal rights. In France the Separation Law of 9 December, 1905, brought about the separation of Church and State and provided for the formation of *Associations cultuelles* for the exercise of religion. In Italy the Constitution originally declared the Roman Catholic religion the religion of the State, but gradually all privileges have been withdrawn from it; besides the Roman Catholic Church, the Evangelical Waldensian Church, the National Greek Church and the Jewish communities are organized as Churches with separate constitutions. In Spain and Portugal the State religion is the Roman Catholic. In Belgium the Catholic, Protestant, Jewish, and Anglican forms of worship are recognized by the granting of salaries from the State to those having ecclesiastical charges. Outside of these any religious community is a private association. The Netherlands grants equal protection to all confessions. So does Switzerland, excepting that in this country a more exacting control is exercised over the Roman Catholic Church. In Denmark the Evangelical Lutheran Church is the State Church, at least inasmuch as its ministers are paid by the State and subject to removal by the State; other religious communities have no claim to state support. The case is the same in Sweden, where, in addition, the condition is laid down that the king, the members of the Council of State, and foreigners who are appointed teachers at the university, all subscribe to some evangelical confession. In Norway this ordinance is enforced for the head of the State. In Austria the Churches and religious associations recognized by law are as follows: the Roman Catholic, the Uniat Greek, and Uniat Armenian Churches, the Evangelical Churches of the Augsburg and Helvetic Confessions, the Orthodox Greek Church, the Jewish religious community, the religious association of the Russian sect of the Lipovani and the Oriental Armenian in Bukowina, the Old Catholic religious community, and the Moravian Brethren (*Herrnhuter*). The expenses of the Roman Catholic and Orthodox Greek Churches are met from a fund controlled by the State and obtained from the secularization of Church property in the reign of Joseph II. In Hungary the Roman Catholic Church was originally the state religion; the State grants in addition free exercise to other Christian confessions and to the Jewish faith. Croatia-Slavonia recognizes only the Roman Catholic and Uniat Greek Churches, the Orthodox Greek and Protestant Churches, and the Jewish belief. In Bosnia and Herzegovina the ruling confessions are the Orthodox Greek and Roman Catholic Churches, and Mohammedanism. The State Church of the Balkan provinces is the Orthodox Greek. The State Church of Russia is the Orthodox Greek Russian Church; the other Christian and non-Christian confessions are tolerated, the Jews have only limited rights.

(2) Organization of the Religious Communions

The Evangelical Church distinguishes three forms of organization: (a) The episcopal, in which the ruler of the country with the aid of a subordinate hierarchy exercises ecclesiastical authority. This is the form in force in Sweden, Norway, Denmark, and Finland. (b) The consistorial organization, in which the ruler is aided by a consistory made up of ecclesiastical and secular members. This form is found in Mecklenburg-Schwerin, Mecklenburg-Strelitz, Saxe-Coburg-Gotha, Saxony-Altenburg, Schwarzburg-Rudolstadt, Schwarzburg-Sonderhausen, the two principalities of Reuss, Schaumburg-Lippe, Lübeck, Bremen, Alsace-Lorraine, and Russia. (c) The synodal form of organization and similar Presbyterian associations which are based on assemblies of elected representatives and the ordinances passed by these. This form of organization is in existence in Austria-Hungary, Prussia, Bavaria, Saxony, Württemberg, Baden, Hesse, and other German States, where the consistorial system is not in force. The synodal organization also exists among the non-Anglican Churches in Great Britain, in France, among the Italian Waldenses, in the Netherlands, Belgium, Switzerland, and Spain; also in connexion with the episcopal form of church government in Sweden and Finland. The Anglican Church, called in England and Wales the Established Church of England, and in Ireland the Church of Ireland, is episcopal in government; in Ireland the episcopal and synodal systems are united. The head of the Church is the king. England and Wales are divided into the two church provinces of Canterbury and York. The Archbishop of Canterbury is the Primate of All England; under Canterbury are 28 suffragan dioceses; York consists of an archdiocese and 9 suffragan bishoprics. Ireland has 2 archdioceses: Armagh, which has the primacy of all Ireland, and Dublin with 10 suffragans; Scotland has 7 dioceses. The organization of the Oriental Greek Church varies in different countries. In Russia the head of the Church is the Tsar, who appoints the members of the Holy Synod, the highest ecclesiastical body. In Turkey the Oecumenical Patriarch is the head; under him are 10 or 12 metropolitans. In Rumania a national synod is the highest ecclesiastical authority; in Servia a metropolitan with the bishops; in Bulgaria the church government is vested in an exarch, aided by archbishops, bishops, and archpriests. The Holy Synod of Greece consists of five prelates or bishops named by the king. In the Austro-Hungarian Monarchy there are 3 provinces of the Oriental Greek Church: the Austrian, or Province of Czernowitz, with the suffragan Dioceses of Zara and Cattaro, the Archdiocese of Karlowitz (Patriarch-Archbishop), with 6 suffragans, and the Archdiocese of Herrmannstadt, with 2 suffragans. Bosnia and Herzegovina have each a metropolitan.

For the ecclesiastical organization of European countries, see the respective articles on the various political divisions, also Eastern Churches. The religious statistics for the countries of Europe found in the adjoining table are based on Brachelli and von Juraschek, "Die Staaten Europas" (3th ed., Leipzig, Brünn, and Vienna, 1907).

RELIGIOUS STATISTICS FOR THE COUNTRIES OF EUROPE

The figures below are based on census reports, dates of which are given in parentheses.

- Russia, Finland, and Poland (1897):-- 11,326,794 Catholics (including Uniat Eastern Churches) -- 6,283,679 Evangelicals (including Anglicans, Methodists, Unitarians, etc.) -- 78,713,017 Oriental Christians (Orthodox Greek, Gregorian Armenian, etc.) -- 5,082,342 Jews -- 3,560,361 Mohammedans -- 320,292 Others (Rationalist, Non-Christian, etc.)
- Austria-Hungary, with Bosnia and Herzegovina (1900):-- 35,804,263 -- 4,227,691 -- 4,095,723 -- 2,158,380 -- 548,632 --
- Germany (1900):-- 20,327,913 -- 35,231,104 -- -- 586,833 -- -- 17,535
- France (1900):-- 38,100,000 -- 662,000 -- -- 100,000 -- -- 100,000
- Spain (1900):-- about 18,500,000 -- 6,654 (1887) -- -- 402 (1887) -- -- 23,330 (1887)
- Sweden (1890):-- 1,436 -- 4,779,867 -- -- 3,402 -- -- 276
- Norway (1900):-- 2,065 -- 2,204,989 -- -- 642 -- -- 13,770
- Great Britain and Ireland (1901):-- 5,310,000 -- 35,925,000 -- -- 210,000 -- --
- Italy (1901):-- about 30,500,000 -- 62,000 (1880) -- -- 38,000 (1880) -- --
- Turkish Empire (1900):-- 480,000 -- 20,000 -- 2,480,000 -- 90,000 -- 3,060,000 --
- Denmark (1900):-- 5,479 -- 2,436,012 -- -- 3,476 -- -- 4,573
- Rumania (1899):-- 149,667 -- 22,749 -- 5,408,743 -- 269,015 -- 43,740 -- 16,148
- Bulgaria (1900):-- 40,790 -- 4,524 -- 3,020,840 -- 33,717 -- 643,253 -- 1,149
- Portugal (1900):-- 5,425,500 -- 500 -- -- 2,000 -- --
- Greece and Crete (1900):-- 34,710 -- -- 2,172,048 -- 6,518 -- 57,446 -- 740
- Servia (1895):-- 10,948 -- 1,002 -- 2,281,018 -- 5,102 -- 14,414 --
- Switzerland (1900):-- 1,283,135 -- 1,918,197 -- -- 12,551 -- --
- The Netherlands (1899):-- 1,790,161 -- 3,085,899 -- 45 -- 103,988 -- -- 115,179
- Belgium (1900):-- 6,669,000 -- 20,000 -- -- 4,000 -- --

- Montenegro (1897):-- 12,934 -- -- 201,067 -- -- 13,840 --
- The 280,000 inhabitants of the Grand Duchy of Luxembourg, the Republic of Andorra, the Principality of Lichtenstein, the Republic of San Marino, and the Principality of Monaco are almost entirely Catholics
- Total:-- 176,054,795 -- 96,891,867 -- 98,372,501 -- 8,710,368 -- 7,941,686 -- 612,992

OTTO HARTIG

Europus

Europus

A titular see in Provincia Euphratensis, suffragan of Hierapolis. The former name of this city was Thapsacus (*Thaphsakh*), an Aramean word which means "ford"; it was an important trade-center at the northern limit of Solomon's kingdom (III K., iv, 24). The younger Cyrus and Alexander the Great forded the Euphrates at this point. The Macedonians called it Amphipolis. It took finally a third name, Europus under which it is mentioned by the geographers Ptolemy, Pliny, Hierocles, Georgius, Cyprius, etc. and figures in the "Notitia episcopatum" of the Antiochene patriarchate. (see *Echos d'Orient*, 1907, 451) We know but one of its Greek bishops, in 451 (Lequien, *Oriens christ.*, II, 949), and a Jacobite one, between 793 and 817 (*Revue de L'Orient Chrétien*, 1899, 451). Justinian built a fortress at Europus (Procop., *de ædific.*, II, 9). When the city was destroyed is unknown. Its ruins stand at Djerabis, a corrupted form of Europus, on the right bank of the Euphrates, about twenty-five kilometers south of Biredjik, in the vilayet of Aleppo.

S. VAILHÉ

St. Eusebius (of Vercelli)

St. Eusebius

Bishop of Vercelli, b. in Sardinia c. 283; d. at Vercelli, Piedmont, 1 August, 371. He was made lector in Rome, where he lived some time, probably as a member or head of a religious community (Spreitzenhofer, *Die Entwicklung des alten Mönchtums in Italien*, Vienna, 1894, 14 sq.), Later he came to Vercelle, the present Vercelli, and in 340 was unanimously elected bishop of that city by the clergy and the people. He received episcopal consecration at the hands of Pope Julius I on 15 December, of the same year. According to the testimony of St. Ambrose (Ep. lxiii, *Ad Vercellenses*) he was the first bishop of the West who united monastic with clerical life. He led with the clergy of his city a common life modelled upon that of the Eastern cenobites (St. Ambrose, Ep. lxxxi and *Serm. lxxxix*). For this reason the *Canons Regular of St. Augustine* honour him along with St. Augustine as their founder (*Proprium Canon. Reg.*, 16 December).

In 364 Pope Liberius sent Eusebius and Bishop Lucifer to Cagliari to the Emperor Constantius, who was then at Arles in Gaul, for the purpose of inducing the emperor to convoke a council which should put an end to the dissensions between the Arians and the orthodox. The synod was held in Milan in 355. At first Eusebius refused to attend it because he foresaw that the Arian bishops, who were supported by the emperor, would not accept the decrees of the Nicene council and would insist upon the condemnation of St. Athanasius. Being pressed by the emperor and the bishops to appear at the synod, he came to Milan, but was not admitted to the synod until the document condemning St. Athanasius had been drawn up and was awaiting the signature of the bishops. Eusebius vehemently protested against the unjust condemnation of St. Athanasius and, despite the threats of the emperor, refused to attach his signature to the document. As a result he was sent into exile, first to Scythopolis in Syria, where the Arian bishop Patrophilus, whom Eusebius calls his jailer, (*Baronius, Annal.*, ad ann. 356, n. 97), treated him very cruelly; then to Cappodocia, and lastly to Thebaid. On the accession of the Emperor Julian, the exiled bishops were allowed to return to their sees, in 362. Eusebius, however, and his brother-exile Lucifer did not at once return to Italy. Acting either by force of their former legatine faculties or, as is more probable, having received new legatine faculties from Pope Liberius, they remained in the Orient for some time, helping to restore peace in the Church. Eusebius went to Alexandria to consult with St. Athanasius about convoking the synod which in 362 was held there under their joint presidency. Besides declaring the Divinity of the Holy Ghost and the orthodox doctrine concerning the Incarnation, the synod agreed to deal mildly with

the repentant apostate bishops, but to impose severe penalties upon the leaders of several of Arianizing factions. At its close Eusebius went to Antioch to reconcile the Eustathians and the Meletians. The Eustathians were adherents of the bishop St. Eustatius, who was deposed and exiled by the Arians in 331. Since Meletius' election in 361 was brought about chiefly by the Arians, the Eustathians would not recognize him, although he solemnly proclaimed his orthodox faith from the ambo after his episcopal consecration. The Alexandrian synod had desired that Eusebius should reconcile the Eustathians with Bishop Meletius, by purging his election of whatever might have been irregular in it, but Eusebius, upon arriving at Antioch found that his brother-legate Lucifer had consecrated Paulinus, the leader of the Eustathians, as Bishop of Antioch, and thus unwittingly had frustrated the pacific design. Unable to reconcile the factions at Antioch, he visited other Churches of the Orient in the interest of the orthodox faith, and finally passed through Illyricum into Italy. Having arrived at Vercelli in 363, he assisted the zealous St. Hilary of Poitiers in the suppression of Arianism in the Western Church, and was one of the chief opponents of the Arian Bishop Auxentius of Milan. The church honours him as a martyr and celebrates his feast as a semi-double on 16 December. In the "Journal of Theological Studies" (1900), I, 302-99, E.A. Burn attributes to Eusebius the "Quicumque". (SEE ATHANSIAN CREED)

Three short letters of Eusebius are printed in Migne, P.L., XII, 947-54 and X, 713-14. St. Jerome (*De vir. ill.*, c. lvi, and *Ep. li*, n. 2) ascribes to him a Latin translation of a commentary on the Psalms, written originally in Greek by Eusebius of Cæsarea; but this work has been lost. There is preserved in the cathedral at Vercelli the "Codex Vercellensis", the earliest manuscript of the old Latin Gospels (codex *a*), which is generally believed to have been written by Eusebius. It was published by Irico (Milan 1748) and Bianchini (Rome, 1749), and is reprinted in Migne, P.L. XII, 9-948; a new edition was brought out by Belsheim (Christiania, 1894). Krüger (*Lucifer, Bischof von Calaris*", Leipzig, 1886, 118-30) ascribes to Eusebius a baptismal oration by Caspari (*Quellen sur Gesch. Des Taufsymbols*, Christiania, 1869, II, 132-40). The confession of faith "Des. Trinitate confessio", P.L., XII, 959-968, sometimes ascribed to Eusebius is spurious.

MICHAEL OTT

St. Eusebius of Samosata

St. Eusebius

Bishop of Samosata (now Samsat) in Syria; date of birth unknown: d. in 379 or 380. History makes no mention of him before the year 361, when as bishop of Samosata, he took part in the consecration of St. Meletius, the newly elected Patriarch of Antioch. Just then the Eastern Church was rent by Arianism and its affiliated heresies. Most of the episcopal sees were occupied by Arian bishops, and Meletius himself was elected Patriarch of Antioch only because the Arians believed him to be a supporter of their heresy. Tillemont and a few other historians even maintain that Eusebius was at that time leaning towards Arianism. Whatever might have been the faith of Eusebius previously, it is certain that at the synod held in Antioch in 363 the Nicene formula, with express mention of *homoousios*, was accepted, and the document was signed by Eusebius and twenty-four other bishops.

When the Arians discovered that Meletius upheld the doctrine of the Nicene Council, they declared his election invalid and attempted to obtain from Eusebius, to whom they had been entrusted, the synodal acts proving the lawfulness of the election. The emperor Constantius, who supported the Arians, ordered Eusebius to surrender the document, but without success. Thereupon Constantius threatened Eusebius with the loss of his right hand, but the bishop calmly presented both of his hands to the bearer of the message, saying: "Strike them both off. I will not surrender the document by which the injustice of the Arians can be proved." The emperor was struck by the constancy of Eusebius and left the document in his possession.

It was chiefly due to the concerted efforts of St. Eusebius and St. Gregory Nazianzen that, in 370, St. Basil was elected Archbishop of Cæsarea in Cappadocia. From this time also dates the tender friendship between St. Eusebius and the last-named Father, which is attested to by some still extant letters written by St. Basil to the Bishop of Samasota. Eusebius displayed his greatest activity during the persecution of the Catholics by the Arian emperor Valens. Disguised as a military officer, he visited the persecuted Churches of Syria, Phoenecia, and Palestine, exhorting the afflicted Catholics to remain faithful to their faith, ordaining orthodox priests where they were needed, and in many other ways assisting the Catholic bishops in the difficult exercise of their duties during these troublesome times. It is on account of this untiring zeal of Eusebius that St. Gregory Nazianzen calls him "A pillar of the Church", "a gift of God", "a rule of faith", etc., (Migne, P.G., XXI, 57) Incensed at the great success of Eusebius, the Arians prevailed upon the emperor Valens to banish him into Thrace. After the death of Valens in 378, he was allowed to return to his see. On his journey from Thrace to

Samosata he was instrumental in the appointment of numerous orthodox bishops, among whom were Acacius at Beroea, Theodotus at Hierapolis, Isidore at Cyrrhus, and Eulogius at Edessa. Having returned to his see, he resumed his former activity against the Arians, both in his own diocese and in the neighbouring churches. While he was taking part in the consecration of Bishop Maris, at the little town of Dolicha, near Samosata, an Arian woman struck him on the head with a tile thrown from the roof of her house. He died of this wound a few days later. The Greeks honour him as a Martyr on the 21st of June, the Latins on the 22nd.

MICHAEL OTT

St. Eusebius (Of Rome)

St. Eusebius

A presbyter at Rome; date of birth unknown; d. 357(?). He was a Roman patrician and priest, and is mentioned with distinction in Latin martyrologies. The ancient genuine martyrology of Usuard styles him confessor at Rome under the Arian emperor Constantius and adds that he was buried in the cemetery of Callistus. Some later martyrologies call him a martyr.

The "Acta Eusebii", discovered in 1479 by Mombritius and reproduced by Baluze in his "Miscellanea"(1678-1715), tell the following story; When Pope Liberius was permitted by Constantius to return to Rome, supposedly at the price of his orthodoxy, by subscribing to the Arian formula of Sirmium, Eusebius, a priest, an ardent defender of the Nicene Creed, publicly preached against both pope and emperor, branding them as heretics. When the orthodox party who supported the antipope Felix were excluded from all the churches, Eusebius continued to hold Divine service in his own house. He was arrested and brought before Liberius and Constantius. Here he boldly reproved Liberius for deserting the Catholic Faith. In consequence he was placed in a dungeon, four feet wide (or was imprisoned in his own house), where he spent his time in prayer and died after seven months. His body was buried in the cemetery of Callistus with the simple inscription: "Eusebio homini Dei". This act of kindness was performed by two priests, Gregory and Orosius, friends of Eusebius. Gregory was put into the same prison and also died there. He was buried by Orosius, who professes to be the writer of the Acts.

It is generally admitted that these Acts were a forgery either entirely or at least in part, and written in the same spirit if not by the same hand, as the notice on Liberius in the "Liber Pontificalis". The Bollandists and Tillemont point out some grave historical difficulties in the narrative, especially the fact that Liberius, Constantius and Eusebius were never in Rome at the same time. Constantius visit Rome but once, and remained there for about a month, and Liberius was then still in exile. Some, taking for granted the alleged fall of Liberius, would overcome this difficulty by stating that, at the request of Liberius, who resented the zeal of the priest, the secular power interfered and imprisoned Eusebius. It is not at all certain whether Eusebius died after the return of Liberius, during his exile, or even much before that period.

The feast of St. Eusebius is kept on 14 August. The church of the Equiline in Rome dedicated to him, said to have been built on the site of his house, is mentioned in the acts of a council held in Rome under Pope Symmachus in 498 (Manai, VIII, 236-237), and was rebuilt by Pope Zacharias. Formerly it had a *statio* on the Friday after the fourth Sunday in Lent. It once belonged to the Celestines (an order now extinct); Leo XII gave it to the Jesuits. A good picture representing the triumph of Eusebius, by Raphael Menge, 1759 is on the ceiling. San Eusebio is the title of the cardinal-priest. The title was transferred by Gregory XVI, but restored by Pius IX.

FRANCIS MERSHMAN

Pope St. Eusebius

Pope St. Eusebius

Successor of Marcellus, 309 or 310. His reign was short. The Liberian Catalogue gives its duration as only four months, from 18 April to 17 August, 309 or 310. We learn some details of his career from an epitaph for his tomb which Pope Damasus ordered. This epitaph had come down to us through ancient transcripts. A few fragments of the original, together with a sixth-century marble copy made to replace the original, after its destruction were found by Di Rossi in the Papal Chapel, in the catacombs of Callistus. It appears from this epitaph that the grave internal dissensions caused in the Roman Church by the readmittance of the apostates (*lapsi*) during the persecution of Diocletian, and which had already arisen under Marcellus, continued under Eusebius. The latter maintained the attitude of the Roman Church, adopted after the Decian persecutions (250-51), that the apostates should not be forever debarred

from ecclesiastical communion, but on the other hand, should be readmitted only after doing proper penance (*Eusebius miseris docuit sua crimina flere*).

This view was opposed by a faction of Christians in Rome under the leadership of one Heraclius. Whether the latter and his partisans advocated a more rigorous (Novationist) or a more lenient interpretation of the law has not been ascertained. The latter, however, is by far more probable in the hypothesis that Heraclius was the chief of a party made up of apostates and their followers, who demanded immediate restoration to the body of the Church. Damasus characterizes in very strong terms the conflict which ensued (*sedicio, cœ, bellum, discordia, lites*). It is likely that Heraclius and his supporters sought to compel by force their admittance to divine worship, which was resented by the faithful gathered in Rome about Eusebius. In consequence both Eusebius and Heraclius were exiled by Emperor Maxentius. Eusebius, in particular, was deported to Sicily, where he died soon after. Miltiades ascended the papal throne, 2 July, 311. The body of his predecessor was brought back to Rome, probably in 311, and 26 September (according to the "Depositio Episcoporum" in the chronographer of 354) was placed in a separate cubiculum of the Catacomb of Callistus. His firm defense of ecclesiastical discipline and the banishment which he suffered therefor caused him to be venerated as a martyr, and in his epitaph Pope Damasus honours Eusebius with this title. His feast is yet celebrated on 26 September.

J.P. KIRSCH

Chronicle of Eusebius

Chronicle of Eusebius

Consists of two parts: the first was probably called by Eusebius the "Chronograph" or "Chronographies"; the second he terms the "Canon", or "Canons", and also the "Chronological Canons". It is brought down to the year 225, and as Eusebius alludes to it at an earlier date in the "Eclogæ Propheticae" and "Præparatio Evangelica" there must have been two editions. The original is lost, but both parts are preserved in an Armenian version of which two rival translations by Zohrab and Aucher, respectively, were published in 1818. Both these editions are superseded by Schoene's. The "Canons", moreover, are preserved in St. Jerome's translation. Two Syriac epitomes have also

been published, one from a MS. in the British Museum, which was translated by Roediger for Schoene's edition, another edited by Siegfried and Gelzer (*Eusebii Canonum Epitome ex Dionysii Telmaharensis Chronico petita*, Leipzig, 1884). Considerable extracts from the original were also preserved by later writers, especially by Syncellus. These it has been possible to identify since the discovery of the Armenian version. They will be found in Schoene.

The "Chronography" is an epitome of universal history. It is divided into five parts: (1) the history of the Chaldeans, and the Assyrians, followed by lists of the Assyrian, Median, Lydian, and Persian kings; (2) Old Testament history; (3) Egyptian history; (4) Grecian history; (5) Roman history. It is, like the "Præparatio Evangelica", full of quotations from lost authors. As an illustration of its value in one particular province we may turn to the third chapter of Smith's "Chaldean Account of Genesis", entitled "Chaldean Legends transmitted through Berosus and other Authors". The longest and most important extracts here given, containing, e.g. the Babylonian story of the Creation and the Flood, owe their preservation to Eusebius. The "Canons" are a series of chronological tables with short historical notices. The years of Abraham, beginning from the supposed date of his birth, form the backbone. Alongside of these are placed the regnal years of the monarchs of different kingdoms as they rose and fell. A single extract will, however, serve better than any description to give the reader an idea of the character and the contents of the "Canons". We have shown above the value of the "Chronicle" to an Assyriologist; our second example will illustrate its importance for classical scholars. On almost the first page of Jebb's edition of the newly discovered poems of Bacchylides, the notices in the "Chronicle" concerning the poet are discussed. There are two such notices. We give the first with its context, as it is found in the facsimile of the Bodleian MS. of St. Jerome's version:—

LXXVIII Olymp.	Herodotus historiarum scriptor agnoscitur.	
XVIII	Bacchylides et Diag- orus atheus sermone plurimo cele- brantur	XXXVI
MDL. XVIII	Zeuxis pictor agnosci- tur, etc.	XXXVII

From the above we learn that Bacchylides became renowned in the 18th year of Xerxes, King of Persia; the 36th of an Alexander, King of Macedonia, the beginning of the seventy-eighth Olympiad, and the 1549th year of Abraham. In this MS. the years of Abraham are given at the commencement of every decade. Thus, in the last line, the

first year (MDL) marks the opening of a new decade; while the second year (XVIII) shows the continuation of the reign of Xerxes.

Which of the two versions of the "Chronicle" is the more trustworthy as regards dates and figures is a question that was conclusively answered in favour of the Latin version by Lightfoot in his excursus, "The Early Roman Succession". The striking differences between the episcopal lists (notably the Roman) as they are found in the Armenian version, on the one hand, and in the Latin version and "The Church History", on the other hand, give rise to a number of ingenious theories concerning changes made by Eusebius in a later edition of his "Chronicle". Lightfoot annihilated these theories by demonstrating the corrupt state of the Armenian version in all that relates to figures and the years to which different events are assigned. It is important to remember this in reading books or articles in which reference is made to the "Chronicle", if they were written before 1890.

Best Editions.—(1) "Eusebii Chronicorum Libri duo", ed. Schoene, 2 vols., Berlin, 1866-1875; (2) the Bodleian manuscript of Jerome's version of the "Chronicle of Eusebius", reproduced in collotype with an introduction by John Knight Fotheringham, M. A., Oxford, 1905; (3) the Syriac epitomes referred to above.

F.J. Bacchus

Eusebius Bruno

Eusebius Bruno

Bishop of Angers, b. in the early part of the eleventh century; d. at Angers, 29 August, 1081. He received his ecclesiastical training under the famous Berengarius of Tours, and in December, 1047 was made Bishop of Angers. In 1049 he took part in the synod at Rheims under Leo IX (1049-54), and was among the bishops who protested their innocence in regard to the prevalent evil of simony. He is best known for his relations to his master Berengarius who erroneously maintained that in the holy Eucharist the bread and wine are merely a figure or symbol of the Body and Blood of Christ. That he was a partisan of Berengarius, at least for a time, cannot be denied. In a letter written shortly after the councils of Rome and Vercelli (1050), in which Berengarius was condemned, he protested against the injustice done his teacher and the

archdeacon of his church. When King Henry I of France (1031-1080), summoned the bishops of his realm to a synod held in Paris in 1051, both Eusebius and Berengarius absented themselves, through fear of condemnation. Two contemporary writers, Deoduinus, Bishop of Liège (P.L., CXLVI, 1439), and Durandus, Abbot of Troan (P.L., CXLIX, 1422), class Eusebius Bruno among the followers of Berengarius; the latter always claimed him as a partisan. It is not certain that he really appropriated in its entirety the teaching of his master, although Deoduinus and Durandus affirm it. On the other hand, at the council of Tours (1054), presided over by the papal legate Hildebrand, Eusebius Bruno induced his friend Berengarius to declare, in writing and under oath, that after the Consecration the bread and wine are the Body and Blood of Christ. Moreover, at a synod of Angers (1062), at which the Count of Anjou, Geoffrey the Bearded, asked for an account of the teaching of Berengarius, Eusebius' defense of his master was somewhat weak. When, shortly afterward, Berengarius complained to him of the opposition of a certain Geoffrey Martini to his teaching, Eusebius declared frankly in a letter to Berengarius (P.L., CXLVII, 1201), that the reality of the Body and Blood of Christ in the Holy Sacrament must be admitted like other mysteries of faith, e.g. the Incarnation and the passing of Christ glorified through closed doors. These expressions either indicate a change of mind on the part of Eusebius, or, what is not unlikely, a misunderstanding in the beginning of the real import of the teachings of Berengarius.

FRANCIS J. SCHAEFER

Eusebius of Alexandria

Eusebius of Alexandria

Ecclesiastical writer and author of a number of homilies well known in the sixth and seventh centuries and of much ascetical and dogmatic value. There has been much dispute regarding the details of his life and the age in which he lived. Galland (*Vet. Patr. Biblioth.*, VIII, 23) says: "de Eusebio qui vulgo dicitur episcopus Alexandræ incerta omnia" (Concerning Eusebius, commonly called bishop of Alexandria there is nothing sure). His writings have been attributed to Eusebius of Emesa, Eusebius of Cæsarea, and others. According to an old biography said to have been written by his notary, the monk John, and discovered by Cardinal Mai, he lived in the fifth century and led a monastic life near Alexandria. The fame of his virtues attracted the attention of Cyril, Bishop of Alexandria, who visited him with his clergy, and in 444, when dying, had him elected his successor, and consecrated him bishop, though much against his will.

Eusebius displayed great zeal in the exercise of his office and did much good by his preaching. Among those he converted was a certain Alexander, a man of senatorial rank. After having ruled his see for seven or, according to another account, for twenty years, he made Alexander his successor and retired to the desert, whence Cyril had summoned him and there died in the odor of sanctity.

While Mai seems to have established the existence of a Eusebius of Alexandria who lived in the fifth century, it had been objected that neither the name of Eusebius or his successor Alexander, appears in the list of the occupants of that ancient see. Dioscurus is mentioned as the immediate successor of Cyril. Nor does the style of the homilies seem on the whole in keeping with the age of Cyril. It may be noted, however, that the biographer of Eusebius expressly states that the Cyril in question is the great opponent of Nestorius. Various solutions of the difficulty have been proposed. Thilo (*Ueber die Schriften des Eusebius v. Alexandrian U. des Eusebius von Emesa*, Halle, 1832) thinks that the authorship of the homilies is to be assigned either to a certain monk — one of four brothers of the fifth century, or to a presbyter and court chaplain of Justinian I, who took an active part in the theological strifes of the sixth century. Mai suggests that after the death of Cyril, there were two bishops at Alexandria, Dioscurus, the Monophysite leader, and Eusebius, the head of the Catholic party. The homilies cover a variety of subjects, and the author is one of the earliest patristic witnesses to the doctrine regarding the descent of Christ into Hell. A list of homilies with the complete text is given by Mai (*Spicilegium Romanum IX*). They may also be found in Migne, P.G., LXXXVI. The "Sermo de Confusione Diaboli" was published with an introduction by Rand in "Modern Philology", II, 261.

H.M. BROCK

Eusebius of Caesarea

Eusebius of Cæsarea

Eusebius Pamphili, Bishop of Cæsarea in Palestine, the "Father of Church History"; b. about 260; d. before 341.

LIFE

It will save lengthy digression if we at once speak of a document which will often have to be referred to on account of its biographical importance, viz., the letter written by Eusebius to his diocese in order to explain his subscription to the Creed propounded by the Council of Nicæa. After some preliminary remarks, the writer proceeds: "We

first transmit to you the writing concerning the faith which was put forward by us, and then the second, which they have published after putting in additions to our expressions. Now the writing presented by us, which when read in the presence of our most religious emperor was declared to have a right and approved character was as follows: [The Faith put forward by us]. As we have received from the bishops before us both in our first catechetical instruction and when we were baptized, and as we have learned from the Divine Scriptures, and as we have believed and taught in the presbyterate and in the office of bishop itself so now likewise believing we offer to you our faith and it is thus." Then follows a formal creed [Theodoret, *Hist.*, I, 11; Socrates, *Hist.*, I, 8; St. Athanasius, *de Dec. Syn. Nic.* (appendix) and elsewhere. Translated by Newman with notes in the Oxford Library of the Fathers (Select Treatises of St. Athanasius, p. 59) and St. Athanasius, vol. I. The translation given here is Dr. Hort's. The words in brackets are probably genuine though not given by Socrates and St. Athanasius].

Dr. Hort in 1876 ("Two Dissertations", etc., pp. 56 sqq.) pointed out that this creed was presumably that of the Church of Cæsarea of which Eusebius was bishop. This view is widely accepted (cf. Lightfoot, art. "Euseb." in "Dict. of Christ. Biog." — All references to Lightfoot, unless otherwise stated, are to this article. — Sanday, "Journal of Theolog. Studies", vol. I, p. 15; Gwatkin, "Studies of Arianism", p. 42, 2nd edition; McGiffert, "Prolog. to C. H. of Euseb." in "Select Library of Nic. and post-Nic. Fathers"; Duchesne, "Hist. de l'Eglise", vol. II, p. 149). According to this view it is natural to regard the introduction, "As we have received" etc., as autobiographical, and to infer that Eusebius had exercised the office of priesthood in the city of Cæsarea before he became its bishop, and had received his earliest religious instruction and the sacrament of Baptism there also. But other interpretations of this document are given, one of which destroys, while the other diminishes, its biographical value: (a) According to some the creed proffered by Eusebius was drawn up as a formula to be subscribed by all the bishops. It was they who were to say that it embodied what they had been taught as catechumens and had taught as priests and bishops. This seems to have been the view generally held before Hort, and was Kattenbusch's view in 1804 (*Das apostolische Symbol*, vol. I, p. 231). One objection to this view may be noted. It makes *all* the bishops equivalently say that before they received the episcopate they had for some time exercised the duties of the priesthood. (b) Others maintain that this creed was not the local creed of Cæsarea, but one drawn up by Eusebius in his own justification as embodying what he had always believed and taught. According to this interpretation the preliminary statement still remains autobiographical; but it merely informs us that the writer exercised the office of priest before he became a bishop. This interpretation has been adopted by Kattenbusch in his second volume (p. 239) published in 1900.

One of the reasons which he gives for his change of view is that when he was preparing his first volume he used Socrates, who does not give the superscription which we have printed in brackets. It is a vital matter with writers of the school of Kattenbusch not to accept what seems the natural interpretation of Eusebius's words, viz., that the creed he read before the council was actually the one he had always used. If this is admitted, "then", to quote Dr. Sanday, "I cannot but think that the theory of Kattenbusch and Harnack [viz. that the Eastern creds were daughters of the early Roman creed, and this latter did not reach the East till about a.d. 272] breaks breaks down altogether. Bishop Lightfoot ... puts the birth of Eusebius about 260 a.d. so that he would be something like twelve years old when Aurelian intervened in the affairs of Antioch. In other words he was in all probability already baptized, and had already been catechised in the Cæsarean creed at a time when, in the Kattenbusch-Harnack hypothesis, the parent of that creed had not yet reached Antioch — much less Cæsarea or Jerusalem" (Journ. Th. Studies, I, 15).

The passage just quoted shows that the date of Eusebius's birth is more than a merely curious question. According to Lightfoot, it cannot have been "much later than a.d. 260" (p. 309); according to Harnack, "it can hardly be placed later than 260-265" (Chronologie, I, p. 106). The data from which they argue are the persons and events which Eusebius describes as belonging to "our own times". Thus, at the end of his account of the epistles of Dionysius of Alexandria, he says he is now going to relate the events of "our own times" (*kath' emâs*. — H. E., VII, 26). He then recounts how, at Rome, Pope Dionysius (259-268) succeeded Xystus, and about the same time Paul of Samosata became Bishop of Antioch. Elsewhere (H. E., V, 28) he speaks of the same Paul as reviving "in our own time" (*kath' emâs*) the heresy of Artemon. He also speaks of the Alexandrian Dionysius (d. 265) in the same way (H. E., III, 28). He calls Manes, whom he places (H. E., VII, 31) during the episcopate of Felix (270-274), "the maniac of yesterday and our own times" (Theophania, IV, 30). An historian might of course refer to events recent, but before his own birth, as belonging to "our own times"; e. g. a man of thirty might speak thus of the Franco-German war in 1870. But the reference to Manes as "the maniac of yesterday" certainly suggests a writer who is alluding to what happened within his own personal recollection.

Concerning Eusebius's parentage we know absolutely nothing; but the fact that he escaped with a short term of imprisonment during the terrible Diocletian persecution, when his master Pamphilus and others of his companions suffered martyrdom, suggests that he belonged to a family of some influence and importance. His relations, later on, with the Emperor Constantine point to the same conclusion. At some time during the last twenty years of the third century he visited Antioch, where he made the acquaintance of the priest Dorotheus, and heard him expound the Scriptures (H.

E., VII, 32). By a slip of the pen or the memory, Lightfoot (p. 309) makes Dorotheus a priest of the Church of Cæsarea. In 296 he saw for the first time the future Emperor Constantine, as he passed through Palestine in the company of Diocletian (Vit. Const., I, 19).

At a date which cannot be fixed Eusebius made the acquaintance of Pamphilus, the founder of the magnificent library which remained for several centuries the great glory of the Church of Cæsarea. Pamphilus came from Phœnicia, but at the time we are considering resided at Cæsarea, where he presided over a college or school for students. A man of noble birth, and wealthy, he sold his patrimony and gave the proceeds to the poor. He was a great friend to indigent students, supplying them to the best of his ability with the necessaries of life, and bestowing on them copies of the Holy Scriptures. Too humble to write anything himself, he spent his time in preparing accurate copies of the Scriptures and other books, especially those of Origen. Eloquent testimonies to the care bestowed by Pamphilus and Eusebius on the sacred text are found in Biblical MSS. which have reproduced their colophons. We give three specimens. (1) the following is prefixed to Ezechiel in the codex Marchalianus. A facsimile of the original will be found in Mai's "Bib. nov. Pat.", IV, p. 218, and in Migne. It is printed in ordinary type in Swete's O. T. in Greek (vol. III, p. viii). It must be remembered that Origen's own copy of the Hexapla was in the library of Pamphilus. It had probably been deposited there by Origen himself.

The following was transcribed from a copy of the Father Apollinarius the Coenobiarch, to which these words are subjoined: "It was transcribed from the editions of the Hexapla and was corrected from the Tetrapla of Origen himself which also had been corrected and furnished with scholia in his own handwriting, whence I, Eusebius, added the scholia, Pamphilus and Eusebius corrected."

(2) At the end of the Book of Esdras, in the codex Sinaiticus, there is the following note:—

It was compared with a very ancient copy that had been corrected by the hand of the blessed martyr Pamphilus to which is appended in his own hand this subscription: "It was transcribed and corrected according to the Hexapla of Origen, Antoninus compared, I, Pamphilus, corrected." (Swete, vol. II, p. 212.)

(3) The same codex and also the Vatican and Alexandrine quote a colophon like the above, with the difference that Antoninus has become a confessor, and Pamphilus

is in prison — "Antoninus the confessor compared, Pamphilus corrected". The volume to which this colophon was subjoined began with I Kings and ended with Esther. Pamphilus was certainly not idle in prison. To most of the books in the Syro- Hexaplar is subjoined a note to the effect that they were translated from the Hexapla in the library of Cæsarea and compared with a copy subscribed: "I, Eusebius, corrected [the above] as carefully as I could" (Harnack, "Altchrist. Lit.", pp. 544, 545).

May not the confessor Antoninus be the same person as the priest of that name who, later on, with two companions interrupted the governor when he was on the point of sacrificing, and was beheaded? (Mart. Pal., 9.) One member of Pamphilus's household, Apphianus, had done the same a few years before; and another, Ædesius, after being tortured and sent to the mines, on obtaining his release provoked martyrdom at Alexandria by going before the governor and rebuking him. Towards the end of 307 Pamphilus was arrested, horribly tortured, and consigned to prison. Besides continuing his work of editing the Septuagint, he wrote, in collaboration with Eusebius, a Defence of Origen which was sent to the confessors in the mines — a wonderful gift from a man whose sides had been curried with iron combs, to men with their right eyes burned out and the sinews of their left legs cauterized. Early in 309 Pamphilus and several of his disciples were beheaded. Out of devotion to his memory Eusebius called himself Eusebius Pamphili, meaning, probably, that he wished to be regarded as the bondsman of him whose name "it is not meet that I should mention ... without styling him my lord" (Mart. Pal., ed. Cureton, p. 37). Mr. Gifford, in the introduction to his translation of the "Præp. Evang.", has suggested another explanation on the authority of an ancient scholion emanating from Cæsarea which calls Eusebius the "son of Pamphilus". He argues further that Pamphilus, in order to make Eusebius his heir, took the necessary step of adopting him.

During the persecution Eusebius visited Tyre and Egypt and witnessed numbers of martyrdoms (H. E., VIII, vii and ix). He certainly did not shun danger, and was at one time a prisoner. When, where, or how he escaped death or any kind of mutilation, we do not know. An indignant bishop, who had been one of his fellow-prisoners and "lost an eye for the Truth", demanded at the Council of Tyre how "he came off scathless". To this taunt — it was hardly a question — made under circumstances of great provocation, Eusebius deigned no reply (Epiphan., Hær., lxxviii, 8; cf. St. Athanas., "Apol. c. Arian.", viii, 1). He had many enemies, yet the charge of cowardice was never seriously made — the best proof that it could not have been sustained. We may assume that, as soon as the persecution began to relax, Eusebius succeeded Pamphilus in the charge of the college and library. Perhaps he was ordained priest about this time. By 315 he was already a bishop, for he was present in that capacity at the dedication of a new

basilica at Tyre, on which occasion he delivered a discourse given in full in the last book of the Church history.

Alexander, Bishop of Alexandria, excommunicated Arius about the year 320. The Arians soon found that for all practical purposes Eusebius was on their side. He wrote to Alexander charging him with misrepresenting the teaching of the Arians and so giving them cause "to attack and misrepresent whatever they please" (see below). A portion of this letter has been preserved in the Acts of the second Council of Nicæa, where it was cited to prove that Eusebius was a heretic. He also took part in a synod of Syrian bishops who decided that Arius should be restored to his former position, but on his side he was to obey his bishop and continually entreat peace and communion with him (Soz., H. E., I, 15). According to Duchesne (*Hist. de l'Eglise*, II, 132), Arius, like Origen before him, found an asylum at Cæsarea. At the opening of the Council of Nicæa Eusebius occupied the first seat on the right of the emperor, and delivered the inaugural address which was "couched in a strain of thanksgiving to Almighty God on his, the emperor's behalf" (*Vit. Const.*, III, 11; Soz., H. E., I, 19). He evidently enjoyed great prestige and may not unreasonably have expected to be able to steer the council through the *via media* between the Scylla and Charybdis of "Yes" and "No". But if he entertained such hopes they were soon disappointed. We have already spoken of the profession of faith which he brought forward to vindicate his own orthodoxy, or perhaps in the hope that the council might adopt it. It was, in view of the actual state of the controversy, a colourless, or what at the present day would be called a comprehensive, formula. After some delay Eusebius subscribed to the uncompromising creed drawn up by the council, making no secret, in the letter which he wrote to his own Church, of the non-natural sense in which he accepted it. Between 325 and 330 a heated controversy took place between Eusebius and Eustathius, Bishop of Antioch. Eustathius accused Eusebius of tampering with the faith of Nicæa; the latter retorted with the charge of Sabellianism. In 331 Eusebius was among the bishops who, at a synod held in Antioch, deposed Eustathius. He was offered and refused the vacant see. In 334 and 335 he took part in the campaign against St. Athanasius at the synods held in Cæsarea and Tyre respectively. From Tyre the assembly of bishops were summoned to Jerusalem by Constantine, to assist at the dedication of the basilica he had erected on the site of Calvary. After the dedication they restored Arius and his followers to communion. From Jerusalem they were summoned to Constantinople (336), where Marcellus was condemned. The following year Constantine died. Eusebius survived him long enough to write his *Life* and two treatises against Marcellus, but by the summer of 341 he was already dead, since it was his successor, Acacius, who assisted as Bishop of Cæsarea at a synod held at Antioch in the summer of that year.

WRITINGS

We shall take Eusebius's writings in the order given in Harnack's "Altchrist. Lit.", pp. 554 sqq.

A. Historical

(1) The lost Life of Pamphilus, often referred to by Eusebius, of which only a single fragment, describing Pamphilus' liberality to poor students, quoted by St. Jerome (c. Ruffin., I, ix), survives.

(2) A collection of Ancient Martyrdoms, used by the compiler of Wright's Syriac Martyrology, also lost.

(3) On the Martyrs of Palestine. There are two distinct forms of this work, both drawn up by Eusebius. The longer is only extant in a Syriac version which was first edited and translated by Cureton in 1861. The shorter form is found in most MSS. (not, however, in the best) of the Church History, sometimes at the end of the last book, generally between books VIII and IX, also in the middle of book VIII. The existence of the same work in two different forms raises a number of curious literary problems. There is, of course, the question of priority. Here, with two notable exceptions, scholars seem to be agreed in favour of the longer form. Then comes the question, why Eusebius abridged it and, finally, how the abridgment found its way into the Church History. The shorter form lacks some introductory remarks, referred to in c. xiii, which defined the scope of the book. It also breaks off when the writer is about to "record the palinode" of the persecutors. It seems probable that part of the missing conclusion is extant in the form of an appendix to the eighth book of the Church History found in several MSS. This appendix contrasts the miserable fate of the persecutors with the good fortune of Constantine and his father. From these data Lightfoot concludes that what we now possess formed "part of a larger work in which the sufferings of the Martyrs were set off against the deaths of the persecutors". It must, however, be remembered that the missing parts would not add much to the book. So far as the martyrs are concerned, it is evidently complete, and the fate of the persecutors would not take long in the telling. Still, the missing conclusion may explain why Eusebius curtailed his account of the Martyrs. The book, in both forms, was intended for popular reading. It was therefore desirable to keep down the price of copies. If this was to be done, and new matter (i. e. the fate of the persecutors) added, the old matter had to be somewhat curtailed. In 1894, in the *Theologische Literaturzeitung* (p. 464) Preuschen threw out the idea that the shorter form was merely a rough draft not intended for publication. Bruno Violet, in his "Die Palästinischen Martyrer" (*Texte u. Untersuch.*, XIV, 4, 1896) followed up this idea and pointed out that, whereas the longer form was constantly used by the compilers of Martyrologies, Menologies, and the like, the shorter form was never used. In a review of Violet (*Theolog. Litz*, 1897, p. 300),

Preuschen returns to his original idea, and further suggests that the shorter form must have been joined to the Church History by some copyist who had access to Eusebius's MSS. Harnack (*Chronologie*, 11, 115) holds to the priority of the longer form, but he thinks that the shorter form was composed almost at the same time for readers of the Church History.

(4) The Chronicle (see separate article, Eusebius, Chronicle of).

(5) The Church History. It would be difficult to overestimate the obligation which posterity is under to Eusebius for this monumental work. Living during the period of transition, when the old order was changing and all connected with it was passing into oblivion, he came forward at the critical moment with his immense stores of learning and preserved priceless treasures of Christian antiquity. This is the great merit of the Church History. It is not a literary work which can be read with any pleasure for the sake of its style. Eusebius's "diction", as Photius said, "is never pleasant nor clear". Neither is it the work of a great thinker. But it is a storehouse of information collected by an indefatigable student. Still, great as was Eusebius's learning, it had its limitations. He is provokingly ill-informed about the West. That he knows very little about Tertullian or St. Cyprian is due, no doubt, to his scant knowledge of Latin; but in the case of a Greek writer, like Hippolytus, we can only suppose that his works somehow failed to make their way to the libraries of the East. Eusebius's good faith and sincerity has been amply vindicated by Lightfoot. Gibbon's celebrated sneer, about a writer "who indirectly confesses that he has related whatever might redound to the glory, and that he has suppressed all that could tend to the disgrace, of religion", can be sufficiently met by referring to the passages (*H. E.*, VIII, ii; *Mart. Pal.* c. 12) on which it is based. Eusebius does not "indirectly confess", but openly avows, that he passes over certain scandals, and he enumerates them and denounces them. "Nor again", to quote Lightfoot, "can the special charges against his honour as a narrator be sustained. There is no ground whatever for the charge that Eusebius forged or interpolated the passage from Josephus relating to our Lord quoted in *H. E.*, I, 11, though Heinchen is disposed to entertain the charge. Inasmuch as this passage is contained in all our MSS., and there is sufficient evidence that other interpolations (though not this) were introduced into the text of Josephus long before his time (see *Orig.*, c. *Cels.*, I, 47, Delarue's note) no suspicion can justly attach to Eusebius himself. Another interpolation in the Jewish historian, which he quotes elsewhere (11, 23), was certainly known to Origen (l. c.). Doubtless also the omission of the owl in the account of Herod Agrippa's death (*H. E.*, 11, 10) was already in some texts of Josephus (*Ant.*, XIX, 8, 2). The manner in which Eusebius deals with his numerous quotations elsewhere, where we can test his honesty, is a sufficient vindication against this unjust charge" (*L.*, p. 325).

The notices in the Church History bearing on the New Testament Canon are so important that a word must be said about the rule followed by Eusebius in what he recorded and what he left unrecorded. Speaking generally, his principle seems to have been to quote testimonies for and against those books only whose claims to a place in the Canon had been disputed. In the case of undisputed books he gave any interesting information concerning their composition which he had come across in his reading. The subject was most carefully investigated by Lightfoot in an article in "The Contemporary" (January, 1875, reprinted in "Essays on Supernatural Religion"), entitled "The Silence of Eusebius". In regard to the Gospel of St. John, Lightfoot concludes: "The silence of Eusebius respecting early witnesses to the Fourth Gospel is an evidence in its favour." For the episcopal lists in the Church History, see article on the Chronicle. The tenth book of the Church History records the defeat of Licinius in 323, and must have been completed before the death and disgrace of Crispus in 326, for it refers to him as Constantine's "most pious son". The ninth book was completed between the defeat of Maxentius in 312, and Constantine's first rupture with Licinius in 314.

(6) The Life of Constantine, in four books. This work has been most unjustly blamed, from the time of Socrates downwards, because it is a panegyric rather than a history. If ever there was a man under an obligation to respect the maxim, *De mortuis nil nisi bonum*, this man was Eusebius, writing the Life of Constantine within three years after his death (337). This Life is especially valuable because of the account it gives of the Council of Nicæa and the earlier phases of the Arian controversy. It is well to remember that one of our chief sources of information for the history of that council is a book written to magnify Constantine.

B. Apologetic

(7) Against Hierocles. Hierocles, who, as governor in Bithynia and in Egypt, was a cruel enemy of the Christians during the persecution, before the persecution had attacked them with the pen. There was nothing original about his work except the use he made of Philostratus's Life of Apollonius of Tyana to institute a comparison between the Lord and Apollonius in favour of the latter. In his reply Eusebius confined himself to this one point.

(8) "Against Porphyry", a work in twenty-five books of which not a fragment survives.

(9) The "Præparatio Evangelica", in fifteen books.

(10) The "Demonstratio Evangelica", in twenty books, of which the last ten, with the exception of a fragment of the fifteenth, are lost. The object of these two treatises, which should be regarded as two parts of one comprehensive work, was to justify the Christian in rejecting the religion and philosophy of the Greeks in favour of that of the Hebrews, and then to justify him in not observing the Jewish manner of life. The

"Præparatio" is devoted to the first of these objects. The following summary of its contents is taken from Mr. Gifford's introduction to his translation of the "Præparatio": "The first three books discuss the threefold system of Pagan Theology, Mythical, Allegorical, and Political. The next three, IV-VI, give an account of the chief oracles, of the worship of dæmons, and of the various opinions of Greek Philosophers on the doctrines of Plato and Free Will. Books VII-IX give reasons for preferring the religion of the Hebrews founded chiefly on the testimony of various authors to the excellency of their Scriptures and the truth of their history. In Books X-XII Eusebius argues that the Greeks had borrowed from the older theology and philosophy of the Hebrews, dwelling especially on the supposed dependence of Plato upon Moses. In the last three books the comparison of Moses with Plato is continued, and the mutual contradictions of other Greek Philosophers, especially the Peripatetics and Stoics, are exposed and criticized."

The "Præparatio" is a gigantic feat of erudition, and, according to Harnack (*Chronologie*, II, p. 120), was, like many of Eusebius's other works, actually composed during the stress of the persecution. It ranks, with the *Chronicle*, second only to the *Church History* in importance, because of its copious extracts from ancient authors whose works have perished. The first book of the *Demonstratio* chiefly deals with the temporary character of the Mosaic Law. In the second the prophecies concerning the vocation of the Gentiles and the rejection of the Jews are discussed. In the remaining eight the testimonies of the prophets concerning Christ are treated of.

We now pass to three books, of which nothing is known save that they were read by Photius, viz. (11), The "Præparatio Ecclesiastica", (12), the "Demonstratio Ecclesiastica", and (13) Two Books of Objection and Defence, of which, from Photius's account, there seem to have been two separate editions.

(14) The "Theophania" or "Divine Manifestation". Except for a few fragments of the original, this work is only extant in a Syriac version discovered by Tattam, edited by Lee in 1842, and translated by the same in 1843. It treats of the cosmic function of the Word, the nature of man, the need of revelation, etc. The fourth and fifth books are particularly remarkable as a kind of anticipation of modern books on Christian evidences. A curious literary problem arises out of the relations between the "Theophania" and the work "De Laudibus Constantini". There are entire passages which are almost verbatim the same in both works. Lightfoot decides in favour of the priority of the first-named work. Gressel, who has edited the "Theophania" for the Berlin edition of the Greek Fathers, takes the opposite view. He compares the parallel passages and argues that they are improved in the "De Laudibus Constantini".

(15) "On the Numerous Progeny of the Ancients". This work is referred to by Eusebius twice, in the "Præp. Ev.", VII, 8, and in the "Dem. Ev.", VII, 8; and also (Lightfoot

and Harnack think) by St. Basil ("De Spir. Sanct.", xxix), where he says, "I draw attention to his [Eusebius's] words in discussing the difficulties started in connexion with ancient polygamy." Arguing from St. Basil's words, Lightfoot thinks that in this treatise Eusebius dealt with the difficulty presented by the Patriarchs possessing more than one wife. But he overlooked the reference in the "Dem. Ev.", from which it would appear that the difficulty dealt with was, perhaps, a more general one, viz., the contrast presented by the desire of the Patriarchs for a numerous offspring and the honour in which continence was held by Christians.

C. Exegetical

(16) Eusebius narrates, in his Life of Constantine (IV, 36, 37), how he was commissioned by the emperor to prepare fifty sumptuous copies of the Bible for use in the Churches of Constantinople. Some scholars have supposed that the Codex Sinaiticus was one of these copies. Lightfoot rejects this view chiefly on the ground that "the Text of the codex in many respects differs too widely from the readings found in Eusebius".

(17) Sections and Canons. Eusebius drew up ten canons, the first containing a list of passages common to all four Evangelists; the second, those common to the first three and so on. He also divided the Gospels into sections numbered continuously. A number, against a section, referred the reader to the particular canon where he could find the parallel sections or passages.

(18) The labours of Pamphilus and Eusebius in editing the Septuagint have already been spoken of. They "believed (as did St. Jerome nearly a century afterwards) that Origen had succeeded in restoring the old Greek version to its primitive purity". The result was a "mischievous mixture of the Alexandrian version with the versions of Aquila and Theodotion" (Swete, "Intro. to O. T. in Greek", pp. 77, 78). For the labours of the two friends on the text of the N. T. the reader may be referred to Rousset, "Textcritische Studien zum N. T.", c. ii. Whether as in the case of the Old Testament, they worked on any definite critical principles is not known.

(19) (a) Interpretation of the ethnological terms in the Hebrew Scriptures; (b) Chronography of Ancient Judaea with the Inheritances of the Ten Tribes; (c) A plan of Jerusalem and the Temple; (d) on the Names of Places in the Holy Scriptures. These four works were written at the request of Eusebius's friend Paulinus. Only the fourth is extant. It is known as the "Topics," or the "Onomasticon".

(20) On the nomenclature of the Book of the Prophets. This work gives a short biography of each Prophet and an account of his prophecies.

(21) Commentary on the Psalms. There are many gaps in the MSS. of this work, and they end in the 118th Psalm. The missing portions are in part supplied by extracts from the Catenae. An allusion to the discovery of the Holy Sepulchre fixes the date at about 330. Lightfoot speaks very highly of this commentary.

(22) Commentary on Isaiah, written after the persecution.

(23 to 28) Commentaries on other books of Holy Scripture, of some of which what may be extracts are preserved.

(29) Commentary on St. Luke, of which what seem to be extracts are preserved.

(30) Commentary on I Cor., the existence of which seems to be implied by St. Jerome (Ep. xlix).

(31) Commentary on Hebrews. A passage that seems to belong to such a commentary was discovered and published by Mai.

(32) On the Discrepancies of the Gospels, in two parts. An epitome, very probably from the hand of Eusebius, of this work was discovered and published by Mai in 1825. Extracts from the original are preserved. Of the two parts, the first, dedicated to a certain Stephen, discusses questions respecting the genealogies of Christ; the second, dedicated to one Marinus, questions concerning the Resurrection. The Discrepancies were largely borrowed from by St. Jerome and St. Ambrose, and have thus indirectly exercised a considerable influence on Biblical studies.

(33) General Elementary Introduction, consisting of ten books, of which VI-IX are extant under the title of "Prophetical Extracts". These were written during the persecution. There are also a few fragments of the remaining books. "This work seems to have been a general introduction to theology, and its contents were very miscellaneous as the extant remains show" (L., p. 339).

D. Dogmatic

(34) The Apology for Origen. This work has already been mentioned in connexion with Pamphilus. It consisted of six books, the last of which was added by Eusebius. Only the first book is extant, in a translation by Rufinus.

(35) "Against Marcellus, Bishop of Ancyra", and (36) "On the Theology of the Church", a refutation of Marcellus. In two articles in the "Zeitschrift für die Neutest. Wissenschaft" (vol. IV, pp. 330 sqq. and vol. VI, pp. 250 sqq.), written in English, Prof. Conybeare has maintained that our Eusebius could not have been the author of the two treatises against Marcellus. His arguments are rejected by Prof. Klostermann, in his introduction to these two works published in 1905 for the Berlin edition of the Greek Fathers. The "Contra Marcellum" was written after 336 to justify the action of the synod held at Constantinople when Marcellus was deposed; the "Theology" a year or two later.

(37) "On the Paschal Festival" (a mystical interpretation). This work was addressed to Constantine (Vit. Const., IV, 35, 316). A long fragment of it was discovered by Mai.

(38) A treatise against the Manichæans is perhaps implied by Epiphanius (Hær., lxvi, 21).

E. Orations and Sermons

(39) At the Dedication of the Church in Tyre (see above).

(40) At the Vicennalia of Constantine. This seems to have been the opening address delivered at the Council of Nicæa. It is not extant.

(41) On the Sepulchre of the Saviour, a.d. 325 (Vit. Const., IV, 33) not extant.

(42) At the Tricennalia of Constantine. This work is generally known as the "De Laudibus Constantini". The second part (11-18) seems to have been a separate oration joined on to the Tricennalia.

(43) "In Praise of the Martyrs". This oration is preserved in the same MS. as the "Theophania" and "Martyrs of Palestine". It was published and translated in the "Journal of Sacred Literature" by Mr. H. B. Cowper (New Series, V, pp. 403 sqq., and *ibid.* VI, pp. 129 sqq.).

(44) On the Failure of Rain, not extant.

F. Letters

The history of the preservation of the three letters, (45) to Alexander of Alexandria, (46) to Euphrasion, or Euphraton, (47) to the Empress Constantia, is sufficiently curious. Constantia asked Eusebius to send her a certain likeness of Christ of which she had heard; his refusal was couched in terms which centuries afterwards were appealed to by the Iconoclasts. A portion of this letter was read at the Second Council of Nicæa, and against it were set portions from the letters to Alexander and Euphrasion to prove that Eusebius "was delivered up to a reprobate sense, and of one mind and opinion with those who followed the Arian superstition" (Labbe, "Conc.", VIII, 1143-1147; Mansi, "Conc.", XIII, 313-317). Besides the passage quoted in the council, other parts of the letter to Constantia are extant.

(48) To the Church of Cæsarea after the Council of Nicæa. This letter has already been described.

F.J. Bacchus

Eusebius of Dorylæum

Eusebius of Dorylæum

Eusebius, Bishop of Dorylæum in Asia Minor, was the prime mover on behalf of Catholic orthodoxy against the heresies of Nestorius and Eutyches. During the earlier part of his life he followed the profession of an advocate at Constantinople, and was already known as a layman of considerable learning when he protested publicly (423) against the erroneous doctrine of a discourse delivered by Anastasius, the syncellus, or chaplain, of Nestorius. Shortly afterwards he again bore public witness against the Nestorian heresy as to the nature of Christ, this time during a discourse by Nestorius himself, which he interrupted with the exclamation that "the eternal Word had under-

gone a second generation" — i.e. of a woman, according to the flesh. Much disorder followed, but Nestorius replied with arguments against the "second generation".

After the Council of Ephesus (431) at which the teaching of Nestorius had been condemned, a document attributed by general consent to Eusebius was made public, in which the doctrine of Nestorius was shown to be identical with that of Paul of Samosata. Eusebius had at some period contracted a friendship with Eutyches, founded, we may fairly conjecture, on their common opposition to Nestorian error. But when Eutyches allowed himself to be betrayed into opinions which, though directly opposed to those of Nestorius, were equally contrary to the faith of the Church, Eusebius, now Bishop of Dorylæum, was no less zealous against his former friend than he had been against their common opponent. After repeated attempts at persuasion, Eusebius brought a formal charge of false teaching against Eutyches, before Flavian, who was then (448) presiding over a synod at Constantinople. Flavian was reluctant to proceed against Eutyches, and urged Eusebius to remonstrate with him privately once more. Eusebius, however, refused, saying that he had already done all he could to convince Eutyches of his errors, and that further efforts would be useless. Eutyches was then summoned to attend, but did not do so until the summons had been three times issued; he excused his refusal to obey by asserting that he had resolved never to leave his monastery and pleading distrust of Eusebius, whom he now looked upon as his enemy. At last, however, he came, attended by a large escort of soldiers and monks. He was interrogated by Eusebius, who in the meantime had been strongly pressing his case, and who now, as he said, felt some alarm lest Eutyches should succeed in evading condemnation and retaliate upon his accuser by obtaining a decree of banishment against him. Eutyches, however, was condemned and deposed; he immediately wrote a letter to the pope, complaining of Eusebius's proceedings, which he attributed to the instigation of the devil.

In the following year (449) at Constantinople, an examination was held, by imperial authority, of the acts of the synod which had condemned Eutyches, which acts he alleged to have been falsified. Eutyches was represented by three delegates; Eusebius, who wished to withdraw but was not permitted to do so, urged that the doctrinal question should not be considered on that occasion, but should be remitted to a general council. On the assembly of the council then summoned at Ephesus, Eusebius was forcibly excluded by the influence of Dioscurus of Alexandria, who had obtained the support of the emperor. The reading of his part in the synod at Constantinople provoked an outburst of reproaches and threats: "Away with Eusebius! Burn him! As he has divided so let him be divided!" Flavian and Eusebius were deposed and banished, and Flavian only survived for three days the physical injuries he had received in the tumultuary council. Eusebius wrote to the Emperors Valentinian and Marcian, asking

for a fresh hearing; and both Eusebius and Flavian sent written appeals to Rome. The text of these appeals was discovered in 1879 by Amelli — who was then curator of the Ambrosian Library at Milan and afterwards became Abbot of Monte Cassino — and was published by him in 1882. Eusebius grounds his appeal on the fact of his having been condemned unheard, and prays the pope to quash the sentence (*pronuntiate evacuari et inanem fieri meam iniquam condemnationem*); he also mentions a written appeal given by him to the papal legates at Ephesus, in which he had begged the Holy See to take cognizance of the matter (*in quibus vestrae sedis cognitionem poposci*). Eusebius fled to Rome, where he was kindly received by Leo I. In two letters written on the same day (13 April, 451) to Pulcheria and Anatolius, the pope bespeaks their good offices for Eusebius; in the former letter he mentions a report that the Diocese of Dorylæum was being thrown into disorder by an intruder (*quam dicitur vastare qui illi injuste asseritur subrogatus*). But Liberatus (*Breviarium*, c. xii) says that no one was put in Eusebius's place, and the report was therefore probably of merely local origin.

Eusebius took part in the Council of Chalcedon, at which he appears as the accuser of Dioscurus. He was one of the commission which drew up the definition of faith finally adopted. The council annulled his condemnation, and made special mention of the fact in the letter to the pope in which it sought his confirmation of its acts. The rescript of the Emperor Marcian (451), issued to clear the memory of Flavian, declares the reputation of Eusebius to be uninjured by the sentence of the Robber Council (*injusta sententia nihil obsit Eusebio*). He was one of the bishops who signed the 28th canon of Chalcedon giving patriarchal rights over Pontus and Asia to Constantinople. When the papal legates demurred to the passing of the canons in their absence, and the signatories of the region affected were asked to declare whether they had signed willingly or not, Eusebius said that he had done so, because when in Rome, he had read the canon to the pope, who had accepted it. Though he was doubtless mistaken as to the fact alleged (how the mistake arose cannot now be determined), his professed motive is significant. His name appears among the signatures to the acts of a council held in Rome in 503, but it seems improbable that he was alive at that date. Baronius considers that the signatures of numerous Eastern bishops appended to these acts are misplaced, and properly belong to some much earlier council, since none of the bishops are otherwise heard of later than ten years after the Council of Chalcedon, at which they had all been present.

Flavian said of Eusebius at Constantinople that "fire seemed cold to his zeal for orthodoxy", and Leo wrote of him that he was a man who "had undergone great perils and toils for the Faith". In these two sentences all that is known of him may be fitly summarized.

St. Cyril of Alex., *Adv. Nestor.*, I, 20; Marius Mercator, Part II; Evagrius, *Hist. Eccl.*; Theophanes, *Chronographia*; Leontius Byz., *Contra Nestor. et Eutyech.*; Leo, *Epp. xxi, lxxix, lxxx* (all in *P. G.* and *P. L.*); Labbe and Cossart, *Concilia*, IV; Liberatus, *Gesta de nom. Acac.*, also *Breviarium* (Gallandi, X and XII); Hefele, *History of the Councils*, III (tr. Edinburgh, 1883); Amelli, *S. Leone Magno e l'Oriente* (Milan, 1882). See also Bardenhewer, *Patrology*, Shahan tr. (Freiburg-im-B., St. Louis, 1908), 525; Lacey, *Apellatio Flaviani, with historical introduction* (pub. Church Historical Society, No. 70, London, 1891), and same writer's edition of the (two) Amelli letters (Cambridge, 1903), Anglican; Smith and Wace, *Dict. of Christ. Biog* (London, 1880), s.v.

Eusebius of Laodicea

Eusebius of Laodicea

An Alexandrian deacon who had some fame as a confessor and became bishop of Laodicea in Syria, date of birth uncertain: d. about 268. His story is told by Eusebius of Cæsarea (*Hist. Eccl.*, VII, xi and xxxii). As a deacon at Alexandria he had accompanied his bishop, Dionysius (with a priest, two other deacons and two Romans who were then in Egypt) before the tribunal of Æmilian, Prefect of Egypt, at the time of Emperor Valerianus (253-260). Dionysius tells the story of their trials in a letter to a certain bishop Germanus (*Eus.*, *Hist. Eccl.*, VII xi). They were all sentenced to banishment, but Eusebius managed to remain in the city in hiding, "zealously served the confessors in prison and buried the bodies of the dead and the blessed martyrs, not without danger to his own life" (*ibid.*) In 260 there broke out a rebellion at Alexandria and at the same time a plague ravaged the city. Eusebius again risked his life continually by nursing the sick and the wounded (*ibid.*, VII, xxxii). The Romans besieged a part of the town (Bruchium, *Pyroucheion*, *Prouchion*). Anatolius, Eusebius' friend, was among the besieged, Eusebius himself outside. Eusebius went to the Roman general and asked him to allow any who would to leave Bruchium. His petition was granted and Anatolius, with whom he managed to communicate, explained the matter to the leaders of the rebellion and implored them to capitulate. They refused but eventually allowed the women children and old men to profit by the Romans' mercy. A great crowd then came to surrender at the Roman camp. "Eusebius there nursed all who were exhausted by the long siege with every care and attention as a father and physician." (*ibid.*, xxxii). In 264 Dionysius (who seems to have come back from banishment) sent Eusebius as his delegate to Syria to represent him at the discussions that were taking place concerning the affair of Paul of Samosata. Anatolius accompanied his friend. The Syrians were so impressed by these two Egyptians that they kept them both and made Eusebius

Bishop of Laodices as successor to Socrates. Not long afterwards he died and was succeeded by Anatolius. The date of his death is uncertain. Harnack thinks it was before the great Synod of Antioch in 268 (*Chron. Der altchrist, Litt.*, I, 43). Another theory is that the siege of Alexandria was in 269, that the friends went to Syria at the end of that year, and that Eusebius's death was not until 279 (so W. Reading in the *Variorum* notes to his edition of Eusebius Pammph., Cambridge 1720, I 367), Gams puts his death in 270 (*Kirschenlexikon*, s.v. Eusebius con Laodicea). Eusebius's name does not occur in the acts of the synod in 268.

EUSEBIUS, *Hist. Eccl.*, VII, xi and xxxii; BARONIUS & *Annales eccl.*, ad av. 263, 8-11; HARNACK, *Chron. Der altchristl, Litt.*, I, 34, 37, 41, etc.; DUCHESNES, *Hist. Ancienne de l'église* (Paris, 1906), I, 488-489.

ADRIAN FORTESCUE

Eusebius of Nicomedia

Eusebius of Nicomedia

Bishop, place and date of birth unknown; d. 341. He was a pupil at Antioch of Lucian the Martyr, in whose famous school he learned his Arian doctrines. He became Bishop of Berytus; but from ambitious motives he managed to get transferred, contrary to the canons of the early Church, to the see of Nicomedia, the residence of the Eastern Emperor Licinius, with whose wife, Constantia, sister of Constantine, he was in high favor.

Arius, when he was condemned at Alexandria, by Alexander, bishop of that see, took refuge at Caesarea, where he was well received by the famous apologist and historian Eusebius, and wrote to Eusebius of Nicomedia for support. The letter is preserved. In it the heretic explains his views clearly enough, and appeals to his correspondent as to a "fellow Lucianist". Eusebius put himself at the head of the party, and wrote many letters in support of Arius. One is preserved, addressed to Paulinus, Bishop of Tyre. We learn from it what Eusebius's doctrine was at this time: the Son he says is "not generated from the substance of the Father", but He is "other in nature and power"; He was created, and this is not inconsistent with his Sonship, for the wicked are called sons of God (*Is.*, i, 2; *Deut.*, xxxii, 18) and so are even the drops of dew (*Job*, xxxviii, 28); He was begotten by God's free will. This is pure Arianism, borrowed from the letters of Arius himself, and possibly more definite than the doctrine of St. Lucian.

Alexander of Alexandria was obliged to address a circular to all bishops. He had hoped, he says, to cover the matter in silence, "but Eusebius, who is now at Nicomedia, considering the Church's affairs to be in his hands, because he has not been condemned for having left Berytus and for having coveted the Church of Nicomedia is the leader

of these apostates, and has sent round a document in their support, in order that he might seduce some of the ignorant into this disgraceful heresy. . . . If Eusebius should write to you, pay no attention". Eusebius replied by assembling a council in his own province, which begged all the Eastern bishops to communicate with Arius, and to use their influence with Alexander in his favor. At the request of Arius, Eusebius of Cæsarea and others met together in Palestine, and authorized him to return to the Church which he had governed in Alexandria.

The situation changed when Constantine had conquered Licinius in 323. The Christian emperor began by comprising Arius and Alexander in common disapproval. Why could not they agree to differ about subtleties of this kind, as the philosophers did? A letter in this sense to the patriarch was ineffectual; so Constantine preferred the side of authority, and wrote an angry rebuke to Arius. In the case of the Donatists, he had obtained a decision from a "general" council, at Arles of all the bishops of his then dominions. He now summoned a larger council, from around the world of which his victorious arms had made him master. It met at Nicæa in 325. The bishops were nearly all Easterns; but a Western bishop, Hosius of Cordova, who was in the emperor's confidence, took a leading part, and the pope was represented. Constantine ostentatiously declared at the council went no further than the guardianship of the bishops, but Eusebius of Cæsarea makes it clear that he spoke on the theological question. The bishop of Nicomedia and his friends put forward an Arian confession of faith, but it had only about seventeen supporters from among three hundred members of the council, and it was hooted by the majority. The formula which was eventually adopted was resisted for some time by the Arian contingent, but eventually all the bishops signed, with the exception of the two Egyptians who had been excommunicated by Alexander.

Eusebius of Nicomedia had bad luck. Though he had signed the creed, he had not agreed to the condemnation of Arius, who had been, so he said, misrepresented; and after the council he encouraged in their heresy some Arians whom Constantine had invited to Constantinople with a view to their conversion. Three months after the council, the Emperor sent him like Arius into exile, together with Theognis, Bishop of Nicæa, accusing him of having been a supporter of Licinius, and of even having approved of his persecutions, as well as of having sent spies to watch himself. But the banishment of the intriguer lasted only two years. It is said that it was Constantia, the widow of Licinius, who induced Constantine to recall Arius, and it is probable that she was also the cause of the return of her old friend Eusebius. By 329 he was in high favor with the emperor with whom he may have had some kind of a relationship, since Ammianus Marcellinus makes him a relative of Julian.

From this time onward we find Eusebius at the head of a small and compact party called, by St. Athanasius, the Eusebians *peri ton Eusebion*, whose object it was to undo the work of Nicæa, and to procure the complete victory of Arianism. They did not publicly recall the signatures that had been forced from them. They explained that Arius had repented on any excess in his words, or had been misunderstood. They dropped the Nicene formulæ as ambiguous. They were the leaders of a much larger party of conservative prelates, who wished to stand well with the emperor, who revered the martyr Lucian and the great Origen, and were seriously alarmed at any danger of Sabellianism. The campaign opened with a successful attack on Eustathius of Antioch, the principal prelate of the East properly so called. He had been having an animated controversy with Eusebius of Cæsarea, in which he had accused that learned person of polytheism, while Eusebius retorted with a charge of Sabellianism. Eustathius was deposed and exiled, for alleged disrespectful expressions about the emperor's mother, St. Helena, who was greatly devoted to the memory of St. Lucian. It is said he was also charged with immorality and heresy, but it is certain that the whole case was got up by the Eusebians. The great see of Alexandria was filled in 328 by the deacon Athanasius, who had taken a leading part in Nicæa. Small in stature, and young in years, he was at the head of a singularly united body of nearly a hundred bishops, and his energy and vivacity, his courage and determination marked him out as the one foe the Eusebians had to dread. The Alexandrian Arians had now signed an ambiguous formula of submission, and Eusebius of Nicomedia wrote to Athanasius, asking him to reinstate them, adding a verbal message of threats. The Meletijan schism, in Egypt, had only been partially healed by the mild measures decreed at Nicæa, and the schismatics were giving trouble. Constantine was induced by Eusebius to write to Athanasius curtly telling him he should be deposed, if he refused to receive into the Church any who demanded to be received. Athanasius explained why he could not do this, and the emperor seems to have been satisfied. Eusebius then joined hands with the Meletians, and induced them to trump up charges against Athanasius. They first pretended that he had invented a tribute of linen garments, which he extracted. This was disproved, but Athanasius himself was sent for to the court. The Meletians then brought up a charge which did duty for many years, that he had ordered a priest named Macarius to overturn an altar and break up a chalice belonging to a priest named Ischyra, in the Mareotis, though in fact Ischyra had never been a priest, and at the time alleged could not have been pretending to say Mass, for he was ill in bed. It was also said the Athanasius had assisted a certain Philumenus to conspire against the emperor, and had given him a bag of gold. Again the accusers were refuted and put to flight. The saint returned to his Church with a letter from Constantine, in which the emperor sermonized the Alexandrians after his wont, urging them to peace and unity. But the

question of the broken chalice was not dropped and the Meletians further got hold of a bishop named Arsenius, whom they kept in hiding while they declared that Athanasius had put him to death; they carried about a severed hand, which they said was Arsenius's cut off by the patriarch for the purpose of magic. Athanasius induced Ischyras to sign a document denying the former charge, and managed to discover the whereabouts of Arsenius. Constantine in consequence wrote a letter to the patriarch declaring him innocent.

Eusebius had stood apart from all these false accusations, and he was not disheartened by so many failures. He got the Meletians to demand a synod, and represented to Constantine that it would be right for peace to be obtained before the assembling of many bishops, at Jerusalem, to celebrate the dedication of the new Church of the Holy Sepulchre. This was in 335. A synod met at Tyre, whose history need not be detailed here. Athanasius brought some fifty bishops with him, but they had not been summoned, and were not allowed to sit with the rest. A deputation was sent to Mareotis to inquire into the question of Ischyras and the chalice, and the chief enemies of Athanasius were chosen for the purpose. The synod was tumultuous, and even the Count Dionysius, who had come with soldiers to support the Eusebians thought the proceedings unfair. It remains a mystery how so many well-meaning bishops were deceived into condemning Athanasius. He refused to await their judgement. Extricating himself with difficulty from the assembly, he led away his Egyptians, and betook himself directly to Constantinople, where he accosted the emperor abruptly, and demanded justice. At his suggestion, the Council of Tyre was ordered to come before the emperor. Meanwhile Eusebius had brought the bishops on to Jerusalem, where the deliberations were made joyous by the reception back into the Church of the followers off Arius. The Egyptian bishops had drawn up a protest, attributing all that had been done at Tyre to a conspiracy between Eusebius and the Meletians and Arians, the enemies of the Church. Athanasius asserts that the final act at Jerusalem had been Eusebius's aim all along; all the accusations against himself had tended to get him out of the road in order that the rehabilitation of the Arians might be effected.

Eusebius prevented any of the bishops at Jerusalem from going to Constantinople, save those he could trust, Eusebius of Cæsarea, Theognis of Nicæa, Patrophilus of Scythopolis and the two young Pannonian bishops Ursacius and Valens, who were to continue Eusebius's policy long after his death. They carefully avoided renewing the accusations of murder and sacrilege, which Constantine had already examined; and Athanasius tells us that five Egyptian bishops reported to him that they rested their case on a new charge, that he had threatened to delay the corn ships from Alexandria which supplied Constantinople. The emperor was enraged. No opportunity of defense was given, and Athanasius was banished to Gaul. But in public, Constantine said that

he had put in force the decree of the Council of Tyre. Constantine the Younger, however, declared later that his father had intended to save Athanasius from his enemies by sending him away, and that before dying he had had the intention of restoring him. The leader of the Meletians John Arkaph, was similarly exiled. Eusebius wanted him no further, and hence did not care to protect him. One triumph was yet wanting to Eusebius, the reconciliation of Arius, his friend. This was to be consummated at length at Constantinople, but the designs of man were frustrated by the hand of God. Arius died suddenly under peculiarly humiliating conditions on the eve of the day appointed for his solemn restoration to Catholic communion in the Cathedral of New Rome.

Until 337 the Eusebians were busy obtaining, by calumny, the deposition of the bishops who supported the Nicene faith. Of these the best known are Paul of Constantinople, Aselepas of Gaza, and Marcellus Metropolitan of Ancyra. In the case of Marcellus they had received considerable provocation. Marcellus had been their active enemy at Nicæa. At Tyre he had refused to condemn Athanasius, and he presented a book to the emperor in which the Eusebians received harsh words. He was convicted, not without grounds, of Sabellianizing, and took refuge in Rome. On 22 May, 337 Constantine the Great died at Nicomedia, after having been baptized by Eusebius, bishop of the place. His brothers and all but two of his nephews were at once murdered, in order to simplify the succession, and the world was divided between his three sons.

Arrangement was effected between them by which all the exiled bishops returned, and Athanasius came back to his flock. Eusebius was in reality a gainer by the new regime. Constantius, who was now Lord of all the East, was but twenty years old. He wished to manage the Church, and he seems to have fallen a prey to the arts of the old intriguer Eusebius, so that the rest of his foolish and obstinate life was spent in persecuting Athanasius, and in carrying out Eusebius's policy. Never himself an Arian, Constantius held orthodoxy to lie somewhere between Arianism and the Nicene faith. The Arians, who were ready to disguise their doctrine to some extent, were therefore able to obtain from him a favor, which he denied to the few uncompromising Catholics who rejected his generalities.

The see of Alexandria had remained vacant during the absence of Athanasius. Eusebius now claimed to put the Synod of Tyre in force, and a rival bishop was set up in the person of Pistus, one of the Arian priests whom Alexander had long ago excommunicated. Until now the East alone had been concerned. The Eusebians were the first to try to get Rome and the West on their side. They sent to the pope an embassy of two priests and a deacon, who carried with them the decisions of the council of Tyre and the supposed proofs of the guilt of Athanasius of which the accused himself had been unable to get a sight. Instead of at once granting his communion to Pistus, Pope Julius sent the documents to Athanasius, in order that he might prepare a defense.

The latter summoned a council of his suffragans. More than eighty attended, and sent Julius a complete defense of their patriarch. The arrival of Athanasius's envoys bearing his letter struck terror into the minds of the ambassadors of the Eusebians. The priests fled, and the deacon could think of nothing better than to beg Julius to call a council, and be judge himself. The pope consented on the grounds that in the case of one of the chief churches, such as Alexandria, it was right and customary that the matter should be referred to him. He therefore wrote summoning both the accusers and the accused to a council of which he was willing that they should determine the place and time.

Thus it was not Athanasius who appealed to the pope, but the Eusebians, and that simply as a means of withdrawing from an awkward predicament. Pistus was not a success, and Constantius introduced by violence a certain Gregory, a Cappadocian, in his place. Athanasius, after addressing a protest to the whole Church against the methods of Eusebius, managed to escape with his life, and at once made his way to Rome to obey the pope's summons. His accusers took good care not to appear. Julius wrote again, fixing the end of the year (339) as the term for their arrival. They detained the legates until the fixed time had elapsed, and sent them back in January 340, with a letter full of studied and ironical politeness, of which Sozomen had preserved us the tenor. He says:

Having assembled at Antioch, they wrote an answer to Julius, elaborately worded and rhetorically composed, full of irony, and containing terrible threats. They admitted in this letter that Rome was always honored as the school of the Apostles, and the metropolis of the Faith from the beginning, although its teachers had settled in it from the East. But they thought that they ought not to take a secondary place because they had less great and populous churches, since they were superior in virtue and intention. They reproached Julius with having communicated with Athanasius, and complained that this was an insult to their synod, and that their condemnation of him was made null; and they urged that this was unjust and contrary to ecclesiastical law. After thus reproaching Julius of ill usage, they promised, if he would accept the deposition of those whom they had deposed, and the appointment of those whom they had ordained, to grant him peace and communion, but if he withstood their decrees, they would refuse to do so. For they declared that the earlier Eastern bishops had made no objection when Novatian was driven out of the Roman Church. But they wrote nothing to Julius concerning their acts, which were contrary to the decisions of the Council of Nicæa, saying that they had many necessary reasons to allege in excuse, but that it was superfluous to make any defense against a vague and general suspicion that they had done wrong.

The traditional belief that Rome had been schooled by the Apostles, and had always been the metropolis of the Faith is interesting in the mouths of those who were denying his right to interfere in the East, in a matter of jurisdiction; for it is to be remembered that neither then, or at any time, was Athanasius accused of heresy. This claim of independence is a first sign of the breach which began with the foundation of Constantinople as New Rome, and which ended in the complete separation of that city and all its dependencies from Catholic communion. For Eusebius had not contented himself with Nicomedia, now that it was no longer the capital, but managed to get St. Paul of Constantinople exiled once more, and had seized upon that see, which was evidently, in his view, to be set above Alexandria or Antioch, and to be in very deed a second Rome.

The Roman council met in the autumn of 340. The Eusebians were not represented, but many Easterns, their victims, who had taken refuge at Rome, were there from Thrace, Cœ, Phœ and Palestine, besides Athanasius and Marcellus. Deputies came to complain of the violence at Alexandria. Others explained that many Egyptian bishops had wished to come, but had been prevented and even beaten or imprisoned. At the wish of the council the pope wrote a long letter to the Eusebians. It is one of the finest

letters written by any pope, and lays bare all the deceits of Eusebius, which is as unsparring as it is dignified. It is probably that the letter did not trouble Eusebius much, safe as he was in the emperor's favor. It is true that by the death of Constantine II, Constans, the protector of orthodoxy, had inherited his dominions, and was now far more powerful than Constantius. But, Eusebius had never posed as an Arian, and in 341 he had a fresh, triumph in the great Dedication Synod of Antioch, where a large number of orthodox and conservative bishops ignored the Council of Nicæa, and showed themselves quite at one with the Eusebian party; though denying they were ever followers of Arius, who was not even a bishop!

Eusebius died, full of years and honors, probably soon after the council; At all events he was dead before that of Sardica. He had arrived at the summit of his hopes. He may really have believed Arian doctrine, but clearly his chief aim had ever been his own aggrandizement, and the humiliation of those who had humbled him at Nicæa. He had succeeded. His enemies were in exile. His creatures sat in the sees of Alexandria and Antioch. He was bishop of the imperial city, and the young emperor obeyed his counsels. If Epiphanius is right in calling him an old man even before Nicæa he must now have reached a great age. His work lived after him. He had trained a group of prelates who continued his intrigues, and who followed the court from place to place throughout the reign of Constantius. More than this, it may be said that the world suffers to this day from the evil wrought by this worldly bishop.

JOHN CHAPMAN

St. Eustace

St. Eustace

Date of birth unknown; died 29 March, 625. He was second abbot of the Irish monastery of Luxeuil in France, and his feast is commemorated in the Celtic martyrologies on the 29th of March. He was one of the first companions of St. Columbanus, a monk of Bangor (Ireland), who with his disciples did much to spread the Gospel over Central and Southern Europe. When Columbanus, the founder of Luxeuil, was banished from the Kingdom of Burgundy, on account of his reproving the morals of

King Thierry, the exiled abbot recommended his community to choose Eustace as his successor. Subsequently Columbanus settled at Bobbio in Italy. Three years after his appointment (613), when Clothaire II became ruler of the triple Kingdom of France, the abbot of Luxeuil was commissioned, by royal authority, to proceed to Bobbio for the purpose of recalling Columbanus. The latter, however, setting forth his reasons in a letter to the king, declined to return, but asked that Clothaire would take under his protection the monastery and brethren of Luxeuil. During the twelve years that followed, under the administration of the abbot Eustace, the monastery continued to acquire renown as a seat of learning and sanctity. Through the royal patronage, its benefices and lands were increased, the king devoting a yearly sum, from his own revenues, towards its support. Eustace and his monks devoted themselves to preaching in remote districts, not yet evangelized, chiefly in the north-eastern extremities of Gaul. Their missionary work extended even to Bavaria. Between the monasteries of Luxeuil in France and that of Bobbio in Italy (both founded by St. Columbanus) connection and intercourse seem to have long been kept up.

JOHN B. CULLEN

John Chetwode Eustace

John Chetwode Eustace

Antiquary, b. in Ireland, c. 1762; d. at Naples, Italy, 1 Aug., 1815. His family was English, his mother being one of the Chetwodes of Cheshire. He was educated at Sedgley Park School, and after 1774 at the Benedictine house, St. Gregory's, Douay. He did not become a Benedictine though he always retained an attachment to the order, but went to Ireland where he taught rhetoric at Maynooth college, where he was ordained priest. He never had much sympathy for Ireland and, having given some offence there, returned to England to assist Dr. Collins in his school at Southall Park. From there he went to be chaplain to Sir William Jerningham at Costessey. In 1802 he travelled through Italy with three pupils, John Cust (afterwards Lord Brownlow), Robert Rushbroke, and Philip Roche. During these travels he wrote a journal which subsequently became celebrated in his "Classical Tour". In 1805 he resided in Jesus College, Cambridge, as tutor to George Petre. This was a most unusual position for a Catholic priest, and Eustace's intercourse with leading members of the university led to his being charged with indifferentism. Dr. Milner, then vicar Apostolic, charged him with laying aside "the distinctive worship of his priesthood, in compliment, as he professed, to the liberality of the Protestant clergy, with whom he associated" and with permitting Catholics under his care to attend Protestant services. "This conduct", wrote the bishop, "was so notorious and offensive to real Catholics, that I was called upon by my brethren

to use every means in my power to put a stop to it." On the other hand, an intimate friend says, "he never for a moment lost sight of his sacred character or its duties" (*Gentleman's Magazine*, see below). When Petre left Cambridge, Eustace accompanied him on another tour to Greece, Sicily, and Malta. In 1813 the publication of his "Classical Tour" obtained for him sudden celebrity, and he became a prominent figure in literary society, Burke being one of his chief friends. A short tour in France, in 1814, led to his "Letter from Paris", and in 1815 he travelled again to Italy to collect fresh materials, but he was seized with malaria at Naples and died there. Before death he bitterly lamented the erroneous tendency of certain passages in his writings. His works were: "A Political Catechism adapted to the present Moment" (1810); "An Answer to the Charge delivered by the Bishop of Lincoln to the Clergy of that Diocese at the Triennial Visitation in 1812"; "A Tour through Italy" (London, 1813, 2n ed., 1814); "A Classical Tour through Italy", 3d edition of the previous work, revised and enlarged (1815). A seventh edition of it appeared in London in 1841. It was also reprinted at Paris in 1837 in a series "Collections of Ancient and Modern English Authors", and "The Proofs of Christianity" (1814). The manuscript of his course of rhetoric, never published, is at Downside.

EDWIN BURTON

Maurice Eustace

Maurice Eustace

Eldest son of Sir John Eustace, Castlemartin, County Kildars, Ireland, martyred for the Faith, Nov. 1581. Owing to the penal laws he was sent to be educated at the Jesuit College at Bruges in Flanders, where, after the completion of his secular studies, he desired to enter the Society of Jesus. His father, however, wrote the superiors of the college to send him home. Maurice returned to Ireland, much against his own inclinations, but in hope of being able, later on, to carry out his desire. After a brief stay, during which he tried to dissuade his father from opposing his vocation, he went back to Flanders. His old masters at the college of Bruges on learning his father's determination advised him to return to Ireland and devote himself in the world to the service of religion. Shortly after his arrival in Ireland he got an appointment as captain of horse, in which position he did much to edify, and even win back to the Faith, those who served under him. He never abandoned the idea of becoming a priest, and secretly took Holy Orders. His servant, who was aware of the fact, told his father, who had his son immediately arrested and imprisoned in Dublin. A younger brother, desiring to inherit the family estates, also reported Maurice to be a priest, a Jesuit, and a friend of the Queen's enemies. As a consequence he was put on trial for high treason. During

his imprisonment Adam Loftus, Protestant Archbishop of Dublin, offered him his daughter in marriage, and a large dowry if he would accept the reformed religion. Yielding neither to the bribery nor persecution, Eustace was sentenced to public execution, and hanged.

JOHN B. CULLEN

Bartolomeo Eustachius

Bartolomeo Eustachius

A distinguished anatomist of the Renaissance period — "one of the greatest anatomists that ever lived," according to Hirsch's authoritative "Biographical Dictionary of the Most Prominent Physicians of all Time" — b. at San Severino, in the March of Ancona, Italy, in the early part of the sixteenth century; d. at Rome, August, 1574.

Of the details of his life very little is known. He received a good education, and knew Latin and Greek and Arabic very well. After receiving his degree in medicine he devoted himself to the study of anatomy so successfully that with Vesalius and Columbus he constitutes the trio who remade the science of anatomy for modern times. He early attracted attention for his skill and knowledge, and became physician to Cardinal Borromeo, since known as St. Charles Borromeo. He was also physician to Cardinal Giulio della Rovere whom he accompanied to Rome. After the death of Columbus he was chosen professor of anatomy at the Sapienza which had been reorganized as the Roman University by Pope Alexander VI and magnificently developed by Popes Leo X and Paul III. The reason for his selection as professor was that he was considered the greatest anatomist in Italy after Columbus's death, and the policy of the popes of his time was to secure for the papal medical school the best available teachers. This position gave him time and opportunity for original work of a high order and Eustachius took advantage of it. He published a number of works on anatomy in which he added very markedly to the knowledge of the details of the structure of most of the organs of the body accepted up to this time. His first work was a commentary on Erotion's "Lexicon". Subsequently he wrote a treatise on the kidneys, another on the teeth, a third on blood vessels, a paper on the Azygos vein, and other special anatomical structures. Morgagni and Haller declared that there was not a part of the body on whose structure he had not shed light. In the midst of his work he became, in 1570, physician to Cardinal Peretti, afterwards Pope Sixtus V. At the beginning of his career as an anatomist Eustachius criticized Vesalius rather severely for having departed too far from Galen. After having continued his own original investigations for some time, however, he learned to appreciate Vesalius's merits and did ample justice to his work.

Eustachius's greatest contributions to anatomical science passed through many vicissitudes which kept his real merit from being recognized until long after his death. His anatomical investigations were recorded in a series of plates with text attached. Eustachius himself was not afforded the opportunity to arrange for the publication of his work, as he died rather suddenly. Some of his papers and plates went to his heirs, and others were deposited in the Vatican Library. They were unearthed by Lancisi, a distinguished papal physician at the beginning of the eighteenth century, and were published at the expense of Pope Clement XI. This work, "Bartholomæi Eustachii Tabulæ Anatomicæ" (Rome, 1714), demonstrates how much Eustachius had accomplished in anatomy. His special contributions to the science were the descriptions of the stirrup bone in the ear and the canal connecting the ear and the mouth, since called by his name. His monograph on the teeth of the child is very complete and has been surpassed only in recent years. In myology he worked out the insertions and attachment of the sterno-eleido-mastoid muscle, of the coccygeus, the splenius of the neck, the levator of the eyelid, and some others. In neurology his descriptions of the cranial nerves is especially full. In abdominal anatomy he added much. His description of the foetal circulation was the most complete up to his time and it was he who recognized the valve on the left side of the opening of the inferior vena cava which serves to direct the blood from this vessel through the foramen ovale into the left auricle. This constitutes the most important distinctive structural difference between the circulatory apparatus of the adult and the child and is called the Eustachian valve.

FOSTER, *History of Physiology* (New York, 1901). The *Prolegomena Martini in Eustachii Tab. Anat.* (Edinburgh, 1755), contains a sketch of the life and times of Eustachius; CORRADI, *Gior. Med. di Roma* (1870, VI).

JAMES J. WALSH

Sts. Eustachius and Companions

Sts. Eustachius and Companions

Martyrs under the Emperor Hadrian, in the year 188. Feast in the West, 20 September; in the East, 2 November. Emblems: a crucifix, a stag, an oven.

The legend relates that Eustachius (before baptism, Placidus), a Roman general under Trajan, while still a heathen, saw a stag coming towards him, with a crucifix between its horns; he heard a voice telling him that he was to suffer much for Christ's sake. He received baptism, together with his wife Tatiana (or Trajana, after baptism Theopista) and his sons, Agapius and Theopistus. The place of the vision is said to have been Guadagnolo, between Tibur and Praeneste (Tivoli and Palestrina), in the vicinity of Rome. Through adverse fortune the family was scattered, but later reunited.

For refusing to sacrifice to the idols after a victory, they suffered death in a heated brazen bull. Baronius (*Ann. Eccl.*, ad an. 103, 4) would identify him with Placidus mentioned by Josephus Flavius as a general under Titus.

The Acts are certainly fabulous, and recall the similar story in the Clementine Recognitions. They are a production of the seventh century, and were used by St. John Damascene, but the veneration of the saint is very old in both the Greek and Latin Churches. He is honoured as one of the Holy Helpers, is invoked in difficult situations, and is patron of the city of Madrid and of hunters. The church of Sant' Eustachio in Rome, title of a cardinal-deacon, existed in 827, according to the *Liber Pontificalis*, but perhaps as early as the time of Gregory the Great (d. 604). It claims to possess the relics of the saint, some of which are said to be at St-Denis and at St-Eustache in Paris. An island in the Lesser Canilles and a city in Canada bear his name.

FRANCIS MERSHMAN

St. Eustathius of Antioch

St. Eustathius

Bishop of Antioch, b. at Side in Pamphylia, c. 270; d. in exile at Trajanopolis in Thrace, most probably in 360, according to some already in 336 or 337. He was at first Bishop of Bercoea in Syria, whence he was transferred to Antioch c. 323. At the Council of Nicæa (325), he was one of the most prominent opponents of Arianism and from 325-330 he was engaged in an almost continuous literary warfare against the Arians. By his fearless denunciation of Arianism and his refusal to engage any Arian priests in his diocese, he incurred the hatred of the Arians, who, headed by Eusebius of Cæsarea and his namesake of Nicomedia, held a synod at Antioch (331) at which Eustathius was accused, by suborned witnesses, of Sabellianism, incontinency, cruelty, and other crimes. He was deposed by the synod and banished to Trajanopolis in Thrace by order of the Emperor Constantine, who gave credence to the scandalous tales spread about Eustathius. The people of Antioch, who loved and revered their holy and learned patriarch, became indignant at the injustice done to him and were ready to take up arms in his defence. But Eustathius kept them in check, exhorted them to remain true to the orthodox faith and humbly left for his place of exile, accompanied by a large body of his clergy. The adherents of Eustathius at Antioch formed a separate community by the name of Eustathians and refused to acknowledge the bishops set over them by the Arians. When, after the death of Eustathius, St. Meletius became Bishop of Antioch in 360 by the united vote of the Arians and the orthodox, the Eustathians would not recognize him, even after his election was approved by the Synod of Alexandria in 362. Their intransigent attitude gave rise to two factions among the orthodox, the so-called

Meletian Schism, which lasted till the second decade of the fifth century (Cavallera, *Le schisme d'Antioche*, Paris, 1905).

Most of the numerous dogmatic and exegetical treatises of Eustathius have been lost. His principal extant work is "De Engastrimytho", in which he maintains against Origen that the apparition of Samuel (I Kings, xxviii) was not a reality but a mere phantasm called up in the brain of Saul by the witch of Endor. In the same work he severely criticizes Origen for his allegorical interpretation of the Bible. A new edition of it, together with the respective homily of Origen, was made by A. Jahn in Gebhardt and Harnack's "Texte und Untersuchungen zur Gesch. der altchristl. Literatur" (Leipzig, 1886), II, fasc. iv. Cavallera recently discovered a Christological homily: "S. Eustathii ep. Antioch. in Lazarum, Mariam et Martham homilia christologica", which he edited together with a commentary on the literary fragments of Eustathius (Paris, 1905). Fragments of lost writings are found in Migne (P. G., XVIII, 675-698), Pitra and Martin (*Analecta Sacra*, II, Proleg., 37-40; IV, 210-213 and 441-443). "Commentarius in Hexaameron" (Migne, P. G., XVIII, 707-794) and "Allocution ad Imp. Constantinum in Conc. Nicæno" (Migne, P. G., XVIII, 673-676) are spurious. His feast is celebrated in the Latin Church on 16 July, in the Greek on 21 Feb. His relics were brought to Antioch.

Michael Ott

Eustathius of Sebaste

Eustathius of Sebaste

Born about 300; died about 377. He was one of the chief founders of monasticism in Asia Minor, and for a long time was an intimate friend of St. Basil. He was censured because of the exaggerated asceticism of his followers, hesitated all his life between various forms of Arianism, and finally became a leader of the Pneumatomachians condemned by the First Council of Constantinople (381). Eustathius was apparently the son of Eulalius, Bishop of Sebaste, the metropolis of Armenia (the Roman province). He studied under Arius (Basil, Ep. cxxxiii, 3; cxxliv, 3; cxlxiii, 3), and was known from the beginning as one who sympathized with the heretic. He was ordained priest and then founded a community of monks. Partly because of the idea common at that time (Fortescue, *The Greek Fathers*, London, 1908, pp. 57, 94) that no one could be both a priest and a monk, and partly also because of the extravagance of his community, he

was suspended from his priesthood by a synod at Neo-Cæsarea. Late, in 340, a synod at Gangra condemned his followers (*toûs peri Eustáthion*) for exaggerated and extravagant asceticism. These monks forbade marriage for any one, refused to communicate with married priests, and taught that no married person can be saved; they fasted on Sundays and would not do so on the appointed fast-days; they claimed special grace for their own conventicles and dissuaded people from attending the regular services of the Church. It was evidently a movement like that of the Encratites and Montanists. Against these abuses the council drew up twenty canons, but without directly censuring Eustathius (Hefele, "Conciliengesch.", 1st ed., II, 777 sq.; Braun, "Die Abhaltung der Synode von Gangra" in "Hist. Jahrb.", 1895, pp. 586 sq.). Sozomen (Hist. Eccl., III, xiv, 36) says that Eustathius submitted to this council and gave up his eccentricities. However, a synod at Antioch (341?) condemned him again for "perjury" (Sozomen, IV, xxiv, 9), perhaps because he had broken his promise made on oath. About the year 356 he became Bishop of Sebaste. St. Basil was at that time (357-358) studying the life of monks before founding his own community at Amnesus, and he was much attracted by Eustathius's reputation as a zealous leader of monasticism. For years, till about 372 or so, Basil believed in and defended his friend. But Eustathius was anything but a Catholic. Once, apparently in 366, he persuaded the pope (Liberius, 352-366) of his orthodoxy by presenting a confession of the Nicene faith (Socrates, IV, xii); otherwise he wavered between every kind of Arianism and semi-Arianism and signed all manner of heretical and contradictory formulæ. In 385 a synod at Melitene deposed him, it seems rather for the old question of his rigorism than for Arianism. Meletius (later the famous Bishop of Antioch) succeeded him at Sebaste. But the Semi-Arians still acknowledged Eustathius. He wandered about, was present at many synods (at Seleucia in 359, later at Smyrna, in Pisidia, Pamphylia, etc.—Socrates, IV, xii, 8), and signed many formulæ. If one can speak of any principle in so inconsistent a person, it would seem that Eustathius was generally on the side of one of the forms of Semi-Arianism, opposed to Catholics on the one hand and to extreme Arians on the other. St. Basil found him out and broke with him definitively at last (about 372 or 373). By this time Eustathius had taken up the cause of the people who denied the consubstantial nature of the Holy Ghost (Socrates, Hist. Eccl., II, xlv, 6; Basil, Ep. cciii, 3). We hear of him last about 377; he was then a very old man (Basil, Ep. cciv, 4; xxiii, 3). Besides his activity as a founder of monasticism in Roman Armenia, Pontus, and Paphlagonia (Sozomen, III, xiv, 36, Eustathius had merit as an organizer of works of charity, builder of almshouses, hospitals, refuges, etc. (Epiphanius, Hær., lxxv, 1; Sozomen, III, xiv, 36).

Adrian Fortescue

St. Eustochium Julia

St. Eustochium Julia

Virgin, born at Rome c. 368; died at Bethlehem, 28 September, 419 or 420. She was the third of four daughters of the Roman Senator Toxotius and his wife St. Paula (q.v.), the former belonging to the noble Julian race, the latter tracing her ancestry through the Spipios and the Gracchi (Jerome, Ep. cxviii). After the death of her husband (c. 380) Paula and her daughter Eustochium lived in Rome as austere a life as the Fathers of the desert. When St. Jerome came to Rome from Palestine in 382, they put themselves under his spiritual guidance. Hymettius, an uncle of Eustochium, and his wife Praetextata tried to persuade the youthful Eustochium to give up her austere life and enjoy the pleasures of the world, but all their attempts were futile. About the year 384 she made a vow of perpetual virginity, on which occasion St. Jerome addressed to her his celebrated letter "De custodia virginitatis" (Ep. xxii in P.L., XXII, 394-425). A year later St. Jerome returned to Palestine and soon after was followed to the Orient by Paula and Eustochium. In 386 they accompanied St. Jerome on his journey to Egypt, where they visited the hermits of the Nitrian Desert in order to study and afterwards imitate their mode of life. In the fall of the same year they returned to Palestine and settled permanently at Bethlehem. Paula and Eustochium at once began to erect four monasteries and a hospice near the spot where Christ was born. While the erection of the monasteries was in process (386-9) they lived in a small building in the neighbourhood. One of the monasteries was occupied by monks and put under the direction of St. Jerome. The three other monasteries were taken by Paula and Eustochium and the numerous virgins that flocked around them. The three nunneries, which were under the supervision of Paula, had only one oratory, where all the nuns met several times daily for prayer and the chanting of psalms. St. Jerome testifies (Ep. 308) that Eustochium and Paula performed the most menial services. Much of their time they spent in the study of Holy Scripture under the direction of St. Jerome.

Eustochium spoke Latin and Greek with equal ease and was able to read the Holy Scriptures in the Hebrew text. Many of St. Jerome's Biblical commentaries owe their existence to her influence and to her he dedicated his commentaries on the prophets Isaias and Ezechiel. The letters which St. Jerome wrote for her instruction and spiritual

advancement are, according to his own testimony (*De viris illustribus*, cap. cxxxv), very numerous. After the death of Paula in 404, Eustochium assumed the direction of the nunneries. Her task was a difficult one on account of the impoverished condition of the temporal affairs which was brought about by the lavish almsgiving of Paula. St. Jerome was of great assistance to her by his encouragement and prudent advice. In 417 a great misfortune overtook the monasteries at Bethlehem. A crowd of ruffians attacked and pillaged them, destroyed one of them by fire, besides killing and maltreating some of the inmates. The wicked deed was probably instigated by John, the Patriarch of Jerusalem, and the Pelagians against whom St. Jerome had written some sharp polemics. Both St. Jerome and St. Eustochium informed Pope Innocent I by letter of the occurrence, who severely reproved the patriarch for having permitted the outrage. Eustochium died shortly after and was succeeded in the supervision of the nunneries by her niece, the younger Paula. The Church celebrates her feast on 28 September.

MICHAEL OTT

Euthalius

Euthalius

(☒)

A deacon of Alexandria and later Bishop of Sulca. He lived towards the middle of the fifth century and is chiefly known through his work on the New Testament in particular as the author of the "Euthalian Sections". It is well known that the divisions into chapters and verses with which we are familiar were entirely wanting in the original and early copies of the New-Testament writings; there was even no perceptible space between words. To obviate the manifest inconveniences arising from this condition of the text, Ammonius of Alexandria, in the third century, conceived the idea of dividing the Four Gospels into sections varying in size according to the substance of the narrative embodied in them, and Euthalius, following up the same idea, extended a similar system of division to the other books of the New Testament with the exception of the Apocalypse. So obvious were the advantages of the scheme that it was soon adopted throughout the Greek Church. As divisions of the text these sections have no longer any intrinsic value. But as they were at a given period adopted in nearly all the Churches, and noted by the copyists, they are valuable as chronological indications, their presence or absence being an important circumstance in determining the antiquity of a manuscript.

Other labours of Euthalius in connexion with the text of the New Testament refer to the larger sections or lessons to be read in the liturgical services, and to the more minute divisions of the text called ☒, or verses. The custom of reading portions of the

New Testament in the public liturgical services was already ancient in the Church, but with regard to the choice and delimitation of the passages there was little or no uniformity, the Churches having, for the most part, each its own series of selections. Euthalius elaborated a scheme of divisions which was soon universally adopted. Neither the Gospels nor the Apocalypse enter into this series, but the other portions of the New Testament are divided into 57 sections of varying length, 53 of which are assigned to the Sundays of the year, while the remaining four refer probably to Christmas, the Epiphany, Good Friday, and Easter.

The idea of dividing the Scriptures into , or verses, did not originate with Euthalius. It had already been applied to portions of the Old Testament, especially to the poetical parts, and even to some parts of the New. Here, as with regard to the other divisions, Euthalius only carried out systematically and completed a scheme which had been but partially and imperfectly realized by others, and his work marks a stage of that progress which led finally to punctuation of the text. These were of unequal length, either containing a few words forming a complete sense, or as many as could be conveniently uttered with one breath. Thus, for instance, the Epistle to the Romans contained 920 of these verses; Galatians, 293; Hebrews, 703; Philemon, 37, and so on.

Besides these textual labours Euthalius framed a catalogue of the quotations from the Old Testament and from profane authors which are found in the New-Testament writings. He also wrote a short "Life of St. Paul" and a series of "Argumenta" or short summaries which are placed by way of introduction to the different books of the New Testament. Of Euthalius' activities as a bishop little or nothing is known. Even the location of his episcopal see, Sulca, is a matter of doubt. It can hardly be identified with the bishopric of that name in Sardinia. More likely it was situated somewhere in Egypt, and it has been conjectured that it is the same as Psilka, a city of the Thebaid in the neighbourhood of Syene.

After having long lain in oblivion, the works of Euthalius were published in Rome, in 1698, by Lorenzo Alessandro Zaccagni, Prefect of the Vatican Library. They are embodied in the first volume of his "Collectanea Monumentorum Veterum Ecclesiae Græcæ ac Latinæ." They can also be found in Gallanci (Biblioth. Pat., X, 197) and in Migne (P. G., LXXXV, 621).

Euthanasia

Euthanasia

(From Greek *eu*, well, and *thanatos*, death), easy, painless death. This is here considered in so far as it may be artificially brought about by the employment of anaesthetics. When these last are of a character to deprive the sufferer of the use of reason, their effect at this supreme hour of human life is not viewed with approbation by the received teaching of the Catholic Church. The reason for this attitude is that this practice deprives a man of the capacity to act meritoriously at a time when the competency is most necessary and its product invested with finality. It is equally obvious that this space is immeasurably precious to the sinner who has still to reconcile himself with his offended God.

An additional motive assigned for this doctrine is that the administration of drugs of the nature specified is in the premises if not formally at all events equivalently a shortening of the life of the patient. Hence as long as the stricken person has as yet made no adequate preparation for death, it is always grievously unlawful to induce a condition of insensibility. The most that may be granted to those charged with responsibility in the case is to take up a passively permissive demeanour whenever it is certain that the departing soul has abundantly made ready for the great summons. This is especially true if there is ground for apprehending, from the dying person's continued possession of his faculties, a relapse into sin. In no contingency, however, can any positive endorsement be given to means whose scope is to have one die in a state of unconsciousness. What has been said applies with equal force and for the same reasons to the case of those who have to suffer capital punishment by process of law.

JOSEPH F. DELANY

St. Euthymius

St. Euthymius

(Styled THE GREAT).

Abbot in Palestine; b. in Melitene in Lesser Armenia, A.D. 377; d. A.D. 473. He was educated by Bishop Otreius of Melitene, who afterwards ordained him priest and placed him in charge of all the monasteries in the Diocese of Melitene. At the age of

twenty-nine he secretly set out on a pilgrimage to Jerusalem and remained for some time with a settlement of monks at a laura called Pharan, about six miles east of Jerusalem. In 411 he withdrew, with St. Theoctistus, a fellow-hermit, into the wilderness, and lived for a while in a rough cavern on the banks of a torrent. When many disciples gathered around them they turned the cavern into a church and built a monastery which was placed in charge of St. Theoctistus.

A miraculous cure which Euthymius was believed to have effected for Terebon, the son of the Saracen chief Aspebetus, spread the fame of the holy hermit far beyond the confines of Palestine. Aspebetus was afterwards ordained priest and became bishop over his tribe, in which capacity he attended the Council of Ephesus in 431.

When the report of this miracle had made the name of Euthymius famous throughout Palestine, and large crowds came to visit him in his solitude, he retreated with his disciple Domitian to the wilderness of Ruba, near the Dead Sea. Here he lived for some time on a remote mountain called Marda whence he afterwards withdrew to the desert of Zipho (the ancient Engaddi). When large crowds followed him to this place also, he returned to the neighbourhood of the monastery of Theoctistus, where he took up his abode in a cavern. Every Sunday he came to the monastery to take part in the Divine services. At length, because numerous disciples desired him as their spiritual guide, he founded, in 420, on the right side of the road from Jerusalem to Jericho, a laura similar to that of Pharan. The church connected with this laura was dedicated in 428 by Juvenal, the first Patriarch of Jerusalem. When the Council of Chalcedon (451) condemned the errors of Eutyches, it was greatly due to the authority of Euthymius that most of the Eastern recluses accepted its decrees. The empress Eudoxia was converted to Catholic unity through his efforts. The Church celebrates his feast on 20 January, the day of his death.

BUTLER, *Lives of the Saints*, 20 January; BARING-GOULD, *Lives of the Saints*, 20 January; SINCLAIR in *Dict. Christ. Biogr.* s. v.; *Acta SS.*, January, II, 662-92. A very reliable life was written by Cyril of Scythopolis about forty years after the death of Euthymius. It is published in *Acta SS*, loc. cit., also by COTELIER, *Eccl. Graec. Monum.* (Paris, 1692), IV, MONTFAUCON, *Analecta Graeca* (Paris, 1688), I, and in P.G., CXIV, 595-734.

MICHAEL OTT

Eutropius of Valencia

Eutropius of Valencia

A Spanish bishop; d. about 610. He was originally a monk in the *Monasterium Servitanum*, generally believed to have been situated in the province of Valencia, Spain.

It was founded some time in the sixth century by the monk Donatus who had been driven from Roman Africa during one of the Vandal persecutions. The rule he introduced must have been based on that in use among the African monks, which has caused the members of this community to be connected with the Augustinians, without, however, sufficient warrant. The *Monasterium Servitanum* is known only through the references of Sts. Isidore and Ildephonsus to its founder and one of his disciples, Eutropius, who succeeded as abbot.

Eutropius is known as the author of three letters, one to Licinianus, Bishop of Carthage, and two to Peter, Bishop of Iturbica. In the first, which has been lost, he inquires the reason for anointing baptized children with holy chrism. This letter is known through St. Isidore. The same saint mentions a letter to Bishop Peter, the text of which has been preserved, which he says every monk should read. The title is "De destructione monachorum et ruina monasteriorum". In response to a suggestion of some candidates for his monastery, he points out that the number of monks is a small matter compared with their earnestness. He may be criticized for his severity in enforcing the rule and in reprimanding the guilty, but he can easily justify himself, as his whole care consists in applying the rules the founders of the monastery laid down. And thus the reproaches made against him fall back on their authors. In any case he will not swerve from his course; he is indifferent to the criticisms of men. He cannot allow the faults of the monks to go unchecked. The Scriptures and the Fathers agree that correction is one of the first duties of him who is charged with the guidance of others, and negligence on this head would only lead to serious irregularities. The second letter to Bishop Peter touches on the seven deadly sins. Like Cassian, Eutropius enumerates eight: gluttony, lust, covetousness, anger, sadness, faint-heartedness, vanity, and pride. He analyzes them, traces the links that unite them, and emphasizes their results. A Christian should resist these enemies with all his strength, persuaded that of himself he cannot be victorious, but that he needs the help of God. As Eutropius develops his thought the teaching of Cassian becomes more and more evident. Eutropius was still at the monastery when he wrote these letters. It was not till 589 that he became Bishop of Valencia, and his death cannot be set down earlier than 610. These are the dates found in Florez. Nothing is known of his work during his episcopacy. Historians have usually called him saint, but it does not appear that he was ever honoured by a liturgical cult. His letters are to be found in Migne, "P.L.", LXXX, 9-20.

J.M. BESSE

Eutyches

Eutyches

An heresiarch of the fifth century, who has given his name to an opinion to which his teaching and influence contributed little or nothing. The essence of that view is the assertion that Christ has but one nature after the Incarnation, and is spoken of indifferently as the Eutychian or the Monophysite heresy, though Eutyches was not its originator, and though he was repudiated and condemned by many of the Monophysites, who all looked upon St. Cyril of Alexandria as their great Doctor. Eutyches in 448 was seventy years of age, and had been for thirty years archimandrite of a monastery outside the walls of Constantinople, where he ruled over three hundred monks. He was not a learned man, but was much respected and had influence through the infamous minister of Theodosius II, the eunuch Chrysaphius, to whom he had stood godfather. He was a vehement opponent of Nestorianism, and of the Antiochian party led by Theodoret of Cyrus (Cyrrhus) and John of Antioch. These bishops had, for a time, championed the orthodoxy of Nestorius, but had eventually accepted the Council of Ephesus of 431, making peace with St. Cyril of Alexandria in 434. Mutual explanations had been exchanged between the great theologians Theodoret and Cyril, but their partisans had not been convinced. On the death of Cyril, in 444, his successor Dioscurus was not slow to renew hostilities, and the Cyrillians and anti-Nestorians everywhere took the offensive. It was but as a part of this great movement that Eutyches, at Constantinople, began to denounce a supposed revival of Nestorianism. He wrote to Pope Leo on the subject, and received a sympathetic reply. The Patriarch of Antioch, Domnus, was on his guard, and he addressed a synodal letter to the Emperor Theodosius II, accusing Eutychius of renewing the heresy of Apollinarius (this had been the charge of the Antiochian party against St. Cyril) and of wishing to anathematize the great Antiochian teachers of a past generation, Diodorus and Theodore—a point in which Eutyches was not altogether in the wrong (Facundus, viii, 5, and xiii, 5). This was probably in 448, as St. Flavian, Bishop of Constantinople, had heard of no such accusation when he held a synod, on Nov. 8th, with regard to a point of discipline connected with the province of Sardis. Eutyches had been accusing various personages of covert Nestorianism, and at the end of the session of this synod one of those inculpated, Eusebius, Bishop of Dorylaeum, brought the question forward, and proffered a counter charge of heresy against the archimandrite.

Eusebius had been -- many years before, while yet a layman -- one of the first to detect, and denounce, the errors in the sermons of Nestorius, and he was naturally indignant at being called a Nestorian. Flavian expressed great surprise at this sudden

and unexpected charge, and suggested a private conference with Eutyches. Eusebius refused, for he had had frequent interviews without result. At the second session the orthodox view was defined, at Eusebius's request, by the reading of the second letter of St. Cyril to Nestorius, and its approbation by the council of Ephesus, and also of the letter of Cyril to John of Antioch, "Laetentur caeli", written after the agreement between the two patriarchs, in 434. These documents were acclaimed by all. Flavian summed up to the effect that Christ was "of two natures", *ek duo physeon*, after the incarnation; Basil of Seleucia and Seleucus of Amasea even spoke explicitly of His being "in two natures", and all the bishops echoed, in their own words, the sentiments of the president. In the third session the messengers, who had been sent to summon Eutyches to attend, returned, bringing his absolute refusal. He had determined, he declared, that he would never set foot outside his monastery, which he regarded as his tomb. He was ready to subscribe to the councils of Nicaea and Ephesus; though in doing so he ought not to be understood to subscribe to, or to condemn, any errors into which they might have fallen; he searched the Scriptures alone, as being more sure than the expositions of the Fathers, and he adored one nature of God, incarnate and made man after the Incarnation. He complained that he had been accused of saying that God the Word had brought His flesh down from heaven. This was untrue. He acknowledged our Lord Jesus Christ as "of" two natures (*ek duo physeon*) hypostatically united, as perfect God, and perfect Man born of the Virgin Mary, not having flesh consubstantial with ours. These statements of Eutyches were substantiated by three witnesses. The council therefore addressed a letter to him, summoning him to appear, for his excuse was insufficient in face of so serious a charge. Eusebius of Dorylaeum, whose ardour was by no means quenched, then pointed out that Eutyches had been sending round a writing to the different monasteries to stir them up, and that danger to the council might result. Two priests were therefore sent round to the different monasteries in the city, two to those across the Golden Horn, and two across the Bosphorus to Chalcedon, to make enquiries.

Meanwhile the envoys sent to Eutyches had returned. After some difficulties and the plea of illness, Eutyches had consented to receive them. He still refused to leave his monastery, and begged them not to trouble to call a third time (as the canons directed), but to treat him as contumacious at once, if they pleased. The council, however, sent him a third and final summons, to appear on the morning of the next day but one, 17th Nov. or take the consequences. The next day a Priest-Archimandrite Abraham and three deacon monks appeared on behalf of Eutyches. Abraham declared that Eutyches had passed the night in groaning, and that he himself had consequently not slept at all either. St. Flavian replied that the Synod would wait for Eutyches's recovery. He was not asked to come to enemies, but to brothers and fathers. He had formerly

entered the city where Nestorius attacked the truth. Let him do the same once more. Repentance will be no disgrace to him. As the assembly rose, Flavian added: "You know the accuser's zeal, and that fire itself seems cold to him, on account of his zeal for piety. And God knows, I have both advised and entreated him to desist. But when he set to work, what was I to do? I desire not your dispersion, God forbid, but rather to gather you in. It is for enemies to disperse, for fathers to gather into one."

On the following day Eutyches did not appear, but promised to come in five days, that is on the following Monday. It was proved that Eutyches had sent round a tome to other monasteries for signature. It was said to contain the Faith of Nicaea and Ephesus, nor was it shown to have contained anything further. On the Saturday, Eusebius elicited testimony to further heretical remarks of Eutyches, which the envoys had heard him make. In particular he had denied two natures in Christ after the incarnation, and had said he was ready to be condemned; the monastery should be his tomb. On Monday 22nd Nov., Eutyches was sought vainly in the Church and the Archbishop's palace, but was eventually announced as arriving with a great multitude of soldiers, and monks, and attendants of the Prefect of the Praetorian guard, and this escort only permitted him to enter under the synod's promise that his person should be restored to them. With the cortege came a Silentiary named Magnus, bringing a letter from the Emperor, who desired that the Patrician Florentius should be admitted to the Council; the Silentiary was therefore sent to invite his presence. Eusebius showed more than ever his anxiety that Eutyches should be convicted on the grounds of his former sayings, lest he should now unsay them, and be simply acquitted; for in that case his accuser might be made liable to the penalties due to calumnious accusation: "I am a poor man", he said, "without means. He threatens me with exile; he is rich; he has already depicted the Oasis as my destination!" Flavian and the Patrician replied that any submission made by Eutyches now should not release him from answering the charges as to his past words. Flavian then said: "You have heard, priest Eutyches, what your accuser says. Say now whether you admit the union of two natures, *ek duo physeon enosin*." Eutyches replied: "Yes, *ek duo physeon*." Eusebius interrupted: "Do you acknowledge two natures, Lord Archimandrite, after the Incarnation, and do you say that Christ is consubstantial with us according to the flesh; yes or no?" This expressed clearly the whole question between Catholic truth and the heresy of Monophysitism. Eutyches would not give a direct answer. Perhaps he was puzzled and cautious. At all events he saw that a negative reply would mean immediate condemnation, while an affirmative one would contradict his own former utterances. "I did not come here to dispute," he said, "but to make clear my view to your Holiness. It is in this paper. Order it to be read." As he would not read it himself, Flavian ordered him to declare his belief. His vague reply evaded the point, merely asserting that he believed "in the Son's incarnate

advent of the flesh of the holy Virgin and that He was perfectly made Man for our salvation." When urged, Eutyches declared that he had never up till now said that Christ was consubstantial with us, but he acknowledged the holy Virgin to be consubstantial with us. Basil of Seleucia urged that her Son must therefore also be consubstantial with us, since Christ was incarnate from her. Eutyches answered: "Since you say so, I agree with all"; and he further explained that the body of Christ is the body of God, not of a man, though it is a human body. Provided he was not understood to deny that Christ is the Son of God, he would say "consubstantial with us", as the Archbishop wished it and permitted it. Flavian denied that the expression was novel.

Florentius showed that the Emperor had judged rightly that he was a good theologian, for he now pushed the Archimandrite on the essential point, the two natures. Eutyches answered explicitly: "I confess that our Lord was of [*ek*] two natures, before the union; but after the union, I acknowledge one nature." It is very odd that no comment was made on this utterance. The synod ordered Eutyches to anathematize all that was contrary to the letters of Cyril, which had been read. He refused. He was ready enough to accept the letters, according to the synod's wish, but he would not anathematize all who did not use these expressions; otherwise he would be anathematizing the holy Fathers. Nor would he admit that Cyril or Athanasius had taught two natures after the Incarnation (and this was indeed correct, so far as mere words go). But Basil of Seleucia rightly urged: "If you do not say two natures after the union, you say there is mixture and confusion" (though, at the Robber Council, the unfortunate bishop was fain to deny his words). Florentius then declared, that he is not orthodox who does not confess *ek duo physeon*. The synod agreed, and considered the forced submission which Eutyches offered to be insincere. Flavian then announced the sentence of degradation, excommunication, and deposition. This was signed by about 30 bishops, including Julian of Cos, the pope's chargé d'affaires at the Court of Theodosius. The acts of this synod are preserved for us, because they were read in full at the Robber Council of Ephesus, in the following year 449, and again, in 451, at the Council of Chalcedon as a part of the Acts of the Robber Council. Flavian took care that the acts should also be signed by many archimandrites of the city. Eutyches, on his side, wrote for support to the chief bishops of the world, and placarded Constantinople with complaints. He sent an appeal to the pope (St. Leo, Ep. xxi) explaining that he had refused to affirm two natures and to anathematize all who did not do so; else he would have condemned the holy Fathers, Popes Julius and Felix, Saints Athanasius and Gregory (he is referring to the extracts from the Fathers which were read in the first session of the Council of Ephesus; later in 535 it was declared that these papal documents were Apollinarian forgeries, and such is still the opinion of critics. See Harnack, Bardenhewer, etc.). Eutyches continues: "I requested that this might be made known

to your holiness, and that you might judge as you should think fit, declaring that in every way I should follow that which you approve." It was untrue that Eutyches at the council had appealed to the pope. He could only prove that in a low voice he had said he referred his case to the great patriarchs. When St. Leo had received the Acts of the Council, he concluded that Eutyches was a foolish old man who had erred through ignorance, and might be restored if he repented. Dioscurus of Alexandria, imitating his predecessors in assuming a primacy over Constantinople, simply annulled the sentence of Flavian, and absolved Eutyches.

The archimandrite had not been touched by the consideration Flavian had shown. His obstinacy continued. He obtained, through Chrysaphius, a new synod of 32 bishops, which met in April 449 (without the presence of Flavian, but including the Patrician Florentius and several of the bishops who had taken part in the condemnation), in order to examine his complaint that the Acts had been falsified. After a careful revision of them, some slight alterations were made to please Eutyches; but the result was of no practical importance. Dioscurus and Eutyches had obtained the convocation by the Emperor of an ecumenical council to meet at Ephesus on 1st August, 449. The proceedings of the party of Dioscurus before and at that council will be found under DIOSCURUS, and ROBBER COUNCIL OF EPHESUS; it is only necessary to say here that in the first session Eutyches was exculpated, and absolved, while violence was done to Flavian and Eusebius, who were imprisoned. The former soon died of his sufferings. Both had appealed to Rome. The Pope annulled the council, but Theodosius II supported it. On that Emperor's sudden death the outlook changed. a new council met at Chalcedon in October, 451, at the wish of the Emperor Marcian and his consort St. Pulcheria, the course of which was directed by imperial commissioners, in accordance with the directions of St. Leo, whose legates presided. Dioscurus was deposed, and exiled to Paphlagonia. Eutyches was also exiled. A letter of St. Leo (Ep. 134), written 15th April, 454, complains that Eutyches is still spreading his poison in banishment, and begs Marcian to transfer him to some more distant and lonely spot. The old man does not seem to have long survived. His monastery, at Constantinople, was put under the supervision of Julian of Cos as visitor, that prelate being still the papal representative at Constantinople.

JOHN CHAPMAN

Eutychianism

Eutychianism

Eutychianism and Monophysitism are usually identified as a single heresy. But as some Monophysites condemned Eutyches, the name *Eutychians* is given by some

writers only to those in Armenia. It seems best to use the words indifferently, as no party of the sect looked to Eutychius as a founder or a leader and Eutychian is but a nickname for all those who, like Eutyches, rejected the orthodox expression "two natures" of Christ. The tenet "one nature" was common to all Monophysites and Eutychians, and they affected to call Catholics Diphysites or Dyophysites. The error took its rise in a reaction against Nestorianism, which taught that in Christ there is a human hypostasis or person as well as a Divine. This was interpreted to imply a want of reality in the union of the Word with the assumed Humanity, and even to result in two Christs, two Sons, though this was far from the intention of Nestorius himself in giving his incorrect explanation of the union. He was ready to admit one *prósopon*, but not one hypostasis, a "prosopic" union, though not a "hypostatic" union, which is the Catholic expression. He so far exaggerated the distinction of the Humanity from the Divine Person Who assumed it, that he denied that the Blessed Virgin could be called Mother of God, *Theotókos*. His views were for a time interpreted in a benign sense by Theodoret, and also by John, Bishop of Antioch, but they all eventually concurred in his condemnation, when he showed his heretical spirit by refusing all submission and explanation. His great antagonist, St. Cyril of Alexandria, was at first vehemently attacked by Theodoret, John, and their party, as denying the completeness of the Sacred Humanity after the manner of the heretic Apollinarius.

The fiery Cyril curbed his natural impetuosity; mutual explanations followed; and in 434, three years after the Council of Ephesus which had condemned Nestorius, peace was made between Alexandria and Antioch. Cyril proclaimed it in a letter to John beginning *Lætentur cæli*, in which he clearly condemned beforehand the Monothelite, if not the Monophysite, views, which were to be unfortunately based on certain ambiguities in his earlier expressions. If he did not arrive quite at the exactness of the language in which St. Leo was soon to formulate the doctrine of the Church, yet the following words, drawn up by the Antiochian party and fully accepted by Cyril in his letter, are clear enough:

Before the worlds begotten of the Father according to the Godhead, but in the last days and for our salvation of the Virgin Mary according to the Manhood; consubstantial with the Father in the Godhead, consubstantial with us in the Manhood; for a union of two natures took place, wherefore we confess one Christ, one Son, one Lord. According to the understanding of this unconfused union, we confess the Blessed Virgin to be Theotokos, because the Word of God was incarnate and made man, and through her conception united to Himself the temple He received from her. And we are aware that the words of the Gospels, and of the Apostles, concerning the Lord are, by theologians, looked upon some as applying in common [to the two natures] as belonging to the one Person; others as attributed to one of the two natures; and that they tell us by tradition that some are of divine import, to suit the Divinity of Christ, others of humble nature belonging to His humanity.

In this "creed of the union" between John and Cyril, it is at least implied that the two natures remain after the union (against Monophysitism), and it is quite clearly enunciated that some expressions belong to the Person, others to each of the Natures, as, e. g. it was later defined that activities (*'énérgeiai*) and will are of the Natures (against Monothelites), while Sonship (against the Adoptionists), is of the Person. There is no doubt that Cyril would have understood rightly and have accepted (even apart from papal authority) the famous words of St. Leo's tome: "Agit enim ultraque forma cum alterius communione quod proprium est" (Ep. xxviii, 4). The famous formula of St. Cyril *mía phúsis toû Theoû Lógou sesapkoméne*, "one nature incarnate of God the Word" (or "of the Word of God"), derived from a treatise which Cyril believed to be by St. Athanasius, the greatest of his predecessors, was intended by him in a right sense, and has been formally adopted by the Church. In the eighth canon of the Fifth General Council, those are anathematized who say "one Nature incarnate of God the Word", unless they "accept it as the Fathers taught, that by a hypostatic union of the Divine nature and the human, one Christ was effected". In the Lateran Council of 649, we find: "Si quis secundum sanctos Patres non confitetur proprie et secundum veritatem unam naturam Dei verbi incarnatum ... anathema sit." Nevertheless this formula, frequently used by Cyril (in Epp. i, ii, Ad Successum; Contra Nest. ii; Ad eulogium, etc.; see Petavius "De Incarn.", IV, 6), was the starting point of the Monophysites, some of whom understood it rightly, whereas others pushed it into a denial of the reality of the human nature, while all equally used it as a proof that the formula "two natures" must be rejected as heretical, and therefore also the letter of St. Leo and the decree of Chalcedon.

The word *phúsis* was ambiguous. Just as the earlier writings of Theodoret against Cyril contained passages which naturally permitted a Nestorian interpretation—they were in this sense condemned by the Fifth General Council—so the earlier writings of Cyril against Nestorius gave colour to the charge of Apollinarianism brought against him by Theodoret, John, Ibas, and their party. The word *phúsis* produced just the same difficulties that the word *‘upóstasis* had aroused in the preceding century. For *‘upóstasis*, as St. Jerome rightly declared, was the equivalent of *ousís* in the mouths of all philosophers, yet it was eventually used theologically, from Didymus onwards, as the equivalent of the Latin *persona*, that is, a subsistent essence. Similarly *phúsis* was an especially Alexandrian word for *ousía* and *‘upóstasis*, and was naturally used of a subsistent *ousía*, not of abstract *ousía*, both by Cyril often (as in the formula in question), and by the more moderate Monophysites. The Cyrillian formula, in its genesis and in its rationale, has been explained by Newman in an essay of astounding learning and perfect clearness (Tracts Theol. and Eccl., iv, 1874). He points out that the word *‘upóstasis* could be used (by St. Athanasius, for example), without change of meaning, both of the one Godhead, and of the three Persons. In the former case it did not mean the Divine Essence in the abstract, but considered as subsistent, without defining whether that subsistence is threefold or single, just as we say "one God" in the concrete, without denying a triple Personality. Just the same twofold use without change of meaning might be made of the words *ousía*, *éidos*, and *phúsis*. Again, *phúsis* was not applied, as a rule, in the fourth century, to the Humanity of Christ, because that Humanity is not "natural" in the sense of "wholly like to our nature", since it is sinless, and free from all the imperfections which arise from original sin (not *para natura* but *integra natura*), it has no human personality of its own, and it is ineffably graced and glorified by its union with the Word. From this point of view it is clear that Christ is not so fully "consubstantial with us" as He is "consubstantial with the Father". Yet again, in these two phrases the word *consubstantial* appears in different senses; for the Father and the Son have one substance *numero*, whereas the Incarnate Son is of one substance with us *specie* (not *numero*, of course). It is therefore not to be wondered at, if the expression "consubstantial with us" was avoided in the fourth century. In like manner the word *phúsis* has its full meaning when applied to the Divine Nature of Christ, but a restricted meaning (as has been just explained) when applied to His Human Nature.

In St. Cyril's use of the formula its signification is plain. "It means", says Newman (loc. cit., p. 316), "(a), that when the Divine word became man, He remained one and the same in essence, attributes and personality; in all respects the same as before, and therefore *mía phúsis*. It means (b), that the manhood, on the contrary, which He assumed, was not in all respects the same nature as that *massa*, *usia*, *physis*, etc., out of

which it was taken; (1) from the very circumstance that it was only an addition or supplement to what He was already, not a being complete in itself; (2) because in the act of assuming it, He changed it in its qualities. This added nature, then, was best expressed, not by a second substantive, as if collateral in its position, but by an adjective or participle, as *sesarkoméne*. The three words answered to St. John's '*o logos sárks 'egéneto*, i. e. *sesarkoménos ên*." Thus St. Cyril intended to safeguard the teaching of the Council of Antioch (against Paul of Samosata, 264-72) that the Word is unchanged by the Incarnation, "that He is '*ên kai tò a'utò tê o'usia* from first to last, on earth and in heaven" (p. 317). He intended by his one nature of God, "with the council of Antioch, a protest against that unalterableness and imperfection, which the anti-Catholic schools affixed to their notion of the Word. The council says 'one and the same in *usia*'; it is not speaking of a human *usia* in Christ, but of the divine. The case is the same in Cyril's Formula; he speaks of a *mía theía phúsis* in the Word. He has in like manner written a treatise entitled 'quod unus sit Christus'; and, in one of his Paschal Epistles, he enlarges on the text 'Jesus Christ, yesterday, and to-day, the same, and for ever.' His great theme in these words is not the coalescing of the two natures into one, but the error of making two sons, one before and one upon the Incarnation, one divine, one human, or again of degrading the divine *usia* by making it subject to the humanity" (pp. 321-2). It has been necessary thus to explain at length St. Cyril's meaning in order to be able to enumerate the more briefly and clearly, the various phases of the Eutychian doctrine.

1. The Cyrillian party before Chalcedon did not put forward any doctrine of their own; they only denounced as Nestorians any who taught *dúo phúseis*, two natures, which they made equal to two hypostases, and two Sons. They usually admitted that Christ was '*ek dúo phúseon* "of two natures", but this meant that the Humanity before (that is, logically before) it was assumed was a complete *phúsis*; it was no longer a *phúsis* (subsistent) after its union to the Divine nature. It was natural that those of them who were consistent should reject the teaching of St. Leo, that there were two natures: "Tenet enim sine defectu proprietatem suam utraque natura", "Assumpsit formam servi sine sorde peccati, humana augens, divina non minuens", and if they chose to understand "nature" to mean a subsistent nature, they were even bound to reject such language as Nestorian. Their fault in itself was not necessarily that they were Monophysites at heart, but that they would not stop to listen to the six hundred bishops of Chalcedon, to the pope, and to the entire Western Church. Those who were ready to hear explanations and to realize that words may have more than one meaning (following the admirable example set by St. Cyril himself), were able to remain in the unity of the Church. The rest were rebels, and whether orthodox in belief or not, well deserved to find themselves in the same ranks as the real heretics.

(2) Eutyches himself was not a Cyrillian. He was not a Eutychian in the ordinary sense of that word. His mind was not clear enough to be definitely Monophysite, and St. Leo was apparently right in thinking him ignorant. He was with the Cyrillians in denouncing as Nestorians all who spoke of two natures. But he had never adopted the "consubstantial with us" of the "creed of union", nor St. Cyril's admissions, in accepting that creed, as to the two natures. He was willing to accept St. Cyril's letters and the decisions of Ephesus and Nicæa only in a general way, in so far as they contained no error. His disciple, the monk Constantine, at the revision, in April, 449, of the condemnation of Eutyches, explained that he did not accept the Fathers as a canon of faith. In fact Eutyches simply upheld the ultra-Protestant view that nothing can be imposed as of faith which is not verbally to be found in Scripture. This, together with an exaggerated horror of Nestorianism, appears to describe his whole theological position.

3. Dioscorus and the party which followed him seem to have been pure Cyrillians, who by an excessive dislike of Nestorianism, fell into excess in minimizing the completeness of the Humanity, and exaggerating the effects upon it of the union. We have not documents enough to tell us how far their error went. A fragment of Dioscorus is preserved in the "Antirrhetica" of Nicephorus (Spicil. Solesm., IV, 380) which asks: "If the Blood of Christ is not by nature (*katà phúsin*) God's and not a man's, how does it differ from the blood of goats and bulls and the ashes of a heifer? For this is earthly and corruptible, and the blood of man according to nature is earthly and corruptible. But God forbid that we should say the Blood of Christ is consubstantial with one of those things which are according to nature (*'enos tôn katà phúsin 'omoousion*)." If this is really, as it purports to be, from a letter written by Dioscorus from his exile at Gangra, we shall have to class him with the extreme Monophysite "Incorrupticolæ", in that he rejects the "consubstantial with us" and makes the Blood of Christ incorruptible of its own nature. But the passage may conceivably be a Julianist forgery.

4. Timothy Ælurus, the first Monophysite Patriarch of Alexandria, was on the contrary nearly orthodox in his views, as has been clearly shown by the extracts published by Lebon from his works, extant in Syriac in a MS. in the British Museum (Addit. 12156). He denies that *phúsis*, nature, can be taken in an abstract sense. Hence he makes extracts from St. Leo, and mocks the pope as a pure Nestorian. He does not even accept *'ek dúo phúseon*, and declares there can be no question of two natures, either before or after the Incarnation. "There is no nature which is not a hypostasis, nor hypostasis which is not a person." So far we have, not heresy, but only a term defined contrary to the Chalcedonian and Western usage. A second point is the way Ælurus understands *phúsis* to mean that which is "by nature". Christ, he says, is by nature God, not man; He became man only by "*oikonomía*" (economy or Incarnation); consequently His Humanity is not His *phúsis*. Taken thus, the formula *mía phúsis* was

intended by Ælurus in an orthodox sense. Thirdly, the actions of Christ are attributed to His Divine Person, to the one Christ. Here Ælurus seems to be unorthodox. For the essence of Monothelism is the refusal to apportion the actions (*'enérgēiai*) between the two natures, but to insist that they are all the actions of the one Personality. How far Ælurus was in reality a Monothelite cannot be judged until his works are before us in full. He is, at all events in the main, a schismatic, full of hatred and contempt for the Catholic Church outside Egypt, for the 600 bishops of Chalcedon, for the 1600 of the Encyclia, for Rome and the whole West. But he consistently anathematized Eutyches for his denial that Christ is consubstantial with us.

5. In the next generation Severus, Bishop of Antioch (511-39), was the great Monophysite leader. In his earlier days, he rejected the Henoticon of Zeno, but when a patriarch he accepted it. His contemporaries accused him of contradicting himself in the attempt, it seems, to be comprehensive. He did not, however, conciliate the In-corruplicolæ, but maintained the corruptibility of the Body of Christ. He seems to have admitted the expression *'ek dúo phúseon*. Chalcedon and Pope Leo he treated as Nestorian, as Ælurus did, on the ground that two natures mean two persons. He did not allow the Humanity to be a distinct monad; but this is no more than the view of many modern Catholic theologians that it has no *esse* of its own. (So St. Thomas, III, Q. xvii, a. 2; see Janssens, *De Deo homine*, pars prior, p. 607, Freiburg, 1901.) It need not be understood that by thus making a composite hypostasis Severus renounced the Cyrillian doctrine of the unchanged nature of the Word after the unconfused union. Where he is most certainly heretical is in his conception of one nature not Divine (so Cyril and Ælurus) but theandric, and thus a composition, though not a mixture—*phúsis theandriké*. To this one nature are attributed all the activities of Christ, and they are called "theandric" (*'enérgēiai theandrikaí*), instead of being separated into Divine activities and human activities as by the Catholic doctrine. The undivided Word, he said, must have an undivided activity. Thus even if Severus could be defended from the charge of strict Monophysitism, in that he affirmed the full reality of the Human Nature of Christ, though he refused to it the name of nature, yet at least he appears as a dogmatic Monothelite. This is the more clear, in that on the crucial question of one of two wills, he pronounces for one theandric will. On the other hand utterances of Severus which make Christ's sufferings voluntarily permitted, rather than naturally necessitated by the treatment inflicted on His Body, might perhaps be defended by the consideration that from the union and consequent Beatific Vision in the Soul of Christ, would congruously ensue a beatification of the Soul and a spiritualizing of the Body, as was actually the case after the Resurrection; from this point of view it is true that the possibility of the Humanity is voluntary (that is, decreed by the Divine will) and not due to it in the state which is connatural to it after the union; although the

Human Nature is of its own nature passible apart from the union (St. Thomas, III, Q. xiv, a. 1, ad 2). It is important to recollect that the same distinction has to be made in considering whether the Body of Christ is to be called corruptible or incorruptible, and consequently whether Catholic doctrine on this point is in favour of Severus or of his adversary Julian. The words of St. Thomas may be borne in mind: "Corruptio et mors non competit Christo ratione suppositi, secundum quod attenditur unitas, sed ratione naturæ, secundam quam invenitur differentia mortis et vitæ" (III, Q. 1, a. 5, ad 2). As the Monophysites discussed the question *ratione suppositi* (since they took nature to mean hypostasis, and to imply a *suppositum*) they were bound to consider the Body of Christ incorruptible. We must therefore consider the Julianists more consistent than the Severians.

6. Julian, Bishop of Halicarnassus, was the leader of those who held the incorruptibility, as Severus was of those who held the corruptibility. The question arose in Alexandria, and created great excitement, when the two bishops had taken refuge in that city, soon after the accession of the orthodox Emperor Justin, in 518. The Julianists called the Severians *phthartolâtrai* or Corrupticolæ, and the latter retorted by entitling the Julians 'Aphthartodokêtai and Phantasiasts, as renewing the Docetic heresies of the second century. In 537, the two parties elected rival patriarchs of Alexandria, Theodosius and Gaianas, after whom the Corrupticolæ were known as Theodosians, and the Incorrupticolæ as Gaianites. Julian considered, with some show of reason, that the doctrine of Severus necessitated the admission of two natures, and he was unjustly accused of Docetism and Manichæanism, for he taught the reality of the Humanity of Christ, and made it incorruptible not *formaliter* quâ human, but as united to the Word. His followers, however, split upon this question. One party admitted a potential corruptibility. Another party taught an absolute incorruptibility *katà pánta trópon*, as flowing from the union itself. A third sect declared that by the union the Humanity obtained the prerogative of being uncreate; they were called Actistetæ, and replied by denominating their opponents "Ctistolaters", or worshippers of a creature. Heresies, after the analogy of low forms of physical life, tend to propagate by division. So Monophysitism showed its nature, once it was separated from the Catholic body. The Emperor Justinian, in 565, adopted the incorruptibilist view, and made it a law for all bishops. The troubles that arose in consequence, both in East and West, were calmed by his death in November of that year.

7. The famous Philoxenus or Xenaias (d. soon after 518), Bishop of Mabug (Mabbogh, Mambuce, or Hierapolis in Syria Euphratensis), is best known to-day by his Syriac version of the N. T., which was revised by Thomas of Harkel, and is known as the Harkleian or Philoxonian text. It is unfair of Hefele (Councils, tr. III, 459-60) to treat him as almost a Docetist. From what can be learned of his doctrines they were

very like those of Severus and of Ælurus. He was a Monophysite in words and a Monothelite in reality, for he taught that Christ had one will, an error which it was almost impossible for any Monophysite to avoid. But this *mía phúsis súnthetos* was no doubt meant by him as equivalent to the *hypostasis composita* taught by St. Thomas. As Philoxenus taught that Christ's sufferings were by choice, he must be placed on the side of the Julianists. He was careful to deny all confusion in the union, and all transformation of the Word.

8. Peter Fullo, Patriarch of Antioch (471-88), is chiefly famed in the realm of dogma for his addition to the Trisagion or Tersanctus, "Agios o Theos, Agios Ischyros, Agios Athanatos", of the words "who wast crucified for us". This is plain Patripassianism, so far as words go. It was employed by Peter as a test, and he excommunicated all who refused it. There is no possibility of explaining away this assertion of the suffering of the Divine Nature by the *communicatio idiomatum*, for it is not merely the Divine Nature (in the sense of hypostasis) of the Son which is said to have been crucified, but the words are attached to a three-fold invocation of the Trinity. Peter may therefore be considered as a full-blooded Monophysite, who carried the heresy to its extreme, so that it involved error as to the Trinity (Sabellianism) as well as with regard to the Incarnation. He did not admit the addition of the words "Christ our King" which his orthodox rival Calandio added to his formula. Some Scythian monks of Constantinople, led by John Maxentius, before the reconciliation with the West in 519, upheld the formula "one of the Trinity was crucified" as a test to exclude the heresy of Peter Fullo on the one hand and Nestorianism on the other. They were orthodox adherents of the Council of Chalcedon. Pope Hormisdas thought very badly of the monks, and would do nothing in approval of their formula. But it was approved by John II, in 534, and imposed under anathema by the Second Council of Constantinople in 553, which closed the so-called "Theopaschite" controversy.

9. We have further to catalogue a number of subdivisions of Monophysitism which pullulated in the sixth century. The Agnoetæ were Corrupticolæ, who denied completeness of knowledge to the Human Nature of Christ; they were sometimes called Themistians, from Themistus Calonymus, an Alexandrian deacon, their chief writer. They were excommunicated by the Patriarchs of Alexandria, Timotheus (d. 527) and Theodosius. Their views resemble the "Kenotic" theories of our own day. The Tritheists, or Tritheites, or Condobaudites, were founded by a Constantinopolitan philosopher, John Asconagus, or Ascunaghes, at the beginning of the sixth century, but their principal teacher was John Philopomus, an Alexandrian philosopher, who died probably towards the end of that century. These heretics taught that there were three natures in the Holy Trinity, the three Persons being individuals of a species. A zealot of the sect was a monk Athanasius, grandson of the Empress Theodora, wife of Justinian.

He followed the view of Theodosius, that the bodies to be given in the resurrection are new creations. Stephen Gobaras was another writer of this sect. Their followers were called Athanasians or Philoponiaci. Athanasius was opposed by Conon, Bishop of Tarsus (c. 600), who eventually anathematized his teacher Philoponus. The Cononites are said to have urged that, though the matter of the body is corruptible, its form is not. The Tritheites were excommunicated by the Jacobite Patriarch of Alexandria, Damian (577), who found the unity of God in a *ὑparksis* distinct from the three Persons, which he called *autótheos*. His disciples were taunted with believing in four Gods, and were nicknamed Tetradites, or Tetratheites, and also Damianists and Angelites. Peter Callinicus, Patriarch of Antioch (578-91), opposed them, and both he and Damian attacked the Alexandrian philosopher Stephen Niobes, founder of the Niobites, who taught that there was no distinction whatever between the Divine Nature and the Human after the Incarnation, and characterized the distinctions made by those who admitted only one nature as half-hearted. Many of his followers joined the Catholics, when they found themselves excommunicated by the Monophysites.

HISTORY

Of the origin of Eutychianism among the Cyrillian party a few words were said above. The controversy between Cyril and Theodoret was revived with violence in the attacks made in 444-8, after Cyril's death, by his party on Irenæus of Tyre, Ibas of Edessa, and others (see Dioscurus). The trial of Eutyches, by St. Flavian at Constantinople, brought matters to a head (see Eutyches). Theodosius II convened an œcumenical council at Ephesus, in 449, over which Dioscurus, the real founder of Monophysitism as a sect, presided (see Robber Council of Ephesus). St. Leo had already condemned the teaching of one nature in his letter to Flavian called the tome, a masterpiece of exact terminology, unsurpassed for clearness of thought, which condemns Nestorius on the one hand, and Eutyches on the other (see Leo I, Pope). After the council had acquitted Eutyches, St. Leo insisted on the signing of this letter by the Eastern bishops, especially by those who had taken part in the disgraceful scenes at Ephesus. In 451, six hundred bishops assembled at Chalcedon, under the presidency of the papal legates (see Chalcedon, Council of). The pope's view was assured of success before-hand by the support of the new Emperor Marcian. Dioscurus of Alexandria was deposed. The tome was acclaimed by all, save by thirteen out of the seventeen Egyptian bishops present, for these declared their lives would not be safe, if they returned to Egypt after signing, unless a new patriarch had been appointed. The real difficulty lay in drawing up a definition of faith. There was now no Patriarch of Alexandria; those of Antioch and Constantinople had been nominees of Dioscurus, though they had now accepted the tome; Juvenal of Jerusalem had been one of the leaders of the Robber Council, but like the rest had submitted to St. Leo. It is consequently not

surprising that the committee, appointed to draw up a definition of faith, produced a colourless document (no longer extant), using the words *'ek dúo phúseon*, which Dioscurus and Eutyches might have signed without difficulty. It was excitedly applauded in the fifth session of the council, but the papal legates, supported by the imperial commissioners, would not agree to it, and declared they would break up the council and return to Italy, if it were pressed.

The few bishops who stood by the legates were of the Antiochian party and suspected of Nestorianism by many. The emperor's personal intervention was invoked. It was demonstrated to the bishops that to refuse to assert "two natures" (not merely "of two") was to agree with Dioscurus and not with the pope, and they yielded with a very bad grace. They had accepted the pope's letter with enthusiasm, and they had deposed Dioscurus, not indeed for heresy (as Austolius of Constantinople had the courage, or the impudence, to point out), but for violation of the canons. To side with him meant punishment. The result was the drawing up by a new committee of the famous Chalcedonian definition of faith. It condemns Monophysitism in the following words: "Following the holy Fathers, we acknowledge one and the same Son, one Lord Jesus Christ; and in accordance with this we all teach that He is perfect in Godhead, perfect also in Manhood, truly God and truly Man, of a rational soul and body, consubstantial with His Father as regards his Godhead, and consubstantial with us as regards His Manhood, in all things like unto us save for sin; begotten of His Father before the worlds as to His Godhead, and in the last days for us and for our salvation [born] of Mary the Virgin Theotokos as to His Manhood; one and the same Christ, Son, Lord, Only-begotten, made known as in two natures [the Greek text now has "of two natures", but the history of the definition shows that the Latin "in" is correct] without confusion or change, indivisibly, inseparably [*'en dúo phúsesin 'asugchútos, 'atréptos, 'adiairétos, 'achorístos gnorizómenon*]; the distinction of the two natures being in no wise removed by the union, but the properties of each nature being rather preserved and concurring in one Person and one Hypostasis, not as divided or separated into two Persons, but one and the same Son and Only-begotten, God the Word, the Lord Jesus Christ; even as the Prophets taught aforetime about Him, and as the Lord Jesus Christ Himself taught us, and as the symbol of the Fathers has handed down to us."

So Monophysitism was exorcised; but the unwillingness of the larger number of the six hundred Fathers to make so definite a declaration is important. "The historical account of the Council is this, that a doctrine which the Creed did not declare, which the Fathers did not unanimously witness, and which some eminent Saints had almost in set terms opposed, which the whole East refused as a symbol, not once, but twice, patriarch by patriarch, metropolitan by metropolitan, first by the mouth of above a hundred, then by the mouth of above six hundred of its bishops, and refused upon the

grounds of its being an addition to the Creed, was forced upon the Council, not indeed as a Creed, yet, on the other hand, not for subscription merely, but for its acceptance as a definition of faith under the sanction of an anathema, forced on the Council by the resolution of the Pope of the day, acting through his Legates and supported by the civil power" (Newman, "Development", v, §3, 1st ed., p. 307). Theodosius issued edicts against the Eutychians, in March and July, 452, forbidding them to have priests, or assemblies, to make wills or inherit property, or to do military service. Priests who were obstinate in error were to be banished beyond the limits of the empire. Troubles began almost immediately the council was over. A monk named Theodosius, who had been punished at Alexandria for blaming Dioscurus, now on the contrary opposed the decision of the council, and going to Palestine persuaded the many thousands of monks there that the council had taught plain Nestorianism. They made a raid upon Jerusalem and drove out Juvenal, the bishop, who would not renounce the Chalcedonian definition, although he had been before one of the heads of the Robber Council. Houses were set on fire, and some of the orthodox were slain. Theodosius made himself bishop, and throughout Palestine the bishops were expelled and new ones set up. The Bishop of Scythopolis lost his life; violence and riots were the order of the day. Eudocia, widow of the Emperor Theodosius II, had retired to Palestine, and gave some support to the insurgent monks. Marcian and Pulcheria took mild measures to restore peace, and sent repeated letters in which the real character of the decrees of Chalcedon was carefully explained. St. Euthymius and his community were almost the only monks who upheld the council, but this influence, together with a long letter from St. Leo to the excited monks, had no doubt great weight in obtaining peace. In 453, large numbers acknowledged their error, when Theodosius was driven out and took refuge on Mount Sinai, after a tyranny of twenty months. Others held out on the ground that it was uncertain whether the pope had ratified the council. It was true that he had annulled its disciplinary canons. The emperor therefore wrote to St. Leo asking for an explicit confirmation, which the pope sent at once, at the same time thanking Marcian for his acquiescence in the condemnation of the twenty-eighth canon, as to the precedence of the See of Constantinople, and for repressing the religious riots in Palestine.

In Egypt the results of the council were far more serious, for nearly the whole patriarchate eventually sided with Dioscurus, and has remained in heresy to the present day. Out of seventeen bishops who represented, at Chalcedon, the hundred Egyptian bishops, only four had the courage to sign the decree. These four returned to Alexandria, and peaceably ordained the archdeacon, Proterius, a man of good character and venerable by his age, in the place of Dioscurus. But the deposed patriarch was popular, and the thirteen bishops, who had been allowed to defer signing the tome of St. Leo, misrepresented the teaching of the council as contrary to that of Cyril. A riot was the result.

The soldiers who attempted to quell it were driven into the ancient temple of Serapis, which was now a church, and it was burnt over their heads. Marcian retaliated by depriving the city of the usual largess of corn, of public shows, and of privileges. Two thousand soldiers reinforced the garrison, and committed scandalous violence. The people were obliged to submit, but the patriarch was safe only under military protection. Schism began through the retirement from his communion of the priest Timothy, called Ælurus, "the cat", and Peter, called Mongus, "the hoarse", a deacon, and these were joined by four or five bishops. When the death of Dioscurus (September, 454) in exile at Gangra was known, two bishops consecrated Timothy Ælurus as his successor. Henceforward almost the whole of Egypt acknowledged the Monophysite patriarch. On the arrival of the news of the death of Marcian (February, 457), Proterius was murdered in a riot, and Catholic bishops were everywhere replaced by Monophysites. The new emperor, Leo, put down force by force, but Ælurus was protected by his minister Aspar. Leo wished for a council, but gave way before the objections made by the pope his namesake, and the difficulties of assembling so many bishops. He therefore sent queries throughout the Eastern Empire to be answered by the bishops, as to the veneration due to the Council of Chalcedon and as to the ordination and the conduct of Ælurus. As only Catholic bishops were consulted, the replies were unanimous. One or two of the provincial councils, in expressing their indignation against Timothy, add the proviso "if the reports are accurate", and the bishops of Pamphylia point out that the decree of Chalcedon is not a creed for the people, but a test for bishops. The letters, still preserved (in Latin only) under the name of Encyclia, or Codex Encyclius, bear the signatures of about 260 bishops, but Nicephorus Callistus says, that there were altogether more than a thousand, while Eulogius, Patriarch of Alexandria in the days of St. Gregory the Great, puts the number at 1600. He says that only one bishop, the aged Amphilochius of Side, dissented from the rest, but he soon changed his mind (quoted by Photius, *Bibl.*, CCXXX, p. 283). This tremendous body of testimonies to the Council of Chalcedon is little remembered to-day, but in controversies with the Monophysites it was in those times of equal importance with the council itself, as its solemn ratification.

In the following year Ælurus was exiled, but was recalled in 475 during the short reign of the Monophysite usurper Basiliscus. The Emperor Zeno spared Ælurus from further punishment on account of his great age. That emperor tried to reconcile the Monophysites by means of his Henoticon, a decree which dropped the Council of Chalcedon. It could, however, please neither side, and the middle party which adhered to it and formed the official Church of the East was excommunicated by the popes. At Alexandria, the Monophysites were united to the schismatic Church of Zeno by Peter Mongus who became patriarch. But the stricter Monophysites seceded from him and

formed a sect known as Acephali. At Antioch Peter Fullo also supported the Henoticon. A schism between East and West lasted through the reigns of Zeno and his more definitely Monophysite successor Anastasius, in spite of the efforts of the popes, especially the great St. Gelasius. In 518, the orthodox Justin came to the throne, and reunion was consummated in the following year by him, with the active co-operation of his more famous nephew Justinian, to the great joy of the whole East. Pope Hormisdas sent legates to reconcile the patriarchs and metropolitans, and every bishop was forced to sign, without alteration, a petition in which he accepted the faith which had always been preserved at Rome, and condemned not only the leaders of the Eutychian heresy, but also Zeno's time-serving bishops of Constantinople, Acacius and his successors. Few of the Eastern bishops seem to have been otherwise than orthodox and anxious for reunion, and they were not obliged to omit from the diptychs of their churches the names of their predecessors, who had unwillingly been cut off from actual communion with Rome, in the reigns of Zeno and Anastasius. The famous Monophysite writer Severus was now deposed from the See of Antioch. Justinian, during his long reign, took the Catholic side, but his empress, Theodora, was a Monophysite, and in his old age the emperor leaned in the same direction. We still possess the acts of a conference, between six Severian and seven orthodox bishops, held by his order in 533. The great controversy of his reign was the dispute about the "three chapters", extracts from the writings of Theodore of Mopsuestia, Theodoret, and Ibas, which Justinian wished to get condemned in order to conciliate the Severians and other moderate Monophysites. He succeeded in driving Pope Vigilius into the acceptance of the Second Council of Constantinople, which he had summoned for the purpose of giving effect to his view. The West disapproved of this condemnation as derogatory to the Council of Chalcedon, and Africa and Illyricum refused for some time to receive the council.

The divisions among the heretics have been mentioned above. A great revival and unification was effected by the great man of the sect, the famous Jacob Baradai, Bishop of Edssa (c. 541-78). (See Baradæus .) In his earlier years a recluse in his monastery, when a bishop he spent his life traveling in a beggar's garb, ordaining bishops and priests everywhere in Mesopotamia, Syria, Asia Minor, in order to repair the spiritual ruin caused among the Monophysites by Justinian's renewal of the original laws against their bishops and priests. John of Ephesus puts the number of clergy he ordained at 100,000, others at 80,000. His journeys were incredibly swift. He was believed to have the gift of miracles, and at least he performed the miracle of infusing a new life into the dry bones of his sect, though he was unable to unite them against the "Synodites" (as they called the orthodox), and he died worn out by the quarrels among the Monophysite patriarchs and theologians. He has deserved to give his name to the Monophysites of Syria, Mesopotamia, and Babylonia, with Asia Minor, Palestine, and

Cyprus, who have remained since his time generally united under a Patriarch of Antioch (see Eastern Churches, A. Schismatical Churches, 5. Jacobites). A number of these united in 1646 with the Catholic Church, and they are governed by the Syrian Archbishop of Aleppo. The rest of the Monophysites are also frequently called Jacobites. For the Coptic Monophysites see Egypt, and for the Armenians see Armenia. The Armenian Monophysite Patriarch resides at Constantinople. The Abyssinian Church was drawn into the same heresy through its close connexion with Alexandria. At least since the Mohammedan conquest of Egypt, in 641, the Abuna of the Abyssinians has always been consecrated by the Coptic Patriarch of Alexandria, so that the Abyssinian Church has always been, and is still, nominally Monophysite.

The chief materials for the general history of the Eutychians will be found in the *Collections of the Councils* by Mansi, Hardouin, or Labbe, that is to say the councils, letters of popes, and other documents. To these must be added the historians Evagrius, Theophanes, etc., and the Monophysite historians John of Ephesus, and Zacharias Rhetor (both in Land's *Anecdota Syriaca*, II-III, Leyden, 1879), a German translation of the latter by Ahrens and KrÜger (Leipzig, 1899) and an English one by Hamilton and Brooks (London, 1889). The works of Facundus, the *Breviarium* of Liberatus, and information imparted by Photius are valuable. Of modern authorities, the larger and smaller histories are innumerable, e. g. Baronius, Fleury, Gibbon, Hefele, and (for the early period) Tillemont, XV; also the biographical articles in such large works as Cave, *Biogr. Litt.* Fabricius; the *Kirchenlexikon*; Herzog, *Realencykl.*; and *Dict. Ch. Biog.*; Assemani, *Bibl. Orient.*, II; Walch, *Ketzergeschichte* (Leipzig, 1762-85), VI-VIII; for detailed biographies see the articles referred to above.

On the dogmatic side see Petavius, *De Incarn.*, VI; Dorner, *Entwicklungsgeschichte von der Person Christi* (Berlin, 1853), 2nd ed.; tr.: *Doctrine of the Person of Christ* (Edinburgh, 1861-3), 5 vols.—it should be noted that Dorner himself held a Nestorian view; *Dict. de Théol. Cath.*; the histories of dogma such as those of Schwane, Harnack, and (up to 451) Bethune - Baker; KrÜger, *Monophysitische Streitigkeiten in Zusammenhange mit der Reichspolitik* (Jena, 1884); Loofs, *Leontius von Byzanz*. in *Texte und Unters.*, 1st series, III, 1-2; new light has come from the Syriac, Arabic, and Coptic of late years. In addition to the histories mentioned above: Evetts, *History of the Patriarchs of the Coptic Church of Alexandria*, Arabic and English in *Patrol. Orient.*, I, 2 (Paris, 1905); S. BEN EL Mogaffa, *Historia patriarchum Alexandr.* in *Corpus Script. Christ. Orient.*, *Scriptores arabici*, 3rd series, IX; Chabou, *Chronique de Michel le Syrien* (Paris, 1901), II.

On the works of Timothy Ælurus, Crum, *Eusebius and Coptic Ch. Hist.*, in *Proc. of Soc. of Bibl. Archæol.* (London, 1902), XXIV; Lebon, *La Christologie de Timothée Ælure* in *Revue d'Hist. Eccl.* (Oct., 1908), IX, 4; on Severus of Antioch, Kugener, *Vies de Sévère*

par Zaccharie le Rhéteur, et par Jean de Beith Athonia in *Patrol. Orient.* II (Paris, 1907); Duval, *Les homélies cathédrale de Sévère, trad. syr. de Jacques d'Edesse* in *Patrol. Orient.*; Brooks, *Sixth book of the select letters of Severus in the Syrian version of Athanasius of Nisib.* (*Text and Transl. Soc.*, London, 1904), besides the fragments published by Mai, etc.; on Julian see Loofs, loc. cit.; Usener in *Rhein. Mus. für Phil.* (N. S., LV, 1900); the letters of Peter Mongus and Acacius publ. by Revillout (*Rev. des Qu. hist.*, XXII, 1877, a French transl.) and by AmÉlineau (*Monum. pour servir à l'hist. de l'Egypte chr. aux IV^e et V^e siècles*, Paris, 1888) are spurious; Duval, *Litt. Syriaque* (Paris, 1900), 2nd ed.

John Chapman

Pope Saint Eutychianus

Pope St. Eutychianus

He succeeded Pope Felix I a few days after the latter's death, and governed the Church from January, 275, until 7 December, 283. We know no details of his pontificate. The rite for blessing the produce of the fields, ascribed to him by the "Liber Pontificalis", undoubtedly belongs to a later period. The statement also that he promulgated rules for the burial of martyrs and buried many of them with his own hands, has but slight claim to acceptance, since after the death of Aurelian (275) the Church enjoyed a long respite from persecution. It is highly probable that Eutychianus died not die a martyr. The fourth-century Roman Calendar mentions him (8 December) in the "Depositio Episcoporum", but not in its list of martyrs. His remains were placed in the papal chapel in the Catacomb of Callistus. When this famous crypt was discovered the fragments of the epitaph of Eutychianus were found, i. e. his name (in Greek letters): E UTYCHIANOS EPIS(KOPOS). His feast is celebrated on 8 December.

Duchesne (ed.), *Liber Pontificalis*, I, 159; De Rossi, *Roma sotterranea*, II (Rome, 1867), 70-72.

J.P. Kirsch

Eutychius I

Eutychius I

Patriarch of Constantinople, b. about 512, in Phrygia; d. Easter Day, 5 April, 582. He became a monk and then archimandrite at Amasea, in Pontus. In 552 his bishop sent him on business to Constantinople, where he seems to have made a great impression on Justinian I (527-565), so much so that when Mennas the Patriarch (536-552)

died, the emperor procured Eutychius's election as successor, on the very same day (in August). The great quarrel of "the Three Chapters" was then going on. Justinian thought he could conciliate the Monophysites, in Egypt, and Syria, by publishing anathemas against three theologians -- long dead -- who were suspect of the opposite heresy, Nestorianism. The three points (called *kephálaia, capitula*) were: (1) the condemnation of the person and works of Theodore of Mopsuestia (428); (2) the condemnation of the writings of Theodoret of Cyrus (c. 457) against the Council of Ephesus; (3) a letter of one Ibas, to a Persian named Maris, which attacked that Council. It should be noted that these documents certainly were Nestorian, and that their condemnation involved no real concession to Monophysitism. The question at issue was rather, whether it were worth while, on the chance of conciliating these Monophysites, to condemn people who had died so long ago. It is also true that, in the West, people suspected in these Three Chapters a veiled attack on Chalcedon. Justinian's "Edict of the Chapters" appeared in 544. It was accepted in the East and rejected in the West. Pope Vigilius (540-555) was the unhappy victim of the quarrel. In 548 he accepted the Edict by a Iudicatum, which also carefully guarded Chalcedon. He had himself just come to Constantinople, in order to preside at a Council that should confirm the three anathemas. But he found that, by his Iudicatum, he had grievously offended his own Western bishops. Dacius of Milan, and Facundus of Hermiane led the opposition against him, and in 550 a Synod of Carthage excommunicated the Pope. Vigilius then began that career of indecision that has left him the reputation of being the weakest Pope that reigned. He was still at Constantinople when Eutychius became Patriarch. Eutychius sent him the usual announcement of his own appointment and the usual (and quite orthodox) profession of faith. At the same time, he urged him to summon the Council at once. Meanwhile Justinian had published a second, and still stronger, condemnation of the Three Chapters (23 Dec., 551). Vigilius gave, and then withdrew, his consent to the Council. Justinian insisted on the exclusion of the African bishops, who were all strongly opposed to his condemnations. In spite of the Pope's refusal, the council met on 5 May, 553, at Constantinople. A hundred and sixty-five bishops attended. This is what was afterwards recognized as the Fifth General Council (Constantinople II). On 14 May the Pope sent them a modified Decree, called the Constitution, in which he condemned sixty propositions taken from Theodore of Mopsuestia, but forbade the condemnation of the other Chapters. As he would not attend the council Eutychius presided. The Council wrote respectfully to the Pope, but, in spite of the Constitution, completely confirmed Justinian's edicts, in its eighth session. It also acknowledged the formula *Unus de Trinitate passus est* as orthodox, and incidentally condemned Origen. (Can. 11, 12, 13, 14. For this Council see Liberati Breviarium, infra; Mansi, IX, 163; Hefele, Conciliengesch., 2nd ed., II, 898 sqq.) Vigilius gave in

on 8 December, after months of ill-treatment, was allowed to go back to Rome, and died on the way, in Sicily, in 554. [There is an account of all this story in Fortescue's *Orth. Eastern Church*, 82-83.]

Eutychius had, so far, stood by the Emperor throughout. He composed the decree of the Council against The Chapters (Mansi, IX, 367-575). In 562, he consecrated the new church of Sancta Sophia. His next adventure was a quarrel with Justinian about the Aphthartodocetes. These were a sect of Monophysites, in Egypt, who said that Christ's body on earth was incorruptible (*'aphthorá*), and subject to no pain. The Emperor saw in the defence of these people a new means of conciliating the Monophysites, and, in 564, he published a decree defending their theory (Evagrius, *Hist. Eccl.*, IV, 391). Eutychius resisted this decree, so on 22 January, 565, he was arrested in the church, and banished to a monastery at Chalcedon. Eight days later a synod was summoned to judge him. A ridiculous list of charges was brought against him; he used ointment, he ate deliciously, etc. (Eustathius, *Vita S. Eutych.*, 4, 5). He was condemned, deposed, and sent to Prince's Island in Propontis. Thence he went to his old home at Amasea, where he stayed twelve years. Joannes Scholasticus succeeded as Patriarch (John III, 566-577); and after his death, in 577, the Emperor Justin II (565-578) recalled Eutychius, who came back in October. At the end of his life Eutychius evolved a heretical opinion denying the resurrection of the body. St. Gregory the Great was then Apocrisarius (legate) of the Roman See, at Constantinople. He argued about this question with the patriarch, quoting Luke, xxiv, 39, with great effect, so that Eutychius, on his death-bed, made a full and orthodox profession of faith as to this point. St. Gregory tells the whole story in his "Exp. in libr. Job" (*Moralium lib. XIV*, 56); Eutychius dying said: "I confess that we shall all rise again in this flesh". (See also Paul. Diac.: *Vita Greg. Mag.* I, 9.) His extant works are his letter to Pope Vigilius (Migne, P. L., LXIX, 63, P. G. LXXXVI, 2401), a fragment of a "Discourse on Easter" (*Mai: Class. Auct. X*, 488, and *Script. Vet. Nov. Coll. IX*, 623); and other fragments in P. G., LXXXVI. His life was written by his disciple Eustathius, a priest of Constantinople. His feast is kept by the Byzantine Church on 6 April, and he is mentioned in our "Corpus Iuris" (*Grat.*, I pars., Dist. XVI, Cap. x).

Eustathius, *Vita St. Eutychii* in *Acta SS.*, April, I, 550-573; Evagrius, *Hist. Eccl.*, IV, 37, 38; V, 16, 18; Hefele, *Conciliengesch.*, II, II, 852, etc.

Adrian Fortescue

Euty chius

Euty chius

Melchite Patriarch of Alexandria, author of a history of the world, b. 876, at Fustat (Cairo); d. 11 May, 940. He was an Egyptian Arab, named Sa'id ibn Batriq; his father's name was Batriq (Patricius). He first studied medicine and history, and practised for a time as a physician. He then entered a monastery and eventually became Patriarch of Alexandria, taking the name Euty chius, in 933. Being the Melchite (Orthodox) patriarch, he spent most of his reign in strife with the great majority of Egyptian Christians who were (Monophysite) Copts, and with his Coptic rival. His works (all written in Arabic and preserved only in part) are treatises on medicine, theology, and history. He wrote a compendium called "The Book of Medicine", treatises on fasting, Easter, and the Jewish Passover, various feasts, etc.; also a "Discussion between a Christian and an Infidel", by which he means a Melchite and a Monophysite. But his most important work is "Nazm al-Gawahir" (Chaplet of Pearls), a chronicle of the history of the world from Adam to 938. The work is dedicated to his brother, Isa ibn Batriq, and is meant to supply a short account of universal history. In Latin it is quoted as "Euty chii Historia universalis", or as the "Annales" of Euty chius. The author states that he has compiled his history only from the Bible and reliable authorities. It contains, however, a great number of strange and improbable additions to Biblical and profane history not found in any other source. There are also in the "Chaplet of Pearls" many valuable details about the Monophysite controversy and the history of the Patriarchate of Alexandria. The book acquired a certain fame when, in the seventeenth century, John Selden published an excerpt of it (London, 1642, see below) in order to prove that originally at Alexandria there was no distinction between bishops and priests (a theory at one time adopted by St. Jerome, "In Ep. ad Titum", I, 5; Ep. cxivi, "ad Evangelum"). Selden was answered by a Maronite, Abraham Ecchellensis (Rome, 1661), who disputed the accuracy of his translation of the passages in question and proposed another. In the thirteenth century another Arabic historian, Al-Makin (d. 1275), used Euty chius' work in compiling his own history of the world to 1260 (Krumbacher, *Byzantinische Litteratur*, Munich, 1897, p. 368).

ADRIAN FORTESCUE

Evagrius

Evagrius Scholasticus

Ecclesiastical historian and last of the continuators of Eusebius of Caesarea, b. in 536 at Epiphania in Coele-Syria; d. after 594, date unknown. He followed the profession of advocate at Antioch (hence his surname) and became the friend of the Patriarch Gregory (569-594), whom he successfully defended in presence of the Emperor Maurice and of the Council at Constantinople (588). Having already been appointed questor by Tiberius II (578-582), he received from Maurice the title of honorary prefect (*ex praefectis*). Evagrius, a product of the masters of rhetoric, made a collection of the reports, letters, and decisions which he had written for the Patriarch Gregory. Another collection contained discourses of Evagrius, among them a panegyric of the Emperor Maurice and his son Theodosius. These have all been lost. None of his works survive except his "Ecclesiastical History" in six books. In this he proposes to write the sequel of the narrative begun by Eusebius of Caesarea and continued by Socrates, Sozomen, and Theodoret. He begins with the Council of Ephesus (431) and ends with the twelfth year of the reign of the Emperor Maurice (593-594). This work is very important for the history of the religious controversies of the fifth and sixth centuries, Nestorianism, Eutychianism, and the last phases of Monophysitism. Evagrius furnishes details concerning events and persons, and does not neglect works of art (St. Sophia, H.E., IV, 31). To political history he gives an important place; in a word, he is an authority of the first order for this period. He is sincere, and is conscientious in securing information. But he shares the ideas of his environment and of his time. In his defence of Constantine he goes so far as to deny the murder of Crispus and Faustina. He relates wonders and legends, and it is to him we owe the account of the blood that was taken up with a sponge at certain times from the body of St. Euphemia of Chalcedon (II, 3). Among the sources of his information he mentions the chronicle of Eustathius of Antioch, and the works of Procopius, Menander Protector, John of Epiphania, and John Malalas (whom he calls John the Rhetorician). While he relies on these authors, he does so with discretion. In his ecclesiastical attitude he is strictly orthodox and abides strictly by the decrees of Chalcedon; nevertheless, he judges the heretics with moderation. His was an equable mind, and he is a reliable guide.

PAUL LEJAY

Evagrius

Evagrius Ponticus

Born about 345, in Ibora, a small town on the shores of the Black Sea; died 399. He is numbered among the more important ascetical writers of the fourth century. Instructed by St. Gregory Nazianzen, he was ordained reader by St. Basil the Great and deacon by St. Gregory of Nyssa (380), whom he accompanied to the Second Council of Constantinople (381). According to Palladius, who differs in his account from Socrates and Sozomen, Evagrius remained for a time as archdeacon in Constantinople, while Nectarius was patriarch (381-397). Leaving the city on account of its spiritual dangers, he went first to Jerusalem and then into the Nitrian Desert, where he began an eremitical life under the guidance of the younger Macarius (383). He steadfastly refused a bishopric offered by Theophilus of Alexandria. He became very celebrated for his ascetical life and writings, though St. Jerome (e.g. Ep. 133 ad Ctesiphontem, n. 3) charges him with Origenistic errors and calls him the precursor of Pelagius. The Sixth, Seventh, and Eighth Ecumenical Councils condemn Evagrius together with Origen. Rufinus and Gennadius translated the works of Evagrius into Latin; several of them have been lost or have not thus far been recovered (P.L., XL). The best collections of his works are edited by Bigot (Paris, 1680); Gallandi, "Biblioth. vet. patr.", VII, 551-581; Migne, "P.G.", XL; cf. also Elter, "Gnomica" (Leipzig, 1892); Zöckler, "Evagrius Pontikus" (Munich, 1893). We may here name: "Monachus seu de vita activa"; "Rerum monachalium rationes earumque juxta quietem adpositio"; "De octo vitiosis cogitationibus".

A.J. MAAS

Evangelitaria

Evangelitaria

Liturgical books containing those portions of the Gospels which are read during Mass or in the public offices of the Church. The name does not date back earlier than the seventeenth century. The Greeks called such collections *Euaggelion*, "Gospel", or *eklogadion tou euaggeliou*, "Selections from the Gospel".

The collection of readings from the Acts of the Apostles and the Epistles known as *Apostolos*, "Apostle", or *praxapostolos*. In churches of the Latin Rite, the lessons from the Old Testament, the Epistles from the New Testament, and portions of the Gospels are usually grouped in the same book under the name *Comes*, *Liber comitis*,

Liber comicus (from *comes*, companion), or *Lectionarium*. Separate Evangelia are seldom to be met with in Latin. Tables indicating passages to be read, as well as the Sundays and Holy Days on which they are to be read, are called by the Greeks "Evangelistarium", a name sometimes given to the Evangelia proper; they are also called "Synaxarium", and by the Latins are known as "Capitulare". Although the word *Evangeliarium* is of recent origin, it has been universally adopted. The word *Lectionarium* is employed, however, to denote either the collection of passages from the Old and New Testaments, including the Gospels, or else these passages alone without the corresponding Gospels.

Origin and Use of Evangelia

Following the custom of the Synagogue, the Scriptures of the Old Testament were read at the primitive Christian assemblies. According as the Canon of the New Testament was decided on, certain extracts from it were included in these readings. Justin tells us that in his day, when the Christians met together, they read the Memoirs of the Apostles and the writings of the Prophets (Apol., I, lxvii). Tertullian, Cyprian, and other writers bear witness to the same custom; and in the West the order of lector existed as early as the third century. For want of precise testimony we do not know how the particular passages were decided on. Most likely the presiding bishop chose them at the assembly itself; and it is obvious that on the occurrence of certain festivals the Scripture relating to them would be read. Little by little a more or less definite list would naturally result from this method. St. John Chrysostom in a homily delivered at Antioch exhorts his hearers to read beforehand the Scripture passages to be read and commented on in the Office of the day (Homilia de Lazaro, iii, c. i). In like manner other Churches would form a table of readings. In the margin of the MS. text it was customary to note the Sunday or festival on which that particular passage would be read, and at the end of the manuscript, the list of such passages, the Synaxarium or Capitulare, would be added. Transition from this process to the making of an Evangeliarium, or collection of all such passages, was easy. Gregory is of opinion that we possess fragments of Evangelia in Greek dating from the fourth, fifth, and sixth centuries, and that we have very many from the ninth century onwards (according to Gregory they number 1072). In like manner, we find Lectionaries in the Latin Churches as early as the fifth century. The Comes of the Roman Church dates from before St. Gregory the Great (P.L., XXX, 487-532). From the tenth century onwards we find the Gospel lessons, together with the Epistles and prayers, united in a new liturgical book, called the Missal.

Evangelia and the Text of the New Testament

Evangelia have very little importance for the critic of the Gospel text. At the time when the various Gospel passages began to be collected in book-form for use in

liturgical reunions, the various families of the Gospel text and its translations were already in existence; and those Evangeliaria simply reproduce the particular text favoured by the Church which compiled it. They have even exercised an unfortunate influence on the more recent MS. of the Gospels; certain additions of a liturgical nature (e.g., *in illo tempore; dixit Dominus*) which were set at the beginning or end of a reading, have found their way into the text itself. But in the official text of the Vulgate, and in editions of the Greek text of to-day, owing to the labours of Tischendorf and of Westcott and Hort, these liturgical glossaries are very rare. We notice one example in the Vulgate text: Luke, vii, 31 (*ait autem Dominus*).

The Evangeliaria and Liturgy

It is especially from a liturgical point of view that the study of Evangeliaria is interesting. The general method of Greek Evangeliaria is uniform. The first part contains the Gospels of the Sundays beginning with Easter; the second part gives the Gospels for the festivals of the saints beginning with 1 September. In the Churches of the West the distribution of the Gospel pericopes was more divergent because of the various rites. And the ceremonial followed in the reading of the Gospel presents many differences of usage between one church and another, which it would be too long to treat of here.

ORNAMENTATION OF EVANGELIARIA

From the beginning the books used in the liturgy, and more particularly the Gospel manuscripts, were highly venerated, and therefore text and cover were often richly ornamented. From an artistic point of view the distinction between Evangeliaria strictly so called and Gospel manuscripts is of little importance and is generally disregarded. It consists merely in the fact that the illuminations of the Evangeliaria occur as a rule at those passages set apart for the greater festivals of the year. The coronation oath-book of Anglo-Saxon kings, which King Athelstan received, it would appear, from his brother-in-law, Otto I, and which he in turn presented to the cathedral church of Canterbury, is ornamented with figures of the Evangelists freely copied from those that adorn the Evangeliarium of Charlemagne preserved at Vienna. We are acquainted with Gospels in rolls only from seeing them in miniatures, especially as emblems of the Evangelists, until well into the Middle Ages.

The roll of the Book of Joshua (ninth-tenth century: Vatican Library) is a specimen of what Evangeliaria in this form with miniatures were like. The roll-form remained long in use for liturgical manuscripts at Milan and in Southern Italy.

Costly Evangeliaria are noted above all for their clear and careful writing. They have helped to perpetuate and propagate certain styles of calligraphy.

The Greek uncial is used in many manuscripts of the ninth and tenth centuries; and the Latin uncial is also employed, especially in Gaul, far into the Middle Ages for

Gospel and liturgical works. The copying of the Gospels influenced largely the writings of Irish and Anglo-Saxon scribes, and effected the spread of these characters over the Continent and the development of the Caroline minuscule and the semi-uncial of the school of Tours. The copyists of the Gospels made great use of other helps to beautify their penmanship, such as the use of purple parchment, of liquid gold and silver, and various coloured inks. The part played by Evangelia in the history of miniature painting until the twelfth and thirteenth centuries is very great. Especially noteworthy are the miniature insets to the Canons of Eusebius, or tables of Gospel concordance. Illuminated initial letter differed according to the various schools of writing; the Irish scribes used artistic knots and loops, the Merovingian and Lombard writers preferred animal forms, especially fish.

Illuminated scenes, of interest to the iconographer, are often to be met in these copies of the Gospel text. Frequently it is the figure of the Evangelist that stands at the head of his Gospel; the donor, or rather a sketch showing the donation of the book, is often found in miniatures from the days of Charlemagne to the end of the Middle Ages. The prince is shown receiving from the hands of the abbot the Evangelium he will use whenever he assists at the holy offices in the abbey church (cf. the picture of Charles the Bald in the Vivien Bible, Bibliothèque Nationale, Paris). But in the tenth and eleventh centuries the prince is shown offering the precious manuscript to Christ or to the patron saint of the church or abbey (cf. the Evangelium at Bamberg showing the Emperor Henry II offering the book to Christ).

Among the more famous Evangelia may be mentioned the following: the portion of an Evangelium from Sinope (sixth century: in the Bibliothèque Nationale, Paris); the Evangelium of Rossano (about 600) in Greek uncials; the Syrian codices of Rabula (586, at Florence) and Etschmiadzin (miniatures of the sixth century); the Evangelium of Gregory I (at Cambridge) in Latin uncials; the Book of Kells (seventh to ninth century, at Dublin); the Book of Lindisfarne (eighth century, in the British Museum, London) of Irish workmanship; the Irish-Continental Evangelia of St. Gall (about 800); the Carolingian Evangelium of Godescalc (about 782, in the Bibliothèque Nationale, Paris); the Ada Codex (ninth century, at Trier); the Evangelia of Echternach (tenth century, at Gotha), and of the Abbess Uta (about 1002, at Munich). Valuable Evangelia were carefully treasured, and when used in the offices were placed on a strip of cloth or on a cushion. The back leaf of the binding was usually left plain, but the front cover was enriched with all the skill of the goldsmith. One of the most ancient bindings or covers we possess is that offered by Queen Theodelinda (600) to the cathedral of Monza. At times plaques of ivory, resembling diptychs, were set into these bindings. The earliest of them were of Oriental or Italian origin, and bear isolated figures of Christ or the Blessed Virgin, etc. A number of them, to be found in

the countries along the Rhine and the Meuse and in Northern France (tenth and eleventh centuries), have the scene of the Crucifixion.

H. COPPIETERS R. MAERE

The Evangelical Alliance

The Evangelical Alliance

An association of Protestants belonging to various denominations founded in 1846, whose object, as declared in a resolution passed at the first meeting, is "to enable Christians to realize in themselves and to exhibit to others that a living and everlasting union binds all true believers together in the fellowship of the Church" (Report of the Proceedings of the First General Conference). The points of belief, which the members accept as being the substance of the Gospel, are contained in a document adopted at the first conference and known as the Basis. They are nine in number:

- 1 The Divine inspiration, authority, and sufficiency of the Holy Scriptures;
- 2 the right and duty of private judgment in the interpretation of the Holy Scriptures;
- 3 the unity of the Godhead and the Trinity of Persons therein;
- 4 the utter depravity of human nature in consequence of the fall;
- 5 the Incarnation of the Son of God, His work of atonement for sinners, and his mediatorial intercession and reign;

- 6 the justification of the sinner by faith alone;
- 7 the work of the Holy Spirit in the conversion and sanctification of the sinner;
- 8 the immortality of the soul, the resurrection of the body, the judgment of the world by Jesus Christ, with the eternal blessedness of the righteous and the eternal punishment of the wicked;
- 9 the Divine institution of the Christian ministry, and the obligation and perpetuity of the ordinances of Baptism and the Lord's Supper.

"It being, however, distinctly declared that this brief summary is not to be regarded, in any formal or ecclesiastical sense, as a creed or confession, nor the adoption of it as involving an assumption of the right authoritatively to define the limits of Christian brotherhood, but simply as an indication of the class of persons whom it is desirable to embrace within the Alliance. In this Alliance, it is also distinctly stated that no compromise of the views of any member, or sanction of those of others, on the points wherein they differ, is either required or expected; but that all are held free as before to maintain and advocate their religious convictions, with due forbearance and brotherly love. It is not contemplated that the Alliance should assume or aim at the character of a new ecclesiastical organization, claiming and exercising the functions of a Christian Church. Its simple and comprehensive object, it is strongly felt, may be successfully promoted without interfering with, or disturbing the order of, any branch of the Christian Church to which its members may respectively belong.

The Alliance thus lays claim to no doctrinal or legislative authority. In a pamphlet issued by the society itself this feature is thus explained: "Then it is an *Alliance*—not a union of Church organizations, much less an attempt to secure an outward uniformity—but the members of the Alliance are *allies*: they belong to different ecclesiastical bodies—yet all of the *One Church*. They are of different nations as well as of many denominations—yet all holding the Head, Christ Jesus. *Unum corpus sumus in Christo*. We are one body in Christ—banded together for common purposes, and to manifest the real unity which underlies our great variety. We are all free to hold our own views in regard to subsidiary matters, but all adhere to the cardinal principles of the Alliance as set forth in its Basis."

The Alliance arose at a time when the idea of unity was much before men's minds. During the years that witnessed the beginning of the Oxford Movement in the Church of England, there progressed a movement in favour of union among men whose sympathies were diametrically opposed to those of the Tractarians, but who in their own way longed for a healing of the divisions and differences among Christians. In

1842 the Presbyterian Church of Scotland tried, though without success, to establish relations with other Protestant bodies. In England the progress of the Tractarian Movement led many distinguished Evangelical Nonconformists to desire "a great confederation of men of all Churches who were loyal in their attachment to Evangelical Protestantism in order to defend the faith of the Reformation" (Dale, *History of Eng. Congregationalism*, 637). At the annual assembly of the Congregational Union held in London, May, 1842, John Angell James (1785-1859), minister of Craven Chapel, Bayswater, London, proposed the scheme that ultimately developed into the Evangelical Alliance. He asked: "Is it not in the power of this Union to bring about by God's blessing, a Protestant Evangelical Union of the whole body of Christ's faithful followers who have at any rate adopted the voluntary principle? ... Let us only carry out the principle of a great Protestant Union and we may yet have representatives from all bodies of Protestant Christians to be found within the circle of our own United Empire" (*Congregational Magazine*, 1842, 435-6). The first definite step towards this was taken by Mr. Patton, an American minister, who proposed a general conference of delegates from various bodies, with the result that a preliminary meeting was held at Liverpool in October, 1845, at which the basis of such a conference was arranged. On 10 Aug., 1846, at a meeting of eight hundred delegates, representing fifty denominations, held in the Freemasons Hall, London, the Evangelical Alliance was founded. All who would accept the Basis were eligible as members, and the representatives of the various nations were recommended to form national organizations or branches, of which the British Organization, formed in 1846, was the first. These organizations were independent of one another and were at liberty to carry on their work in such a manner as should be most in accordance with the peculiar circumstances of each district. They have been formed in the United States, Germany, France, Switzerland, Holland, Sweden, Italy, Turkey, Australia, India, and several missionary countries. The French national branch abandoned the Basis in 1854 and substituted for it a wider form of a Unitarian character. The Alliance meets and acts as a whole only in the international and general conferences, which are held from time to time. The first of these was held in London, 1851, and has been succeeded by others as follows: Paris, 1855; Berlin, 1857; Geneva, 1861; Amsterdam, 1867; New York, 1873; Basle, 1879; Copenhagen, 1884; Florence, 1891; London, 1896 (Celebration of the Jubilee); London, 1907, on which occasion the Diamond Jubilee of the Alliance was celebrated.

These international conventions are regarded as of special value in the promotion of the aims of the Alliance. Another matter to which much importance is attached is the annual "Universal Week of Prayer", observed the first complete week in January of each year since 1846. At this time the Alliance invites all Christians to join in prayer, the programme being prepared by representatives of all denominations and printed

in many different languages. The relief of persecuted Christians is another department of work in which the Alliance claims to have accomplished much good. Finally, in 1905, the Alliance Bible School was founded with headquarters at Berlin, under the direction of Pastor Köhler and Herr Warns, "to place before the students the history and doctrine of the Bible in accordance with its own teaching". The reports of the conferences claim considerable success for these various works, a claim which cannot here be investigated. From its principles the Evangelical Alliance is necessarily opposed to the doctrine and authority of the Catholic Church; and Catholics, while sympathizing with the desire for union among Christians, realize that the unity by which we are made one in Christ is not to be won by such methods. The motto of the Alliance is *Unum corpus sumus in Christo*.

The Evangelical Alliance (London, 1847) and other reports of the International Conferences; Lichtenberger, *Encyclop. des sciences religieuses* (Paris, 1877), I, 193- 200; Tanquerey in *Dict. de théol. cath.*, s.v. *Alliance*; *The Evangelical Alliance: the Basis, History and Aims* (London, s.d.); *Maintaining the Unity: Proceedings of Eleventh International Conference* (London, 1907).

Edwin Burton

Evangelical Church

Evangelical Church

(IN PRUSSIA)

The sixteenth-century Reformers accused the Catholic Church of having adulterated the primitive purity of the Gospel by the admixture of un-Scriptural doctrines and practices; consequently they designated themselves as "Evangelicals", or followers of the pure Evangel, in contradistinction to the un-evangelical followers of Roman traditions and institutions.

Almost from the beginning the new Evangelical Church was split, first into two communions, the Lutheran and the Reformed, then into a multitude of sects which baffles the skill of statisticians. The cleavage arose through differences in the doctrine of Christ's presence in the Holy Eucharist. Luther taught the actual bodily presence of Christ in and with the elements, though denying Transubstantiation. Zwingli and the Swiss Reformers admitted only His spiritual presence. The Lutheran and the Reformed Churches form the two great branches of Evangelical Protestantism to which all the other divisions of Protestants are subordinate. The evangelical section of the Anglican Church stands midway between the High Church and the Latitudinarian Low Church. As a proper name with strictly limited meaning the designation "Evangelical Church" applies to a branch of the Protestant Church in Germany, formed in 1817 at the instance

of King Frederick William III of Prussia, by a union of the Lutheran and the Reformed Churches.

HISTORY

At the beginning of the nineteenth century religious life in Germany was at a low ebb. The Rationalism and Illuminism of the eighteenth century, openly encouraged by King Frederick II (the Great), had told severely on the supernatural life of the country, especially among the Protestants. The "rights of man", proclaimed and ruthlessly carried out by the French Revolutionists, had found a welcome beyond the Rhine and well nigh superseded the rights of God. Luther and Calvin, whilst casting off the authority of the Church, had still bowed to that of the Bible, and their followers adhered to several "Confessions of Faith" as binding on their conscience. These formulæ were now overthrown as inimical to the rights of free inquiry, as the work of men little versed in exegesis and history, as unscientific and un-Protestant. Religious life, thus deprived of its sap, was rapidly withering away. Indifference and infidelity obliterated the differences among Protestant communities and threatened for a time to sweep away Christianity itself.

The Prussian State, owing its origin, growth, and importance to Protestantism, was not sympathetic to its Catholic subjects. The Rhine Province, Westphalia, and the Polish provinces were ever ready to manifest their affection for the Catholic rulers of Austria and even of France. The House of Hohenzollern was Calvinist, the majority of the nation was Lutheran. Frederick William III, King of Prussia (1797-1840), undertook to strengthen his rule and his country by building up a united religion together with a powerful army, efficient schools, and a flourishing trade. As early as 1798 he had expressed the hope of uniting the Reformed and the Lutheran Churches by means of a common "Agenda", or ritual. He matured the idea on his visit to England in 1814, and made the first arrangement for a union and a new liturgy in St. James's Palace in London. It was proposed to celebrate in Germany the third centennial jubilee of the Reformation, and in anticipation of this festival he issued on 27 Sept., 1817, the memorable declaration that it was the royal wish to unite the separate Lutheran and Reformed Confessions in his dominions into one Evangelical Christian Church, and that he would set an example in his own congregation at Potsdam by joining in a united celebration of the Lord's Supper at the approaching festival of the Reformation. It was not intended to fuse the Reformed Church into the Lutheran, or vice-versa, but to establish one Evangelical Church, quickened with the spirit of the Reformation. The epithet "Protestant" was avoided as too partisan; prominence was given to the vague term *evangelical*; Lutherans and Calvinists, whilst maintaining their own specific doctrines, were to form a single church under a single government and to present a united front to the Catholic Church.

The execution of the royal plan was entrusted to the provincial consistories, synods, and clergy generally. The Synod of Berlin and nearly all the clergy and laity of Prussia responded cordially to the decree. External union, facilitated by the prevailing religious indifference, was adopted in Nassau and in the Rhenish Palatinate (1818), in Baden (1821), in Rhenish Hesse (1822), in Württemberg (1827). But Saxony, Hanover, and Bavaria proper were too exclusively Lutheran, while Switzerland was too exclusively Reformed to join the Evangelical Church, and the Austrian Protestants also divided their allegiance between the Helvetic and the Augsburg Confessions. Instead of the former two Protestant bodies in Germany, there were now three: the Reformed Church, the Lutheran, and the united Evangelical. The Reformed was the weakest in numbers; and in doctrine its sole distinctive tenet was the rejection of Luther's teaching concerning the Eucharist. Neither was the Lutheran flourishing; true Lutheranism existed only in the pious aspirations of a few theologians, pastors, and jurists. A union without a uniform confession and liturgy is but a loose mass, unworthy to be called a church. Frederick William, therefore, attempted to consolidate his Evangelical Church by giving it a common liturgy composed by himself with the assistance of the court chaplains and a pious layman. This "Agenda" was made obligatory by royal order for the royal chapel, the cathedral of Berlin, and for the army; its general adoption was only recommended. It met with determined opposition as a measure oppressive of evangelical freedom, antiquated, leaning to "Romanish" practices, unsettling men's consciences. None the less, by 1825 it had been adopted by 5343 churches out of 7782. The Protestant bishops Eylert and Neander in Berlin were in favour of it and of the measures taken to enforce it. In 1828-29 the "Agenda" was issued in a revised form and made binding on all Protestant churches, some concessions being granted to Silesia, Saxony, Pomerania, and other parts of the kingdom, in deference to provincial uses. The Lutherans, fearing the loss of their confessional status, offered increased resistance. But the king was inexorable. Dr. Scheibel, professor in Breslau, and others of the Lutheran clergy who had refused to accept the new liturgy, were suspended from their offices. For several years a fierce persecution raged against the "Old Lutherans", especially in Silesia and the Grand Duchy of Posen. Preacher Hahn headed the troops which were sent to subdue the recusant villagers by seizure of their goods, imprisonment, and all manner of violence. Minister von Altenstein justified these measures on the principle that it was the Government's duty to protect these blind sectarians against the consequences of their own folly. Thousands of the recusants were driven to emigrate to America and Australia. Not a voice was raised in their defence; the whole Liberal press lauded the energy of the Prussian Government. By a royal decree of 28 Feb., 1834, all Lutheran worship was declared illegal.

Frederick William III ruled his Church as *summus episcopus*, as a pope without a fixed deposit of faith to guard, or a hierarchy Divinely ordained to co-operate with him. The result was arbitrariness in the rule, disorganization in the ruled. The king's first royal decrees aimed at the conciliation of religion with the prevailing rationalistic philosophy, but the misfortunes of the year 1806 and the death of his beloved consort turned his mind more and more to the religion of revelation and mysteries. Considering himself the protector and leader of the Church in Germany he endeavoured to raise it from degradation by forcing unity upon it with a strong hand; unity not in dogma, for he disliked theologians "who pretend to be more Christian than Christ", but in liturgy, wherein his sincere piety found sufficient satisfaction. In 1831 he surprised Superintendent Eylert with an essay on the power of the keys and the binding and loosing power in the Church; it contained an attempt to reintroduce auricular confession and the old church discipline. All his efforts, however, only ended in greater division. At his death, in 1840, the Church of his creation was still a chaos of warring sects, irresponsible to the brooding of the royal mind and restive to the royal arm.

Frederick William IV immediately set free the imprisoned Lutheran clergy and allowed the formation of separate congregations. The Old Lutherans now founded a "separate Lutheran Church" at Breslau under the direction of the lawyer Huschke. By the "general concession" of 1845 they were recognized as Dissenters with legal status but without pecuniary support from the State. The new sect was, however, wanting in union and cohesion: Diedrich opposed Huschke and the *Oberkirchencollegium* (supreme ecclesiastical council); frictions among members were of frequent occurrence. But few of the discontented clergymen had left the established Evangelical Church to join the Old Lutherans; the majority remained at their posts for various reasons: within the Union they had a better opportunity for working its destruction than without; they were unwilling to sacrifice their incomes from the State and consequent independence from the financial support of their parishioners; they feared, in many cases, to be altogether abandoned by indifferent congregations. The defenders of the union argued that its disruption would produce at least five particular churches at war with one another and powerless to withstand the inroads of the Catholic Church; that the union was a Prussian achievement to be supported by all true lovers of Prussia. The theologians of the Union demanded a *consensus-symbolum*, "an ordination formula in which the consensus of the two Churches was to be contained without depriving the individual congregation of the right of giving a call on the ground of the particular confession" (Gardner, I, 967); others were satisfied with a confederation professing no formulated creed and resting solely on unfettered science. The trend of religious thought during this period, the middle of the nineteenth century, followed the impulse given by the king. Frederick William IV's motto was: "I and my house intend to serve the Lord".

He was piously, even pietistically, inclined, hated infidelity and pantheism, cherished the Divine right of kings, and loved to dream of ancient institutions in Church and State. In a short time the Prussian universities, and in their wake the other German universities, except Giessen and Jena, became centres of positive beliefs and tendencies. The king favoured men of his own thinking and made known his dislike to transfer the arduous duties of his "supreme episcopate" to free parishes formed on the apostolic model. Theological teaching in schools and press, although starting from the same positive creeds, diverged in two different streams. On the one side there were the partisans of a *via media*, endeavouring to find the golden mean between the Lutheran Confession of Faith and the Rationalism of the period. On the other side stood the Neo-Lutherans. These theologians held to Luther's doctrine on justification but rejected his invisible Church and universal priesthood; they defended a Divinely ordained hierarchy, and their teaching on sacrifice, orders, and sacraments nearly approached the Roman. This current runs parallel with Puseyism in England; Hengstenberg (died 1869) was its main support.

The General Synod of Berlin (2 June-29 Aug., 1846) had given rise to great hopes for the consolidation of the Union. It was resolved that the National Evangelical Church should have no other basis than the "consensus"; that the parish councils (*Gemeinde-Presbyterien*) and consistories be amalgamated so that clergy and laity might work together; that a standing general synod be added to the standing supreme consistory (*Oberconsistorium*). The crucial task of the synod was to find an acceptable formula of consensus. Karl Immanuel Nitzsch, of Bonn, set up a profession of faith intended to take the place of the reformed formularies: it consisted of vague Biblical texts into which both Lutherans and Reformed might easily read their particular doctrines or no particular doctrine at all. The synod accepted the formula. But the country received it with scorn and contempt, and it was rejected by everyone. Hengstenberg in his "Kirchenzeitung" branded the synod as a Robber Synod, a denial of Christ; its decrees were not to be executed, because they failed to give expression to "the general Protestant consciousness". The consensus only served to increase existing dissensions. The most vital questions divided the leading minds: Was the territorial ruler by right the *summus episcopus* within his territory? Was it advisable to impose an evangelical church discipline, and if so, which? What part was to be conceded to laymen in the ministry of the Word and of the sacraments?

The very sterility of controversy turned some practical men from words to works: the "Inner Mission" was originated (1848) by Wicheren, the founder of the Hamburg *Rauhes Haus* (properly Rüge's House, from the name of its former occupant), an institution which covers almost the whole field of Christian charity. The preacher Fliedner (died 1864) instituted the order of Protestant deaconesses, an imitation of the Catholic

Sisters of Charity in the main objects of their life. Court preacher Zimmermann of Darmstadt founded the Gustav-Adolfs-Verein (1841-2), a union whose avowed primary object is to support the evangelical missions in outlying districts (the Diaspora), its secondary object being to bind together all Protestants regardless of denominational differences, and to oppose a solid bulwark to the encroachments of Catholicism. The secondary object caused a split in the Union. At the general assembly in Berlin (1846) the Königsberg preacher Rupp, who had been deprived of his office for breaking away from the Protestant formularies and from the national Church, presented himself as a deputy. On the question of his admission as such the assembly disagreed: Rupp was, however, excluded by a small majority, a distinct breach of the principles of the Union. The meeting of 1847 resolved that henceforth the Union should direct its main efforts to the "conversion of the Roman Catholics", a resolution to which it has remained faithful to this day.

The short-lived movement of the "Protestant Friends", or "Friends of Light", was started in opposition to pietistic orthodoxy which threatened freedom in teaching. Article 3 of the programme which they issued from the Moravian settlement at Gnadenau, in 1841, runs: "We hold it to be our right and our duty to submit to the test of our reason whatever is set before us as religion." Ulich, a simple-minded man who had the gift of popular preaching, and Pastor Wislicenus, a downright Rationalist, were the soul of this movement. The Berlin magistrates presented to King Frederick William IV an address conceived in the spirit of the Protestant Friends. They entreated him to grant the Church a free constitution in keeping with the needs of the time, and freedom of teaching limited only by public morality and the safety of the State. The king in person received his theological municipality, who paraded in fourteen state coaches before the royal castle. His pietism was ruffled by the pretensions of the town councillors; in language not over gracious he told them to mind their own business. This happened 22 August, 1845; it marks the end of the Protestant Friends but also the beginning of the "Free Communities" (*Freie Gemeinden*). As formerly the right wing of the Union had seceded to form Neo-Lutheran communities, so now the left wing withdrew to form dissenting rationalistic congregations. Their meetings were prohibited, but Rupp, Ulich, and Wislicenus resisted until by royal decree of 30 March, 1847, the new dissenters were allowed to separate from the Established Church without the loss of their civil rights; yet not without many vexatious formalities and expenses. The Free Communities, wanting internal cohesion to resist the royal disfavour and the ceaseless assaults of the dominant pietist clique, came to a speedy end.

The wave of liberal aspirations which rolled over Europe in 1848 left its mark on the Churches in Prussia. Paragraph 15 of the new Constitution read: "The Evangelical, and the Roman Catholic Church, and every other religious society, orders and manages

its own affairs independently (*selbstständig*).¹ The Catholics had the benefit of this law until the beginning of the Kulturkampf, but among the Protestants, the ruling orthodox pietists, led by Hengstenberg, were determined that no freedom should be given to any other party. They evaded the law by a new theory, viz, the king being the *præcipuum membrum ecclesie*, i. e. the chief member of the Church, rules it by an inherent right which no law can take from him; in fact Par. 15 makes the territorial lord quite independent of all State interference with his management of his own Church. The king himself did not favour this extraordinary doctrine. "Do I look like a bishop?" he said, pointing to his uniform and spurs. His ideal was "the small independent Christian community managing its own affairs in the spirit of the universal Church" as in the days of the Apostles. The ideal of his minister von Raumer and of Hengstenberg was to train Prussian *Unterthanenverstand*, i. e. a mentality fit for people under strict authority: believe in Luther, obey the king, and ask no questions. The alliance of politics, Lutheran orthodoxy and pietism, royal cabinet-orders and counter-orders, general unsettledness and discontent, and five authorized churches instead of one — such was the result of the Union of 1817 in the fourth decade of its existence. Many attempts at a more real and more general union were made on the basis of practical charity, federation, opposition to Catholicism; church conferences were held in Berlin, Wittenberg, Eisenach, and elsewhere; the Gustav-Adolf-Verein and the Inner Mission were founded; the English Evangelical Alliance was invited to Berlin (1857). The result was greater discord and disruption.

William I, who as Regent, King of Prussia, and German Emperor reigned from 1858 to 1888, was an honest, single-minded, and industrious ruler. He had little sympathy with the Constitution and none at all with Hengstenberg's agitation for enforcing Lutheran orthodoxy. He maintained the Constitution as the law of the land. But of the orthodox party he said in an address to his newly constituted ministry: ". . . In both Churches [Catholic and Protestant] all endeavours to make religion a cloak for politics must be strenuously opposed. In the Evangelical Church — we cannot deny it — an orthodoxy has found a footing which is in contradiction with the fundamental idea of the Union, and which has hypocrites in its train. That orthodoxy has impeded the work of the Union has almost wrecked it. Now it is my will that the Union be maintained intact . . ." Until 1866, however, little was done to carry out William's programme; it was impossible and unadvisable to dismiss all the clerical office-bearers and professors appointed for their opinions during the last eighteen years. The new minister of worship, von Muehler, was dominated by Queen Augusta, a highly educated woman devoted to orthodoxy, who suggested candidates for higher positions and insisted on their appointment (Hase, *Neue Kircheng.*, 305). By her stood Hengstenberg and Hoffman, a fanatical Swabian. Together they worked for the preservation of the old

regime. The Liberal party meanwhile found a common centre and a driving power in the *Protestantenverein* (Protestant Union), founded in 1863 at Frankfort-on-the-Main with the object of defeating both Protestant and Catholic orthodoxy. It spread at first but slowly, as it found little support among the still faithful masses and met with open hostility among the ruling classes, in 1906 it numbered 27,000 members.

After the war with Austria (1866) the acquisition of new territories laid upon William I the task of again regulating the religious situation of his kingdom. The Hengstenberg party proposed a measure which would have dealt the death-blow to the Union, viz, to divide the Supreme Church Council into three senates: a Lutheran, a Reformed, and a United, each with circumscribed territorial jurisdiction. But the Supreme Council refused to take this step and persuaded the king to leave to the new provinces their existing church constitutions as long as they chose to maintain them. This was done. To a deputation from the Hanover Consistory William I expressed his Conviction that "the Evangelical Union was best furthered by free and unprejudiced hearts working towards unity in charity." The slight difficulties which arose locally, e. g. in Hesse, were probably due as much to political as to religious sentiments. The political unity of Germany achieved through the Franco-German War (1870-71) naturally aroused a strong desire for religious unity in the new empire. Bismarck started the *Kulturkampf* to bring the Catholics into line with the Protestant majority, but had to acknowledge himself vanquished in 1886. For the unification of the Protestants in the empire only one way was open: to abolish legal pressure and to allow the various religious bodies to work out their own salvation in their own way. The emperor, however, was loath to dismiss at once the ministers and officials who had so faithfully stood by him in the war; von Muehler retained his post and Empress Augusta her influence; the old system continued for a while with but slight concessions to liberty. The relation between the State and the Evangelical Church was finally fixed by the laws of 10 Sept., 1873, and 30 May, 1876. At the head of the whole organization stands the Supreme Ecclesiastical Council (*Oberkirchenrat*) in Berlin, consisting of twelve regular members, one ecclesiastical vice-president, and a lay president. Under this council are eight provincial consistories, Königsberg, Berlin, Stettin, Breslau, Posen, Magdeburg, Münster, and Coblenz; and under them the superintendents numbering 415. In the Evangelical State Church the two types of Protestantism are united; no distinction is made between Lutheran and Reformed either in the theological faculties or in the seminaries. Luther's Bible is in common use, the various collections of hymns have no denominational character. The emperor, or King of Prussia, is *summus episcopus*, which, however, is a title rather than an office. In matters of faith the royal pronouncements neither claim, nor are they credited with, infallibility; and matters of administration are left to the councils and consistories elected by the people.

The doctrinal status of the United Evangelical Church in Germany may be fitly described as Modernism in the sense of the Encyclical "Pascendi". The simple country folk, who practise more than they think, still follow the religion of older generations, but the socialist masses of the towns are either indifferent or openly hostile to all supernatural religion. Owing to the principle sanctioned in 1648 "that all the subjects must follow the religion of their ruler" the population, from a religious point of view, is less mixed in Germany than in England or America. Numerically, the two confessions are in the same proportion as they were 300 years ago: two Protestants to one Catholic. Conversions from one religion to the other almost balance with a slight excess in favour of Protestantism. This is entirely due to mixed marriages and temporal allurements. The efforts of proselytizing societies, such as the Gustav-Adolf-Verein, the Protestant and the Evangelical Unions, show but poor results. Statistics from the census of 1900 are as follows: Evangelical Church in Prussia: 8158 parishes with 17,246 churches, etc., 10,071 clergy, and 21,817,577 adherents against 12,110,229 Catholics, which gives the proportion of 5 Catholics to 9 Protestants. For the whole German Empire the proportion is 7 Catholics to 12 Protestants, i. e. 20,321,441 to 35,231,104.

No English work deals exhaustively with the subject. Jahrh.* (Leipzig, 1892), 299-308; HERGENRÖTHER, *Kirchengesch.* (Freiburg, 1886), III, 919 sqq.; DÖLLINGER, *Kirche u. Kirchen*, 422 sqq.; tr. MACCABE (London, 1862).

J. WILHELM

Evangelist

Evangelist

In the New Testament this word, in its substantive form, occurs only three times: Acts, xxi, 8; Eph., iv, 11; II Tim., iv, 5. It seems to indicate not so much an order in the early ecclesiastical hierarchy as a function. The Apostles, indeed, were evangelists, inasmuch as they preached the Gospel (Acts, viii, 25; xiv, 20; I Cor., i, 17); Philip likewise was both a deacon (Acts, vi, 5) and an evangelist (Acts, viii, 4-5; 40; xxi, 8); in like manner was St. Timothy exhorted by St. Paul to do the work of an evangelist (II Tim., iv, 5).

From the various statements contained in the New Testament, we may gather with some probability that evangelists were travelling missionaries, occasionally solemnly set apart, as seems to have been the case with Sts. Paul and Barnabas (Acts, xiii, 1-3), to go about and preach the Gospel, yet sometimes with a settled place of abode, as

Philip at Cæsarea, and Timothy at Ephesus. They were endowed with a special *charisma* to preach to those unacquainted with the Christian Faith and pave the way for the more thorough and systematic work of the pastors and teachers. But their office, as such, seems to have extended no further, so, for instance, we understand from Acts, viii, 4 sqq., that Philip, who preached successfully in Samaria and baptized many, was not qualified to impart the Holy Ghost to the converts (verse 14). Accordingly, St. Paul, in his list of the gifts bestowed by Christ for the edification of the Church, Eph., iv, 11 (in I Cor., xii, 28, they are omitted), mentions the evangelists in the third place, only after the Apostles and the Prophets. In the writings of the Apostolic Fathers, no reference is made to evangelists; travelling missionaries are sometimes called "apostles", sometimes also, as in the Didache, they are styled "teachers".

In the later ecclesiastical literature the word *evangelist*, perhaps sporadically still used for some time in its old sense (Euseb., Hist. Eccl., V, x), received in most parts of the Church, another meaning. Applied occasionally to the reader in the Liturgy (Apost. Const., III), even to the deacon (Lit. of St. John Chrysost., P.G., LXIII, 910), it became gradually confined to the writers of the Four Gospels (Euseb., Hist. Eccl., III, xxxix, etc.). It is exclusively in this sense that common modern parlance employs it.

As early as the second century, Christian writers sought in Ezechiel's vision (i, 5 sqq.) and in Apoc. (iv, 6-10) symbolical representations of the Four Evangelists. The system which finally prevailed in the Latin Church, consisted in symbolizing St. Matthew by a man, St. Mark by a lion, St. Luke by an ox, and St. John by an eagle (see **Symbolism**). It is fully explained by St. Jerome (In Ezech., i, 7) and had been adopted by St. Ambrose (Expos. Ev. S. Luc., Proœ;m.), St. Gregory the Great (In Ezech., Hom. I, iv, 1), and others. St. Irenæus, on the one hand, and Augustine, followed by the Venerable Bede, on the other, had devised different combinations. Christian artists followed in the footsteps of the ecclesiastical writers, and made use, in different manners, of the four traditional figures to represent the Evangelists. Among the most remarkable works of this description it will suffice here to mention only the old mosaics of the churches of S. Pudentiana, S. Sabina, S. Maria Maggiore, and S. Paolo fuori le Mura, at Rome.

Charles L. Souvay

Evaristus, Saint and Pope

Pope St. Evaristus

Date of birth unknown; died about 107. In the Liberian Catalogue his name is given as Aristus. In papal catalogues of the second century used by Irenaeus and Hippolytus, he appears as the fourth successor of St. Peter, immediately after St. Clement. The same lists allow him eight years of reign, covering the end of the first and the beginning of the second century (from about 98 or 99 to about 106 or 107). The earliest historical sources offer no authentic data about him. In his "Ecclesiastical History" Eusebius says merely that he succeeded Clement in the episcopate of the Roman Church which fact was already known from St. Irenaeus. This order of succession is undoubtedly correct. The "Liber Pontificalis" says that Evaristus came of a Hellenic family, and was the son of a Bethlehem Jew. It also attributes to him the allotment of definite churches as *tituli* to the Roman presbyters, and the division of the city into seven *di-conias* or deaconries; in this statement, however, the "Liber Pontificalis" arbitrarily refers to the time of Evaristus a later institution of the Roman Church. More trustworthy is the assertion of the "Liber Pontificalis" that he was laid to rest *in Vaticano*, near the tomb of St. Peter. The martyrdom of Evaristus, though traditional, is not historically proven. His feast occurs 26 Oct. The two decretals ascribed to him by Pseudo-Isidore are forged.

J. P. KIRSCH

Eve

Eve

(Heb. *hawwah*).

The name of the first woman, the wife of Adam, the mother of Cain, Abel, and Seth. The name occurs only five times in the Bible. In Gen., iii, 20, it is connected etymologically with the verb meaning "to live": "And Adam called the name of his wife Eve [*hawwah*]: because she was the mother of all the living". The Septuagint rendering in this passage is *Zoe* (=life, or life-giver), which is a translation; in two other passages (Gen., iv, 1 and 25) the name is transliterated *Eua*. The Biblical data concerning Eve are confined almost exclusively to the second, third, and fourth chapters of Genesis (see ADAM).

The first account of the creation (Gen. i, "P") sets forth the creation of mankind in general, and states simply that they were created male and female. The second nar-

rative (Gen., ii, "J") is more explicit and detailed. God is represented as forming an individual man from the slime of the earth, and breathing into his nostrils the breath of life. In like manner the creation of the first woman and her relation to man is described with picturesque and significant imagery. In this account, in which the plants and animals appear on the scene only after the creation of man, the loneliness of the latter (Gen., ii, 18), and his failure to find a suitable companion among the animals (Gen., ii, 20), are set forth as the reason why God determines to create for man a companion like unto himself. He causes a deep sleep to fall upon him, and taking out one of the ribs, forms it into a woman, who, when she is brought to him, is recognized at once as bone of his bone and flesh of his flesh. A discussion of the arguments in favor of the historical, or the more or less allegorical character of this narrative would be beyond the scope of the present notice. Suffice it to say that the biblical account has always been looked upon by pious commentators as embodying, besides the fact of man's origin, a deep, practical and many-sided significance, bearing on the mutual relationship established between the sexes by the Creator.

Thus, the primitive institution of monogamy is implied in the fact that one woman is created for one man. Eve, as well as Adam, is made the object of a special creative act, a circumstance which indicates her natural equality with him, while on the other hand her being taken from his side implies not only her secondary rôle in the conjugal state (I Cor., xi, 9), but also emphasizes the intimate union between husband and wife, and the dependence of the latter on the former "Wherefore a man shall leave father and mother, and shall cleave to his wife: and they shall be two in one flesh." The innocence of the newly created couple is clearly indicated in the following verse, but the narrator immediately proceeds to relate how they soon acquired, through actual transgression, the knowledge of good and evil, and with the sense of shame which had been previously unknown to them. In the story of the Fall, the original cause of evil is the serpent, which in later Jewish tradition is identified with Satan (Wisdom, ii, 24). He tempts Eve presumably as the weaker of the two, and she in turn tempts Adam, who yields to her seduction. Immediately their eyes are opened, but in an unexpected manner. Shame and remorse take possession of them, and they seek to hide from the face of the Lord.

For her share in the transgression, Eve (and womankind after her) is sentenced to a life of sorrow and travail, and to be under the power of her husband. Doubtless this last did not imply that the woman's essential condition of equality with man was altered, but the sentence expresses what, in the nature of things, was bound to follow in a world dominated by sin and its consequences. The natural dependence and subjection of the weaker party was destined inevitably to become something little short of slavery. But if woman was the occasion of man's transgression and fall, it was also

decreed in the Divine counsels, that she was to be instrumental in the scheme of restoration which God already promises while in the act of pronouncing sentence upon the serpent. The woman has suffered defeat, and infinitely painful are its consequences, but henceforth there will be enmity between her and the serpent, between his seed and her seed, until through the latter in the person of the future Redeemer, who will crush the serpent's head, she will again be victorious.

Of the subsequent history of Eve the Bible gives little information. In Gen., iv, 1, we read that she bore a son whom she named Cain, because she got him (literally, "acquired" or "possessed") through God--this at least is the most plausible interpretation of this obscure passage. Later she gave birth to Abel, and the narrative does not record the birth of another child until after the slaying of Abel by his older brother, when she bore a son and called his name Seth; saying: "God hath given me [literally, "put" or "appointed"] another seed, for Abel whom Cain slew".

Eve is mentioned in the Book of Tobias (viii, 8; Sept., viii, 6) where it is simply affirmed that she was given to Adam for a helper; in II Cor., xi, 3, where reference is made to her seduction by the serpent, and in I Tim., ii, 13, where the Apostle enjoins submission and silence upon women, arguing that "Adam was first formed; then Eve. And Adam was not seduced, but the woman being seduced, was in the transgression".

As in the case of the other Old Testament personages, many rabbinical legends have been connected with the name of Eve. They may be found in the "Jewish Encyclopedia", s.v. (see also, ADAM), and in Vigouroux, "Dictionnaire de la Bible", I, art. "Adam". They are, for the most part, puerile and fantastic, and devoid of historical value, unless in so far as they serve to illustrate the mentality of the later Jewish writers, and the unreliability of the "traditions" derived from such sources, though they are sometimes appealed to in critical discussions.

JAMES F. DRISCOLL

Eve of a Feast

Eve of a Feast

(Or VIGIL; Lat. *Vigilia*; Gr. *pannychis*).

In the first ages, during the night before every feast, a vigil was kept. In the evening the faithful assembled in the place or church where the feast was to be celebrated and prepared themselves by prayers, readings from Holy Writ (now the Offices of Vespers

and Matins), and sometimes also by hearing a sermon. On such occasions, as on fast days in general, Mass also was celebrated in the evening, before the Vespers of the following day. Towards morning the people dispersed to the streets and houses near the church, to wait for the solemn services of the forenoon. This vigil was a regular institution of Christian life and was defended and highly recommended by St. Augustine and St. Jerome (see Pleithner, "Aeltere Geschichte des Breviergebetes", pp. 223 sq.). The morning intermission gave rise to grave abuses; the people caroused and danced in the streets and halls around the church (Durandus, "Rat. Div. off.", VI, 7). St. Jerome speaks of these improprieties (Epist. ad Ripuarium).

As the feasts multiplied, the number of vigils was greatly reduced. But the abuses could be stopped only by abolishing the vigils. And where they could not be abrogated at once and entirely they were to begin in the afternoon. A synod held at Rouen in 1231 prohibited all vigils except those before the patronal feast of a church (Hefele, "Conciliengeschichte", V, 1007). In place of nocturnal observances, the bishops introduced for the laity a fast on the day before the feast, which fast Durandus (loc. cit.) calls "jejunium dispensationis". Honorius of Auxerre, in 1152 (Gemma Animae, III, 6), and others explain in this way the origin of this fast. It existed, however, long before the abolition of the nocturnal meetings. The fast on Christmas Eve is mentioned by Theophilus of Alexandria (d. 412), that before the Epiphany by St. John Chrysostom (d. 407), that before Pentecost by the Sacramentary of St. Leo I. Pope Nicholas I (d. 867), in his answer to the Bulgarians, speaks of the fast on the eves of Christmas and of the Assumption. The Synod of Erfurt (932) connects a fast with every vigil. The very fact that the people were not permitted to eat or drink before the services of the vigil (Vespers and Matins) were ended, after midnight, explains the excesses of which the councils and writers speak.

The Synod of Seligenstadt (1022) mentions vigils on the eves of Christmas, Epiphany, the feast of the Apostles, the Assumption of Mary, St. Laurence, and All Saints, besides the fast of two weeks before the Nativity of St. John. After the eleventh century the fast, Office, and Mass of the nocturnal vigil were transferred to the day before the feast; and even now [1909] the liturgy of the Holy Saturday (vigil of Easter) shows, in all its parts, that originally it was not kept on the morning of Saturday, but during Easter Night. The day before the feast was henceforth called vigil. A similar celebration before the high feast exists also in the Orthodox (Greek) Church, and is called *pannychis* or *hagrypnia*. In the Occident only the older feasts have vigils; even the feasts of the first class introduced after the thirteenth century (Corpus Christi, the Sacred Heart) have no vigils, except the Immaculate Conception, which Pope Leo XIII (30 Nov., 1879) singled out for this distinction. The number of vigils in the Roman Calendar besides Holy Saturday is seventeen, viz., the eves of Christmas, the Epiphany, the As-

cension, Pentecost, the Immaculate Conception, the Assumption, the eight feasts of the Apostles, St. John the Baptist, St. Laurence, and All Saints. Some dioceses and religious orders have particular vigils, e.g. the Servites, on the Saturday next before the feast of the Seven Dolours of Our Lady; the Carmelites, on the eve of the feast of Mount Carmel. In the United States only four of these vigils are fast days: the vigils of Christmas, Pentecost, the Assumption, and All Saints.

The vigils of Christmas, the Epiphany, and Pentecost are called *vigiliae majores*; they have a proper Office (semi-double), and the vigil of Christmas, from Lauds on, is kept as a double feast. The rest are *vigiliae minores*, or *communes*, and have the ferial office. On the occasion of the reform of the Breviary, in 1568, a homily on the Gospel of the vigil was added, an innovation not accepted by the Cistercians. If a vigil falls on a Sunday, according to the present rubrics, it is kept on the preceding Saturday; during the Middle Ages in many churches it was joined to the Sunday Office. If it occurs on a double or a semi-double feast, it is limited to a commemoration in the Lauds and Mass (a feast of the first class excludes this commemoration), the ninth lesson in the Breviary, and the last Gospel in Mass. If it occurs on a day within an ordinary octave, the Mass is said of the vigil, the Office of the octave; if it occurs on a *feria major*, the vigil is omitted in the Breviary and commemorated only in the Mass, if the *feria* has a proper mass; if not (e.g. in Advent), the mass is said of the vigil, the *feria* is commemorated. In the Ambrosian Liturgy of Milan only the vigils of Christmas and Pentecost are kept, at least by a special Mass; the other vigils exist only in the Calendar, but are not kept in the liturgy. In the Mozarabic Rite only Christmas has a vigil; three days before Epiphany and four days before Pentecost a fast is observed; the other vigils are unknown.

F.G. HOLWECK

Evesham Abbey

Evesham Abbey

Founded by St. Egwin, third Bishop of Worcester, about 701, in Worcestershire, England, and dedicated to the Blessed Virgin. The founder's charter of endowment, dated 714, records that a herdsman of the bishop, named Eoves, was one day favoured with a vision of Our Lady. St. Egwin, being informed, visited the spot and there the Mother of God appeared to him also, commanding him to erect in that place a mon-

astery in her honour for Benedictine monks. The bishop at once set about the task, being liberally assisted in the work by Ethelred and Kenred, successive kings of Mercia, and others. The derivation of the name Evesham is accounted for by the above legend. It is stated, though contemporary charters make the fact doubtful, that St. Egwin resigned his see in order to become first abbot of the new foundation, which he ruled until his death in 717. He was buried in the abbey church and his shrine, beautified by subsequent abbots, became in after years one of the richest and most popular in the West of England, and many miracles are recorded as having taken place there. In 941, after the havoc wrought by the Danes, the few remaining monks who had survived were ejected and secular canons installed in their place. Their possession of the abbey, however, did not last long, for in 960 St. Dunstan and St. Ethelwold, then engaged upon their great reform of the English monasteries, restored the Benedictines to their own. A second expulsion occurred in 977 and it was not until 1014 that the monks effected their final return. With the Norman conquest and the consolidation of the kingdom of England, Evesham grew and prospered, and enjoying royal favour became one of the most important abbeys of Black Monks in the country, so much so, indeed, that the jealousy of the bishops of Worcester was aroused.

As in the case of many other monasteries they claimed rights of visitation and diocesan authority over the monks. The dispute continued for a long time, but eventually the exemption from episcopal jurisdiction, originally obtained by St. Egwin, was confirmed by Rome in 1206. In this as in other matters, the internal history of the abbey, as recorded in the "Evesham Chronicle", differs only in detail from that of any other great Benedictine house of the same period. A succession of worthy abbots, seldom broken, guided its fortunes wisely and religiously through the eight centuries of its existence. The use of abbatial *pontificalia* was obtained in 1160 by Abbot Adam from the reigning pope. At the height of its prosperity the abbey was one of the largest and most stately in England. It had two dependent "cells" — Penwortham, in Lancashire, and Alcester, in Warwickshire — besides another in Denmark; the abbots were also the patrons of seventeen neighbouring parishes; they had a seat in the House of Lords; and they exercised civil jurisdiction within the bounds of the monastic territory. The great abbey church, which, besides the magnificent shrine of St. Egwin, contained fifteen altars, was commenced in the eleventh century by Abbot Walter and gradually completed by several subsequent abbots. It was cruciform, with a central tower, and was nearly 300 feet in length. The previous campanile having fallen, after being struck by lightning, a magnificent bell tower, still standing, was built by Abbot Clement Lichfield about 1533.

Within the abbey precincts and under the very shadow of its minster, were two parish churches, erected by the monks for the use of the people of the town which had

grown up around its walls. That of St. Lawrence dates from the thirteenth century and that of All Saints is of a century later. The last of the great abbots of Evesham, Clement Lichfield, who reigned from 1514 to 1539, added chantries to both of these churches. Unwilling to yield to the rapacity of Henry VIII, when the suppression of the monasteries was threatening, he resigned his abbacy, acting, it is said, at Cromwell's suggestion. His unworthy successor was Philip Hawford, who surrendered the abbey into the king's hands in the same year, 1539. For this service he was rewarded with a pension of £240, and afterwards became first Protestant Dean of Worcester, in which cathedral his tomb may still be seen. The revenues of the abbey at the time of its suppression are given by Dugdale as £1183. The demolition of the buildings commenced almost immediately, and the ruins became, as in the case of so many others, a stone quarry for the neighbourhood. Besides the two parish churches and the bell tower, only a gateway, a cloister arch, the almonry, and a few other isolated fragments remain intact to show what manner of building the once glorious abbey of Evesham was.

G. CYPRIAN ALSTON.

Evil

Evil

Evil, in a large sense, may be described as the sum of the opposition, which experience shows to exist in the universe, to the desires and needs of individuals; whence arises, among human beings at least, the sufferings in which life abounds. Thus evil, from the point of view of human welfare, is what ought not to exist. Nevertheless, there is no department of human life in which its presence is not felt; and the discrepancy between what is and what ought to be has always called for explanation in the account which mankind has sought to give of itself and its surroundings. For this purpose it is necessary (1) to define the precise nature of the principle that imparts the character of evil to so great a variety of circumstances, and (2) to ascertain, as far as may be possible, the source from which it arises.

With regard to the nature of evil, it should be observed that evil is of three kinds -- physical, moral, and metaphysical. *Physical* evil includes all that causes harm to man, whether by bodily injury, by thwarting his natural desires, or by preventing the full development of his powers, either in the order of nature directly, or through the

various social conditions under which mankind naturally exists. Physical evils directly due to nature are sickness, accident, death, etc. Poverty, oppression, and some forms of disease are instances of evil arising from imperfect social organization. Mental suffering, such as anxiety, disappointment, and remorse, and the limitation of intelligence which prevents human beings from attaining to the full comprehension of their environment, are congenital forms of evil each vary in character and degree according to natural disposition and social circumstances.

By *moral* evil are understood the deviation of human volition from the prescriptions of the moral order and the action which results from that deviation. Such action, when it proceeds solely from ignorance, is not to be classed as moral evil, which is properly restricted to the motions of will towards ends of which the conscience disapproves. The extent of moral evil is not limited to the circumstances of life in the natural order, but includes also the sphere of religion, by which man's welfare is affected in the supernatural order, and the precepts of which, as depending ultimately upon the will of God, are of the strictest possible obligation (see SIN). The obligation to moral action in the natural order is, moreover, generally believed to depend on the motives supplied by religion; and it is at least doubtful whether it is possible for moral obligation to exist at all apart from a supernatural sanction.

Metaphysical evil is the limitation by one another of various component parts of the natural world. Through this mutual limitation natural objects are for the most part prevented from attaining to their full or ideal perfection, whether by the constant pressure of physical condition, or by sudden catastrophes. Thus, animal and vegetable organisms are variously influenced by climate and other natural causes; predatory animals depend for their existence on the destruction of life; nature is subject to storms and convulsions, and its order depends on a system of perpetual decay and renewal due to the interaction of its constituent parts. If animals suffering is excluded, no pain of any kind is caused by the inevitable limitations of nature; and they can only be called evil by analogy, and in a sense quite different from that in which the term is applied to human experience. Clarke, moreover, has aptly remarked (Correspondence with Leibniz, letter ii) that the apparent disorder of nature is really no disorder, since it is part of a definite scheme, and precisely fulfills the intention of the Creator; it may therefore be counted as a relative perfection rather than an imperfection. It is, in fact, only by a transference to irrational objects of the subjective ideals and aspirations of human intelligence, that the "evil of nature" can be called evil in any sense but a merely analogous one. The nature and degree of pain in lower animals is very obscure, and in the necessary absence of data it is difficult to say whether it should rightly be classed with the merely formal evil which belongs to inanimate objects, or with the suffering of human beings. The latter view was generally held in ancient times, and may perhaps

he referred to the anthropomorphic tendency of primitive minds which appears in the doctrine of metempsychosis. Thus it has often been supposed that animal suffering, together with many of the imperfections of inanimate nature, was due to the fall of man, with whose welfare, as the chief part of creation, were bound up the fortunes of the rest (see Theoph. Antioch., Ad Autolyc., II; cf. Gen. iii, and I Cor. ix). The opposite view is taken by St. Thomas (I, Q. xcvi, a. 1,2). Descartes supposed that animals were merely machines, without sensation or consciousness; he was closely followed by Malebranche and Cartesians generally. Leibniz grants sensation to animals, but considers that mere sense-perception, unaccompanied by reflexion, cannot cause either pain or pleasure; in any case he holds the pain and pleasure of animals to be parable in degree to those resulting from reflex action in man (see also Maher, Psychology, Supp't. A., London, 1903).

It is evident again that all evil is essentially negative and not positive; i.e. it consists not in the acquisition of anything, but in the loss or deprivation of something necessary for perfection. Pain, which is the test or criterion of physical evil, has indeed a positive, though purely subjective existence as a sensation or emotion; but its evil quality lies in its disturbing effector the sufferer. In like manner, the perverse action of the will, upon which moral evil depends, is more than a mere negation of right action, implying as it does the positive element of choice; but the morally evil character of wrong action is constituted not by the element of choice, but by its rejection of what right reason requires. Thus Origen (In Joh., ii, 7) defines evil as *stéresis*; the Pseudo-Dionysius (De. Div. Nom. iv) as the non-existent; Maimonides (Dux perplex. iii, 10) as "privato boni alicujus"; Albertus Magnus (adopting St. Augustine's phrase) attributes evil to "aliqua causa *deficiens*" (Summa Theol., I, xi, 4); Schopenhauer, who held pain to be the positive and normal condition of life (pleasure being its partial and temporary absence), nevertheless made it depend upon the failure of human desire to obtain fulfillment--"the wish is in itself pain". Thus it will be seen that evil is not a real entity; it is relative. What is evil in some relations may be good in others; and probably there is no form of existence which is exclusively evil in all relations, Hence it has been thought that evil cannot truly be said to exist at all, and is really nothing but a "lesser good." But this opinion seems to leave out of account the reality of human experience. Though the same cause may give pain to one, and pleasure to another, pain and pleasure, as sensations or ideas, cannot but be mutually exclusive. No one, however, has attempted to deny this very obvious fact; and the opinion in question may perhaps be understood as merely a paradoxical way of stating the relativity of evil.

There is practically a general agreement of authorities as the nature of evil, some allowance being made for varying modes of expression depending on a corresponding variety of philosophical presuppositions. But on the question of the origin of evil there

has been, and is a considerable diversity of opinion. The problem is strictly a metaphysical one; i.e. it cannot be solved by a mere experimental analysis of the actual conditions from which evil results. The question, which Schopenhauer has called "the *punctum pruriens* of metaphysics", is concerned not so much with the various detailed manifestations of evil in nature, as with the hidden and underlying cause which has made these manifestations possible or necessary; and it is at once evident that enquiry in a region so obscure must be attended with great difficulty, and that the conclusions reached must, for the most part be of a provisional and tentative character. No system of philosophy has ever succeeded in escaping from the obscurity in which the subject is involved; but it is not too much to say that the Christian solution offers, on the whole, fewer difficulties, and approaches more nearly to completeness than any other. The question may be stated thus. Admitting that evil consists in a certain relation of man to his environment, or that it arises in the relation of the component parts of the totality of existence to one another, how comes it that though all are alike the results of a universal cosmic process, this universal agency is perpetually at war with itself, contradicting and thwarting its own efforts in the mutual hostility of its progeny? Further, admitting that metaphysical evil in itself may be merely nature's method, involving nothing more than a continual redistribution of the material elements of the universe, human suffering and wrongdoing still and out as essentially opposed to the general scheme of natural development, and are scarcely to be reconciled in thought with any conception of unity or harmony in nature. To what, then, is the evil of human life, physical and moral, to be attributed as its cause? But when the universe is considered as the work of an all-benevolent and all-powerful Creator, a fresh element is added to the problem. If God is all-benevolent, why did He cause or permit suffering? If He is all-Powerful, He can be under no necessity of creating or permitting it; and on the other hand, if He is under any such necessity, He cannot be all-powerful. Again, if God is absolutely good, and also omnipotent, how can He permit the existence of moral evil? We have to enquire, that is to say, how evil has come to exist, and what is its special relation to the Creator of the universe.

The solution of the problem has been attempted by three different methods.

I. It has been contended that existence is fundamentally evil; that evil is the active principle of the universe, and good no more than an illusion, the pursuit of which serves to induce the human race to perpetuate its own existence (see PESSIMISM). This is the fundamental tenet of Buddhism (q.v.), which regards happiness as unattainable, and holds that there is no way of escaping from misery but by ceasing to exist otherwise than in the impersonal state of Nirvana. The origin of suffering, according to Buddha, is "the thirst for being". This was also, among Greek philosophers, the view of Hegesias the Cyrenaic (called *peisithánatos*, the counsellor of death), who held life

to be valueless, and pleasure, the only good, to be unattainable. But the Greek temper was naturally disinclined to a pessimistic view of nature and life; and while popular mythology embodied the darker aspects of existence in such conceptions as those of Fate, the avenging Furies, and the envy (*phthónos*) of the gods, Greek thinkers, as a rule, held that evil is universally supreme, but can be avoided or overcome by the wise and virtuous.

Pessimism, as a metaphysical system, is the product of modern times. Its chief representatives are Schopenhauer and Von Hartmann, both of whom held the actual universe to be fundamentally evil, and happiness it to be impossible. The origin of the phenomenal universe is attributed by Schopenhauer to a transcendental Will, which he identifies with pure being; and by Hartmann to the unconscious, which includes both the Will and the Idea (*Vorstellung*) of Schopenhauer. According to both Schopenhauer and Hartmann, suffering has come into existence with self-consciousness, from which it is inseparable.

II. Evil has been attributed to one of two mutually opposed principles, to which respectively the mingled good and evil of the world are due. The relation between the two is variously represented, and ranges from the co-ordination imagined by Zoroastrianism to the mere relative independence of the created will as held by Christian theology. Zoroaster attributed good and evil respectively to two mutually hostile principles (*hrízai*, or *árchai*) called Ormuzd (Ahura Mazda) and Ahriman (Angra Mainyu). Each was independent of the other; but eventually the good were to be victorious with Ormuzd, and Ahriman and his evil followers were to be expelled from the world. This mythological dualism passed to the sect of the Manichees, whose founder, Manes, added a third, but subordinate principle, emanating from the source of good (and perhaps corresponding, in some degree, to the Mithras of Zoroastrianism), in the "living spirit", by whom was formed the present material world of mingled good and evil. Manes held that matter was essentially evil, and therefore could not be in direct contact with God. He probably derived the notion from the Gnostic sects, which, though they differed on many points from one another, were generally agreed in following the opinion of Philo, and the neo-Platonist Plotinus, as the evil of matter. They held the world to have been formed by an emanation, the Demiurge, as a kind of intermediary between God and impure matter. Bardesanes, however, and his followers regarded evil as resulting from the misuse of created free will.

The notion that evil is necessarily inherent in matter, independent of the Divine author of good, and in some sense opposed to Him, is common to the above theosophical systems, to many of the purely rational conceptions of Greek philosophy, and to much that has been advanced on this subject in later times. In the Pythagorean idea of a numerical harmony as the constitutive principle of the world, good is represented

by unity and evil by multiplicity (Philolaus, Fragm.) Heraclitus set the "strife", which he held to be the essential condition of life, over against the action deity. "God is the author of all that is right and good and just; but men have sometimes chosen good and sometimes evil" (Fragm. 61). Empedocles, again, attributed evil to the principle of hate (*neikos*), inherent together with its opposite, love (*philia*), in the universe. Plato held God to be "free from blame" (*anaítios*) for the evil of the world; its cause was partly the necessary imperfection of material and created existence, and partly the action of the human will (Timeaus, xlii; cf. Phaedo. lx). With Aristotle, evil is a necessary aspect of the constant changes of matter, and has in itself no real existence (Metaph., ix, 9). The Stoics conceived evil in a somewhat similar manner, as due to necessity; the immanent Divine power harmonizes the evil and good in a changing world. Moral evil proceeds from the folly of mankind, not from the Divine will, and is overruled by it to a good end. In the hymn of Cleanthes to Zeus (Ston. Ecl., 1, p.30) may be perceived an approach to the doctrine of Leibniz, as to the nature of evil and the goodness of the world. "Nothing is done without thee in earth or sea or sky, save what evil men commit by their own folly; so thou hast fitted together all evil and good in one, that there might be one reasonable and everlasting scheme of all things." In the mystical system of Eckhart (d. 1329), evil, sin included, has its place in the evolutionary scheme by which all proceeds from and returns to God, and contributes, both in the moral order and in the physical, to the accomplishment of the Divine purpose. Eckhart's monistic or pantheistic tendencies seem to have obscured for him many of the difficulties of the subject, as has been the case with those by whom the same tendencies have since been carried to an extreme conclusion.

Christian philosophy has, like the Hebrew, uniformly attributed moral and physical evil to the action of created free will. Man has himself brought about the evil from which he suffers by transgressing the law of God, on obedience to which his happiness depended. Evil is in created things under the aspect of mutability, and possibility of defect, not as existing *per se*: and the errors of mankind, mistaking the true conditions of its own well-being, have been the cause of moral and physical evil (Dion. Areop., De Div. Nom., iv, 31; St. Aug., De Civ. Dei. xii). The evil from which man suffers is, however, the condition of good, for the sake of which it is permitted. Thus, "God judged it better to bring good out of evil than to suffer no evil to exist" (St. Aug., Enchirid., xxvii). Evil contributes to the perfection of the universe, as shadows to the perfection of a picture, or harmony to that of music (De Civ. Dei, xi). Again, the excellence of God's works in nature is insisted on as evidence of the Divine wisdom, power, and goodness, by which no evil can be directly caused. (Greg. Nyss., De. opif. hom.) Thus Boethius asks (De Consol. Phil., I, iv) Who can be the author of good, if God is the author of evil? As darkness is nothing but the absence of light, and is not produced by

creation, so evil is merely the defect of goodness. (St. Aug., *In Gen. as lit.*) St. Basil (*Hexaem.*, *Hom. ii*) points out the educative purposes served by evil; and St. Augustine, holding evil to be permitted for the punishment of the wicked and the trial of the good, shows that it has, under this aspect, the nature of good, and is pleasing to God, not because of what it is, but because of where it is; i.e. as the penal and just consequence of sin (*De Civ. Dei*, XI, xii, *De Vera Relig.* xliv). Lactantius uses similar arguments to oppose the dilemma, as to the omnipotence and goodness of God, which he puts into the mouth of Epicurus (*De Ira Dei*, xiii). St. Anselm (*Monologium*) connects evil with the partial manifestation of good by creation; its fullness being in God alone.

The features which stand out in the earlier Christian explanation of evil, as compared with non-Christian dualistic theories are thus

- the definite attribution to God of absolute omnipotence and goodness, notwithstanding His permission of the existence of evil;
- the assignment of a moral and retributive cause for suffering in the sin of mankind; and
- the unhesitating assertion of the beneficence of God's purpose in permitting evil, together with the full admission that He could, had He so chosen, have prevented it (*De Civ. Dei*, xiv).

How God's permission of the evil which He foreknew and could have prevented is to be reconciled with His goodness, is not fully considered; St. Augustine states the question in forcible terms, but is content by way of answer to follow St. Paul, in his reference to the unsearchableness of the Divine judgments (*Contra Julianum*, I, 48).

The same general lines have been followed by most of the modern attempts to account in terms of Theism for the existence of evil. Descartes and Malebranche held that the world is the best possible for the purpose for which it was created, i. e. for the manifestation of the attributes of God. If it had been less fitted as a whole for the attainment of this object. The relation of evil to the will of a perfectly benevolent Creator was elaborately treated by Leibniz, in answer to Bayle, who had insisted on the arguments derived from the existence of evil against that of a good and omnipotent God. Leibniz founded his views mainly on those of St. Augustine and from St. Thomas, and deduced from them his theory of Optimism (q.v.). According to it, the inverse is the best possible; but metaphysical evil, or perfection, is necessarily involved in the constitution, since it must be finite, and could not have been endowed with the infinite perfection which belongs to God alone. Moral and physical evil are due to the fall of man, but all evil is overruled by God to a good purpose. Moreover, the world with

which we are acquainted is only a very small factor in the whole of creation, and it may be supposed that the evil it contains is necessary for the existence of other regions that are unknown to us. Voltaire in "Candide", undertook to throw ridicule at the idea of "best possible world"; and it must be admitted that the theory is open to grave objections. On the one hand, it is scarcely consistent with the belief in the Divine omnipotence; and on the other, it fails to account for the permission (or indirect authorship) of evil by a good God, to which Bayle had specially taken exception. We can not know that this world is the best possible; and if it were, why, since it must include so much that is evil, should a perfectly good God have created it? It may be urged, moreover, that there can be no degree of finite goodness which is not susceptible of increase by omnipotence, without ceasing to fall short of infinite perfection.

Leibniz has been more or less closely followed by many who have since treated the subject from the Christian point of view. These have, for the most part, emphasized the evidence in creation of the wisdom and goodness of its Author, after the manner of the Book of Job, and have been content to leave undiscovered the reason for the creation, by Him, of a universe in which evil is unavoidable. Such was the view of King (Essay on the Origin of Evil, London, 1732), who insisted strongly on the doctrine of the best possible world; of Cudworth, who held that evil, though inseparable from the nature of imperfect beings, is largely a matter of men's own fancy and opinions, rather than the reality of things, and therefore not to be made the ground of accusations against Divine Providence. Derham (Physico-Theology, London, 1712) took occasion from an examination of the excellence of creation to commend an attitude of humility and trust towards the creator of "this elegant, this well contrived, well formed world, in which we find everything necessary for the sustenance, use and pleasure both of man and every other creature here below; as well as some whips, some rods, to scourge us for our sins". Priestly held a doctrine of absolute determinism, and consequently attributed evil solely to the divine will; which, however, he justified by the good ends which evil is providentially made to subserve (Doctrine of Philosophical Necessity, Birmingham, 1782). Clarke, again, called special attention to the evidence of method of design, which bear witness to the benevolence of the Creator, in the midst of apparent moral and physical disorder. Rosmini, closely following Malebranche, pointed out that the question of the possibility of a better world than this has really no meaning; any world created by God must be the best possible in relation to its special purpose, apart from which neither goodness or badness can be predicated of it. Mamiani also supposed that evil be inseparable from the finite, but it tended to disappear as the finite approached its final union with the infinite.

III. The third way of conceiving the place of evil in the general scheme of existence is that of those systems of Monism, by which evil is merely viewed as a mode in which

certain aspects of moments of the development of nature are apprehended by human consciousness. In this view there is no distinctive principle to which evil can be assigned, and its origin is one with that of nature as a whole. These systems reject the specific idea of creation; and the idea of God is either rigorously excluded, or identified with an impersonal principle, immanent in the universe, or conceived as a mere abstraction from the methods of nature; which, whether viewed from the standpoint of materialism or that of idealism, is the one ultimate reality. The problem of the origin of evil is thus merged in that of the origin of being. Moral evil, in particular, arises from error, and is to be gradually eliminated, or at least minimized, by improved knowledge of the conditions of human welfare (Meliorism). Of this kind, of the whole, were the doctrines of the Ionic Hylozoists, whose fundamental notion was the essential unity of matter and life; and on the other hand, also, that of the Eleatics, who founded the origin of all things in abstract being. The Atomists Leucippus and Democritus, held what may be called a doctrine of materialistic Monism. This doctrine, however, found its first complete expression in the philosophy of Epicurus, which explicitly rejected the notion of any external influence on nature, whether of "fate", or of Divine power. According to the Epicurean Lucretius (*De Rerum Natura*, II, line 180) the existence of evil was fatal to the supposition of the creation of the world by God:

Nequaquam nobis divinitus esse creatum
Naturam mundi, quæ tanta est prædita culpa.

Giordano Bruno made God the immanent cause of all things, acting by an internal necessity, and producing the relations considered evil by mankind. Hobbes regarded God as merely a corporeal first cause; and applying his theory of civil government to the universe, defended the existence of evil by simple assertion of the absolute power to which it is due--a theory which is little else other than a statement of materialistic Determinism in terms of social relations. Spinoza united spirit and matter in the notion of a single substance, to which he attributed both thought and extension; error and perfection were the necessary consequence of the order of the universe. The Hegelian Monism, which reproduces many of the ideas of Eckhart, and is adopted in its main features by many different systems of recent origin, gives to evil a place in the unfolding of the Idea, in which Both the origin and inner reality of the universe are to be found. Evil is the temporary discord between what is and what ought to be. Huxley was content to believe the ultimate causes of things are at present unknown, and may be unknowable. Evil is to be known and combated in the concrete and in detail; but the Agnosticism professed, and named, by Huxley refuses to entertain any question as to transcendental causes, and confines itself to experimental facts. Haeckel advances a dogmatic materialism, in which substance (i. e. matter and force) appears as the eternal and in-

finite basis of all things. Professor Metchnikoff, on similar principles, places the cause of evil in "disharmonies" which prevail in nature, and which he thinks may perhaps be ultimately removed, for the human race at least, together with pessimistic temper arising from them, by the progress of science. Bourdeau has asserted in express terms the futility of seeking a transcendental or supernatural origin for evil and the necessity of confining the view to natural accessible, and determinable causes (*Revue Philosophique*, I, 1900).

The recently constructed system, or method, called Pragmatism, has this much in common with Pessimism, that it regards evil as a actually unavoidable part of that human experience which is in point of fact identical with truth and reality. The world is what we make it; evil tends to diminish with the growth of experience, and may finally vanish; though on the other hand, there may always remain the irreducible minimum of evil. The origin of evil is, like the origin of all things, inexplicable; it cannot be fitted into any theory of the design of the universe, simply because no such theory is possible. "We cannot by any possibility comprehend the character of the cosmic mind whose purpose are fully revealed by the strange mixture of good and evil that we find in this actual worlds particulars--the mere word *design*, by itself has no consequences and explains nothing." (James, *Pragmatism*, London, 1907. Cf. Schiller, *Humanism*, London 1907.) Nietzsche holds evil to be purely relative, and its moral aspects at least, a transitory and non-fundamental concept. With him, mankind in the present state, is "the animal not yet properly adapted to his environment". In this mode of thought the individual necessarily counts for very little, as being merely a transient manifestation of the cosmic force; and the social aspects of humanity are those under which its pains and shortcomings are mostly considered, with a view to their amelioration. Hence, the various forms of Socialism: The idea conceived by Nietzsche of a totally new, though as yet undefined, form of social morality, and of the constitution and mutual relations of classes; and the so called ethical and scientific religions inculcating morality as tending to be generally good. The first example of such religion was that of Auguste Comte, who upon the materialistic basis of Positivism, founded the "religion of humanity", and professed to substitute an enthusiasm for humanity as the motive for right action, for the motives of supernatural religion.

In the light of Catholic doctrine, any theory that may be held concerning evil must include certain points bearing on the question that have been authoritatively defined. These points are

- the omnipotence, omniscience, and absolute goodness of the Creator;
- the freedom of the will; and
- that suffering is the penal consequence of wilful disobedience to the law of God.

A complete account may be gathered from the teaching of St. Thomas Aquinas, by whom the principles of St. Augustine are systematized, and to some extent supplemented. Evil, according to St. Thomas, is a privation, or the absence of some good which belongs properly to the nature of the creature. (I, Q. xiv, a. 10; Q. xlix, a. 3; Contra Gentiles, III, ix, x). There is therefore no "summum malum", or positive source of evil, corresponding to the "summum bonum", which is God (I, Q. xlix, a. 3; C. G., III, 15; De Malo, I, 1); evil being not "ens reale" but only "ens rationis"--i.e. it exists not as an objective fact, but as a subjective conception; things are evil not in themselves, but by reason of their relation to other things, or persons. All realities (*entia*) are in themselves good; they produce bad results only incidentally; and consequently the ultimate cause of evil if fundamentally good, as well as the objects in which evil is found (I, Q. xlix; cf. I, Q. v, 3; De Malo, I, 3). Thus the Manichaean dualism has no foundation in reason.

Evil is threefold, viz., "*malum naturæ*" (metaphysical evil), "*culpæ*" (moral), and "*paenæ*" (physical, the retributive consequence of "*malum culpæ*") (I, Q. xlvi, a. 5, 6; Q. lxiii, a. 9; De Malo, I, 4). Its existence subserves the perfection of the whole; the universe would be less perfect if it contained no evil. Thus fire could not exist without the corruption of what it consumes; the lion must slay the ass in order to live, and if there were no wrong doing, there would be no sphere for patience and justice (I, Q. xlvi, a. 2). God is said (as in Is., xlv) to be the author of evil in the sense that the corruption of material objects in nature is ordained by Him, as a means for carrying out the design of the universe; and on the other hand, the evil which exists as a consequence of the breach of Divine laws is in the same sense due to Divine appointment; the universe would be less perfect if its laws could be broken with impunity. Thus evil, in one aspect, i.e. as counter-balancing the deordination of sin, has the nature of good (II, Q. ii, a. 19). But the evil of sin (*culpæ*), though permitted by God, is in no sense due to him (I, Q. xlix, a. 2); its cause is the abuse of free will by angels and men (I-II, Q. lxxiii, a. 6; II-II, Q. x, a. 2; I-II, Q. ix, a. 3). It should be observed that the universal perfection to which evil in some form is necessary, is the perfection of *this* universe, not of *any* universe: metaphysical evil, that is to say, and indirectly, moral evil as well, is included in the design of the universe which is partially known to us; but we cannot say without denying the Divine omnipotence, that another equally perfect universe could not be created in which evil would have no place.

St. Thomas also provides explanations of what are now generally considered to be the two main difficulties of the subject, viz., the Divine permission of foreseen moral evil, and the question finally arriving thence, why God choose to create anything at all. First, it is asked why God, foreseeing that his creatures would use the gift of free will for their own injury, did not either abstain from creating them, or in some way safeguard their free will from misuse, or else deny them the gift altogether? St. Thomas

replies (C. G., II, xxviii) that God cannot change His mind, since the Divine will is free from the defect of weakness or mutability. Such mutability would, it should be remarked, be a defect in the Divine nature (and therefore impossible), because if God's purpose were made dependent on the foreseen free act of any creature, God would thereby sacrifice His own freedom, and would submit Himself to His creatures, thus abdicating His essential supremacy--a thing which is, of course, utterly inconceivable. Secondly, to the question why God should have chosen to create, when creation was in no way needful for His own perfection, St. Thomas answers that God's object in creating is Himself; He creates in order to manifest his own goodness, power, and wisdom, and is pleased with that reflection or similitude of Himself in which the goodness of creation consists. God's pleasure is the one supremely perfect motive for action, alike in God Himself and in His creatures; not because of any need, or inherent necessity, in the Divine nature (C. G., I, xxviii; II, xxiii), but because God is the source, centre, and object, of all existence. (I, Q. lxxv, a. 2; cf. Prov., 26 and Conc. Vat., can. i, v; Const. Dogm., 1.) This is accordingly the sufficient reason for the existence of the universe, and even for the suffering which moral evil has introduced into it. God has not made the world primarily for man's good, but for His own pleasure; good for man lies in conforming himself to the supreme purpose of creation, and evil in departing from it (C.G., III, xvii, cxliv). It may further be understood from St. Thomas, that in the diversity of metaphysical evil, in which the perfection of the universe as a whole is embodied, God may see a certain similitude of His own threefold unity (cf. I, Q. xii); and again, that by permitting moral evil to exist He has provided a sphere for the manifestation of one aspect of His essential justice (cf. I, Q. lxxv, a. 2; and I, Q. xxi, a. 1, 3).

It is obviously impossible to suggest a reason why this universe in particular should have been created rather than another; since we are necessarily incapable of forming an idea of any other universe than this. Similarly, we are unable to imagine why God chose to manifest Himself by the way of creation, instead of, or in addition to, the other ways, whatever they may be, by which He has, or may have, attained the same end. We reach here the utmost limit of speculation; and our inability to conceive the ultimate reason for creation (as distinct from its direct motive) is paralleled, at a much earlier stage of the enquiry, by the inability of the non-creationist schools of thought to assign any ultimate cause for the existence of the order of nature. It will be observed that St. Thomas's account of evil is a true Theodicy, taking into consideration as it does every factor of the problem, and leaving unsolved only the mystery of creation, before which all schools of thought are equally helpless. It is as impossible to know, in the fullest sense, *why* this world was made as to know *how* it was made; but St. Thomas has at least shown that the acts of the Creator admit of complete logical justi-

fication, notwithstanding the mystery in which, for human intelligence, they can never wholly cease to be involved. On Catholic principles, the amelioration of moral evil and its consequent suffering can only take place by means of individual reformation, and not so much through increase of knowledge as through stimulation or re-direction of the will. But since all methods of social improvement that have any value must necessarily represent a nearer approach to conformity with Divine laws, they are welcomed and furthered by the Church, as tending, at least indirectly, to accomplish the purpose for which she exists.

A.B. SHARPE

Evodius

Evodius

The first Bishop of Antioch after St. Peter. Eusebius mentions him thus in his "History": "And Evodius having been established the first [bishop] of the Antiochians, Ignatius flourished at this time" (III, 22). The time referred to is that of Clement of Rome and Trajan, of whom Eusebius has just spoken. Harnack has shown (after discarding an earlier theory of his own) Eusebius possessed a list of the bishops of Antioch which did not give their dates, and that he was obliged to synchronize them roughly with the popes. It seems certain that he took the three episcopal lists of Rome, Alexandria, and Antioch from the "Chronography" which Julius Africanus published in 221. The "Chronicle of Eusebius" is lost; but in Jerome's translation of it we find in three successive years the three entries

- that Peter, having founded the Church of Antioch, is sent to Rome, where he perseveres as bishop for 25 years;
- that Mark, the interpreter of Peter, preaches Christ in Egypt and Alexandria; and
- that Evodius is ordained first Bishop of Antioch.

This last year is given as Claudius III by the Codex Freherianus, but by the fifth-century Bodleian Codex (not used in Schoene's edition) and the rest as Claudius IV (A.D. 44). The Armenian translation has Claudius II. We have no mention of Evodius earlier than that by Africanus; but the latter is confirmed by his contemporary, Origen, who calls Ignatius the second bishop after Peter (Hom. IV, in Luc., III, 938A). It is curious that the ordination of Evodius should not have been given in the "Chronography" in the same year as the founding of the Antiochian Church by Peter, and Hort supposed that the three entries must have belonged to a single year in Eusebius. But the evidence

is not in favour of this simplification. The year of the accession of Ignatius, that is of the death of Evodius, was unknown to Eusebius, for he merely places it in the "Chronicle" together with the death of Peter and the accession of Linus at Rome (Nero 14-68), while in the "History" he mentions it at the beginning of Trajan's reign.

The fame of Ignatius has caused later writers, such as Athanasius and Chrysostom, to speak of him as though he were the immediate successor of the Apostles. Jerome (*De viris ill.*, 16) and Socrates (*H.E.* VI, 8) call him the "third" bishop after St. Peter, but this is only because they illogically include Peter among his own successors. Theodoret and Pseudo-Ignatius represent Ignatius as consecrated by Peter. The difficulty which thus arose about Evodius was solved in the Apostolic Constitutions by stating that Evodius was ordained by Peter and Ignatius by Paul. The Byzantine chronographer, John Malalas (*X*, 252), relates that as Peter went to Rome, and passed through the great city of Antioch, it happened that Evodus (*sic*), the bishop and patriarch, died, and Ignatius succeeded him, he attributes to Evodius the invention of the name *Christian*. Salmon does not seem to be justified in supposing that Malalas ascribes any of this information to Theophilus, the second century Bishop of Antioch. We may be sure that Evodius is an historical personage, and really the predecessor of St. Ignatius. But the dates of his ordination and death are quite uncertain. No early witness makes him a martyr.

The Greeks commemorate together "Evodus" and Onesiphorus (*II Tim.*, i, 16) as of the seventy disciples and as martyrs on 29 April, and also on 7 September. Evodius was unknown to the earlier Western martyrologies the Hieronymian, and those of Bede and Florus; but Ado introduced him into the so-called "Martyrologium Romanum parvum" (which he forged not long before 860) and into his own work, on 6 May. His source was Pseudo-Ignatius, whom he quotes in the "Libellus de fest. Apost.", prefixed to the martyrology proper. From him the notice came to Usuard and the rest, and to the present Roman Martyrology.

JOHN CHAPMAN

Catholics and Evolution

Catholics and Evolution

One of the most important questions for every educated Catholic of today is: What is to be thought of the theory of evolution? Is it to be rejected as unfounded and inimical to Christianity, or is it to be accepted as an established theory altogether compatible with the principles of a Christian conception of the universe?

We must carefully distinguish between the different meanings of the words *theory of evolution* in order to give a clear and correct answer to this question. We must dis-

tinguish (1) between the theory of evolution as a scientific hypothesis and as a philosophical speculation; (2) between the theory of evolution as based on theistic principles and as based on a materialistic and atheistic foundation; (3) between the theory of evolution and Darwinism; (4) between the theory of evolution as applied to the vegetable and animal kingdoms and as applied to man.

(1) Scientific Hypothesis vs. Philosophical Speculation

As a scientific hypothesis, the theory of evolution seeks to determine the historical succession of the various species of plants and of animals on our earth, and, with the aid of palæontology and other sciences, such as comparative morphology, embryology, and bionomy, to show how in the course of the different geological epochs they gradually evolve from their beginnings by purely natural causes of specific development. The theory of evolution, then, as a scientific hypothesis, does not consider the present species of plants and of animals as forms directly created by God, but as the final result of an evolution from other species existing in former geological periods. Hence it is called "the theory of evolution", or "the theory of descent", since it implies the descent of the present from extinct species. This theory is opposed to the theory of constancy, which assumes the immutability of organic species. The scientific theory of evolution, therefore, does not concern itself with the origin of life. It merely inquires into the genetic relations of systematic species, genera, and families, and endeavours to arrange them according to natural series of descent (genetic trees).

How far is the theory of evolution based on observed facts? It is understood to be still only an hypothesis. The formation of new species is directly observed in but a few cases, and only with reference to such forms as are closely related to each other; for instance, the systematic species of the plant-genus *Cenothera*, and of the beetle-genus *Dimarida*. It is, however, not difficult to furnish an indirect proof of great probability for the genetic relation of many systematic species to each other and to fossil forms, as in the genetic development of the horse (*Equidæ*), of ammonites, and of many insects, especially of those that dwell as "guests" with ants and termites, and have adapted themselves in many ways to their hosts. Upon comparing the scientific proofs for the probability of the theory of evolution, we find that they grow the more numerous and weighty, the smaller the circle of forms under consideration, but become weaker and weaker, if we include a greater number of forms, such as are comprised in a class or in a sub-kingdom. There is, in fact, no evidence whatever for the common genetic descent of all plants and animals from a single primitive organism. Hence the greater number of botanists and zoologists regard a polygenetic (polyphyletic) evolution as much more acceptable than a monogenetic (monophyletic). At present, however, it is impossible to decide how many independent genetic series must be assumed in the animal and vegetable kingdoms. This is the gist of the theory of evolution as a scientific

hypothesis. It is in perfect agreement with the Christian conception of the universe; for Scripture does not tell us in what form the present species of plants and of animals were originally created by God. As early as 1877 Knabenbauer stated "that there is no objection, so far as faith is concerned, to assuming the descent of all plant and animal species from a few types" (*Stimmen aus Maria Laach*, XIII, p. 72).

Passing now to the theory of evolution as a philosophical speculation, the history of the plant and animal kingdoms upon our globe is but a small part of the history of the entire earth. Similarly, the geological development of our earth constitutes but a small part of the history of the solar system and of the universe. The theory of evolution as a philosophical conception considers the entire history of the cosmos as an harmonious development, brought about by natural laws. This conception is in agreement with the Christian view of the universe. God is the Creator of heaven and earth. If God produced the universe by a single creative act of His will, then its natural development by laws implanted in it by the Creator is to the greater glory of His Divine power and wisdom. St. Thomas says: "The potency of a cause is the greater, the more remote the effects to which it extends." (*Summa c. Gent.*, III, c. lxxvi); and Suarez: "God does not interfere directly with the natural order, where secondary causes suffice to produce the intended effect" (*De opere sex dierum*, II, c. x, n. 13). In the light of this principle of the Christian interpretation of nature, the history of the animal and vegetable kingdoms on our planet is, as it were, a versicle in a volume of a million pages in which the natural development of the cosmos is described, and upon whose title-page is written: "In the beginning God created heaven and earth."

(2) Theistic vs. Atheistic Theories of Evolution

The theory of evolution just stated rests on a theistic foundation. In contradistinction to this is another theory resting on a materialistic and atheistic basis, the first principle of which is the denial of a personal Creator. This atheistic theory of evolution is ineffectual to account for the first beginning of the cosmos or for the law of its evolution, since it acknowledges neither creator nor lawgiver. Natural science, moreover, has proved that spontaneous generation—i.e. the independent genesis of a living being from non-living matter—contradicts the facts of observation. For this reason the theistic theory of evolution postulates an intervention on the part of the Creator in the production of the first organisms. When and how the first seeds of life were implanted in matter, we, indeed, do not know. The Christian theory of evolution also demands a creative act for the origin of the human soul, since the soul cannot have its origin in matter. The atheistic theory of evolution, on the contrary, rejects the assumption of a soul separate from matter, and thereby sinks into blank materialism.

(3) The Theory of Evolution vs. Darwinism

Darwinism and the theory of evolution are by no means equivalent conceptions. The theory of evolution was propounded before Charles Darwin's time, by Lamarck (1809) and Geoffroy de Saint-Hilaire. Darwin, in 1859, gave it a new form by endeavouring to explain the origin of species by means of natural selection. According to this theory the breeding of new species depends on the survival of the fittest in the struggle for existence. The Darwinian theory of selection is Darwinism—adhering to the narrower, and accurate, sense of the word. As a theory, it is scientifically inadequate, since it does not account for the origin of attributes fitted to the purpose, which must be referred back to the interior, original causes of evolution. Haeckel, with other materialists, has enlarged this selection theory of Darwin's into a philosophical world-idea, by attempting to account for the whole evolution of the cosmos by means of the chance survival of the fittest. This theory is Darwinism in the secondary, and wider, sense of the word. It is that atheistical form of the theory of evolution which was shown above—under (2)—to be untenable. The third signification of the term *Darwinism* arose from the application of the theory of selection to man, which is likewise impossible of acceptance. In the fourth place, *Darwinism* frequently stands, in popular usage, for the theory of evolution in general. This use of the word rests on an evident confusion of ideas, and must therefore be set aside.

(4) Human Evolution vs. Plant and Animal Evolution

To what extent is the theory of evolution applicable to man? That God should have made use of natural, evolutionary, original causes in the production of man's body, is *per se* not improbable, and was propounded by St. Augustine (see **Augustine of Hippo, Saint**, under V. *Augustinism in History*). The actual proofs of the descent of man's body from animals is, however, inadequate, especially in respect to paleontology. And the human soul could not have been derived through natural evolution from that of the brute, since it is of a spiritual nature; for which reason we must refer its origin to a creative act on the part of God.

For a thorough exposition, Wasmann, *Modern Biology and the Theory of Evolution* (Freiburg im Br., 1904). Of the older literature, Mivart, *On the Genesis of Species* (London and New York, 1871).

E. Wasmann

Evolution (History and Scientific Foundation)

Evolution (History and Scientific Foundation)

The world of organisms comprises a great system of individual forms generally classified according to structural resemblances into kingdoms, classes, orders, families, genera, species. The species is considered as the unit of the system. It is designated by

a double name, the first of which indicates the genus, e.g. *canis familiaris*, the dog, and *canis lupus*, the wolf. Comparing the species of the present day with their fossil representatives in the geological layers, we find that they differ from one another the more the farther we retrace the geological record. To explain this remarkable fact two theories have been proposed, the one maintaining the stability and special creation of species, the other the instability and evolution, or genetic relation, of species. As is plain from the preceding section of this article, the principal difference between the two theories consists in this: that the theory of evolution derives the species of today by a progressive development from one or more primitive types, whilst the theory of constancy insists upon the special creation of each true species. It is generally admitted that the determination of genetic forms depends largely on the subjective views and experience of the naturalist.

We shall here continue our attention to the history and scientific foundations of the biological theory of evolution, leaving all purely philosophical and theological discussions to others. The entire subject will here be divided into the following parts: I. History of the Scientific Theories of Evolution; II. Definition of Species; III. Variability and Experimental Facts Relating to the Evolution of Species; IV. The Palæontological Argument; V. The Morphological Argument; VI. The Ontogenetic Argument; VII. The Biogeographical Argument.

Before we begin, we wish to remind the reader of the important distinction brought out in the preceding essay, that the general theory referring to the mere fact of evolution must be well distinguished from all special theories which attempt to explain the assumed fact by ascribing it to certain causes, such as natural selection, the influence of environment, and the like. In other words, an evolutionist—that is, a defender of the general scientific theory of evolution—is not *eo ipso* a Darwinian, or a Lamarckian, or an adherent of any special evolutionary system. No less important are the other definitions and distinctions emphasized above under A.

I. HISTORY OF THE SCIENTIFIC THEORIES OF EVOLUTION

The historical development of the scientific theories of evolution may be divided into three periods. The main figure of the first period is Lamarck. The period ends with an almost complete victory of the theory of constancy (1830). The second period commences with Darwin's "Origin of Species" (1859). The idea of evolution, and in particular Darwin's theory of natural selection, enters into every department of the biological sciences and to a great extent transforms them. The third period is a time of critical reaction. Natural selection is generally considered as insufficient to explain the origin of new characters, while the ideas of Lamarck and G. Saint-Hilaire become prevalent. Besides, the theory of evolution is tested experimentally. Typical representatives of the period are Bateson, Hugo de Vries, Morgan.

First Period.—Linnæus based his important "Systema naturæ" on the principle of the constancy and special creation of every species—"Species tot numeranus quot diversæ formæ in principio sunt creatæ" ("Philosophia botanica", Stockholm, 1751, p. 99). For, "contemplating the works of God, it is plain to every one that organisms produce offspring perfectly similar to the parents" ("Systems", Leipzig, 1748, p. 21). Linnæus had a vast influence upon the naturalists of his time. Thus his principle of the constancy of species was universally acknowledged, and this all the more because it seemed to be connected with the first chapter of the Bible. Georges Louis Leclerc Buffon (1707-88), the "suggestive" author of the "Histoire naturelle générale et particulière", was the first to dispute the Linnæan dogma on scientific grounds. Till 1761 he had defended the theory of constancy, but he then became an extreme evolutionist, and finally held that through the direct influence of environment species could undergo manifold modifications of structure. Similar views were expressed by the German Gottfried Reinhold Treviranus in his work "Biologie oder Philosophie der lebenden Natur" (1802), and by "the poet of evolution", J. W. Goethe (1749-1832). However, none of these men worked out the details of a definite theory. The same must be said of the grandfather of Charles Darwin, Erasmus Darwin (1731- 1802), physician, poet, and naturalist, the first who seems to have anticipated Lamarck's main views. "All animals undergo transformations which are in part produced by their own exertions in response to pleasures and pains, and many of these acquired forms and propensities are transmitted to their posterity" (Zoonomia, a 1794). Jean-Baptiste de Lamarck (b. 1744) was the scientific founder of the modern theory of evolution and its special form, known as Lamarckism. At the age of forty-nine Lamarck was elected professor of invertebrate zoology at the Jardin des Plantes (Paris). In 1819 he became completely blind, and died ten years later in great poverty and neglected by his contemporaries, socially and scientifically. The main ideas of his theory are contained in his "Philosophie zoologique" (1809) and his "Histoire des animaux sans vertèbres" (1816-22). Lamarck disputes the immutability of specific characters and denies that there is any objective criterion for determining, with any degree of accuracy, which forms ought to be considered as true species. Consequently, according to him, the name *species* has only a relative value. It refers to a collection of similar individuals "que la génération perpétue dans le même état tant que les circonstances de leur situation ne changent pas assez pour faire varier leurs habitudes, leur caractère et leur forme" (Phil. zool., I, p. 75). But how are species transformed into new species? As to plants, Lamarck believes that all changes of structure and function are due to the direct influence of environment. In animals the changed conditions of the environment first call forth new wants and new activities. New habits and instincts will be produced, and through use and disuse organs may be strengthened or weakened, newly adapted to the requirements of new functions, or

made to disappear. The acquired changes are handed down to the offspring by the strong principle of inheritance. Thus the web in the feet of water birds was acquired through use, while the so-called rudimentary organs, e.g. the teeth of the baleen whale, the small eyes of the mole, were reduced to their imperfect condition through disuse. Lamarck did not include the origin of man in his system. He expressed his belief in abiogenesis, but he maintained at the same time that "rien n'existe que par la volouté du sublime Auteur de toutes choses" (Phil. zool., I, p. 56).

Lamarck's theory was not sufficiently supported by facts. Besides, it offered no satisfactory explanation of the origin and development of new organs, though he did not ascribe the effect to a mere wish of the animal. Finally, he offered no proof whatever for his position that acquired characters are inherited. Lamarck had very little influence upon his own time. Shortly after his death the famous discussion took place between Geoffroy Saint-Hilaire and Cuvier. As professor of vertebrate zoology Saint-Hilaire (1722-1844) had long been the colleague of Lamarck. Saint-Hilaire held the mutability of species, but ascribed the main influence in its evolution to the "monde ambiant". Besides, in order to account for the discontinuity of species, he imagined that the environment could produce sudden changes in the specific characters of the embryo (Philosophie anatomique, 1818). In 1830 G. Saint-Hilaire presented to the French Academy of Sciences his doctrine of the universal unity of plan and composition in the animal kingdom. Cuvier opposed it with his celebrated theory of the four "embranchements", and showed that his adversary had mistaken resemblance for unity. Cuvier brought convincing facts in support of his attitude; Saint-Hilaire did not. That settled the issue. The theory of evolution was officially abandoned. Naturalists left speculation and returned for a few decades to an almost exclusive study of positive facts. A single writer of some celebrity, Bory de Saint-Vincent (1789-1846), took up Lamarck's doctrines, but not without modifying them by insisting upon the final constancy of specific characters through heredity. Isidore Saint-Hilaire (1805-61), who shared the views of his father concerning environment and heredity, defended a very moderate theory of evolution. He assumed a limited variability of species according to the variability of the environment.

Second Period.—Charles Robert Darwin's book, on the "Origin of Species by means of natural selection or the preservation of favoured races in the struggle for life", published 24 November, 1859, marks a new epoch in the history of the evolution idea. Though the principal factors of Darwin's theory, namely "struggle, variation, selection", had been enunciated by others, it was mainly Darwin who first continued them into a system which he tried to support by an extensive empirical foundation. Assisted by a number of influential friends, he succeeded in obtaining an almost universal acknowledgment for the general theory of evolution, though his special theory of natural se-

lection gradually lost much of the significance attached to it, especially by Darwin's extreme followers. Charles Robert Darwin was born at Shrewsbury, 22 February, 1809. From 1831-36 he accompanied as naturalist an English scientific expedition to South America. In 1842 he retired to his villa at Down in Kent, where he wrote his numerous works. He died on 19 April, 1882, and was buried in Westminster Abbey a few feet from the grave of Newton. Biogeographical observations on his voyage to South America led Darwin to abandon the theory of special creation. "I had been deeply impressed", he says in his *Autobiography*, "by discovering in the Pampean formation great fossil animals covered with armour like that on the existing armadillos; secondly by the manner in which closely allied animals replace one another in proceeding southward over the continent; and thirdly by the South American character of most of the productions of the Galapagos archipelago and more especially by the manner in which they differ slightly on each island of the group.... It was evident that such facts could only be explained on the supposition that species gradually became modified." In order to account for the transformation, Darwin began with a systematic study of numerous facts referring to domesticated animals and cultivated plants. This was in July, 1837. He soon perceived that selection was the keystone of man's success in making useful races, namely, by breeding only from useful variations. But it remained a mystery to him how selections could be applied to organisms living in nature. In October, 1838, Darwin read Malthus's "Essay on Population" and understood at once that in the struggle for existence described by Malthus "favourable variations would tend to be preserved and unfavourable ones to be destroyed, and that the result of this selection or survival would be the formation of new species". The struggle itself appeared to him as a necessary consequence of the high rate at which organic beings tend to increase. The result of the selection—that is the survival of the fittest variations—was supposed to be transmitted and accumulated through the principle of inheritance. In this manner Darwin defined and tried to establish the theory of natural selection. Long after he had come to Down he added an important complement to it. The formation of new species implies that organic beings tend to diverge in character as they become modified. But how could this be explained? Darwin answered: Because the modified offspring of all dominant and increasing forms tend to become adapted to many and highly diversified places in the economy of nature. In short, according to Darwin, species are continuously transformed "by the preservation of such variations as arise and are beneficial to the being under its conditions of life", that is, by the survival of the fittest, which is to be considered "not the exclusive", but the "most important means of modification".

As his studies and observations progressed, Darwin lost his almost exclusive belief in his own theory, as he held it in 1859, and gradually adopted, at least as secondary

causes in the origin of species, the Lamarck factor of the inheritance of the effects of use and disuse and the Buffon factor of the direct action of the environment, especially in case of the geographical isolation of species. As to the human species, Darwin was, as early as 1837 or 1838, of the opinion that it was likewise no special creation, but a product of evolutionary processes. The numerous facts which, according to Darwin, might be adapted to substantiate his views are contained in his work, "The Descent of Man" (1871). As a supplementary work to "The Origin of Species", Darwin published, in 1868, "The Variation of Animals and Plants under Domestication", which contains many valuable facts and theoretical discussions concerning variation and heredity. The principle of natural selection is certainly a very useful factor in removing variations not well adapted to their surroundings, but the action is merely negative. The main point (that is the origin and teleological development of useful variations) is left untouched by the theory, as Darwin himself has indicated. Moreover, no proof is brought forward that variations must accumulate in the same direction and that the result must be a higher form of organization. On the contrary, as we shall point out below, the experimental evidence of the post-Darwinian period has failed to substantiate Darwin's claim. It is, however, well to note that Darwin did not wish to ascribe the origin and survival of useful variations to chance. That word, he declares, is a wholly incorrect expression which merely serves to acknowledge plainly our ignorance of the cause of each particular variation. Later on, it is true, he seems to have abandoned the idea of design. "The old argument", he says in his "Autobiography" (1876) ... "fails, now that the law of natural selection has been discovered." Similarly, his belief in the existence of God, which was strong in him when he wrote the "Origin", seems to have vanished from his mind in the course of years. In 1874 he confessed: "I for one must be content to remain Agnostic".

Of the numerous friends of Darwin who contributed so much to the development and spread of his theories, we mention in the first place Alfred Russel Wallace, whose essay on natural selection was read before the Linnæan Society, in London, 1 July, 1858, together with Darwin's first essay on the subject. The main work of Wallace, "Darwinism, an Exposition of the Theory of Natural Selection with Some of its Applications" (1889), "treats the problem of the origin of species on the same general lines as were adopted by Darwin; but from the standpoint reached after nearly 30 years of discussion." In fact the book is a defence of pure Darwinism. Wallace, too, assumed the animal origin of man's bodily structure, but, contrary to Darwin, he ascribed the origin of man's "intellectual and moral faculties to the unseen Universe of spirit" (Darwinism). Thomas H. Huxley (1825-1895) was one of the most strenuous defenders of Darwin's views; his book on "Man's Place in Nature" (1863) is a defence of man's "Oneness with the brutes in structure and in substance". Besides Wallace and Huxley,

there were the geologist Sir Charles Lyell, the zoologist Sir John Lubbock, and the botanists Asa Gray and J. D. Hooker, who supported Darwin's theory almost from the beginning. Quatrefuges and Dana accepted it in part, but declared that there were no arguments in favour of the animal origin of man. Spencer's views are not very much different from those of Darwin's later years. Natural selection is more aptly called by him "the survival of the fittest" ("Principles of Biology", 1898, I, p. 530). Trying to harmonize the Lamarckian and Darwinian factors of evolution, he was among the first to defend the so-called neo-Lamarckian theory, which insists upon the direct influence of the environment and the inheritance of newly acquired characters.

Before we enter upon the last phase in the development of the evolution idea, it is necessary to devote some space to the extreme defenders of Darwinism in Germany. Ernst Haeckel, of Jena, is in some sense the founder of the science of phylogeny, which seeks at least by way of hypothesis, to determine the genetic relation of past and present species. In 1868 Darwin wrote to Haeckel: "Your boldness makes me sometimes tremble". This refers especially to the phylogeny, which is in fact an aprioristic structure often contradicted, and at almost no point supported, by experiment and observation. The tetrahedral carbon atom is, according to Haeckel, the external fountain head of all organic life. Through abiogenesis certain most primitive organisms are said to have been formed, such as "moners", which Haeckel described as unicellular beings without structure and without any nuclear differentiation. During ages of unknown duration these simple masses of protoplasm have been evolved into higher plants and animals, man included. As one of his main arguments, Haeckel refers to the so-called "biogenetic law of development". The supposed law maintains that ontogeny is a short and rapid repetition of phylogeny, that is, the stages in the individual development of an organism correspond more or less to the stages which the species passed through in their evolution. The causes of development are, according to Haeckel, the same as were proposed by Darwin and by Lamarck; but Haeckel denies the existence of God and rejects the idea of teleology.

Our leading scientists do not care to support the unfounded generalities of Haeckel's doctrines. They have even, most severely, but justly, censured Haeckel's scientific methods, mainly his frauds, his want of distinction between fact and hypothesis, his neglect to correct wrong statements, his disregard of facts not agreeing with his aprioristic conceptions and his unacquaintance with history, physics, and even modern biology. They have also pointed out that the biogenetic law of development is by no means a trustworthy guide in retracing the phylogenetic succession of species, and that many other theories suggested by Haeckel are without foundation. But above all we must reject Haeckel's popular writings because they contain numerous errors of every kind, and ridicule in a shameful manner the most sacred convictions and moral

principles of Christianity. It is a sad fact, that especially through the influence of "Die Welträtsel" great harm was done to religion and morality, especially in Germany and in the English-speaking countries.

The present leader of extreme Darwinism is August Weismann of Freiburg (*Vortrage über Descendenztheorie*, 2d ed., 1904), the energetic opponent of Lamarck's idea that acquired characters are inherited. According to Weismann, every individual and specific character which may be transmitted by heredity is preformed and prearranged in the architecture of certain ultra-microscopical particles comprising the chromatin of the germ-cells. On account of qualitative differences the various groups of these ultimate particles or "biophores" have a different power of assimilation. Besides, they are present in different numbers. In consequence thereof an intracellular struggle for existence will arise, especially after the germ-cells are united in fertilization. The outcome of the struggle will be that the weaker particles always or at times succumb. Thus the principle of the survival of the fittest is transferred to the germ-cells. Weismann, moreover, admits an indirect influence of the environment upon the germ-cells. In order to account for the facts of regeneration and reorganization established by Driesch, Morgan, and others, Weismann appeals at times to unknown forces of vital affinities, without, however, dismissing his thoroughly materialistic and antiteleological suppositions. It will be superfluous to add that Weismann's theory is a mere hypothesis whose foundation can probably never be controlled by observation and experiment. But it must be acknowledged that Weismann was among the first to point out the intrinsic connection between the evolution of species and the science of the cell. As extreme scientific opponents of Darwinism and evolution we mention above all the botanist Albert Wiegand and the zoologist and palæontologist Louis Agassiz, the well-known adversary of Asa Gray. These men produced many an excellent argument against the extreme defenders of pure Darwinism, but probably by attending too much to the exceedingly weak foundations of the current theory of the general development by small changes, they rejected evolution almost entirely. The most recent representative of such extreme views is the zoologist Albert Fleischmann, who has become a complete scientific agnostic.

Third Period.—The third period in the history of the biological evolution theory has only in recent years assumed the form which marks it as a new epoch. Its path was prepared by the fact that two classes of naturalists had in course of time been drawing nearer to one another. On the one hand were those whose work was mererly critical, by discriminating clearly between Darwinism and evolution, and on the other hand those who gave their undivided attention to the work of experimental investigation. Only in recent years have the two classes joined hands and, in men like de Vries, Bateson, Morgan, have gained very efficient assistance. At the present time the greatest

importance is laid on the explanation of the gaps in species, on the adaptation of organisms to environment, and on the inheritance of characters thus acquired, and above all on the idea of the segregation and the independence of biological characters, as was pointed out almost fifty years ago by Gregor Johann Mendel.

As far back as 1865, K. von Nägeli decided in favour of the general theory of evolution and against Darwinism. According to him progressive evolution required intrinsic laws of development, which, however, as he added, were to be sought for in molecular forces. Natural selection alone could only eliminate, that is to say, could only explain the survival of the more useful, but not its origin. Like Spencer, Nägeli was a determined precursor of neo-Lamarckianism. This theory, which is now defended by many evolutionists, attempts to reconcile Lamarck's principle of the use and issue of organs with Saint-Hilaire's theory of the influence of external circumstances. There are many evolutionists, such as Th. Elmer, Packard, Cunningham, Cope, who defend this view. However, the experimental evidence for the foundation of neo-Lamarckianism—namely the inheritance of acquired characters—is still wanting, or at least strongly debated. Nägeli's most important work, "Mechanisch-physiologische Theorie der Abstammungslehre", appeared in 1884. The embryologist K. E. von Baer, who did not share the antiteleological views of Nägeli, opposed no less energetically Darwin's theory of natural selection, because, as he argued, that theory does not explain teleology and correlation, and is at the same time in contradiction to the persistence of species and varieties. He also vigorously controverted Haeckel's system, especially his biogenetic law of development. But he maintained the transformation of species within certain limits through the agency of gradual and sudden changes. This leads us to the theory of saltatory evolution which is today most strongly defended by Bateson, de Vries and others. Some of the first scientific expositors of this view were R. von Kölliker and St. George Mivart. In his work "On the Genesis of Species" (1871) Mivart proposed a number of convincing arguments against the opinion of the power of natural selection as a prevailing factor. According to him species are suddenly born and originate by some innate force, which works orderly and with design. Mivart concedes that external conditions play an important part in stimulating, evoking, and in some way determining evolutionary processes. But the transformation of species will mainly, if not exclusively, be produced by some constitutional affection of the generative system of the parental forms, an hypothesis which Mivart would extend also to the first genesis of the body of man. Hugo de Vries (*Die Mutationstheorie*, 1901-02) is, with Bateson, Reinke, and Morgan, a typical representative of the exponents of the modern theory of saltatory evolution. He first endeavoured to show experimentally that new species cannot arise by selection. Then he attempted to demonstrate the origin of new forms by saltatory evolution. The principal illustration to establish his theory of "mutation" was the large

flower, evening primrose (*Cenothera Lamarckiana*). Th. H. Morgan ("Evolution and Adaptation", 1903) summarizes this view as follows: "If we suppose that new mutations and 'definitely' inherited variations suddenly appear, some of which will find an environment to which they are more or less well fitted, we can see how evolution may have gone on without assuming new species to have been formed through a process of competition. Nature's supreme test is survival. She makes new forms to bring them to this test through mutation and does not remodel old forms through a process of individual selection." We shall see that de Vries overrated the importance of his experiments. Still it is not to be denied that he has become through his method a master for the experimental investigation of the problems of evolution. Of special value is his analysis of the concept of species, though probably his greatest service is the rediscovery of Mendel's laws and their introduction into the realm of biological investigations.

The earliest forerunners of Mendel were the first scientific hybridists J. G. Köhltreuter (1733- 1806) and T. A. Knight (1758-1838). Köhltreuter's results are of special interest because, through the repeated crossing of a hybrid with the pollen or ovules of one of the parents, forms appeared which more and more reverted to the characteristics of the respective parent. K. F. von Gärtner (1772-1850) was the most prolific writer on hybridism of his time, though he did not surpass Köhltreuter as to the positive results of his experimental research. C. Naudin's essay on the hybridity in plants (1862) represented a considerable advance. The author pointed out that the facts of the reversion of the hybrids to the specific forms of their parents, when repeatedly crossed with the latter, are naturally explained by the hypothesis of the segregation of the two specific essences in the pollen grains and ovules of the hybrids (Leck). This formed in after years no small part of Mendel's discovery, which is indeed one of the most brilliant results of experimental investigation.

Gregor Mendel was born 22 July, 1822, at Heinzendorf near Odrau (Austrian Silesia). After finishing his studies he entered, in 1843, the Augustinian monastery at Brunn. Having been for fourteen years professor of the natural sciences, he was elected abbot of the monastery in 1868, and died in January, 1894. Mendel's celebrated memoir, "Versuche über Pflanzenhybriden", appeared in 1865, but attracted little attention, and remained unknown and forgotten till 1900. It was based on experiments that had been carried out during the course of eight years on more than 10,000 plants. The principal result of these experiments was the recognition that the peculiarities of organisms produced entities independent of one another, so that they can be joined and separated in a regular way. As we have said above, H. de Vries was the first to recognize the value of Mendel's paper. Other investigators who have taken up the same line of work are Correns, Tschermak, Morgan, and, most of all, Bateson, the principal founder of "Mendelism", or the science of genetics.

II. DEFINITION OF SPECIES

Before Linnæus's time genera were considered to be the units of the plant and animal kingdoms, and it was assumed these had been created by God, while the species were descended from them. By the *nomen specificum* was understood the more or less short description by which Tournefort and his contemporaries distinguished the various species of genera. Linnæus introduced the binomial system establishing the species as the unit of the organic world. There are as many species as there were different forms created in the beginning. The same theoretical norm had already been adopted before Linnæus by the English physician John Ray (died 1678). The practical criterion for determining genera and species was taken from characteristic morphological features. For instance, the essential generic characteristic of the quadrupeds was derived from the teeth; that of birds from the bill. The species was designated in a similar manner "by retaining the primary characteristic among the various differences which separated two individuals of the same species." The establishment therefore of a genus or of a species depended ultimately, then as now, on the knowledge and subjective views of the systematizer. The whole system was an artificial one precisely because it took note of one single feature alone, leaving the rest out of consideration; for instance, in the vegetable kingdom the character of the flower alone was taken into consideration. Later on Linnæus entertained the idea that originally God created only one species of each genus, and that the rest had been derived from these original species by cross-breeding. Linnæus's conception of species was strengthened by Georges Cuvier, who defended the unchangeableness of the categories beginning with the species up to the four types (*embranchement*). He was supported in this, as was later L. Agassiz, by the absolute dearth of intermediate forms in geological strata. Hence arose his Theory of Catastrophes, which in turn gave way to his Migration Theory. Cuvier came victorious out of the controversy with Etienne Geoffroy Saint-Hilaire, who maintained the unity of the plan of animal structure and the continuous transition of forms in the animal kingdom.

The views prevailing under Linnæus and Cuvier were then divided into two main branches. (1) The more moderate Transmutationists held that genera were the originally created units, and that from these all species and varieties were derived. (2) The followers of Linnæus, on the other hand, affirmed that the Linnæan species were the created units, and the subdivisions of these were the derived ones. Then followed the Jordan schools, which asserted that within the Linnæan species were what they called "small species", individually variable, but specifically immutable (not connected by intermediate forms), and, as such, to be considered the true units or "elementary species". Linnæus's *Draba verna*, for instance, comprehends about 200 "elementary species". The norm or criterion of the elementary species is the experimentally proved constancy

of the features (it is quite immaterial how small they may be) during a series of generations.

How are we to regard these opinions? Before answering this question we must strongly emphasize the fact that the biological idea of species has nothing whatever in common with the Scriptural conception or with that of Scholastic philosophy. The Mosaic story of Creation signifies nothing more than this, that ultimately all organisms owe their existence to the Creator of the world. The concrete *how* has nothing to do with the proposition of faith regarding creation. The enumeration of certain popular groups of organisms, such as fruit-trees, draft-animals, and the like, could have no other design than to manifest to the simplest as well as to the most cultivated mind the action of the Creator of all things; at least, there can be no question of a scientific conception of genera and species. The biological concept of species is likewise removed from the philosophical concept which designates either the metaphysical or the physical species. The former is identical with the *integra essentia* (Urraburú)–"integral essence"–of a being; the latter is founded on the essence (*fundatur in essentiâ*–T. Pesch), and is to be recognized by some attribute (*gradus alicujus perfectionis*) which remains constant and unchangeable in every individual of every generation and so appears to be necessarily connected with the most intimate essence of the organism (*necessario cum rei naturâ connecti*–Haan). The concept, therefore, of species according to Holy Scripture, Philosophy, and Science, is by no means a synonymous one for the natural units of the organic world. And particularly, the first chapter of Genesis should not be brought into connection with Linnæus's "Systema naturæ".

As far as the biological concept of species is concerned there is not up to the present time any decisive criterion by which we may determine in practice whether a given group of organisms constitute a particular species or not. Genuine species are differentiated from one another by the fact of their possessing some important morphological difference which remains constant during a series of generations without the production of any intermediate form. If the differences are of less importance, but constant, we speak of sub-species (elementary species, Jordan species), while intermediate forms and all deviations which are not strictly constant are set down as varieties. Are such distinctions and criteria acceptable? Expressions such as "considerable", "essential", "more or less considerable" signify relative propositions. Hence it follows that the morphological determination of species depends to a great extent on the subjective estimate of the naturalist and on his intimate knowledge of the geographical distribution and habits of the organism concerned. In fact, the force of the term *species* differs greatly in the different classes of organisms. On this account the fact that species do not cross-breed, or at least that after a cross they do not produce fertile descendants, was added as an auxiliary criterion. This criterion, however, is an impracticable one

in the case of palæontological species, and in the plant world in particular has many exceptions. In botany, therefore, the auxiliary criterion has been limited in the sense that within the species itself the fertility always maintains the same general level, while by the crossing of different species it diminishes very materially—propositions which do not admit of conversion and in their generalization can scarcely be called correct. Consequently, it would almost appear that Darwin was right when he said that the idea of species was "undefinable". Still, it is not to be denied that there are in nature definite and often important gradations and gaps by which the "good species", in contradistinction to the "bad species", are separated from one another. The same is also proved by the modern "mutation theories" which, on account of unconnected differences, admit a development of species by jumps.

The Darwinian principle of indefinite variability is contrary to facts, which in general show that both in living nature and in geological strata, there exist types sharply discriminated from one another. However, it is quite impossible to say how many types compose the organic world. It will be the task of future research to determine the affinity which exists between the various groups of organisms, beginning with the lower limit of similar sub-species and ascending to the highest forms whose common ancestry can be proved. These highest forms, which *per se* have nothing in common with the Linnæan species or genera, or with any other systematic groups, are the true units of nature; for they are composed of those organisms only which are related among themselves without being connected with the rest by common descent. We may, if we wish, identify these highest units with Wasmann's "natural species", or primeval ancestral forms, but, according to our opinion, neither the Linnæan species nor any other of the so-called systematic groups can be considered as the natural subdivisions of it. The Linnæan species are indeed indispensable for an intelligible classification of organisms, but they are not suitable for the solution of the problems of development. In concluding this section we may add that the best example of a natural species, and one ratified by revelation, is the species Man, which, by reason of its wide range of variation and the relative constancy of its races, may offer many a happy point of comparison for defining the limits of the species in the vegetable and animal kingdoms.

In the following sections we shall see that there cannot be any doubt as to the evolution of species, if by *species* we understand such groups of organisms as are generally styled by botanists and zoologists systematic, or Linnæan species. But if by the term *species* we are to understand groups of organisms whose range of variability would correspond to that of "the human species", then we believe that up to the present day there are no clear facts in favour of specific evolution. In particular, it will be seen that thus far there is no evidence of fact as to an ascending development of organic

forms, though we do not deny the possibility of it provided an innate power of development be assumed, which operates teleologically.

III. VARIATION AND EXPERIMENTAL FACTS RELATING TO THE EVOLUTION OF SPECIES

By *variation* we generally understand three groups of phenomena: (1) individual differences; (2) single variations; (3) forms produced by crossing and Mendelian segregation. The question is, what influence these variations actually have on the formation of species.

(1) *Individual Differences*. Individual differences include all fluctuating inequalities of an individual and of its organs—e.g., the size of the leaves of a tree, the percentage of sugar contained in the beet, and even more important morphological and physiological features. These differences may be quantitative (according to size and weight), meristic (as to numbers), and individually quantitative (e.g., the mountain and valley forms of a plant). They are generally recognized from the fact that they oscillate around a certain mean, from which they deviate in inverse proportion to their frequency, a rule which primarily pertains only to quantitative differences. According to Darwinians, useful individual differences can be increased indefinitely by selection and may finally become independent of it. In this manner new species would result: Darwin himself sometimes considered single variations as of greater importance. The same view is strongly defended by modern evolutionists, who defend, at the same time, a direct influence of environment to which an organism adapts itself.

In order first of all to obtain a just estimate of the influence of selection, it must be pointed out that not everything that is attributed to selection has originated through selection. The origin of many pure breeds (e. g., of pigeons) is unknown, and cannot therefore without further investigation be ascribed to selection. Furthermore, many cultivated forms have arisen through crosses and segregation of characters, but not through merely strengthening individual characters. If we restrict our examination only to well attested facts, we find, first, that nothing new is brought about by selection; secondly that the maximum amount in quantitative modification is obtained in a few generations (mostly in three to five) and that this amount can only be maintained through constant selection. In case selection is stopped, a regression will follow proportional to the length of time required for the progress. In short, as far as facts teach us, new species do not arise by selection. But if qualitative changes were produced by some other cause, selection would probably be a potent principle in order to explain why some peculiarities survive and others disappear. The question is: Whether changes in the environment may furnish such a cause. There can be no doubt that the environment *does* influence organisms and mould them in many ways. As proof of this we need only draw attention to the different forms of Alpine and valley plants, to the

formation of the leaves of plants according to the humidity, shadiness, or sunniness of the habitat, to the influence of light and temperature on the formation of pigment and colouring of the surface, to the strange and considerable differences produced, for instance, in knotweeds by merely changing the environment, and so forth. But as far as actual experiments show, the changes of characteristics and niceties of adaptation go to and fro, as it were, without transgressing definite ranges of variation. Moreover, it is not at all clear how discontinuity of species could have arisen "by a continuous environment, whether acting directly, as Lamarck would have it, or as a selective agent, as Darwin would have it" (Bateson), unless one takes into account the accidental destruction and isolation of intermediate forms.

In spite of these conclusions it has been assumed that individual differences might lead to the formation of new species under the continuous influence of natural selection. Wasmann's well-known *Dinarda*-forms may serve as an example. The four forms of the rove-beetle, *Dinarda*, namely *D. Märkeli*, *D. dentata*, *D. Hagensi* and *D. pygmæa*, bear a certain relation with regard to size to the four forms of ants, *Formica rufa*, *sanguinea*, *exsecta*, *fusco-rufibarbis*, and to their nests, in which they live as tolerated guests. *D. Märkeli*, which is 5 mm. long, dwells with *F. rufa*, which is comparatively large and builds spacious hill-nests. *D. dentata*, which is 4 mm. long, lives with *F. sanguinea*, which is comparatively large, but builds small earth-nests. *D. Hagensi*, which is 3-4 mm. long, lives with *F. exserta*, which is smaller than *F. sanguinea*, but builds a fairly roomy hill-nest. *D. pygmæa*, which is 3 mm. long, lives with *F. fusco-rufibarbis*, which is relatively small and builds small earth-nests. Moreover, the three first-named ants are two-coloured (red and black), and so are the corresponding *Dinarda*. The last-named ant, however, is of a more uniform dark colour, as is also the corresponding *Dinarda*. Now comparative zoogeography contains some indications according to which the similarity of colour and proportion of size must be attributed to actual adaptation. For (1) there are regions in Central Europe in which only *F. sanguinea* with *D. dentata*, and *F. rufa* with *D. Märkeli* are found, whereas *F. exserta* and *F. rufibarbis* do not harbour any *Dinarda*- forms at all. Secondly, there are districts in which the four forms of *Dinarda* are living with their four hosts and yet hardly ever showing transitional forms. Thirdly, in other parts there are more or less continuous intermediate forms. *D. Dentato-Hagensi* living with *F. exserta*, and *D. Hagensi-pygmæa* living with *F. fusco-rufibarbis*. The nearer a *Dinarda* approaches the form of *D. pygmæa*, the more frequently it is found with *F. fusco-rufibarbis*. To all this must be added, that the adaptation in general appears to have kept pace with the historical freeing of Central Europe from ice, though numerous exceptions must be explained by local circumstances, especially by isolation. Considering these facts, we are inclined to believe that *D. pygmæa* especially presents an example of real adaptation *in fieri*, though this

adaptation cannot be called a progressive one, since the more recent forms, *Hagensi* and *pygmæa*, are only smaller in size and of a more uniform colour. But at the same time it seems to us that the adaptation of the *Dinarda* cannot be considered as an example to illustrate specific evolution, because, as we have shown elsewhere, there are many instances in nature—we mention only the races and other subdivisions of the human species—that likewise present different degrees of adaptation far more pronounced than that found in the *Dinarda*, but which are not, and cannot on that account be, quoted as examples of the formation of new specific characters.

(2) *Single Variations* are presumably of far greater importance for the solution of the evolution problem than individual differences; for they are discontinuous and constant, and are therefore capable of explaining the gaps between existing species and those of palæontology. We use the term *single variation* when, from among a large number of offspring, some one particular individual stands out that differs from the rest in one or more characteristics which it transmits unchanged to posterity. It is said to be peculiar to the single variations that they cannot be reduced to crosses. If this is possible, we speak of "analytical variations". Favourable conditions for the appearance of single variations are altered environment, a liberal sowing of seed, and excellent nourishment. It is a remarkable fact that the fertility of single variations decreases considerably, and this the more so the greater the deviation from the parents. Besides, the newly produced forms are comparatively weak. This weakness and inclination to sterility are facts which must be carefully weighed when determining the probable importance of single variations for specific evolution. Besides, it is—to our knowledge—in no case excluded that the suddenly arising form may be traced back to former crossings. Probably the only case which is quite generally interpreted to demonstrate specific evolution experimentally is that of the primrose observed by de Vries. After many failures with more than 100 species, de Vries, in 1886, determined to cultivate the evening primrose (*Oenothera Lamarckiana*), whose extraordinary fertility had attracted his attention. He chose nine well-developed specimens and transplanted them into the Botanical Garden of Amsterdam. The cultivation was at first continued through eight generations. In all he examined 50,000 plants, among which he discovered 800 deviating specimens, which could be arranged in seven different groups, as shown in the following table:—

Generation	O.xgigas	albida	oblonga	rub-rinervis	Lamarckiana	nanella	lata	Scintillans
I. 1886-87	1	15	176359	1820	9000000	509121	5373142	16
II. 1888-89	—	2511-5	1	3—	8000070		5-1	1—

III. 1890-91								
IV. 1895								
V. 1896								
VI. 1897								
VII. 1898								
VIII. 1899								

The specimen of *O. gigas* (1895) was self-fertilized and yielded 450 *O. gigas* forms, among which there was only one dwarf form, *O. gigasnanella*. The three following generations remained constant. *O. albida* was a very scaly form, though it succeeded, thanks to regular attention, in breeding constant offspring. Among the *O. oblonga* descendants there was one specimen, *albida*, and in a later generation one specimen of *O. rubrinervis*. *O. rubrinervis* proved to be as fertile as *Lamarckiana*, and yielded besides a new variation, *leptocarpa*. The offspring of *O. nanella* was constant, though among the 1800 descendants of *nanella* in 1896 three specimens showed *oblonga* characteristics. *O. lata* was purely female; but, fertilized with pollen of other variants, it yielded 15 to 20 per cent *O. lata* descendants. *O. scintillans* was not constant. According to de Vries' observations (since 1886), new forms also originated in nature, but they succumbed in the struggle for existence. The differences between the single forms relate to various parts and degrees of development, though in several they are very slight. The plants become either stronger or weaker, with broader or narrower leaves; the flowers become larger and darker yellow, or smaller and lighter, the fruit longer or shorter, the outer skin rougher or smoother, etc.

It may be conceded that the *Oenothera* has developed constant forms corresponding to the so-called "small or elementary species". The question, however, is, whether the forms are really new ones or whether they owe their origin to some unexpected original cross. In fact, if we are to suppose a previous cross, perhaps *O. Lamarckiana* and *O. sublinearis*, then the *O. Lamarckiana* of Hilversum had contained the different variations in a latent form and through cultivation gradually reverted by throwing off the different variations. At any rate, there cannot be any question of a progressive development, for the reason that none of the new forms shows the slightest progress in organization or even development of any kind advancing in that direction.

(3) *Crosses and Mendelian Segregations*. Cross-breeding can in nature hardly be considered as a factor in the progressive development of species; in particular, forms of different degrees of organization do not cross, and if they did, all deviations would soon be equalized according to the laws of chance and probability. All the greater

seems to be the importance of the Mendelian segregations. It may be known to the reader that the famous experiments of the Abbot Mendel were carried on with seven different pairs of characters which he crossed with one another, and then, by letting the cross-breeds self-fertilize, he continued the cultivation of the plants through a series of generations. In the first generation it was found that the offspring exhibited without exception the character of one of the parents, that of the other parent not appearing at all. Mendel therefore called the former—the prevailing—character the "dominant" and the other the "recessive". In the following generation, which was produced by letting the cross-breeds fertilize themselves, the recessive character appeared and, moreover, in a definite proportion. On an average this proportion was 2.89:1 or 3:1. In the second generation 75 per cent of the whole number of plants exhibited the dominant character, and 25 per cent the recessive. No intermediate forms were observed in any case. In the third generation the offspring of the recessives was constant and remained pure recessives, but among the offspring of the dominants some remained constant dominants, while others were hybrids. The average proportion of the constant dominants (D) to variable cross-breeds (DR) was as 1:2. Thus, besides the 25 per cent of constant recessives (R), there was also 25 per cent (one-third of 75 per cent) constant dominants (D) and 50 per cent (two-thirds of 75 per cent) variable crossbreeds (DR) or $1D+2DR+1R$. The same proportion resulted from the following generations of the crossbreeds, and since 1900 this has been confirmed by other investigators in the case of other plants (e. g. maize) and also of animals (e.g. gray and white mice).

Mendel's rule of segregation, therefore, runs thus: The hybrids of any two different characters produce seeds, one half of which again develop the hybrid forms, while the other half yield offspring which remains constant, and possess the dominant and recessive characters in equal proportion. A simple analysis of this rule shows that it consists of three parts: (a) By fertilization the characters of the parents are united, without, however, thereby losing their purity and independence; (b) In the offspring the characters of both parents may again be separated from each other; (c) The character of one of the parents may completely conceal that of the other. This last part of the rule is not, according to later investigators, necessarily connected with the other two parts. We may add that Mendel's rule also holds good for the offspring of hybrids in which several constant characters are combined, and that in it there is found a splendid confirmation of the modern theory of the cell. Cross-breeding, therefore, does not by any means lead to the mixing of characteristics. These, on the contrary, remain pure, or, at most, form new combinations or split up into simpler components. Hence, the idea that gaps in nature originate through such segregation is well founded. But the question, whether the idea is to be applied to the formation of species, and how this is to be carried out, can scarcely be answered at present. This much, however, is

evident: that there is no progress in organization any more than there is any progressive specific development, brought about by segregation.

Hence this important conclusion follows: That the central idea of modern evolution theories—namely, progressive specific development—has not up to the present received any confirmation from observation of the world of organisms as it now exists. It is quite true, however, that the plasticity of organisms has been proved by a number of experiments to be very considerable; so that, in a constant environment, and by single variations, changes may be brought about which a systematist would classify as specific or even generic, if it were not clear from other sources that they are not such. In the same way forms could be developed by segregation, the characteristics of which would suffice "to constitute specific differences in the eyes of most systematists, were the plants or animals brought home by collectors" (Bateson). Yet such criteria are meaningless for the demonstration of the formation of species. The question as to the transmission of acquired characters is not by any means decided. It follows from the doctrine of propagation that only such characters can be transmitted as are contained in the germ-cells or which have been either directly or indirectly transmitted to them. Hence it is clear that all peculiarities acquired by the cells of the body through the influence of environment, or by use or disuse, can only be inherited if they are handed over, as it were, to the germ-cells. But it is useless to discuss the question before we have sufficient experimental evidence that acquired characters are at all inherited.

IV. THE PALÆONTOLOGICAL ARGUMENT

(1) *Historical Method.* Before entering upon the discussion of the evidence furnished by palæontology we must briefly refer to the method which ought to be employed in the interpretation of the palæontological records. The great archives of the geological strata are very incomplete. Almost three-quarters of the earth's surface is covered with water, and another part with perpetual ice, while of the rest but a fraction has remained free from the ravages of water and the elements; of this small portion, again, only certain regions are accessible to the investigator, and these have been but partially examined. Besides, in most cases only the hard portions of organisms are preserved, and even these are often so badly mutilated that their correct classification is sometimes difficult. Many of them, especially in the oldest rocks, must have perished under the crushing force of metamorphic processes. Further, the geographic distribution of plants and animals must have varied according to climatological and topographical mutations. It may suffice to cite the glacial periods of which there are clear indications in various geological epochs. Finally, the geological strata themselves underwent many violent strains and displacements, being upheaved, tilted, folded again, and even entirely inverted. It is evident that every one of these phenomena increases the chaos in its own way and makes the work of classifying and restoring all the harder. It gives at the

same time to the scientist the right to formulate hypotheses probable in themselves and adapted to bridge over the numerous gaps in the work of reconstruction in the organic world. But these working hypotheses ought never to assume the form of scientific dogmas. For after all, the documents which have really been deciphered are the only deciding factor. At all events, the chronological succession and the genetic relation of organisms cannot be determined by aprioristic reasoning, or by means of our present system of classification, or by applying the results of ontogenetic studies. One illustration may suffice. Some maintain that trilobites are descended from blind ancestors because certain blind forms exhibit a number of simple characteristics which are common to all specimens. And yet we know that, e.g., *Irinucleus* possesses eyes in the earlier stages of its development, and only becomes blind in the later stages. The non-existence of eyes is, therefore, due to degeneration, and does not point to a former eyeless state. As a matter of fact, specimens of trilobites possessing eyes are found side by side with eyeless specimens in the lower Cambrian strata. Other examples of false à priori conclusions are to be found in the extraordinary genealogies constructed by extreme evolutionists, and which dissolve like so many mists in the light of advancing investigations. In fact, up to the present the agreement on ontogeny and phylogeny has not been proved in any single instance. In short, if we disregard observation and experiment on living organisms, it is the historical method alone which can decide the limits of evolution and the succession and genetic relations of the different forms. "In the substitution of the hypothetical ancestors by real ones lies the future of true phylogenetic science" (Handlisch).

(2) *The Oldest Fossils*. Now let us turn to the documents themselves and see what they have to show us. The foundation of the Archives is formed of gneiss and crystallized slate, a rigid mass containing no trace of organic life, and one which offers to the palæontologist the hopeless outlook that his science must remain in a very incomplete state, perhaps forever. Immediately above this foundation, nature has imbedded the multitudinous, highly-developed Cambrian fauna, without leaving the slightest trace of their antecedents, origin, birth, or age. Some 800 species of this remotest period are known to us. They belong almost without exception to marine fauna, and are distributed over all the chief groups of the invertebrates. Nearly one-half of them are arthropods. They are the well-known trilobites which occupy a position about the middle of the scale of animal development. Other groups belong to coelenterates, brachiopods, gastropods, and cephalopods. Sponges, too, and traces of worms are found, as also very imperfect fragments of scorpions and other insects. Moreover, there can be no doubt that various types of fishes must have existed, since in the Silurian age numerous representatives, such as selachians, ganoids, marsipobranchs, dipnoans, are found from the very beginning side by side. Where are the ancestors of these highly specialized

beings? The one thing we may affirm is that we know absolutely nothing whatever of a primitive fauna and of the numberless series of organisms which must have followed them up to the Cambrian era, for the simple reason that we possess absolutely no evidence. Moreover, there is not the least trace of palæontological evidence in favour of the spontaneous awakening of protoplasmic masses up to the time of the Cambrian era. The Cambrian types were all of them specialized forms perfectly adapted to time and environments, and not generalized types of zoological systems. The origin of the plant world is also shrouded in impenetrable darkness for the palæontologist. The enormous layers of anthracite and graphite are, according to the most recent investigations, of inorganic origin. Clearly established evidence of plant life only dates from post-Silurian times, and consists of contents of the oldest turf moors—giant-ferns and horsetails, plants akin to the club-mosses, like the *Lepidodendron*, and Gymnosperms, like the slender *Cordaites*. One is astounded at the rich forms of this long-lost flora, and we search in vain for their ancestors.

It is certainly remarkable, and a fact which clearly proves the transformation of species, that plants belonging to these remote times vary considerably from their later representatives. But, as Kerner von Marilaun insists, the "fundamental structure of the type" is never obliterated, and the degree of organization has at least remained the same. In particular, the present dwarf-forms of the horse-tails and club-mosses are but miserable remains of their mighty ancestors, and the *Cordaites*, though different from the present conifers, were as highly organized as they. To this must be added the recently discovered fact that seed-bearing plants, which constitute a considerable part of the fern flora of the Carboniferous, are found among the ferns of the Devonian era.

(3) *Angiosperms and Vertebrates*. But how did the undoubtedly higher forms of a later period originate? To begin with the angiosperms, we are confronted with the fact that these organisms appear quite suddenly in the Cretaceous era and, what is more remarkable, in forms as highly organized as their present representatives. It is a fact that principally the dicotyledons (at least those in the more recent strata) correspond more and more to the present-day forms, clearly indicating the relationship they bear to one another. But whence the earliest forms of the cretaceous came, is shrouded in mystery. Similarly, the gradual transformation of one species into another cannot be proved in any concrete case. Only this much is certain, that if evolution took place, it involved a change which did not imply attainment to a higher stage of organization. It must be borne in mind, moreover, that we know of no intermediate forms capable of justifying even as much as a hypothesis that angiosperms were evolved from lower plants. If the origin of the angiosperms is for the present an insoluble problem, the genesis of the vertebrates is no less so. However, in order not to pass entirely over the post-Cambrian history of the invertebrates, we must at least make mention of the sig-

nificant fact that this fauna seems to be constantly changing, but without ascending to higher forms of organization. The modification is especially manifest in the shell-bearing groups, owing to the changed size, form, and ornamentation of their shells, and in this offers a very acceptable basis for the establishment of a series of kindred forms—e.g., with the gastropod genus *Paludina* of the Slavonian tertiary strata. But since such structures depend almost entirely on the calcareous nature of the medium, and on the varying kind and amount of movement, we can scarcely be inclined to regard an increased ornamentation of the shell as a mark of real progress in organization, but at most as a temporary development of actual dispositions due to varying conditions of life.

The first authenticated ancestors of the vertebrates are the fish-remains of the lower Silurian era. Widely removed from them we find in the carboniferous strata the oldest remains of the amphibian quadrupeds and, associated with them, forms of reptiles whose sudden appearance and equally sudden disappearance belong to the unsolved problems of palæontology. Among the Mesozoic fishes we encounter old forms together with teleosts which suddenly appear in the limestone strata without producing any transitional forms. It is generally supposed that the teleosts represent a higher grade of organization than the ganoids; as a matter of fact, the teleosts, it would seem, have no structural advantage over the cartilaginous fishes in the lesser hardness of the scale and the greater hardness of the skeleton. This is, however, but a shifting, as it were, of development, as the disappearance of the rigid body-covering is compensated for by the ossification of the skeleton. At any rate, the origin of the teleosts is an unsolved problem, as is that of the Silurian ganoids. The appearance of birds and mammals is likewise very mysterious. The first known bird is the famous "bird-reptile" *Archæopteryx* of the Jurassic strata at Soluhofen. In spite of some characteristics that remind one of reptiles—as for instance the twenty homologous caudal vertebræ, the talons, the separated metacarpal bones and the toothed jaw—yet the true bird nature is evinced by the plumage, the pinions, and the bill. In fact, *Archæopteryx* is far removed from the reptiles, nor does it constitute any connecting link with the later birds, not even with the toothed *Ichthyornis* and *Hesperonis* of the upper Cretaceous era. Certainly the two isolated specimens from Soluhofen indicate that birds must have existed a long time before; but where their place of origin is, none can tell.

Palæontology is silent likewise about the early history of mammals. The mesozoic representation of this class may have some connection with marsupials, monotremes, and insectivorous animals, but as to the early history of the great majority of placental mammals we have no evidence whatever. A vast number of intermediate forms would certainly be required to connect the mammals with the reptiles. No such series of forms is known. Even the genealogy of the horse, which is considered the most striking ex-

ample of an evolutionary series within a mammalian family, is scarcely more than a very moderately supported hypothesis. Let the reader consider the accompanying table of differences in the palæontological representatives of the Equidæ. Upon the facts embodied in this table, which chiefly refer to fossils found in North American strata, the following comments are suggested: The genera of the Equinæ lived contemporaneously, though it must be conceded that in some sedimentary deposits their series seems to be continuous. Secondly, the sub-families show great differences between one another. Of the *Merychippus*, which connects the *Equinæ* with the *Pæleotherinæ*, we know only the teeth. Thirdly, if we take the European material into consideration as well, we are confronted with widely divergent opinions, so much so that the brilliant pedigree becomes greatly dimmed. In particular, the Eocene forms and the still more remote genus *Phenacodus* are avowedly very dubious ancestors of the horse. Lastly, it is well within the range of possibility that the ancestors of the *Equinæ* and the descendants of the older sub-families have remained undiscovered up to the present time.

(4) *Man*. It remains for us briefly to examine the historical records to see if we can obtain reliable information concerning the last and most important "ascent" to *Homo sapiens*. The oldest authenticated traces of man consist of stone implements, and they are derived from the lower Quaternary strata. Whether the so-called "eoliths" of the Tertiary Era are really the handiwork of man, cannot be decided with certainty. Eminent scientists, as Boule, Obermaier, de Lapparent, in their works published in 1905, have denied the human origin of these objects. Concerning the first stages in the civilization of diluvian man little can be said. The period, according to Hoernes, falls under three sub-groups, separated from one another and preceded by a glacial period. The first intermediate epoch (*époque du grand ours*) lies close to the Pliocene age and is called, after the principal place of its discovery, the stage of Tilloux-Taubach (Krapina), or ChelléoMoustérian. The fauna is mostly tropical and includes, among others, *Elephas antiquus*, *Rhinoceros Merckii*, and, most important of all, *Ursus spelæus*. Taubach's field of discovery was a camp in which the fireplace, remnants of food, and the simple utensils of Germany's first inhabitants were found *in situ* (Hoernes). The second intermediate epoch (*epoch du mammoth*) is named the Solutréen stage, after the place where important discoveries were made in France. It contains, besides the mammoth, the wild horse and numerous predatory animals such as *Leo*, *Ursus*, *Hyæna*, etc., though the numbers greatly decrease as we draw to the end of the period, while the *Ursus spelæus* becomes entirely extinct. A large number of the stone implements are of fine workmanship and there are, besides these, various kinds of carving on bone and ivory plastic figures of men, and drawings of animals on the walls of the caves. The cave of Combarelles (Dordogne), for example, is decorated with 109 drawings of animals. The ornamentation in the Solutréen, with its wavelike curves and spirals, in-

dicates an almost enigmatical degree of development which would appear to be more in keeping with the culture of the metal age than with the more remote stone age. The third intermediate epoch (*époque du renne*) had a bleaker climate. It is called the Magdaleine stage, after La Magdaleine, in France. The stone implements are homely, but often very finely constructed, "small implements made for delicate hands by delicate hands" (Hoernes). Pointed and hooked hunting weapons were also found, as well as numerous instruments of various kinds manufactured out of bone and horn, and all of them reveal considerable artisan taste and judgment. Real frescoes adorn the walls of the Font- de-Faune cave. In all, eighty figures are represented, of which number forty-nine are those of bisons.

From what has been said we may conclude that man, in the first stage of civilization known to us, appears as a true *Homo sapiens*; but how he arrived at that stage is a problem we are quite unable to answer, because all records are wanting. The bones, too, which are supposed to date from the primeval age of man are little calculated to solve the problem. A short résumé of the results of recent investigations will make this clear. *Pithecanthropus erectus*, the famous ape-man of Trinil (Java), cannot be considered "the long-sought missing link in the chain of the highest Primates". As is well known, we have to do with a cranium of 850 sq. cm. capacity, a thigh-bone, and two molar teeth; the skull and the thigh-bone were found lying about 16 yards apart. It is true the skull differs somewhat from the skulls of present-day anthropods; it is, however, in general characteristics thoroughly apelike, as was pointed out recently by Schwalbe, Klaatsch, Macnamara, and Kohnbrugge. The thigh-bone, according to Bumüller, bears the closest resemblance to the femur of the ape *Hylobates*. Hence the appellation *erectus* is a misnomer. Add to this that, according to the latest researches, *Pithecanthropus* must have been a contemporary of primitive man, since the strata in which the bones were found are diluvial. Hence *Pithecanthropus* cannot belong to the ancestral line of man. The bones of the Neandertal race of the *Homo primigenius* are undoubtedly human, and have given rise to renewed interest through the valuable discoveries made in Krapina. The Neandertal skull itself serves as a type which, owing to the low, receding forehead and the strongly developed supra-orbital ridges, appears to be very primitive, though no one knows the actual geological conditions of the place where it was originally deposited. We pass over the fact that twenty scientists have expressed twelve different opinions on this mysterious cranium, and confine ourselves to the latest opinion of Schwalbe, who says that the Neandertal cranium exhibits forms which are never found in either a normal or a pathologically altered *Homo sapiens*, whether Negro, European, or Australian, and yet at the same time the skull does exhibit human characteristics. In a word, the Neandertal skull does not belong to any variety of *Homo sapiens*. Kohnbrugge very aptly compares Schwalbe's hypothesis to an upturned pyr-

amid balancing on a fine point, since a single Australian or Negroid skull which may be found to agree with the Neandertal skull suffices to overthrow the hypothesis. Such a skull has not as yet been found, but there are other factors which suffice to shake Schwalbe's hypothesis. These have reference to the other diluvial bone remains of *Homo primigenius*, amongst others to the petrified Gibraltar skull, to two molar teeth from the Taubach cave, to the two fragments of a skull from the mammoth caves of Spy, and the jawbones from La Naulette, Schipka, Ochos, and, finally, to considerable remains of bones, such as fragments of skulls, lower jawbones, pelvic bones, thigh and shin bones, from a cave near Krapina in Croatia. To these must be added the "Moustier skull" which was dug up in August, 1908, in Vézère (Dordogne). All these fragments possess fairly uniform characteristics. Especially worthy of note are, above all, the cranium with its prominent supra-orbital ridges and receding forehead. These qualities, however, are not infrequently found in men of the present day. Australians exhibit here and there even the genuine supra-orbital ridges (Gorjanowic-Kramberger). It cannot be clearly decided whether we are dealing with purely individual characteristics or with peculiarities which would justify us in classifying the Krupina fragments as belonging to a special race. But this much is clear, that the formation of the skull and the degree of civilization of that race are quite sufficient to permit of our designating *Homo primigenius* not as a species of itself, but merely as a local sub-division of the *Homo sapiens*. The Galley Hill skull, from England, which is still older than the Krupina bones, points to the same conclusion and corresponds with the more recent skulls of post-diluvial man. Hence, to sum up, we may affirm that we are acquainted with no records of Tertiary man, that the most ancient remains of the Quaternary belong to the Galley Hill man, whose skull worthily represents *Homo sapiens*. The same is to be said of the oldest traces of civilization as yet known to us.

Palæontology, therefore, can assert nothing whatever of a development of the body of man from the animal. It may be added that Haeckel's curious "Progonotaxis", or genealogy of man, is a pure fiction. It consists of thirty stages, beginning with the "moners" and ending with *homo loquax*. The first fifteen stages have no fossil representatives. As to the rest, we may concede that many of these groups actually exist, but we do not see a single argument of any probability for Haeckel's assertion that these groups are genetically related. As to the age of the human species, no assertion can be made with any degree of certainty; thus far there are no indications whatever that would justify an estimate of more than 10,000 years. Still, less are we enabled to say anything definite as to the probable age of life. The numbers given by different authors vary between twenty-four and upwards of one hundred million years. De Vries's calculation is of especial interest because it is based on his *Cenothera* studies. Mainly to show the superiority of the mutation theory to the selection theory, de Vries assumes

that the primrose contains 6000 characteristics, and that a "mutation", or acquisition of a new character, takes place after every 4000 years; so that $4000 \times 6000 = 24,000,000$ (=Lord Kelvin's average value) would represent the biotronic equation, which of course consists of unknown variables only, and rests, moreover, on the unproved assumption that a mutation consists in the acquisition of a new character and that such mutations have really occurred.

V. THE MORPHOLOGICAL ARGUMENT

(1) *In General.*—The groups and sub-groups of the plant and animal world are built up according to the same fundamental plan of organization. This important fact, on which all classification rests, is said to be explained by the hypothesis that the different groups (e.g. the vertebrates) have been evolved from forms possessing the peculiarities of the type, while the differences are said to have been brought about by modifications (e.g. adaptation to the environment). The original form or type is imagined to be as primitive as possible, while its modification is said to mark progress, so that those organisms which have the simplest structure are said to correspond to the most ancient forms, the more perfect specialized forms being the most recent.

Are these conclusions well founded?—The plain facts are these: (a) Groups of organisms exhibit similar fundamental forms, which, however, (b) show similar divisions with a more or less perfect degree of organization. In the first place it is difficult to understand why the lower organized forms should be historically the older. According to the evidence furnished by palæontology, this is in many instances positively false, and in no case is it demonstrable, while philosophically it is only possible in as far as the simple forms actually possess the peculiarities of their descendants at least in some latent condition. Secondly, it is hard to see why similarity of structure should prove common origin. As a matter of fact, palæontology knows nothing of common primeval forms; on the contrary, it points to parallel series whose origins are unknown. It is not improbable, moreover, that resemblances of structure and function in nature frequently represent instances of convergence, through which widely different organisms assume similar modifications of form under similar conditions of life. For example, certain species of the *asclepiadaceæ* (*Stapelia*), *euphorbiaceæ* (*Euphorbia*) and cactus have, in all probability, acquired their similar fleshy form from the adaptation of leafy forms to the aridity of the locality in which they grew, and only preserved the different family characteristics in the structure of the flower. The similarity which exists between whales and fishes can be considered merely as an instance of convergence, and no one will assert that the whale has developed from the fish because it happens to be provided with fins. As a matter of fact there are numberless analogies which no serious student would ever dream of reducing to a common origin. Take, for example, the cell-division in plants and animals, the method of fertilization, and other analogies of structure and

function in vastly different groups. Finally, the chief problem, which refers to teleology of adaptive modifications, is not even touched by the doctrine of descent from common ancestors.

(2) *Man and the Anthropoids.*—Palæontology knows of no records that point to the relationship between the body of man and that of the anthropoid. Hence it follows that the argument of analogy and classification is of little worth. But, as ever and again attempts are made to discover analogies between every bone of man and the corresponding part of the ape (e.g. Wiedersheim), it will be useful to gather a few of the more important morphological discrepancies which exist between man's body and that of the anthropoids (orang-utang, chimpanzee, gorilla). It is, however, far from our intention to attribute to these differences any great argumentative force, especially against those who suppose that there was a common primeval ancestor from which both man and ape finally descend; nor do we wish to deny that zoologically the human body belongs to the class of the mammalia, nor that within this class there is any representative more similar to it than the anthropoids.

Of these differences the most important lies in the development of the brain of man and of the anthropoid, which is seen from the comparison of the weights. According to Wiedersheim we are forced to admit that the relative mass of the human brain is twice that of the chimpanzee, while, absolutely, it is from three to four times as great. The same is probably true of the orang-utang, while the brain of the gorilla, which, according to Wiedersheim, is the most humanlike of any of the anthropoid brains, is relatively only one-fifth that of man's. The human skull is from three to four times as large as that of the anthropoids. The difference becomes much more striking still when we compare the cerebral hemispheres and their convolutions. The weight of the brain of a male Teuton of from thirty to forty years of age is on the average 1424 grammes, that of a female 1273 grammes, and that of a full-grown orang only 79.7 grammes (Wundt). The proportion is therefore from 18:1 to 16:1. If we measure the superficial area of man's brain with all its convolutions and that of the orang we have, according to Wagner, from 1877 sq. cm. to 2196 sq. cm. for the human brain and 533.5 sq. cm. for that of the orang—that is a proportion of 4.4:1. It is further to be taken into consideration that, as Wiedersheim points out, the human brain is not to be looked upon as an enlarged anthropoidal one, but as a "new acquisition with structures which the anthropoidal does not as yet [!] possess". These new acquisitions are presumably qualitative and refer mainly to the centre within the great cerebral hemispheres. Intimately connected with the development of the brain is the moderate development of the dentition of man in comparison with the chinless snout of the monkey, which is armed with powerful teeth. Again, "the human face slides as it were down from the forehead and appears as an appendix to the front half of the skull. The gorilla's face, on the

contrary, protrudes from the skull, which on return slides almost entirely backwards from the face... It is only on account of its protruding, strongly developed lower parts that the small skull-cap of the animal can mask as a kind of human face" (Ranke).

A second group of differences is obtained by comparing the limits of man and the anthropoid. Owing to his upright stature, man's appendicular skeleton is quite different in form and structure from that of the anthropoid. This is shown not merely by the length of the single parts, which, strangely enough, exhibit inverse proportions, but also in the interior structure of the bones, as was proved by Walkhoff (1905) in the case of the femur. If we suppose the length of the body to be 100 we have, according to Ranke, the following proportions:-

Part	Gorilla	Chimpanzee	Orang	Negro	German
Arm and hand Leg	64.934.9	67.735.2	80.734.7	45.1648.5x	45.4348.8 x

Special measurements taken from the skeletons of an adult Frenchman and an orang, represented in the accompanying plate, gave the following particulars:-

x	Humerus	Radius	Ulna	Femur	Tibia
ManOrang	28 cm.36 x"x	22 cm39.8 "	25 cm.41 x"	47 cm.31 x"	37 cm.25 x"

The sponge-like structure in the femur of man and anthropoid exhibits considerable difference, so that it could be established by means of radiogrammes whether the femur was that of an upright walking individual or not; e.g., it was possible to prove the Neandertal and Spy femora to be human. The foot of man is, moreover, very characteristic. It is not furnished with a thumb that can be bent across the whole member, and hence it does not represent a typical prehensile organ, as is the case with the hind feet of the monkey. In general, each bone and organ of man could in some sense be styled ape-like, but in no case does this similarity go so far that the form peculiar to man would pass over into the form which is peculiar to the ape. This conclusion is confirmed by the fact that, according to Ranke and Weisbach, all the efforts to discover a series of bodily formations which would lead from the most apelike savages to the least apelike Caucasians have till now resulted in utter failure, since the apelike forms of organs actually found in some individuals are not confined to a single race or nation, but are distributed throughout all of them. Tailed ape-men, in the proper sense of the word, have no existence. If sometimes tail-like appendages occur, they are genuine deformities, pathological remnants of the individual's embryonic life. Cretins and microcephali are likewise pathological cases. The theory that such were the ancestors of the human species is certainly excluded by the fact that they are unable to procure independently the necessary means of existence.

(3) "*Blood Relationship*" between Man and the Anthropoid—In 1900 Friedental thought that he was able to prove the kinship of man and the anthropoid biochemically by showing, first, that the transfusion of human blood-serum into the chimpanzee was not followed by any signs of blood-poisoning, as usually happens on the introduction of foreign blood, and, secondly, that human serum did not produce a reaction when introduced into a solution of the blood of the orang and gibbon, while on the other hand it dissolved the blood corpuscles of the lower apes. A little later Nutall and others proved that anti-sera exercised an opposite effect. An "anti-man-serum" was prepared by injecting subcutaneously sterile human serum into a rabbit till the animal became immune to poisoning from the foreign blood-serum. The "anti-man-serum" of rabbit-blood thus prepared gave a precipitate with the blood-serum of man or of an animal with chemically similar blood, for instance anthropoids, but not with the serum of chemically different blood. The force of the argument lies, therefore, in this, that the chemical reaction obtained seems to be on the whole proportional to the degree of their chemical affinity.

What follows from these facts?—Only this, that the blood of man is chemically similar to that of the anthropoids; but it does not follow that this chemical similarity must be attributed to any kinship of race. The mistake arises from the confusion of the ideas "similarity of blood" and "blood-relationship" in the genealogical sense of the term; otherwise it would be at once perceived that the fact of chemical similarity of blood is of no more importance for the theory of evolution than any other fact of comparative morphology or physiology.

(4) *Rudimentary Organs*.—One of the special arguments commonly cited in favour of the evolution theory is based on the frequent occurrence of rudimentary structures in organisms. As examples we may mention the following: Pythons and boas possess vestiges of hind legs and of a pelvis separated from the vertebral column.—The slow-worm is without external limbs, and yet possesses the shoulder-girdle and the pelvis, as well as a slightly developed breast-bone.—The ostrich has merely stunted wing-bones, while the nearly extinct kiwi (apteryx) of New Zealand has only extremely small stumps of wings, which are clothed with hair-like feathers.—The gigantic birds of New Zealand which became extinct in past ages were entirely wingless.—Well worthy of note, also are the rudimentary organs of the whale (*Cetacea*), since of the hind limbs only a few minute bones remain, and these are considered to be the pelvic bones, while the Greenland whale (*Balæna mysticetus*) also possesses thigh and leg bones. The bones of the fore-limbs are not movable independently of one another, being bound together by means of tendons.—Other remarkable vestigial structures are the teeth of the Arctic right whale, which never penetrate the gums and are reabsorbed before birth, the upper teeth of the ox, the milk teeth and the eyes of the mole. The deep sea fish, like the

Barathronus, have instead of eyes "two golden metallic concave mirrors" (Chun).—Nor is man devoid of rudimentary organs. Wedersheim mentions no fewer than one hundred. But of these only a few are genuine. The vermiform appendix may serve as an example, though according to recent research it is not entirely functionless. Its length oscillates between 2 cm. and 23 cm., while its breadth and external form vary exceedingly. Probable reasons for its partially rudimentary character are, besides its extreme variability, especially two facts in particular: the length of the organ compared with that of the large intestine is as 1:10 in the embryo, and as 1:20 in the adult; secondly, in 32 per cent of all cases among adults of over twenty years of age the appendix is found to be closed.

Do such rudimentary organs furnish us with an acceptable proof for the theory of evolution?—It is to be admitted that in many instances the organs were formerly in a more perfect condition, so as to perform their typical functions—e.g., the eyes of the mole as organs of sight; and the limbs of the kiwi as means of locomotion for running or even for flying. Hence those individuals which now possess rudimentary organs are descended from ancestors which were in possession of these same organs in a less degenerated condition. But it cannot be ascertained from the structures whether those ancestors were of another kind than their offspring. The vermiform appendix in man is fully explained by supposing it to have had in antediluvian man a more perfect function of secretion, or even of digestion. Until the palæontological records furnish us with evidence we can only conclude from the occurrence of rudimentary structures that in former ages the whale possessed better developed limbs, that the moles had better eyes, the kiwi wings, etc. In short, rudimentary organs per se do not prove more than that structures may dwindle away by disuse.

Haeckel's endeavour to invalidate the teleological argument has no foundation in fact. In many cases the function of rudimentary organs has been discovered—e.g., the rudimentary teeth of the whale are probably of use in the growth of the jaw; the breast-bone of the slow-worm as a protection of the chest. But even in instances in which we have not succeeded in discovering the function of such structures, it must not be forgotten that degeneration may be eminently teleological in furnishing material for other organs whose functions become more important. Moreover, as long as rudimentary organs remain, they may become, under altered circumstances, the starting-point for an appropriately modified reorganization. It is indeed difficult to see how "dysteleology", as Haeckel calls it, follows from the fact that an organ adapted to specified means of livelihood disappears, probably in order to strengthen other organs when those means of livelihood are changed; and, until the contrary is proved, we may assume that we have to deal with instances of teleological adaptation and correlation, as has already been demonstrated in many cases—e.g., in the development of amphibians.

VI. THE ONTOGENETIC ARGUMENT

Comparisons between the embryos of higher forms and the adult stages of lower groups were made long before the evolution theory was generally accepted by biologists. But it was only after 1859 that the facts of embryology were interpreted by means of that theory. Fritz Müller (1864) was one of the first to advance the view that the ontogenetic development of an individual is a short and simplified repetition of the stages through which the species had passed. Haeckel modified the proposition by introducing the term "kenogenesis", which should account for all points of disagreement between the two series of development. In its new form the theory of recapitulation received the name "the biogenetic law of development". Later on Hertwig reformed the law a second time by changing the expression "repetition of form of extinct ancestors", into "repetition of forms necessary for organic development and leading from the simple to the complex". Besides, considerable changes, generally in an advancing direction, are said to have been brought about by the action of external and internal factors, so that in reality "a later condition can never correspond to a preceding one". Both Haeckel's and Hertwig's views were rejected by Morgan, who does not believe in the recapitulation of ancestral adult stages by the embryo, but tries to show that the resemblance between the embryos of higher forms might be due to "the presence in the embryos of the lower groups of certain organs that remain in the adult forms of this group". According to Morgan, we are justified in comparing "the embryonic stages of the two groups" only—a theory which he calls "the repetition theory".

Perhaps the most striking fact to illustrate the ontogenetic argument is the resemblance between the gill-system of fishes and certain analogous structures in the embryos of the other vertebrates, man included. However, contrary to the statements of most scientists, we do not think that the resemblance is such as to justify us in concluding "with complete certainty that all vertebrates must in the course of their history have passed through stages in which they were gill-breathing animals" (Wiedersheim). The embryos of fishes are at a certain very early stage of development furnished with vertical pouches which grow out from the wall of the pharynx till they fuse with the skin. Then a number of vertical clefts (gill-slits) are formed by the fact that the walls of the pouches separate. In the adult fishes the corresponding openings serve to let water pass from the mouth through the gill-slits, which are covered by the capillaries of the gill-filaments. In this way the animal is enabled to provide the blood with the necessary oxygen and to remove the carbon dioxide. Now it is quite true that in all vertebrates there is some resemblance as to the first formation of the pouches, the slits, and the distribution of blood-vessels. But it is only in fishes that real gill-structures are formed. In the other vertebrates the development does not proceed beyond the formation of the apparently indifferent pouches which never perform any respiratory function nor

show the least tendency to develop into such organs. On the contrary, the gill-slits and arches seem to have, from the very beginning, a totally different function, actually subserving, at least in part, the formation of other organs. Even the amphibians that are furnished with temporary gills form them in quite a peculiar manner, which cannot be compared with that of fish-embryos. Besides, the distribution of blood-vessels and the gradual disappearance of seemingly useless structures, as the "gill-systems" of vertebrates seem to be, may likewise be observed in cases where no one would seriously suspect a relation to former specific characteristics. In short, there is (1) no evidence that the embryos of mammals and birds have true incipient gill-structures; (2) it is probable that the structures interpreted as such really subserve from the very beginning quite different functions, perhaps only of a temporary nature.

In general it may be said that the biogenetic law of development is as yet scarcely more than a *petitio principii*. Because (1) the agreement between ontogeny and phylogeny has not been proved in a single instance; on the contrary—e.g., the famous pedigree of the horse's foot begins ontogenetically with a single digit; (2) the ontogenetic similarity which may be observed, for instance, in the larval stages of insects may be explained by the similarity of the environment; (3) the ontogenetic stages of organisms are throughout specifically dissimilar, as is proved by a careful concrete comparison. The same conclusion is indicated by Hertwig's and Morgan's modifications of the biogenetic law, which, in turn, are of a merely hypothetical nature. In addition to this a short reference to Weismann's "confirmation" of Haeckel's law may be useful. Weismann knew that in the larval development of certain butterflies transverse stripes were preceded by longitudinal ones. Hence he concluded that in certain similar butterflies, whose early larval stages were then unknown, a similar succession of markings ought to be found. Ten years later the "predicted" marking was discovered. It is plain that such facts are no confirmation of the biogenetic law, but find their simple explanation in the fact that similar organisms will show similar ontogenetic stages. This fact, too, seems to account sufficiently for the observations advanced by Morgan in support of his theory of repetition.

THE BIOGEOGRAPHICAL ARGUMENT

The biogeographical argument is a very complex one, composed of a vast number of single facts whose correlation among one another, and whose bearing upon the problem of evolution, can hardly be determined before many years of detailed research have gone by. The theories established, for instance, by Wallace are certainly not sufficiently supported by facts. On the contrary, they have serious defects. One of them is the well-known "Wallace line"; another, much more important, the unfounded assertion that the higher vertebrates must have originated from marsupials and monotremes because these animals are almost entirely extinct in all countries except in

isolated Australia, where they survive, as the highest representatives of the Australian vertebrates, in greatly varying forms till today. Besides, in most cases we have no sufficient knowledge of the geographical distribution of organisms and of its various causes. But in order to give the reader an idea of the argument, we shall briefly refer him to a group of facts which is well adapted to support the view of evolution explained in the preceding pages. Volcanic islands and such as are separated from the continent by a sea or strait of great depth exhibit a fauna and flora which have certainly come from the neighbouring continents, but which at the same time possess features altogether peculiar to them. The flora of Sacotra, in the Indian Ocean, for instance, comprises 565 systematic species; among these there are 206 endemic ones. Similarly, on Madagascar there are 3000 endemic plant-species among 4100; on the Hawaiian Islands, 70 endemic species of birds among 116; on the Galapagos, 84 among 108. Many such facts are known. They certainly form an excellent demonstration in favour of the proposition defended throughout this article: that such forms as the endemic species, which may well be compared with the races of the human species, were not directly created, but arose by some process of modification which was greatly facilitated by their complete isolation.

VIII. GENERAL CONCLUSIONS

The most important general conclusions to be noted are as follows:-

- 1 The origin of life is unknown to science.
- 2 The origin of the main organic types and their principal subdivisions are likewise unknown to science.
- 3 There is no evidence in favour of an ascending evolution of organic forms.
- 4 There is no trace of even a merely probable argument in favour of the animal origin of man. The earliest human fossils and the most ancient traces of culture refer to a true *Homo sapiens* as we know him today.
- 5 Most of the so-called systematic species and genera were certainly not created as such, but originated by a process of either gradual or saltatory evolution. Changes which extend beyond the range of variation observed in the human species have thus far not been strictly demonstrated, either experimentally or historically.
- 6 There is very little known as to the causes of evolution. The greatest difficulty is to explain the origin and constancy of "new" characters and the teleology of the process. Darwin's "natural selection" is a *negative* factor only. The moulding influence of the environment cannot be doubted; but at present we are unable to ascer-

tain how far that influence may extend. Lamarck's "inheritance of acquired characters" is not yet exactly proved, nor is it evident that really new forms can arise by "mutation". In our opinion the principle of "Mendelian segregation", together with Darwin's natural selection and the moulding influence of environment, will probably be some of the chief constituents of future evolutionary theories.

Many works referring to the subject have been mentioned in the body of the article. We shall here enumerate mainly such as are of more recent date and will be of special value for further study.

General.—Gerard, *The Old Riddle and the Newest Answer* (London, 1908); Gutberlet, *Der Mensch, sein Ursprung und seine Entwicklung* (Paderborn, 1896); Kerner von Marilaun, *Pflanzenleben* (Leipzig and Vienna, 1890-91), II; Mivart, *On the Genesis of Species* (London, 1871); Wasmann, *Die moderne Biologie und die Entwicklungstheorie* (Freiburg, 1906); Id., *Der Kampf und das Entwicklungsproblem in Berlin* (Freiburg, 1907); Quatrefages, *L'espèce humaine* (Paris, 1880); Zapletal, *Der Schöpfungsbericht* (Freiburg, 1902); Morgan, *Evolution and Adaptation* (New York, 1903); Lotsy, *Vorlesungen über Descendenztheorien* (Jena, 1908); Kohlbrugger, *Der Morphologische Abstammung des Menschen* (Stuttgart, 1908); *Die Deszendenztheorie* (Leipzig, 1901); Osburg, *From the Greeks to Darwin* (New York, 1905); Hartmann, *Das Problem des Lebens* (Bad Sachsa, 1906); Brooks, *The Foundation of Zoology* (New York, 1899); Wilson, *The Cell* (New York, 1906); Hertwig, *Allgemeine Biologie* (Jena, 1906); Id., *Die Elemente der Entwicklungslehre der Wirbellosen Tiere* (Jena, 1902-03); Reinke, *Einleitung in theoretische Biologie* (Berlin, 1901); F. Darwin, *The Life and Letters of Charles Darwin* (London, 1887); I D. and Seward, *More Letters of Charles Darwin* (London, 1908); Weismann, *Vorträge über Deszendenztheorie* (Jena, 1904); Fleischmann, *Die Darwinische Theorie* (Leipzig, 1903); Plate, *Selectionsprinzip und Probleme der Artbildung* (Leipzig, 1908).

Experimental Evidence.—Lock, *Recent Progress in the Study of Variation, Heredity, and Evolution* (London, 1907); Muckermann, *Variabilität und Artbildung in Natur und Offenb.* (Münster, Jan., 1909); de Vries, *Die Mutationstheorie* (Leipzig, 1901003); Johannsen, *Ueber Erblichkeit in Populationen und in reinen Linien* (Jena, 1903); Wassmann, *Gibt es tatsächlich Arten, etc.*, in *Biol. Zentralbl.* (1901); Galton, *Natural Inheritance* (London, 1889); Mendel, *Versuche über Pflanzenhybriden*, in *Ostwalds Klassiker*, No. 121; Bateson, *Mendel's Principles of Heredity* (Cambridge, 1902); Id., *The Progress of Genetics since the Rediscovery of Mendel's Papers*, in *Progressus Rei Botanicae* (Jena, 1907), I, 386; Correns, *Ueber Vererbungsgesetze* (Berlin, 1906); Padtberg and Muckermann, *Mendel und Mendelismus* Munich, 1909); Gross, *Ueber eineige Beziehungen zwischen Vererbung und Variation*, in *Biol. Zentralbl.* (1906); Strassburger,

Die stofflichen Grundlagen der Vererbung (Jena, 1905); Ziegler, *Die Vererbungslehre in der Biologie* (Jena, 1905).

Historical Evidence.— Muckermann, *Paläontologische Urkunden und das Problem der Artbildung*, in *Stimm. aus Maria Laach*, Jan, 1909); Steinmann, *Die geologischen Grundlagen der Abstammungslehre* (Leipzig, 1908); Laurent, *Les progrès de la paléobotanique angiospermique dans la dernière décade*, in *Progr. R. Bot.* (Jena, 1907), I; Koken, *Die Vorwelt und ihre Entwicklungsgeschichte* (Leipzig, 1893); Id., *Paläontologie und Deszendenzlehre* (Jena, 1902); Zittel, *Paläozoologie* (Munich and Leipzig, 1876-93); Schimper and Schenk, *Paläophytologie* (Munich and Leipzig, 1890); de Lapparent, *Traité de géologie* (Paris, 1900); Dana, *Manual of Geology* (New York, —); Geikie, *Textbook of Geology* (London, 1893); Cope, *the Primary Factors of Organic Evolution* (Chicago, 1895); Steinmann, *Einführung in die Paläontologie* (Leipzig, 1907); Credner, *Elemente der Geologie* (Leipzig); Kayser, *Geologische Formationskunde* (Stuttgart, 1908); Neumayr, *Erdgeschichte* (Leipzig, 1887); Scharff, *European Animals: their Geological History and Geographical Distribution* (London, 1907); Ward, *Sketch of Paleobotany* (Washington, 1885); Handlirsch, *Die fossilen Insekten und die Phylogenie der rezenten Formen* (Leipzig, 1908); Hoernes, *Der diluviale Mensch* (Brunswick, 1903); Schimpfer, *Pflanzengeographie* (Jena, 1908); Lydekker, *A Geographical History of Mammals* (London, 1896).

H. Muckermann

Evora, Archdiocese of

Archdiocese of Evora

Located in Portugal, raised to archiepiscopal rank in 1544, at which time it was given as suffragans Leiria and Portalegre; in 1570 and later were added Sylves, Ceuta, Congo, Santo Thomé, Funchal, Cabo Verde, and Angra. In the Roman period Julius Cæsar gave it the name of *Liberalitas Julia*; inscriptions and coins remain to prove its high rank among the municipalities of Roman Spain. Its bishop, Quintianus, was present at the Council of Elvira early in the fourth century. There exists no complete list of his successors for the next two centuries, though some are known from ancient diptychs. In 584 the Visigothic king, Leovirgild, incorporated with his state the Kingdom of the Suevi, to which Evora had hitherto belonged. From the sixth and seventh centuries there remain a few Christian inscriptions pertaining to Evora. In one of them has been interpolated the name of a Bishop Julian (1 Dec., 566); he is, however, inadmissible. Thenceforth the episcopal list is known from the reign of Reccared (586) to the Arab invasion (714), after which the succession is quite unknown for four centuries and a half, with the exception of the epitaph of a Bishop Daniel (January, 1100). Until

the reconquest (1166) by Alfonso I of Portugal, Evora was suffragan to Merida. Under this king it became suffragan to Braga, despite the protests of the Archbishops of Compostella, administrators of Merida. In 1274, however, the latter succeeded in bringing Evora within their jurisdiction. Finally, it became suffragan to Lisbon from 1394 to 1544, when it was made an archbishopric. Its large and splendid cathedral has undergone many architectural changes. Among its illustrious prelates may be mentioned Enrique (1540-64, 1578-80), the founder of its university and King of Portugal (1578-80); Teutonio de Braganza (1570-1602); and the scholarly writers Alfonso de Portugal (1486-1522) and Father Manuel de Cenaculo Villasboas (1802-14). Portuguese writers have maintained that the first bishop of Evora was St. Mantius, a Roman, and a disciple of Jesus Christ, sent by the Apostles into Spain as a missionary of the Gospel; from his genuine acts it appears that he was a devout Christian, put to death by the Jews after the fourth century. Spanish Jews, it is known, are mentioned in the fourth-century Council of Elvira (can. 49).

FONSECA, *Evora gloriosa* (Rome, 1728), 261-315; *España Sagrada* (Madrid, 1786), XIV, 102-141; GAMS, *Series episcoporum* (1873), 98-100; *Supplem.* (1879), 91; HÜBNER, *Inscriptiones Hispaniæ christianæ* (Berlin, 1871), n. 1, 9, 10, 11, 213, 324; EUBEL, *Hierarchia catholica medii ævi* (Munich, 1901), I, 165, II, 245.

F. FITA.

Evreux

Evreux

DIOCESE OF EVREUX (EBROICENSIS)

Diocese in the Department of Eure, France; suffragan of the Archbishopric of Rouen. A legend purporting to date from a certain Deodatus, who is said to have been converted and then later ordained by St. Taurinus, makes the latter first Bishop of Evreux. According to this legend St. Taurinus was baptized at Rome by St. Clement and sent into Gaul as a companion to St. Denis. According to Mgr. Duchesne this legend arose about the ninth century, when Abbot Hilduin of Saint-Denis was intent on proving the identity of Dionysius the Areopagite with Dionysius (Denis), first Bishop of Paris. It is certain that in the time of Charles the Bald (ninth century) St. Taurinus was held in high esteem at Evreux; still earlier, Bishop Landulphus, who seems to have occupied the See of Evreux at the beginning of the seventh century, had built the basilica in his honour.

It is also impossible to fix the date of the reign of St. Gaud, who died a hermit at St. Pair, in the Cotentin. The first historically known Bishop of Evreux is Maurusio, who was present at the Council of Orleans in 511. Other bishops of Evreux are: St.

Landulphus, St. Eternus, and St. Aquilinus (seventh century); Gilbert (1071-1112), sent by William the conqueror to Alexander II, who preached the funeral oration over the Conqueror; Gilles de Perche (1170-79), sent by Henry II of England as ambassador to Rome; Jean (1181-92), a friend of Henry II, who in Cyprus (1190) crowned Berengaria Queen of England; Guillaume de Contiers (1400-18), an active member of the Council of Constance; Jean de la Balue (1465-67), who later became a prisoner of Louis XI; Claude de Saintes, the Apologist (1575-91); Du Perron (1593-1606), a great factor in the abjuration of Henry IV. Thomas Lindet (1743-1823), a member of the Convention, was appointed constitutional Bishop of Evreux from March, 1791, to November, 1792. The following saints are venerated in the diocese: St. Maximus and St. Venerandus, martyrs, at Acquigny on the Eure; St. Leufroy (Leufredus), founder of the Benedictine monastery at La-Croix Saint-Ouen (Audoenus), who died 21 June, 738, and his brother St. Aifroy (Agofredus), who succeeded him.

The cathedral of Evreux is one of the oldest in France; its octagonal dome was built at Cardinal Balue's expense; the church of Gisors has fine sculptures, among them a statue by Jean Goujon. There are pilgrimages to the shrine of Notre-Dame de la Couture at Bernay (since the tenth century); to that of Notre-Dame des Arcs at Pont de l'Arche; and to a relic of St. Clotilda venerated at Andelys. Previous to the anti-Congregations law of 1901, there were Jesuits and Lazarists at Evreux. Communities of nuns devoted to teaching and the relief of the poor were: the Dominicans of St. Catherine of Siena, an institute founded in 1878 at Etrépany, which has three houses in the English West Indies; and especially the Sisters of Providence of Evreux, an order founded in 1700 by Justine Duvivier and her brother Father Duvivier in a small hamlet called Caer. It was organized by Father James, an Eudist missionary, and re-established in 1804 by Charlotte Le Mesle; it had several houses in the diocese. The charitable institutions in charge of religious orders were in 1900: 2 crèches, 10 day-nurseries, 1 orphan asylum for boys, 12 for girls, 3 workrooms, 19 homes for the aged, 11 dispensaries, 2 houses of retreat, and 1 insane asylum. The Diocese of Evreux comprised in 1905 (close of the Concordat period) 334,781 inhabitants, 37 parishes, 545 succursal parishes (mission churches), and 25 vicariates paid by the State.

GEORGES GOYAU

St. Ewald

Sts. Ewald

(Or HEWALD)

Martyrs in Old Saxony about 695. They were two priests and natives of Northumbria, England. Both bore the same name, but were distinguished as Ewald

the Black and Ewald the Fair, from the difference in the colour of their hair and complexions. According to the example of many at that time, they spent several years as students in the schools of Ireland. Ewald the Black was the more learned of the two, but both were equally renowned for holiness of life. They were apparently acquainted with St. Willibrord, the Apostle of Friesland, and were animated with his zeal for the conversion of the Germans. Indeed, by some they have been actually numbered among the eleven companions of that saint, but it is more probable they did not set out from England till after St. Willibrord's departure. They entered upon their mission about 690. The scene of their labours was the country of the ancient Saxons, now part of Westphalia, and covered by the dioceses of Münster, Osnabruck, and Paderborn. At first the Ewalds took up their abode in the house of the steward of a certain Saxon earl or ealdormen (satrapa). Bede remarks that "the old Saxons have no king, but they are governed by several ealdormen [satrapas] who during war cast lots for leadership, but who in time of peace are equal in power" (Hist. Eccl., V, 10). The steward entertained his two guests for several days, and promised to conduct them to the chieftain, as they affirmed they had a message of considerable importance to deliver to him.

Meanwhile, the Ewalds omitted nothing of their religious exercises. They prayed often, recited the canonical hours, and celebrated Mass, for they carried with them all that was necessary for the Holy Sacrifice. The pagan Saxons, understanding from these things that they had Christian priests and missionaries in their midst, began to suspect that their aim was to convert their over-lord, and thus destroy their temples and their religion. Inflamed with jealousy and anger, they resolved that the Ewalds should die. Ewald the Fair they quickly despatched with the sword, but Ewald the Black they subjected to torture, because he was the spokesman and showed greater boldness. He was torn limb from limb, after which the two bodies were cast into the Rhine. This is understood to have happened on 3 October at a place called Aplerbeck, where a chapel still stands.

When the ealdorman heard of what had been done he was exceedingly angry, and took vengeance by ordering the murderers to be put to death and their village to be destroyed by fire. Meanwhile the martyred bodies were miraculously carried against the stream up the Rhine, for the space of forty miles, to the place in which the companions of the Ewalds were residing. As they floated along, a heavenly light, like a column of fire, was seen to shine above them. Even the murderers are said to have witnessed the miraculous brightness. Moreover, one of the martyrs appeared in vision to the monk Tilmon (a companion of the Ewalds), and told him where the bodies would be found: "that the spot would be there where he should see a pillar of light reaching from earth to heaven". Tilmon arose and found the bodies, and interred them with the honours due to martyrs. From that time onwards, the memory of the Ewalds was an-

nually celebrated in those parts. A spring of water is said to have gushed forth in the place of the martyrdom.

Pepin, Duke of Austrasia, having heard of the wonders that had occurred, caused the bodies to be translated to Cologne, where they were solemnly enshrined in the collegiate church of St. Cunibert. The heads of the martyrs were bestowed on Frederick, Bishop of Münster, by Archbishop Anno of Cologne, at the opening of the shrine in 1074. These relics were probably destroyed by the Anabaptists in 1534. When St. Norbert visited Cologne, in 1121, he obtained two small vessels containing the relics of several saints, and among them were bones of the sainted Ewalds. These were deposited either at Prémontré, or at Florennes, a Premonstratensian monastery in the province of Namur. The two Ewalds are honoured as patrons in Westphalia, and are mentioned in the Roman Martyrology on 3 October. Their feast is celebrated in the dioceses of Cologne and Münster.

COLUMBA EDMONDS.

Thomas Ewing

Thomas Ewing

Jurist and statesman, b. in West Liberty, Virginia (now West Virginia), U.S.A., 28 December, 1789; d. at Lancaster, Ohio, 26 October, 1871. His father, George Ewing of New Jersey, who had served as an officer in the Continental Army after the Revolution, settled in the Northwest Territory, in the Muskingum Valley, and then, in 1798, in what is now Ames Township, Athens County, Ohio. Here, amid the privations of pioneer life, Ewing was taught to read by his elder sister, Sarah, and by extraordinary efforts acquired a fair elementary education. At the age of nineteen he left home and worked in the Kanawha salt establishments, pursuing his studies at night by the light of the furnace fires. He remained there until he had earned sufficient to enable him to enter the Ohio University at Athens, where, in 1815, he received the degree of A.B., the first degree conferred by any college in the western country. Ewing then studied law at Lancaster, Ohio, and was admitted to the bar in 1816. He entered into a partnership with his preceptor, in the firm of Beecher & Ewing, and then, after Mr. Beecher's death, with his own son Philemon, in the firm of Ewing & Son. He achieved high prominence as a lawyer and won notable success at the state and national bar.

In March, 1831, Ewing entered public life as a member from Ohio of the United States Senate, and became prominent therein, with Webster and Clay, in resistance of the acts of President Jackson and in support of Whig measures. He upheld the protective tariff system of Clay, and presented one of the first of the memorials for the abolition of slavery.

In March, 1837, on the expiration of his term, he resumed the practice of the law. Upon the election of President Harrison, he was appointed Secretary of the Treasury in March, 1841. He prepared the second bill for the re-charter of the Bank of the United States, and, on its veto by Tyler, he resigned from the cabinet, in September, 1841. In March, 1849, he was appointed by President Taylor secretary of the then recently created Department of the Interior. He organized the department, and in his report to congress urged the construction of a railroad to the Pacific. On the death of Taylor in 1850, Ewing resigned from the cabinet and was appointed senator from Ohio to fill an unexpired term. On the expiration of his term in March, 1851, he returned to the practice of the law. In 1860 Ewing was appointed by the Governor of Ohio a member of the famous Peace Conference, and he was prominent in the efforts to avert the secession of the Southern States. During the war he unreservedly supported the government, and his judgment on matters of state was frequently sought by Mr. Lincoln. When the capture of Mason and Slidell brought England and the United States to the verge of hostilities, Ewing sent Mr. Lincoln the famous telegram that was decisive of the whole trouble: "There can be no contraband of war between neutral points." It was his advice that finally prevailed and secured the freeing of the envoys and the averting of hostilities. Conservative in his opinions, Ewing opposed the radical measures of Reconstruction at the close of the war and supported the administration of President Johnson. In February, 1868, after the removal of Stanton, the President sent to the Senate the nomination of Ewing as Secretary of War, but it was not confirmed.

Descended of Scottish Presbyterian stock, Ewing, after a lifelong attraction to the Catholic Church, entered it in his latter years. Reared outside the fold of any religious body, he married, 7 January, 1820, Maria Wills Boyle, daughter of Hugh Boyle, an Irish Catholic. He was deeply influenced by the living faith and pious example of his wife during their long married life, and all his children were reared in the Faith. In October, 1869, Ewing was stricken while arguing a cause before the Supreme Court of the United States and he was baptized in the court room. In September, 1871, his lifelong friend, Archbishop Purcell of Cincinnati, received him into the Church.

PHILEMON BEECHER, eldest son of Thomas, b. at Lancaster, 3 November, 1820; d. there 15 April, 1896. He graduated in 1838 from Miami University, Oxford, Ohio, and then entered upon the study of the law. Admitted to the Bar in 1841, he formed with his father the firm of T. Ewing & Son. In both State and Federal courts, through his grasp of the philosophy of the law and his judicial temperament, he won a place beside his illustrious father. He was also the main support of his father in his political life and labours, and was an active figure first in the Whig and then in the Republican party. In 1862 he was appointed Judge of the Court of Common Pleas. Being opposed to the Reconstruction measures of his party he took part in the Liberal Republican

movement. He was nominated to the supreme bench of Ohio in 1873. During the sixties and seventies he engaged in the banking business, and was prominent in the development of the Hocking Valley coal-fields. The later years of his life were spent in retirement.

He married at Lancaster 31 August, 1848, Mary Rebecca Gillespie, a sister of Eliza Maria Gillespie (Mother Mary of St. Angela of the Sisters of the Holy Cross of Notre Dame, Indiana). He was a man of wide culture and a writer of vigorous and limpid English. He was ever foremost where the interests of the Church were concerned, and was a delegate from the Diocese of Columbus to the Catholic Congresses of 1889 and 1893.

HUGH BOYLE, third son of Thomas, b. at Lancaster, 31 October, 1826; d. there 30 June, 1905. He was educated at the United States Military Academy at West Point, and in 1849 went to California, returning to Lancaster, in 1852, to enter on the study of the law. On his admission to the Bar, he practised in St. Louis, Missouri, from 1854 to 1856, and then, in partnership with his brother Thomas, at Leavenworth, Kansas, from 1856 to 1858. In April, 1861, he was appointed brigade-inspector of Ohio Volunteers with the rank of major, and in August, 1861, was commissioned colonel, commanding the Thirtieth Ohio Volunteer Infantry, and rendered conspicuous service. In November, 1862, he was commissioned brigadier-general. He took part in the operations against Vicksburg, and his command led in the assault of 22 May, 1863. In July following he was appointed to the command of the Fourth Division, Fifteenth Army Corps. In the operations about Chattanooga he led his division in the assault upon Missionary Ridge and its capture. In the latter part of the war he was placed in command of the district of Kentucky, and at its close was brevetted major-general. In 1866 President Johnson appointed him Minister to The Hague, which post he filled until 1870. On his return to the United States, he bought a small estate near Lancaster, in 1876, on which he lived until his death. He was married at Washington, D. C., 3 August, 1858, to Henrietta Elizabeth Young. He was a man of wide culture, and an interesting writer. He published several stories, among them "The Grand Ladron, a tale of Early California", "Koche, a King of Pit", "A Castle in the Air", and "The Black List".

CHARLES, fifth child of Thomas, b. at Lancaster, 6 March, 1835; d. at Washington, 20 June, 1883. Commencing his studies at the college of the Dominican Fathers in Perry County, Ohio, he later attended Gonzaga College, Washington, and the University of Virginia. In 1860 he began the practice of law in St. Louis, Missouri. The Civil War breaking out soon afterwards, he was commissioned a captain in the Thirteenth Infantry of the United States Regulars in May, 1861, and in the Spring of 1862, joined his brother-in-law, General William T. Sherman, in the Arkansas and Mississippi cam-

paigns. In the siege of Vicksburg he was thrice wounded. On the 22nd of June, 1862, he was commissioned lieutenant-colonel and assistant inspector-general of volunteers, and on the 15th of June, 1863, inspector-general of the Fifteenth Army Corps. He served with much distinction in the Atlanta campaign and the famous march through Georgia. On the 8th of March, 1865, he was commissioned brigadier-general, and on the mustering out of the volunteers was transferred to the regular force, from which he resigned as brevet-colonel on the 31st of July, 1867. He was brevetted three times in the regular service for gallant and meritorious services at the Vicksburg and Atlanta campaigns. After his retirement from the Army, he took up his residence in Washington and began the practice of law, in which profession he obtained considerable prominence. In 1873 he accepted the appointment of Indian Commissioner, and laboured energetically to restore to the Catholic Indian Missions the schools among the Indians which they had maintained for twenty years. Pope Pius IX, 3 May, 1877, created him a Knight of the Order of St. Gregory the Great. General Ewing married Virginia, daughter of John K. Miller of Mt. Vernon, Ohio.

ELEANOR BOYLE (MRS. WILLIAM TECUMSEH SHERMAN), daughter of Thomas, b. at Lancaster, 4 October, 1824; d. in New York City, 28 November, 1888. She was educated at the Visitation Convent at Georgetown, D. C. In 1829, just after his father's death, William Tecumseh Sherman, the subsequent famous General of the United States army, then a boy of nine years, was adopted by Mr. Ewing, reared in his household, and appointed by him to the U. S. Military Academy. Sherman married the daughter of his benefactor, 1 May, 1850. She was devoted throughout her life, after the duties of her household, to the relief of suffering and of want, and to the advancement of the Church. Mentally, she inherited the brilliant intellectual powers of her father and was a true helpmate of her husband in his distinguished career. She was the author of "Thomas Ewing, a Memorial", published in 1872. Father P. J. De Smet, S.J., the missionary among the Indians, was an old and intimate friend of the Shermans, and through this intimacy Mrs. Sherman was led to take a special interest in the cause of the Catholic Indians. Her influence and great personal exertions were of much assistance at Washington, to her brother, General Charles Ewing, in the work of saving and promoting the missions for the Catholic Indians.

JOHN G. EWING

Examination

Examination

A process prescribed or assigned for testing qualification; an investigation, inquiry. Examinations are in use in parochial schools, Catholic academies, seminaries, and universities as tests of proficiency. Examinations or something equivalent must enter into all effectual instruction, for it is not sufficient that a book be placed in the hands of a pupil or that he be compelled to attend lectures, but it is necessary to see that he grasps the ideas conveyed. Such tests are widely in vogue in Catholic institutions, as they are in those not subject to the Church. Examinations, however, have other purposes, especially as tests of qualifications for offices or positions, and as investigations to arrive at the truth. It is particularly under these aspects that the question of examinations now presents itself.

Examination for Appointment to Parochial Benefices

The Council of Trent, realizing that parishes should be ruled over by men of virtue and learning, decreed (Sess. XXIV, c. xviii, *De ref.*) that the cure of souls should be entrusted only to those who, in a competitive examination or *concursum*, have demonstrated their fitness. The purpose of this examination is not only to exclude unworthy candidates, but to secure the selection of the best. Clement XI and Benedict XIV determined the form of this examination (see *CONCURSUS*; *EXAMINERS*, *SYNODAL*).

Examination for Promotion to Orders

The Council of Trent (Sess. XXIII, c. vii, *De ref.*), repeating the legislation of previous councils, prescribes that a bishop promote no one to orders in the Church till priests and others prudent and learned, appointed by the bishop, pass upon the candidate's qualifications. This investigation is concerned with legitimate birth, baptism, confirmation, freedom from irregularity, age, title of ordination, morals, faith, and knowledge. In practice, however, the examination is confined to learning, as other requisites are investigated in advance and attested by proper documents, of the chancellor, pastor, rector of seminary, etc. The place, form, matter, number of examiners, and other details of the examination are left to the bishop. A prelate commissioned by another to ordain the latter's subject is free to submit the candidate to an examination or not, as he may deem proper, unless, for grave reasons, he suspect the unfitness of the candidate, notwithstanding a previous examination, or unless he be commissioned by the candidate's bishop to hold the examination. Members of religious orders are examined by their own superiors and likewise by the ordinary prelate, except the Jesuits

and some others who by special privilege are exempt from examination by the ordinary prelate (see EXAMINERS, APOSTOLIC).

Examination of Bishops-Elect

In addition to the examination in the Roman Pontifical, Gregory XIV prescribed another for bishops-elect, while Clement VIII instituted a congregation of cardinals for this purpose. This examination, however, developed into little else than a ceremony, since bishops are not selected till assurance is given of their prudence, piety, and learning. The late reorganization of the Roman Curia puts this matter under the Consistorial Congregation. Cardinals who are to receive episcopal consecration are exempt from this examination.

Examination of Confessors

The Council of Trent (Sess. XXIII, c. xv, De ref.) established the necessary requirements of episcopal approbation for all priests, both secular and regular, to hear confessions, advising an examination as a test of fitness, though bishops are free to approve, without such test, those priests who in their judgment are qualified for the work. Members of the regular clergy, without exception, may be obliged by the ordinary of the diocese to undergo this test, if they would hear the sacramental confessions of secular persons. Once approved, however, they are not to be subjected to another examination, unless some grave cause relating to confessions arise (see EXAMINERS, APOSTOLIC).

Examination of Preachers

The ordinary of a diocese may submit to an examination members of religious bodies who desire to preach in the diocese in churches other than those of their own order. Once, however, he has given his approbation, he may not insist on a second examination, though for just cause he may withdraw the permission given to preach. The bishop's successor in office may demand a re-examination.

Examination of Those Wishing to Contract Marriage

Before publishing the banns of marriage the pastor questions separately the contracting parties regarding their place of residence, to ascertain whether he has a right to unite them in matrimony. He inquires, likewise, whether they are acting with perfect freedom, or perhaps under duress, fear, or other motive which might invalidate the contract. He learns of any opposition on the part of parents to the proposed union, as well as of the possible existence of any matrimonial impediment. He must ascertain, moreover, whether the parties are sufficiently grounded in the rudiments of the Catholic religion and capable, consequently, of instructing their offspring. If the parties belong to different parishes, by whom is this investigation to be conducted? Local regulations and customs are to be observed, since there is neither positive universal legislation nor uniform practice in this matter.

Examination of Witnesses

In ecclesiastical, as in civil, courts witnesses are examined under oath, administered by the auditor or judge, who should first call the witness's attention to the nature and binding effect of an oath and to his duty of telling the truth. The oath must be to the effect that the witness will tell the truth, the whole truth, and nothing but the truth. If thought advisable by the judge, the oath may also contain the promise of secrecy. A statement not sworn to does not constitute evidence. Witnesses are examined separately. In civil trials the interested parties have a right to be present when witnesses are deposing and may not be excluded except in rare cases approved by the judge. In criminal or other cases, where public rather than private interest is at stake, the practice is to exclude the plaintiff and defendant, as well as other witnesses. Here, also, in extreme cases an exception may be made. If, however, the defendant is not allowed to confront the witnesses cited by the plaintiff and vice versa, he is permitted to see the witnesses take the oath and may suggest interrogatories to be proposed.

Witnesses are to be asked or cited, but not necessarily in a formal manner, to appear in court and testify. He who offers his testimony unsolicited is suspected. The examination of witnesses is conducted by the judge. The interrogatories, which are general and special, should be clear and capable of a direct and definite answer. The general questions concern the name, residence, profession, age, and religion of the witness. His relations to plaintiff or defendant, his habits, prejudices, associations, motives, his physical defects, and, at times, his mental qualities, his means of knowledge, powers of discernment, and his memory may be relevant. The special queries are drawn from the crime or charge, and should be relevant or material to the fact at issue. The judge must ascertain how much of the deposition is of personal knowledge, or only hearsay evidence or rumour, or perhaps mere opinion or inference. Circumstances of place, persons, time, etc. may be pertinent. Leading or suggestive questions, which suggest the answer desired, are not permitted. The rules of competency of witnesses are reducible to two, a knowledge of the facts in the case and veracity. In weighing the evidence, however, the judge must consider not only the knowledge and credibility of the witness, but also the quality of the deposition and its weight in comparison with that of other witnesses. While exception may be taken to a witness, if unsustained it does not disqualify him. The testimony is written down by the secretary or clerk and is read by him to the witness. Additions or corrections, if necessary, are made. The witness affixes his signature, or, if unable to write, he makes his mark, which must be attested by the clerk. If the witness refuses to subscribe, the fact and the reason thereof must be noted. Finally, both the judge and the clerk sign the document.

Examination of Conscience

Examination of Conscience

By this term is understood a review of one's past thoughts, words and actions for the purpose of ascertaining their conformity with, or difformity from, the moral law. Directly, this examination is concerned only with the will, that is, with the good or bad intention that inspires one's thoughts, words, and actions. Some of the ancient philosophers -- the Stoics in particular -- studied to be blameless in their own sight, and for this they made frequent use of self-inspection. They professed the doctrine that the happiness and dignity of man consist in virtue, or compliance with the law of reason, or with conscience; and thus examinations of conscience were a regular practice in the schools of the Stoics and of their later followers, such Eclectics as Quintus Sextius and Seneca. In the hearts of all men there is heard at times the voice of conscience bidding them seek their moral perfection, not so much for the dignity and happiness it confers on them as through regard for the holiness of the Supreme Author of the moral law. This precept of rational nature has been enforced by the voice of revelation. Thus God said to Abraham, "Walk before me, and be perfect" (Gen., xvii, 1) To this precept the Prophet Jeremias referred when he sang in his Lamentations: "Let us search our ways, and seek, and return to the Lord" (iii, 40).

In the fullness of time Christ came to perfect the knowledge of the moral law and draw the human heart into closer union with God. Frequent examination of conscience then became more imperative than before. In particular it was commanded by the Apostle St. Paul to be performed by the faithful each time they received Holy Communion: "Let a man prove" -- that is examine -- "himself: and so let him eat of that bread, and drink of the chalice; for he that eateth and drinketh unworthily eateth and drinketh judgment to himself. . . if we would judge ourselves, we should not be judged" (I Cor., xi, 28-31). And, as the early Christians received Holy communion very frequently, examination of conscience became a familiar exercise of their spiritual life. Thus we read of the great hermit St. Anthony, that he examined his conscience every night, while St. Basil, St. Augustine and St. Bernard, and founders of religious orders generally made the examination of conscience a regular daily exercise of their followers. What was thus enjoined on religious by rule was inculcated upon the faithful at large by the masters of the spiritual life as a most effectual means to advance in virtue.

The devotional examination of conscience is quite distinct from that required as a proximate preparation for sacramental confession. If a Christian judges himself unworthy of receiving the Body of the Lord, he is to make himself worthy by obtaining

pardon of his sins; and the means is provided for the purpose by Christ in the power He has given His ministers to remit sins. As discretion is to be used in remitting or retaining sins, the confession of the sinner is necessary and to confess his faults he must examine his conscience with proper diligence. By self-examination he intensifies his contrition and purpose of amendment in preparing for confession, the penitent is strictly to examine his conscience with such diligence as a prudent man ordinarily devotes to important business, but the impossible is not demanded. The more protracted his wanderings have been, the weaker the prodigal may have become to travel back to his Father, and the more help he may need to accomplish the task. When he has made some earnest efforts in this matter, the priest is to lend his assistance to perfect the work; as Vasquez and de Lugo remark, a prudent confessor can accomplish more with most penitents by a few questions than they themselves can by a long examination. Suarez takes notice that the Fathers of the Church have not taught any set system for such examinations. The ordinary method followed in the examination for confession is to consider in succession the Ten Commandments of God, the Commandments of the Church, the Seven Capital Sins, the duties of one's state of life, the nine ways of partaking in the sin of others. For persons who have led uniform life it will often suffice to recall where they have been, the persons with whom they have dealt, the duties or pursuits in which they have been engaged; how they have behaved on ordinary occasions -- as, for instance, when busied in their usual employment on working-days -- and on unusual occasions, such as Sundays and holidays.

As to the daily examination of conscience, two species must be distinguished, the general and the particular. The former aims at the correction of all kinds of faults, the latter at the avoidance of some particular fault or the acquisition of some particular virtue. For the general examination a good method is laid down by St. Ignatius of Loyola in his "Spiritual Exercises". It contains five points. In the first point we thank God for the benefits received; in the second we ask grace to know and correct our faults; in the third we pass in review the successive hours of the day, noting what faults we have committed in deed, word, thought, or omission; in the fourth we ask God's pardon; in the fifth we purpose amendment.

Of the particular examination of conscience St. Ignatius is generally considered as the author, or at least as the first who reduced it to system and promoted its practice among the faithful. It concentrates one's attention on some one fault or virtue. On rising in the morning we resolve to avoid a certain fault during the day, or to perform certain acts of particular virtue. About noon we consider how often we have committed that fault, or practised that virtue; we mark the number in a booklet prepared for the purpose, and we renew our resolution for the rest of the day. At night we examine and mark again, and make resolutions for the following day. We thus act like careful

businessmen who watch for a while a special portion of their mercantile transactions to see where losses come in or where greater gain may be secured. St. Ignatius further suggests that we impose upon ourselves some penance for every one of the faults committed and that we compare the numbers marked each time with those of the preceding day, the total sum at the end of the week with that of the preceding week, etc. (See CONSCIENCE; DUTY; SIN.)

CHARLES COPPENS

Apostolic Examiners

Apostolic Examiners

So called because appointed by the Apostolic See for service in Rome. In 1570 Pius V instituted the Apostolic examiners to conduct examinations of candidates for orders and of confessors. These examiners, who are chosen by the pope take an oath in the presence of the cardinal vicar to discharge their duties faithfully. By virtue of a Constitution of Alexander VII, in 1662, the examination of those who would receive orders is held in the vicariate, or palace of the cardinal vicar, in the presence of at least three examiners. It is only after consultation with the pope that the cardinal vicar may dispense from the examination, except in case of tonsure, when he may allow candidates to be examined privately by one examiner. All, whether affiliated to the Diocese of Rome or not, must undergo this examination. Those who have been in Rome four months or more, and who intend to return to the Eternal City, must, under pain of suspension, be examined in the vicariate before receiving orders (not tonsure) elsewhere. An exception is made in regard to the canons of the basilica of St. Peter, who are examined and promoted to orders by their cardinal archpriest. They must, however, have testimonial letters from the cardinal vicar. Even prelates of the Roman Curia must present themselves at the vicariate, but out of respect for their dignity they occupy seats among the examiners and examine one another.

As regards confessors they are not approved in Rome till they have passed a satisfactory examination before the Apostolic examiners. Although the cardinal vicar may dispense in this matter, the exercise of this prerogative is exceedingly rare. Generally, after a first and second test faculties to hear confessions are granted only for a limited time, while a third successful examination meets with unlimited approbation.

ANDREW B. MEEHAN

Synodal Examiners

So called because chosen in a diocesan synod. The Council of Trent prescribes at least six synodal examiners. The number twenty has been fixed upon by the Congregation of the Council as an ample sufficiency. The chief purpose of synodal examiners is to conduct competitive examinations or concursus though they may be designated to hold of other examinations. Suitable candidates for this are proposed singly, not all together, each year in the diocesan synod, by the bishop or his vicar-general; they must be satisfactory to the synod and meet the approval of a majority of those present, the voting being secret or public as the bishop may determine. They should have the academic degree at least of licentiate in theology or canon law, but where clerics with such decrees are not available, others qualified, either of the diocesan or religious clergy, are eligible. Synodal examiners, once appointed, hold office till the ensuing synod, though several years have elapsed. Those chosen take an oath--in the synod, if present, otherwise privately in the presence of the bishop or vicar-general--to fulfil their duties conscientiously without prejudice, favouritism, or other unworthy motive. Neglect on the part of only one to take this oath renders null and void the concursus in which he takes part. They are admonished, moreover, not to accept presents in the discharge of their office, failing in which they become guilty of simony and are punishable accordingly. Neither the diocesan synod nor the bishop personally may establish a salary however insignificant, for the fulfilment of their office.

If, within a year after their appointment in synod the number of examiners, through death, resignation or other cause, fall below six, the bishop may, with the consent of the cathedral chapter, fill up the number; if the number six decrease after the expiration of a year, permission of the Sacred Congregation of the council is also requisite. Examiners thus chosen out of synod are termed pro-synodal. There is no positive legislation regarding the removal from office of examiners, synodal or pro-synodal. In some countries where ecclesiastical benefices do not exist, the regulations of the Council of Trent anent synodal examiners are not observed, kindred duties as far as necessary being performed by clerics who are styled "examiners of the clergy" or something similar. The Third Plenary Council of Baltimore prescribes for the United States that these examiners, at least six in number if possible, be selected in synod. It is only with permission of the Holy See and after consultation with the diocesan consulters that a bishop may choose them out of synod. In case of vacancy the bishop, with the advice of said consultors, may supply the deficiency. These examiners are required take the oath as above and likewise to swear not to accept gifts on the occasion of examinations.

Whether these examiners, thus appointed out of a synod, hold office until death or only till the convening of the synod is not determined. In many dioceses these same examiners conduct the examinations for the junior clergy, confessors, candidates, for orders, and the like. (Cf. Council of Trent, Sess. XXIV, c. xviii, De ref; also Third Plenary Council of Baltimore, nos. 24. sqq.)

ANDREW B. MEEHAN

Exarch

Exarch

(Greek *Exarchos*).

A title used in various senses both civilly and ecclesiastically. In the civil administration of the Roman Empire the exarch was the governor or viceroy of any large and important province. The best-known case is that of the Exarch of Italy, who, after the defeat of the Goths, ruled from Ravenna (552-751) in the name of the emperor at Constantinople. In ecclesiastical language an exarch was at first, a metropolitan whose jurisdiction extended beyond his own (metropolitan) province, over other metropolitans. Thus, as late as the time of the Council of Chalcedon (451), the patriarchs are still called exarchs (can. ix). When the name "patriarch" became the official one for the Bishops of Rome, Alexandria, Antioch (and later of Constantinople and Jerusalem), the other title was left as the proper style of the metropolitans who ruled over the three remaining (political) dioceses of Diocletian's division of the Eastern Prefecture namely the Exarchs of Asia (at Ephesus) of Cappadocia and Pontus (at Caesarea), and of Thrace (at Heraclea). The advance of Constantinople put an end to these exarchates, which fell back to the state of ordinary metropolitan sees (Fortescue, *Orth. Eastern Church*, 21-25). But the title of exarch was still occasionally used for any metropolitan (so at Sardica in 343, can. vi). Since the use of all these titles became gradually fixed with definite technical meanings, that of exarch has disappeared in the West, being replaced by the names "Apostolic vicar" and then "primate". A few cases, such as that of the Archbishop of Lyons, whom the Emperor Frederick I named Exarch of Burgundy in 1157, are rare exceptions.

In Eastern Christendom an exarch is a bishop who holds a place between that of patriarch and that of ordinary metropolitan. The principle is that, since no addition may be made to the sacred number of five patriarchs, any bishop who is independent of any one of these five should be called an exarch. Thus, since the Church of Cyprus was declared autocephalous (at Ephesus in 431), its primate receives the title of Exarch of Cyprus. The short-lived medieval Churches of Ipek (for Serbia), Achrida (for Bulgaria) Tirnova (for Rumania), were governed by exarchs though these prelates occa-

sionally usurped the title of patriarch (Fortescue, Orth. Eastern Church, 305 sq. 317 sq., 328 sq.). On the same principle the Archbishop of Mount Sinai is an exarchy though in this case as in that of Cyprus modern Orthodox usage generally prefers the (to them) unusual title, "archbishop" (*Archiepiskopos*). When the Bulgarians constituted their national Church (1870), not quite daring to call its head a patriarch, they made him an exarch. The Bulgarian exarch, who resides at Constantinople, is the most famous of all persons who bear the title now. Because of it his adherents throughout Macedonia are called exarchists (as opposed to the Greek patriarchists). It was an inaccurate use of this title when Peter the Great, after abolishing the Patriarchate of Moscow (1702), for twenty years before he founded the Russian Holy Directing Synod, appointed a vice-gerent with the title of exarch as president of a temporary governing commission. Since Russia destroyed the old independent Georgian Church (1802) the Primate of Georgia (always a Russian) sits in the Holy Synod at St. Petersburg with the title of Exarch of Georgia (Fortescue, Orth. Eastern Church, 304-305). Lastly, the third officer of the court of the Patriarch of Constantinople, who examines marriage cases (our *defensor matrimonii*), is called the exarch (ibid., 349).

ADRIAN FORTESCUE

Ex Cathedra

Ex Cathedra

Literally "from the chair", a theological term which signifies authoritative teaching and is more particularly applied to the definitions given by the Roman pontiff. Originally the name of the seat occupied by a professor or a bishop, *cathedra* was used later on to denote the magisterium, or teaching authority. The phrase *ex cathedra* occurs in the writings of the medieval theologians, and more frequently in the discussions which arose after the Reformation in regard to the papal prerogatives. But its present meaning was formally determined by the Vatican Council, Sess. IV, Const. de Ecclesiâ Christi, c. iv: "We teach and define that it is a dogma Divinely revealed that the Roman pontiff when he speaks *ex cathedra*, that is when in discharge of the office of pastor and doctor of all Christians, by virtue of his supreme Apostolic authority, he defines a doctrine regarding faith or morals to be held by the universal Church, by the Divine assistance promised to him in Blessed Peter, is possessed of that infallibility with which the Divine Redeemer willed that his Church should be endowed in defining doctrine regarding faith or morals, and that therefore such definitions of the Roman pontiff are of themselves and not from the consent of the Church irreformable." (See INFALLIBILITY; POPE.)

E.A. PACE

Right of Exclusion

Right of Exclusion

(Latin *Jus Exclusivæ*.)

The alleged competence of the more important Catholic countries, Austria, France, and Spain, to indicate to their respective cardinal protector, or cardinal procurator, those members of the Sacred College who were *personæ minus gratæ*, so that, if there was a possibility of one of these becoming pope, the authorized cardinal might, before the decisive ballot, give his veto, in the name of his government, against such election.

At one time this veto was given orally; later it was given in writing. The cardinal protector, or cardinal procurator, who cast the veto, was, as a rule, that member of the Sacred College who had been created a cardinal at the desire of his government. This declaration could only be made at the last moment, for the reason that, by traditional usage, a government might invoke this alleged right only once at the same conclave, and consequently would not wish to employ it unnecessarily. A veto made after the election was not recognized.

Opinions differ widely as to the antiquity of this right. It cannot be proved that it is in any way related to the rights in the papal election, exercised by German kings and emperors in the early Middle Ages. Indeed, it was not until the sixteenth century, that the more important European countries obtained larger influence over papal elections, owing to the contentions of France, Spain, and the German emperor, for the control of Italy. These governments were originally satisfied with the so-called "ballot of exclusion", i.e., they sought to unite more than one-third of the voters against an undesirable candidate and thus make his election impossible, through lack of the necessary two-thirds majority. About the beginning of the seventeenth century, however, in the conclaves that elected Leo XI and Paul V (1605), Spain raised the claim, that it could exclude a candidate by a general declaration addressed to the College of Cardinals. Soon after, in the conclaves of 1644 and 1655, which elected, respectively, Innocent X and Alexander VII, and in both of which Cardinal Sacchetti was excluded as a candidate, the term used for this action was *Jus Exclusivæ* (right of exclusion). This right was, therefore, claimed about the middle of the seventeenth century; later dates suggested, e.g., 1691, or 1721, must be abandoned. It was also about the middle of the seventeenth century that treatises and polemic writings began to appear, in which the alleged right of exclusion was discussed; among such controversialists were the Cardinals Albizzi and Lugo.

In the following period repeated use was made of this so-called right. In 1721 the German emperor formally excluded Cardinal Paolucci; in 1730 the King of Spain ex-

cluded Cardinal Imperiali; in 1758 France exercised this right to exclude Cardinal Cavalchini. In the nineteenth century Austria maintained the right of exclusion, in 1830, against Cardinal Severoli, and Spain, in 1830, against Cardinal Giustiniani; in 1903 Austria again exercised this right, this time against Cardinal Rampolla.

As a matter of fact, no government has a right to exercise any veto in a papal election. On the contrary the popes have expressly repudiated the exercise of such right. Pius IV in the Bull "In eligendis", of 9 October, 1562 (*Magnum Bullarium*, II, 97 sqq.), ordered the cardinals to elect a pope "Principum sæcularium intercessionibus, cæterisque mundanis respectibus, minime attentis" (without any regard to the interference of secular rulers, or to other human considerations). That he meant thereby what is now known as the right of exclusion cannot, indeed, be proved; according to the foregoing account of its origin such claim did not then exist. Gregory XV, in the Bull "Æterni Patris Filius" (15 November, 1621, in "*Magnum Bullarium*", III, 444 sqq.) declared authoritatively:

"Cardinales omnino abstineant ab omnibus pactionibus, conventionibus, promissionibus, intendimentis, conductis, foederibus, aliis quibuscunque obligationibus, minis, signis, contrasignis suffragiorum seu schedularum, aut aliis tam verbo quam scripto aut quomodocunque dandis aut petendis, tam respectu inclusionis quam exclusionis, tam unius personam quam plurimum aut certi generis, etc.",

the sense of which is, that the cardinals must abstain from all agreements, and from acts of any kind, which might be construed as binding them to include or exclude any one candidate, or several, or candidates of a certain class. It may be that the pope does not even here refer to exclusion by a state, but only to the so-called "ballot of exclusion"; it has already been stated, however, that the governments at this time laid claim to a formal right of exclusion. In the Bull "Apostolatus officium" (11 October, 1732, in "*Magnum Bullarium*", XIV, 248 sqq.) Clement XII ordered the cardinals in the words of Pius IV, already quoted, to elect, "principum sæcularium intercessionibus cæterisque mundanis respectibus . . . minime attentis et postpositis" (i.e. without regard to the interference of secular rulers or to other human considerations).

By this time, however, governmental exclusion had long been the accepted form of the interference of secular rulers (*intercessio principum*) in papal elections. It is, therefore, precisely this exclusion which the pope forbids. This command has all the more weight since we know that this pope was urged to recognize, within certain limits, the right of exclusion put forth by the Catholic states; in the minutes of the deliberations of the commission of cardinals appointed to draw up this Bull the right of exclusion is explicitly characterized as an abuse. By the Constitution "In hâc sublimi",

of 23 August, 1871 (Archiv für kath. Kirchenrecht, 1891, LXV, 303 sqq.), Pius IX forbade any interference of the secular power in papal elections.

It is plain, therefore, that the popes have rejected all right of exclusion by a Catholic state in a papal election. Nor can it be admitted that this right has arisen through custom. None of the requisites essential to the growth of a customary right are present; reasonableness and prescription are especially lacking. To debar precisely the most capable candidates is an onerous limitation of the liberty of the electors, and injurious to the Church. Moreover, the cases of exclusion by Catholic states are too few to permit the inference of a right acquired by customary possession. Recent legislation by Pope Pius X has absolutely repudiated and abolished forever this *Jus Exclusivae*. In the Constitution "Commissum Nobis" (20 Jan., 1904) he declared that the Apostolic See had never approved the civil veto, though previous legislation had not succeeded in preventing it: "Wherefore in virtue of holy obedience, under threat of the Divine judgment, and pain of excommunication *latæ sententiæ* we prohibit the cardinals of the Holy Roman Church, all and single, and likewise the Secretary of the Sacred College of Cardinals, and all others who take part in the conclave, to receive even under the form of a simple desire the office of proposing the veto in whatever manner, either by writing or by word of mouth And it is our will that this prohibition be extended to all intercessions, etc. . . . by which the lay powers endeavour to intrude themselves in the election of a pontiff

"Let no man infringe this our inhibition under pain of incurring the indignation of God Almighty and of his Apostles, Sts. Peter and Paul." The new form of oath to be taken by all cardinals contains these words: "we shall never in any way accept, under any pretext, from any civil power whatever, the office of proposing a veto of exclusion even under the form of a mere desire . . . and we shall never lend favour to any intervention, or intercession, or any other method whatever, by which the lay powers of any grade or order may wish to interfere in the election of a pontiff".

Excommunication

Excommunication

This subject will be treated under the following heads:

- I. General Notions and Historical Summary;
- II. Kinds of Excommunication;
- III. Who Can Excommunicate?
- IV. Who Can Be Excommunicated?
- V. Effects of Excommunication;
- VI. Absolution from Excommunication;
- VII. Excommunications *Latae Sententiae* Now in Force.

I. GENERAL NOTIONS AND HISTORICAL SUMMARY

Excommunication (Lat. *ex*, out of, and *communio* or *communicatio*, communion -- exclusion from the communion), the principal and severest censure, is a medicinal, spiritual penalty that deprives the guilty Christian of all participation in the common blessings of ecclesiastical society. Being a penalty, it supposes guilt; and being the most serious penalty that the Church can inflict, it naturally supposes a very grave offence. It is also a medicinal rather than a vindictive penalty, being intended, not so much to punish the culprit, as to correct him and bring him back to the path of righteousness. It necessarily, therefore, contemplates the future, either to prevent the recurrence of certain culpable acts that have grievous external consequences, or, more especially, to induce the delinquent to satisfy the obligations incurred by his offence. Its object and its effect are loss of communion, i.e. of the spiritual benefits shared by all the members of Christian society; hence, it can affect only those who by baptism have been admitted to that society. Undoubtedly there can and do exist other penal measures which entail the loss of certain fixed rights; among them are other censures, e.g. suspension for clerics, interdict for clerics and laymen, irregularity *ex delicto*, etc. Excommunication, however, is clearly distinguished from these penalties in that it is the privation of all rights resulting from the social status of the Christian as such. The excommunicated person, it is true, does not cease to be a Christian, since his baptism can never be effaced; he can, however, be considered as an exile from Christian society and as non-existent,

for a time at least, in the sight of ecclesiastical authority. But such exile can have an end (and the Church desires it), as soon as the offender has given suitable satisfaction. Meanwhile, his status before the Church is that of a stranger. He may not participate in public worship nor receive the Body of Christ or any of the sacraments. Moreover, if he be a cleric, he is forbidden to administer a sacred rite or to exercise an act of spiritual authority.

Right of the Church to Excommunicate

The right to excommunicate is an immediate and necessary consequence of the fact that the Church is a society. Every society has the right to exclude and deprive of their rights and social advantages its unworthy or grievously culpable members, either temporarily or permanently. This right is necessary to every society in order that it may be well administered and survive. The fundamental proof, therefore, of the Church's right to excommunicate is based on her status as a spiritual society, whose members, governed by legitimate authority, seek one and the same end through suitable means. Members who, by their obstinate disobedience, reject the means of attaining this common end deserve to be removed from such a society. This rational argument is confirmed by texts of the New Testament, the example of the Apostles, and the practice of the Church from the first ages down to the present. Among the Jews, exclusion from the synagogue was a real excommunication (Esd., x, 8). This was the exclusion feared by the parents of the man born blind (John, ix, 21 sq.; cf. xii, 42; xvi, 2); the same likewise that Christ foretold to His disciples (Luke, vi, 22). It is also the exclusion which in due time the Christian Church should exercise: "And if he will not hear the church, let him be to thee as the heathen and publican" (Matt., xviii, 17). In the celebrated text: "Whatsoever you shall bind upon earth, shall be bound also in heaven; and whatsoever you shall loose upon earth, shall be loosed also in heaven" (Matt., xviii, 18; cf. xvi, 19), it is not only the remission of sins that is referred to, but likewise all spiritual jurisdiction, including judicial and penal sanctions. Such, moreover, was the jurisdiction conferred on St. Peter by the words: "Feed my lambs"; "feed my sheep" (John, xxi, 15, 16, 17). St. Paul excommunicated regularly the incestuous Corinthians (I Cor., v, 5) and the incorrigible blasphemers whom he delivered over to Satan (I Tim., i, 20). Faithful to the Apostolic teaching and example, the Church, from the very earliest ages, was wont to excommunicate heretics and contumacious persons; since the fourth century numerous conciliary canons pronounce excommunication against those who are guilty of certain offences. Of the facts there can be no doubt (Seitz, *Die Heilsnotwendigkeit der Kirche*, Freiburg, 1903).

Excommunication not only External

In the first Christian centuries it is not always easy to distinguish between excommunication and penitential exclusion; to differentiate them satisfactorily we must

await the decline of the institution of public penance and the well-defined separation between those things appertaining to the *forum internum*, or tribunal of conscience and the *forum externum*, or public ecclesiastical tribunal; nevertheless, the admission of a sinner to the performance of public penance was consequent on a previous genuine excommunication. On the other hand, formal exclusion from reception of the Eucharist and the other sacraments was only mitigated excommunication and identical with minor excommunication (see below). At any rate, in the first centuries excommunication is not regarded as a simple external measure; it reaches the soul and the conscience. It is not merely the severing of the outward bond which holds the individual to his place in the Church; it severs also the internal bond, and the sentence pronounced on earth is ratified in heaven. It is the spiritual sword, the heaviest penalty that the Church can inflict (see the patristic texts quoted in the Decree of Gratian, cc. xxxi, xxxii, xxxiii, C. xi, q. iii). Hence in the Bull "Exsurge Domine" (16 May, 1520) Leo X justly condemned Luther's twenty-third proposition according to which "excommunications are merely external punishments, nor do they deprive a man of the common spiritual prayers of the Church". Pius VI also condemned (Auctorem Fidei, 28 Aug., 1794) the forty-sixth proposition of the Pseudo-Synod of Pistoia, which maintained that the effect of excommunication is only exterior because of its own nature it excludes only from exterior communion with the Church, as if, said the pope, excommunication were not a spiritual penalty binding in heaven and affecting souls. The aforesaid proposition was therefore condemned as false, pernicious, already reprobated in the twenty-third proposition of Luther, and, to say the least, erroneous. Undoubtedly the Church cannot (nor does it wish to) oppose any obstacle to the internal relations of the soul with God; she even implores God to give the grace of repentance to the excommunicated. The rites of the Church, nevertheless, are always the providential and regular channel through which Divine grace is conveyed to Christians; exclusion from such rites, especially from the sacraments, entails therefore regularly the privation of this grace, to whose sources the excommunicated person has no longer access.

History of Excommunication

While excommunication ranks first among ecclesiastical censures, it existed long before any such classification arose. From the earliest days of the Christian society it was the chief (if not the only) ecclesiastical penalty for laymen; for guilty clerics the first punishment was deposition from their office, i.e. reduction to the ranks of the laity. Subsequently, when ecclesiastical discipline allowed clerics more easily to resume their ministry, the ancient deposition became suspension; thenceforth even clerics were subject to excommunication, by which they lost at once their rights as Christians and as clerics. Both laymen and clerics were henceforth threatened or punished with

excommunication for offences that became daily more definite and numerous, particularly for refusing obedience either to special ecclesiastical precepts or the general laws of the Church. Once the *forum externum*, or public ecclesiastical tribunal, was distinctly separated from the *forum sacramentale*, or tribunal of sacramental penance, say from the ninth century on, excommunication became gradually an ever more powerful means of spiritual government, a sort of coercive measure ensuring the exact accomplishment of the laws of the Church and the precepts of her prelates. Excommunication was either threatened or inflicted in order to secure the observance of fasts and feasts, the payment of tithes, the obedience of inferiors, the denunciation of the guilty, also to compel the faithful to make known to ecclesiastical authority matrimonial impediments and other information.

Abuse

This extension of the use of excommunication led to abuses. The infliction of so grave a penalty for offences of a less grievous kind and most frequently impossible to verify before the public ecclesiastical authority, begot eventually a contempt for excommunication. Consequently the Council of Trent was forced to recommend to all bishops and prelates more moderation in the use of censures (Sess. XXV, c. iii, De ref.). The passage is too significant to be here omitted: "Although the sword of excommunication is the very sinews of ecclesiastical discipline, and very salutary for keeping the people to the observance of their duty, yet it is to be used with sobriety and great circumspection; seeing that experience teaches that if it be wielded rashly or for slight causes, it is more despised than feared, and works more evil than good. Wherefore, such excommunications which are wont to be issued for the purpose of provoking a revelation, or on account of things lost or stolen, shall be issued by no one whomsoever but the bishop; and not then, except on account of some uncommon circumstance which moves the bishop thereunto, and after the matter has been by him diligently and very maturely weighed." Then follow equally explicit measures for the use of censures in judicial matters. This recommendation of the Council of Trent has been duly heeded, and the use of censures as a means of coercion has grown constantly rarer, the more so as it is hardly ever, possible for the Church to obtain from the civil power the execution of such penalties.

Excessive Number of Excommunications

In the course of time, also, the number of canonical excommunications was excessively multiplied, which fact, coupled with their frequent desuetude, made it difficult to know whether many among them were always in force. The difficulty was greater as a large number of these excommunications were reserved, for which reason theologians with much ingenuity construed favourably said reservation and permitted the majority of the faithful to obtain absolution without presenting themselves in Rome,

or indeed even writing thither. In recent times the number of excommunications in force has been greatly diminished, and a new method of absolving from them has been inaugurated; it will doubtless find a place in the new codification of the canon law that is being prepared. Thus, without change of nature, excommunication *in foro externo* has become an exceptional penalty, reserved for very grievous offences detrimental to Christian society; *in foro interno* it has been diminished and mitigated, at least in regard to the conditions for absolution from it. However, as can readily be seen from a perusal of the excommunications actually in force, it still remains true that what the Church aims at is not so much the crime as the satisfaction to be obtained from the culprit in consequence of his offence.

Refusal of Ecclesiastical Communion

Finally, real excommunication must not be confounded with a measure formerly quite frequent, and sometimes even known as excommunication, but which was rather a refusal of episcopal communion. It was the refusal by a bishop to communicate *in sacris* with another bishop and his church, in consideration of an act deemed reprehensible and worthy of chastisement. It was undoubtedly with this withdrawal of communion that Pope Victor threatened (or actually punished) the bishops of Asia in the paschal controversy (Eusebius, *Hist. Eccl.*, V, xxiv); it was certainly the measure to which St. Martin of Tours had recourse when he refused to communicate with the Spanish bishops who caused Emperor Maximinus to condemn to death the heretic Priscillian with some of his adherents (Sulpicius Severus, *Dial.*, iii, 15). Moreover, a similar privation of communion was in early Christian times imposed by councils as a regular penalty for bishops found guilty of certain minor faults; the most frequent example is that of bishops who, without good reason, neglected to attend the provincial council (so the Councils of Carthage, 401, can. xi; Agde, 506, can. xxxv; Tarragona, 516, can. vi; II Macon, 585, can. xx; etc.). These bishops were evidently not excommunicated, properly speaking; they continued to govern their dioceses and publicly to hold ecclesiastical services; they were simply deprived, as the aforesaid texts say, of the consolation of communion with their episcopal brethren.

II. KINDS OF EXCOMMUNICATION

(1) *Major and Minor*

Until recently excommunication was of two kinds, major and minor.

(a) Minor excommunication is uniformly defined by canonists and by Gregory IX (cap. lix, *De sent. exc.*, lib. V, tit. xxxix) as prohibition from receiving the sacraments, what theologians call the passive use of the sacraments. In order to receive the Eucharist and the other sacraments, those who had incurred this penalty had to be absolved therefrom; as it was not reserved, this could be done by any confessor. Indirectly, however, it entailed other consequences. The canon law (cap. x, *De cler. excomm.*

ministrante, lib. V, tit. xxvii) taught that the priest who celebrates Mass while under the ban of minor excommunication sins grievously; also that he sins similarly in administering the sacraments; and finally, that while he can vote for others, he himself is ineligible to a canonical office. This is readily understood when we remember that the cleric thus excommunicated was presumed to be in the state of grievous sin, and that such a state is an obstacle to the lawful celebration of Mass and the administration of the sacraments. Minor excommunication was really identical with the state of the penitent of olden times who, prior to his reconciliation, was admitted to public penance. Minor excommunication was incurred by unlawful intercourse with the excommunicated, and in the beginning no exception was made of any class of excommunicated persons. Owing, however, to many inconveniences arising from this condition of things, especially after excommunications had become so numerous, Martin V, by the Constitution "Ad evitanda scandala" (1418), restricted the aforesaid unlawful intercourse to that held with those who were formally named as persons to be shunned and who were therefore known as *vitandi* (Lat. *vitare*, to avoid), also with those who were notoriously guilty of striking a cleric. But as this twofold category was in modern times greatly reduced, but little attention was paid to minor excommunication, and eventually it ceased to exist after the publication of the Constitution "Apostolicæ Sedis". The latter declared that all excommunications *latae sententiæ* that it did not mention were abolished, and as it was silent concerning minor excommunication (by its nature an excommunication *latae sententiæ* of a special kind), canonists concluded that minor excommunication no longer existed. This conclusion was formally ratified by the Holy Office (6 Jan., 1884, ad 4).

(b) Major excommunication, which remains now the only kind in force, is therefore the kind of which we treat below, and to which our definition fully applies. Anathema is a sort of aggravated excommunication, from which, however, it does not differ essentially, but simply in the matter of special solemnities and outward display.

(2) *A jure and ab homine*

Excommunication is either *a jure* (by law) or *ab homine* (by judicial act of man, i.e. by a judge). The first is provided by the law itself, which declares that whosoever shall have been guilty of a definite crime will incur the penalty of excommunication. The second is inflicted by an ecclesiastical prelate, either when he issues a serious order under pain of excommunication or imposes this penalty by judicial sentence and after a criminal trial.

(3) *Latae and Ferendæ Sententiæ*

Excommunication, especially *a jure*, is either *latae* or *ferendæ sententiæ*. The first is incurred as soon as the offence is committed and by reason of the offence itself (*eo ipso*) without intervention of any ecclesiastical judge; it is recognized in the terms used

by the legislator, for instance: "the culprit will be excommunicated at once, by the fact itself [*statim, ipso facto*]". The second is indeed foreseen by the law as a penalty, but is inflicted on the culprit only by a judicial sentence; in other words, the delinquent is rather threatened than visited with the penalty, and incurs it only when the judge has summoned him before his tribunal, declared him guilty, and punished him according to the terms of the law. It is recognized when the law contains these or similar words: "under pain of excommunication"; "the culprit will be excommunicated".

(4) *Public and Occult*

Excommunication *ferendæ sententiæ* can be public only, as it must be the object of a declaratory sentence pronounced by a judge; but excommunication *lata sententiæ* may be either public or occult. It is public through the publicity of the law when it is imposed and published by ecclesiastical authority; it is public through notoriety of fact when the offence that has incurred it is known to the majority in the locality, as in the case of those who have publicly done violence to clerics, or of the purchasers of church property. On the contrary, excommunication is occult when the offence entailing it is known to no one or almost no one. The first is valid in the forum externum and consequently in the forum internum; the second is valid in the forum internum only. The practical difference is very important. He who has incurred occult excommunication should treat himself as excommunicated and be absolved as soon as possible, submitting to whatever conditions will be imposed upon him, but this only in the tribunal of conscience; he is not obliged to denounce himself to a judge nor to abstain from external acts connected with the exercise of jurisdiction, and he may ask absolution without making himself known either in confession or to the Sacred Penitentiaria. According to the teaching of Benedict XIV (*De synodo*, X, i, 5), "a sentence declaratory of the offence is always necessary in the forum externum, since in this tribunal no one is presumed to be excommunicated unless convicted of a crime that entails such a penalty". Public excommunication, on the other hand, is removed only by a public absolution; when it is question of simple publicity of fact (see above), the absolution, while not judicial, is nevertheless public, inasmuch as it is given to a known person and appears as an act of the forum externum.

(5) *Vitandi and Tolerati*

Public excommunication in foro externo has two degrees according as it has or has not been formally published, or, in other words, according as excommunicated persons are to be shunned (*vitandi*) or tolerated (*tolerati*). A formally published or nominative excommunication occurs when the sentence has been brought to the knowledge of the public by a notification from the judge, indicating by name the person thus punished. No special method is required for this publication; according to the Council of Constance (1414-18), it suffices that "the sentence have been published or

made known by the judge in a special and express manner". Persons thus excommunicated are to be shunned (*vitandi*), i.e. the faithful must have no intercourse with them either in regard to sacred things or (to a certain extent) profane matters, as we shall see farther on. All other excommunicated persons, even though known, are *tolerati*, i. e. the law no longer obliges the faithful to abstain from intercourse with them, even in religious matters. This distinction dates from the aforesaid Constitution "Ad evitanda scandala", published by Martin V at the Council of Constance in 1418; until then one had to avoid communion with all the excommunicated, once they were known as such. "To avoid scandal and numerous dangers", says Martin V, "and to relieve timorous consciences, we hereby mercifully grant to all the faithful that henceforth no one need refrain from communicating with another in the reception or administration of the sacraments, or in other matters Divine or profane, under pretext of any ecclesiastical sentence or censure, whether promulgated in general form by law or by a judge, nor avoid anyone whomsoever, nor observe an ecclesiastical interdict, except when this sentence or censure shall have been published or made known by the judge in special and express form, against some certain, specified person, college, university, church, community, or place." But while notoriously excommunicated persons are no longer *vitandi*, the pope makes an exception of those who have "incurred the penalty of excommunication by reason of sacrilegious violence against a cleric, and so notoriously that the fact can in no way be dissimulated or excused". He declares, moreover, that he has not made this concession in favour of the excommunicated, whose condition remains unchanged, but solely for the benefit of the faithful. Hence, in virtue of ecclesiastical law, the latter need no longer deprive themselves of intercourse with those of the excommunicated who are "tolerated". As to the *vitandi*, now reduced to the two aforementioned categories, they must be shunned by the faithful as formerly. It is to be noted now that the minor excommunication incurred formerly by these forbidden relations has been suppressed; also, that of the major excommunications inflicted on certain definite acts of communion with the *vitandi*, only two are retained in the Constitution "Apostolicæ Sedis" (II, 16, 17): that inflicted on any of the faithful for participation in a crime that has merited nominative excommunication by the pope, and that pronounced against clerics alone for spontaneous and conscious communion *in sacris* with persons whom the pope has excommunicated by name. Moreover, those whom bishops excommunicate by name are as much *vitandi* as are those similarly excommunicated by the pope.

(6) *Reserved and Non-Reserved*

Finally, excommunication is either reserved or non-reserved. This division affects the absolution from censure. In the forum internum any confessor can absolve from non reserved excommunications; but those that are reserved can only be remitted,

except through indult or delegation, by those to whom the law reserves the absolution. There is a distinction between excommunications reserved to the pope (these being divided into two classes, according to which they are either specially or simply reserved to him) and those reserved to bishops or ordinaries. As to excommunications ab homine, absolution from them is reserved by law to the judge who has inflicted them. In a certain sense excommunications may also be reserved in view of the persons who incur them; thus absolution from excommunications in foro externo incurred by bishops is reserved to the pope; again, custom reserves to him the excommunication of sovereigns.

III. WHO CAN EXCOMMUNICATE?

Excommunication is an act of ecclesiastical jurisdiction, the rules of which it follows. Hence the general principle: whoever has jurisdiction in the forum externum, properly so called, can excommunicate, but only his own subjects. Therefore, whether excommunications be a jure (by the law) or ab homine (under form of sentence or precept), they may come from the pope alone or a general council for the entire Church; from the provincial council for an ecclesiastical province; from the bishop for his diocese; from the prelate *nullius* for quasi-diocesan territories; and from regular prelates for religious orders. Moreover, anyone can excommunicate who, by virtue of his office, even when delegated, has contentious jurisdiction in the forum externum; for instance, papal legates, vicars capitular, and vicars-general. But a parish priest cannot inflict this penalty nor even declare that it is incurred, i. e. he cannot do so in an official and judicial manner. The subjects of these various authorities are those who come under their jurisdiction chiefly on account of domicile or quasi-domicile in their territory; then by reason of the offence committed while on such territory; and finally by reason of personal right, as in the case of regulars.

IV. WHO CAN BE EXCOMMUNICATED?

Since excommunication is the forfeiture of the spiritual privileges of ecclesiastical society, all those, but those only, can be excommunicated who, by any right whatsoever, belong to this society. Consequently excommunication can be inflicted only on baptized and living persons. Although the Church recites against the devil exorcisms in which the word *anathema* occurs, he cannot be excommunicated, for he in no way belongs to the Church. Among living persons, those who have not been baptized have never been members of the Christian society and therefore cannot be deprived of spiritual benefits to which they have never had a right; in this way, infidels, pagans, Mohammedans, and Jews, though outside of the Church, are not excommunicated. As the baptized cease, at death, to belong to the Church Militant, the dead cannot be excommunicated. Of course, strictly speaking, after the demise of a Christian person, it may be officially

declared that such person incurred excommunication during his lifetime. Quite in the same sense he may be absolved after his death; indeed, the Roman Ritual contains the rite for absolving an excommunicated person already dead (Tit. III, cap. iv: Ritus absolvendi excommunicatum jam mortuum). However, these sentences or absolutions concern only the effects of excommunication, notably ecclesiastical burial. With the foregoing exceptions, all who have been baptized are liable to excommunication, even those who have never belonged to the true Church, since by their baptism they are really her subjects, though of course rebellious ones. Moreover, the Church excommunicates not only those who abandon the true faith to embrace schism or heresy, but likewise the members of heretical and schismatic communities who have been born therein. As to the latter, however, it is not question of personal excommunication; the censure overtakes them in their corporate capacity, as members of a community in revolt against the true Church of Jesus Christ.

Catholics, on the contrary, cannot be excommunicated unless for some personal, grievously offensive act. Here, therefore, it is necessary to state with precision the conditions under which this penalty is incurred. Just as exile presupposes a crime, excommunication presupposes a grievous external fault. Not only would it be wrong for a Christian to be punished without having committed a punishable act, but justice demands a proportion between the offence and the penalty; hence the most serious of spiritual chastisements, i.e. forfeiture of all the privileges common to Christians, is inconceivable unless for a grave fault. Moreover, in order to fall within the jurisdiction of the forum externum, which alone can inflict excommunication, this fault must be external. Internal failings, e.g. doubts entertained against the Catholic Faith, cannot incur excommunication. Note, however, that by external fault is not necessarily meant a public one; an occult external fault calls forth occult excommunication, but in foro interno, as already seen. Most authors add that the offence must be consummated, i.e. complete and perfected in its kind (*in genere suo*), unless the legislator have ordained otherwise. This, however, is a rule of interpretation rather than a real condition for the incurring of censure, and is tantamount to saying that attempt at a crime does not entail the penalty meted out to the crime itself, but that if the legislator declares that he wishes to punish even the attempt, excommunication is incurred (cf. Const. "Apost. Sedis", III, 1, for attempt at marriage on part of clerics in major orders).

Considered from a moral and juridical standpoint, the guilt requisite for the incurring of excommunication implies, first, the full use of reason; second sufficient moral liberty; finally, a knowledge of the law and even of the penalty. Where such knowledge is lacking, there is no contumacy, i.e. no contempt of ecclesiastical law, the essence of which consists in performing an action known to be forbidden, and forbidden under a certain penalty. The prohibition and the penalty are known either through the text

of the law itself, which is equivalent to a juridical warning, or through admonitions or proclamations issued expressly by the ecclesiastical judge. Hence arise various extenuating reasons (*causæ excusantes*), based on lack of guilt, which prevent the incurring of excommunication:

(1) Lack of the full use of reason. This excuses children, also those who have not attained the age of puberty, and, a fortiori, the demented. Inadvertence, however, is not presumed; while it may affect moral responsibility and excommunication in foro externo, it is no obstacle to juridical guilt.

(2) Lack of liberty resulting from grave fear. Such fear impairs the freedom of the will, and while it exists contumacy or rebellion against the laws of the Church cannot be presumed. Evidently, a proper estimation of this extenuating reason depends on the circumstances of each particular case and will be more readily accepted as an excuse for violating a positive law than in palliation of an offence against the natural or Divine law.

(3) Ignorance. The general principle is, that whosoever is ignorant of the law is not responsible for transgressing it; and whosoever is ignorant of the penalty does not incur it. But the application of this principle is often complicated and delicate. The following considerations, generally admitted, may serve as a guide:

(a) All ignorance, both of law and of fact, is excusatory.

(b) The ignorance known as "invincible" always excuses; it may also be called inculpable or probable ignorance.

(c) There are two kinds of culpable ignorance, one known as *crassa* or *supina*, i.e. gross, improbable ignorance, and supposing a grievously guilty neglect in regard to knowledge of the law; the other is affected ignorance, really a deliberate ignorance of the law through fear of incurring its penalty.

(d) Ordinarily, gross ignorance does not excuse from punishment. But it does so only when the law formally exacts a positive knowledge of the prohibition. The laws that inflict excommunication contain as a rule two kinds of expressions. Sometimes the offence only is mentioned, e.g. "all apostates, heretics's, etc., or "those who absolve their accomplices in a sin against chastity" (Const. "Apost. Sedis", I, 1, 10). Sometimes causes are inserted that exact, as a necessary condition, the knowledge or effrontery of the culprit, e.g., "those who knowingly read books" condemned under pain of excommunication, "regulars who have the audacity to administer the Viaticum without permission of the parish priest" (Const. "Apost. Sedis", I, 2; II, 14). Gross ignorance excuses in the second case but not in the first.

(e) For many authors, affected ignorance is equivalent to a knowledge of the law, since by it some avoid enlightening themselves concerning a dreaded penalty; these authors conclude that such ignorance never excuses. Other canonists consider that this penal

law is to be strictly interpreted; when, therefore, it positively exacts knowledge on the part of the culprit, he is excused even by affected ignorance. As, in practice, it is not always easy to establish the shades of difference, it will suffice to remark that in a case of occult excommunication the culprit has the right to judge himself and to be judged by his confessor according to the exact truth, whereas, in the forum externum the judge decides according to presumptions and proofs. Consequently, in the tribunal of conscience he who is reasonably persuaded of his innocence cannot be compelled to treat himself as excommunicated and to seek absolution; this conviction, however, must be prudently established.

V. EFFECTS OF EXCOMMUNICATION

If we consider only its nature, excommunication has no degrees: it simply deprives clerics and laymen of all their rights in Christian society, which total effect takes on a visible shape in details proportionate in number to the rights or advantages of which the excommunicated cleric or layman has been deprived. The effects of excommunication must, however, be considered in relation also to the rest of the faithful. From this point of view arise certain differences according to the various classes of excommunicated persons. These differences were not introduced out of regard for the excommunicated, rather for the sake of the faithful. The latter would suffer serious inconveniences if the nullity of all acts performed by excommunicated clerics were rigidly maintained. They would also be exposed to grievous perplexities of conscience if they were strictly obliged to avoid all intercourse, even profane, with the excommunicated. Hence the practical rule for interpreting the effects of excommunication: severity as regards the excommunicated, but mildness for the faithful. We may now proceed to enumerate the immediate effects of excommunication. They are summed up in the two well known verses:

*Res sacræ, ritus, communio, crypta, potestas,
prædia sacra, forum, civilia jura vetantur,*

i.e. loss of the sacraments, public services and prayers of the Church, ecclesiastical burial, jurisdiction, benefices, canonical rights, and social intercourse.

(1) *Res Sacr*

These are the sacraments; the excommunicated are forbidden either to receive or administer them. The sacraments are of course validly administered by excommunicated persons, except those (penance and matrimony) for whose administration jurisdiction is necessary; but the reception of the sacraments by excommunicated persons is always illicit. The licit administration of the sacraments by excommunicated ecclesiastics hinges upon the benefit to be derived by the faithful. Ecclesiastics excommunicated by name are forbidden to administer the sacraments except in cases of extreme necessity; apart from this necessity penance and matrimony administered by such ec-

clesiastics are null (Decret. "Ne temere", art. iv). Excommunicated ecclesiastics tolerati, however, may licitly administer the sacraments to the faithful who request them at their hands, and the acts of jurisdiction thus posited are maintained by reason of the benefit accruing to the faithful, most frequently also because of common error (*error communis*), i.e. a general belief in the good standing of such ecclesiastics. The faithful, on their side, may, without sin, ask tolerated excommunicated ecclesiastics to administer sacraments to them; they would, however, sin grievously in making this request of the vitandi, except in case of urgent necessity.

(2) *Ritus*

Hereby are meant the Mass, the Divine Office, and other sacred ceremonies. An excommunicated person may not and should not assist at these ceremonies. If he be a toleratus, his presence need not be taken into account, and the service can be continued. If he be a vitandus he must be warned to retire, and in case of refusal he must be forcibly compelled to withdraw; but if he still persists in remaining, the service must be discontinued, even the Mass, unless the Canon has been commenced. (Benedict XIV, De sacr. Miss., sect. ii, n. 117.) Nevertheless, since the condition of an excommunicated person, even a vitandus, is no worse than that of an infidel, he may assist at sermons, instructions, etc., venerate images and relics, take holy water, and use privately other sacramentals. The excommunicated cleric is not released from any of his obligations in regard to the Divine Office and, if bound to it, must recite it, but privately and not in the choir. A toleratus may be admitted to the choir, but a vitandus must be expelled therefrom. All excommunicated clerics are prohibited from celebrating Mass and performing other strictly liturgical functions, under penalty of the irregularity *ex delicto* for violation of the censure; participation in the liturgical acts performed by an excommunicated cleric is a forbidden *communicatio* in sacris; however, no censure would result from it except in the case of clerics voluntarily communicating *in sacris* with those whom the pope had excommunicated by name (Const. "Apost. Sedis", II, 17). In each case the fault should be estimated according to circumstances.

(3) *Communio*

These are, properly speaking, the public suffrages of the Church, official prayers, Indulgences, etc., in which the excommunicated have no share. But they are not excluded from the private suffrages (i.e. intercessory petitions) of the faithful, who can pray for them.

(4) *Crypta*

This word signifies ecclesiastical burial, of which the excommunicated are deprived. In chapter xii, de sepulturis (lib. III, tit. xxviii), Innocent III says: "The canons have established that we should not hold communion after their death with those with whom we did not communicate during their lifetime, and that all those should be de-

prived of ecclesiastical burial who were separated from the unity of the Church, and at the moment of death were not reconciled thereunto." The Ritual (tit. VI, cap. ii, n. 2) renews this prohibition for those publicly excommunicated, and most writers interpret this as meaning those whose excommunication has been publicly proclaimed (Many, *De locis sacris*, p. 354), so that, under this head, the ancient discipline is no longer applicable, except to the *vitandi*. However this does not mean that the *tolerati* can always receive ecclesiastical burial; they may be deprived of it for other reasons, e.g. as heretics or public sinners. Apropos of this leniency, it must be remembered that it is not the excommunicated the Church wishes to favour, but rather the faithful for whose sake communion with the *tolerati* is allowed in the matter of burial as well as in other matters. The interment of a *toleratus* in a consecrated cemetery carries with it no longer the desecration of said cemetery; this would follow, however, in the case of the *vitandi*. (See BURIAL.)

(5) *Potestas*

Potestas signifies ecclesiastical jurisdiction, of which both the passive and the active use, to speak canonically, are forbidden the excommunicated. Jurisdiction is used passively when a person is the object of one of its acts, of a concession. Now, ecclesiastical authority has no official relations with the exile unless, at his request, it negotiates the conditions for his return to society. Connected with this discipline is the rule forbidding the excommunicated to receive from the pope any kind of rescript (of grace or justice), except in regard to their excommunication, under pain of nullity of such rescript (c. xxvi, de rescriptis, lib. I, tit. iii, and c. i, eod., in VI). Hence the custom of inserting in papal rescripts the so-called *ad effectum* absolution from censures, intended solely to ensure the value of the rescript, but affecting in no wise the excommunication, if already existent. Jurisdiction is used actively when exercised by its depositaries. It is easy to understand that the Church cannot leave her jurisdiction in the hands of those whom she excludes from her society. In principle, therefore, excommunication entails the loss of jurisdiction both in *foro externo* and in *foro interno* and renders null all acts accomplished without the necessary jurisdiction. However, for the general good of society, the Church maintains jurisdiction, despite occult excommunication, and supplies it for acts performed by the *tolerati*. But as the *vitandi* are known to be such, this merciful remedy cannot be applied to them except in certain cases of extreme necessity, when jurisdiction is said to be "supplied" by the Church.

(6) *Pr dia sacra*

Pr dia sacra are ecclesiastical benefices. The excommunicated ecclesiastic is incapable of acquiring a benefice, and his presentation to it would be legally null. A benefice already held is not forfeited at once, even when to the censure the law adds privation of benefice; this is carried into effect only through a sentence which must be at least

declaratory and issue from a competent (i.e. the proper) judge. Nevertheless, from the very first the excommunicated beneficiary loses those fruits of his benefice belonging to choir service, provided he is bound thereunto. Moreover, should he live a year in the state of excommunication, he can be deprived of his benefice through judicial sentence. The aforesaid effects do not result from occult excommunication.

(7) *Forum*

The excommunicated person is an exile from ecclesiastical society, consequently from its tribunals; only inasmuch, however, as they would be to his advantage. On the other hand, if he be summoned before them to satisfy a third party he is obliged to appear. Hence he cannot appear as plaintiff, procurator, or advocate; he may be the defendant, or the party accused. At this point the difference between the *vitandi* and the *tolerati* consists in this, that the former must be prevented from introducing any legal action before an ecclesiastical tribunal, whereas the latter can be debarred from so doing only when the prosecutor alleges and proves excommunication as already incurred. It is a question here only of public excommunication and before ecclesiastical tribunals.

(8) *Civilia jura*

Civilia jura, i.e. the ordinary relations between members of the same society, outside of sacred and judicial matters. This privation, affecting particularly the person excommunicated, is no longer imposed on the faithful except in regard to the *vitandi*. The medieval canonists enumerated the prohibited civil relations in the following verse:

- *Os, orare, vale, communio, mensa negatur,*

namely:

- (a) conversations, exchange of letters, tokens of benevolence (*osculum*);
- (b) prayer in common with the excommunicated;
- (c) marks of honour and respect;
- (d) business and social relations;
- (e) meals with the excommunicated.

But at the same time they specified the reasons that rendered these relations licit:

- *Utile, lex humilis, res ignorata, necesse,*

that is to say:

- (a) both the spiritual and the temporal benefit of the excommunicated and of the faithful;
- (b) conjugal law;
- (c) the submission owed by children, servants, vassals, and subordinates in general;

(d) ignorance of excommunication or of the prohibition of a particular kind of intercourse;

(e) finally, any kind of necessity, as human law, is not binding to this degree.

Remote Effects

All the effects that we have just enumerated are the immediate results of excommunication, but it also causes remote effects, which are not a necessary consequence and are only produced when the person censured occasions them. They are three in number:

(1) The cleric who violates excommunication by exercising one of the liturgical functions of his order, incurs an irregularity *ex delicto*.

(2) The excommunicated person who remains a year without making any effort to obtain absolution (*insordescencia*) becomes suspected of heresy and can be followed up and condemned as guilty of such (Council of Trent, Sess. XXV, cap. iii, De ref.; cf. Ferraris, s. v. "Insordescens").

(3) This neglect makes it the judge's duty to deprive the excommunicated cleric of all benefices, though some judges postpone for three years the fulfilment of this obligation (see Hollweck, Die kirchlichen Strafgesetze, art. 1, note 3).

Effects of Invalid or Unjust Excommunication

An excommunication is said to be null when it is invalid because of some intrinsic or essential defect, e.g. when the person inflicting it has no jurisdiction, when the motive of the excommunication is manifestly incorrect and inconsistent, or when the excommunication is essentially defective in form. Excommunication is said to be unjust when, though valid, it is wrongfully applied to a person really innocent but believed to be guilty. Here, of course, it is not a question of excommunication *latæ sententiæ* and in *foro interno*, but only of one imposed or declared by judicial sentence. It is admitted by all that a null excommunication produces no effect whatever, and may be ignored without sin (cap. ii, de const., in VI). But a case of unjust excommunication brings out in a much more general way the possibility of conflict between the *forum internum* and the *forum externum*, between legal justice and the real facts. In chapter xxviii, de sent. excomm. (Lib. V, tit. xxxix), Innocent III formally admits the possibility of this conflict. Some persons, he says, may be free in the eyes of God but bound in the eyes of the Church; vice versa, some may be free in the eyes of the Church but bound in the eyes of God: for God's judgment is based on the very truth itself, whereas that of the Church is based on arguments and presumptions which are sometimes erroneous. He concludes that the chain by which the sinner is bound in the sight of God is loosed by remission of the fault committed, whereas that which binds him in the sight of the Church is severed only by removal of the sentence. Consequently, a person unjustly excommunicated is in the same state as the justly excommunicated sinner

who has repented and recovered the grace of God; he has not forfeited internal communion with the Church, and God can bestow upon him all necessary spiritual help. However, while seeking to prove his innocence, the censured person is meanwhile bound to obey legitimate authority and to behave as one under the ban of excommunication, until he is rehabilitated or absolved. Such a case seems practically impossible nowadays.

VI. ABSOLUTION FROM EXCOMMUNICATION

Apart from the rare cases in which excommunication is imposed for a fixed period and then ceases of itself, it is always removed by absolution. It is to be noted at once that, though the same word is used to designate the sacramental sentence by which sins are remitted and that by which excommunication is removed, there is a vast difference between the two acts. The absolution which revokes excommunication is purely jurisdictional and has nothing sacramental about it. It reinstates the repentant sinner in the Church; restores the rights of which he had been deprived, beginning with participation in the sacraments; and for this very reason, it should precede sacramental absolution, which it thenceforth renders possible and efficacious. After absolution from excommunication has been given in *foro externo*, the judge sends the person absolved to a confessor, that his sin may be remitted; when absolution from censure is given in the confessional, it should always precede sacramental absolution, conformably to the instruction in the Ritual and the very tenor of the formula for sacramental absolution. It may be noted at once that the principal effect of absolution from excommunication may be acquired without the excommunicated person's being wholly reinstated in his former position. Thus, an ecclesiastic might not necessarily recover the benefice which he had lost; indeed he might be admitted to lay communion only. Ecclesiastical authority has the right to posit certain conditions for the return of the culprit, and every absolution from excommunication calls for the fulfilment of certain conditions which vary in severity, according to the case.

Excommunication, it must be remembered, is a medicinal penalty intended, above all, for the correction of the culprit; therefore his first duty is to solicit pardon by showing an inclination to obey the orders given him, just as it is the duty of ecclesiastical authority to receive back the sinner as soon as he repents and declares himself disposed to give the required satisfaction. This satisfaction is often indicated in the law itself; for instance, usurpers of ecclesiastical property are excommunicated until such time as they make restitution (Council of Trent, Sess. XXII, c. xi); and again, it is determined by the judge who grants absolution or the indulgent for absolving. Besides expiatory practices habitually known as "penance", such satisfaction exacts opportune measures for the reparation of the past, as well as guarantees for the future. It is not always necessary that these measures be executed prior to absolution, which is fre-

quently granted on the solemn promise of the excommunicated party either to accomplish a specified act, such as coming to an agreement with the Church for the property usurped, or simply to abide by the orders of ecclesiastical authority (*standi mandatis ecclesi*). In such cases absolution is not unusually given under pain of "reincidence" (*ad reincidentiam*), i.e., if within a definite period the person censured has not accomplished a certain specified act, he incurs the same excommunication; his status is just as if he had never been absolved. However, this clause of reincidence is not to be presumed; when occasion requires, it is inserted in the sentence of absolution or in the indult granted for that purpose.

The formula of absolution from excommunication is not strictly determined, and, since it is an act of jurisdiction, it suffices if the formula employed express clearly the effect which it is desired to attain. The formula for remitting the excommunication in foro externo should be such as to absolve validly from public excommunication. Similarly, an excommunication imposed by judicial sentence is to be revoked by an absolution in the same form; occult excommunication may be revoked in the confessional by the sacramental formula. The Roman Ritual (tit. LII, c. ii) gives the formula of absolution used in foro externo and states that in foro interno absolution is given in the usual sacramental form.

Who Can Absolve from Excommunication?

The answer is given in the customary rules of jurisdiction. The right to absolve evidently belongs to him who can excommunicate and who has imposed the law, moreover to any person delegated by him to this effect, since this power, being jurisdictional, can be delegated. First, we must distinguish between excommunication ab homine, which is judicial, and excommunication a jure, i.e. *latae sententiae*. For the former, absolution is given by the judge who inflicted the penalty (or by his successor), in other words by the pope, or the bishop (ordinary), also by the superior of said judge when acting as judge of appeal. As to excommunication *latae sententiae*, the power to absolve is either ordinary or delegated. Ordinary power is determined by the law itself, which indicates to what authority the censure is reserved in each case. Delegated power is of two kinds: that granted in permanency and set down in the law and that granted or communicated by personal act, e. g. by authority (faculties) of the Roman Penitentiaria, by episcopal delegation for special cases, or bestowed upon certain priests. Of this second kind of delegation there is no need to speak, as it belongs to each one to verify the power (faculties) that he possesses. Delegation of the first kind carries with it the power to absolve from excommunication without special request or particular faculties. Such power is in this case conferred by the law itself. Nevertheless this power is subject to the general law that governs delegation and is valid only for the cases and under the conditions mentioned in the concession. Thus faculties granted for the forum

internum cannot be extended to the forum externum, nor can those granted for specially reserved excommunications be used for simply reserved cases, and so on. However, the faculties proceeding from both kinds of delegation may be "cumulated", i.e. may be held and exercised by the same person.

These principles admitted, we must remember that with reference to reservation or the right to absolve, excommunications are divided into four classes: excommunications specially reserved to the pope; excommunications simply reserved to the pope; excommunications reserved to the bishop (ordinary); and, finally, excommunications that are not reserved (*nemini reservat*). According to this classification, as a general rule, only the pope can absolve from the first two kinds of excommunication, although his power extends to the others; bishops (ordinaries), but not other priests, can remove excommunications of the third class; finally, those of the fourth class, and those only, can be revoked by any approved priest, without further special delegation. At this point, however, must be considered certain concessions of the law that may be grouped in three categories: the permanent faculties of bishops; concessions for urgent cases; and concessions for the point of death.

(1) The Faculties of Bishops

The Council of Trent (Sess. XXIV, c. vi, De ref.) authorizes bishops to absolve their own subjects in their own dioceses from all excommunications, consequently from those reserved to the Holy See, when occult or, rather, not pertaining to the forum externum. They can exercise this power either in person or through a special delegate of their choice, but in the tribunal of conscience only. However, the Constitution "Apostolicæ Sedis" restricted this provision of the council to excommunications simply reserved to the pope, so that, without special indult, bishops can no longer absolve from specially reserved cases, even in foro interno. On the other hand, the indults they receive are more or less liberal and widely communicable.

(2) Urgent Cases

In the chapter "Nuper" (xxix, de sent. excomm., lib. V, tit. xxxix), Innocent III sets forth the principle that governs such cases: "When it is difficult for the excommunicated person to go to him who excommunicated him, he may be absolved by his bishop or even by his own priest, on promising to obey the orders of him by whom excommunication was pronounced." This is the principle that moralists and canonists formulated as an axiom: *Impedito casus papalis fit episcopalis*: in case of one who is prevented from presenting himself to the pope, the excommunication reserved to the pope may be removed by the bishop. But most authors carried the analogy still further: for him who is prevented from presenting himself to the bishop, the excommunication may be removed by any confessor. In regard to the obligation of submitting to the orders of the pope or the bishop, the moralists and canonists generally taught as follows: First, no

one was obliged to apply in writing (correct as to the removal of excommunication, though Innocent III says nothing of this kind concerning a request for information). Then they distinguished between obstacles that were more or less prolonged: perpetual obstacles were such as exceed five years; obstacles of long duration were those lasting over six months; and obstacles of short duration, those continuing for less than six months. When the obstacle was perpetual the bishop or, if he could not be reached, any priest might absolve without appealing to the superior; this could also be done, but not without obligation of recourse to the superior on the cessation of the obstacle, when the latter was of long duration, provided there were urgency. Finally, the authors drew up a long list of those who were supposed to be unable to present themselves in person to the pope; and this list included almost every one (Gury, *Theol. Moralis*, II, nn. 952 and 375). This practice, far more lenient than was intended by Innocent III, has been recently profoundly modified by a decree of the Congregation of the Inquisition (Holy Office) dated 23 June, 1886. Henceforth "in urgent cases when absolution cannot be deferred without danger of grave scandal or infamy, which is left to the conscientious appreciation of the confessor, the latter, after having imposed the necessary satisfaction, can absolve, without other faculties, from all censure; even those specially reserved to the Holy See, but under pain or reincidence under the same censure if, within a month, the penitent thus absolved does not recur to the Holy See by letters and through the medium of the confessor." This new method has been more precisely explained and even rendered easier by subsequent papal decisions. The absolution thus given is direct (Holy Office, 19 Aug., 1891), and although recourse to the Penitentiaria is obligatory, its object is not to ask a new absolution, but only to solicit the order of the Church, the penitent, as stated above, having had to make a serious promise to conform to them (*standi mandatis Ecclesi*). The power thus granted in urgent cases is valid for all cases, without exception, reserved by law to the pope or the ordinary, even for the absolution of an accomplice (Holy Office, 7 June, 1899).

As to what constitutes a state of urgency, the reply of 16 June, 1897, is very reassuring, since it permits absolution from censures "as soon as it becomes too distressing to the penitent to remain in the state of sin during the time necessary for soliciting and receiving from Rome the power to absolve". Now, according to the moralists it is too much to remain even a day or two in the state of sin, especially for priests. The appeal, though usually made through the medium of the confessor, can be made by the penitent himself if he be capable; indeed he should write himself if he cannot easily return to the same confessor (Cong. of the Penitentiaria, 7 Nov., 1888). Finally, if both confessor and penitent find it impossible to appeal by letters, these may be dispensed with (Holy Office, 18 Aug., 1898). The letters should be addressed to the Congregation of the Penitentiaria and should contain information concerning all necessary circum-

stances, but under a false name (Sac. Pen., 7 Nov., 1888). If the interested party, though able to appeal to the Holy See, fails to do so within a month from the time of receiving absolution, he or she incurs the former censures, which remain effective until there is a new absolution followed by recourse to Rome. There would, however, be no reincidence if the interval of a month were to expire through the confessor's fault. It is to be noted that this sanction of reincidence applies to all censures reserved to the pope, but not to those reserved by law to the ordinaries. Finally, this method is not obligatory for censures reserved to ordinaries by diocesan law. Bishops, however, could profitably apply it to such censures, and some have already done so.

(3) In Danger of Death

It is a principle repeatedly set forth in canon law that at the point of death all reservations cease and all necessary jurisdiction is supplied by the Church. "At the point of death", says the Council of Trent (Sess. XIV, c. vii), "in danger of death", says the Ritual (tit. III, cap. i, n. 23), any priest can absolve from all sins and censures, even if he be without the ordinary faculties of confessors, or if he himself be excommunicated; he may do so even in presence of another priest properly authorized (Holy Office, 29 July, 1891). The Constitution "Apostolicæ Sedis" expressly maintains this merciful concession, merely adding, for the case in which the moribund is restored to health, the obligation of having recourse to the Holy See, if he has been absolved from excommunication specially reserved to the pope, unless he prefers to ask absolution of a confessor provided with special faculties. This recourse, although identical with that of which we have just spoken for urgent cases, nevertheless differs from it on two points: it is not imposed for the absolution from excommunications simply reserved, and the short delay of a month is not counted from the time of receiving absolution, but from the time of recovery.

VII. EXCOMMUNICATIONS LATÆ SENTENTIÆ NOW IN FORCE

In the preamble of the Constitution "Apostolicæ Sedis", Pius IX stated that during the course of centuries, the number of censures latæ sententiæ had increased inordinately, that some of them were no longer expedient, that many were doubtful, that they occasioned frequent difficulties of conscience, and finally, that a reform was necessary. On this head Pius IX had anticipated the almost unanimous request of the Catholic episcopate presented at the Vatican Council (Colleetio Lacensis, VII, col. 840, 874, etc.). The number of excommunications latæ sententiæ enumerated by the moralists and canonists is really formidable: Ferraris (Prompta Biblioth., s. v. Excommunicatio, art. ii-iv) gives almost 200. The principal ones were destined to protect the Catholic Faith, the ecclesiastical hierarchy and its jurisdiction, and figured in the Bull known as "In C na Domini" read publicly each year in Rome, on Holy Thursday. In time, this document had received various additions (Ferraris, loc. cit., art. ii, the text of Clement

XI), and from it the Constitution "Apostolicæ Sedis" derives excommunications specially reserved, with exception of the tenth. The Constitution of Pius IX deals with no penalties other than censures; it leaves intact all censures *ferendæ sententiæ* but suppresses all censures *latae sententiæ* that it does not retain. Now, besides those which it enumerates it retains:

- (1) the censures decreed (and not simply mentioned) by the Council of Trent;
- (2) the censures of special law, i.e. those in vigour for papal elections, those enforced in religious orders and institutes, in colleges, communities, etc. As to the censures enumerated, they should be interpreted as if pronounced for the first time, and ancient texts should be consulted for them only in so far as such texts have not been modified by the new law.

Thus the excommunications *latae sententiæ* enforced to-day by common law in the Catholic Church proceed from three sources:

- (A) those enumerated in the Constitution "Apostolicæ Sedis";
- (B) those pronounced by the Council of Trent; and
- (C) those introduced subsequently to the Constitution "Apostolicæ Sedis", i.e. later than 12 October, 1869.

We enumerate them here with a brief commentary.

A. Excommunications of the Constitution "Apostolicæ Sedis"

These are divided into four categories:

- (a) those specially reserved to the pope;
- (b) those simply reserved to the pope;
- (c) those reserved to the bishop (ordinary);
- (d) those not reserved to anyone.

(a) Excommunications Specially Reserved to the Pope

These are twelve in number and are imposed upon the following persons:

- (1) "All apostates from the Christian Faith, heretics of every name and sect, and those who give them credence, who receive or countenance them, and generally all those who take up their defence." Strictly speaking, an apostate is one who goes over to a non Christian religion, e.g. Islam; to such apostates are assimilated those who publicly renounce all religion; this apostasy is not to be presumed; it is evident that both kinds of apostates exclude themselves from the Church. A heretic is one who rejects a Catholic dogma. The first to be considered is the heretic who becomes such of his own volition; who, being in the Catholic Church, obstinately repudiates a truth of faith. Excommunication is incurred by him, if, with full knowledge, he exteriorly formulates an heretical proposition; and if he seeks to propagate his error he is *dogmatizans* and should be denounced. Next comes the heretic who belongs to an heretical association; for such a person his heretical membership alone is sufficient to bring him under

sentence of excommunication. In his case the penalty is incurred by adhesion to the heresy, notably by wilful and active participation *in sacris* (i.e. in public worship) with heretics; hence the excommunication of those who contract a mixed marriage before an heretical minister as such (Holy Office, 28 Aug., 1888). Finally, the penalty extends to those who believe in heretics (*credentes*) and join their ranks; to those who receive them, i.e. who give them shelter in their homes, so as to protect them from the pursuit of authority; and to those who countenance or defend them as heretics and in view of the heresy, provided it be a positive and efficacious assistance.

(2) "All those who knowingly read, without permission of the Apostolic See, books by these same apostates and heretics and upholding heresy, as also the books of any authors whomsoever specifically prohibited by Letters Apostolic, and all who keep, print, or in any way defend these same books." After heretical persons come heretical books. The act that incurs excommunication is, first, reading done to a considerable extent and culpably, i.e. by one who knows the nature of the books and of the excommunication, and who, moreover, has not the necessary permission. The secondary acts punishable with the same penalty are the keeping in one's possession, the printing (rather the publishing), and, finally, the defence, by word or by writing, of the books in question. These books are of two kinds: first, those written by apostates, or heretics, and which uphold and commend heresy, two conditions that must exist simultaneously; second, books specifically condemned, i. e., by mention of their titles, not by decree of the Index, but by Letters from the pope himself, Bulls or Briefs, and under pain of excommunication (for a list of these books see Hilgers, "Der Index der verbotenen Bücher", Freiburg, 1904, p. 96; and "Die Bücherverbote in Papstbriefen", Freiburg, 1907).

(3) "Schismatics and those who elude or obstinately withdraw from the authority of the reigning Roman pontiff." The schismatics here referred to are of two kinds: those who are such because they belong to separated Churches which reject the authority of the pope, and those who, being Catholics, become schismatics by reason of obstinate disobedience to the authority of the pope as such.

(4) "All those, of no matter what state, rank, or condition, who appeal from the ordinances or mandates of the reigning Roman pontiff to a future ecumenical council, and all who have given aid, counsel, or countenance to this appeal." The appeal from the commands of the pope to a future ecumenical council, not only implies the superiority of the council over the pontiff, but is pre-eminently an act of injurious disobedience to the Head of the Church. Were this appeal efficacious it would render all church government impossible, unless it be accepted that the normal state of the Church is a general council in perpetual session, or at least meeting at short intervals. This extreme Gallicanism is justly punishable with excommunication. The penalty is visited upon

all those who have influenced such act of appeal, either by aid, counsel, or support. This excommunication, however, is to be strictly interpreted; it would not be incurred in consequence of an appeal made to a future pope, the Holy See being vacant, or to a general council actually assembled.

(5) "All who kill, mutilate, strike, seize, incarcerate, detain or pursue with hostile intent, cardinals, patriarchs, archbishops, bishops, legates or nuncios of the Holy See, or drive them from their dioceses, jurisdictions, estates, or domains, as also those who ratify these measures or further them by aid or countenance." The object of this penalty is not so much to protect the members of the clergy, like the celebrated excommunication of the canon "Si quis suadente diabolo", of which we shall speak below, but rather to safeguard the prelates or superiors in whom the Church has lodged her jurisdiction. The text clearly indicates the acts punished by excommunication, i.e. all violent attacks on the person of a prelate as such; it likewise specifies the culprits, i.e. those who perpetrate such assaults and those who are responsible for them, as also their active accomplices.

(6) "Those who directly or indirectly prevent the exercise of ecclesiastical jurisdiction, either in foro interno or in foro externo, and who, for this purpose, have recourse to the secular tribunal; also those who provoke or deliver the orders of this tribunal or lend it their aid, counsel, or support." The preceding article protects those who are the depositaries of jurisdiction; the present article protects the exercise of said jurisdiction. It punishes any obstacle raised against the delivery or execution of a sentence or decision of the ecclesiastical authority. It is not question here of the power of order (*potestas ordinis*) or of facts that do not really imply jurisdiction, e.g. a simple contract. Nor is it question of measures taken with prelates so as to influence them into exercising their jurisdiction in a given direction, e.g. to confer a benefice on Caius or withhold one from Titius; this censure is meant to punish any obstacle that really prevents action on the part of a prelate who wishes to perform an act of jurisdiction or to carry it into effect. He is directly prevented when violence is used against him; indirectly, when his subordinates are prevented from acting. The chief opposition here considered is recourse to secular and especially judicial authority. Excommunication is therefore incurred under this head by all who provoke the intervention of secular tribunals, provided such intervention actually follow; by all who deliver orders or directions intended to prevent the exercise of ecclesiastical jurisdiction; finally, by all who co-operate in these acts with aid, counsel, or support, unless under compulsion. Moralists and canonists exempt from this penalty the clerks and servants of the secular courts.

(7) "Those who directly or indirectly oblige lay judges to cite ecclesiastical persons before their tribunal, except in cases provided for by canonical agreements, also those who enact laws or decrees against the liberty or rights of the Church." The first part

of this article has for its object the protection of the privileges of the ecclesiastical forum, i.e. of those ecclesiastics whose right it is to be judged by ecclesiastical tribunals; consequently, those are excommunicated who oblige lay judges to summon clergymen before their tribunal in cases where this ecclesiastical privilege (*privilegium fori*) should be respected. But the judges themselves, who act by virtue of their office, are not excommunicated (Holy Office, 1 Feb., 1870). Those who thus force lay judges to violate the *privilegium fori* are of two kinds: namely, those who actually cite ecclesiastics before secular judges, and the legislators or makers of laws detrimental to the rights of the Church. The first are not excommunicated provided they have no other means of obtaining justice, i.e. when the laws of the country in question do not recognize the aforesaid ecclesiastical *privilegium fori* (Holy Office, 23 Jan., 1886). There remains, therefore, of this censure little more than the second part of the article, which now affects chiefly the legislators responsible for laws and decrees against the liberty and rights of the Church. The regulations governing excommunications have been renewed and somewhat extended by the *Motu Proprio* "Quantavis diligentia" of 9 October, 1911.

(8) "Those who have recourse to lay power for the prevention of Apostolic Letters or Acts of any kind emanating from the Apostolic See or from its legates or delegates; those who directly or indirectly prohibit the promulgation of these acts or letters, or who, on the occasion of such promulgation, strike or terrify either the parties interested or third parties." This article should be compared with number 6 (above), from which it differs in that it protects, not all exercise of ecclesiastical jurisdiction, but that which the Holy See exercises in its official letters, it being eminently important to ensure the free communication of the faithful with Rome. The letters in question are: first, Apostolic Letters, in which the pope himself speaks, Bulls, Briefs, Encyclicals, etc.; second, the Acts of the Holy See emanating from Roman Congregations or other organs of the Curia, which constitute but one authority with the pope (Holy Office, 13 Jan., 1892); finally, the acts of the official representatives of the pope, e.g. papal legates and delegates. The excommunication considers not only Letters that concern all the faithful, but also those regarding individuals, e. g. grants of benefices, dispensations, etc. This admitted, the penalty applies to three classes of persons, namely: those who resort to secular power, not only judicial but administrative, to prevent these Letters from being published or from producing their effect; those who, by means of authority, prevent such publication or execution; and finally, those who, on the occasion of these Letters, strike or terrify either the beneficiaries or even third parties who take part in their publication or execution. According to the more probable opinion, excommunication is incurred even if these measures of opposition do not produce the intended results.

(9) "All falsifiers of Apostolic Letters, even in the form of a Brief, and of petitions concerning matters of grace or justice signed by the Roman pontiff, or by cardinal vice-chancellors or those who replace them, or simply by command of the pope; also those who falsely publish Apostolic Letters, even in the form of a Brief; and finally, those who falsely sign petitions of this kind with the name of the Roman pontiff, of the vice-chancellor, or of those who replace them." This excommunication punishes what is generally known as forgery, not in all its forms, but in so far as it affects such pontifical letters or grants as are issued through the tribunals known as the "Segnatura Gratiæ" and the "Segnatura Justitiæ", i.e. whence issue papal favours purely benevolent or connected with litigation. It does not therefore attain forgeries affecting the letters of grants of the Roman Congregations or of prelates. It may be somewhat of a surprise to know that this excommunication does not include those who fabricate an entire Apostolic Letter, the definition of falsification (*falsum*) meaning only a notable alteration of authentic Letters either by suppression, erasures, writing over, or substitution. Petitions addressed to the pope, when granted, are first signed by him, or by the vice-chancellor, or other officers. The grant does not thereby become official, but the petition thus signed serves as a basis for the wording of Apostolic Letters (Bulls or Briefs) that actually grant the favour requested. In this process three acts are punishable with excommunication: the false signing of a petition; the falsification of Apostolic Letters, and the publication of Letters thus falsified, in order to use them.

(10) "Those who absolve an accomplice in a sin against chastity, and that even at the moment of death, provided another priest, although he be not approved for confession, can hear the confession of the dying person without serious danger of infamy or scandal." This excommunication is not derived from the Bull "In C na Domini", but from the celebrated Constitution of Benedict XIV, "Sacramentum P nitentiæ" (1 June, 1741), completed by his Constitution "Apostolici muneris" (8 Feb., 1745). By these Bulls the pope, with a view to protecting the Sacrament of Penance from sacrilegious abuse, withdraws all jurisdiction from a confessor for absolving from sins against chastity which he may have committed with another person, whether man or woman; the absolution he might impart for such sin would be null, and the mere attempt to absolve would incur excommunication. The sin thus withdrawn from the jurisdiction of the confessor is any grievous exterior sin against the Sixth Commandment, but it must be such on both sides. The confessor accessory to it cannot pardon it, but, this sin once pardoned, he incurs no penalty by again hearing the confession of his accomplice. This being the case, excommunication is incurred by the confessor if he pronounce the formula of absolution after his accomplice has accused himself or herself of this sin, even though he had not the intention of absolving, or even if he only feign to absolve (Holy Office, 5 Dec., 1883), thereby allowing the penitent to suppose that

he has absolved him or her; or again if he be the cause of the penitent's refraining from accusing himself or herself of this sin (S. Peniten., 19 Feb., 1896). Neither gross (*crassa, supina*) nor affected ignorance excuses from the censure (Holy Office, 13 Jan., 1892). There are but two cases in which excommunication is not incurred: first, under absolutely exceptional circumstances where the penitent could not approach another confessor, as the human law does not bind at the cost of such serious disadvantage; again, at the moment of death. But even then Benedict XIV does not restore the power of absolving nor exempt from excommunication, unless it be morally impossible for the dying person, without grave danger of slander or scandal, to call in another confessor; this condition, however, should be interpreted broadly.

(11) "Those who usurp or sequester the jurisdiction, property, or revenues belonging to ecclesiastical persons by reason of their churches or benefices." To usurp is to take as if it legitimately belonged to oneself that which belongs to another; hence it is that this article does not apply to thieves of ecclesiastical property (Holy Office, 9 March, 1870). To sequester is formally and authoritatively to place in the custody of a third party property withdrawn from the possession of a previous owner. The rights and property protected by this article do not include all church property but only the rights and property of beneficed clergy as such; they are, as a matter of fact, the principal possessions of the Church. Other property, e.g. that belonging to pious establishments (*opera pia*) or confraternities and that intended for the maintenance or reparation of churches, is protected, indeed, by distinct censures, but its usurpation or sequestration does not incur the excommunication contemplated by this article, which was declared applicable to intruded parish priests in Switzerland (Pius IX, Encyclical of 21 Nov., 1873; S. Cong. of the Council, 23 May, 1874) and in Prussia (25 Feb., 1875). It applies quite certainly to governments that despoil the Church of her property.

(12) "Those who themselves or through others, invade, destroy, or detain cities, lands, places, or rights of the Roman Church, those who hold possession of, disturb, or detain its sovereign jurisdiction, and all who give aid, counsel, or countenance to these offences." This penalty applies to the authors and accomplices of the invasion and detention of the temporal domains of the Holy See.

(b) Excommunications Simply Reserved to the Pope

Before enumerating those it intends to retain, the Constitution "Apostolicæ Sedis" pronounces a first excommunication of this kind against "those who presume to absolve, without the requisite faculties and under any pretext whatsoever, from excommunications that are specially reserved". This article is directed against those who dare to absolve in bad faith or rashly; a well-founded doubt, however, and even gross ignorance may be pleaded as excuses. Then follow seventeen excommunications simply reserved, declared against the following persons:

(1) "Those who either publicly or privately teach or defend propositions condemned by the Holy See under pain of excommunication *latæ sententiæ*; likewise those who teach or maintain as lawful the practice of asking the penitent the name of his or her accomplice, a practice condemned by Benedict XIV in his Constitutions 'Suprema' (7 July, 1745), 'Ubi primum' (2 July, 1746), and 'Ad eradicandam' (28 Sept., 1746)." This article contains two distinct parts. In the first it is not question of all propositions condemned by popes or councils in terms less condemnatory (e.g. rash, offensive, etc.) than the specific stigma *heretical* (to defend heretical propositions being heresy itself and already declared a chief cause of excommunication, see above), but only those which the popes have specifically forbidden to be maintained under pain of excommunication *latæ sententiæ*. These propositions are:

- (a) the forty-one errors of Luther condemned by Leo X, 16 May, 1520;
- (b) the seventy-nine theses of Michael Baius condemned 1 Oct., 1567, 29 Jan., 1579, and 16 March, 1641;
- (c) the thesis on confession and absolution by letter or messenger, condemned by Clement VIII, 20 June, 1602;
- (d) the twenty-eight propositions condemned by Alexander VII, 24 Sept., 1665;
- (e) the seventeen propositions condemned by the same pope, 18 March, 1666;
- (f) the sixty-five propositions condemned by Innocent XI, 4 March, 679;
- (g) the sixty-eight propositions of Miguel de Molinos condemned by the same pope, 20 November, 1687;
- (h) the second of two propositions condemned by Alexander VIII, 24 August, 1690;
- (i) the thirty-one propositions condemned by the same pope, 7 December, 1690;
- (k) the five propositions on duelling condemned by Benedict XIV, 10 November, 1752;
- (l) and finally the sixty-five Modernistic propositions condemned by decree of the Holy Office, 3 July, 1907, according to the *Motu Proprio* of Pius X, 19 November, 1907.

The text of all these propositions will be found in Denzinger's "Enchiridion Symbolorum, definitionum et declarationum", etc. (10th ed., Freiburg, 1908), also, the last series excepted, in Pennachi's "Comment. in Const. Apost. Sedis", I, 168. The second part of the article aims at the abusive practice of requiring the penitent, under pain of being refused absolution, to divulge the name of his or her accomplice in any crime, a dangerous practice and opposed to the conditions of secrecy under which sacramental confession is made. Benedict XIV denounced it, notably in Portugal, by the aforementioned Constitutions. It is to be noted, however, that this excommunication is not incurred by the confessor who asks a penitent the name of his or her accomplice, but only by him who teaches or maintains that this practice is permitted. Moreover, the

expression "to teach or maintain" implies more than merely to affirm or share the condemned opinions.

(2) "Those who, at the instigation of the devil, violently lay hands on ecclesiastics or religious of either sex, exception being made, as regards reservation, in behalf of cases and of persons that the law or privileges allow the bishop or others to absolve." This is the celebrated privilege or immunity "of the canon" (*privilegium canonis*), so called from the canon "Si quis, suadente diabolo" (Decretum of Gratian, C. xvii, q. iv, c. xxix), enacted by the Council of Lateran in 1139 and intended to protect the honour of the clergy from material violence and injury. The persons protected are all who belong to the clergy in the broad sense of the word, i.e. both minor and major clerics, tonsured persons, monks, nuns, novices, and even tertiaries living in community. This privilege is to be interpreted broadly. The acts punished are all injurious corporal violence, such as blows and wounds, a fortiori mutilation; also pursuit, imprisonment, and arrest, likewise insulting acts, such as a slap in the face, etc. The penalty is not imposed for acts that are not grievous, for verbal injuries, for excusable violence, e.g. in the case of legitimate defence, or finally when one is unaware that he is dealing with a cleric. Nowadays only the real perpetrators of these deeds are excommunicated, not accomplices nor those who are morally responsible. Once the fact is publicly known the culprits are vitandi even without being denounced by name. Absolution from this excommunication is regularly reserved to the pope, but the text of the article maintains the faculties possessed by bishops and others, such as we have heretofore indicated.

(3) "Those who fight duels, those who challenge or accept challenge thereunto, all accomplices, all who help or countenance such combats, all who designedly assist thereat, finally all who permit duelling or who do not prevent it in so far as lies in their power, no matter what their rank or dignity, be it royal or imperial." This severe discipline against duelling dates from the Council of Trent (Sess. XXV, e. xix, De ref.); here, however, only the excommunication in question is considered. It aims at duelling, properly so called, by challenge and on accepted conditions, not at other single combats or altercations. University duels, so common in Germany, are included (S. Cong. of the Council, 29 Aug., 1890). The malice of the duel lies in the fact that it makes right depend upon the fate of arms; this penalty is extended to all who take any part whatever in these detestable combats. The excommunication is incurred, first, by the duellists themselves, not only when they actually fight, but as soon as they have proposed or accepted a challenge; next, by the official witnesses or seconds, also by physicians expressly brought upon the scene (Holy Office, 28 May, 1884), and by all spectators not accidentally present; likewise by those who permit these affairs, when such permission is necessary, e.g. in the army, and by those who, although able to prevent duelling, refrain from so doing.

(4) "Those who become members of the Masonic sect, of the Carbonari, or of other similar sects that plot either openly or secretly against the Church or legitimate authorities; all who countenance these sects in any way whatever, and finally, all who do not inform against the occult chiefs or leaders, i.e. until they have made such denunciations." Certain associations are prohibited because of their evil or dangerous object; this article deals only with those to which it is forbidden to belong under pain of excommunication *latæ sententiæ*. These are known by their aim, which is to plot against the Church or legitimate authorities, obviously by illicit or criminal means; this excludes at once purely political groups. It matters little whether or not these societies exact secrecy from their members, though the element of secrecy constitutes an unfavourable presumption. The article names two of these sects, the Freemasons and the Carbonari; to these we must add the Fenians (Holy Office, 12 Jan., 1870). There are four prohibited American societies: the Independent Order of Good Templars (Holy Office, 9 Aug., 1893), the Odd Fellows, the Sons of Temperance, and the Knights of Pythias (Holy Office, 20 June, 1894), but not under pain of excommunication. In regard to the sects of which our article treats, three distinct acts incur excommunication: the inscribing of one's name as a member, the positive favouring of the sect as such, and failure to denounce the occult leaders. For this last act censure is not incurred if the leaders be not occult, or if they be not known with sufficient certainty. The denunciation, if imperative, must be made within a month; once it is made the excommunication is no longer reserved, and one is in a condition to receive absolution from any confessor without further formality.

(5) "Those who command the violation of or who themselves rashly violate the immunity of ecclesiastical asylum." Immunity, or right of sanctuary, protected criminals who took refuge near the altar or within sacred edifices; it was forbidden to remove them from such places of refuge either by public or private force. This immunity, although formerly beneficial, has disappeared from modern life; the excommunication here retained has hardly more than the value of a principle; it may be noted that the article is cautiously worded. By its terms excommunication would be incurred only by those who rashly, and without being constrained thereto, violate the right of sanctuary as such (Holy Office, 1 Feb., 1871; 22 Dec., 1880).

(6) "Persons of any kind, condition, sex, or age who violate the *clausura* [i.e. canonical enclosure] of nuns by penetrating into their monasteries, those introducing or admitting them, also nuns who leave their *clausura*, except in the cases and in the manner provided for by the Constitution 'Decori' of St. Pius V." The reader will find in the article CLOISTER further details; here it suffices to add that the enclosure in question is that of the papal enclosure (*clausura papalis*), or that of religious women with solemn vows. The Constitution "Decori" (24 Jan., 1570) limits the reasons of

gress to fire, leprosy, or an epidemic; even in the two latter cases it is necessary for such nuns to have the written authorization of the bishop.

(7) "Women who violate the enclosure [clausura] of male religious and the superiors and others who admit them." Here also it is question of religious with solemn vows; moreover, it has not seemed necessary to provide for exceptional cases nor for permission.

(8) "Those who are guilty of real simony [*simonia realis*] for the obtaining of any benefices whatever, and their accomplices." (For this article and the two that follow see SIMONY.)

(9) "Those who are guilty of confidential simony [*simonia confidentialis*] apropos of any benefice or any dignity whatever."

(10) "Those who are guilty of real simony for the purpose of entering a religious order."

(11) "All who traffic in Indulgences or other spiritual favours are excommunicated by the Constitution of St. Pius V, 'Quam plenum' (2 Jan., 1569)." This Constitution enumerates the abuses that the pope wished to remedy. Certain Spanish bishops were accustomed to issue public grants of Indulgences or various other spiritual favours, but in a manner for which they were unauthorized; the abuse consisted mainly in the pecuniary conditions they imposed for obtaining these favours (Indulgences, choice of a confessor for the absolution of reserved cases, Mass and burial in time of interdict, dispensation from abstinence, the right to present several sponsors at baptism, etc.). To overcome these abuses St. Pius V inflicted two kinds of penalties: bishops were punished by being forbidden entrance into church and by suspension of the "fruits", or revenues, of their benefices; culprits of inferior rank were excommunicated. The penalties against bishops have been suppressed; excommunication, however, is retained to punish those who would reap unlawful profit from the publication or granting of Indulgences or of the other spiritual favours enumerated.

(12) "Those who collect stipends for Masses and make profits out of them by having the Masses celebrated in places where the stipends are not so high." The object of the penalty is to remedy all shameful traffic in Mass-stipends; to incur it two things are necessary: not only must the stipends for Masses (*called missæ manuales*) be collected, but a portion of them must be withheld when remitting them to the priests who are to fulfil the obligation of saying the Masses. Despite the wording of the article, it is not necessary that both conditions, the quest of stipends and the celebration of the Masses, occur in different places (Holy Office, 19 Aug., 1891, ad 4).

(13) "All those excommunicated by the Constitutions of St. Pius V, 'Admonet nos' (29 March, 1567); Innocent IX, 'Quæ ab hâc Sede' (4 Nov., 1591); Clement VIII, 'Ad Romani Pontificis curam' (26 June, 1592); and Alexander VIII, 'Inter cæteras' (24 Oct.,

1660), concerning the alienation and enfeoffment of cities and places belonging to the Holy Roman Church." This article deals with the temporal domains of the Church and calls here for no special comment.

(14) "Religious who, without permission of the parish priest, venture to administer extreme unction or the Eucharist as Viaticum, to ecclesiastics or laymen, except in cases of necessity." The penalty affects religious with solemn vows and professed, but is not incurred if they have at least the presumed permission of the parish priest, if they be in ignorance, finally if it be a case of necessity. Those to whom these religious must not administer the sacraments are seculars, ecclesiastics or laymen; they may, however, administer them to persons domiciled in their convents.

(15) "Those who without legitimate permission take relics from the cemeteries or catacombs of Rome or its territory, and those who give such persons aid or countenance." The permission is to be sought from the Roman Vicariate, and excommunication is incurred only by carrying away from the catacombs genuine relics, not other objects. Relics are the remains, not of anyone happening to be buried in the catacombs, but only of martyrs or of those regarded as such by reason of the "signs of martyrdom" that distinguish their tombs, notably the phial of blood, according to the Sacred Congregation of Rites, 10 April, 1668, and 27 Nov., 1863.

(16) "Those who hold communion in criminal crime with a person whom the pope has excommunicated by name, that is, those who give him assistance or countenance." The "criminal crime" (*crimen criminis*) is the very one for which the culprit was excommunicated; the article, of course, does not contemplate participation in the offensive act itself, since excommunication by name is necessarily posterior to such an act. The penalty is inflicted for subsequently assisting or countenancing the excommunicated person. This is a survival (see above, II (5)) of the penalties incurred by intercourse with the excommunicated. It must be noted that this censure is not imposed for intercourse with all excommunicated persons, but only with *vitandi*, those whom the pope has excommunicated by name, not such as have been excommunicated by a Roman Congregation (Holy Office, 16 June, 1897) or by the bishop.

(17) "Clerics who knowingly and wilfully hold communion *in divinis* with persons whom the pope has excommunicated by name and receive them at Divine service." The excommunicated in question are the same as in the preceding article, and they cannot be admitted to Divine worship; however, the penalty incurred concerns ecclesiastics only, when acting freely and with full knowledge [see above, II (5)].

(c) Excommunications Reserved to the Bishop (Ordinary)

These are three in number and affect the following persons:

(1) "Ecclesiastics in Holy orders and regulars or nuns who dare to contract marriage after having made a solemn vow of chastity, also those who dare to contract marriage

with one of these persons." The ecclesiastics whose marriage is null in consequence of the impediment of Holy orders are subdeacons and those in still higher orders; the nuns and male religious whose marriage is null through the impediment of vow are members of the great orders. Nevertheless, the impediment does not exist from the time of their first profession that follows the novitiate, but only from the solemn profession made three years later. The penalty is incurred by an attempt at marriage, not by an act of betrothal; such an attempt is recognized in any contract having the *figura matrimonii*, i. e. which would constitute a marriage if there were no impediment; consequently the penalty is incurred for civil marriage (Holy Office, 22 Dec., 1880), even if there were other impediments, e.g. consanguinity (Holy Office, 16 Jan., 1892).

(2) "Those who efficaciously procure abortion." The fruitless attempt is not punished with excommunication; authors do not agree as to whether the woman guilty of self-abortion is excommunicated.

(3) "Those who knowingly make use of counterfeit Apostolic Letters or who cooperate in the crime." [See above, (a) (9).] This article is not directed against forgers but against those who endeavour to profit by falsified letters. Petitions signed by the pope or in his name are not mentioned. Accomplices are also punished; but the culprits must act knowingly, and be fully aware that they are using falsified papal letters.

(d) Excommunications That Are Not Reserved (*Nemini Reservat*)

These are four in number and are pronounced against the following persons:

(1) "Those who command or oblige the giving of ecclesiastical burial to notorious heretics or to persons excommunicated by name or placed under interdict." The article does not consider funeral ceremonies, but only material interment in consecrated ground. Those who admit heretics or others to ecclesiastical burial are not punished, but only those who, by authority or force, compel such an interment, thereby violating the prohibition of the Church. Nor is it question here of all who, according to the Ritual, should be deprived of ecclesiastical burial, but merely of the two categories indicated.

(2) "Those who wound or terrorize the inquisitors, informers, witnesses, or other ministers of the Holy Office; those who lacerate or burn the writings of this tribunal and all who give to the aforesaid assistance, counsel, or countenance." This excommunication does not apply in countries where the Holy Office has no organized tribunal; the inquisitional functions devolve in such countries on the bishop, who is protected by the specially reserved excommunications described above, under (a) (5), (6), (8).

(3) "Those who alienate and those who have the audacity to receive church property without Apostolic authorization, according to the terms of the Constitution 'Ambitosæ, de rebus eccl. non alienandis'." The author of this Constitution (Extravagantes, lib. III, tit. iv, inter comm.) was Paul II (1 March, 1467). It forbids under pain of reserved ex-

communication and of the nullity of the acts, not only alienations (properly so called) of ecclesiastical property, sales, donations, etc., but also all contracts savouring of alienation, such as mortgages, *emphyteusis* or perpetual lease, long-term leases, etc. For the manifest benefit of the Church these contracts must be authorized by the pope; only objects of small value are excepted (see Third Plenary Council of Baltimore, no. 20).

(4) "Those who, through their own fault, neglect or omit to denounce within a month the confessors or priests by whom they have been solicited to immodest acts, in all the cases set forth by our predecessors. Gregory XV in the Constitution 'Universi' (20 Aug., 1622) and Benedict XIV in the Constitution 'Sacramentum p nitentiæ' (1 June, 1741)." This excommunication is not intended to punish those solicited to sin (they are not therefore guilty), but to protect the administration of the Sacrament of Penance. Persons thus solicited are strictly obliged to make known to the inquisitor or the bishop those priests who have solicited them to the aforesaid acts; if, through their own fault, such denunciation is not made within a month they incur excommunication, which ceases only when they have made known in the aforesaid manner the guilty party. The solicitation here alluded to is not any provocation to evil, but to sins against chastity on the part of confessors or priests, and in connexion with the Sacrament of Penance, this being the abuse that the legislator especially seeks to punish. Said connexion exists when the solicitation takes place "during the very act of sacramental confession, immediately before or after, on the occasion or under the pretext of confession, or finally, in the confessional".

B. Excommunications Pronounced by the Council of Trent

These are eight in number, the first being simply reserved to the pope and the other seven non reserved:

(1) Sess. XXII, c. ii, De ref.: against usurpers, whether ecclesiastics or laymen, of any kind of church property, until the time of restitution and absolution. This penalty protects all ecclesiastical property, properly so called, i.e. of which the administration belongs to ecclesiastical authority, such as real and personal property, revenues, etc. Excommunication is incurred by usurpers, namely by those who claim for themselves the ownership of this property, and passes on to the successive acquirers of such property until restitution or composition (agreement) is made. This penalty was applied at the time of the recent spoliations in Italy and France.

(2) Sess. IV, De editione et usu sacrorum librorum. -- The excommunication pronounced by the council was restricted by the Constitution "Apostolicæ Sedis" to those who, without the approbation of the bishop, print, or have printed, books treating of sacred things; this must here be understood solely of the text of Holy Writ and of notes and commentaries on the same (Holy Office, 22 Dec., 1880).

(3) Sess. XXIV, c. vi, De ref. matr.: against those who are guilty of the crime of abduction, in regard to any woman, with a view to marriage, and all who lend them advice, aid, or countenance.

(4) Sess. XXIV, c. ix, De ref. matr.: against temporal rulers and magistrates who directly or indirectly oppose obstacles to the liberty of their subjects in the matter of contracting marriage.

(5) Sess. XXV, c. v, De regul.: against secular magistrates who at the request of the bishop, do not give the support of the secular arm in re-establishing the clausura or enclosure of nuns. This excommunication is abrogated in practice or at least is inapplicable.

(6) Sess. XXV, c. xviii, De regul.: against those who unjustly oblige a woman to enter a monastery unwillingly, or to take the habit, or make a profession, and those who thereunto give their counsel, aid, or countenance, as also against those who, without good reason, prevent a woman from taking the veil or making her profession.

(7) Sess. XXIV, c. i, De ref. matr.: against "those who deny that clandestine marriages [before the legislation of the council] are true and valid; as also those who falsely affirm that marriages contracted by the children of a family without the consent of their parents are invalid and that parents can make such marriages valid or invalid."

(8) Sess. XIII, can. xi: "This council ordains and declares that sacramental confession, when a confessor may be had, is of necessity to be made before Communion by those whose conscience is burdened by mortal sin, how contrite soever they may think themselves. But if anyone shall presume to teach, preach, or obstinately to assert, or even in public disputation to defend the contrary, he shall be thereupon excommunicated."

C. Excommunications Pronounced or Renewed Since the Constitution "Apostolicæ Sedis"

These are four in number, the first two being specially reserved to the pope, the third to the ordinary; the fourth is non reserved.

(1) The Constitution "Romanus Pontifex" (28 Aug., 1873), besides other penalties, declares specially reserved excommunication: first, against the dignitaries and canons of cathedral churches (or those having the administration of vacant cathedrals) who would dare to concede and transfer the administration of their church with the title of vicar to the person elected by the chapter, or named or presented to said church by lay power; second, against those so elected or presented; and third, against all who aid, advise, or countenance the aforesaid offenders.

(2) Excommunication specially reserved against the members of the "Catholic Italian Society for the restoration of the rights of the Christian and especially of the Roman people", and against its promoters, supporters, and adherents (S. Peniten., 4

Aug., 1876; Acta S. Sed., IX, 352). Amongst other rights this society proposed to restore popular participation in the election of the sovereign pontiff.

(3) Excommunication reserved to the ordinary against laymen (for ecclesiastics the penalty is suspension) who traffic in Mass-stipends and trade them with priests for books and other merchandise (S. Cong. of the Council, decree "Vigilanti studio", 25 May, 1893).

(4) Excommunication, non-reserved, against missionaries, both regulars and seculars, of the East Indies (Farther Orient) or the West Indies (America) who devote themselves to commerce or who participate in it, and their immediate superiors, provincial or general, who fail to punish the culprits, at least by removal, and even after a single offence. This excommunication comes down from the Constitutions of Urban VIII, "Ex delicto" (22 Feb., 1633), and Clement IX, "Sollicitudo" (17 July, 1669), but was suppressed by reason of non-mention in the Constitution "Apostolicæ Sedis"; it was re-established, however, at the request of the S. Cong. of the Inquisition, 4 Dec., 1872. This excommunication is non-reserved, but the culprit cannot be absolved prior to making restitution, unless he be at the point of death.

Canonists usually treat of excommunication in their commentaries on the *Corpus Juris Canonici*, at the title *De sententia excommunicationis* (lib. V, tit. xxxix). Moralists deal with it apropos of the treatise on censures (*De Censuris*). One of the best works is that of D'ANNIBALE *Summula Theologiæ moralis* (5th ed., Rome, 1908). For details consult the numerous commentaries on the Constitution *Apostolicæ Sedis*. Special works by ancient writers: AVILA, *De censuris* (Lyons, 1608); SUAREZ, *De censuris* (Coimbra, 1603). ALTIERI, *De censuris ecclesiasticis* (Rome, 1618). -- Cf. KOBER, *Der Kirchenbann* (Tübingen, 1857); IDEM in *Kirchenlex.*, s. v. *Bann*; HOLLWECK, *Die kirchlichen Strafgesetze* (Mainz, 1899); HILARIUS A SEXTEN, *De censuris* (Mainz, 1898); MÜNCHEN, *Das kanonische Gerichtsverfahren und Strafrecht* (Cologne, 1874); TAUNTON, *The Law of the Church* (London, 1906), s. v. *Excommunication*; SMITH, *Elements of Ecclesiastical Law* (New York, 1884); SANTI-LEITNER, *Pr lect. Jur. Canonici* (New York, 1905), V, 210-15; LEGA, *De Judiciis Eccl.* (Rome, 1900).

A. BOUDINHON.

Apostolic Executor

Apostolic Executor

A cleric who puts into execution a papal rescript, completing what is necessary in order that it be effective. The executor of a rescript may be discovered from the tenor of the document itself. In matters which regard the government of regulars, the executor of Apostolic Letters is the superior of the order, namely, the general, the procurator

general, or the provincial. Rescripts containing favours are sometimes granted by the Holy See directly to the petitioners; in which case, the executor merely has the office of executing the favour asked for, without any obligation of judicial inquiry into the opportuneness of the grant, or the reasons alleged for seeking it. Nevertheless, if it is notorious that the favour has been surreptitiously obtained, he must abstain from executing the rescript. Rescripts, however, are not usually sent direct to the parties interested, but, in the external forum to the ordinary, either of the petitioners or of the territory in question, and in the internal forum, to any approved confessor chosen by the persons concerned. In this latter case the grant is remitted entirely to the judgment and conscience of him who is to execute it. He enjoys delegated power, and must act within the limits of his mandate. The Apostolic Letters must first of all be in his hands before he may act; from them he determines whether he is the one delegated, and what are his powers. He must verify the force of the reasons alleged for granting the request, as well as the truth of other statements found in the petition. As a delegate of the Holy See he may, ordinarily, subdelegate another to execute the rescript, unless this is expressly forbidden in the grant, or unless it is apparent that he is selected by reason of his knowledge or other personal qualities specially fitting him for the office. It is important to know whether an executor is chosen for his personal characteristics, or on account of his office: in the former case the delegation is personal, in the latter it is attached to the position, and passes on to the successor of the same office. A rescript given to the ordinary may likewise be executed by the vicar general. An executor must know the rules for interpreting rescripts, also, when they are rendered void, because surreptitiously obtained or for other cause. Rescripts emanating from the Sacred Penitentiaria are executed in the confessional, and are then destroyed by the confessor, as they treat of matters of conscience. When the rescript pertains to the external forum, a decree should be drawn up to the effect that all necessary formalities have been observed in its execution, these formalities should be specified. No fee is allowed for the execution of Apostolic Letters, lest the executor's judgment be influenced thereby.

HUMPHREY, *Urba et Orbis* (London, 1899), pp. 320-322; FERRARIS, *Prompta Bibliotheca*, s.v. Executor.

ANDREW B. MEEHAN

Exedra

Exedra

A semicircular stone or marble seat; a rectangular or semicircular recess; the portico of the Grecian palæstra, or gymnasium, in which disputations of the learned were held among the ancients; also, in private houses, the parastas, or vestibule, used for conver-

sation. The term is sometimes applied to a porch or chapel which projects from a larger building. Also used, as synonymous with *cathedra*, for a throne or seat of any kind; for a small private chamber; the space between an oriel window and the small chapels between the buttresses of a large church or cathedral.

THOMAS H. POOLE

Biblical Exegesis

Biblical Exegesis

Exegesis is the branch of theology which investigates and expresses the true sense of Sacred Scripture.

The exegete does not inquire which books constitute Sacred Scripture, nor does he investigate their genuine text, nor, again, does he study their double authorship. He accepts the books which, according to the concurrent testimony of history and ecclesiastical authority, belong to the Canon of Sacred Scripture. Obedient to the decree of the Council of Trent, he regards the Vulgate as the authentic Latin version, without neglecting the results of sober textual criticism, based on the readings found in the other versions approved by Christian antiquity, in the Scriptural citations of the Fathers, and in the more ancient manuscripts. With regard to the authorship of the Sacred Books, too, the exegete follows the authoritative teaching of the Church and the prevalent opinions of her theologians on the question of Biblical inspiration. Not that these three questions concerning the Canon, the genuine text, and the inspiration of Sacred Scriptures exert no influence on Biblical exegesis: unless a book forms part of the Canon, it will not be the subject of exegesis at all; only the best supported readings of its text will be made the basis of its theological explanation; and the doctrine of inspiration with its logical corollaries will be found to have a constant bearing on the results of exegesis. Still, exegesis, as such, does not deal with these three subjects; the reader will find them treated in the articles CANON OF THE OLD TESTAMENT; CANON OF THE NEW TESTAMENT; TEXTUAL CRITICISM; and INSPIRATION.

The early Reformers were wont to claim that the genuine text of the inspired and canonical books is self-sufficient and clear. This contention does not owe its origin to the sixteenth century. The words of Origen (*De princip.*, IV), St. Augustine (*De doctr. christ.*, I-III), and St. Jerome (*ad Paulin.*, ep. liii, 6, 7) show that similar views existed among the scolists in the early age of the Church. The exegetical results flowing from the supposed clearness of the Bible may be inferred from the fact that one century

after the rise of the Reformation Bossuet could give to the world two volumes entitled, "A History of the Variations of the Protestant Churches". A Protestant theologian, S. Werenfels, sets forth the same truth in a telling epigram:

Hic liber est in quo sua quærit dogmata quisque,
Invenit et pariter dogmata quisque sua,

which may be rendered in an English paraphrase:

Men ope this book, their favourite creed in mind;
Each seeks his own, and each his own doth find.

Agreeing with the warning of the Fathers, Pope Leo XIII, in his Encyclical "Providentissimus Deus", insisted on the difficulty of rightly interpreting the Bible. "It must be observed", he wrote,

that in addition to the usual reasons which make ancient writings more or less difficult to understand, there are some which are peculiar to the Bible. For the language of the Bible is employed to express, under the inspiration of the Holy Ghost, many things which are beyond the power and scope of the reason of man -- that is to say, Divine mysteries and all that is related to them. There is sometimes in such passages a fullness and a hidden depth of meaning which the letter hardly expresses and which the laws of grammatical interpretation hardly warrant. Moreover, the literal sense itself frequently admits other senses, adapted to illustrate dogma or to confirm morality. Wherefore, it must be recognized that the Sacred Writings are wrapt in a certain religious obscurity, and that no one can enter into their interior without a guide; God so disposing, as the Holy Fathers commonly teach, in order that men may investigate them with greater ardour and earnestness, and that what is attained with difficulty may sink more deeply into the mind and heart; and, most of all, that they may understand that God has delivered the Holy Scriptures to the Church, and that in reading and making use of His word, they must follow the Church as their guide and their teacher.

But it is not our purpose so much to prove the need of Biblical exegesis as to explain its aim, describe its methods, indicate the various forms of its results, and outline its history. Exegesis aims at investigating the sense of Sacred Scripture; its method is contained in the rules of interpretation; its results are expressed in the various ways in which the sense of the Bible is wont to be communicated; its history comprises the work done by Christian and Jewish interpreters, by Catholics and Protestants. We shall endeavour to consider these various elements under the four heads:

I. Sense of Sacred Scripture;

- II. Hermeneutics;
- III. Sacred Rhetoric;
- IV. History of Exegesis.

I. SENSE OF SACRED SCRIPTURE

In general, the sense of Sacred Scripture is the truth actually conveyed by it. We must well distinguish between the sense and the signification of a word. A good dictionary will give us, in the case of most words, a list of their various possible meanings or significations; but no reader will be tempted to believe that a word has all these meanings wherever it occurs. The context or some other restrictive element will determine the meaning in which each word is used in any given passage, and this meaning is the sense of the word. The signification of the word is its possible meaning; the sense of a word is its actual meaning in any given context. A sentence, like a word, may have several possible significations, but it has only one sense or meaning intended by the author. Here, again, the signification denotes the possible meaning of the sentence, while the sense is the meaning which the sentence here and now conveys. In the case of the Bible, it must be kept in mind that God is its author, and that God, the Sovereign Lord of all things, can manifest truth not merely by the use of words, but also by disposing outward things in such a way that one is the figure of the other. In the former case we have the literal sense; in the latter, the typical (cf. St. Thomas, Quodl., vii, Q. vi, a. 14).

(1) LITERAL SENSE

(i) What is the Literal Sense?

The literal sense of Sacred Scripture is the truth really, actually, and immediately intended by its author. The fact that the literal sense must be *really* intended by the author distinguishes it from the truth conveyed by any mere accommodation. This latter applies a writer's language, on the ground of analogy, to something not originally meant by him. Again, since the literal sense is *actually* intended by the writer, it differs from the meaning conveyed only virtually by the text. Thus the reader may come to know the literary capacity of the author from the style of his writing; or he may draw a number of logical inferences from the writer's direct statements; the resultant information is in neither case actually intended by the writer, but it constitutes the so-called derivative or consequent sense. Finally, the literal sense is limited to the meaning *immediately* intended by the writer, so that the truth mediately expressed by him does not fall within the range of the literal sense. It is precisely in this point that the literal sense differs from the typical. To repeat briefly, the literal sense is not an accommodation based on similitude or analogy; it is not a mere inference drawn by the reader; it is not an antitype corresponding to the immediate contents of the text as its type; but it is the meaning which the author intends to convey *really*, not by a stretch of the

imagination; *actually*, not as a syllogistic potency; and *immediately*, i.e., by means of the language, not by means of the truth conveyed by the language.

(ii) Division of the Literal Sense

What has been said about the immediate character of the literal sense must not be misconstrued in such a way as to exclude figurative language from its range. Figurative language is really a single, not a double, sign of the truth it conveys. When we speak of "the arm of God", we do not imply that God really is endowed with such a bodily member, but we directly denote his power of action (St. Thomas, Summa, I, Q. i, a. 10, ad 3um). This principle applies not merely in the metaphor, the synecdoche, the metonymy, or the irony, but also in those cases in which the figure extends through a whole sentence or even an entire chapter or book. The very name *allegory* implies that the real sense of the expression differs from its usual verbal meaning. In Matt., v, 13 sqq., e.g., the sentence, "You are the salt of the earth" etc., is not first to be understood in its nonfigurative sense, and then in the figurative; it does not first class the Apostles among the mineral kingdom, and then among the social and religious reformers of the world, but the literal meaning of the passage coincides with the truth conveyed in the allegory. It follows, therefore, that the literal sense comprises both the proper and the figurative. The fable, the parable, and the example must also be classed among the allegorical expressions which signify the intended truth immediately. It is true that in the passage according to which the trees elect a king (Judges, ix, 6-21), in the parable of the prodigal son (Luke, xv, 11 sqq.), and in the history of the Good Samaritan (Luke, x, 25-37) a number of words and sentences are required in order to construct the fable, the parable, and the example respectively; but this does not interfere with the literal or immediate sense of the literary devices. As such they have no meaning independent of, or prior to, the moral lesson which the author intends to convey by their means. It is easily granted that the mechanical contrivance we call a watch immediately indicates the time in spite of the subordinate action of its spring and wheels; why, then, should we question the truth that the literary device called fable, or parable, or example, immediately points out its moral lesson, though the very existence of such a device presupposes the use of a number of words and even sentences?

(iii) Ubiquity of the Literal Sense

The Fathers of the Church were not blind to the fact that the literal sense in some Scripture passages appears to imply great incongruities, not to say insuperable difficulties. On the other hand, they regarded the language of the Bible as truly human language, and therefore always endowed with a literal sense, whether proper or figurative. Moreover, St. Jerome (in Is., xiii, 19), St. Augustine (De tent. Abrah. serm. ii, 7), St. Gregory (Moral., i, 37) agree with St. Thomas (Quodl., vii, Q. vi, a. 14) in his conviction that the typical sense is always based on the literal and springs from it. Hence

if these Fathers had denied the existence of a literal sense in any passage of Scripture, they would have left the passage meaningless. Where the patristic writers appear to reject the literal sense, they really exclude only the proper sense, leaving the figurative. Origen (*De princ.*, IV, xi) may be regarded as the only exception to this rule; since he considers some of the Mosaic laws as either absurd or impossible to keep, he denies that they must be taken in their literal sense. But even in his case, attempts have been made to give to his words a more acceptable meaning (cf. Vincenzi, "In S. Gregorii Nysseni et Origenis scripta et doctrinam nova recensio", Rome, 1864, vol. II, cc. xxv-xxix). The great Alexandrian Doctor distinguishes between the body, the soul, and the spirit of Scripture. His defendants believe that he understands by these three elements its proper, its figurative, and its typical sense respectively. He may, therefore, with impunity deny the existence of any bodily sense in a passage of Scripture without injury to its literal sense. But it is more generally admitted that Origen went astray on this point, because he followed Philo's opinion too faithfully.

(iv) Is the Literal Sense One or Multiple?

There is more solid ground for a diversity of opinion concerning the unicity of the literal sense contained in each passage of Sacred Scripture. This brings us face to face with a double question: (a) Is it possible that a Scripture passage has more than one literal sense? (b) Is there any Biblical text which actually has more than one literal meaning? It must be kept in mind that the literal sense is taken here in the strict meaning of the word. It is agreed on all sides that a multiple consequent sense or a multiple accommodation may be regarded as the rule rather than the exception. Nor is there any difficulty about the multiple literal sense found in various readings or in different versions of the same text; we ask here whether one and the same genuine Scripture text may have more than one literal sense.

(a) Possibility of a Multiple Literal Sense

Since a word, and a sentence too, may have more meanings than one, there is no *a priori* impossibility in the idea that a Scriptural text should have more than one literal sense. If the author of Scripture really intends to convey the truth contained in the various possible meanings of a text, the multiple literal sense will be the natural resultant. Some of the expressions found in the writings of the Fathers seem to emphasize the possibility of having a multiple literal sense in Sacred Scripture.

(b) Actual Occurrence of a Multiple Literal Sense

The subject becomes more complicated if we ask whether a multiple literal sense is not merely possible, but is actually found anywhere in Scripture. There is no good authority for its frequent occurrence; but does it really exist even in the few Scriptural passages which seem to contain it, such as Ps. ii, 7; Is., liii, 4, 8; Dan., ix, 27; John, xi, 51; ii, 19? Did God wish in these texts to convey a multiple literal sense? Revelation,

as coming down to us in Scripture and tradition, furnishes the only clue to the solution of the question.

Arguments for the Multiple Literal Sense. The advocates of a multiple literal sense advance the following arguments for their view: First, Sacred Scripture supposes its existence in several passages. Thus Heb., i, 5, understands Ps. ii, 7 (this day have I begotten thee), of the Divine generation of the Son; Acts, xiii, 33, understands the text of the Resurrection; Heb., v, 5, of the eternal priesthood of Christ. Again, the Latin Vulgate and the Septuagint, together with I Pet., ii, 24, understand Is. liii, 4 (he hath borne our infirmities), of our sins; Matt., viii, 17, understands the words of our bodily ailments. And again, I Mach., 1, 57, applies some words of Dan., ix, 27, to his own subject, while Matt., xxiv, 15, represents them as a prophecy to be fulfilled in the destruction of the Holy City. Finally, John, ii, 19, was understood by the Jews in a sense different from that intended by Jesus Christ; and John, xi, 51, expresses two disparate meanings, one intended by Caiaphas and the other by the Holy Ghost. The second argument is, that tradition too upholds the existence of a multiple sense in several passages of the Bible. Its witnesses are St. Augustine (Conf., XII, xxvi, xxx, xxxi; De doctr. christ., III, xxvii; etc.), St. Gregory the Great (in Ezech., iii, 13, Lib. I, hom. x, n. 30 sq.), St. Basil, St. Chrysostom, St. Jerome, St. Bernard, and, among the Scholastics, St. Thomas (I, Q. i, a. 10; "De potent.", IV, 1; "in II sent.", dist. xii, Q. i, a. 2, ad 7um), Card. Cajetan (ad I, Q. i, a. 10), Melchior Cano (Loc. theol., Lib. II, c. xi, ad 7 arg., ad 3 rat.), Bañez (ad I, Q. i, a. 10), Sylvius (ad id.), John of St. Thomas (I, Q. i, disp. ii, a. 12), Billuart (De reg. fidei, dissert. i, a. 8), Vasquez, Valentia, Molina, Serrarius, Cornelius a Lapide, and others.

Reasons against the Multiple Literal Sense. Patrizi, Beelen, Lamy, Cornely, Knabenbauer, Reitmayr, and the greater number of recent writers deny the actual existence of a multiple literal sense in the Bible; they urge the following reasons for their opinion: First, the Bible is written in human language; now, the language of other books usually presents only one literal sense. Second, the genuine sense of Sacred Scripture must be discovered by means of the rules of hermeneutics. A commentator would render these rules meaningless, if he were to look for a second literal sense of a passage after discovering one true meaning by their means. Third, commentators implicitly assume that any given text of Scripture has only one literal sense; for after finding out the various meanings which are philologically probable, they endeavour to ascertain which of them was intended by the Holy Ghost. Fourth, a multiple literal sense would create equivocation and confusion in the Bible. Finally, the multiple sense in Scripture would be a supernatural fact wholly depending on the free will of God. We cannot know it independently of revelation; its actual occurrence must be solidly

proved from Scripture or tradition. The patrons of the multiple literal sense have not thus far advanced any such proof.

(1) Where Scripture appeals to disparate meanings of the same passage, it does not necessarily consider each of them as the literal sense. Thus Heb., i, 5, may represent Ps. ii, 7, as referring literally to the eternal generation, but Acts, xiii, 33, may consider the Resurrection, and Hebr., v, 5, the eternal priesthood of Christ as necessary consequences. Matt., viii, 17, applies the consequent sense of Is., liii, 4, to the cure of bodily ailments; I Mach., i, 57, merely accommodates some words of Dan., ix, 27, to the writer's own time; in John, ii, 19, and xi, 51, only the meaning intended by the Holy Ghost is the literal sense, though this may not have been understood when the words in question were spoken.

(2) The testimony of the Fathers and the Scholastic theologians is not sufficient in our case to prove the existence of a dogmatic tradition as to the actual occurrence of the multiple literal sense in Scripture. There is no trace of it before the time of St. Augustine; this great Doctor proposes his view not as the teaching of tradition, but as a pious and probable opinion. The expressions of the other Fathers, excepting perhaps St. Gregory the Great, urge the depth and wealth of thought contained in Scripture, or they refer to meanings which we technically call its typical, derivative, or consequent sense, and perhaps even to mere accommodations of certain passages. Among the Scholastics, St. Thomas follows the opinion of St. Augustine, at least in one of the alleged passages (*De potent.*, IV, 1), and a number of the later Scholastics follow the opinion of St. Thomas. The other early Scholastics maintain rather the opposite view, as may be seen in St. Bonaventure (*IV Sent. dist. xxi, p. I, dub. 1*) and Alexander of Hales (*Summa, I, Q. i, m. 4, a. 2*).

(v) The Derivative or Consequent Sense

The consequent or derivative sense of Scripture is the truth legitimately inferred from its genuine meaning. It would be wrong to identify the consequent sense with the more latent literal sense. This depth of the literal sense may spring from the fact that the predicate changes somewhat in its meaning if it be applied to totally different subjects. The word *wise* has one meaning if predicated of God, and quite another if predicated of created beings. Such a variety of meaning belongs to the literal meaning in the strict sense of the word. The consequent sense may be said to be the conclusion of a syllogism one of whose premises is a truth contained in the Bible. Such inferences can hardly be called the sense of a book written by a human author; but God has foreseen all the legitimate conclusions derived from Biblical truths, so that they may be said, in a certain way, to be His intended meaning. The Bible itself makes use of such inferences as if they were based on Divine authority. St. Paul (*I Cor.*, i, 31) quotes such an inference based on *Jer.*, ix, 23, 24, with the express addition, "as it is written";

in I Cor., ix, 10, 11, he derived the consequent sense of Deut., xxv, 4, indicating the second premise, while in I Tim., v, 18, he states the consequent sense of the same passage without adding the second premise. Theologians and ascetical writers have, therefore, a right to utilize dogmatic and moral inferences from the genuine sense of Sacred Scripture. The writings of the Fathers illustrate this principle most copiously.

(vi) Accommodation

By accommodation the writer's words are applied, on the ground of analogy, to something not originally meant by him. If there be no analogy between the original and the imposed meaning, there is no accommodation of the passage, but rather a violent perversion of its true meaning; such a contorted meaning is not merely outside, but against, the genuine sense. Accommodation is usually divided into two classes: extensive and allusive. Extensive accommodation takes the words of the Bible in their genuine sense, but applies them to a new subject. Thus the words, he "was found perfect, just, and in the time of wrath he was made a reconciliation", which *Ecclus.*, xliv, 17, predicates of Noe, are often applied to other saints. Allusive accommodation does not employ the words of Scripture in their genuine sense, but gives them an entirely different meaning; here the analogy does not exist between the objects, but between the verbal expressions. *Ps.* xvii, 26, 27, "With the holy, thou wilt be holy; and with the innocent man thou wilt be innocent; and with the elect thou wilt be elect: and with the perverse thou wilt be perverted", expresses originally the attitude of God to the good and the wicked; but by accommodation these words are often used to show the influence of companionship. That the use of accommodation is legitimate, may be inferred from its occurrence in Scripture, in the writings of the Fathers, and from its very nature. Examples of accommodation in Scripture may be found in *Matt.*, vii, 23 (cf. *Ps.* vi, 9), *Rom.*, x, 18 (cf. *Ps.* xviii, 5), *II Cor.*, viii, 15 (cf. *Ex.*, xvi, 18), *Heb.*, xiii, 5 (cf. *Jos.*, i, 5), *Apoc.*, xi, 4 (cf. *Zach.*, iv, 14). The liturgical books and the writings of the Fathers are so replete with the use of accommodation that it is needless to refer to any special instances. Finally, there is no good reason for interdicting the proper use of accommodation, seeing that it is not wrong in itself and that its use does not involve any inconvenience as far as faith and morals are concerned. But two excesses are to be avoided: first, it cannot be maintained, that all the citations from the Old Testament which are found in the New are mere accommodations. Similar contentions are found in the writings of those who endeavour to destroy the value of the Messianic prophecies; they are not confined to our days, but date back to Theodore of Mopsuestia and the Socinians. The Fifth Ecumenical Synod rejected the error of Theodore; besides, Christ Himself (*Matt.*, xxii, 41 sq.; cf. *Ps.* cix, 1), St. Peter (*Acts*, iii, 25 sq.; cf. *Gen.*, xii, 3; xviii, 18; xxii, 18), and St. Paul (*Heb.*, i, 5; v, 5; *Acts*, xiii, 33; cf. *Ps.* ii, 7) base theological arguments on Old-Testament citations, so that these latter cannot be regarded as mere

accommodations. Secondly, we must not exceed the proper limits in the use of accommodation. This we should do, if we were to present the meaning derived from accommodation as the genuine sense of Scripture, or if we were to use it as the premise in an argument, or again if we were to accommodate the words of Scripture to ridiculous, absurd, or wholly disparate subjects. The fourth session of the Council of Trent warns most earnestly against such an abuse of Sacred Scripture.

(2) TYPICAL SENSE

The typical sense has its name from the fact that it is based on the figurative or typical relation of Biblical persons, or objects, or events, to a new truth. This latter is called the antitype, while its Biblical correspondent is named the type. The typical sense is also called the spiritual, or mystical, sense: mystical, because of its more recondite nature; spiritual, because it is related to the literal, as the spirit is related to the body. What we call type is called shadow, allegory, parable, by St. Paul (cf. Rom., v, 14; I Cor., x, 6; Heb., viii, 5; Gal, iv, 24; Heb., ix, 9); once he refers to it as antitype (Heb., ix, 24), though St. Peter applies this term to the truth signified (I Pet., iii, 21). Various other designations for the typical sense have been used by the Fathers of the Church; but the following questions are of more vital importance.

(i) Nature of the Typical Sense

The typical sense is the Scriptural truth which the Holy Ghost intends to convey really, actually, but not immediately. Inasmuch as its meaning is really conveyed, the typical sense differs from accommodation; inasmuch as its meaning is actually expressed, it differs from the consequent sense; inasmuch as its meaning is not immediately signified, it differs from the literal sense. While we arrive at the latter immediately by way of the literary expression, we come to know the typical sense only by way of the literal. The text is the sign conveying the literal sense, but the literal sense is the sign expressing the typical. The literal sense is the type which by a special design of God is directed to signify its antitype. Three conditions are necessary to constitute a type:

- It must have its own true and historical existence independently of the antitype; e.g., the intended immolation of Isaac would be an historical fact, even if Jesus Christ had not died.
- It must not be referred to the antitype by its very nature. This prohibits the similitude from serving as a type, on account of its antecedent likeness to its object.
- God himself must have established the reference of the type to its antitype; this excludes objects which are naturally related to others.

The necessity of these three conditions explains why a type cannot be confounded with a parable, or an example, or a symbol, or a similitude, or a comparison, or a metaphor, or a symbolic prophecy -- e.g., the statue seen in the dream of Nabuchodonosor. It should be added, however, that at times the type may be expressed by the Scriptural representation of a subject rather than by the strict literal sense of Scripture. Gen., xiv, 18, e.g., introduces Melchisedech without reference to his genealogy; hence Heb., vii, 3, represents him "without father, without mother, without genealogy, having neither beginning of days nor end of life", and makes him as such a type of Jesus Christ. Thus far we have spoken about the typical sense in its strict sense. In a wider sense, all persons, events, or objects of the Old Testament are sometimes considered as types, provided they resemble persons, events, or objects in the New Testament, whether the Holy Ghost has intended such a relationship or not. The Egyptian Joseph is in this way frequently represented as a type of St. Joseph, the foster-father of Christ.

(ii) Division of the Typical Sense

The division of the typical sense is based on the character of the type and the antitype. The antitype is either a truth to be believed, or a boon to be hoped for, or again a virtue to be practised. This gives us a triple sense -- the allegorical, the anagogical, and the tropological, or moral. The objects of faith in the Old Testament centred mainly around the future Messiah and his Church. The allegorical sense may, therefore, be said to refer to the future or to be prophetic. The allegory here is not to be sought in the literary expression, but in the persons or things expressed. This division of the typical sense was expressed by the Scholastics in two lines:

Littera gesta docet; quid credas, allegoria;

Moralis quid agas; quo tendas, anagogia.

Jerusalem, e.g., according to its literal sense, is the Holy City; taken allegorically, it denotes the Church Militant; understood tropologically, it stands for the just soul; finally, in its anagogical sense, it stands for the Church Triumphant. If the division of the typical sense be based on the type rather than the antitype, we may distinguish personal, real, and legal types. They are personal if a person is chosen by the Holy Ghost as the sign of the truth to be conveyed. Adam, Noe, Melchisedech, Moses, Josue, David, Solomon, and Jonas are types of Jesus Christ; Agar with Ismael, and Sara with Isaac are respectively the types of the Old and the New Testament. The real types are certain historical events or objects mentioned in the Old Testament, such as the paschal lamb, the manna, the water flowing from the rock, the brazen serpent, Sion, and Jerusalem. Legal types are chosen from among the institutions of the Mosaic liturgy, e.g., the tabernacle, the sacred implements, the sacraments and sacrifices of the Old Law, its priests and Levites.

(iii) The Existence of the Typical Sense

Scripture and tradition agree in their testimony for the occurrence of the typical sense in certain passages of the Old Testament. Among the Scriptural texts which establish the typical sense, we may appeal to Col., ii, 16-17; Heb., viii, 5; ix, 8-9; Rom., v, 14; Gal., iv, 24; Matt., ii, 15 (cf. Os., xi, 1); Heb., i, 5 (cf. II K., vii, 14). The testimony of tradition concerning this subject may be gathered from Barnabas (Ep., 7, 8, 9, 12, etc.), St. Clement of Rome (I Cor., xii), St. Justin, Dial. c. Tryph., civ, 42), St. Irenæus (Adv. hæc., IV, xxv, 3; II, xxiv, 2 sqq.; IV, xxvi, 2), Tertullian (Adv. Marc., V, vii); St. Jerome (Ep. liii, ad Paulin., 8), St. Thomas (I, Q. i, a. 10), and a number of other patristic writers and Scholastic theologians. That the Jews agree with the Christian writers on this point, may be inferred from Josephus (Antiq., XVII, iii, 4; Pro m. Antiq., n. 4; III, vi, 4, 77; De bello Jud., V, vi, 4), the Talmud (Berachot, c. v, ad fin.; Quiddus, fol. 41, col. 1), and the writings of Philo (de Abraham; de migrat. Abrahæ; de vita contempl.), though this latter writer goes to excess in the allegorical interpretation. The foregoing tradition may be confirmed by the language of the liturgy and by the remains of Christian archæology (Kraus, "Roma sotterranea," pp. 242 sqq.). Striking instances of the liturgical proof may be seen in the Preface of the Mass for Easter, in the Blessing of the Paschal Candle, and in the Divine Office recited on the feast of Corpus Christi. All Catholic interpreters readily grant that in some passages of the Old Testament we have a typical sense besides the literal; but this does not appear to be granted with regard to the New Testament, at least not subsequently to the death of Jesus Christ. Distinguishing between the New Testament as it signifies a collection of books, and the New Testament as it denotes the Christian economy, they grant that there are types in the New-Testament books, but only as far as they refer to the pre-Christian economy. For the New Testament has brought us the reality in place of the figure, light in place of darkness, truth in place of shadow (cf. Patrizi, "De interpretatione Scripturarum Sacrarum", p. 199, Rome, 1844). On the other hand, it is urged that the New Testament is the figure of glory, as the Old Testament was the figure of the New (St. Thom., Summa, I, Q. i, a. 10). Again, in Scripture the literal sense applies to what precedes, the typical to what follows. Now, even in the New Testament Christ and His Body precedes the Church and its members; hence, what is said literally of Christ or His Body, may be interpreted allegorically of the Church, the mystical body of Christ, tropologically of the virtuous acts of the Church's members, anagogically of their future glory (St. Thom., Quodl., VII, a. 15, ad 5um). Similar views are expressed by St. Ambrose (in Ps. xxx, n. 25), St. Chrysostom (in Matt., hom. lxvi), St. Augustine (in Joh., ix), St. Gregory the Great (Hom. ii, in evang. Luc., xviii), St. John Damascene (De fide orth., iv, 13); besides, the bark of Peter is usually regarded as a type of the Church, the destruction of Jerusalem as a type of the final catastrophe.

(iv) Has Everything in the Old Testament a Typical Sense?

If such passages as Luke, xxiv, 44, I Cor., x, 11, be taken out of their context, they suggest the ubiquity of the typical sense in the Old Testament; the context limits these texts to their proper range. If some of the Fathers, e.g. St. Augustine (*De doct. christ.*, III, xxii) and St. Jerome (*Ad Dard.*, Ep. cxxix, 6; *Ep. ad Eptes.* iii, 6), appear to assert the ubiquity of the typical sense, their language refers rather to the figurative than the spiritual sense. On the other hand, Tertullian (*De resurrect. carn.*, c. xx), St. Augustine (*De civ. Dei.*, XVII, iii; *C. Faust.*, XXII, xciv), St. Jerome (in *Joann.*, c. i; cf. in *Jer.*, xxvii, 3, 9; xxix, 14), and St. Thomas (*Quodl.*, vii, a. 15, ad 5um), explicitly reject the opinion which maintains that the whole of the Old Testament has a typical sense. The opposite opinion does not appeal to reason; what could be the typical sense, e.g., of the command to love the Lord our God (*Deut.*, vi, 5)?

(v) How Can the Typical Sense be Known?

In the typical sense God does not merely select an existing person or object as the sign of a future person or object, but he directs the course of nature in such a way that the very existence of the type, however independent it may be in itself, refers to the antitype. Man, too, can, in one or another particular case, perform an action in order to typify what he will do in the future. But as the future is not under his complete control, such a way of acting would be ludicrous rather than instructive. The typical sense is, therefore, properly speaking, confined to God's own book. Hence the criteria which serve for the interpretation of profane literature will not be sufficient to detect the typical sense. The latter is a supernatural fact depending entirely on the free will of God; nothing but revelation can make it known to us, so that Scripture or tradition must be regarded as the source of any solid argument in favour of the existence of the typical sense in any particular passage. Where the typical sense really exists, it expresses the mind of God as truly as the literal sense; but we must be careful against excess in this regard. St. Augustine is guilty of this fault in his spiritual interpretation of the thirty-eight years in *John*, v, 5, and of the one hundred and fifty-three fishes in *John*, xxi, 11. Besides, it must be kept in mind that not all the minutiae connected with the type have a definite and distinct meaning in the antitype. It would be useless labour to search for the spiritual meaning of every detail connected with the paschal lamb, e.g., or with the first Adam. The exegete ought to be especially careful in the admission of typical prophecies, and of anything that would resemble the method of the Jewish Cabbalists.

(vi) The Theological Value of the Typical Sense

Father Perrone (*Præl. theol. dogm.*, IX, 159) believes it is the common opinion of theologians and commentators that no theological argument can be based on the typical sense. But if we speak of the typical sense which has been revealed as such, or which has been proved as such from either Scripture or tradition, it conveys the

meaning intended by God not less veraciously than the literal sense. Hence it furnishes solid and reliable premises for theological conclusions. The inspired writers themselves do not hesitate to argue from the typical sense, as may be seen in Matt., ii, 15 (cf. Os., xi, 1), and Heb., i, 5 (cf. II K, vii, 14). Texts whose typical sense is only probable yield only probable theological conclusions; such is the argument for the Immaculate Conception based on Est., xv, 13. If St. Thomas (Summa, I, Q. i, a. 10, ad 1um; Quod-lib., VII, a. 14, ad 4um) and other theologians differ from our position on this question, their view is based on the fact that the existence of the types themselves must first be theologically proved, before they can serve as premises in a theological argument.

II. HERMENEUTICS

The interpretation of a writing has for its object to find the ideas which the author intended to express. We do not consider here the so-called authentic interpretation or the writer's own statement as to the thought he intended to convey. In interpreting the Bible scientifically, its twofold character must always be kept in view: it is a Divine book, in as far as it has God for its author; it is a human book, in as far as it is written by men for men. In its human character, the Bible is subject to the same rules of interpretation as profane books; but in its Divine character, it is given into the custody of the Church to be kept and explained, so that it needs special rules of hermeneutics. Under the former aspect, it is subject to the laws of the grammatico-historical interpretation; under the latter, it is bound by the precepts of what we may call the Catholic explanation.

(1) HISTORICO-GRAMMATICAL INTERPRETATION

The grammatico-historical interpretation implies three elements: first, a knowledge of the various significations of the literary expression to be interpreted; secondly, the determination of the precise sense in which the literary expression is employed in any given passage; thirdly, the historical description of the idea thus determined. What has been said in the preceding paragraphs sufficiently shows the difference between the signification and the sense of a word or a sentence. The importance of describing an idea historically may be exemplified by the successive shades of meaning attaching to the concept of Messiah, or of Kingdom of God.

(i) Significations of the Literary Expression

The signification of the literary expression of the Bible is best learned by a thorough knowledge of the so-called sacred languages in which the original text of Scripture was written, and by a familiar acquaintance with the Scriptural way of speaking.

(a) Sacred Languages

St. Augustine (De doctr. christ., II, xi; cf. xvi) warns us that "the knowledge of languages is the great remedy against unknown signs. Men of the Latin tongue need two others for a thorough knowledge of the Divine Scriptures, viz, the Hebrew and

the Greek, so that recourse may be had to the older copies, if the infinite variety of the Latin translators occasions any doubt." Pope Leo XIII, in the Encyclical "Providentissimus Deus", agrees with the great African Doctor in urging the study of the sacred languages. "It is most proper", he writes, "that professors of Sacred Scripture and theologians should master those tongues in which the Sacred Books were originally written; and it would be well that church students also should cultivate them, more especially those who aspire to academic degrees. And endeavours should be made to establish in all academic institutions -- as has already been laudably done in many -- chairs of the other ancient languages, especially the Semitic, and of other subjects connected therewith, for the benefit principally of those who are intended to profess sacred literature." Nor can it be urged that for the Catholic interpreter the Vulgate is the authentic text, which can be understood by any Latin scholar. The pontiff considers this exception in the Encyclical quoted: "Although the meaning of the Hebrew and Greek is substantially rendered by the Vulgate, nevertheless wherever there may be ambiguity or want of clearness, the 'examination of older tongues,' to quote St. Augustine, will be useful and advantageous." Recourse to the original text is considered the only scholarly approach to any great work of literature. A translation is never a perfect reproduction of the original; no language can fully express the thoughts conveyed in another tongue, no translator is capable of seizing the exact shades of all the truths contained in any work, and in case of Biblical versions, we have often good reason for doubt as to the genuineness of their readings.

(b) *Scriptural Language* The Scriptural language presents several difficulties peculiar to itself. First, the Bible is not written by one author, but presents in almost every book the style of a different writer. Secondly, the Bible was not written at a single period; the Old Testament covers the time between Moses and the last Old-Testament writer, i.e. more than one thousand years, so that many words must have changed their meaning during this interval. Thirdly, the Biblical Greek is not the classical language of the Greek authors with whom we are acquainted; up to about fifteen years ago, Biblical scholars used to speak about New-Testament Greek, they compiled New-Testament lexicons, and wrote New-Testament grammars. The discovery of the Egyptian papyri and other literary remains has broken down this wall of separation between the language of the New Testament and that of the time in which it was written; with regard to this point, our present time may be considered as a period of transition, leading up to the composition of lexicons and grammars that will rightly express the relation of the Biblical Greek to the Greek employed in profane writings. Fourthly, the Bible deals with the greatest variety of topics, requiring a corresponding variety of vocabulary; moreover, its expressions are often figurative, and therefore subject to more frequent changes of meaning than the language of profane writers.

How are we to become acquainted with the Scriptural language in spite of the foregoing difficulties? St. Augustine (De doctr. christ., II, ix sqq.) suggests the continual reading of the Bible as the first remedy, so that we may acquire "a familiarity with the language of the Scriptures", He adds to this a careful comparing of the Bible text with the language of the ancient versions, a process calculated to remove some of the native ambiguities of the original text. A third help is found, according to the same great Doctor, in the diligent reading of the works of the Fathers, since many of them formed their style by a constant reading of Holy Scripture (loc. cit., II, xiii, xiv). Nor must we omit to study the writings of Philo and Josephus, the contemporaries of the Apostles and the historians of their nation. They are helpful illustrations of the cultured language of the Apostolic time. The study of the etymology of the sacred languages is another means of becoming acquainted with the languages themselves. For a proper understanding of the etymology of Hebrew words, the knowledge of the cognate languages is requisite; but here it must be kept in mind that many derivatives have a meaning quite different from the signification of their respective radicals, so that an argument based on etymology alone is open to suspicion.

(ii) Sense of the Literary Expression

After the foregoing rules have aided the interpreter to know the various significations of the words of the sacred text, he must next endeavour to investigate in what precise sense the inspired writer employed his expressions. He will be assisted in this study by attending to the subject-matter of the book or chapter, to its occasion and purpose, to the grammatical and logical context, and to the parallel passages. Whatever meaning of the literary expressions is not in keeping with the subject-matter of the book, cannot be the sense in which the writer employed it. The same criterion directs us in the choice of any particular shade of meaning and in the limitation of its extent. The subject-matter of the Epistles to the Romans and the Galatians, e.g., shows in what sense St. Paul used the expressions *law* and *works of the law*; the sense of the expressions *spirit of God, wisdom and understanding*, which occur in Ex., xxxi, 3, must be determined in the same way. The occasion and purpose of a book or of a passage will often determine whether certain expressions must be taken in their proper or figurative sense, whether in a limited or an unlimited extent. Attention to this point will aid us in explaining aright such passages as John, vi, 53 sqq.; Matt., x, 5; Heb., i, 5, 7; etc. Thus we shall understand the first of these passages of the real flesh and blood of Christ, not of their figure; we shall see the true import of Christ's command contained in the second passage, "Go ye not into the way of the Gentiles, and into the city of the Samaritans enter ye not"; again we shall appreciate the full weight of the theological argument in favour of the eternal generation of the Son as stated in the third passage, contained in the Epistle to the Hebrews.

The context is the third aid in determining the precise sense in which each single word is used by the writer. We need not insist on the necessity of explaining an expression in accordance with its grammatical environment. The commentator must make sure of the grammatical connection of an expression, so as not to do violence to the rules of inflection or of syntax. The so-called poetical parallelism may be considered as constituting part of grammar taken in a wider sense. But the logical context, too, requires attention; a commentator must not explain any expression in such a sense as to make the author contradict himself, being careful to assign to each word a meaning that will best agree with the thought of the sentence of the chapter, and even of the book. Still, it must not be overlooked that the context is sometimes psychological rather than logical; in lyric poetry, in the words of the Prophets, or in animated dialogues, thoughts and sentiments are at times brought into juxtaposition, the logical connection of which is not apparent. Finally, there is a so-called optical context which is found in the visions of the Prophets. The inspired seer may perceive grouped together in the same vision events which are widely separated from each other in time and space.

The so-called real or verbal parallelisms will aid the commentator in determining the precise sense in which the inspired writer employed his words. In case of verbal parallelism, or in the recurrence of the same literary expressions in different parts of the inspired books, it is better to explain the language of Paul by that of Paul, the expressions of John by those of John, than to explain Paul by Matthew, and John by Luke. Again, it is more natural to explain an expression occurring in the Fourth Gospel by another found in the same book than by a parallel passage taken from the Apocalypse. Finally, it should be kept in mind that parallelism of thought, or real parallelism, is a more reliable aid in finding the exact sense of a passage than a mere material recurrence of a sentence or a phrase.

(iii) Historical Setting

The inspired writers connected with their words the ideas which they themselves possessed, and which they knew to be intelligible to their contemporaries. When they spoke of a house, they expressed a habitation to which their contemporaries were accustomed, not a contrivance in use among the barbarians. In order to arrive at the precise sense of a passage, we must therefore bear in mind its historical setting, we must consult the testimony of history. The true sense of the Bible cannot be found in an idea or a thought historically untrue. The commentator must therefore be well acquainted with sacred history and sacred archæology, in order to know, to a certain extent at least, the various customs, laws, habits, national prejudices, etc. under the influence of which the inspired writers composed their respective books. Otherwise it will be impossible for him to understand the allusions, the metaphors, the language, and the style of the sacred writers. What has been said about the historico-grammatical

interpretation of Scripture is synopsized, as it were, in the Encyclical already quoted: "The more our adversaries contend to the contrary, so much the more solicitously should we adhere to the received and approved canons of interpretation. Hence, while weighing the meanings of words, the connection of ideas, the parallelism of passages, and the like, we should by all means make use of such illustrations as can be drawn from opposite erudition of an external sort."

(2) CATHOLIC INTERPRETATION

Since the Church is the official custodian and interpreter of the Bible, her teaching concerning the Sacred Scriptures and their genuine sense must be the supreme guide of the commentator. The inferences which flow from this principle are partly negative, partly positive.

(i) Negative Directions

The following directions are called negative not because they do not imply a positive attitude of mind or because they do not lead to positive results, but because they appear to emphasize at first sight the avoidance of certain methods of proceeding which would be legitimate in the exegesis of profane books. They are based on what the Church teaches concerning the sacred character of the Bible.

(a) Avoid Irreverence

Since the Bible is God's own book, its study must be begun and prosecuted with a spirit of reverence and prayer. The Fathers insist on this need in many passages. St. Athanasius calls the Scriptures the fountain that quenches our thirst for justice and supplies us with the doctrine of piety (Ep. fest. xxxix); St. Augustine (C. Faust., XIII, xviii) wishes them to be read for a memorial of our faith, for the consolation of our hope, and for an exhortation to charity; Origen (Ep. ad Gregor. Neocæs., c. iii) considers pious prayer as the most essential means for the understanding of the Divine Scriptures; but he wishes to see humility joined with prayer; St. Jerome (In Mich., I, x) agrees with St. Augustine (De doct. christ., III, xxxvii) in regarding prayer as the principal and most necessary aid for the understanding of the Scriptures. We might add the words of other patristic writers, if the alleged references were not clear and explicit enough to remove all doubt on the subject.

(b) No Error in Scripture

Since God is the principal Author of Sacred Scripture, it can contain no error, no self-contradiction, nothing contrary to scientific or historical truth. The Encyclical "Providentissimus Deus" is most explicit in its statement of this prerogative of the Bible: "All the books which the Church receives as sacred and canonical, are written wholly and entirely, with all their parts, at the dictation of the Holy Ghost; and so far is it from being possible that any error can coexist with inspiration, that inspiration not only is essentially incompatible with error, but excludes and rejects it as absolutely

and necessarily, as it is impossible that God Himself, the Supreme Truth, can utter that which is not true." The Fathers agree with this teaching almost unanimously; we may refer the reader to St. Jerome (*In Nah.*, I, iv), St. Irenæus (*C. hæc.*, II, xxviii), Clement of Alexandria (*Strom.*, VII, xvi), St. Augustine ("*C. Faust.*", II, ii; cf. "*In Ps. cxviii*", *serm.* xxxi, 5; "*Ad Hier.*", *ep.* lxxxii, 2, 22; "*Ad Oros. c. Prisc.*", xi), St. Gregory the Great (*Præf. in Job*, n. 2). The great African Doctor suggests a simple and radical remedy against apparent errors in the Bible: "Either my codex is wrong, or the translator has blundered, or I do not understand."

But inerrancy is not the prerogative of everything that happens to be found in the Bible; it is restricted to what the inspired writers state as their own, unless they quote the words of a speaker who is infallible in his utterances, the words of an Apostle, e.g., or of a Divinely authorized speaker, whether angel or man (cf. *Luke*, i, 42, 67; ii, 25; *II Mach.*, vii, 21), or again words regarded as having Divine authority either by Scripture (cf. *I Cor.*, iii, 19; *Gal.*, iv, 30) or by the Church (e.g., the *Magnificat*). Biblical words that do not fall under any of these classes carry merely the authority of the speaker, the weight of which must be studied from other sources. Here is the place to take notice of a decision issued by the Biblical Commission, 13 Feb., 1905, according to which certain Scriptural statements may be treated as quotations, though they appear on the surface to be the utterances of the inspired writer. But this can be done only when there is certain and independent proof that the inspired writer really quotes the words of another without intending to make them his own. Recent writers call such passages "tacit" or "implicit" citations.

The inerrancy of Scripture does not allow us to admit contradictions in its statements. This is understood of the genuine or primitive text of the Bible. Owing to textual corruptions, we must be prepared to meet contradictions in details of minor importance; in weightier matters such discrepancies have been avoided even in our present text. Discrepancies which may appear to obtain in matters of faith or morals should put the commentator on his guard that the same Biblical expressions are not everywhere taken in the same sense, that various passages may differ from each other as the complete statement of a doctrine differs from its incomplete expression, as a clear presentation differs from its obscure delineation. Thus "works" has one meaning in *James*, ii, 24, another in *Rom.*, iii, 28; "brothers" denotes one kind of relationship in *Matt.*, xii, 46, quite a different kind in most other passages; *John*, xiv, 28, and x, 30, *Acts*, viii, 12, and *Matt.*, xxviii, 19, are respectively opposed to each other as a clear statement is opposed to an obscure one, as an explicit one to a mere implication. In apparent Biblical discrepancies found in historical passages, the commentator must distinguish between statements made by the inspired writer and those merely quoted by him (cf. *I Kings*, xxxi, 9, and *II Kings*, i, 6 sqq.), between a double account of the

same fact and the narrative of two similar incidents, between chronologies which begin with different starting-points, finally between a compendious and a detailed report of an event. Lastly, apparent discrepancies which occur in prophetic passages necessitate an investigation, whether the respective texts emanate from the Prophets as Prophets (cf. II Kings, vii, 3-17), whether they refer to the same or to similar subjects (the destruction of Jerusalem, e.g., and the end of the world), whether they consider their subject from the same point of view (e.g. the suffering and the glorious Messiah), whether they use proper or figurative language. Thus the Prophet Nathan in his private capacity encourages David to build the Temple (II Kings, vii, 3), but as Prophet he foretells that Solomon will build the house of God (*ibid.*, 13).

The inerrancy of Scripture excludes also any contradiction between the Bible and the certain tenets of science. It cannot be supposed that the inspired writers should agree with all the various hypotheses which scientists assume to-day and reject tomorrow; but the commentator will be required to harmonize the teaching of the Bible with the scientific results which rest on solid proof. This rule is clearly laid down by the Encyclical in the words of St. Augustine: "Whatever they can really demonstrate to be true of physical nature, we must show to be capable of reconciliation with our Scriptures, and whatever they assert in their treatises which is contrary to these Scriptures of ours, that is to Catholic faith, we must either prove as well as we can to be entirely false, or at all events we must, without the smallest hesitation, believe it to be so" (*De Gen. ad litt.*, I, xxi, xli). But the commentator must also be careful "not to make rash assertions, or to assert what is not known as known" (St. Aug., in *Gen. op. imperf.*, ix, 30). The Encyclical appeals here again to the words of the great African Doctor (St. Aug., *de Gen. ad litt.*, II, ix, xx): "[The Holy Ghost] who spoke by them [the inspired writers], did not intend to teach men these things [i.e., the essential nature of the things of the visible universe], things in no way profitable unto salvation." The pontiff continues: "Hence they . . . described and dealt with things in more or less figurative language, or in terms which were commonly used at the time, and which in many instances are in daily use at this day, even by the most eminent men of science. Ordinary speech primarily and properly describes what comes under the senses; and somewhat in the same way, the sacred writers -- as the Angelic Doctor reminds us (*Summa*, I, Q. lxx, a. 1, ad 3^{um}) -- 'went by what visibly appeared', or put down what God, speaking to men, signified in a way men could understand and were accustomed to." In *Gen.*, i, 16, e.g., the sun and the moon are called two great lights; in *Jos.*, x, 12, the sun is commanded to stand still; in *Eccl.*, i, 5, the sun returns to its place; in *Job*, xxvi, 11, the firmament appears solid and brazen; in other passages the heavens are upheld by columns, and God rides on the clouds of heaven.

Finally, the commentator must be prepared to deal with the seeming discrepancies between Biblical and profane history. The considerations to be kept in mind here are similar to those laid down in the preceding paragraph. First, not all statements found in profane sources can be regarded a priori as Gospel truth; some of them refer to subjects with which the writers were imperfectly acquainted, others proceed from party-feeling and national vanity, others again are based on imperfectly or only partially translated ancient documents. Secondly, the Bible does not *ex professo* teach profane history or chronology. These topics are treated only incidentally, in as far as they are connected with sacred subjects. Hence it would be wrong to regard Scripture as containing a complete course of history and chronology, or to consider the text of its historical portions above suspicion of corruption. Thirdly, we must keep in mind the words of St. Jerome (in Jer., xxviii, 10): "Many things in Sacred Scripture are related according to the opinion of the time in which they are said to have happened, and not according to objective truth"; and again (in Matt., xiv, 8): "According to the custom of Scripture, the historian relates the opinion concerning many things in accordance with the general belief at that time." Father Delattre maintains (*Le Criterium à l'usage de la Nouvelle Exégèse Biblique*, Liège, 1907) that according to St. Jerome the inspired writers report the public opinion prevalent at the time of the events related, not the public opinion prevalent when the narrative was written. This distinction is of greater practical importance than it, at first, seems to be. For Father Delattre only grants that the inspired historian may write according to sensible appearances, while his opponents contend that he may follow also the so-called *historic* appearances. Finally, the first two decisions of the Biblical Commission must be mentioned in this connection. Some Catholic writers had attempted to remove certain historical difficulties from the sacred text either by considering the respective passages as tacit or implied quotations from other authors, for which the inspired writers did not in any way vouch; or by denying that the sacred writers vouch, in any way, for the historical accuracy of the facts they narrate, since they use these apparent facts merely as pegs on which to hang some moral teaching. The Biblical Commission rejected these two methods by decrees issued respectively 13 Feb. and 23 June, 1905, adding, however, that either of them may be admitted in the case when, due regard being paid to the sense and judgment of the Church, it can be proved by solid argument that the sacred writer either really quoted the sayings or documents of another without speaking in his own name, or did not really intend to write history, but only to propose a parable, an allegory, or another non-historical literary concept.

(ii) Positive Directions

St. Irenæus represents the teaching of the early Church, when he writes that the truth is to be learned where the charismata of God are, and that Holy Scripture is safely

interpreted by those who have the Apostolic succession (*Adv. hær.*, IV, xxvi, 5). Vincent of Lérins appears to sum up the teaching of the Fathers on this subject when he writes that on account of the great intricacies of various errors it is necessary that the line of Prophetic and Apostolic interpretation be directed according to the rule of ecclesiastical and Catholic teaching. The Vatican Council emphasizes the decree of the Council of Trent (*Sess. IV, De edit. et usu sacr. libr.*) when it teaches (*Constit. de fide cathol.*, c. ii) that "in things of faith and morals belonging to the building up of Christian doctrine, that is to be considered the true sense of Holy Scripture which has been held and is held by our Holy Mother the Church, whose place it is to judge of the true sense and interpretation of the Scriptures; and therefore that it is permitted to no one to interpret Holy Scripture against such sense or also against the unanimous agreement of the Fathers". Hence flow the following principles.

(a) Defined Texts

The Catholic commentator is bound to adhere to the interpretation of texts which the Church has defined either expressly or implicitly. The number of these texts is small, so that the commentator can easily avoid any transgression of this principle. The Council of Trent teaches that *Rom.*, v, 12, refers to original sin (*Sess. V, cc. ii, iv*), that *John*, iii, 5, teaches the absolute necessity of the baptism of water (*Sess. V, c. iv; Sess. VII, De bapt., c. ii*), that *Matt.*, xxvi, 26 sq. is to be understood in the proper sense (*Sess. XIII, cap. i*); the Vatican Council gives a direct definition of the texts, *Matt.*, xvi, 16 sqq. and *John*, xxi, 15 sqq. Many more Scripture texts are indirectly defined by the definition of certain doctrines and the condemnation of certain errors. The Council of Nicæa, e.g., showed how those passages ought to be interpreted on which the Arians relied in their contention that the Word was a creature; the Fifth Ecumenical Council (II Constantinople) teaches the right meaning of many prophecies by condemning the interpretation of Theodore of Mopsuestia.

(b) Patristic Interpretation

Pope Leo XIII, in his Encyclical "*Providentissimus Deus*", repeats the principles concerning the authority of the Fathers laid down by the Vatican and Tridentine Councils: "The Holy Fathers, 'to whom, after the Apostles, the Church owes its growth -- who have planted, watered, built, governed, and cherished it' (*Aug., C. Julian., II, x, 37*) -- the Holy Fathers, we say, are of supreme authority whenever they all interpret in one and the same manner any text of the Bible, as pertaining to the doctrine of faith or morals; for their unanimity clearly evinces that such interpretation has come down from the Apostles as a matter of Catholic faith." Three conditions are, therefore, required in order that the patristic authority may be absolutely decisive: first, they must interpret texts referring to matters of faith or morals; secondly, they must speak as witnesses of Catholic tradition, not merely as private theologians; thirdly, there must

be a moral unanimity in their interpretation. This unanimity is not destroyed by the silence of some of the foremost Fathers, and is sufficiently guaranteed by the consentient voice of the principal patristic writers living at any critical period, or by the agreement of commentators living at various times; but the unanimity is destroyed if some of the Fathers openly deny the correctness of the interpretation given by the others, or if they explain the passage in such a way as to render impossible the explanation given by others. But the Encyclical warns us to treat the opinion of the Fathers with reverence, even if there is no unanimity: "The opinion of the Fathers", says the holy pontiff, "is also of very great weight when they treat of these matters in their capacity of doctors, unofficially; not only because they excel in their knowledge of revealed doctrine and in their acquaintance with many things which are useful in understanding the Apostolic books, but because they are men of eminent sanctity and of ardent zeal for the truth, on whom God has bestowed a more ample measure of his light."

(c) The Analogy of Faith

Here again the Encyclical "Providentissimus Deus" is our guide: "In the other passages" it reads, "the analogy of faith should be followed and Catholic doctrine, as authoritatively proposed by the Church, should be held as the supreme law; for, seeing that the same God is the author both of the Sacred Books and of the doctrine committed to the Church, it is clearly impossible that any teaching can by legitimate means be extracted from the former, which shall in any respect be at variance with the latter." This principle has a double influence on the interpretation of Scripture, a negative and a positive influence. First, the commentator cannot admit in Scripture a statement contrary to the teaching of the Church; on the other hand, the agreement of an explanation with the doctrine of the Church does not prove its correctness, since more than one explanation may agree with the ecclesiastical teaching. Secondly, the Catholic interpreter must explain the obscure and partial teaching of the Scriptures by the clear and complete teaching of the Church; the passages, e.g., which refer to the Divine and human nature of Christ, and to the power of binding and loosing, find their explanation and their complement in Catholic tradition and the conciliar definitions. And here we must keep in mind what the Encyclical adds concerning doctrine which comes down to us in a less authoritative channel: "The authority of other Catholic interpreters is not so great; but the study of Scripture has always continued to advance in the Church, and, therefore, these commentaries also have their own honourable place, and are serviceable in many ways for the refutation of assailants and the explanation of difficulties."

III. SACRED RHETORIC

The genuine teaching of Sacred Scripture is useful to all, but few have the time necessary to investigate it. It is for this reason that Scripture students express their

results in writing so as to share their light with as many as possible. Sixtus Senensis [Bibliotheca sancta (Venice, 1575), I, pp. 278 sqq.] enumerates twenty-four various forms in which such Scriptural explanations may be expressed. But some of these methods are no longer in use; others may be reduced to fewer and more general heads. According to the end which the writer has in view, they may be divided into theoretical and practical or historico-dogmatic and moral treatises; considering the persons for whom they were written, they are either popular or learned expositions; but if their literary form be made the basis of division, which is the common and more rational principle of division, there are five kinds of Biblical exegesis: the version, the paraphrase, the gloss and scholion, the dissertation, and the commentary.

(1) THE VERSION

The version is the translation of the Bible from one language into another, especially from its original into the vernacular language. A version made directly from the original text is called immediate, while it is mediate if it be based directly on another version. It is verbal if it renders the very words; in case it renders the meaning rather than the words, it is a free version. A good version must be faithful and clear, i.e. it must express the thought without any alteration; it must reproduce the literary form, whether it be prosaic or poetic, figurative or proper; and it must be easily intelligible, as far as the character of the two languages in question permits this. This shows the difficulty of making a good translation; for it implies not merely a thorough knowledge of the two languages, but also an accurate insight into the genuine meaning of Sacred Scripture.

(2) THE PARAPHRASE

The paraphrase expresses the genuine sense of Scripture in continuous and more expansive form. The version removes the difficulties which arise from the fact that the Bible is written in a foreign language; the paraphrase elucidates also the difficulties of thought. For it supplies the transitions and middle terms omitted by the author; it changes the foreign and involved phraseology of the original into idiomatic sentences; it amplifies the brief statements of the original by adding definitions, indicating causes and reasons, and illustrating the text by reference to parallel passages. A good paraphrase must render the thought of the original most accurately, and must at the same time be brief and clear; there is danger, in this form of exposition, of rendering obscure what has been clearly said in the original text.

(3) THE GLOSS AND SCHOLION

The version removes from the Scripture text the difficulties connected with the foreign language, the paraphrase elucidates the difficulties of thought; but there are still other difficulties connected with the Bible, which must be removed by means of notes. One kind of brief notes, called glosses, explains the difficulties connected with

the words; another kind, called scholia, deals with variant readings, verbal difficulties, unknown persons, countries, and things, and with the connection of thought. Two celebrated series of glosses deserve special mention: the *glossa ordinaria* by Walafrid Strabo, and the *glossa interlinearis* by Anselm of Laon.

(4) THE DISSERTATION

Origen, Eusebius, and St. Jerome were asked by their contemporaries concerning certain difficult texts of Scripture; a similar need of special elucidations of particular passages has been felt by the faithful of all ages. The answers to such questions we may call dissertations or treatises. It is understood that only really important texts ought to be made the subject of such scholarly explanations. In order to satisfy the inquisitive reader, the essayist should examine the text critically; he should state its various explanations given by other writers and weigh them in the light of the principles of hermeneutics; finally, he should give the true solution of the difficulty, prove it by solid arguments, and defend it against the principal exceptions.

(5) THE COMMENTARY

The commentary is a continuous, full, learned, well-reasoned, and complete explanation, touching upon not merely the more difficult passages, but everything that stands in need of elucidation. Hence the commentator must discuss all the variants, state and prove the genuine sense of the book he explains, add all the necessary personal, geographical, historical, ethnical information, and indicate the sources whence it is drawn, harmonize the single sentences with each other and with the scope of the entire book, consider its apparent contradictions, and explain the sense in which its quotations from the Old Testament must be understood. With a view of securing an orderly exposition, the author should premise the various historico-critical studies belonging to the whole book; he should divide and subdivide the book into its principal and subordinate parts, clearly stating the special subject of each; he should, finally, arrange the various opinions concerning disputed questions in a neatly distributed list, so as to lighten the work of the reader. What has been said sufficiently shows the qualities which a well-written commentary ought to possess; it must be faithful in presenting the genuine sense of Scripture; it must be clear, complete, and brief; and it ought to show the private work of the commentator by the light it throws on the more complicated questions. The commentaries which consist of mere lists of the patristic views on the successive texts of Scripture are called *catenæ* (q.v.).

Perhaps the homily may be added to the foregoing methods of Biblical exposition. It is written in a popular way, and is of a practical tendency. It is not concerned with the subtle and more difficult questions of Scripture, but explains the words of a Biblical section in the order in which they occur. A more elevated kind of homily seizes the fundamental idea of a Scriptural section, and considers the rest in relation to it.

The Church has always encouraged such homiletic discourses, and the Fathers have left a great number of them in their writings.

IV. HISTORY OF EXEGESIS

The history of exegesis shows its first beginnings, its growth, its decay, and its restoration. It points out the methods which may be safely recommended, and warns against those which rather corrupt than explain the Sacred Scriptures. In general, we may distinguish between Jewish and Christian exegesis.

(1) JEWISH EXEGESIS

The Jewish interpretation of the Scriptures began almost at the time of Moses, as may be inferred from traces found both in the more recent canonical and the apocryphal books. But in their method of interpretation the Palestinian Jews differed from the Hellenistic.

(i) Palestinian Exegesis

All Jewish interpreters agree in admitting a double sense of Scripture, a literal and a mystical, though we must not understand these terms in their strictly technical sense.

(a) The literal exposition is mainly represented by the so-called Chaldee paraphrases or Targumim, which came into use after the Captivity, because few of the returning exiles understood the reading of the Sacred Books in their original Hebrew. The first place among these paraphrases must be given to the Targum Onkelos, which appears to have been in use as early as the first century after Christ, though it attained its present form only about A.D. 300-400. It explains the Pentateuch, adhering in its historical and legal parts to a Hebrew text which is, at times, nearer to the original of the Septuagint than the Massoretic, but straying in the prophetic and poetical portions so far from the original as to leave it hardly recognizable. -- Another paraphrase of the Pentateuch is the Targum Pseudo-Jonathan, or the Jerusalem Targum. Written after the seventh century of our era, it is valueless both from a critical and an exegetical point of view, since its explanations are wholly arbitrary. -- The Targum Jonathan, or the paraphrase of the Prophets, began to be written in the first century, at Jerusalem; but it owes its present form to the Jerusalem rabbis of the fourth century. The historical books are a fairly faithful translation from the original text; in the poetical portions and the later Prophets, the paraphrase often presents fiction rather than truth. -- The paraphrase of the Hagiographa deals with the Book of Job, the Psalms, the Canticle of Canticles, Proverbs, Ruth, the Lamentations, Ecclesiastes, Esther, and Paralipomena. It was not written before the seventh century, and is so replete with rabbinic fiction that it hardly deserves the notice of the serious interpreter. The notes on Cant., Ruth, Lam., Eccles., and Esth. rest on public tradition; those on the other Hagiographa express the opinions of one or more private teachers; the paraphrase of Par. is the most recent and the least reliable.

(b) The method of arguing employed in the First Gospel and the Epistle to the Hebrews shows that the Jews before the coming of Christ admitted a mystical sense of Scripture; the same may be inferred from the letter of Pseudo-Aristeas and the fragment of Aristobulus. The Gospel narrative, e.g., Matt., xxiii, 16 sqq., testifies that the Pharisees endeavoured to derive their arbitrary traditions from the Law by way of the most extraordinary contortions of its real meaning. The mystic interpretation of Scripture practised by the Jewish scholars who lived after the time of Christ, may be reduced to the following systems.

(aa) The Talmudists ascribed to every text several thousand legitimate meanings belonging either to the Halakhah or the Haggadah. The Halakhah contained the legal inferences derived from the Mosaic Law, all of which the Talmudists referred back to Moses himself; the Haggadah was the collection of all the material gathered by the Talmudists from history, archæology, geography, grammar, and other extra-Scriptural sources, not excluding the most fictitious ones. In their commentaries, these writers distinguished a twofold sense, the proper, or primitive, and the derivative. The former was subdivided into the plain and the recondite sense; the latter, into logical deductions, and inferences based on the way in which the Hebrew words were written or on association of ideas. As to the hermeneutical rules followed by the Talmudists, they were reduced to seven by Hillel, to thirteen by Ismael, and to thirty-two by R. Jose of Galilee. In substance, many of these principles do not differ from those prevalent in our day. The interpreter is to be guided by the relation of the genus to the species, of what is clear to what is obscure, of verbal and real parallelisms to their respective counterparts, of the example to the exemplified, of what is logically coherent to what appears to be contradictory, of the scope of the writer to his literary production. The commentaries written according to these principles are called Midrashim (plural of Midrash); the following must be mentioned: Mekhilta (measure, rule, law) explains Ex., xii, 1-23, 30; xxxi, 12-17; xxxv, 1-4, and is variously assigned to the second or third century, or even to more recent times; it gives the Halakhah of the ceremonial rites and laws, but contains also material belonging to the Haggadah. -- Siphra explains the Book of Leviticus; Siphri, the Books of Numbers and Deuteronomy; Pesiqta, the Sabbatical sections. -- Rabboth (plural of Rabba) is a series of Midrashim explaining the single books of the Pentateuch and the five Megilloth or the five Hagiographa which were read in the synagogues; the allegorical, anagogical, and moral sense is preferred to the literal, and the fables and sayings of the rabbis are highly valued. -- Tanchuma is the first continuous commentary on the Pentateuch; it contains some valuable traditions, especially of Palestinian origin. -- Yalqut Simoni contains annotations on all the books of the Old Testament.

(bb) The Caraites are related to the Talmudists, as the Sadducees were related to the Pharisees. They rejected the Talmudic traditions, just as the Sadducees refused to acknowledge the authority of the Pharisaic teaching (cf. Joseph., Ant., XVIII, x, 6). The Caraites derive their origin from Anan, born about A.D. 700, who founded this sect out of spite, because he had not obtained the headship of the Jews outside Palestine. From Bagdad, the place of its birth, the sect soon spread into Palestine and especially into the Crimea, so that about A.D. 750 it occasioned what is practically a schism among the Jews. The Caraites reject all tradition, and admit only the Mosaic Law. By means of Ismael's thirteen hermeneutical rules, they establish the literal sense of Scripture, and this they supplement by means of the syllogism and the consensus of the Synagogue. Owing to their rejection of authentic interpretation and their claim of private judgment, they have been called by some writers "Jewish Protestants".

(ii) Hellenistic Exegesis

Generally speaking, the Alexandrian Jews were favourable to the allegorical explanation of Scripture, thus endeavouring to harmonize the inspired records with the principles of Greek philosophy. Eusebius has preserved specimens of this Hellenistic exegesis in the fragments of Aristobulus (Hist. Eccles., VII, xxxii; Præpar. evang., VIII, x) and in the letter of Pseudo-Aristeas (Præpar. evang., VIII, ix), both of whom wrote in the second century B.C. Philo attests that the Essenes adhered to the same exegetical principles (De vit. contempl., x); but Philo (died A.D. 39) himself is the principal representative of this manner of interpretation. According to Philo, Abraham symbolizes virtue acquired by doctrine; Isaac, inborn virtue; Jacob, virtue acquired by practice and meditation; Egypt denotes the body; Chanaan, piety; the dove, Divine wisdom, etc. (De Abraham, ii).

The Cabbalists exceeded the preceding interpreters in their allegorical explanation of Scripture. Traces of their system are found in the last pre-Christian centuries, but its full development did not take place till the end of the first millennium B.C. In accordance with their name, which is derived from a word meaning "to receive", the Cabbalists claimed to possess a secret doctrine received by way of tradition from Moses, to whom it had been revealed on Mount Sinai. They maintained that all earthly things had their heavenly prototypes or ideals; they believed that the literal sense of Scripture included the allegorical sense, as the body includes the soul, though only the initiated could reach this veiled meaning. Three methods helped to attain it: Gematria takes the numerical value of all the letters which make up a word or an expression and derives the hidden meaning from the resultant number; Notaricon forms new entire words out of the single letters of a word, or it forms a word out of the initial letters of the several words of a phrase; Temura consists in the transposition of the letters which make up a word, or in the systematic substitution of other letters. Thus they transpose

the consonants of *mal'akhi* (my angel; Ex., xxiii, 23) into *Mikha'el* (Michael). There is a twofold system of substitution: the first, Athbash, substitutes the last letter of the alphabet for the first, the second last for the second, etc.; the second system substitutes the letters of the second half of the alphabet for the corresponding letters of the first half. The Cabbalistic doctrine has been gathered in two principal books, one of which is called "Yeçirah", the other "Zohar".

We may add the names of the more prominent Jewish commentators: Saadya Gaon (b. 892; d. 942), in the Fayûm, Egypt, translated the whole of the Old Testament into Arabic and wrote commentaries on the same. -- Moses ben Samuel ibn Chiqitilla, of Cordova, explained the whole of the Old Testament in Arabic, between A.D. 1050 and 1080; only fragments of his work remain. -- Rabbi Solomon ben Isaac, known also under the names Rashi and Yarchi (b. about 1040, at Troyes; d. 1105), explained the whole of the Old Testament, except Par. and Esd., according to its literal sense, though he did not neglect the allegorical; he shows an anti-Christian tendency. -- Rabbi Abraham ibn Ezra, often called Aben Ezra (b. about 1093 at Toledo, Spain; d. 1167 on the Island of Rhodes). Among his many other works he left an incomplete commentary on the Pentateuch and other parts of the Old Testament; he renders the literal sense faithfully without excluding the allegorical, e.g. in Cant. -- Rabbi David Kimchi, called also Radak (b. 1170 at Narbonne; d. 1230), explained nearly all the books of the Old Testament in the literal sense, without excluding the spiritual; his anti-Christian feeling shows itself in his treatment of the Messianic prophecies. -- Rabbi Moyses ben Maimon, commonly called Maimonides or Rambam (b. 1135 at Cordova, Spain; d. 1204 in Egypt), became a convert to Mohammedanism in order to escape persecution, then fled to Egypt, where he lived as a Jew, and where, for the guidance of those who could not harmonize their philosophical principles with the teaching of Sacred Scripture, he wrote his celebrated "Guide of the Perplexed", a work in which he presents some of the Biblical stories as mere literary expressions of certain ideas. -- Rabbi Isaac Abarbanel (d. 1508), explained the Pentateuch, the prophetic books, and Daniel, adding often irrelevant matter and arguments against Christian revelation. -- Rabbi Elias Levita (d. after 1542), is known as one of the best Jewish grammarians, and as the author of the work "Tradition of Tradition" in which he gives the history of Massoretic criticism. - - Among the Caraites interpreters we must mention: Rabbi Jacob ben Ruben (twelfth century), who wrote brief scholia on all the books of Scripture; Rabbi Aaron ben Joseph (d. 1294), author of a literal commentary on the Pentateuch, the earlier Prophets, Isaias, the Psalms, and the Book of Job; Rabbi Aaron ben Elia (fourteenth century), who explained the Pentateuch. -- Among the Cabbalists, Rabbi Moyses Nachmanides, also known as Ramban (d. about 1280), deserves mention on account of his explanation of the Pentateuch, which is several times quoted by Paul of Burgos. -- The principal

Jewish commentaries have been reprinted in the so-called Rabbinic Bibles which appeared at Venice, 1517; Venice, 1525, 1548, 1568, 1617; Basle, 1618; Amsterdam, 1724.

(2) CHRISTIAN EXEGESIS

For the sake of clearness we may distinguish three great periods in Christian exegesis: the first ends about A.D. 604; the second brings us up to the Council of Trent; the third embraces the time after the Council of Trent.

(i) The Patristic Period

The patristic period embraces three distinct classes of exegetes, the Apostolic and apologetical writers, the Greek Fathers, the Latin Fathers. The amount of exegetical literature produced by these three classes varies greatly; but its character is so distinctively proper to each of the three classes that we can hardly consider them under the same heading.

(a) The Apostolic Fathers and Apologists

The early Christians made use of the Scriptures in their religious meetings as the Jews employed them in the synagogues, adding however the writings of the New Testament more or less completely to those of the Old. The Apostolic Fathers did not write any professional commentaries; their use of Scripture was incidental and casual rather than technical; but their citations and allusions show unmistakably their acceptance of some of the New-Testament writings. Neither do we find among the apologists' writings of the second century any professional treatises on Sacred Scripture. St. Justin and St. Irenæus are noted for their able defence of Christianity, and their arguments are often based on texts of Scripture. St. Hippolytus appears to have been the first Christian theologian who attempted an explanation of the whole of Scripture; his method we learn from the remaining fragments of his writings, especially of his commentary on Daniel. It may be said in general that these earliest Christian writers admitted both the literal and the allegorical sense of Scripture. The latter sense appears to have been favoured by St. Clement of Rome, Barnabas, St. Justin, St. Irenæus, while the literal seems to prevail in the writings of St. Hippolytus, Tertullian, the Clementine Recognitions, and among the Gnostics.

(b) The Greek Fathers

The Encyclical "Providentissimus Deus" refers mainly to the Greek Fathers when it says: "When there arose, in various sees, catechetical and theological schools, of which the most celebrated were those of Alexandria and of Antioch, there was little taught in those schools but what was contained in the reading, the interpretation, and the defence of the Divine written word. From them came forth numbers of Fathers and writers whose laborious studies and admirable writings have justly merited for the three following centuries the appellation of the golden age of Biblical exegesis.

The School of Alexandria. Tradition loves to trace the origin of the Alexandrian School back to the Evangelist St. Mark. Be that as it may, towards the end of the second century we find St. Pantænus president of the school; none of his writings are extant, but Eusebius (Hist. Eccl., V, x) and St. Jerome (De vir. ill., c. xxxvi) testify that he explained Sacred Scripture. Clement of Alexandria ranks him among those who did not write any book (Strom., I, i); he died before 200. His successor was Clement of Alexandria, who had first been his disciple, and after 190 his colleague. Of his writings are extant "Cohortatio ad Gentiles", "Pædagogus", and "Stromata"; also the Latin translation of part of his eight exegetical books (Migne, P.G., IX, 729-740). Clement was followed by Origen (b. 185; d. 254), the principal glory of the whole school. Among his works, the greater part of which is lost, his "Hexapla" and his threefold explanation of Scripture, by way of scholia, homilies, and commentaries, deserve special notice. It was Origen, too, who fully developed the hermeneutical principles which distinguish the Alexandrian School, though they are not applied in their entirety by any other Father. He applied Plato's distinction of body, soul, and spirit to the Scriptures, admitting in them a literal, a moral, and a mystical or spiritual sense. Not that the whole of Scripture has this triple sense. In some parts the literal sense may be neglected, in others the allegorical may be lacking, while in others again the three senses may be found. Origen believes that the apparent discrepancies of the Evangelists can be explained only by means of the spiritual sense, that the whole ceremonial and ritual law must be explained mystically, and that all the prophetic utterances about Judea, Jerusalem, Israel, etc., are to be referred to the Kingdom of Heaven and its citizens, to the good and bad angels, etc. Among the eminent writers of the Alexandrian School must be classed Julius Africanus (c. 215), St. Dionysius the Great (d. 265), St. Gregory Thaumaturgus (d. 270), Eusebius of Cæsarea (d. 340), St. Athanasius (d. 373), Didymus of Alexandria (d. 397), St. Epiphanius (d. 403), St. Cyril of Alexandria (d. 444), and finally also the celebrated Cappadocian Fathers, St. Basil the Great (d. 379), St. Gregory Nazianzen (d. 389), and St. Gregory of Nyssa (d. 394). The last three, however, have many points in common with the School of Antioch.

The School of Antioch. The Fathers of Antioch adhered to hermeneutical principles which insist more on the so-called grammatico-historical sense of the Sacred Books than on their moral and allegorical meaning. It is true that Theodore of Mopsuestia urged the literal sense to the detriment of the typical, believing that the New Testament applies some of the prophecies to the Messiah only by way of accommodation, and that on account of their allegories the Canticle of Canticles, together with a few other books, should not be admitted into the Canon. But generally speaking, the Fathers of Antioch and Eastern Syria, the latter of whom formed the School of Nisibis or Edessa, steered a course midway between Origen and Theodore, avoiding the excesses of both,

and thus laying the foundation of the hermeneutical principles which the Catholic exegete ought to follow. The principal representatives of the School of Antioch are St. John Chrysostom (d. 407); Theodore of Mopsuestia (d. 429), condemned by the Fifth Ecumenical Synod on account of his explanation of Job and the Canticle of Canticles, and in certain respects the forerunner of Nestorius; St. Isidore of Pelusium, in Egypt (d. 434), numbered among the Antiochene commentators on account of his Biblical explanations inserted in about two thousand of his letters; Theodoret, Bishop of Cyrus in Syria (d. 458), known for his Questions on the Octateuch, the Books of Kings and Par., and for his Commentaries on the Psalms, the Cant., the Prophets, and the Epistles of St. Paul. The School of Edessa glories in the names of Aphraates who flourished in the first half of the fourth century, St. Ephraem (d. 373), Cyrillonas, Balæus, Rabulas, Isaac the Great, etc.

(c) *The Latin Fathers.* The Latin Fathers, too, admitted a twofold sense of Scripture, insisting variously now on the one, now on the other. We can only enumerate their names: Tertullian (b. 160), St. Cyprian (d. 258), St. Victorinus (d. 297), St. Hilary (d. 367), Marius Victorinus (d. 370), St. Ambrose (d. 397), Rufinus (d. 410), St. Jerome (d. 420), St. Augustine (d. 430), Primasius (d. 550), Cassiodorus (d. 562), St. Gregory the Great (d. 604). St. Hilary, Marius Victorinus, and St. Ambrose depend, to a certain extent, on Origen and the Alexandrian School; St. Jerome and St. Augustine are the two great lights of the Latin Church on whom depend most of the Latin writers of the Middle Ages; at the end of the works of St. Ambrose is inserted a commentary on the Pauline Epistles which is now ascribed to Ps.-Ambrose or Ambrosiaster.

(ii) Second Period of Exegesis, A.D. 604-1546

We consider the following nine centuries as one period of exegesis, not on account of their uniform productiveness or barrenness in the field of Biblical study, nor on account of their uniform tendency of developing any particular branch of exegesis, but rather on account of their characteristic dependence on the work of the Fathers. Whether they synopsised or amplified, whether they analysed or derived new conclusions from old premises, they always started from the patristic results as their basis of operation. Though during this period the labours of the Greek writers can in no way compare with those of the Latin, still it will be found convenient to consider them apart.

(a) The Greek Writers

The Greek writers who lived between the sixth and the thirteenth centuries composed partly commentaries, partly compilations. The Bishops of Cæsarea, Andreas and Arethas, who are variously assigned to the fifth and sixth, or to the eighth and ninth centuries, explained the Apocalypse; Procopius of Gaza (524) wrote on the Octateuch, Is., and Prov.; Hesychius of Jerusalem wrote probably about the end of the

sixth century on Lev., Pss., Is., the Minor Prophets, and the concordance of the Gospels; Anastasius Sinaita (d. 599) left twelve books of allegorical comments on the hexaemeron; Olympiodorus (d. 620) and St. Maximus (d. 662) left more sober explanations than Anastasius, though they are not free from allegorism; St. John Damascene (d. 760) has many Scriptural explanations in his dogmatic and polemical works, besides writing a commentary on the Pauline Epistles, in which he follows Theodoret and St. Cyril of Alexandria, but especially St. Chrysostom. Photius (d. 891), cumenius (tenth century), Theophylactus (d. 1107), and Euthymius (d. 1118) were adherents of the Greek Schism, but their exegetical works deserve attention. -- The above-named compilations are technically called *catenæ*. They furnish continuous explanations of various books of Scripture in such a way that they give after each text the various patristic explanations either in full or by way of a synopsis, usually adding the name of the particular Father whose opinion they had copied. Several of these *catenæ* have been printed, such as Nicephorus, on the Octateuch (Leipzig, 1772); B. Corderius, on the Pss. (Antwerp, 1643-1646); A. Schottius, on Prov. (Lyons, 1633); Angelo Mai, on Dan. (Rome, 1831); Cramer, on the New Testament (Oxford, 1638-1640).

(b) The Latin Writers

The Latin writers of this epoch may be divided into two classes: the pre-Scholastic and the Scholastic. The two are not of equal importance, but they are too different to be treated under the same heading.

The Pre-Scholastic Period. Among the many writers of this age who were instrumental in spreading the Biblical expositions of the Fathers, the following are deserving of notice: St. Isidore of Seville (d. 636), the Venerable Bede (d. 735), Alcuin (d. 804), Haymo of Halberstadt (d. 855), Rhabanus Maurus (d. 856), Walafrid Strabo (d. 849), who compiled the *glossa ordinaria*, Anselm of Laon (d. 1117), author of the *glossa interlinearis*, Rupert of Deutz (d. 1135), Hugh of St. Victor (d. 1141), Peter Abelard (d. 1142), and St. Bernard (d. 1153). The particular writings of each of these great men will be found under their respective names.

The Scholastics. Without drawing a mathematical line of distinction between the writers of this period, we may say that the works which appeared in its beginning are remarkable for their logical and theological explanations; the subsequent works showed more philological erudition; and the final ones began to offer material for textual criticism. The first of these groups of writings coincides with the so-called golden age of scholastic theology which prevailed about the thirteenth century. Its principal representatives are so well known that we need only mention their names. Peter Lombard rightly heads the list (d. 1164), for he appears to be the first who fully introduced into his exegetical work the scholastic divisions, distinctions, definitions, and method of argumentation. Next follow Card. Stephen Langton (d. 1228), author of the chapter-

divisions as they exist to-day in our Bibles; Card. Hugh of Saint-Cher (d. 1260), author of the so-called "Dominican Correctory", and of the first Biblical concordance; Blessed Albertus Magnus (d. 1280); St. Thomas Aquinas (d. 1274); St. Bonaventure (d. 1274); Raimondo Martini (d. 1290), who wrote the polemical work known as "Pugio Fidei" against the Moors and Jews; a number of other names might be added, but they are of less importance.

In 1311 Pope Clement V ordained, in the Council of Vienne, that chairs of the Oriental languages were to be erected in the principal universities, so that the Jews and Mohammedans might be refuted from their own sources. The philological results of this enactment may be seen in the celebrated "Postilla" of Nicholas of Lyra (d. 1340), a work which received notable additions by Paul of Burgos (d. 1435). Alphonsus Tostatus, called also Abulensis (d. 1455), and Denys the Carthusian (d. 1471), returned to the more scholastic method of interpretation; Laurentius Valla (d. 1457) applied the results of his Greek studies to the explanation of the New Testament, though he is unduly opposed to the Latin Vulgate.

Not to insist on the less illustrious exegetes of this period, we may pass on to those who applied to Scripture not merely their philological erudition, but also their acumen for textual criticism in its incipient state. Aug. Justiniani edited an Octapla of the Psalter (Genoa, 1516); Card. Ximenez finished his Complutensian Polyglot (1517); Erasmus published the first edition of his Greek New Testament (1517); Card. Cajetan (d. 1535) attempted an explanation of the Scriptures according to the original texts; Santes Pagninus (d. 1541) translated the Old and the New Testament anew from their original texts; a number of other scholars worked in the same field, publishing either new translations, or scholia, or again commentaries in which new light was shed on one or more books of the Sacred Scriptures.

(iii) Third Period of Exegesis

A few decades before the Council of Trent, Protestantism began to make its inroads into various parts of the Church, and its results were felt not merely in the field of dogmatic theology, but also in Biblical literature. We shall, therefore, have to distinguish after this between Catholic and Protestant exegetes.

(a) Catholic Exegetes

Catholic exegesis subsequent to the Council of Trent may be divided into three stages: the first may be regarded as the terminus of the Scholastic period; the second forms the transition from the old to the new exegesis; and the third comprises the exegetical work of recent times. The first stage begins about the time of the Council of Trent, and ends about 1660; the second reaches to the beginning of the nineteenth century; and the third deals with our own times.

The Golden Age of Catholic Exegesis, 1546-1660. We have spoken above of the golden age of Christian exegesis, as distinct from the exegesis of the Jews; the following period is by some writers called the golden age of Catholic exegesis, as distinct from the Biblical work done by Protestants. During this period more than 350 Catholic writers were engaged in Biblical study; we can only classify the work done, and indicate some of the principal writers engaged in it. The revised Clementine edition of the Vulgate appeared in 1592; the Antwerp Polyglot, in the years 1569-1572; the Paris Polyglot, in the years 1629-1645. -- The introductory questions were treated by Sixtus Senensis (d. 1569), Christ. Adrichomius (d. 1585), Flaminus Nobilius (d. 1590), Ben. Arias Montanus (d. 1598), Petrus Morinus (d. 1608), Lucas Brugensis (d. 1619), de Tena (d. 1622), Joannes Morinus (d. 1659), and Franc. Quaresmius (d. 1660). -- All or most of the books of Scripture were interpreted by Sa (d. 1596), Mariana (d. 1624), Tirinus (d. 1636), a Lapide (d. 1637), Gordon (d. 1641), Menochius (d. 1655), de la Haye (1661). -- Select books of both the Old and the New Testament were commented upon by Jansenius Gandavensis (d. 1575), Maldonatus (d. 1583), Ribera (d. 1591), Serarius (d. 1609), and Lorinus (d. 1634). -- Certain books of the Old Testament were explained by Andreas Masius (d. 1573), Forerius (d. 1581), Pradus (d. 1595), Villalpandus (d. 1608), Genebrardus (d. 1597), Agellius (d. 1608), Pererius (d. 1610), Card. Bellarmine (d. 1621), Sanctius (d. 1628), Malvenda (d. 1628), de Pineda (d. 1637), Bonfrerius (d. 1642), de Muis (d. 1644), Ghislerius (d. 1646), de Salazar (d. 1646), and Corderius (d. 1655). -- Finally, all or part of the books of the New Testament found interpreters in Salmeron (d. 1585), Card. Toletus (d. 1596), Estius (d. 1613), de Alcasar (d. 1613), and Ben. Justiniani (d. 1622). It must be noted here that several of the foregoing writers admit a multiple literal sense; hence they represent various explanations of the same words as equally true.

The Transition Period, 1660-1800. During this period, historical studies were more cultivated than scholastic. It is here that we meet with the father of the historical and critical introduction, Richard Simon (d. 1712). Frassen (d. 1711) adopts more of the scholastic method, but there is a return to the historical in the case of Bern. Lamy (d. 1715), Daniel Huet (d. 1721), and Nat. Alexander (d. 1722). The bibliography of exegesis was treated by Bartolucci (d. 1687), Imbonatus (d. 1694), Dupin (d. 1719), Lelong (d. 1721), and Desmolets (d. 1760). Old documents belonging to Scriptural studies were edited by B. de Montfaucon (d. 1741), P. Sabatier (d. 1742), and Jos. Blanchinus (d. 1764), while Calmet (d. 1757) and Bossuet (d. 1704) are noted for their exegetical work. Bukentop (d. 1710) has recourse to the original texts in order to explain doubtful or obscure readings in the Vulgate. If one compares this period with the preceding, one is struck with its poverty in great Biblical scholars; but textual criticism is fairly well represented by Houbigant (d. 1784) and de Rossi (d. 1831).

Recent Times. The perturbed state of the Church at the beginning of the nineteenth century interfered with the peaceful pursuance of any kind of ecclesiastical study. After peace had returned, the study of Sacred Scripture flourished more lustily than ever. In three respects, the modern commentary surpasses that of any past age: First, the interpreter attends in our times not merely to the immediate context of a phrase or a verse, but to the whole literary form of the book, and to the purpose for which it was written; secondly, he is assisted by a most abundant wealth of historical information practically unknown in former days; thirdly, the philology of the sacred tongues has been highly cultivated during the last century, and its rich results are laid under contribution by the modern commentator. It would lead us too far here were we to rehearse the history of all the recent excavations and discoveries, the contents of the various tablets, papyri, and ostraka, the results of literary criticism, archæology, and history of religion; it must suffice to say that the modern commentator can leave none of these various sources of information unnoticed in so far as they bear on his special subject of investigation. It would be invidious to mention only some names of modern scholars, excluding others; still, they cannot all be enumerated. We may draw attention, however, to the French series of commentaries entitled "La Sainte Bible avec Commentaires"; the Latin "Cursus" published by Fathers Cornely, Knabenbauer, and von Hummelauer; the "Revue biblique" published by the Dominican Fathers; the "Biblische Zeitschrift"; the "Biblische Studien"; and the "Dictionnaire de la Bible". While the two series of commentaries offer the main points of information on each particular book of the Bible, as far as it could be ascertained at the time of their respective publication, the periodicals keep the reader informed concerning any new investigation or result worth knowing.

(b) Protestant Exegetes

It will be found convenient to divide Protestant exegesis into three periods. The first embraces the age of the so-called Reformers, 1517-1600; the second reaches down to the beginning of rationalism, 1600-1750; the third embraces the subsequent time.

Early Reformers.

The early Reformers did not introduce any new principles of interpretation. They may speak, at times, as if they admitted only the literal sense, but Melancthon and Flacius Illyricus insist also on the importance of the allegorical. Their teaching concerning the multiplicity of the literal sense finds practical expression in their interpretation. The principle of free inquiry is claimed by the Reformers themselves, but neither theoretically nor practically granted to their followers. Both Luther's (d. 1546) and Calvin's (d. 1564) principles rest in the end on subjective considerations.

From the Reformers to the Rationalists.

In order to secure some unity of interpretation, the first followers of the Reformers introduced the "analogy of faith" as the supreme hermeneutic rule. But since they claimed that Scripture was their rule of faith, they experienced difficulty in properly applying their canon of hermeneutics. Finally, they were forced to regard the contents of their symbols as first principles which needed no proof. But the writers of this period produced some noteworthy treatises on Biblical antiquities. Thus Lightfoot (d. 1675) and Schöttgen (d. 1751) illustrated New Testament questions from rabbinic sources; Reland (d. 1718) wrote on sacred geography; Bochart (d. 1667), on natural history; the two Buxtorfs, father (d. 1629) and son (d. 1664), Goodwin (d. 1665), and Spencer (d. 1695) investigated certain civil and religious questions of the Jews. Among those who explained the sacred text, the following are worthy of mention: Drusius (d. 1616), de Dieu (d. 1642), Grotius (d. 1645), Vitringa (d. 1722), Cocceius (Koch, d. 1669), and Clericus (d. 1736). Brian Walton (d. 1658) is celebrated for the edition of the London Polyglot, which easily surpasses all previous works of the same kind. The "Critici sacri" (London, 1660; Frankfort, 1696; Amsterdam, 1698), collected by John and Richard Pearsons, and the "Synopsis criticorum" (London, 1669; Frankfort, 1709), edited by Matt. Polus, may be regarded as fairly good summaries of the exegetical work of the seventeenth century.

After the Rise of Rationalism. The Arminians, Socinians, the English Deists, and the French Encyclopedists refused to be bound by the "analogy of faith" as their supreme hermeneutic rule. They followed the principle of private judgment to its last consequences. The first to adhere to the principle of Biblical rationalism was Semler (d. 1791), who denied the Divine character of the Old Testament, and explained away the New by his "system of accommodation", according to which Christ and the Apostles only conformed to the views of the Jews. To discover the true teaching of Christ, we must first eliminate the Jewish doctrines, which may be learned from the books of Josephus, Philo, and other Jewish writers. -- Kant (d. 1804) destroyed the small remnant of supernatural revelation by his system of "authentic interpretation"; we must not seek to find what the Biblical writers said, but what they should have said in order to remain within the range of the natural Kantian religion. -- But this did violence to the historical character of the Biblical records; H. E. G. Paulus (d. 1851) apparently does justice to the historicity of the Bible, but removes from it all miracles by means of his "notiologico-philological" or "psychological" system of interpretation. He distinguishes between the fact or the occurrence to which the witnesses testify, and the judgment of the fact or the particular view which the witnesses took of the occurrence. In the New Testament, e.g., we have a record of the views of the Disciples concerning the events in Christ's life. -- This explanation left too much of Christ's history and doctrine intact. Hence David F. Strauss (d. 1875) applied to the New Testament the system of Biblical

mythicisim, which Semler, Eichhorn, Vater, and de Wette had employed in their explanation of part of the Old Testament; about thirty years after its first appearance, Strauss's system was popularized by E. Renan. A great many Protestant commentators now began to grant the existence of myths in the Sacred Scriptures, though they might adhere to the general outlines of the Jewish and the Gospel history. The principles which are at least implicitly maintained by the mythicists, are the following: First, miracles and prophecies are impossible; secondly, our religious sources are not really historical; thirdly, the history and religion of all nations begin with myths, the Christian religion not excluded; fourthly, the Messianic idea of the New Testament was adopted from the Old, and all the traditional traits of the Messiah were attributed to Jesus of Nazareth by a really myth-forming process. -- But as it was hard to explain the growth of this whole Christian mythology within the narrow space of forty or fifty years, Ferd. Christ. Baur (d. 1860) reconstructed the origin of the Christian Church, making it a compromise between judaizing and universalistic Christians, or between the Petrine and the Pauline parties. Only Rom., I and II Cor., Gal. are authentic; the other books of the New Testament were written during or after the amalgamation of the two parties, which occurred in the second century. The adherents of this opinion form the New Tübingen or the Critical School. -- It is true that Baur's theory of the late origin of the New Testament has been abandoned by the great majority of Protestant commentators who have ranked themselves among the followers of Harnack; but the opinion that the Sacred Books of the New Testament lack historicity in its true sense, is more common than ever.

In the light of this fact, we have to distinguish between the various classes of exegetical works in order to give a true estimate of the value possessed by the numberless recent Protestant contributions to Biblical literature: their philological and historical studies are, as a general rule, of great assistance to the commentator; the same must be said of their work done in textual criticism; but their commentaries are not sound enough to elicit commendation. Some of them adhere professedly to the principles of the most advanced criticism; others belong to the ranks of the conservatives; others again are more concerned with grammatical and philological than theological questions; others, finally, try to do the impossible by combining the conservative with the advanced critical principles.

When we are asked what attitude the Catholic reader ought to maintain with regard to these numerous Protestant commentaries, we answer in the words of Leo XIII, found in the Encyclical "Providentissimus Deus": "Though the studies of non-Catholics, used with prudence, may sometimes be of use to the Catholic student, he should, nevertheless, bear well in mind -- as the Fathers also teach in numerous passages -- that the sense of Holy Scripture can nowhere be found incorrupt outside of the Church,

and cannot be expected to be found in writers who, being without the true faith, only gnaw the bark of the Sacred Scripture, and never attain its pith."

MANGENOT in Vig., *Dict. de la Bible*, s. v. *Herméneutique*; SCHANZ in *Kirchenlex.*, s. v. *Exeqese*; ZAPLETAL, *Hermeneutica Bibl.* (Freiburg, 1897); DÖLLER, *Compendium herm. bibl.* (Paderborn, 1898); CHAUVIN, *Leçons d'introduction générale, théologique, historique et critique aux divines Ecritures* (Paris, 1898); SENEPIN, *De divinis scripturis earumque interpretatione brevis institutio* (Lyons and Paris, 1893); LESAR, *Compendium hermeneuticum* (Laybach, 1891); CORNELY, *Introductio in Libros Sacros* (Paris, 1885 and 1894), I. Nearly every work on hermeneutics will give a more or less complete list of recent literature. As to the Latin Fathers and writers, the reader may consult MIGNE, P.L., CCXIX, 79-84. V; and somewhat later, JEAN GERSON, *Propositiones de sensu literali Scriptur sacr in Opera* (Paris, 1606), I, p. 515. After the rise of the Reformation: PAGNINO, *Isagoges seu introductionis ad sacras scripturas liber unus* (Lyons, 1528, 1536); SIXTUS SENENSIS, *Bibliotheca sancta* (Venice, 1566); the reader will find a number of works belonging to this period in MIGNE, *Scriptur. Sacr. Cursus Completus*. Among Protestant works we may notice: BRIGGS, *General Introduction to the Study of Holy Scriptures* (New York, 1899); FAIRBAIRN, *Hermeneutical Manual* (Edinburgh, 1858); TERRY, *Biblical Hermeneutics* (New York, 1883); DAVIDSON, *Sacred Hermeneutics* (Edinburgh, 1844).

A.J. MAAS

Exemption

Exemption

Exemption is the whole or partial release of an ecclesiastical person, corporation, or institution from the authority of the ecclesiastical superior next higher in rank, and the placing of the person or body thus released under the control of the authority next above the former superior, or under a still higher one, or under the highest authority of all, the pope. Originally, according to canon law, all the subjects of a diocese, and all diocesan institutions, were under the authority of the bishop. On account of the oppressive manner in which bishops at times treated the monasteries, these were soon

taken under the protection of synods, princes, and popes. The papal protection often developed later into exemption from episcopal authority. The first privilege of this kind was given by Pope Honorius I, in 628, to the old Irish monastery of Bobbio, in Upper Italy (Jaffé, *Regesta Pont. Rom.*, no. 2017). Since the eleventh century, papal activity in the matter of reforms has been a frequent source or occasion of exemptions; in this way the monks became more closely bound to the popes, as against the bishops, many of whom were often inimical to the papal power. It thus came to pass that not only individual monasteries, but also entire orders, obtained exemption from the authority of the local ordinary. Moreover, from the reign of Urban II, the broadly general "protection" of the Holy See (*libertas Romana*), which many monasteries enjoyed, came to be regarded as exemption from the authority of the bishop. From the twelfth century, it may be said the exemption of orders and monasteries became the rule. Exemptions were also granted to cathedral chapters, collegiate chapters, parishes, communities, ecclesiastical institutions, and single individuals. Under these circumstances the diocesan administration of the bishops was frequently crippled (Trent, Sess. XXIV, De ref. c. xi); consequently the bishops complained of such exemptions, while, on the other hand, the parties exempted were wont to accuse the bishops of violating acquired privileges. The Council of Trent sought to correct the abuses of exemption by placing the exempt, in many regards, under the ordinary jurisdiction of the bishops, or at least under the bishops as papal delegates. This provision of the council was never fully executed, owing to the frequent opposition of the monasteries. About the beginning of the nineteenth century, however, many monasteries were suppressed by the process known as secularization, in part accepted by the Holy See. In some countries more recent civil legislation does not permit exemption.

Exemption, as a rule, arises when the privilege is granted by competent authority (*exemptio dativa*). It can also rest on immemorial use (*exemptio pr scriptiva*). Finally exemption can be original (*exemptio nativa*), when the respective church or monastery has always been free and distinct from the later diocesan organization. The claimant of exemption must prove the fact.

Exemption ceases by the complete or partial withdrawal of the privilege by the giver, by customary exercise of a contrary usage, or by extinction of the rightful subject of the privilege.

Another kind of exemption applies to bishops, when released from the authority of the metropolitan, either at their own request or as a gracious act on the part of the Apostolic See, under whose direct control they are then placed. However, to prevent injury to the Church, the bishops, thus made independent of their proper metropolitans, are obliged to attend the synods of the province for which they have opted. Bishops who had not connected themselves with an provincial synod were summoned, by Be-

nedict XII, to attend the Roman one of 1725. Exemption also frequently occurs in connexion with the system of military chaplaincies. In Austria, since 1720, the "Feld-bischof" (army bishop), nominated by the emperor, is exempt. In Prussia, since 1868, the "Feldprovost" or army provost, is appointed by the pope after nomination by the German emperor. In France military chaplains who serve permanent garrisons remote from a parish church are exempt. In Spain and elsewhere *vicarii castrenses generales*, i.e. army vicars-general, are appointed.

As applied to monasteries and churches, exemption is known as *passiva* or *activa*. In the former case the jurisdiction of the monastic or ecclesiastical prelate is confined to the ecclesiastics and laity belonging to his monastery or church. On the other hand, prelates health, he began a tour of his diocese to collect, and succeeded in raising some hundreds of thousands of dollars in a few years, so that when he died (May, 1886) the new cathedral was almost completed without any debt encumbering it. It was during his episcopate that the French Canadian Catholics began to come to the diocese in considerable numbers, first to Woonsocket and then to the various mill towns along the little streams of the Blackstone and the Pawtuxet, and above all to Fall River. The bishop, engrossed with other things, did not realize apparently the magnitude of the problem, and his attempts to deal with it were not infrequently a cause of anxiety and pain to himself and others.

Rt. Rev. Matthew Harkins succeeded Bishop Hendricken after an interval of eleven months. Born in Boston 17 Nov., 1845, educated at the Boston Latin School, Holy Cross College, and Douai College in France, he made his theological studies at Saint Sulpice (Paris), where he was ordained in 1869. The Vatican Council took place while he was continuing his studies in Rome. Made pastor of Arlington in 1876, he was transferred to St. James' parish, Boston, in 1884, in succession to Bishop Healy of Portland and Archbishop Williams of Boston, its former pastors. On the 14 April, 1887, Bishop Harkins was consecrated in the new (uncompleted) Cathedral of Sts. Peter and Paul in Providence which had first been opened a year before for the obsequies of his predecessor. A man of wide reading, acute mind, and judicial temperament, a lover of order and method, he has devoted himself to the task of organizing his diocese. He has particularly made his own the diocesan charities. The orphan asylum begun in 1851, transferred in 1862, had always obtained a precarious income from fairs and donations, and for these he substituted parochial assessments. Through the generosity of Joseph Banigan the Home for the Aged in Pawtucket was built in 1881. Mr. Banigan also built the large St. Maria Working Girls' Home in Providence in 1894 at a cost of \$80,000, and either gave in his lifetime or left by will (1897) sums of \$25,000 or more to nearly every diocesan charity. St. Joseph's Hospital was begun in 1891 and the St. Vincent de Paul Infant Asylum in the following year; the Working

Boys' Home began in 1897, the House of the Good Shepherd in 1904, Nazareth Home (a day-nursery, that also supplies nurses in the homes of the poor) in 1906. In Woonsocket and Newport and other parts of the diocese similar charitable institutions have been erected at the suggestion and advice of Bishop Harkins. Almost twenty parishes out of a total of seventy-nine are exclusively French Canadian, while there are a few small parishes of mixed French and English-speaking Catholics. In the last fifteen years (1911) the Italians have come to Providence and the vicinity in large numbers, so that now there are perhaps between thirty and forty thousand of them in the diocese. Two churches for the Italians were dedicated in Providence in 1910 and other smaller parishes provide for their needs in the outlying districts. The four colonies of Poles have four Polish parishes, while the Portuguese have one in Providence. One Syrian parish in Central Falls ministers to some of the Orientals in these parts.

Parochial schools are established in the greater number of the English-speaking parishes of the cities. Thus out of seventeen English-speaking parishes in Providence, nine have large and well-equipped schools; of the four in Pawtucket, three have schools; the three parishes in Newport have schools. The others are either very small or heavily in debt or unable to procure suitable teachers. Among the French Canadians, with whom the church school is a patriotic as well as a religious institution, it is rare to find a parish without its school. Religious women are usually the teachers (in ten schools, the Sisters of Mercy); in only three are there Brothers for the larger boys. La Salle Academy, a diocesan High School of which the bishop is president, obtained a university charter from the state (1910). The teachers are diocesan priests (for the classics) and Christian Brothers. It is conveniently situated in Providence. One day high school (St. Francis Xavier's Academy) and two boarding schools (Bayview Sisters of Mercy, and Elmhurst, Religious of the Sacred Heart) provide similar training for the girls. In all there are some eighteen thousand children receiving Catholic training in the diocese.

A diocesan weekly paper, the "Providence Visitor", sanctioned by the bishop and edited by diocesan priests, has a considerable influence among the Catholics of the state. The Catholic Club for men, established in 1909, has its own home in Providence and a large and influential membership. The Catholic Woman's Club, established in 1901, has a membership of four hundred and is noted for considerable literary and social activity. Although in a numerical majority, Catholics do not exert any perceptible influence on public life. They receive their share of elective offices, the last two governors, the one a democrat, the other a republican, being Catholics. Frequently the mayors and other city officials are Catholics. There has, however, never been a Catholic judge of a superior court.

The clergy until recently was nearly exclusively diocesan. From 1878 to 1899 the Jesuits had St. Joseph's parish in Providence, but left there, as there was no prospect

of opening a college. Now various small communities of men have parishes in outlying districts, Westerly (1905, Marist Fathers), Portsmouth (1907, Congregation of the Holy Ghost), Natick (1899, Sacred Heart Fathers); in 1910 the Dominicans began a new parish between Pawtucket and Providence. The Catholic population of the diocese, approximately from 250,000 to 275,000, live for the most part in the densely inhabited Providence County, only eighteen parishes, and several of them very small, existing in the four other counties of the state, while there are sixty-one in Providence county.

History of the Catholic Church in New England: Diocese of Providence, I; Chancery Records.

AUSTIN DOWLING

Exequatur

Exequatur

(Synonymous with REGIUM PLACET)

Exequatur, as the Jansenist Van Espen defines it, is a faculty which civil rulers impart to a Bull, papal Brief, or other ecclesiastical enactment in order to give it binding force in their respective territories. This faculty is conceded after ecclesiastical laws have been examined and found not derogatory to any right of the civil power and, therefore, suitable for promulgation. Modern statesmen draw a distinction between the Exequatur and the Regium Placet. The latter, according to them, is given to episcopal acts or acts of any other ecclesiastical superior belonging to the nation for which they are approved; while the former is conceded to enactments of a foreign power, that is, to papal Constitutions; the pope, as head of the whole Church, being formally considered as an authority not belonging to any particular country. In both cases, however, state authorities have the power of examining church laws and giving permission for their promulgation, by which permission ecclesiastical decrees acquire legal value and binding force.

As to the origin of this supposed right of the State over the Church, it is now beyond doubt, contrary to the assertions of Gallicans and Jansenists, that no trace of it can be found in the early centuries of the Church, or even as late as the fourteenth century. It is true that during all that period of time General Councils, like those of Nicæa and Ephesus, requisitioned the sanction of State authorities for ecclesiastical laws; it was not, however, juridical, but only physical, force that was then invoked for ecclesiastical decrees, in order to enforce their execution by the secular arm. Moreover, had such a power in the State been at that time known, rulers of nations who were sometimes anxious to prevent the promulgation and execution of papal Constitutions in their domains would have readily appealed to it, instead of resorting to more difficult and

troublesome means, in order to impede in every possible way papal letters from ever being introduced into their dominions, e. g. in the conflicts of Philip the Fair of France with Boniface VIII, and of Henry II of England with Alexander III. The *Regium Placet* really dates from the great Western Schism, which lasted from the pontificate of Urban VI to the Council of Constance and the election of Martin V (1378-1417). In order to guard against spurious papal letters issued by antipopes during the schism, Urban VI granted to some ecclesiastical superiors the faculty of examining papal Constitutions and ascertaining their authenticity before promulgation and execution. Civil authorities felt bound to adopt the same precautionary measure, though they did not attribute such a power to themselves as a right attached to their office; apparently its use was discontinued when, after the schism, Martin V condemned the *Regium Placet* in his Constitution "*Quod antidota*" (1418). In the fifteenth century, however, it was revived in Portugal by King John II and claimed by him as a right inherent in the crown. In the sixteenth century the Viceroy of Naples, the Duke of Alcalá, made it obligatory by law, and in the seventeenth century it was introduced into France in order to preserve the so-called Gallican Liberties, and afterwards into Spain, Belgium, Sicily, Naples, and other countries.

In theory this supposed right of the State was first propounded and defended as a true doctrine by Luther, Pasquier Quesnel, and other heretics who denied the supreme jurisdiction of the pope; later on it was advocated by Gallicans and Jansenists, e. g. Van Espen, Febronius, De Marca, and Stockmans, who attributed this power to the State as a necessary means of self-defence against possible attempts of the Church to injure the rights of civil society. More recently it has been defended with particular vigour by Italian jurists and statesmen, e. g. Cavallari, Mancini, Piola, apropos particularly of the "*Law of Guarantees*" passed in 1871 by the Italian Government in favour of the Holy See. However, not only is it historically erroneous, as shown above, that such a right has been exercised from time immemorial, but it is also juridically false that such power naturally belongs to the State, particularly as a necessary means of self-defence. The injustice of that claim and the consequent usurpation of authority by the State appear manifest in the light of Catholic faith. If the binding force of church laws depended on the approval and consent of the State, it would no longer be true that the Church received legislative power directly from her Divine Founder, and that whatever is bound or loosed by the Church on earth, will be bound or loosed in heaven (Matt., xvi, 19). Again, the Church would, in that case, immediately cease to be a supreme, self-sufficient, and perfect society, and would be deprived of her characteristics of unity, sanctity, catholicity, and apostolicity. Moreover, the use of the *Exequatur* to prevent possible usurpation of rights is contrary not only to Divine law but also to natural social law and is, therefore, an abuse of power, even if exercised by a

State not professing the Catholic religion. A possible conflict of rights of two societies and the fear of a consequent injury to their respective jurisdiction do not entitle one of them to impede the free exercise of its ordinary jurisdiction by the other. Differences, if they arise, may be settled by private mutual understanding or arbitration. It is needless to say that the fear of any usurpation or conflict on the part of the Church is unfounded, as appears from her doctrine and history.

The Church, as a matter of fact, never claimed the power of revising and approving civil laws before promulgation, although, indeed, past experience would justify her in fearing on the part of the State usurpation of her powers. She contents herself with condemning civil laws after promulgation, if they are injurious to Catholic interests. We need not wonder, then, that the Church has always condemned the doctrine and use of the *Regium Placet*. Boniface IX first condemned it in his Constitution "*Intenta Salutis*" and after him a great number of pontiffs, down to Pius IX in Propositions 28 and 29 of the *Syllabus "Quanta Cura"* and in the Allocution "*Luctuosis Exagitati*" (12 March, 1877), also the Vatican Council in the Constitution "*De Ecclesiâ Christi*". To avert animosities and persecution, the Church has made minor concessions in favour of the State as to the exercise of the *Regium Placet*. In some other instances she has tolerated its acknowledgment by ecclesiastics, particularly to enable them to take possession of benefices and other temporalities. At present the *Exequatur*, or *Regium Placet*, is seldom, if ever, used, at least in its fullness, by modern civil rulers. In the Kingdom of the Two Sicilies it was abolished by the Concordat of 1818, and in Austria by that of 1855. It must likewise be regarded as abolished in Spain, France, Portugal, and Hungary. According to Aichner, it exists still, but in a mitigated form, in Saxony, Bavaria, and some parts of Switzerland. In Italy the strict *Exequatur*, i. e. previous to promulgation of papal Constitutions, is not in use, but it is retained in a mild form for the possession of ecclesiastical benefices. According to the "*Law of Guarantees*" (13 July, 1871), ecclesiastics who have been provided with benefices must present the Bull of their appointment to the State authorities; after approval the latter concede the *Exequatur* and put the incumbents of benefices in possession of the temporalities hitherto controlled by the government. In this form the *Exequatur* is at present tolerated by the Church, though it is not devoid of inconveniences, as Leo XIII complained in a letter written to his Secretary of State Cardinal Nina (27 August, 1878).

S. LUZIO

Exeter

Ancient Diocese of Exeter

(EXONIA, ISCA DAMNONIORUM, CAER WISE, EXANCEASTER; EXONIENSIS).

English see, chosen by Leofric, Bishop of Crediton, as his cathedral city in 1050. Originally Devonshire formed part of the Diocese of Wessex. About 703 Devonshire and Cornwall became the separate Bishopric of Sherborne and in 900 this was divided into two, the Devonshire bishop having his cathedral at Crediton. The two dioceses were again united when Leofric became first Bishop of Exeter. The present cathedral was begun by Bishop William de Warelhurst in 1112; the abbey church of St. Mary and St. Peter, founded by Athelstan in 932 and rebuilt in 1019, serving till then as the cathedral church. The transept towers built by Warelhurst still remain, being the only part of the Norman cathedral existing. This Norman building was completed by Bishop Marshall at the close of the twelfth century. The cathedral as it now stands is in the decorated style, being begun by Bishop Quivil (1280-1291), continued by Bytton and Stapeldon, and completed by the great Bishop Grandisson during his long pontificate of forty-two years, who left it much as it now stands. In many respects it resembles the French cathedrals rather than those of England. The special features of the cathedral are the transeptal towers and the choir. The latter contains much early stained-glass and a magnificent episcopal throne, and is separated from the nave by a choir-screen of singular beauty (1324). The absence of a central tower and a general lack of elevation prevent the building from ranking among the greatest English cathedrals, though the stately west front is alone sufficient to render it remarkable.

The bishops of Exeter always enjoyed considerable independence and the see was one of the largest and richest in England. "The Bishop of Exeter," writes Professor Freeman, "like the Archbishop of York was the spiritual head of a separate people." The remoteness of the see from London prevented it from being bestowed on statesmen or courtiers, so that the roll of bishops is more distinguished for scholars and administrators than for men who played a large part in national affairs. This was fortunate for the diocese and gave it a long line of excellent bishops, one of whom, Edmund Lacy, died with a reputation for sanctity and the working of miracles (1455). The result of this was seen in the fidelity with which Devonshire and Cornwall adhered to the Catholic Faith at the time of the Reformation. The following are the bishops with the dates of their accession:

- Leofric, 1046

- Osbern, 1072
- William Warelwast, 1107
- Robert Chichester, 1138
- Robert Warelwast, 1155
- Bartholomew Iscanus, 1161
- John the Chaunter, 1186
- *Vacancy* 1191
- Henry Marshall, 1194
- *Vacancy* 1206
- Simon de Apulia, 1214
- William Bruere, 1224
- Richard Blondy, 1245
- Walter Bronescombe, 1257
- Peter Quivil, 1280
- Thomas de Bytton, 1292
- Walter de Stapeldon, 1308
- James Berkeley, 1326
- John Grandisson, 1327
- Thomas Brantyngham, 1370
- Edmund Stafford, 1395
- John Ketterick, 1419
- Edmund Lacy, 1420
- George Neville, 1458
- John Bothe, 1465
- Peter Courtenay, 1478

- Richard Fox, 1487
- Oliver King, 1492
- Richard Redman, 1496
- John Arundell, 1502
- Hugh Oldham, 1504
- John Vesey, 1519
- *Vacancy* 1551
- James Turberville, 1555-1559

The diocese, originally very wealthy, was plundered during the reign of Henry VIII, when Bishop Vesey was forced to surrender fourteen out of twenty-two manors, and the value of the bishopric was reduced to a third. Vesey, though a Catholic at heart, held the see until 1551, when he was made to resign, and the Reformer, Miles Coverdale, was intruded into the see, where he made himself most unpopular. On the accession of Mary, in 1553, Vesey was restored. He died in 1554 and was succeeded by James Turberville, beloved by Catholics and Protestants alike. He was deprived of the see by Elizabeth in 1559 and died in prison, probably in or about 1570, the last Catholic Bishop of Exeter. The diocese contained four archdeaconries, Cornwall, Barnstaple, Exeter, and Totton, and six hundred and four parishes. There were Benedictine, Augustinian, Franciscan, Dominican, and Norbertine houses, and four Cistercian abbeys. The cathedral was dedicated to St. Peter, and the arms of the see were: *Gules, a sword in pale blade and hilt proper, two keys in saltire or.*

Exorcism

Exorcism

(See also DEMONOLOGY, DEMONIACS, EXORCIST, POSSESSION.)

Exorcism is (1) the act of driving out, or warding off, demons, or evil spirits, from persons, places, or things, which are believed to be possessed or infested by them, or are liable to become victims or instruments of their malice; (2) the means employed for this purpose, especially the solemn and authoritative adjuration of the demon, in the name of God, or any of the higher power in which he is subject.

The word, which is not itself biblical, is derived from *exorkizo*, which is used in the Septuagint ([Genesis 24:3](#) = cause to swear; III(I) Kings 22:16 = adjure), and in [Matthew 26:63](#), by the high priest to Christ, "I adjure thee by the living God. . ." The non-intensive *horkizo* and the noun *exorkistes* (exorcist) occur in [Acts 19:13](#), where the latter (in the plural) is applied to certain strolling Jews who professed to be able to cast out demons. Expulsion by adjuration is, therefore, the primary meaning of exorcism, and when, as in Christian usage, this adjuration is in the name of God or of Christ, exorcism is a strictly religious act or rite. But in ethnic religions, and even among the Jews from the time when there is evidence of its being vogue, exorcism as an act of religion is largely replaced by the use of mere magical and superstitious means, to which non-Catholic writers at the present day sometimes quite unfairly assimilate Christian exorcism. Superstition ought not to be confounded with religion, however much their history may be interwoven, nor magic, however white it may be, with a legitimate religious rite.

IN ETHNIC RELIGIONS

The use of protective means against the real, or supposed, molestations of evil spirits naturally follows from the belief in their existence, and is, and has been always, a feature of ethnic religions, savage and civilized. In this connection only two of the religions of antiquity, the Egyptian and Babylonian, call for notice; but it is no easy task, even in the case of these two, to isolate what bears strictly on our subject, from the mass of mere magic in which it is embedded. The Egyptians ascribed certain diseases

and various other evils to demons, and believed in the efficacy of magical charms and incantations for banishing or dispelling them. The dead more particularly needed to be well fortified with magic in order to be able to accomplish in safety their perilous journey to the underworld (*see* Budge, *Egyptian Magic*, London, 1899). But of exorcism, in the strict sense, there is hardly any trace in the Egyptian records.

In the famous case where a demon was expelled from the daughter of the Prince of Bekhten, human ministry was unavailing, and the god Khonsu himself had to be sent the whole way from Thebes for the purpose. The demon gracefully retired when confronted with the god, and was allowed by the latter to be treated at a grand banquet before departing "to his own place" (*op. cit.* p. 206 sq.).

Babylonian magic was largely bound up with medicine, certain diseases being attributed to some kind of demoniacal possession, and exorcism being considered easiest, if not the only, way of curing them (Sayce, *Hibbert Lect.* 1887, 310). For this purpose certain formulæ of adjuration were employed, in which some god or goddess, or some group of deities, was invoked to conjure away the evil one and repair the mischief he had caused. The following example (from Sayce, *op. cit.*, 441 seq.) may be quoted: "The (possessing) demon which seizes a man, the demon (ekimmu) which seizes a man; The (seizing) demon which works mischief, the evil demon, Conjure, O spirit of heaven; conjure, O spirit of earth." For further examples see King, *Babylonian Magic and Sorcery* (London, 1896).

AMONG THE JEWS

There is no instance in the Old Testament of demons being expelled by men. In Tobias 8:3, is the angel who "took the devil and bound him in the desert of upper Egypt"; and the instruction previously given to young Tobias (6:18-19), to roast the fish's heart in the bridal chamber, would seem to have been merely part of the angel's plan for concealing his own identity. But in extra-canonical Jewish literature there are incantations for exorcising demons, examples of which may be seen in Talmud (*Schabbath*, xiv, 3; *Aboda Zara*, xii, 2; *Sanhedrin*, x, 1). These were sometimes inscribed on the interior surface of earthen bowls, a collection of which (estimated to be from the seventh century A.D) is preserved in the Royal Museum in Berlin; and inscriptions from the collection have been published, translated by Wohlstein in the "*Zeitschrift für Assyriologie*" (December, 1893; April, 1894).

The chief characteristics of these Jewish exorcisms is their naming of names believed to be efficacious, i.e., names of good angels, which are used either alone or in combination with El (=God); indeed reliance on mere names had long before become a superstition with the Jews, and it was considered most important that the appropriate names, which varied for different times and occasions, should be used. It was this superstitious belief, no doubt, that prompted the sons of Sceva, who had witnessed St. Paul's success-

ful exorcisms in the name of Jesus, to try on their own account the formula, "I conjure you by Jesus whom Paul preacheth", with results disastrous to their credit ([Acts 19:13](#)). It was a popular Jewish belief, accepted even by a learned cosmopolitan like Josephus, that Solomon had received the power of expelling demons, and that he had composed and transmitted certain formulæ that were efficacious for that purpose. The Jewish historian records how a certain Eleazar, in the presence of the Emperor Vespasian and his officers, succeeded, by means of a magical ring applied to the nose of a possessed person, in drawing out the demon through the nostrils -- the virtue of the ring being due to the fact that it enclosed a certain rare root indicated in the formulæ of Solomon, and which it was exceedingly difficult to obtain (*Ant. Jud.*, VIII, ii, 5; cf. *Bell. Jud.* VII, vi, 3).

But superstition and magic apart, it is implied in Christ's answers to the Pharisees, who accused Him of casting out demons by the power of Beelzebub, that some Jews in His time successfully exorcised demons in God's name: "and if I by Beelzebub cast out devils, by whom do your children cast them out?" ([Matthew 12:27](#)). It does not seem reasonable to understand this reply as mere irony, or as a mere *argumentum ad hominem* implying no admission of the fact; all the more so, as elsewhere ([Mark 9:37-38](#)) we have an account of a person who was not a disciple casting out demons in Christ's name, and whose action Christ refused to reprehend or forbid.

EXORCISM IN THE NEW TESTAMENT

Assuming the reality of demoniac possession, for which the authority of Christ is pledged, it is to be observed that Jesus appealed to His power over demons as one of the recognised signs of Messiahship ([Matthew 12:23, 28](#); [Luke 11:20](#)). He cast out demons, He declared, by the finger or spirit of God, not, as His adversaries alleged, by collusion with the prince of demons ([Matthew 12:24, 27](#); [Mark 3:22](#); [Luke 11:15, 19](#)); and that He exercised no mere delegated power, but a personal authority that was properly His own, is clear from the direct and imperative way in which He commands the demon to depart ([Mark 9:24](#); cf. 1:25 etc.): "He cast out the spirits with his word, and he healed all that were sick" ([Matthew 8:16](#)). Sometimes, as with the daughter of the Canaanean woman, the exorcism took place from a distance ([Matthew 15:22](#) sqq.; [Mark 7:25](#)). Sometimes again the spirits expelled were allowed to express their recognition of Jesus as "the Holy One of God" ([Mark 1:24](#)) and to complain that He had come to torment them "before the time", i.e. the time of their punishment ([Matthew 8:29](#) sqq; [Luke 8:28](#) sqq.). If demoniac possession was generally accompanied by some disease, yet the two were not confounded by Christ, or the Evangelists. In [Luke 13:32](#), for example, the Master Himself expressly distinguishes between the expulsion of evil spirits and the curing of disease.

Christ also empowered the Apostles and Disciples to cast out demons in His name while He Himself was still on earth ([Matthew 10:1](#) and 8; [Mark 6:7](#); [Luke 9:1](#); 10:17), and to believers generally He promised the same power ([Mark 16:17](#)). But the efficacy of this delegated power was conditional, as we see from the fact that the Apostles themselves were not always successful in their exorcisms: certain kinds of spirits, as Christ explained, could only be cast out by prayer and fasting ([Matthew 17:15, 20](#); [Mark 9:27-28](#); [Luke 9:40](#)). In other words the success of exorcism by Christians, in Christ's name, is subject to the same general conditions on which both the efficacy of prayer and the use of charismatic power depend. Yet conspicuous success was promised ([Mark 16:17](#)). St. Paul ([Acts 16:18](#); 19:12), and, no doubt, the other Apostles and Disciples, made use of regularly, as occasion arose, of their exorcising power, and the Church has continued to do so uninterruptedly to the present day.

ECCLESIASTICAL EXORCISMS

Besides exorcism in the strictest sense -- i.e. for driving out demons from the possessed -- Catholic ritual, following early traditions, has retained various other exorcisms, and these also call for notice here.

(1) Exorcism of the possessed

We have it on the authority of all early writers who refer to the subject at all that in the first centuries not only the clergy, but lay Christians also were able by the power of Christ to deliver demoniacs or energumens, and their success was appealed to by the early Apologists as a strong argument for the Divinity of the Christian religion (Justin Martyr, *Apol.*, 6; P.G., VI, 453; *Dial.*, 30, 85; *ibid.*, 537, 676 sq; Minutius Felix, *Octav.*, 27, P.L., III; Origen, *Contra Celsum.*, I, 25; VII, 4, 67; P.G., XI, 705, 1425, 1516; Tertullian, *Apol.*, 22, 23; P.L., I, 404 sq; etc). As is clear from testimonies referred to, no magical or superstitious means were employed, but in those early centuries, as in later times, a simple and authoritative adjuration addressed to the demon in the name of God, and more especially in the name of Christ crucified, was the usual form of exorcism.

But sometimes in addition to words some symbolic action was employed, such as breathing (*insufflatio*), or laying of hands on the subject, or making the sign of cross. St. Justin speaks of demons flying from "the touch and breathing of Christians" (II *Apol.*, 6) as from a flame that burns them, adds St. Cyril of Jerusalem (*Cat.*, xx, 3, P.G., XXXIII, 1080). Origen mentions the laying of hands, and St. Ambrose (*Paulinus, Vit. Ambr.*, n. 28, 43, P.L., XIV, 36, 42), St. Ephraem Syrus (*Greg. Nyss., De Vit. Ephr.*, P.G., XLVI, 848) and others used this ceremony in exorcising. The sign of the cross, that briefest and simplest way of expressing one's faith in the Crucified and invoking His Divine power, is extolled by many Fathers for its efficacy against all kinds of demoniac molestation (*Lactantius, Inst.*, IV, 27, P.L., VI, 531 sq.; *Athanasius, De Incarn. Verbi.*,

n. 47, P.G., XXV, 180; Basil, In Isai., XI, 249, P.G., XXX, 557, Cyril of Jerusalem, Cat., XIII, 3 col. 773; Gregory Nazianzen, Carm. Adv. iram, v, 415 sq.; P.G., XXXVII, 842). The Fathers further recommend that the adjuration and accompanying prayers should be couched in the words of Holy Writ (Cyril of Jerus., Procat., n. 9, Col. 350; Athanasius, Ad Marcell., n. 33, P.G., XXVII, 45). The present rite of exorcism as given in the Roman Ritual fully agrees with patristic teaching and is a proof of the continuity of Catholic tradition in this matter.

(2) Baptismal exorcism

At an early age the practice was introduced into the Church of exorcising catechumens as a preparation for the Sacrament of Baptism. This did not imply that they were considered to be obsessed, like demoniacs, but merely that they were, in consequence of original sin (and of personal sins in case of adults), subject more or less to the power of the devil, whose "works" or "poms" they were called upon to renounce, and from whose dominion the grace of baptism was about to deliver them. Exorcism in this connection is a symbolical anticipation of one of the chief effects of the sacrament of regeneration; and since it was used in the case of children who had no personal sins, St. Augustine could appeal to it against the Pelagians as implying clearly the doctrine of original sin (Ep. cxciv, n. 46. P.L., XXXIII, 890; C. Jul. III, 8; P.L., XXXIV, 705, and elsewhere). St. Cyril of Jerusalem (Procat., 14, col. 355) gives a detailed description of baptismal exorcism, from which it appears that anointing with exorcised oil formed a part of this exorcism in the East. The only early Western witness which treats unction as part of the baptismal exorcism is that of the Arabic Canons of Hippolytus (n. 19, 29). The *Exsufflatio*, or out-breathing of the demon by the candidate, which was sometimes part of the ceremony, symbolized the renunciation of his works and poms, while the *Insufflatio*, or in-breathing of the Holy Ghost, by ministers and assistants, symbolised the infusion of sanctifying grace by the sacrament. Most of these ancient ceremonies have been retained by the Church to this day in her rite for solemn baptism.

(3) Other Exorcisms

According to Catholic belief demons or fallen angels retain their natural power, as intelligent beings, of acting on the material universe, and using material objects and directing material forces for their own wicked ends; and this power, which is in itself limited, and is subject, of course, to the control of Divine providence, is believed to have been allowed a wider scope for its activity in the consequence of the sin of mankind. Hence places and things as well as persons are naturally liable to diabolical infestation, within limits permitted by God, and exorcism in regard to them is nothing more than a prayer to God, in the name of His Church, to restrain this diabolical power supernaturally, and a profession of faith in His willingness to do so on behalf of His servants on earth.

The chief things formally exorcised in blessing are water, salt, oil, and these in turn are used in personal exorcisms, and in blessing or consecrating places (e.g. churches) and objects (e.g. altars, sacred vessels, church bells) connected with public worship, or intended for private devotion. Holy water, the sacramental with which the ordinary faithful are most familiar, is a mixture of exorcised water and exorcised salt; and in the prayer of blessing, God is besought to endow these material elements with a supernatural power of protecting those who use them with faith against all the attacks of the devil. This kind of indirect exorcism by means of exorcised objects is an extension of the original idea; but it introduces no new principle, and it has been used in the Church from the earliest ages. (*See also* EXORCIST.)

P.J. TONER

Exorcist

Exorcist

(*See also* DEMONOLOGY, DEMONIACS, EXORCISM, POSSESSION.)

(1) In general, any one who exorcises or professes to exorcise demons (cf. [Acts 19:13](#)); (2) in particular, one ordained by a bishop for this office, ordination to which is the second of the four minor orders of the Western Church.

The practice of exorcism was not confined to clerics in the early ages, as is clear from Tertullian (*Apologet.*, 23, P.L., I, 410; cf. *De Idolat.*, 11) and Origen (*C. Celsum*, VII, 4, P.G. 1425). The latter expressly states that even the simplest and rudest of the faithful sometimes cast out demons, by a mere prayer or adjuration ([Mark 15:17](#)), and urges the fact as a proof of the power of Christ's grace, and the inability of demons to resist it. In the Eastern Church, a specially ordained order of exorcists (or of acolytes, or door-keepers) has never been established but in the Western Church, these three minor orders with that of lectors as a fourth) were instituted shortly before the middle of the third century. Pope Cornelius (261-252) mentions in his letter to Fabius that there were then in the Roman Church forty-two acolytes, and fifty-two exorcists, readers, and door-keepers (Eusebius, *Hist. Eccl.*, VI, xliii, P.G., XX, 621), and the institution of these orders, and the organization of their functions, seems to have been the work of Cornelius's predecessor, Pope Fabian (236-251).

The fourth Council of Carthage (398), in its seventh canon, prescribes the rite of ordination for exorcist; the bishop is to give him the book containing the formulae of exorcism, saying, "Receive, and commit to memory, and possess the power of imposing hands on energumens, whether baptized or catechumens"; and the same rite has been retained, without change, in the Roman Pontifical down to the present day, except that instead of the ancient Book of Exorcisms, the Pontifical, or Missal, is put into the

hands of the ordained. From this form it is clear that one of the chief duties of exorcists was to take part in baptismal exorcism. That catechumens were exorcised every day, for some time before baptism, may be inferred from canon of the same council, which prescribed the daily imposition of hands by the exorcists. A further duty is prescribed in canon 92, viz: to supply food to, and in a general way to care for, energumens who habitually frequented the Church. There is no mention of pagan energumens, for the obvious reason that the official ministrations of the Church were not intended for them. But even after the institution of this order, exorcism was not forbidden to the laity, much less to the higher clergy, nor did those who exorcised always use the forms contained in the Book of Exorcisms. Thus the Apostolic Constitutions (VIII, 26; P.G., I, 1122) say expressly that "the exorcist is not ordained", i.e. for the special office of exorcist, but that if anyone possess the charismatic power, he is to be recognized, and if need be, ordained deacon or subdeacon. This is the practice which has survived in the Eastern Orthodox Church.

As an example of the discretion allowed in the West, in the use of the means of exorcising, we may refer to what Sulpitius Severus relates of St. Martin of Tours (*Dial.*, III (II), 6; P.L., XX, 215), that he was in the habit of casting out demons by prayer alone without having recourse to the imposition of hands or the formulae usually employed by the clergy. After a time, as conditions changed in the Church, the office of exorcist, as an independent office, ceased altogether, and was taken over by clerics in major orders, just as the original functions of deacons and subdeacons have with the lapse of time passed to a great extent into the hands of priests; and according to the present discipline of the Catholic Church, it is only priests who are authorized to use the exorcising power conferred by ordination. The change is due to the facts that the catechumenate, with which the office of exorcist was chiefly connected, has ceased, that infant baptism has become the rule, and that with the spread of Christianity and the disappearance of paganism, demonic power has been curtailed, and cases of obsession have become much rarer. It is only Catholic missionaries labouring in pagan lands, where Christianity is not yet dominant, who are likely to meet with fairly frequent cases of possession.

In Christian countries authentic cases of possession sometimes occur and every priest, especially if he be a parish priest, or pastor, is liable to be called upon to perform his duty as exorcist. In doing so, he is to be mindful of the prescriptions of the Roman Ritual and of the laws of provincial or diocesan synods, which for most part require that the bishop should be consulted and his authorization obtained before exorcism

is attempted. The chief points of importance in the instructions of the Roman Ritual, prefixed to the rite itself, are as follows:

- Possession is not lightly to be taken for granted. Each case is to be carefully examined and great caution to be used in distinguishing genuine possession from certain forms of disease.
- The priest who undertakes the office should be himself a holy man, of a blameless life, intelligent, courageous, humble, and he should prepare for the work by special acts of devotion and mortification, particularly by prayer and a fasting ([Matthew 17:20](#)).
- He should avoid in the a course of the rite everything that savours of superstition, and should leave the medical aspects of the case to qualified physicians.
- He should admonish the possessed, in so far as the latter is capable, to dispose himself for the exorcism by prayer, fasting, confession, and communion, and while the rite is in progress to excite within himself a lively faith in God's goodness, and a patient resignation to His holy will.
- The exorcism should take place in the Church or some other sacred place, if convenient; but if on account of sickness or for other legitimate reasons, it takes place in a private house, witnesses (preferably members of the family) should be present: this is specially enjoined, as a measure of precaution, in case the subject is a woman.
- All idle and curious questioning of the demon should be avoided, and the prayers and aspirations should be read with great faith, humility, and fervour, and with a consciousness of power and authority.
- The Blessed Sacrament is not to be brought near the body of the obsessed during exorcism for fear of possible irreverence; but the crucifix, holy water, and, where available, relics of the saints are to be employed.
- If expulsion of the evil spirit is not obtained at once, the rite should be repeated, if need be, several times.
- The exorcist should be vested in surplice, and violet stole.

Feast of the Expectation of the Blessed Virgin

Feast of the Expectation of the Blessed Virgin Mary

(*Exspectatio Partus B.V.M.*)

Celebrated on 18 December by nearly the entire Latin Church. Owing to the ancient law of the Church prohibiting the celebration of feasts during Lent (a law still in vigour at Milan), the Spanish Church transferred the feast of the Annunciation from 25 March to the season of Advent, the Tenth Council of Toledo (656) assigning it definitely to 18 December. It was kept with a solemn octave. When the Latin Church ceased to observe the ancient custom regarding feasts in Lent, the Annunciation came to be celebrated twice in Spain, viz. 25 March and 18 December, in the calendars of both the Mozarabic and the Roman Rite (*Missale Gothicum*, ed. Migne, pp. 170, 734). The feast of 18 December was commonly called, even in the liturgical books, "S. Maria de la O", because on that day the clerics in the choir after Vespers used to utter a loud and protracted "O", to express the longing of the universe for the coming of the Redeemer (Tamayo, *Mart. Hisp.*, VI, 485). The Roman "O" antiphons have nothing to do with this term, because they are unknown in the Mozarabic Rite. This feast and its octave were very popular in Spain, where the people still call it "Nuestra Señora de la O". It is not known at what time the term *Exspectatio Partus* first appeared; it is not found in the Mozarabic liturgical books. St. Ildephonsus cannot, therefore, have invented it, as some have maintained. The feast was always kept in Spain and was approved for Toledo in 1573 by Gregory XIII as a double major, without an octave. The church of Toledo has the privilege (approved 29 April 1634) of celebrating this feast even when it occurs on the fourth Sunday of Advent. The "Exspectatio Partus" spread from Spain to other countries; in 1695 it was granted to Venice and Toulouse, in 1702 to the Cistercians, in 1713 to Tuscany, in 1725 to the Papal States. The Office in the Mozarabic Breviary is exceedingly beautiful; it assigns special antiphons for every day of the octave. At Milan the feast of the Annunciation is, even to the present, kept on the last Sunday before Christmas. The Mozarabic Liturgy also celebrates a feast called the Expectation (or Advent) of St. John the Baptist on the Sunday preceding 24 June.

F.G. HOLWECK

Expectative

Expectative

(From the Lat. *expectare*, to expect or wait for.)

An expectative, or an expectative grace, is the anticipatory grant of an ecclesiastical benefice, not vacant at the moment but which will become so, regularly, on the death of its present incumbent. In 1179 the Third Lateran Council, renewing a prohibition already in existence for a long time, forbade such promises or gifts. This prohibition was further extended by Boniface VIII. Nevertheless, during the Middle Ages expectative graces were customarily conferred upon applicants to canonical prebends in the cathedral and collegiate chapters. This fact was due to toleration by the Holy See, which even accorded to the chapters the right of nominating four canons in the way of expectative graces (cc. ii, viii, *De concessione prebendæ*, X, III, viii; c. ii, *De concessione prebendæ*, in V1, III, vii; Constitution of Alexander IV, "Execrabilis", 1254). Several chapters preferred to renounce this right; others continued to employ expectatives even contrary to the canonical enactments. The popes, especially, made use of this grace from the twelfth century. After having first asked, then ordered, the collators to dispose of certain benefices in favour of ecclesiastics whom they had previously named to them, the popes themselves directly granted, in the way of expectatives, benefices which were not at the moment vacant; they even charged another ecclesiastic with the future investiture of the appointee with the benefice. The privilege of granting expectatives was conceded also to the delegates of the Holy See, the universities, certain princes, etc., with more or less restriction. This practice aroused grave opposition and gave rise to many abuses, especially during the Western Schism. The Council of Trent suppressed all expectatives excepting the designation of a coadjutor with the right of succession in the case of bishops and abbots; to these we may add the prefects Apostolic. (Sess. XXIV, cap. xix, *De ref.*; Sess. XXIX, cap. vii, *De ref.*). Although the council intended to forbid also the collation of expectatives by privileges granted by the pope, still the latter is not bound by such a prohibition. However, the only expectatives now in use are those authorized by the Council of Trent.

SCHMITT, *De eo quod circa expectativas ad canonicatus ex statutis et observantiis Germani justum est* in MAYER, *Thesaurus novus juris ecclesiastici* (Ratisbon, 1791), I, 249; DÜRR, *De capitulis clausis in Germaniâ* in SCHMIDT, *Thesaurus juris ecclesiastici* (Heidelberg, 1774), III, 122; HINSCHIUS, *System des katholischen Kirchenrechts* (Berlin, 1879 1895), II, 64, 474; III, 113 sqq.; WERNZ, *Jus Decretalium* (Rome, 1899), II, 450.

A. VAN HOVE

Apostolic Expeditors

Apostolic Expeditors

(Lat. *Expeditionarius literarum apostolicarum, Datariae Apostolicae sollicitator atque expeditor*; It. *Spedizionieri*).

Officials who attend to the sending of Bulls, Briefs, and Rescripts, that emanate from the Apostolic Chancery, the Dataria, the Sacred Paenitentiaria, and the Secretariate of Briefs. In a restricted and specific sense expeditors or expeditioners are laymen approved by the Dataria, after an examination, to act as agents for bishops or others before the Dataria or Apostolic Chancery. They are members of the Roman Court. They differ from solicitors as well as from procurators or agents in general, who transact business with the Roman Congregations. A solicitor, strictly speaking, is an assistant to a procurator, doing the mechanical work of preparing documents. An expeditor is more concerned with matters of favour, privileges, dispensations and so on, than with cases in litigation. It has been the practice of the Dataria and Apostolic Chancery to carry on business only with authorized agents, or expeditors, whose office it is to draw up and sign the necessary documents, receive and forward the answer given. They receive a certain fixed fee for each transaction, while procurators and solicitors generally receive a monthly stipend. The number of expeditors has varied. Cardinal Pacca, pro-datarius, decided, in 1833, that the number, which was then one hundred, should be regulated by the amount of business to be transacted. In late years there were about thirty. In reorganizing the Roman Court, Pius X deprived these expeditors of their exclusive right to appear before the Dataria, and Apostolic Chancery.

ANDREW B. MEEHAN

Exposition of the Blessed Sacrament

Exposition of the Blessed Sacrament

Exposition is a manner of honouring the Holy Eucharist, by exposing It, with proper solemnity, to the view of the faithful in order that they may pay their devotions before It. We will speak later of the conditions which constitute proper solemnity, but something must first be said of the history of the practice.

HISTORY

There can be no reasonable doubt that the practice of exposition came in the wake of that most epoch-making liturgical development, the Elevation of the Host in the Mass. The Elevation itself, of which we first hear in its present sense about the year

1200, was probably adopted as a practical protest against the teaching of Peter Comestor and Peter the Chanter, who held that the bread was not consecrated in the Mass until the words of institution had been spoken over both bread and wine. Those who believed that when the words "*Hoc est enim corpus meum*" had been pronounced, the bread was at once changed into the flesh of our Lord, supported their opinion by adoring the Sacrament, and holding It up for the adoration of the people, without waiting for the words to be spoken over the chalice. At Paris, this elevation became a matter of synodal precept, probably before the year 1200. Before long it came to be regarded as a very meritorious act to look upon and salute the Body of the Lord. In this way, even before the middle of the thirteenth century, all kinds of fanciful promises were in circulation regarding the special privileges enjoyed by him, who, on any day, saw the Body of his Maker. He was believed to be protected from sudden death, or from loss of sight. Further, on that day he would be duly nourished by the food he took, and would grow no older, with many other extravagances. The development of these popular beliefs was also probably much assisted by a legendary element current in the romances of the Holy Grail, then at the height of their popularity. What is certain is, that among all classes the seeing the Host, at the moment It was lifted on high in the hands of the priest, became a primary object of devotion, and various devices -- for example, the hanging of a black curtain at the back of the altar, or the lighting of torches held behind the priest by a deacon or server -- were resorted to, to make the looking upon the Body of Christ more easy.

Whether the institution of the feast of Corpus Christi with its procession, an innovation due to the visions of the Flemish contemplative, St. Juliana Cornelson, is to be regarded as the cause, or rather the effect, of this great desire to behold the Body of Christ is somewhat doubtful. But the evidence points to it as an effect rather than as a cause, for, even before the close of the twelfth century, we find a well-authenticated story of the last moments of Maurice de Sully, Bishop of Paris, according to which, being unable on account of sickness to receive Holy Viaticum, he satisfied his devotion by having the Blessed Sacrament brought to him to gaze upon. An exactly similar incident is recorded of St. Juliana herself, when upon her death-bed. This also seems to show that the devout longing of the faithful to gaze upon the Sacred Host was not confined to the time of Mass. Moreover, we find it debated among scholastic theologians, as early as the thirteenth century, whether the looking upon the consecrated Host was permissible to those in the state of grievous sin, and it was commonly decided that far from being a new offense against God, such an act was praiseworthy, if it were done with a reverent intention, and was likely to obtain for the sinner the grace of true contrition.

In the fourteenth century, we find the practice of Exposition already established, especially in Germany. The "Septilium" of Blessed Dorothea of Prussia who died a recluse, at an advanced age, in 1394, not only bears witness to the saint's extraordinary desire to see the Blessed Sacrament, a desire which was sometimes gratified as often as a hundred times in one day, but also incidentally mentions that in certain churches near Dantzic, the Blessed Sacrament was reserved all day long in a transparent monstrance, so that pious persons like Dorothea could come to pray before It. The practice undoubtedly spread very widely, especially in Germany and the Netherlands. In the fifteenth century, we find numerous synodal decrees passed, prohibiting this continuous and informal Exposition, as wanting in proper reverence. The decree enacted at Cologne in 1452, under the presidency of Cardinal Nicholas de Cusa, altogether forbids the reserving, or carrying of the Blessed Sacrament in such monstrances, except during the octave of Corpus Christi. An earlier decree passed at Breslau, in 1416, speaks of permission having previously been given "for the Body of Jesus Christ, on some few days of the week, to be visibly exposed and shown to public view". But the bishop declares that he has perceived, that, "by this frequent exposition, the indevotion of the multitude only becomes greater and reverence is lessened". It is clear that these prohibitions did not eradicate the custom, but they seem to have led to a curious compromise, by which the Blessed Sacrament, throughout a great part of central Europe, was reserved in "Sakramentshauschen" (Sacrament houses), often beautifully carved of stone, and erected in the most conspicuous part of the church, near the sanctuary. There the Sacred Host was kept in a transparent vessel, or monstrance, behind a locked metal door of lattice work, in such a way that the Host could still be dimly seen by those who prayed outside. In the convent of Vadstena in Sweden, the motherhouse of the Brigittines, we have record of the erection of such a Sacrament House in 1454, in the following terms: "Circa festum Epiphaniae erectum est ciborium, sive columna, pro Corpore Christi, et monstrancia ibi posita cum lampade".

Another custom which seems to have been very prevalent in Germany and the Netherlands, before the close of the fifteenth century, was the practice of exposing the Blessed Sacrament during the time of Mass, apparently to add solemnity to the Holy Sacrifice thus offered. Numerous papal permissions for such Exposition will be found in the "Regest" of Pope Leo X. (See e.g. 3 Nov., 1514; 20 Nov., 1514, etc.) This practice is still a very favourite one in Belgium, though it seems directly to contravene the spirit of many directions in the official "Caeremoniale Episcoporum" prescribing that the Blessed Sacrament should, when possible, be removed from the altar at which High Mass is to be celebrated (Caer. Episc. I, XII, 8-9). Before the Council of Trent, the abuse of such frequent expositions, in Germany and elsewhere, seems to have been very much checked, if not entirely eliminated. In the sixteenth century and subsequently,

the development of popular devotion in this matter have been much more restrained, and they have always been subject to strict episcopal supervision. The practice of the Forty Hours' Devotion, and the service now known as Benediction of the Blessed Sacrament, are treated separately, and the reader may be referred to the articles in question. But a good many other varieties of services, involving Exposition of the Blessed Sacrament for a longer or shorter period, began to prevail in the time of St. Philip Neri and St. Charles Borromeo. Of one such variety known as the *Oratio sine intermissione*, and dating at least from 1574, a full account will be found in the "Acta Mediolanensis Ecclesiae". Not very long after this, we begin to come across various religious institutes founded, with the permission of the Holy See, for the express purpose of maintaining the perpetual adoration of the Blessed Sacrament. See the article PERPETUAL ADORATION, where details are given. In most of these cases we may assume that the Blessed Sacrament is exposed upon the altar, though in some religious institutes of this kind the exposition is only continued by day.

CONDITIONS REGULATING EXPOSITION

The Church distinguishes between private and public Expositions of the Blessed Sacrament; and though the former practice is hardly known in northern Europe, or in America, it is clearly within the competence of a parish priest to permit such private exposition for any good reason of devotion, by opening the tabernacle door and allowing the ciborium containing the Blessed Sacrament to be seen by the worshipers. There is, however, in this case no enthroning of the Blessed Sacrament or use of a monstrance. Public Exposition of the Blessed Sacrament may not take place without the permission, express or implied, or the ordinary. In English-speaking countries, a monstrance is almost always used when the Blessed Sacrament is set upon Its throne, but in Germany, one frequently sees simply the ciborium, covered of course with its veil. A certain solemnity and decorum in the matter of lights upon the altar, incense, music, and attendance of worshipers is also required, and bishops are directed to refuse permission for public Exposition where these cannot be provided for.

When Mass is celebrated, or the Divine Office recited, at the altar upon which the Blessed Sacrament is exposed, a new set of rubrics comes into force, birettas are not worn, genuflexions on both knees are made before the altar, the incense and water are not blessed, the celebrant's hand is not kissed, etc. The *Caeremoniale* seems only to contemplate the case of Mass before the Blessed Sacrament exposed during the octave of Corpus Christi, and at the Mass of Deposition of the *Quarant' Ore*, but, as already noticed, in many parts of Europe, local custom has made these Masses before the Blessed Sacrament of very common occurrence. For the candles that ought to burn upon the altar, and for the ritual to be followed the reader may be referred to the articles BENEDICTION, and FORTY HOURS' DEVOTION. Other rubrical directions dealing

with such matters as the use of electric light, the arrangement of the throne, etc., are given in detail in manuals like that of Hartmann, or works upon Pastoral Theology such as that of Schulze.

HERBERT THURSTON

Extension

Extension

(From Lat. *ex-tendere*, to spread out.)

That material substance is not perfectly continuous in its structure, as it appears to our gross senses, the physical sciences demonstrate. The microscope reveals pores in the most compact matter, while the permeation of gases and even of liquids through solids indicates that the densest bodies would probably present to a sufficiently penetrating eye a sponge-like structure throughout. This fact, together with the difficulty of explaining how the senses can perceive extension, has led many theorists to deny its objectivity, although, on the other hand, the first of modern philosophers, Descartes, was so impressed by the universality of extension that he held it to be the very essence of matter. Kant makes extension a subjective form, an original condition of sensuous faculty which when stimulated by the sense-object stamps the impression accordingly. Others, with Leibniz, resolve matter into simple unextended points (monads), which by their agitation are supposed to produce in us the impression of continuous extension. Others, with Boscovich (d. 1787), subtilize matter into simple forces which some hold to be "virtually" extended. The Atomists (physical and chemical) dissolve bodies into minute particles or atoms (which some consider to be absolutely, others only physically, indivisible) of certain elementary substances, which hitherto have defied further analysis but which may eventually turn out to be merely varying arrangements of some primordial homogeneous material, the radical constituent of the universe. The present teaching of Catholic philosophy on the subject may be summarized as follows: Extension is either successive (fluent, as that of a stream and of time), or permanent. The latter may be viewed as either

- continuous (mathematical, i.e. abstract, as a line; or physical), when the entitative or integrant parts into which its immediate subject, material substance, is divisible are united (perfectly or imperfectly) throughout, e.g. a homogeneous wire;
- contiguous, when the said parts are conjoined only by contact, e.g. a brick wall;

- interrupted, when those parts are in some degree disjoined, though connected by an intermediate, e.g. a string of beads. We are here occupied with continuous extension only.

Continuous extension may be described as that property in virtue whereof the parts into which material substance is divisible are situally arranged in orderly relation one beyond the other (internal and potentially local extension) and hence are naturally commensurate with the corresponding parts of the immediately enviroing surfaces (external and actual local extension). Consequent attributes of extension are divisibility, measurability, and impenetrability. Wherein precisely the essence of extension consists, is a controverted question. Probably the more general opinion is that extension radically and essentially consists in the internal distribution of the parts into which matter is divisible, and that external extension, or the correspondence of those parts to the parts of the locating surfaces, is a sequent property of essential or internal extension. Of course this does not explain extension. Some nearer approach to an explanation may be found in the opinion of a recent writer (Pecsi) who makes extension consist in the expansive and cohesive forces of matter -- the former causing the said parts to spread out, the latter keeping them united.

Continuous extension is an objective property of matter, not a mere mental form moulding the sensuous impression produced in the sensory organs by some sort of physical motion. What it is that extension immediately affects -- whether the ultimate atoms, the constituent molecules, or the gross mass of matter we are unable in the present stage of physical science to decide. Even should it turn out, however, as many conjecture, that the densest solid -- to say nothing of a liquid or a gas -- is but what might be called an "infinitely" complex arrangement of infinitesimal corpuscles -- atoms or electrons -- gyrating in a matrix of ether, continuous extension would still remain real (objective), though it would then be the immediate property of the constituent corpuscles and the ether instead of a property of the gross mass. It is experimentally demonstrable that sensuous impressions are aroused in us by bodies as extended and resistant. Now if bodies were constituted of simple, unextended points -- monads or forces -- these could not stimulate the sensory organs, since such elements, apart from the fact that they would all coalesce and copenetrates, could not be the subjects of material activity (etherial or aerial vibrations, chemical reactions, i.e. the immediate sense-stimuli). Nor could the organs evoke the sensation, since in the hypothesis they, too, being made up of unextended elements, would be incapable of material action. Neither will it do to say that the motion of the supposed "points" might evoke sensation, since being unextended they would be imperceptible whether in motion or at rest.

Extension is an "absolute accident", that is not a mere mode in which substance exists, as, for instance, are motion and rest. It seems to have a certain distinct entity of its own. This, of course, would most probably never have been suspected by the human mind unaided by Revelation. But given the doctrine of the Real Presence of Christ in the Sacrament of the Eucharist, wherein the extensional dimensions and sensible qualities of bread and wine persist after the conversion of the substance of the bread and wine into His Body and Blood, reason, speculating on the doctrine, discerns some grounds for the possibility of the real distinction and even severance between substance and local extension. In the first place there are motives for inferring a real distinction between substance and extension (actual and local), or, in other words, that extension does not constitute the essence of material substance (as Descartes maintained that it does):

- substance is the root principle of action; extension as such is either inactive or at most a proximate principle;
- substance is the ground of specification; extension as such is indifferent to any species, since shape or figure which is the dimensional termination of extension depends upon the specific form;
- substance is identical in the entire mass and in each of its parts (e.g. in gold), while extension is not the same in the whole and in each of its parts;
- substance is the principle of unity; extension is the formal principle of plurality;
- substance essentially demands three dimensions; extension may be realized in one or two;
- substance remaining the same, extension may increase or decrease.

Given a real distinction between extension and substance, no intrinsic impossibility can be proven to exist in the separation of one from the other, for although internal extension naturally demands external, there is no evidence that the demand is so essentially imperative that Omnipotence cannot supernaturally suspend its realization and by other means afford the accidents -- extension and the rest -- the support which the substance naturally supplies. Since material substance owes the distribution of its integral parts to extension, the question arises whether, independently of extension, it possesses any such parts (it, of course, possesses parts essential to corporeal substance, matter and form), or is simple, indivisible. St. Thomas and many others maintain that substance as such is indivisible. Suarez and others hold that it is divisible. For this and

the other questions concerning the divisibility of extension, and the psychology of the subject, the reader is referred to the works mentioned below.

Extravagantes

Extravagantes

(*Extra*, outside; *vagari*, to wander.)

This word is employed to designate some papal decretals not contained in certain canonical collections which possess a special authority, i.e. they are not found in the Decree of Gratian or the three official collections of the "Corpus Juris" (the Decretals of Gregory IX, the Sixth Book of the Decretals, and the Clementines). The term was first applied to those papal documents which Gratian had not inserted in his "Decree" (about 1140), but which, however, were obligatory upon the whole Church, also to other decretals of a later date, and possessed of the same authority. Bernard of Pavia designated under the name of "Breviarium Extravagantium", or Digest of the "Extravagantes", the collection of papal documents which he compiled between 1187 and 1191. Even the Decretals of Gregory IX (published 1234) were long known as the "Liber" or "Collectio Extra", i.e. the collection of the canonical laws not contained in the "Decree" of Gratian. This term is now applied to the collections known as the "Extravagantes Joannis XXII" and the "Extravagantes communes", both of which are found in all editions of the "Corpus Juris Canonici". When John XXII (1316 1334) published the decretals known as the Clementines, there already existed some pontifical documents, obligatory upon the whole Church but not included in the "Corpus Juris". This is why these Decretals were called "Extravagantes". Their number was increased by the inclusion of all the pontifical laws of later date, added to the manuscripts of the "Corpus Juris", or gathered into separate collections. In 1325 Zenselinus de Cassanis added a gloss to twenty constitutions of Pope John XXII, and named this collection "Viginti Extravagantes pap Joannis XXII". The others were known as "Extravagantes communes", a title given to the collection by Jean Chappuis in the Paris edition of the "Corpus Juris" (1499 1505). He adopted the systematic order of the official collections of canon law, and classified in a similar way the "Extravagantes" commonly

met with (hence "Extravagantes communes") in the manuscripts and editions of the "Corpus Juris". This collection contains decretals of the following popes: Martin IV, Boniface VIII (notably the celebrated Bull "Unam Sanctam"), Benedict XI, Clement V, John XXII, Benedict XII, Clement VI, Urban V, Martin V, Eugene IV, Callistus III, Paul II, Sixtus IV (1281 1484). Chappuis also classified the "Extravagantes" of John XXII under fourteen titles, containing in all twenty chapters. These two collections are of lesser value than the three others which form the "Corpus Juris Canonici"; they possess no official value, nor has custom bestowed such on them. On the other hand, many of the decretals comprised in them contain legislation obligatory upon the whole Church, e.g. the Constitution of Paul II, "Ambitios", which forbade the alienation of ecclesiastical goods. This, however, is not true of all of them; some had even been formally abrogated at the time when Chappuis made his collection; three decretals of John XXII, are reproduced in both collections. Both the collections were printed in the official (1582) edition of the "Corpus Juris Canonici". This explains the favour they enjoyed among canonists. For a critical text of these collections see Friedberg, "Corpus Juris Canonici" (Leipzig, 1879 1881), II. (See CORPUS JURIS CANONICI; DECRETALS, PAPAL.)

General introductions to the *Corpus Juris Canonici*, by LAURIN, SCHNEIDER, SCHULTE, etc.; the manuals of canon law, especially those of VON SCHERER, WERNZ, SAGMULLER, etc.; BICKELL, Ueber die Entstehung und den heutigen Gebrauch der beiden Extravagantensammlungen des Corpus juris canonici (Marburg, 1825).

Extreme Unction

Extreme Unction

A sacrament of the New Law instituted by Christ to give spiritual aid and comfort and perfect spiritual health, including, if need be, the remission of sins, and also, conditionally, to restore bodily health, to Christians who are seriously ill; it consists essentially in the unction by a priest of the body of the sick person, accompanied by a suitable form of words. The several points embodied in this descriptive definition will be more fully explained in the following sections into which this article is divided: I. Actual Rite of Administration; II. Name; III. Sacramental Efficacy of the Rite; IV. Matter and Form; V. Minister; VI. Subject; VII. Effects; VIII. Necessity; IX. Repetition; X. Reviviscence of the Sacrament.

I. ACTUAL RITE OF ADMINISTRATION

As administered in the Western Church today according to the rite of the Roman Ritual, the sacrament consists (apart from certain non-essential prayers) in the unction with oil, specially blessed by the bishop, of the organs of the five external senses (eyes, ears, nostrils, lips, hands), of the feet, and, for men (where the custom exists and the condition of the patient permits of his being moved), of the loins or reins; and in the following form repeated at each unction with mention of the corresponding sense or faculty: "Through this holy unction and His own most tender mercy may the Lord pardon thee whatever sins or faults thou hast committed [quidquid deliquisti] by sight [by hearing, smell, taste, touch, walking, carnal delectation]". The unction of the loins is generally, if not universally, omitted in English-speaking countries, and it is of course everywhere forbidden in case of women. To perform this rite fully takes an appreciable time, but in cases of urgent necessity, when death is likely to occur before it can be completed, it is sufficient to employ a single unction (on the forehead, for instance) with the general form: "Through this holy unction may the Lord pardon thee whatever sins or faults thou hast committed." By the decree of 25 April, 1906, the Holy Office has expressly approved of this form for cases of urgent necessity.

In the Eastern Orthodox (schismatical) Church this sacrament is normally administered by a number of priests (seven, five, three; but in case of necessity even one is enough); and it is the priests themselves who bless the oil on each occasion before use. The parts usually anointed are the forehead, chin, cheeks, hands, nostrils, and breast, and the form used is the following: "Holy Father, physician of souls and of bodies, Who didst send Thy Only- Begotten Son as the healer of every disease and our deliverer from death, heal also Thy servant N. from the bodily infirmity that holds him, and make him live through the grace of Christ, by the intercessions of [certain saints who are named], and of all the saints." (Goar, Euchologion, p. 417.) Each of the priests who are present repeats the whole rite.

II. NAME

The name *Extreme Unction* did not become technical in the West till towards the end of the twelfth century, and has never become current in the East. Some theologians would explain its origin on the ground that this unction was regarded as the last in order of the sacramental or quasi-sacramental unctions, being preceded by those of baptism, confirmation, and Holy orders; but, having regard to the conditions prevailing at the time when the name was introduced (see below, VI), it is much more probable that it was intended originally to mean "the unction of those *in extremis*", i.e. of the dying, especially as the corresponding name, *sacramentum exeuntium*, came into common use during the same period.

In previous ages the sacrament was known by a variety of names, e.g., the holy oil, or unction, of the sick; the unction or blessing of consecrated oil; the unction of God; the office of the unction; etc. In the Eastern Church the later technical name is *euchelaion* (i.e. prayer-oil); but other names have been and still are in use, e.g. *elaion hagion* (holy), or *hegismenon* (consecrated), *elaion*, *elaiou Chrisis*, *chrisma*, etc.

III. SACRAMENTAL EFFICACY OF THE RITE

A. Catholic Doctrine

The Council of Trent (Sess. XIV, cap. i, De Extr. Unct.) teaches that "this sacred unction of the sick was instituted by Christ Our Lord as a sacrament of the New Testament, truly and properly so called, being insinuated indeed in Mark [vi, 13] but commended to the faithful and promulgated" by James [Ep., v, 14, 15]; and the corresponding canon (can. i, De Extr. Unct.) anathematizes anyone who would say "that extreme unction is not truly and properly a sacrament instituted by Christ Our Lord, and promulgated by the blessed Apostle James, but merely a rite received from the fathers, or a human invention". Already at the Council of Florence, in the Instruction of Eugene IV for the Armenians (Bull "Exultate Deo", 22 Nov., 1439), extreme unction is named as the fifth of the Seven Sacraments, and its matter and form, subject, minister, and effects described (Denzinger, "Enchiridion", 10th ed., Freiburg, 1908, no. 700--old no. 595). Again, it was one of the three sacraments (the others being confirmation and matrimony) which Wycliffites and Hussites were under suspicion of contemning, and about which they were to be specially interrogated at the Council of Constance by order of Martin V (Bull "Inter cunctas", 22 Feb., 1418.--Denzinger, op. cit., no. 669--old no. 563). Going back farther we find extreme unction enumerated among the sacraments in the profession of faith subscribed for the Greeks by Michael Palæologus at the Council of Lyons in 1274 (Denzinger, no. 465--old no. 388), and in the still earlier profession prescribed for converted Waldenses by Innocent III in 1208 (Denzinger, no. 424--old no. 370). Thus, long before Trent--in fact from the time when the definition of a sacrament in the strict sense had been elaborated by the early Scholastics--extreme unction had been recognized and authoritatively proclaimed as a sacrament; but in Trent for the first time its institution by Christ Himself was defined. Among the older Schoolmen there had been a difference of opinion on this point, some--as Hugh of St. Victor (De Sacram., Bk. II, pt. XV, c. ii), Peter Lombard (Sent., IV, dist. xxiii), St. Bonaventure (Comm. in Sent., loc. cit., art. i, Q. ii), and others--holding against the more common view that this sacrament had been instituted by the Apostles after the Descent of the Holy Ghost and under His inspiration. But since Trent it must be held as a doctrine of Catholic faith that Christ is at least the mediate author of extreme unction, i.e., that it is by His proper authority as God-Man that the prayer-unction has become an efficacious sign of grace; and theologians almost unanimously

maintain that we must hold it to be at least certain that Christ was in some sense the immediate author of this sacrament, i.e., that He Himself while on earth commissioned the Apostles to employ some such sign for conferring special graces, without, however, necessarily specifying the matter and form to be used. In other words, immediate institution by Christ is compatible with a mere generic determination by Him of the physical elements of the sacrament.

The teaching of the Council of Trent is directed chiefly against the Reformers of the sixteenth century. Luther denied the sacramentality of extreme unction and classed it among rites that are of human or ecclesiastical institution (*De Captivitate Babilonica*, cap. de extr. unct.). Calvin had nothing but contempt and ridicule for this sacrament, which he described as a piece of "histrionic hypocrisy" (*Instit.*, IV, xix, 18). He did not deny that the Jacobean rite may have been a sacrament in the Early Church, but held that it was a mere temporary institution which had lost all its efficacy since the charisma of healing had ceased (*Comm. in Ep. Jacobi*, v, 14, 15). The same position is taken up in the confessions of the Lutheran and Calvinistic bodies. In the first edition (1551) of the Edwardine Prayer Book for the reformed Anglican Church the rite of unction for the sick, with prayers that are clearly Catholic in tone, was retained; but in the second edition (1552) this rite was omitted, and the general teaching on the sacraments shows clearly enough the intention of denying that extreme unction is a sacrament. The same is to be said of the other Protestant bodies, and down to our day the denial of the Tridentine doctrine on extreme unction has been one of the facts that go to make up the negative unanimity of Protestantism. At the present time, however, there has been a revival more or less among Anglicans of Catholic teaching and practice. "Some of our clergy", writes Mr. Puller (*Anointing of the Sick in Scripture and Tradition*, London, 1904), "seeing the plain injunction about Unction in the pages of the New Testament, jump hastily to the conclusion that the Roman teaching and practice in regard to Unction is right, and seek to revive the use of Unction as a channel of sanctifying grace, believing that grace is imparted sacramentally through the oil as a preparation for death" (p. 307). Mr. Puller himself is not prepared to go so far, though he pleads for the revival of the Jacobean unction, which he regards as a mere sacramental instituted for the supernatural healing of bodily sickness only. His more advanced friends can appeal to the authority of one of their classical writers, Bishop Forbes of Brechin, who admits (*Exposition of the XXXIX Articles*, vol. II, p. 463) that "unction of the sick is the Lost Pleiad of the Anglican firmament. . . There has been practically lost an apostolic practice, whereby, in case of grievous sickness, the faithful were anointed and prayed over, for the forgiveness of their sins, and to restore them, if God so willed, or to give them spiritual support in their maladies".

Previous to the Reformation there appears to have been no definite heresy relating to this sacrament in particular. The Albigenses are said to have rejected it, the meaning probably being that its rejection, like that of other sacraments, was logically implied in their principles. The abuses connected with its administration which prevailed in the twelfth and thirteenth centuries and which tended to make it accessible only to the rich, gave the Waldenses a pretext for denouncing it as the *ultima superbia* (cf. Preger, *Beiträge zur Gesch. der Waldenser im M.A.*, pp. 66 sqq.). That the Wycliffites and Hussites were suspected of contemning extreme unction is clear from the interrogatory already referred to, but the present writer has failed to discover any evidence of its specific rejection by these heretics.

B. Proof of Catholic Doctrine from Holy Scripture

In this connection there are only two texts to be discussed--Mark, vi, 13, and James, v, 14, 15--and the first of these may be disposed of briefly. Some ancient writers (Victor of Antioch, Theophylactus, Euthymius, St. Bede, and others) and not a few Scholastics saw a reference to this sacrament in this text of St. Mark, and some of them took it to be a record of its institution by Christ or at least a proof of His promise or intention to institute it. Some post-Tridentine theologians also (Maldonatus, de Sainte-Beuve, Berti, Mariana, and among recent writers, but in a modified form, Schell) have maintained that the unction here mentioned was sacramental. But the great majority of theologians and commentators have denied the sacramentality of this unction on the grounds: (1) that there is mention only of bodily healing as its effect (cf. Matt., x, 1; Luke, ix, 1, 2); (2) that many of those anointed had probably not received Christian baptism; (3) that the Apostles had not yet been ordained priests; and (4) that penance, of which extreme unction is the complement, had not yet been instituted as a sacrament. Hence the guarded statement of the Council of Trent that extreme unction as a sacrament is merely "insinuated" in St. Mark, i.e. hinted at or prefigured in the miraculous unction which the Apostles employed, just as Christian baptism had been prefigured by the baptism of John.

The text of St. James reads: "Is any man sick among you? Let him bring in the priests of the Church, and let them pray over him, anointing him with oil in the name of the Lord. And the prayer of faith shall save [*sosei*] the sick man: and the Lord shall raise him up [*egerei*]: and if he be in sins, they shall be forgiven him." It is not seriously disputed that there is question here of those who are physically ill, and of them alone; and that the sickness is supposed to be grave is conveyed by the word *kamnonta* and by the injunction to have the priests called in; presumably the sick person cannot go to them. That by "the priests of the church" are meant the hierarchical clergy, and not merely elders in the sense of those of mature age, is also abundantly clear. The expression *tous presbyterous*, even if used alone, would naturally admit no other meaning,

in accordance with the usage of the Acts, Pastoral Epistles, and I Peter (v); but the addition of *tes ekklesias* excludes the possibility of doubt (cf. Acts, xx, 17). The priests are to pray over the sick man, anointing him with oil. Here we have the physical elements necessary to constitute a sacrament in the strict sense: oil as remote matter, like water in baptism; the anointing as proximate matter, like immersion or infusion in baptism; and the accompanying prayer as form. This rite will therefore be a true sacrament if it has the sanction of Christ's authority, and is intended by its own operation to confer grace on the sick person, to work for his spiritual benefit. But the words "in the name of the Lord" here mean "by the power and authority of Christ", which is the same as to say that St. James clearly implies the Divine institution of the rite he enjoins. To take these words as referring to a mere invocation of Christ's name--which is the only alternative interpretation--would be to see in them a needless and confusing repetition of the injunction "let them pray over him". But is this rite recommended by St. James as an operative sign of grace? It may be admitted that the words "the prayer of faith shall save the sick man; and the Lord shall raise him up", taken by themselves and apart from the context, might possibly be applied to mere bodily healing; but the words that follow, "and if he be in sins, they shall be forgiven him", speak expressly of a spiritual effect involving the bestowal of grace. This being so, and it being further assumed that the remission of sins is given by St. James as an effect of the prayer-unction, nothing is more reasonable than to hold that St. James is thinking of spiritual as well as of bodily effects when he speaks of the sick man being "saved" and "raised up".

It cannot be denied that in accordance with New Testament usage the words in question (especially the first) are capable of conveying this twofold meaning, and it is much more natural in the present context to suppose that they do convey it. A few verses further on the predominating spiritual and eschatological connotation of "saving" in St. James's mind emerges clearly in the expression, "shall save his soul from death" (v, 20), and without necessarily excluding a reference to deliverance from bodily death in verse 15, we are certainly justified in including in that verse a reference to the saving of the soul. Moreover, the Apostle could not, surely, have meant to teach or imply that every sick Christian who was anointed would be cured of his sickness and saved from bodily death; yet the unction is clearly enjoined as a permanent institution in the Church for all the sick faithful, and the saving and raising up are represented absolutely as being the normal, if not infallible, effect of its use. We know from experience (and the same has been known and noted in the Church from the beginning) that restoration of bodily health does not as a matter of fact normally result from the unction, though it does result with sufficient frequency and without being counted miraculous to justify us in regarding it as one of the Divinely (but conditionally) intended effects of the rite.

Are we to suppose, therefore, that St. James thus solemnly recommends universal recourse to a rite which, after all, will be efficacious for the purpose intended only by way of a comparatively rare exception? Yet this is what would follow if it be held that there is reference exclusively to bodily healing in the clauses which speak of the sick man being saved and raised up, and if further it be denied that the remission of sins spoken of in the following clause, and which is undeniably a spiritual effect, is attributed to the unction by St. James. This is the position taken by Mr. Puller; but, apart from the arbitrary and violent breaking up of the Jacobean text which it postulates, such a view utterly fails to furnish an adequate rationale for the universal and permanent character or the Apostolic prescription. Mr. Puller vainly seeks an analogy (op. cit., pp. 289 sqq.) in the absolute and universal expressions in which Christ assures us that our prayers will be heard. We admit that our rightly disposed prayers are always and infallibly efficacious for our ultimate spiritual good, but not by any means necessarily so for the specific temporal objects or even the proximate spiritual ends which we ourselves intend. Christ's promises regarding the efficacy of prayer are fully justified on this ground; but would they be justified if we were compelled to verify them by reference merely to the particular temporal boons we ask for? Yet this is how, on his own hypothesis, Mr. Puller is obliged to justify St. James assurance that the prayer-unction shall be efficacious. But in the Catholic view, which considers the temporal boon of bodily healing as being only a conditional and subordinate end of the unction, while its paramount spiritual purpose--to confer on the sick and dying graces which they specially need--may be, and is normally, obtained, not only is an adequate rationale of the Jacobean injunction provided, but a true instead of a false analogy with the efficacy of prayer is established.

But in defense of his thesis Mr. Puller is further obliged to maintain that all reference to the effects of the unction ceases with the words, "the Lord shall raise him up", and that in the clause immediately following, "and if he be in sins, they shall be forgiven him", St. James passes on to a totally different subject, namely, the Sacrament of Penance. But unless we agree to disregard the rules of grammar and the logical sequence of thought, it is impossible to allow this separation of the clauses and this sudden transition in the third clause to a new and altogether unexpected subject-matter. All three clauses are connected in the very same way with the unction, "*and* the prayer of faith. . . *and* the Lord. . . *and* if he be in sins. . .", so that the remission of sins is just as clearly stated to be an effect of the unction as the saving and raising up. Had St. James meant to speak of the effect of priestly *absolution* in the third clause he could not have written in such a way as inevitably to mislead the reader into believing that he was still dealing with an effect of the priestly *unction*. In the nature of things there is no reason why unction as well as absolution by a priest might not be Divinely ordained for the

sacramental remission of sin, and that it was so ordained is what every reader naturally concludes from St. James. Nor is there anything in the context to suggest a reference to the Sacrament of Penance in this third clause. The admonition in the following verse (16), "Confess, therefore, your sins one to another", may refer to a mere liturgical confession like that expressed in the "Confiteor"; but even if we take the reference to be to sacramental confession and admit the genuineness of the connecting "therefore" (its genuineness is not beyond doubt), there is no compelling reason for connecting this admonition closely with the clause which immediately precedes. The "therefore" may very well be taken as referring vaguely to the whole preceding Epistle and introducing a sort of epilogue.

Mr. Puller is the latest and most elaborate attempt to evade the plain meaning of the Jacobean text that we have met with; hence our reason for dealing with is so fully. It would be an endless task to notice the many other similarly arbitrary devices of interpretation to which Protestant theologians and commentators have recurred in attempting to justify their denial of the Tridentine teaching so clearly supported by St. James (see examples in Kern, "De Sacramento Extremæ Unctionis", Ratisbon, 1907, pp. 60 sq.). It is enough to remark that the number of mutually contradictory interpretations they have offered is a strong confirmation of the Catholic interpretation, which is indeed the only plain and natural one, but which they are bound to reject at the outset. In contrast with their disregard of St. James's injunction and their hopeless disagreement as to what the Apostle really meant, we have the practice of the whole Christian world down to the time of the Reformation in maintaining the use of the Jacobean rite, and the agreement of East and West in holding this rite to be a sacrament in the strict sense, an agreement which became explicit and formal as soon as the definition of a sacrament in the strict sense was formulated, but which was already implicitly and informally contained in the common practice and belief of preceding ages. We proceed, therefore, to study the witness of Tradition.

C. Proof from Tradition

(1) State of the Argument

Owing to the comparative paucity of extant testimonies from the early centuries relating to this sacrament, Catholic theologians habitually recur to the general argument from prescription, which in this case may be stated briefly thus: The uninterrupted use of the Jacobean rite and its recognition as a sacrament in the Eastern and Western Churches, notwithstanding their separation since 869, proves that both must have been in possession of a common tradition on the subject prior to the schism. Further, the fact that the Nestorian and Monophysite bodies, who separated from the Church in the fifth century, retained the use of the unction of the sick, carries back the undivided tradition to the beginning of that century, while no evidence from that or any

earlier period can be adduced to weaken the legitimate presumption that the tradition is Apostolic, having its origin in St. James's injunction. Both of these broad facts will be established by the evidence to be given below, while the presumption referred to will be confirmed by the witness of the first four centuries.

As to the actual paucity of early testimonies, various explanations have been offered. It is not sufficient to appeal with Binterim (*Die Vorzüglichsten Denkwürdigkeiten der christkathol. Kirche*, vol. VI, pt. III, p. 241) to the Discipline of the Secret, which, so far as it existed, applied equally to other sacraments, yet did not prevent frequent reference to them by writers and preachers of those ages. Nor is Launo's contention (*Opera*, vol. I, pt. I, pp. 544 sq.) well founded, that recourse to this sacrament was much rarer in early ages than later. It is more to the point in the first place to recall the loss, except for a few fragments, of several early commentaries on St. James's Epistle (by Clement of Alexandria, Didymus, St. Augustine, St. Cyril of Alexandria, and others) in which chiefly we should look for reference to the unction. The earliest accurately preserved commentary is that of St. Bede (d. 735), who, as we shall see, is a witness for this sacrament, as is also Victor of Antioch (fifth century), the earliest commentator on St. Mark. Second, it is clear, at the period when testimonies become abundant, that the unction was allied to penance as a supplementary sacrament, and as such was administered regularly before the Viaticum. We may presume that this order of administration had come down from remote antiquity, and this close connection with penance, about which, as privately administered to the sick, the Fathers rarely speak, helps to explain their silence on extreme unction. Third, it should be remembered that there was no systematic sacramental theology before the Scholastic period, and, in the absence of the interests of system, the interests of public instruction would call far less frequently for the treatment of this sacrament and of the other offices privately administered to the sick than would subjects of such practical public concern as the preparation of catechumens and the administration and reception of those sacraments which were solemnly conferred in the church. If these, and similar considerations which might be added, are duly weighed, it will be seen that the comparative fewness of early testimonies is not after all so strange. It should be observed, moreover, that charismatic and other unctions of the sick, even with consecrated oil, distinct from the Jacobean unction, were practiced in the early ages, and that the vagueness of not a few testimonies which speak of the anointing of the sick makes it doubtful whether the reference is to the Apostolic rite or to some of these other usages.

It should finally be premised that in stating the argument from tradition a larger place must be allowed for the principle of development than theologians of the past were in the habit of allowing. Protestant controversialists were wont virtually to demand that the early centuries should speak in the language of Trent--even Mr. Puller is

considerably under the influence of this standpoint--and Catholic theologians have been prone to accommodate their defense to the terms of their adversaries' demand. Hence they have undertaken in many cases to prove much more than they were strictly bound to prove, as for instance that extreme unction was clearly recognized as a sacrament in the strict sense long before the definition of a sacrament in this sense was drawn up. It is a perfectly valid defense of the Tridentine doctrine on extreme unction to show that St. James permanently prescribed the rite of unction in terms that imply its strictly sacramental efficacy; that the Church for several centuries simply went on practicing the rite and believing in its efficacy as taught by the Apostle, without feeling the need of a more definitely formulated doctrine than is expressed in the text of his Epistle; and that finally, when this need had arisen, the Church, in the exercise of her infallible authority, did define for all time the true meaning and proper efficacy of the Jacobean prayer-unction. It is well to keep this principle in mind in discussing the witness of the early ages, though as a matter of fact the evidence, as will be seen, proves more than we are under any obligation to prove.

(2) The Evidence

(a) Ante-Nicene Period.--The earliest extant witness is Origen (d. 254), who, in enumerating the several ways of obtaining remission of sins, comes (seventhly) to "the hard and laborious" way of (public) penance, which involves the confession of one's sins to the priest and the acceptance at his hands of "the salutary medicine". And having quoted the Psalmist in support of confession, Origen adds: "And in this [*in quo*] is fulfilled also what St. James the Apostle says: if any one is sick, let him call in the priests of the Church, and let them *lay hands on him*, anointing him with oil in the name of the Lord, and the prayer of faith shall save the sick man, and if he be in sins they shall be remitted to him" (Hom. ii, in Levit., in P.G., XII, 419). We might be content to quote this as a proof merely of the fact that the injunction of St. James was well known and observed in Origen's time, and that the rite itself was commonly spoken of at Alexandria as "a laying on of hands". But when it is urged that he here attributes the remission of sins of which the Apostle, speaks not to the rite of unction but to the Sacrament of Penance, it is worth while inquiring into the reasons alleged for this interpretation of the passage. Some would have it that Origen is allegorizing, and that he takes the sick man in St. James to mean the spiritually sick or the sinner, thus changing the Apostolic injunction to the following: If anyone be in sins, let him call in the priest. . .and *if* he be in sins, they shall be remitted to him. But we cannot suppose the great Alexandrian capable of such illogicalness on his own account, or capable of attributing it to the Apostle. According to Mr. Puller (op. cit., pp. 42 sqq.), Origen, while quoting the whole text of St. James, means in reality to refer only to the fulfillment of the concluding words, "and if he be in sins", etc. But if that be so, why quote the preceding

part at all, which, in Mr. Puller's, and *ex hypothesi* in Origen's, view, has nothing to do with the subject and can only lead to confusion; and why, above all, omit the words of St. James immediately following, "Confess your sins one to another", which would have been very much to the point and could not have caused any confusion? The truth is that the relation of the Jacobean rite to penance is very obscurely stated by Origen; but, whatever may have been his views of that relation, he evidently means to speak of the whole rite, unction and all, and to assert that it is performed as a means of remitting sin for the sick. If it be held on the obscurity of the connection that he absolutely identifies the Jacobean rite with penance, the only logical conclusion would be that he considered the unction to be a necessary part of penance for the sick. But it is much more reasonable and more in keeping with what we know of the penitential discipline of the period--Christian sinners were admitted to canonical penance only once--to suppose that Origen looked upon the rite of unction as a supplement to penance, intended for the sick or dying who either had never undergone canonical penance, or after penance might have contracted new sins, or who, owing to their "hard and laborious" course of satisfaction being cut short by sickness, might be considered to need just such a complement to absolution, this complement itself being independently efficacious to remit sins or complete their remission by removal of their effects. This would fairly account for the confused grouping together of both ways of remission in the text, and it is a Catholic interpretation in keeping with the conditions of that age and with later and clearer teaching. It is interesting to observe that John Cassian, writing nearly two centuries later, and probably with this very text of Origen before him, gives similar enumeration of means for obtaining remission of sins, and in this enumeration the Jacobean rite is given an independent place (Collat., XX, in P.L., XLIX, 1161).

Origen's contemporary, Tertullian, in upbraiding heretics for neglecting the distinction between clergy and laity and allowing even women "to teach, to dispute, to perform exorcisms, to *undertake cures* [*curationes repromittere*], perhaps even to baptize" (De Præscript., c. xli, in P.L., II, 262), probably refers in the italicized clause to the use of the Jacobean rite; for he did not consider charismatic healing, even with oil, to be the proper or exclusive function of the clergy (see "Ad Scapulam", c. iv, in P.L., I, 703). If this be so, Tertullian is a witness to the general use of the rite and to the belief that its administration was reserved to the priests.

St. Aphraates, "the Persian Sage", though he wrote (336-345) after Nicæa, may be counted as an Ante-Nicene witness, since he lived outside the limits of the empire and remained in ignorance of the Arian strife. Writing of the various uses of holy oil, this Father says that it contains the sign "of the sacrament of life by which Christians [baptism], priests [in ordination], kings, and prophets are made perfect; [it] illuminates

darkness [in confirmation], *anoints the sick*, and by its secret sacrament restores penitents" (Demonstratio xxiii, 3, in Graffin, "Patrol. Syriaca", vol. I, p. lv). It is hardly possible to question the allusion here to the Jacobean rite, which was therefore in regular use in the remote Persian Church at the beginning of the fourth century. Its mention side by side with other unctions that are not sacramental in the strict sense is characteristic of the period, and merely shows that the strict definition of a sacrament has not been formulated. As being virtually Ante-Nicene we may give also the witness of the collection of liturgical prayers known as the "Sacramentary of Serapion". (Serapion was Bishop of Thmuis in the Nile Delta and the friend of St. Athanasius.) The seventeenth prayer is a lengthy form for consecrating the oil of the sick, in the course of which God is besought to bestow upon the oil a supernatural efficacy "for good grace and remission of sins, for a medicine of life and salvation, for health and soundness of soul, body, spirit, for perfect strengthening". Here we have not only the recognition in plain terms of spiritual effects from the unction but the special mention of grace and the remission of sins. Mr. Puller tries to explain away several of these expressions, but he has no refuge from the force of the words "for good grace and remission of sins" but to hold that they must be a later addition to the original text.

(b) The Great Patristic Age: Fourth to Seventh Century.-- References to extreme unction in this period are much more abundant and prove beyond doubt the universal use of the Jacobean unction in every part of the Church. Some testimonies, moreover, refer specifically to one or more of the several ends and effects of the sacrament, as the cure or alleviation of bodily sickness and the remission of sins, while some may be said to anticipate pretty clearly the definition of extreme unction as a sacrament in the strict sense. As illustrating the universal use of the Jacobean unction, we may cite in the first place St. Ephraem Syrus (d. 373), who in his forty-sixth polemical sermon (Opera, Rome, 1740, vol. II, p. 541), addressing the sick person to whom the priests minister, says: "They pray over thee; one blows on thee; another seals thee." The "sealing" here undoubtedly means "anointing with the sign of the cross", and the reference to St. James is clear [see Bickell, *Carmina Nisibena*, Leipzig, 1866, pp. 223, 4, note, and the other passage (seventy-third carmen) there discussed]. Next we would call attention to the witness of an ancient Ordo compiled, it is believed, in Greek before the middle of the fourth century, but which is preserved only in a fragmentary Latin version made before the end of the fifth century and recently discovered at Verona ("*Didascalie Apostolorum*" in "*Fragmenta Veronensia*", ed. Hauler, Leipzig, 1900), and in an Ethiopic version. This Ordo in both versions contains a form for consecrating the oil for the Jacobean rite, the Latin praying for "the strengthening and healing" of those who use it, and the Ethiopic for their "strengthening and sanctification". Mr. Puller, who gives and discusses both versions (op. cit., p. 104 sq.), is once more obliged

to postulate a corruption of the Ethiopic version because of the reference to sanctification. But may not the "strengthening" spoken of as distinct from "healing" be spiritual rather than corporal? Likewise the "Testamentum Domini", compiled in Greek about the year 400 or earlier, and preserved in Syriac (published by Rahmani), and in Ethiopic and Arabic versions (still in MSS.) contains a form for consecrating the oil of the sick, in which, besides bodily healing, the sanctifying power of the oil as applied to penitents is referred to (see "The Testament of Our Lord", tr. Cooper and Maclean, 1902, pp. 77, 78). From these instances it appears that Serapion's Sacramentary was not without parallels during this period.

In St. Augustine's "Speculum de Scripturâ" (an. 427); in P.L., XXXIV, 887-1040), which is made up almost entirely of Scriptural texts, without comment by the compiler, and is intended as a handy manual of Christian piety, doctrinal and practical, the injunction of St. James regarding the prayer-unction of the sick is quoted. This shows that the rite was a commonplace in the Christian practice of that age; and we are told by Possidius, in his "Life of Augustine" (c. xxvii, in P.L., XXXII, 56), that the saint himself "followed the rule laid down by the Apostle that he should visit only orphans and widows in their tribulation (James, i, 27), and that if he happened to be asked by the sick to pray to the Lord for them and *impose hands on them*, he did so without delay". We have seen Origen refer to the Jacobean rite as an "imposition of hands", and this title survived to a very late period in the Church of St. Ambrose, who was himself an ardent student of Origen and from whom St. Augustine very likely borrowed it (see Magistretti, "Manuale Ambrosianum ex Codice sæc. XI", etc., 1905, vol. I, p. 79 sq., 94 sq., 147 sq., where three different Ordines of the eleventh and thirteenth centuries have as title for the office of extreme unction, *impositio manuum super infirmum*). It is fair, then, to conclude from the biographer's statement that, when called upon to do so, St. Augustine himself used to administer the Jacobean unction to the sick. This would be exactly on the lines laid down by Augustine's contemporary, Pope Innocent I (see below). St. Ambrose himself, writing against the Novatians (De Poenit., VIII, in P.L., XVI, 477), asks: "Why therefore do you *lay on hands* and believe it to be an effect of the blessing [*benedictionis opus*] if any of the sick happen to recover? . . . Why do you baptize, if sins cannot be remitted by men?" The coupling of this laying-on of hands with baptism and the use of both as arguments in favor of penance, shows that there is question not of mere charismatic healing by a simple blessing, but of a rite which, like baptism, was in regular use among the Novatians, and which can only have been the unction of St. James. St. Athanasius, in his encyclical letter of 341 (P.G., XXV, 234), complaining of the evils to religion caused by the intrusion of the Arian Bishop Gregory, mentions among other abuses that many catechumens were left to die without baptism and that many sick and dying Christians had to choose the hard alternative

of being deprived of priestly ministrations--"which they considered a more terrible calamity than the disease itself"--rather than allow "the hands of the Arians to be laid on their heads". Here again we are justified in seeing a reference to extreme unction as an ordinary Christian practice, and a proof of the value which the faithful attached to the rite. Cassiodorus (d. about 570) thus paraphrases the injunction of St. James (Complexiones in Epp. Apostolorum, in P.L., LXX, 1380): "a priest is to be called in, who by the prayer of faith [*oratione fidei*] and the unction of the holy oil which he imparts will save him who is afflicted [by a serious injury or by sickness]."

To these testimonies may be added many instances of the use of extreme unction recorded in the lives of the saints. See, e.g., the lives of St. Leobinus (d. about 550; Acta SS., 14 March, p. 348), St. Tresanus (*ibid.*, 7 Feb., p. 55), St. Eugene (Eoghan), Bishop of Ardsrath (modern Ardstraw, in the Diocese of Derry; d. about 618; *ibid.*, 23 Aug., p. 627). One instance from the life of an Eastern saint, Hypatius (d. about 446), is worthy of particular notice. While still a young monk and before his elevation to the priesthood, he was appointed infirmarian in his monastery (in Bithynia), and while occupying this office he showed a splendid example of charity in his care of the sick, whom he sought out and brought to the monastery. "But if the necessity arose", says his disciple and biographer, "of anointing the sick person, he reported to the abbot, who was a priest (*en gar presbyteros*), and had the unction with the blessed oil performed by him. And it often happened that in a few days, God co-operating with his efforts, he sent the man home restored to health" (Acta SS., 17 June, p. 251). It appears from this testimony that the Jacobean unction was administered only to those who were seriously ill, that only a priest could administer it, that consecrated oil was used, that it was distinct from charismatic unction (which the saint himself used to perform, while still a layman, using consecrated oil), and finally that bodily healing did not always follow and was not apparently expected to follow, and that when it did take place it was not regarded as miraculous. It is, therefore, implied that other effects besides bodily healing were believed to be produced by the Jacobean unction, and these must be understood to be spiritual.

As evidence of the use of the unction by the Nestorians we may refer to the nineteenth canon of the synod held at Seleucia in 554 under the presidency of the Patriarch Joseph, and which, speaking of those who have been addicted to various diabolical and superstitious practices, prescribes that any such person on being converted shall have applied to him, "as to one who is corporally sick, the oil of prayer blessed by the priests" (Chabot, *Synodicon Orientale*, 1902, p. 363). Here, besides the legitimate use of the Jacobean unction, we have an early instance of an abuse, which prevails in the modern Orthodox (schismatical) church, of permitting the *euchelaion* to be administered, on certain days of the year, to people who are in perfect health, as a complement

of penance and a preparation for Holy Communion [see below VI, (3)]. That the Monophysites also retained the Jacobean unction after their separation from the Catholic Church (451) is clear from the fact that their liturgies (Armenian, Syrian, and Coptic) contain the rite for blessing the oil. There is reason to suppose that this portion of their liturgies in its present form has been borrowed from, or modelled upon, the Byzantine rite of a later period (see Brightman in "Journal of Theological Studies", I, p. 261), but this borrowing supposes that they already possessed the unction itself. It has nowadays fallen into disuse among the Nestorians and Armenians, though not among the Copts.

Many testimonies might be quoted in which the Jacobean unction is recommended specifically as a means of restoring bodily health, and the faithful are urged to receive it instead of recurring, as they were prone to do, to various superstitious remedies. This is the burden of certain passages in Procopius of Gaza [c. 465-525; "In Levit.", xix, 31, in P.G., LXXXVII (1), 762 sq.], Isaac of Antioch (b. about 350; Opp., ed. Bickell, Pt. I, pp. 187 sq.), St. Cyril of Alexandria (De Adorat. in Spiritu et Veritate, VI, in P.G., LXVIII, 470 sq.), St. Cæsarius of Arles (Serm. cclxxix, 5, "Append ad sermm. Augustini" in P.L., XXXIX, 2273), and John Mandakuni (Montagouni), Catholicos of the Armenians from 480 to 487 (Schmid, Reden des Joannes Mandakuni, pp. 222 sq.). This particular effect of the prayer-unction is the one specially emphasized in the form used to this day in the Orthodox Eastern Church (see above, I).

Mention of the remission of sins as an effect of the Jacobean rite is also fairly frequent. It is coupled with bodily healing by St. Cæsarius in the passage just referred to: the sick person will "receive both health of body and remission of sins, for the Holy Ghost has given this promise through James". We have mentioned the witness of John Cassian, and the witness of his master, St. Chrysostom, may be given here. In his work "On the Priesthood" (III, vi, in P.G., XLVIII, 644) St. Chrysostom proves the dignity of the priesthood by showing, among other arguments, that the priests by their spiritual ministry do more for us than our own parents can do. Whereas our parents only beget our bodies, which they cannot save from death and disease, the priests regenerate our souls in baptism and have power, moreover, to remit post-baptismal sins; a power which St. Chrysostom proves by quoting the text of St. James. This passage, like that of Origen discussed above, has given rise to no little controversy, and it is claimed by Mr. Puller (op. cit., pp. 45 sqq.) as a proof that St. Chrysostom, like Origen, understood St. James as he (Mr. Puller) does. But if this were so it would still be true that only clinical penance is referred to, for it is only of the sick that St. James can be understood to speak; and the main point of Mr. Puller's argument, viz., that it is inconceivable that St. Chrysostom should pass over the Sacrament of Penance in such a context, would have lost hardly any of its force. We know very little, except by way of inference and

assumption, about the practice of clinical penance in that age; but we are well acquainted with canonical penance as administered to those in good health, and it is to this obviously we should expect the saint to refer, if he were bound to speak of that sacrament at all. Mr. Puller is probably aware how very difficult it would be to prove that St. Chrysostom anywhere in his voluminous writings teaches clearly and indisputably the necessity of confessing to a priest: in other words, that he recognizes the Sacrament of Penance as Mr. Puller recognizes it; and in view of this general obscurity on a point of fundamental importance it is not at all so strange that penance should be passed over here. We do not pretend to be able to enter into St. Chrysostom's mind, but assuming that he recognized both penance and unction to be efficacious for the remission of post-baptismal sins--and the text before us plainly states this in regard to the unction--we may perhaps find in the greater affinity of unction with baptism, and in the particular points of contrast he is developing, a reason why unction rather than penance is appealed to. Regeneration by water in baptism is opposed to parental generation, and saving by oil from spiritual disease and eternal death to the inability of parents to save their children from bodily disease and death. St. Chrysostom might have added several other points of contrast, but he confines himself in this context to these two; and supposing, as one ought in all candor to suppose, that he understood the text of St. James as we do, in its obvious and natural sense, it is evident that the prayer-unction, so much more akin to baptism in the simplicity of its ritual character and so naturally suggested by the mention of sickness and death, supplied a much apter illustration of the priestly power of remitting post-baptismal sins than the judicial process of penance. And a single illustrative example was all that the context required.

Victor of Antioch (fifth century) is one of the ancient witnesses who, in the general terms they employ in speaking of the Jacobean unction, anticipate more or less clearly the definition of a sacrament in the strict sense. Commenting on St. Mark, vi, 13, Victor quotes the text of St. James and adds: "Oil both cures pains and is a source of light and refreshment. The oil, then, used in anointing *signifies* both the mercy of God, and the cure of the disease, and the enlightening of the heart. For it is manifest to all that the prayer *effected* all this; but the oil, as I think, was the *symbol* of these things" (Cramer, *Caten. Græc. Patrum*, I, p. 324). Here we have the distinction, so well known in later theology, between the *signification* and *causality* of a sacrament; only Victor attributes the signification entirely to the matter and the causality to the form (the prayer). This was to be corrected in the fully developed sacramental theory of later times, but the attribution of sacramental effects to the form (the prayer, the word, etc.) is characteristic of patristic suggestions of a theory. Victor clearly attributes both spiritual and corporal effects to the prayer-unction; nor can the fact that he uses the imperfect tense (*energei*, "effected"; *hyperche*, "was") be taken to imply that the use of

the unction had ceased at Antioch in his day. The use of the present tense in describing the signification of the rite implies the contrary, and independent evidence is clearly against the supposition. In the passage from John Mandakuni, referred to above, the prayer-unction is repeatedly described as "the gift of grace", "the grace of God", Divinely instituted and prescribed, and which cannot be neglected and despised without incurring "the curse of the Apostles"; language which it is difficult to understand unless we suppose the Armenian patriarch to have reckoned the unction among the most sacred of Christian rites, or, in other words, regarded it as being what we describe as a sacrament in the strict sense (cf. Kern, *op. cit.*, pp. 46, 47).

There remains to be noticed under this head the most celebrated of all patristic testimonies on extreme unction, the well-known passage in the Letter of Pope Innocent I (402-417), written in 416, to Decentius, Bishop of Eugubium, in reply to certain questions submitted by the latter for solution. In answer to the question as to who were entitled to the unction, the pope, having quoted the text of St. James, says: "There is no doubt that this text must be received or understood of the sick faithful, who may be [lawfully] anointed with the holy oil of chrism; which, having been blessed by the bishop, it is permitted not only to priests but to all Christians to use for anointing in their own need or that of their families." Then he diverges to point out the superfluous character of a further doubt expressed by Decentius: "We notice the superfluous addition of a doubt whether a bishop may do what is undoubtedly permitted to priests. For priests are expressly mentioned [by St. James] for the reason that bishops, hindered by other occupations, cannot go to all the sick. But if the bishop is able to do so or thinks anyone specially worthy of being visited, he, whose office it is to consecrate the chrism, need not hesitate to bless and anoint the sick person." Then, reverting to the original question, he explains the qualification he had added in speaking of "the sick faithful": "For this unction may not be given to penitents [i.e. to those undergoing canonical penance], seeing that it is a sacrament (*quia genus sacramenti est*). For how is it imagined that one sacrament [*unum genus*] may be given to those to whom the other sacraments are denied?" The pope adds that he has answered all his correspondent's questions in order that the latter's Church may be in a position to follow "the Roman custom" (P.L., XX, 559 sq., Denzinger, no. 99--old no. 61). We do not, of course, suggest that Pope Innocent had before his mind the definition of a sacrament in the strict sense when he calls the Jacobean unction a sacrament, but since "the other sacraments" from which penitents were excluded were the Holy Eucharist and certain sacred offices, we are justified in maintaining that this association of the unction with the Eucharist most naturally suggests an implicit faith on the part of Pope Innocent in what has been explicitly taught by Scholastic theologians and defined by the Council of Trent. It is interesting to observe that Mr. Puller, in discussing this text (*op. cit.*, pp

53 sqq.), omits all reference to the Holy Eucharist, though it is by far the most obvious and important of "the other sacraments" of which Innocent is speaking, and diverts his reader's attention to the *eulogia*, or blessed bread (*pain bénit*), a sacramental which was in use in many churches at that time and in later ages, but to which there is not the least reason for believing that the pope meant specially to refer. In any case the reference is certainly not exclusive, as Mr. Puller leaves his reader to infer. What Pope Innocent, following the "Roman custom", explicitly teaches is that the "sacrament" enjoined by St. James was to be administered to the sick faithful who were not doing canonical penance; that priests, and a fortiori bishops, can administer it; but that the oil must be blessed by the bishop. The exclusion of sick penitents from this "sacrament" must be understood, of course, as being subject to the same exception as their exclusion from "the other sacraments", and the latter are directed to be given before the annual Easter reconciliation when danger of death is imminent: "Quando usque ad desperandum venerit, ante tempus paschæ relaxandum [est] ne de sæculo [ægrotus] absque communione discedat." If the words of Innocent--and the same observation applies to other ancient testimonies, e.g. to that of Cæsarius of Arles referred to above--seem to imply that the laity were permitted to anoint themselves or members of their household with the oil consecrated by the bishop, yet it is clear enough from the text of St. James and from the way in which Pope Innocent explains the mention of priests in the text, that this could not have been considered by him to be identical with the Jacobean rite, but to be at most a pious use of the oil allowable for devotional, and possibly for charismatic, purposes. But it would not be impossible nor altogether unreasonable to understand the language used by Innocent and others in a causative sense, i.e. as meaning not that the laity were permitted to anoint themselves, but that they were to have the blessed oil at hand to secure their being anointed by the priests according to the prescription of St. James. We believe, however, that this is a forced and unnatural way of understanding such testimonies, all the more so as there is demonstrative evidence of the devotional and charismatic use of sacred oil by the laity during the early centuries.

It is worth adding, as a conclusion to our survey of this period, that Innocent's reply to Decentius was incorporated in various early collections of canon law, some of which, as for instance that of Dionysius Exiguus (P.L., LXVII, 240), were made towards the end of the fifth or the beginning of the sixth century. In this way Innocent's teaching became known and was received as law in most parts of the Western Church.

(c) The Seventh Century and Later.--One of the most important witnesses for this period is St. Bede (d. 735), who, in his commentary on the Epistle of St. James, tells us (P.L., XCIII, 39) that, as in Apostolic times, so "now the custom of the Church is that the sick should be anointed by the priests with consecrated oil and through the accom-

panying prayer restored to health". He adds that, according to Pope Innocent, even the laity may use the oil provided it has been consecrated by the bishop; and commenting on the clause, "if he be in sins they shall be remitted to him", after quoting I Cor., xi, 30, to prove that "many because of sins committed in the soul are stricken with bodily sickness or death", he goes on to speak of the necessity of confession: "If, therefore, the sick be in sins and shall have confessed these to the priests of the Church and shall have sincerely undertaken to relinquish and amend them, they shall be remitted to them. For sins cannot be remitted without the confession of amendment. Hence the injunction is rightly added [by James], 'Confess, therefore, your sins one to another.'" St. Bede thus appears to connect the remission of sins in St. James's text with penance rather than the unction, and is therefore claimed by Mr. Puller as supporting his own interpretation of the text. But it should be observed that in asserting the necessity of confessing post-baptismal sins, a necessity recognized in Catholic teaching, Bede *does not deny* that the unction *also* may be efficacious in remitting them, or at least in completing their remission, or in remitting the lighter daily sins which need not be confessed. The bodily sickness which the unction is intended to heal is regarded by St. Bede as being, often at any rate, the effect of sin; and it is interesting to notice that Amalarius of Metz, writing a century later (*De Eccles. Offic.*, I, xii, in P.L., CV, 1011 sq.), with this passage of Bede before him, expressly attributes to the unction not only the healing of sickness due to the unworthy reception of the Eucharist, but the remission of daily sins: "What saves the sick is manifestly the prayer of faith, of which the sign is the unction of oil. If those whom the unction of oil, i.e. the grace of God through the prayer of the priest, assists are sick for the reason that they eat the Body of the Lord unworthily, it is right that the consecration [of the oil] of which there is question should be associated with the consecration of the Body and Blood of the Lord, which takes place in commemoration of the Passion of Christ, by Whom the author of sin has been eternally vanquished. The Passion of Christ destroyed the author of death; His grace, which is signified by the unction of oil, has destroyed his arms, which are daily sins."

The confusing way in which St. Bede introduces penance in connection with the text of St. James is intelligible enough when we remember that the unction was regarded and administered as a complement of the Sacrament of Penance, and that no formal question had yet been raised about their respective independent effects. In the circumstances of the age it was more important to insist on the necessity of confession than to discuss with critical minuteness the effects of the unction, and one had to be careful not to allow the text of St. James to be misunderstood as if it dispensed with this necessity for the sick sinner. The passage in St. Bede merely proves that he was preoccupied with some such idea in approaching the text of St. James. Paschasius Radbertus (writing

about 831) says from the same standpoint that " *according to the Apostle* when anyone is sick, recourse is to be had in the first place to confession of sins, then to the prayer of many, then to the sanctification of the unction [or, the unction of sanctification]" (De Corp. et Sang. Domini, c. viii, in P.L., CXX, 1292); and the same writer, in what he tells us of the death of his abbot, St. Adelhard of Corbie, testifies to the prevalence of an opinion that it was only those in sins who had need of the unction. The assembled monks, who regarded the holy abbot as "free from the burdens of sins", doubted whether they should procure the Apostolic unction for him. But the saint, overhearing the debate, demanded that it should be given at once, and with his dying breath exclaimed: "Now dismiss thy servant in peace, because I have received all the sacraments of Thy mystery" (P.L., CXX, 1547).

As proving the uninterrupted universality during this period of the practice of the Jacobean rite, with a clear indication in some instances of its strictly sacramental efficacy, we shall add some further testimonies from writers, synods, and the precepts of particular bishops. As doubts may be raised regarding the age of any particular expression in the early medieval liturgies, we shall omit all reference to them. There is all the less need to be exhaustive as the adversaries of Catholic teaching are compelled to admit that from the eighth century onwards the strictly sacramental conception of the Jacobean rite emerges clearly in the writings and legislation of both the Eastern and the Western Churches. Haymo, Bishop of Halberstadt (841-853), in his Homily on Luke, ix, 6 (P.L., CXVIII, 573), and Amulo, Bishop of Lyons (about 841), in his letter Theobald (P.L., CXVI, 82), speak of the unction of the sick as an Apostolic practice. Prudentius, Bishop of Treves (about 843- 861), tells how the holy virgin Maura asked to receive from his own hands "the Sacraments of the Eucharist and of Extreme Unction" (P.L., CXV, 1374; cf. Acta SS., 21 Sept., p. 272); and Jonas, Bishop of Orléans, in his "Institutio Laicalis" (about 829), after reprobating the popular practice of recurring in sickness to magical remedies, says: "It is obligatory on anyone who is sick to demand, not from wizards and witches, but from the Church and her priests, the unction of sanctified oil, a remedy which [as coming] from Our Lord Jesus Christ will benefit him not only in body but in soul" (III, xiv, in P.L., CVI, 122 sq.). Already the Second Council of Châlon-sur-Saône (813), in its forty-eighth canon, had prescribed as obligatory the unction enjoined by St. James, "since a medicine of this kind which heals the sicknesses of soul and of body is not to be lightly esteemed" (Hardouin, IV, 1040). The Council of Aachen in 836 warns the priest not to neglect giving penance and unction to the sick person (once his illness becomes serious), and when the end is seen to be imminent the soul is to be commended to God "more sacerdotali cum acceptione sacræ communionis" (cap. ii, can. v, *ibid.*, 1397). The First Council of Mainz (847), held under the presidency of Rhabanus Maurus (cap. xxvi), prescribed in the same order the admin-

istration of penance, unction, and the Viaticum (Hardouin, V, 13); while the Council of Pavia (850), legislating, as seems clear from the wording of the capitulary (viii), according to the traditional interpretation of Pope Innocent's letter to Decentius (see above), directs preachers to be sedulous in instructing the faithful regarding "that salutary sacrament which James the Apostle commends. . . a truly great and very much to be desired mystery, by which, if asked for with faith, both sins are remitted and as a consequence corporal health restored" (ibid., III, 27; Denzinger, Freiburg, 1908, no. 315).

The statutes attributed to St. Sonnatius, Archbishop of Reims (about 600-631), and which are certainly anterior to the ninth century, direct (no. 15) that "extreme unction is to be brought to the sick person who asks for it", and "that the pastor himself is to visit him often, animating and duly preparing him for future glory" (P.L., LXXX, 445; cf. Hefele, *Conciliengesch.*, III, 77). The fourth of the canons promulgated (about 745) by St. Boniface, the Apostle of Germany (see Hefele, III, 580 sq.), forbids priests to go on a journey "without the chrism, and the blessed oil, and the Eucharist", so that in any emergency they may be ready to offer their ministrations; and the twenty-ninth orders all priests to have the oil of the sick always with them and to warn the sick faithful to apply for the unction (P.L., LXXXIX, 821 sq.). In the "Excerptiones" of Egbert, Archbishop of York (732-766), the unction is mentioned between penance and the Eucharist, and ordered to be diligently administered (P.L., LXXXIX, 382). But no writer of this period treats of the unction so fully as, and none more undeniably regards it as a true sacrament in the strict sense that, Theodulf, Bishop of Orleans, and with him we will conclude our list of witnesses. A long section of his second *Capitulare*, published in 789, is taken up with the subject (P.L., CV, 220 sq.): "Priests are also to be admonished regarding the unction of the sick, and penance and the Viaticum, lest anyone should die without the Viaticum." Penance is to be given first, and then, "if the sickness allow it," the patient is to be carried to the church, where the unction and Holy Communion are to be given. Theodulf describes the unction in detail, ordering fifteen, or three times five, crosses to be made with the oil to symbolize the Trinity and the five senses, but noting at the same time that the practice varies as to the number of anointings and the parts anointed. He quotes with approval the form used by the Greeks while anointing, in which remission of sins is expressly mentioned; and so clearly is the unction in his view intended as a preparation for death that he directs the sick person after receiving it to commend his soul into the hands of God and bid farewell to the living. He enjoins the unction of sick children also on the ground that it sometimes cures them, and that penance is (often) necessary for them. Theodulf's teaching is so clear and definite that some Protestant controversialists recognize him as the originator in the West of the teaching which, as they claim, transformed the

Jacobean rite into a sacrament. But from all that precedes it is abundantly clear that no such transformation occurred. Some previous writers, as we have seen, had explicitly taught and many had implied the substance of Theodulf's doctrine, to which a still more definite expression was later to be given. The Scholastic and Tridentine doctrine is the only goal to which patristic and medieval teaching could logically have led.

IV. MATTER AND FORM

(For the technical meaning of these terms in sacramental theology see SACRAMENTS.)

(1) The *remote* matter of extreme unction is consecrated oil. No one has ever doubted that the oil meant by St. James is the oil of olives, and in the Western Church pure olive oil without mixture of any other substance seems to have been almost always used. But in the Eastern Church the custom was introduced pretty early of adding in some places a little water, as a symbol of baptism, in others a little wine, in memory of the good Samaritan, and, among the Nestorians, a little ashes or dust from the sepulchre of some saint. But that the oil must be blessed or consecrated before use is the unanimous testimony of all the ages. Some theologians, however, have held consecration to be necessary merely as a matter of precept, not essential for the validity of the sacrament, e.g. Victoria (Summ. Sacramentorum, no. 219), Juénin (Comm. hist. et dogm. de Sacram., D. vii, q. iii, c. i), de Sainte-Beuve (De Extr. Unct., D. iii, a. 1), Drouven (De Re Sacramentariâ, Lib. VII, q. ii, c. i, 2); indeed Berti, while holding the opposite himself, admitted the wide prevalence of this view among the recent theologians of his day. But considering the unanimity of tradition in insisting on the oil being blessed, and the teaching of the Council of Trent (Sess. XIV) that "the Church has understood the matter [of this sacrament] to be oil blessed by the bishop", it is not surprising that by a decree of the Holy Office, issued 13 Jan., 1611, the proposition asserting the validity of extreme unction with the use of oil not consecrated by the bishop should have been proscribed as "rash and near to error" (Denzinger, no. 1628--old no. 1494), and that, to the question whether a parish priest could in case of necessity validly use for this sacrament oil blessed by himself, the same Holy Office, reaffirming the previous decree, should have replied in the negative (14 Sept., 1842; *ibid.*, no. 1629--old no. 1495). These decisions only settle the dogmatic question provisionally and, so far as they affirm the necessity of *episcopal* consecration of the oil, are applicable only to the Western Church. As is well known it is the officiating priest or priests who ordinarily bless the oil in the Eastern Orthodox Church, and there is no lack of evidence to prove the antiquity of this practice (see Benedict XIV, De Synod. Dioec., VIII, i, 4). For Italo-Greeks in communion with the Holy See the practice was sanctioned by Clement VIII in 1595 and by Benedict XIV (see *ibid.*) in 1742; and it has likewise been sanctioned for various bodies of Eastern Uniates down to our own day (see "Collect. Lacensis", II,

pp. 35, 150, 582, 479 sq.; cf. Letter of Leo XIII, "De Discipl. Orient. conservandâ" in "Acta S. Sedis", XXVII, pp. 257 sq.). There is no doubt, therefore, that priests can be delegated to bless the oil validly, though there is no instance on record of such delegation being given to Western priests. But it is only the supreme authority in the Church that can grant delegation, or at least it may reserve to itself the power of granting it (in case one should wish to maintain that in the absence of reservation the ordinary bishop would have this power). The Eastern Uniats have the express approbation of the Holy See for their discipline, and, as regards the schismatical Orthodox, one may say either that they have the tacit approbation of the pope or that the reservation of episcopal power does not extend to them. In spite of the schism the pope has never wished or intended to abrogate the ancient privileges of the Orthodox in matters of this kind.

The prayers for blessing the oil that have come down to us differ very widely, but all of them contain some reference to the purpose of anointing the sick. Hence, at least in the case of a bishop, whose power is ordinary and not delegated, no special form would seem to be necessary for validity, provided this purpose is expressed. But where it is not at all expressed or intended, as in the forms at present used for blessing the chrism and the oil of catechumens, it appears doubtful whether either of these oils would be valid matter for extreme unction (cf. Kern, *op. cit.*, p. 131). But in the nature of things there does not seem to be any reason why a composite form of blessing might not suffice to make the same oil valid matter for more than one sacrament.

(2) The *proximate* matter of extreme unction is the unction with consecrated oil. The parts anointed according to present usage in the Western and Eastern Churches have been mentioned above (I), but it is to be observed that even today there are differences of practice in various branches of the Orthodox Church (see *Echos d'Orient*, 1899, p. 194). The question is whether several unctions are necessary for a valid sacrament, and if so, which are the essential ones. Arguing from the practice with which they were acquainted and which they assumed to have existed always, the Scholastics not unnaturally concluded that the unctions of the five organs of sense were essential. This was the teaching of St. Thomas (Suppl., Q. xxxii, a. 6), who has been followed pretty unanimously by the School and by many later theologians down to our own day (e.g. Billot, *De Sacramentis*, II, p. 231) who set the method and tradition of the School above positive and historical theology. But a wider knowledge of past and present facts has made it increasingly difficult to defend this view, and the best theologians of recent times have denied that the unction of the five senses, any more than that of the feet or loins, is essential for the validity of the sacrament. The facts, broadly speaking, are these: that no ancient testimony mentions the five unctions at all, much less prescribes them as necessary, but most of them speak simply of unction in a way

that suggests the sufficiency of a single unction; that the unction of the five senses has never been extensively practiced in the East, and is not practiced at the present time in the Orthodox Church, while those Uniats who practice it have simply borrowed it in modern times from Rome; and that even in the Western Church down to the eleventh century the practice was not very widespread, and did not become universal till the seventeenth century, as is proved by a number of sixteenth-century Rituals that have been preserved (for details and sources see Kern, *op. cit.*, p. 133 sq.). In face of these facts it is impossible any longer to defend the Scholastic view except by maintaining that the Church has frequently changed the essential matter of the sacrament, or that she has allowed it to be invalidly administered during the greater part of her history, as she still allows without protest in the East. The only conclusion, therefore, is that as far as the matter is concerned nothing more is required for a valid sacrament than a true unction with duly consecrated oil, and this conclusion may henceforth be regarded as certain by reason of the recent decree of the Holy Office already referred to (I), which, though it speaks only of the form, evidently supposes that form to be used with a single unction. Besides the authority of the Scholastic tradition, which was based on ignorance of the facts, the only dogmatic argument for the view we have rejected is to be found in the instruction of Eugene IV to the Armenians [see above, III (A)]. But in reply to this argument it is enough to remark that this decree is not a dogmatic definition but a disciplinary instruction, and that, if it were a definition, those who appeal to it ought in consistency to hold the unction of the feet and loins to be essential. It is hardly necessary to add that, while denying the necessity of the unctions prescribed in the Roman Ritual for the validity of the sacrament, there is no intention of denying the grave obligation of adhering strictly to the Ritual except, as the Holy Office allows, in cases of urgent necessity.

(3) The forms of extreme unction from the Roman Ritual and the Euchologion have been given above (I). However ancient may be either form in its substance, it is certain that many other forms substantially different from the present have been in use both in the East and the West (see Martène, "*De Antiquis Eccl. Rit.*", I, vii, 4; and Kern, *op. cit.*, pp. 142-152); and the controversy among theologians as to what precise form or kind of form is necessary for the validity of the sacrament has followed pretty much the same lines as that about the proximate matter. That some form is essential, and that what is essential is contained in both the Eastern and Western forms now in use, is admitted by all. The problem is to decide not merely what words in either form may be omitted without invalidating the sacrament, but whether the words retained as essential must necessarily express a prayer--"the prayer of faith" spoken of by St. James. Both forms as now used are deprecatory, and for the West the Holy Office has decided what words may be omitted in case of necessity from the form of the Roman

Ritual. That the form, whether short or long, must be a prayer-form, and that a mere indicative form, such as "I anoint thee" etc., would not be sufficient for validity, has been the opinion of most of the great Scholastics and of many later theologians. But not a few Scholastics of eminence, and nearly all later theologians who have made due allowance for the facts of history, have upheld the opposite view. For the fact is that the indicative form has been widely used in the East and still more widely in the West; it is the form we meet with in the very earliest Church Orders preserved, viz., those of the Celtic Church (see Warren, "Liturgy and Ritual of the Celtic Church", e.g. p. 168: "I anoint thee with sanctified oil in the name of the Trinity that thou mayst be saved for ever and ever"; cf. p. 223). Among contemporary theologians Kern (op. cit., pp. 154 sq.), who is followed by Pohle (Lehrbuch der Dogmatik, 3d ed., Paderborn, 1908, III, 534) suggests a compromise by holding, on the one hand, that at least a virtual prayer-form is required by the text of St. James and, on the other hand, that the indicative forms that have been used are virtually deprecatory. But this seems to be only a subtle way of denying the *raison d'être* of the controversy; one might argue on the same principle that the forms of baptism, penance, and confirmation are virtually prayer-forms. Some of the so-called indicative forms may be reasonably construed in this way, but in regard to others we may say, with Benedict XIV, that "we do not know how a prayer can be discovered in certain other forms published from very many ancient Rituals by Ménard and Martène, in which there is used merely the words 'I anoint thee' without any thing else being added from which a prayer can be deduced or fashioned" (De Synod. Dioec., VIII, ii, 2). If it be insisted that prayer as such must be in some way an element in the sacrament, one may say that the prayer used in blessing the oil satisfies this requirement. What has been said in regard to the matter is to be repeated here, viz., that the dogmatic controversy about the form does not affect the disciplinary obligation of adhering strictly to the prescriptions of the Ritual, or, for cases of urgent necessity, to the decree of the Holy Office.

V. MINISTER

(1) The Council of Trent has defined in accordance with the words of St. James that the proper ministers (*proprios ministros*) of this sacrament are the priests of the Church alone, that is bishops or priests ordained by them (Sess. XIV, cap. iii, and can. iv, De Extr. Unct.). And this has been the constant teaching of tradition, as is clear from the testimonies given above. Yet Launoi (Opp., I, 569 sq.) has maintained that deacons can be validly delegated by the bishop to administer extreme unction, appealing in support of his view to certain cases in which they were authorized in the absence of a priest to reconcile dying penitents and give them the Viaticum. But in none of these cases is extreme unction once mentioned or referred to, and one may not gratuitously assume that the permission given extended to this sacrament, all the more so

as there is not a particle of evidence from any other source to support the assumption. The Carmelite Thomas Waldensis (d. 1430) inferred from the passage of Innocent I [see above, under III (C), (2), (b)] that, in case of necessity when no priest could be got, a layman or woman might validly anoint (*Doctrinale Antiq. Fidei*, II, clxiii, 3), and quite recently Boudinhon (*Revue Cath. des Eglises*, July, 1905, p. 401 sq.) has defended the same view and improved upon it by allowing the sick person to administer the sacrament to himself or herself. This opinion, however, seems to be clearly excluded by the definition of the Council of Trent that the priest alone is the "proper" minister of extreme unction. The word *proper* cannot be taken as equivalent merely to *ordinary*, and can only mean "Divinely authorized". And as to the unction of themselves or others by lay persons with the consecrated oil, it is clear that Pope Innocent, while sanctioning the pious practice, could not have supposed it to be efficacious in the same way as the unction by a priest or bishop, to whom alone in his view the administration of the Jacobean rite belonged. This lay unction was merely what we call today a sacramental. Clericatus (*Decisiones de Extr. Unct.*, decis. lxxv) has held that a sick priest in case of necessity can validly administer extreme unction to himself; but he has no argument of any weight to offer for this opinion, which is opposed to all sacramental analogy (outside the case of the Eucharist) and to a decision of the Congregation of Propaganda issued 23 March, 1844. These several singular opinions are rejected with practical unanimity by theologians, and the doctrine is maintained that the priests of the Church, and they alone, can validly confer extreme unction.

(2) The use of the plural in St. James--"the priests of the Church"--does not imply that several priests are required for the valid administration of the sacrament. Writing, as we may suppose, to Christian communities in each of which there was a number of priests, and where several, if it seemed well, could easily be summoned, it was natural for the Apostle to use the plural without intending to lay down as a matter of necessity that several should actually be called in. The expression used is merely a popular and familiar way of saying: "Let the sick man call for priestly ministrations", just as one might say, "Let him call in the doctors", meaning, "Let him procure medical aid". The plural in either case suggests at the very most the desirability, if the circumstances permit, of calling in more than one priest or doctor, but does not exclude, as is obvious, the services of only one, if only one is available, or if for a variety of possible reasons it is better that only one should be summoned. As is evident from several of the witnesses quoted above (III), not only in the West but in the East the unction was often administered in the early centuries by a single priest; this has been indeed at all times the almost universal practice in the West (for exceptions cf. Martène, *op. cit.*, I, vii, 3; Kern, *op. cit.*, p. 259). In the East, however, it has been more generally the custom for several priests to take part in the administration of the sacrament. Although the

number seven, chosen for mystical reasons, was the ordinary number in many parts of the East from an earlier period, it does not seem to have been prescribed by law for the Orthodox Church before the thirteenth century (cf. Kern, op. cit., p. 260). But even those Oriental theologians who with Symeon of Thessalonica (fifteenth century) seem to deny the validity of unction by a single priest, do not insist on more than three as necessary, while most Easterns admit that one is enough in case of necessity (cf. Kern, op. cit., p. 261). The Catholic position is that either one or several priests may validly administer extreme unction; but when several officiate it is forbidden by Benedict XIV for the Italo-Greeks (Const. "Etsi Pastoralis", 1742) for one priest merely to anoint and another merely to pronounce the form, and most theologians deny the validity of the unction conferred in this way. The actual practice, however, of the schismatical churches is for each priest in turn to repeat the whole rite, both matter and form, with variations only in the non-essential prayers. This gives rise to an interesting question which will best be discussed in connection with the repetition of the sacrament (below, IX).

VI. SUBJECT

(1) Extreme Unction may be validly administered only to Christians who have had the use of reason and who are in danger of death from sickness. That the subject must be baptized is obvious, since all the sacraments, besides baptism itself, are subject to this condition. This is implied in the text of St. James: "Is any man sick *among you*?" i.e. any member of the Christian community; and tradition is so clear on the subject that it is unnecessary to delay in giving proof. It is not so easy to explain on internal grounds why extreme unction must be denied to baptized infants who are sick or dying, while confirmation, for instance, may be validly administered to them; but such is undoubtedly the traditional teaching and practice. Except to those who were capable of penance extreme unction has never been given. If we assume, however, that the principal effect of extreme unction is to give, with sanctifying grace or its increase, the right to certain actual graces for strengthening and comforting and alleviating the sick person in the needs and temptations which specially beset him in a state of dangerous illness, and that the other effects are dependent on the principal, it will be seen that for those who have not attained, and will not attain, the use of reason till the sickness has ended in death or recovery, the right in question would be meaningless, whereas the similar right bestowed with the *character* in confirmation may, and normally does, realize its object in later life. It is to be observed in regard to children, that no age can be specified at which they cease to be incapable of receiving extreme unction. If they have attained sufficient use of reason to be capable of sinning even venially, they may certainly be admitted to this sacrament, even though considered too young according to modern practice to receive their First Communion; and in cases of doubt the unction should be administered conditionally. Those who have always been insane or idiotic

are to be treated in the same way as children; but anyone who has ever had the use of reason, though temporarily delirious by reason of the disease or even incurable insane, is to be given the benefit of the sacrament in case of serious illness.

(2) Grave or serious bodily illness is required for the valid reception of extreme unction. This implied in the text of St. James and in Catholic tradition (see above, III), and is formally stated in the decree of Eugene IV for the Armenians: "This sacrament is not to be given except to the sick person, of whose death fears are entertained" (Denzinger, no. 700--old no. 595), and in the teaching of the Council of Trent that "this unction is to be administered to the sick, but *especially* to those who seem to be at the point of death [*in exitu vitæ*]" (Sess. XIV, cap. iii, De Extr. Unct.). It is clear from these words of Trent that extreme unction is not for the dying alone, but for all the faithful who are seriously ill with any sickness as involves danger of death (*discrimen vitæ*, *ibid.*), i.e. as may probably terminate fatally. How grave must be the illness or how proximate the danger of death is not determined by the council, but is left to be decided by the speculations of theologians and the practical judgment of priests directly charged with the duty of administering the sacrament. And there have been, and perhaps still are, differences of opinion and of practice in this matter.

(3) Down to the twelfth century in the Western Church the practice was to give the unction freely to all (except public penitents) who were suffering from any serious illness, without waiting to decide whether danger of death was imminent. This is clear from many testimonies quoted above (III). But during the twelfth and thirteenth centuries a change of practice took place, and the sacrament came to be regarded by many as intended only for the dying. The causes contributing to this change were: (a) the extortionate demands of the clergy on the occasion of administering the unction which prevented the poor or even those of moderate means from asking for it except as a last resource; (b) the influence of certain popular superstitions, as, for instance, that the person anointed could not, in case of recovery, use the rights of marriage, eat flesh meat, make a will, walk with bare feet, etc.; and (c) the teaching of the Scotist School and of other theologians that, as the principal effect of the sacrament was the final remission of venial sins, it should not be given except to those who could not recover, and were no longer able or at least likely to fall again into venial sin (St. Bonaventure, "Breviloquium", P. VI, c. xi; Scotus, "Report. Parisien.", dist. xxiii, Q. unica). It was doubtless under the influence of this teaching that one or two provincial synods of the sixteenth century described the subject of extreme unction as "the dangerously sick and almost dying" (Hardouin, X, 1848, 1535); and the neglect of the sacrament induced by these several causes resulted, during the disturbances of the sixteenth century, in its total abandonment in many parts of Germany and especially of Bavaria (Knöpfler, "Die Kelchbewegung in Bayern unter Herzog Albrecht V.", pp. 61 sq.; and on this

whole matter see Kern, *op. cit.*, pp. 282 sq.). In view of these facts, the oft-repeated accusation of the Eastern schismatics, that the Latins gave the sacrament only to the dying and withheld it from the seriously ill who were capable of receiving it, is not without foundation (Kern, *op. cit.*, p. 274); but they were wrong in assuming that the Western Church as a whole or the Holy See is responsible for abuses of this kind. Church authority earnestly tried to correct the avarice of the clergy and the superstitions of the people, while the Scotist teaching, regarding the chief effect of the unction, was never generally admitted in the schools, and its post-Tridentine adherents have felt compelled to modify the practical conclusion which St. Bonaventure and Scotus had logically drawn from it. There still linger in the popular mind traces of the erroneous opinion that extreme unction is to be postponed till a sickness otherwise serious has taken a critical turn for the worse, and the danger of death become imminent; and priests do not always combat this idea as strongly as they ought to, with the result that possibly in many cases the Divinely ordained effect of corporal healing is rendered impossible except by a miracle. The best and most recent theological teaching is in favor of a lenient, rather than of a severe, view of the gravity of the sickness, or the proximity of the danger of death, required to qualify for the valid reception of extreme unction; and this is clearly compatible with the teaching of the Council of Trent and is supported by the traditional practice of the first twelve centuries.

But if the Easterns have had some justification for their charge against the Westerns of unduly restricting the administration of this sacrament, the Orthodox Church is officially responsible for a widespread abuse of the opposite kind which allows the euchelaion to be given to persons in perfect health as a complement of penance and a preparation for Holy Communion. Many Western theologians, following Goar (*Euchologion*, pp. 349 sq.), have denied that this rite was understood and intended to be sacramental, though the matter and form were employed precisely as in the case of the sick; but, whatever may have been the intention in the past, it is quite certain at the present time that at least in the Constantinopolitan and Hellenic branches of the Orthodox Church the intention is to give the sacrament itself and no mere sacramental to those in sound health who are anointed (Kern, *op. cit.*, 281). On the other hand, in the Russian Church, except in the metropolitan churches of Moscow and Novgorod on Maundy Thursday each year, this practice is reprobated, and priests are expressly forbidden in their faculties to give the euchelaion to people who are not sick (Kern, pp. 279 sq.; Fortescue, *The Orthodox Eastern Church*, London, 1907, p. 425). We have already noticed (III) among Nestorians what appears to have been a similar abuse, but in the Orthodox Church till long after the schism there is no evidence of its existence, and the teaching of Eastern theologians down to modern times, to which the Russians

still adhere, has been at one with the Western tradition in insisting that the subject of this sacrament must be labouring under a serious sickness.

(4) Nor will danger, or even certainty, of death from any other cause than sickness qualify a person for extreme unction. Hence criminals or martyrs about to suffer death and other similarly circumstanced may not be validly anointed unless they should happen to be seriously ill. But illness caused by violence, as by a dangerous or fatal wound, is sufficient; and old age itself without any specific disease is held by all Western theologians to qualify for extreme unction, i.e. when senile decay has advanced so far that death already seems probable. In cases of lingering diseases, like phthisis or cancer, once the danger has become really serious, extreme unction may be validly administered even though in all human probability the patient will live for a considerable time, say several months; and the lawfulness of administering it in such cases is to be decided by the rules of pastoral theology. If in the opinion of doctors the sickness will certainly be cured, and all probable danger of death removed by a surgical operation, theologians are not agreed whether the person who consents to undergo the operation ceases thereby to be a valid subject for the sacrament. Kern holds that he does (op. cit., p. 299), but his argument is by no means convincing.

VII. EFFECTS

The decree of Eugene IV for the Armenians describes the effects of extreme unction briefly as "the healing of the mind and, so far as it is expedient, of the body also" (Denzinger, no. 700--old no. 595). In Sess. XIV, can. ii, De Extr. Unct., the Council of Trent mentions the conferring of grace, the remission of sins, and the alleviation of the sick, and in the corresponding chapter explains as follows the effects of the unction: "This effect is the grace of the Holy Ghost, whose unction blots out sins, if any remain to be expiated, and the consequences [reliquias] of sin, and alleviates and strengthens the soul of the sick person, by exciting in him a great confidence in the Divine mercy, sustained by which [confidence] he bears more lightly the troubles and sufferings of disease, and more easily resists the temptations of the demon lying in wait for his heel, and sometimes, when it is expedient for his soul's salvation, recovers bodily health." The remission of sins, as we have seen, is explicitly mentioned by St. James, and the other spiritual effects specified by the Council of Trent are implicitly contained, side by side with bodily healing, in what the Apostle describes as the saving and raising up of the sick man (see above, II).

(1) It is therefore a doctrine of Catholic faith that sins are remitted by extreme unction, and, since neither St. James nor Catholic tradition nor the Council of Trent limits this effect to venial sins, it is quite certain that it applies to mortal sins also. But according to Catholic teaching there is *per se* a grave obligation imposed by Divine law of confessing all mortal sins committed after baptism and obtaining absolution

from them; from which it follows that one guilty of mortal sin is bound *per se* to receive the Sacrament of Penance before receiving extreme unction. Whether he is further bound, in case penance cannot be received, to prepare himself for extreme unction by an act of perfect contrition is not so clear; but the affirmative opinion is more commonly held by the theologians, on the ground that extreme unction is primarily a sacrament of the living, i.e. intended for those in the state of grace, and that every effort should be made by the subject to possess this primary disposition. That the remission at least of mortal sins is not the primary end of extreme unction is evident from the conditional way in which St. James speaks of this effect; "and *if* he be in sins" etc.; but, on the other hand, this effect is attributed, if conditionally and secondarily, yet directly and *per se* to the unction--not indirectly and *per accidens* as we attribute it to other sacraments of the living--which means that extreme unction has been instituted secondarily as a sacrament of the dead, i.e. for the purpose not merely of increasing but of conferring sanctifying grace sacramentally. Hence, if for any reason the subject in mortal sin is excused from the obligation of confessing or of eliciting an act of perfect contrition, extreme unction will remit his sin and confer sanctifying grace, provided he has actual, or at least habitual, attrition, or provided (say on recovering the use of reason) he elicits an act of attrition so that the sacrament may take effect by way of reviviscence (see below, X). By habitual attrition in this connection is meant an act of sorrow or detestation for sins committed, elicited since their commission and not retracted in the interval before the sacrament is received. The ordinary example occurs when the act of attrition has been elicited before the sick person lapses into unconsciousness or loses the use of reason. That such attrition is necessary, follows from the teaching of Trent (Sess. XIV, cap. i, De Poenit.) regarding the absolute and universal necessity of repentance for the remission, even in baptism, of personal mortal sins. Schell has maintained (Kathol. Dogmatik, III, pp. 629 sq.) that such attrition is not required for the validity of extreme unction, but that the general purpose and intention, which a Christian sinner may retain even when he is sinning, of afterwards formally repenting and dying in the friendship of God, is sufficient; but this view seems irreconcilable with the teaching of Trent, and has the whole weight of theological tradition against it.

Extreme unction likewise remits venial sins provided the subject has at least habitual attrition for them; and, following the analogy of penance, which with attrition remits mortal sins, for the remission of which outside the sacrament perfect contrition would be required, theologians hold that with extreme unction a less perfect attrition suffices for the remission of venial sins than would suffice without the sacrament. But besides thus directly remitting venial sins, extreme unction also excites dispositions which procure their remission *ex opere operantis*.

The relics or effects of sin mentioned by the Council of Trent are variously understood by theologians to mean one, or more, or all of the following: spiritual debility and depression caused by the consciousness of having sinned; the influence of evil habits induced by sin; temporal penalties remaining after the guilt of sin has been forgiven; and venial, or even mortal, sins themselves. Of these only the remission of temporal punishment is distinct from the other effects of which the council speaks; and though some theologians have been loath to admit this effect at all, lest they might seem to do away with the *raison d'être* of purgatory and of prayers and indulgences for the dying and dead, there is really no solid ground for objecting to it, if passing controversial interests are subordinated to Catholic theory. It is not suggested that extreme unction, like baptism, sacramentally remits *all* temporal punishment due to sin, and the extent to which it actually does so in any particular case may, as with baptism, fall short of what was Divinely intended, owing to obstacles or defective dispositions in the recipient. Hence there is still room and need for Indulgences for the dying, and if the Church offers her prayers and applies Indulgences for adults who die immediately after baptism, she ought, a fortiori, to offer them for those who have died after extreme unction. And if temporal punishment be, as it certainly is, one of the reliquies of sin, and if extreme unction be truly what the Council of Trent describes (Sess. XIV, De Extr. Unct., introduct.) as "the consummation not merely of [the Sacrament of] Penance, but of the whole Christian life, which ought to be a perpetual penance", it is impossible to deny that the remission of temporal punishment is one of the effects of this sacrament.

(2) The second effect of extreme unction mentioned by the Council of Trent is the alleviation and strengthening of the soul by inspiring the sick person with such confidence in the Divine mercy as will enable him patiently and even cheerfully to bear the pains and worries of sickness, and with resolute courage to repel the assaults of the tempter in what is likely to be the last and decisive conflict in the warfare of eternal salvation. The outlook on eternity is brought vividly before the Christian by the probability of death inseparable from serious sickness, and this sacrament has been instituted for the purpose of conferring the graces specially needed to fortify him in facing this tremendous issue. It is unnecessary to explain in detail the appropriateness of such an institution, which, were other reasons wanting, would justify itself to the Christian mind by the observed results of its use.

(3) Finally, as a conditional and occasional effect of extreme unction, comes the restoration of bodily health, an effect which is vouched for by the witness of experience in past ages and in our own day. Theologians, however, have failed to agree in stating the condition on which this effect depends or in explaining the manner in which it is produced. "When it is expedient for the soul's salvation", is how Trent expresses the

condition, and not a few theologians have understood this to mean that health will not be restored by the sacrament unless it is foreseen by God that a longer life will lead to a greater degree of glory--recovery being thus a sign or proof of predestination. But other theologians rightly reject this opinion, and of several explanations that are offered (cf. Kern, *op. cit.*, pp. 195 sq.) the simplest and most reasonable is that which understands the condition mentioned not of the future and perhaps remote event of actual salvation, but of present spiritual advantage which, independently of the ultimate result, recovery may bring to the sick person; and holds, subject to this condition, that this physical effect, which is in itself natural, is obtained mediately through and dependently upon the spiritual effects already mentioned. The fortifying of the soul by manifold graces, by which over-anxious fears are banished, and a general feeling of comfort and courage, and of humble confidence in God's mercy and peaceful resignation to His Will inspired, reacts as a natural consequence on the physical condition of the patient, and this reaction is sometimes the factor that decides the issue of certain diseases. This mediate and dependent way of effecting restoration of health is the way indicated by the Council of Trent in the passage quoted above, and the view proposed is in conformity with the best and most ancient theoretical teaching on the subject and avoids the seemingly unanswerable difficulties involved in opposing views. Nor does it reduce this effect of extreme unction to the level of those perfectly natural phenomena known to modern science as "faith cures". For it is not maintained, in the first place, that recovery will follow in any particular case unless this result is spiritually profitable to the patient--and of this God alone is the judge--and it is admitted, in the second place, that the spiritual effect, from which the physical connaturally results, is itself strictly supernatural (cf. Kern, *loc. cit.*).

(4) There remains the question, on which no little controversy has been expended, as to which of these several effects is the principal one. Bearing in mind the general theory that sacramental grace as such is sanctifying grace as imparted or increased by the sacrament, with the right or title to special actual graces corresponding to the special end of each sacrament, the meaning of the question is: Which of these effects is the sacramental grace imparted in extreme unction primarily and immediately intended to produce, so that the others are produced for the sake of, or by means of, it? Or, more ultimately, what, according to Christ's intention in instituting it, is the primary and distinctive purpose of this sacrament, its particular *raison d'être* as a sacrament? Now, clearly this cannot be either the remission of mortal sin or the restoration of physical health, since, as we have seen, extreme unction is primarily a sacrament of the living; and restoration of bodily health is not a normal effect, but only brought about, when at all, indirectly. There remain the remission of venial sins and of the temporal punishment due for sins already forgiven, and the invigoration of the soul

in face of the probability of death. Reference has already been made to the Scotist view (VI) which singles out the final and complete remission of venial sin as the chief end or effect of extreme unction, and which logically leads to the practical conclusion, adopted by St. Bonaventure and Duns Scotus, that only the dying should receive the sacrament; and the same conclusion, which must in any case be rejected, would also follow from holding in a similarly exclusive sense that the principal effect is the remission of temporal punishment. Thus we are left in possession of the theory, held by many of the best theologians, that the supernatural invigoration of the soul in view of impending death is the chief end and effect of extreme unction. This effect, of course, is actually realized only when the subject is *sui compos* and capable of co-operating with grace; but the same is true of the principal effect of several other sacraments. It is no argument, therefore, against this view to point to the fact that sins are sometimes remitted by extreme unction while the recipient is unconscious and incapable of using the invigorating graces referred to. The infusion or increase of sanctifying grace is an effect common to all the sacraments; yet it is not by this of itself that they are distinguished from one another, but by reference to the special actual graces to which sanctifying grace as infused or increased gives a title; and if the realization of this title is sometimes suspended or frustrated, this is merely by way of an accidental exception to which, in general, sacramental efficacy is liable. It does not seem, however, that this theory should be urged in an exclusive sense, as implying, that is, that the remission of venial sin or of temporal punishment is not also a primary effect which may be obtained independently; rather should the theory be enlarged and modified, and the primary and essential end of the sacrament so described as to comprehend these effects.

This is the solution of the whole question proposed by Kern (*op. cit.*, pp. 81 sq., 215 sq.), who, with no little learning and ability, defends the thesis that the end of extreme unction is the perfect healing of the soul with a view to its immediate entry into glory, unless it should happen that the restoration of bodily health is more expedient. This view is quite in conformity with, and may even be said to be suggested by, the teaching of the Council of Trent to the effect that extreme unction is "the consummation of the whole Christian life"; and Kern has collected an imposing weight of evidence in favor of his thesis from ancient and medieval and modern writers of authority. Dr. Pohle (*op. cit.*, pp. 535, 536) reviews Kern's suggestion sympathetically. Besides being self-consistent and free from any serious difficulty, it is recommended by many positive arguments, and in connection with the controverted point we have been discussing it has the advantage of combining and co-ordinating as parts of the principal effect--i.e. perfect spiritual health--not only the remission of venial sins and the invigoration of the soul, for which respectively Scotists and their opponents have contended too ex-

clusively, but also the remission of temporal punishment, which not a few theologians have neglected.

VIII. NECESSITY

Theologians are agreed that extreme unction may in certain circumstances be the only, and therefore the necessary, means of salvation for a dying person. This happens when there is question of a person who is dying without the use of reason, and whose soul is burdened with the guilt of mortal sin for which he has only habitual attrition; and for this and similar cases in which other means of obtaining justification are certainly or even probably unavailing, there is no doubt as to the grave obligation of procuring extreme unction for the dying. But theologians are not agreed as to whether or not a sick person in the state of grace is *per se* under a grave obligation of seeking this sacrament before death. It is evident *ex hypothesi* that there is no obligation arising from the need of salvation (*necessitate medii*), and the great majority of theologians deny that a grave obligation *per se* has been imposed by Divine or ecclesiastical law. The injunction of St. James, it is said, may be understood as being merely a counsel or exhortation, not a command, and there is no convincing evidence from tradition that the Church has understood a Divine command to have been given, or has ever imposed one of her own. Yet it is recognized that, in the words of Trent, "contempt of so great a sacrament cannot take place without an enormous crime and an injury to the Holy Ghost Himself" (Sess. XIV, cap. iii); and it is held to depend on circumstances whether mere neglect or express refusal of the sacrament would amount to contempt of it. The soundness, however, of the reasons alleged for this common teaching is open to doubt, and the strength of the arguments advanced by so recent a theologian as Kern (pp. 364 sq.) to prove the existence of the obligation which so many have denied is calculated to weaken one's confidence in the received opinion.

IX. REPETITION

The Council of Trent teaches that "if the sick recover after receiving this unction, they can again receive the aid of this sacrament, when they fall anew into a similar danger of death" (Sess. XIV, cap. iii, De Extr. Unct.). In the Middle Ages doubts were entertained by some ecclesiastics on this subject, as we learn from the correspondence between Abbot (later Cardinal) Godfried and St. Yves, Bishop of Chartres (d. 1117). Godfried considered the custom in vogue in the Benedictine monasteries, of repeating extreme unction, reprehensible on the ground that "no sacrament ought to be repeated" (P.L., CLVII, 87 sq.); but he wished to have St. Yves's opinion, and the latter quite agreed with his friend (*ibid.*, 88). Not long afterwards Peter the Venerable, Abbot of Cluny, was asked by Abbot Theobald to explain "why it was that the unction of the sick was the only unction [out of many] repeated, and why this took place only at

Cluny", and Peter in reply gave a convincing explanation of the Benedictine practice, his main contention being that the person anointed may on recovery have sinned again and be in need of the remission of sins promised by St. James, and that the Apostle himself not only does not suggest that the unction may be given only once, but clearly implies the contrary--"ut *quoties* quis infirmatus fuerit, *toties* inungatur" (P.L., CLXXXIX, 392 sq.). After this all opposition to the repetition of the sacrament disappears, and subsequent writers unanimously teach, what has been defined by the Council of Trent, that it may under certain conditions be validly and lawfully repeated. It should be noted, moreover, that the practice of repeating it at this period was not confined to the Benedictines or to Cluny. The Cistercians of Clairvaux, for example, were also in the habit of repeating it, but subject to the restriction that it was not to be given more than once within a year; and several Ordines of particular Churches dating from the ninth, tenth, eleventh, and twelfth centuries, have a rubric prescribing the repetition of the unction for seven successive days (cf. Kern, op. cit., pp. 334, 338 sq.).

Coming to the more accurate determination of the circumstances or conditions which justify the repetition of extreme unction, theologians, following the authority of Trent, are agreed that it may be validly and lawfully repeated as often as the sick person, after recovery, becomes seriously ill again, or, in cases of lingering illness where no complete recovery takes place, as often as the probable danger of death, after disappearing, returns. For verification of this latter condition some theologians would require the lapse of a certain interval, say a month, during which the danger would seem to have passed; but there is really no reason for insisting on this any more than on the year which medieval custom in some places was wont to require. St. Bonaventure's remark, that "it is absurd for a sacrament to be regulated by the motion of the stars" (in IV Semt., dist. xxiii, a. 2, q. iv, ad 2), applies to a month as well as to a year. Not a few theologians (among recent ones De Augustinis, "De Re Sacramentariâ, II, 408) understand, by the new danger of death, proximate or imminent danger, so that, once imminent danger has passed and returned, the sacrament may be repeated without waiting for any definite interval to elapse. The majority of theologians, however, deny the validity of extreme unction repeated while the danger of death remains the same, and they assume that this is the implicit teaching of the Council of Trent. But among contemporary authors, Kern, following the lead of several positive theologians eminent for their knowledge of sacramental history (Ménard, Launoi, Martène, Juénin, Drouven, Pouget, Pellicia, Binterim, Heinrich.--See references in Kern, op. cit., pp. 357, 538), maintains the *probable* validity of extreme unction repeated, no matter how often, during the same danger of death; and it will be found easier to ignore, than to meet and answer, the argument by which he supports his view. He furnishes, in the first place, abundant evidence of the widespread practice in the Western Church from the

ninth to the twelfth, and even, in some places, to the thirteenth century, of repeating the unction for seven days, or indefinitely while the sickness lasted; and he is able to claim the authority of Oriental theologians for explaining the modern practice in the Eastern Church of a sevenfold anointing by seven priests as being due to a more ancient practice of repeating the unction for seven days--a practice to which the Coptic Liturgy bears witness. By admitting the validity of each repeated unction we are able to give a much more reasonable explanation of the medieval Western and modern Eastern practice than can possibly be given by those who deny its validity. The latter are bound to maintain either that the repeated rite is merely a sacramental--though clearly intended to be a sacrament--or that the repeated unctions coalesce to form one sacrament--an explanation which is open to several serious objections. In the next place, since extreme unction does not imprint a permanent "character", there is no reason why its proper sacramental effect may not be increased by repetition, as happens in Penance and Holy Communion--that is, with an increase of sanctifying grace, the right to spiritual invigoration may be increased, and more abundant actual graces become due. And this, on internal grounds, would suffice to justify repetition, although the effect of the previous administration remains. Finally, in reply to the principal dogmatic reason urged against his view--viz., the teaching of the Council of Trent--Kern fairly maintains that the intention of the council was merely *positive*, and *not exclusive*, i.e., it wished to define, in opposition to more restrictive views that had been held, the validity of extreme unction repeated in the circumstances it mentions, but without meaning to deny its validity if repeated in other circumstances not mentioned. The exhaustive examination of tradition which is supposed to precede a definition had not, so far as this particular point is concerned, been carried out at the time of Trent; and the point itself was not ripe for definition. Modern discipline in the Western Church can be explained on other than dogmatic grounds; and if it be urged as dogmatically decisive, this will imply a very sweeping condemnation of medieval Western and modern Eastern practice, which the prudent theologian will be slow to pronounce.

X. REVIVISCENCE

The question of reviviscence arises when any sacrament is validly administered, but is hindered at the time from producing its effect, owing to the want of due dispositions in the recipient. Thus, in regard to extreme unction, the subject may be unconscious and incapable of spiritual invigoration in so far as this requires co-operation with actual grace. Or he may, for want of the necessary attrition, be indisposed to receive remission of sins, or indisposed in case of mortal sin for the infusion of sanctifying grace. And the want of disposition--the obstacle to the efficacy of the sacrament--may be inculpable or gravely culpable; in the latter case the reception of the sacrament will be sacrilegious. Now the question is, does extreme unction revive, that is does it after-

wards (during the same serious illness) produce such effects as are hindered at the time of reception, if the obstacle is afterwards removed or the requisite disposition excited? And theologians all teach that it certainly does revive in this way; that for its reviviscence, if no sacrilege has been committed in its reception nor any grave sin in the interval, all that is needed is that the impeding defect should be removed, that consciousness, for instance, should be recovered, or habitual attrition excited; but that, when a grave sin has been committed at or since the reception, this sin must be remitted, and sanctifying grace obtained by other means (e.g. penance or perfect contrition) before extreme unction can take effect. From this doctrine of reviviscence--which is not, however, defined as a dogma--there follows an important practical rule in regard to the administration of extreme unction, viz., that, notwithstanding doubts about the dispositions of a certainly valid subject, the sacrament should always be conferred absolutely, never conditionally, since a condition making its validity dependent on the actual dispositions of the recipient would exclude the possibility of reviviscence. The conditional form (*si capax es*) should be used only when it is doubtful whether the person is a valid subject for the sacrament, e.g., whether he is not already dead, whether he has been baptized, has attained the use of reason, or has the implicit habitual intention of dying in a Christian manner.

From among, and in addition to, sources mentioned in the course of this article see KERN, *De Sacramento Extremoe Unctionis Tractatus Dogmaticus* (Ratisbon, 1907)--the best recent treatise on the subject; SCHMITZ, *De Effectibus Extremoe Unctionis Dissert. Hist.- Dogmatica* (Freiburg, 1893); LAUNOI, *De Sacr. Unctionis Infirmorum* (Paris, 1673), in *Opp.*, vol. I, pt. I; DE SAINTE-BEUVE, *Tractatus de Sacr. Unctionis Infirmorum Extr.* (1686), in MIGNE, *Theol. Cursus*, XXIV; the respective sections in PERRONE, PESCH, TANQUEREY, and other standard courses of dogma, and in GURY, LEHMKUHL, and other standard moralists; among writers in German: POHLE, *Lehrbuch der Dogmatik* (3rd ed., Paderborn, 1908), III, pp. 523-548; among Eastern Orthodox theologians: MALTZEW, *Die Sakramente der Orthodox-katholischen Kirche* (Berlin, 1892), and others mentioned by KERN, *op. cit.*, 379; among non-Catholics: BLUNT, *The Sacraments* (London, 1868); MORGAN DIX, *The Sacramental System* (New York, 1893); PULLER, *The Anointing of the Sick in Scripture and Tradition* (London, 1904).

P.J. TONER

Exul Hibernicus

Exul Hibernicus

The name given to an Irish stranger on the Continent of Europe in the time of Charles the Great, who wrote poems in Latin, several of which are addressed to the emperor. He is sometimes identified with Dungal. The designation *exul* is one which the Irish wanderers on the continent frequently adopted. The poems of this exile show that he was not only a poet but a grammarian and dialectician as well. They also reveal his status as that of a teacher, probably in the palace school. Of more than ordinary interest are the verses which describe the attitude of the ninth-century teacher towards his pupils. His metrical poem on the seven liberal arts devotes twelve lines to each of the branches, grammar, rhetoric, dialectic, etc., showing the origin, scope, and utility of each in succession. Like the lines on the same subject by Theodulf of Orléans, they may have been intended to accompany a set of pictures in which the seven liberal arts were represented. The style of these poems, while much inferior to that of the classical period is free from many of the artificialities which characterize much of the versification of the early Middle Ages.

WILLIAM TURNER

Exultet

Exultet

The hymn in praise of the paschal candle sung by the deacon, in the liturgy of Holy Saturday. In the missal the title of the hymn is "Praeconium", as appears from the formula used at the blessing of the deacon: "ut digne et competenter annunties suum Paschale praeconium". Outside Rome, the use of the paschal candle appears to have been very ancient in Italy, Gaul, Spain, and perhaps, from the reference by St. Augustine (*De Civ. Dei*, XV, xxii), in Africa. The *Liber Pontificalis* attributes its introduction in the local Roman Church to Pope Zosimus. The formula used for the "Praeconium" was not always the "Exultet", though it is perhaps true to say that this formula has survived, where other contemporary formulae have disappeared. In the "*Liber Ordinum*", for instance, the formula is of the nature of a benediction, and the Gelasian Sacramentary has the prayer "Deus mundi conditor", not found elsewhere, but containing the remarkable "praise of the bee -- possibly a Vergilian reminiscence -- which is found with more or less modification in all the texts of the "Praeconium" down to the present day. The regularity of the metrical *cursus* of the "Exultet" would

lead us to place the date of its composition perhaps as early as the fifth century, and not later than the seventh. The earliest manuscript in which it appears are those of the three Gallican Sacramentaries: -- the Bobbio Missal (seventh century), the Missale Gothicum and the Missale Gallicanum Vetus (both of the eighth century). The earliest manuscript of the Gregorian Sacramentary (Vat. Reg. 337) does not contain the "Exultet", but it was added in the supplement to what has been loosely called the Sacramentary of Adrian, and probably drawn up under the direction of Alcuin.

As it stands in the liturgy, it may be compared with two other forms, the Blessing of Palms, and the Blessing of the Baptismal Font. The order is, briefly:

- An invitation to those present to join with the deacon in the invocation of the blessing of God, that the praises of the candle may be worthily celebrated. This invitation, wanting in the two blessings just mentioned, may be likened to an amplified "Orate fratres", and its antiquity is attested by its presence in the Ambrosian form, which otherwise differs from the Roman. This section closes with the "Per omnia saecula saeculorum", leading into . . .
- "Dominus vobiscum" etc., "Sursum corda etc.", "Gratias agamus" etc. This section serves as the introduction to the body of the "Praeconium", cast in the Eucharistic form to emphasize its solemnity.
- The "Praeconium, proper, which is of the nature of a Preface, or, as it is called in the Missale Gallicanum Vetus, a *contestatio*. First, a parallel is drawn between the Passover of the Old and the New Covenants, the candle being here a type of the Pillar of Fire. And here the language of the liturgy rises into heights to which it is hard to find a parallel in Christian literature. We are drawn out of cold dogmatic statement into the warmth of the deepest mysticism, to the region where, in the light of paradise, even the sin of Adam may be regarded as truly necessary and a happy fault". Secondly, the candle itself is offered as a burnt-sacrifice, a type of Christ, marked by grains of incense as with the five glorious wounds of His Passion. And, lastly, the Praeconium ends with a general intercession for those present, for the clergy, for the pope, and for the Christian rulers. For these last the text as it stands cannot now be used. The head of the Holy Roman Empire alone could be prayed for in this formula, and the resignation (1804) of the prerogatives of that august position, by the Emperor Francis II of Austria, has left that position unfilled to the present day.

It remains to notice three accessories of the "Exultet": the ceremonial carried on during its performance; the music to which it has been sung; and the so called "Exultet-

rolls" on which it was sometimes written. The deacon is vested in a white dalmatic, the rest of the sacred ministers are vested in purple. The affixing of five grains of incense at the words *incensi hujus sacrificium* has probably arisen from a misconception of the meaning of the text. The lighting of the candle is followed by the lighting of all the lamps and candles of the church, extinguished since the close of Matins. The chant is usually an elaborate form of the well-known recitative of the Preface. In some uses a long bravura was introduced upon the word *accendit*, to fill in the pause, which must otherwise occur during the lighting of the candle. In Italy the Praeconium was sung from long strips of parchment, gradually unrolled as the deacon proceeded. These "Exultet Rolls" were decorated with illuminations and with the portraits of contemporary reigning sovereigns, whose names were mentioned in the course of the "Praeconium". The use of these rolls, as far as is known at present, was confined to Italy. The best examples date from the tenth and eleventh centuries.

CHARLTON BENEDICT WALKER

Saint Exuperius

St. Exuperius

(Also spelled Exsuperius).

Bishop of Toulouse in the beginning of the fifth century; place and date of birth unascertained; died after 410. Succeeding St. Silvius as bishop, he completed the basilica of St. Saturninus, begun by his predecessor. St. Jerome praises him for his munificence to the monks of Palestine, Egypt, and Libya, and for his charity to the people of his own diocese, who were then suffering from the depredations of the Vandals, Alans, and Suevi. Of great austerity and simplicity of life, he sought not his own, but gave what he had to the poor. For their sake he even sold the altar vessels and was compelled in consequence to carry the Sacred Host in an osier basket and the Precious Blood in a vessel of glass. In esteem for his virtues and in gratitude for his gifts, St. Jerome dedicated to him his "Commentary on Zacharias". Exuperius is best known in connection with the Canon of the Sacred Scriptures. He had written to Innocent I for instructions concerning the canon and several points of ecclesiastical discipline. In reply, the pope honoured him with the letter *Consulenti tibi*, dated February, 405, which contained a list of the canonical scriptures as we have them to-day, including the deuterocanonical books of the Catholic Canon, books of the Catholic Canon. The assertion of non-Catholic writers that the Canon of Innocent I excluded the Apocrypha is not true, if they mean to extend the term *Apocrypha* to the deuterocanonical books.

The opinion of Baronius, that the bishop Exuperius was identical with the rhetor of the same name, is quite generally rejected, as the rhetor was a teacher of Hannibali-

anus and Dalmatius, nephews of Constantine the Great, over a half a century before the period of the bishop. From Jerome's letter to Furia of Rome, in 394, and from the epistle of St. Paulinus to Amandus of Bordeaux, in 397, it seems probable that Exuperius was a priest at Rome, and later at Bordeaux, before he was raised to the episcopate, though it is possible that in both of these letters reference is made to a different person. Just when he became bishop is unknown. That he occupied the See of Toulouse in February, 405, is evident from the letter of Innocent I mentioned above; and from a statement of St. Jerome in a letter to Rusticus it is certain that he was still living in 411. It is sometimes said that St. Jerome reproved him, in a letter to Riparius, a priest of Spain, for tolerating the heretic Vigilantius; but as Vigilantius did not belong to the diocese of Toulouse, St. Jerome was probably speaking of another bishop.

Exuperius was early venerated as a saint. Even in the time of St. Gregory of Tours he was held in equal veneration with St. Saturninus. His feast occurs on 28 September. The first martyrologist to assign it to this date was Usuard, who wrote towards the end of the ninth century.

LEO A. KELLY

Albrecht von Eyb

Albrecht von Eyb

One of the earliest German humanists, born in 1420 near Anabach in Franconia; died in 1475. After preliminary studies at Erfurt he went to Italy and devoted himself to humanistic study at the Universities of Pavia and Bologna. He returned to Germany in 1451, having in the meantime been appointed canon at Eichstätt and Bamberg. From 1452 to 1459 he was again a student at Bologna, winning the degree of doctor of canon and civil law. He was also honoured by an appointment as chamberlain to Pius II. After his return to Germany he resided chiefly at Eichstätt. In 1462 he became archdeacon of Würzburg, not, however, without encountering violent opposition from the Bishop of Würzburg, who hated Eyb as a partisan of the Hohenzollern Margrave, Albrecht Achilles. Little is known of his last years.

Eyb's best known and most important work is his "Ehebüchlein" (Book on Marriage), in which he discusses the question whether a man should take a lawful wife or not. It was published in 1472. In 1460 he had written on the same theme in Latin "An viro sapienti uxor sit ducenda". The German work treats of the joys and sorrows of married life and general maxims of a moral or philosophical character are added. A decision is finally rendered in favour of the married state. The popularity of the book is attested by the fact that between 1472 and 1540 no less than twelve reprints were issued. Another work of Eyb is the "Margarita poetica" (Nuremberg, 1472), a textbook

of humanistic rhetoric, consisting of a collection of passages in prose and verse from Latin authors, to which are added specimens of humanistic eloquence. In 1474 Eyb finished his "Spiegel der Sitten" (Mirror of Morals), a lengthy work of ethical and moral content, probably based on some Latin original. The book did not meet with the favour shown to the "Ehebüchlein" and was not printed until 1511. Appended to it are German translations of two of Plautus's comedies, the "Menaechmi" and the "Bacchides" as well as of Ugolini's "Philogenia". Eyb's writings have been edited by K. Müller (Sondershausen, 1879); the best edition is that of M. Herrmann, "Deutsche Schriften des Albrecht von Eyb" (Berlin, 1895).

ARTHUR F.J. REMY

Hubert and Jan van Eyck

Hubert and Jan van Eyck

Brothers, Flemish illuminators and painters, founders of the school of Bruges and consequently of all the schools of painting in the North of Europe. Hubert was born at Maeseck (i.e. Eyck on the Meuse) in the Diocese of Liège, about 1366, and his brother Jan about twenty years later, 1385. They had a sister named Margaret who won fame as a miniaturist.

A document of 1413 makes the earliest mention we have of a painting by "Master Hubert". In 1424 he was living at Ghent, and he died there on the 18th of September, 1426. We have no further definite knowledge concerning the elder of the brothers. Of the younger we know that in 1420 he presented a Madonna's head to the Guild of Antwerp, that in 1422 he decorated a paschal candle for the cathedral of Cambrai, and that in 1425 he was at The Hague in the service of Jean Sans Merci. Afterwards he went to Bruges and to Lille to the court of Philip the Good, Duke of Burgundy, as *peintre et varlet de chambre*. He was already a man of some influence at court, and he travelled in the embassy charged to ask the hand of Isabella of Portugal for Philip, and it was his privilege to paint her portrait "true to life", thereby fixing Philip's choice. This journey lasted from the 18th of October, 1428, to the end of December, 1429. In 1431 he went to Hesdin to superintend, for the Duke, the work going on at the castle there: and afterwards he returned to Bruges, which he seldom left again. He married, and a child of his was baptized in 1434. In 1436 we learn once more that he received 720 *livres* on account of "certain secret matter", doubtless in connection with some new mission or journey. He died towards the end of June, 1441.

The most important work of the brothers Van Eyck, and the one that places their names among the great masters of painting for ever, is the famous altarpiece, "The Adoration of the Lamb", of which the central Portion is preserved in St-Bavons at

Ghent, while the wings have found their way to the Museums of Berlin and of Brussels. It is one of the enigmas of art. All the questions bearing on it may, however, be reduced to two: Who was its author? and, What was its origin? As to its authorship, all we know depends on an inscription obscure enough, which is to be read on the edge of its frame:

Pictor Hubertus e Eyck major quo nemo repertus
 Incepit pondus: quod Johannes arte secundus
 Suscepit letus, Judoci Vyd prece fretus Vers-V seXta Ma-I: Vos CoL-
 LoCat a-Cta tVerl.

The faulty Latin of this cryptic inscription means: "Hubert van Eyck, the greatest painter that ever lived, began this work [*pondus*], which John, his brother, second only to him in skill, had the happiness to continue at the request of Jodocus (Josse) Vydt. By this line, on the 6th of May, you learn when the work was completed, i.e., MC-CCCXXXII." That it is their joint work is certain, but it is impossible to distinguish which portion belongs to each brother. Very soon Jan began to get all the credit for it. Dürer mentions only Jan in his "Journal" of 1521. But the inscription clearly states that Hubert began the work and asserts that he was the greater artist, his brother being called in only at his death, and in order to complete it. But how far had Hubert progressed with it? How far back had he been commissioned to paint it? In 1426 were portions of it finished, or was it merely a sketch, a general outline when Jan took charge? Who suggested the subject? Who planned its treatment? Can we believe that a painter of any school living in a fifteenth century atmosphere could have elaborated by himself from a few texts of the Apocalypse (v, 6-14) such a wealth of detail, such symphony of symbolism and imagery? Who was the theologian who inspired this mighty poem as others had inspired the learned allegories of the Chapel of the Spaniards, and of the Hall of the Segnatura? And again, in the history of painting from the miniatures of the Irish Apocalypses (eleventh century) to the Angers tapestries, what were the artistic sources of this great work?

This moral encyclopedia of the Middle Ages, if we may call it such, treats of all things in heaven and on earth (there was a predella to it depicting hell, but it disappeared in the sixteenth century); it portrays God and man in all their historical and mystical relations; it tells us of the heavenly and the earthly paradise, of the ages that have followed one another in the flight of time, of the Dogma of the Fall, and that of the Redemption, of Adam and Eve, and of the first sacrifices; of the death of Abel (type of Christ); of the years of expectation of the patriarchs and just men of the Old Law; of the mystery of the Incarnation; of the Trinity; of the world subject to the law of Christ; of the life of the Church in her saints, her hermits, her virgins, her martyrs, her pontiffs, her confessors, her warrior princes; of all Christendom in a landscape filled

with cathedral spires (Rome, Jerusalem, Utrecht, etc.). And can we in reason be asked to believe that this wonderful pictorial epic reaching out from the beginning to the consummation of the world and ending in a glimpse of the eternal life to come as full in conception and as orderly in arrangement as the "Divina Commedia" itself; summing up the Old as well as the New Testament, drawing its inspiration from St. Augustine's "Civitas Dei", and "Vincent of Beauvais' "Speculum Majus", as well as Jacobus de Voragine's "Legenda Aurea", and Dante's "De Monarchia"; a compendium of politics, history and theology, and which crowns the representation man's life on earth by a glimpse of the Infinite, can we in reason be asked to believe that this lofty expression of the ideals of Christendom in the Europe of the Middle Ages sprang Minerva-like, fully formed from the brain of a single artist?

No one can adopt this supposition except for the purpose of ascribing all the honour of having conceived this painting to the elder of the brothers. As an assumption, however, it is altogether gratuitous. There is not one of the scenes that can be attributed to Hubert with any degree of certainty; and no work the brothers Van Eyck have left us (with the exception of the "Fount of Salvation" in the Prado Museum, Madrid, and this is the work of a school) shows a similar dogmatic and theological character, a like power of design and richness of thought that this "Lamb does. Taken as a whole the work of the Van Eycks has a totally different tendency. It is frankly naturalistic in face, as well as in intention. So that when Hubert is labelled a thinker, it is for no other reason than the wish to differentiate him, and to separate him from Jan. How futile this distinction is, is made clear if we look into the results obtained by applying it as a criterion to the work of the two brothers. On not a single disputed painting has agreement been reached; and every painting that has been attributed to Hubert by one connoisseur, has been adjudged by others for equally good reasons to Jan.

The catalogue of their work has been reconstructed more than twenty times. The altar-piece of the "Lamb" has been divided in a hundred different ways, and each in turn has been given to first one brother and then to the other over and over again. Each year sees a new theory proposed. After Waagen came James Weale; after Hymans, Dvorak, and after Stoerck, Wurzbach; and we are as far from the solution as ever. The masterpiece keeps its secret, and will probably never give it up. In any case, seeing that the whole painting was retouched at least twice during the sixteenth century, all evidence of individual technic must have been buried beneath these restorations; and in all likelihood the little points and peculiarities attributed to Hubert or to Jan, are really the work of Michael Coxie. But there is a larger and a wider question at issue than such idle wranglings that can never be settled, the question as to the effect and the nature of the artistic revolution to which the brothers Van Eyck have given their name.

What constitutes the altar-piece of the "Lamb" a unique moment in the history of art and gives it its supreme interest in our eyes, is the fact that it unites in itself the styles and the genius of two opposing epochs. Whereas its general plan belongs to the Middle Ages, its execution, its manner of seeing things and putting them on canvas, are truly modern. The masterpiece has a double nature, so to speak. The genius of the Renaissance for what was concrete and realistic is wedded to the majesty of the Gothic and its love of the abstract. It shows us the wondrous blending of two principles that would seem necessarily to exclude each other, like the past and the future, and that we never meet with again save in opposition. It is this that constitutes the supreme interest of the work, that it contains the noblest expression of the old mystical genius together with the most powerful example of modern naturalism. In the sincerity, breadth, and naturalism, no one at any time nor of any school has excelled the Van Eycks. Nature, which, prior to their day, men had looked at as through a veil of formulae and symbols, they seem suddenly to have unveiled. They invented, so to speak, the world of realities. The happenings of all sorts in the world of nature, the *sylva rerum*, with which they have endowed the art of painting, are always true to life. Landscapes, atmospheres, types, physiognomies, a wealth of studies and sketches of all sorts, rich materials, cloths, cimars (robes), copes, brilliancy of precious stones and works of the goldsmith's art; all are copied to perfection, and the deftness of the work is beyond compare. The masterpiece inaugurates a new era in painting. If the object of the painter's art is to depict the visible world, if his aim ought to be not so much the expression of a thought as to hold up the mirror to life, then for the first time in its history painting entered into its birthright in this altar-piece, and gave proof of its legitimacy in this first attempt. Life under all its sensible forms and aspects sweeps through this mighty scene like a motif, life with all its myriad changes and variety of moods, brushing aside the dry as dust ideograms and crumbling hieroglyphics of the Middle Ages.

The absolute is abandoned, and the relative brought into fashion. The eye is turned away from the vision of the ideal, but the feet are more firmly planted on the real. The word *nature* undergoes a change of meaning. Once it had been a vague Platonic idea, a something like the nominals and universals of the schools, which are understood by the intelligence rather than perceived by the senses. In that lofty plane of thought in which art in the thirteenth century loved to move, the universe existed really in the intellect. Henceforth, however, nature changed her aspect for the painter; he refrains from expressing any opinions as to the essence of things, but delights in all their accidental qualities. The actual, the fact, whether it be positive, complex, capricious, or odd, becomes of more importance than the abstract and immutable law. The absolute cause of all things is neglected in favour of the rich and glowing vegetation of nature; principles have less value than their consequences, less importance is given to types

than individuals. The vast harvest of phenomena from the ever teeming field of reality and experience is henceforth open to art. A painting becomes what the painter has actually seen; what he has found in nature; the story of his feelings in the midst of things. In this a new kind of idealism replaces the old. And art, thus freed from the academism of the Gothic tradition, was not to slavishly copy nature, but to serve as a vehicle for the expression of the painter's personality, and to act as the safest confidante of his emotional experiences.

The altar-piece at Ghent marks the triumph of this basic artistic revolution from which all modern art has sprung. Never was a richer shrine of nature and of life got together by a painter. In two hundred figures of every size, sex, race, and costume we behold a résumé of the human race. We see before us all the beauty of the physical world, the woods, the fields, the rocks, the desert places, a geography of earth with its climates and its flora, palms, cacti, and aloes (which foolishly has led some to believe that Hubert must have traveled in the East). And the world of art is not forgotten; styles of architecture, towers, cupolas, statues, bas-reliefs, are all brought in. In a word, life out-of-doors and within doors, with all its social activities and moral colouring, is portrayed. There are interiors, such as the room of the Blessed Virgin, a young Flemish maiden, with its *prie-Dieu*, its nicely tiled floor, its washstand and basin, and its open window looking out on to the pointed roofs of a row of brick houses. There are portraits of a marvellous realism, such as those of the donor and his wife; epic figures, such as God the Father under the guise of Charlemagne crowned with a triple tiara, type of the pontiff-king; and there are figures full of charm and poetry, such as the singing angels (Berlin museum), symbolizing the harmonies of paradise, under the form of entrancing minstrelsy, or of the chanting of choir boys. Other figures are fearful in their naturalism, such as the figures of our first parents (Brussels museum) which would suffice alone to immortalize their creator, because of their audacious nudity, their stiff and awkward manner, and their eloquent ugliness.

Such a transformation, of course, exceeds the powers of any one man, or even of two brothers. And like all great works, the altar-piece of Ghent is but the result of the labours of more than one generation. It was not a local movement; its influences were at work up and down throughout Christendom.

In Italy the work of Jacopo della Quercia, of Ghiberti, the frescoes of Masolino and of Masaccio (1428) are contemporary with the labours of the Van Eycks: and bear traces of similar tendencies. But the birthplace of the movement was not on Italian soil. It is in France we find the earliest evidence of it, about the of the fourteenth century. A few statues, like the Visitation group in the great doorway at Reims (1310), the tombs of St. Denis, the portraits of King Charles V and his wife Eleanor (in the Louvre), mark the last stages in the victorious progress. The same school which a century earlier had

developed the Gothic ideal, was about to produce by a natural evolution the new principles and the new methods. An important factor in this evolution was the creation of the Duchies of Berry and of Burgundy, and the alliance of Flanders and Burgundy by marriage (1384). At the Court of the Valois, the most brilliant in the world, famous for its voluptuousness, its elegance, and its worship of all the arts of life, and under the patronage of its princes, no less famous for their dissolute lives than for their artistic taste and love of luxury, there rapidly grew up a school of painters, sculptors, goldsmiths, and miniaturists, cosmopolitans by birth, but Parisian by education, who were the nucleus of the Renaissance.

The larger part of the paintings, frescoes, and stained glass of this epoch have perished; but the miniatures supply all the proof we need. Especially in the manuscripts made at the time for the Duc de Berry do we find the links of this glorious history. Many of the books collected by this incomparable Maecenas have come down to us; some of them illustrated by André Beauneveu, Jacquemart of Hesdin, or Jacques Cohn of Antwerp. But the most important of all is the seignorial manuscript -- one of the treasures of Chantilly -- known as the "Book of Hours of the Duc de Berry". This wonderful book was adorned from 1413 to 1416 by three artists; "the three illuminator-brothers" spoken of by Guillebert of Metz, the brothers de Limbourg or simply the Limbourgs. Nearly all the poetic fancy of the Van Eycks is already outlined in this Book of Hours, especially on their landscape side; And whereas the Limbourgs kept to the country around Liège, the Van Eycks followed the same route, and doubtless experienced the same influences. But there is something more. Another manuscript, "The Hours of Turin, which was unfortunately destroyed in the fire at the library of that town, 20 January, 1904, belonged successively to the Duc de Berry (d. 1416) and to Duke William IV of Bavaria-Hainault. And it has been proved that Hubert van Eyck spent some time in the latter's service. Paul Durrieu has given very weighty reasons for attributing the manuscript to him, and for believing that he began it for the Duc de Berry. Thus the art of the Van Eycks would be but the culminating point of the great Renaissance movement inaugurated at the Court of the Valois in France, and which reached its apogee in 1400. Perhaps this was what the Italian Bishop Facius meant to imply when in 1456 he spoke of Jan van Eyck as Johannes Gallicus.

This is a partial solution of the enigma of the altarpiece. Hubert and Jan van Eyck are but continuators, masters indeed, of an art that began before them and without them. But what was it they added that caused the new style in art to date only from their work? If we are to credit Vasari, Van Mander, and all the historical writers, their great discovery was the art of painting with oils. Painting with oil had been discovered long before; the monk Theophilus gives a recipe for it in the eleventh century. And as we have seen, the new aestheticism had been already formulated in the miniatures of

the Limbourgs and of the Van Eycks themselves. Whatever importance in art its material and mechanical methods may have, it would be too humiliating to make it depend entirely on the particular fluid, water, gum, or albumen used in mixing the colours. Moreover, on canvases 500 years old from which all moisture has long since dried up he would be a daring critic who would venture to assert the proportion of oil or distemper used by the artist. To build one's criticism on such a doubtful principle is like seeking the scent of the "Roses of Sadi." The real merit of the Van Eycks is elsewhere. By a chain of circumstances (The Battle of Agincourt, the madness of Charles VI, and the minority of Charles VII), France was brought to the edge of ruin, and suddenly lost control of the movement that it had begun.

Comfort, art, luxury began to cluster around the new fortunes of the Duchy of Burgundy, as the home of wealth in the North. Ghent, Bruges, Brussels, Antwerp became the centres of the new school. In these new towns of little culture and traditional refinement, and lacking in reserve (Taine, "Philosophie de l'Art aux Pays-Bas" - description of the festivals known as the *Voeu du faisan*), Naturalism, freed from the restraints French taste would have imposed on it, was enabled to grow at its ease and spread without restriction. The Germanic element which had already shown itself in such men as Beauneveu, Malouel, the Limbourgs, burst out, and carried everything before it in the work of the Van Eycks. For the first time the genius of the North shook off all those cosmopolitan influences which had hitherto refined it, and gave itself free scope.

It paused not to think of what had gone before, and it was not concerned with such things as taste, nobility, or beauty. Such preoccupations as these, as the antique began to have an influence, became more and more the distinguishing characteristics and limitation of Italian naturalism. It is enough to compare the ugly yet touching figures of Adam and Eve by Jan van Eyck with those by Masaccio in the Brancacci Chapel to be convinced of this. On the one side there is realism, but the painter has scruples, reserves, a sense of modesty: on the other there is absolute crudity, what we might call naturalism pure and simple. What does this mean, but that painting, which had hitherto been a universal, international art, is beginning to localize itself; and that what had hitherto been a European, or better still, Western, colour-language is about to split up into many dialects and national modes of speech? It is the real glory of the Van Eycks, that they emancipated the genius of the races of the North and gave it its first full expression. During a whole century (1430- 1530) the school they founded at Bruges was always producing new works and renewing its own strength. During a century, painters from Holland and Germany - Petrus Cristus, Gérard de St-Jean, Ouwater, Hugo van der Goes, Roger van der Weyden, Memlinck, Gérard David, Martin Schöngauer, Lucas of Leyden -- never ceased their more or less directly from

their work. In 1445 the Catalonian Luis Dalmau made a copy of the altar-piece of Ghent. In France, Jean Fouquet, Nicolas Froment, on the banks of the Loire and of the Rhone, were disciples of Jan van Eyck. Even Italy did not escape their sovereign influence. As early as the middle of the fifteenth century paintings by Jan van Eyck were being treasured at Naples and at Urbino.

Antonello of Messina went to study art in Flanders. Ghirlandajo imitated the famous Portinari altarpiece by H. van der Goes, and whenever an Italian painter relaxed a moment his straining after art to snatch a breath of gayety or a lesson in realism, it was always to the Flemish school he turned; always, until the triumph of the antique was assured, and Raphael and Michelangelo, by the constraining revelation of its beauty, restored for a time the reign of the ideal. Their triumph was, however, short-lived; the pagan and aristocratic ideal of art and life, with all its loftiness and rigidity, begin to give way from the beginning of the seventeenth century, with its new schools at Antwerp and Amsterdam, before the naturalism of the North, before the more homely, hearty, and winning genius of the Van Eycks. It is therefore impossible to exaggerate the importance of their work, which, besides occupying a unique position throughout the fifteenth century, led the way in the evolution which two centuries later produced such painters as Rubens and Rembrandt.

The following is a list of the signed and dated works of Jan van Eyck:

- The "Consecration of St. Thomas Becket" (1421-- Chatsworth);
- "The Madonna" (1432 -- Ince Hall); portraits of two men (1432-1433 -- National Gallery);
- "Arnolfini and his Wife" (1434 -- National Gallery);
- "Portrait of Jan de Leewe" (1436 -- Vienna);
- "The Virgin", with kneeling figure of Canon van der Paele (1436 -- Bruges);
- "St. Barbara" (1437 - Antwerp);
- "Head of Christ" (1438 -- Berlin);
- "The Artist's Wife" (1439 -- Bruges);
- "The Virgin" (1439 -- Antwerp).

The principal works without date or signature that can be certainly attributed to the brothers Van Eyck are

- "Portrait of an Old Man" (Vienna);
- "The Man with the Pinks" (Berlin);
- "The Madonna of Lucca" (Frankfort);
- "The Madonna" executed for Chancellor Rolin (Louvre);
- "The Virgin" (Burleigh House, Exeter);
- "The Virgin" (Paris, Rothschild); triptych, not completed (Van Hellenpute collection, Mechlin).

LOUIS GILLET

Jean Baptiste Van Eycken

Jean Baptiste van Eycken

Painter, born at Brussels, Belgium, 16 September, 1809; died at Schaerbeek, 19 December, 1853. He was the son of Corneille van Eycken and Elise Cordemans, and as a boy was employed in commercial pursuits, but from 1829, when his father died, he gave himself over entirely to the study of art. In 1830 he became a member of the Academy of Belgium, in 1835 gained an important prize with high distinctions, and four years afterwards was appointed professor of drawing and painting. In 1838 he went to Italy, returning in 1839 and resuming his professorship. In that year he exhibited his great picture of "Divine Pity", which was warmly received and brought him a gold medal and a high position in the Société des Beaux Arts de France. He married in 1840 Julie Noël, who died 11 February, 1843. Two of his most important pictures were those representing "Captive Christians" and "St. Boniface", for the church of La Chapelle; but for the same building he carried out no less than fourteen pictures representing the Passion of Christ and these were exhibited in 1847 and gained for him the Order of Leopold. His best-known picture perhaps is entitled "L'Abondance", a replica of which the artist was employed to make for the Prince Consort of England, according to the instructions of Louise Marie, Queen of the Belgians. He was intensely interested in the subject of mural decoration, and studied every variety of it very closely, preparing a long essay on the subject and a series of paintings representing the Beatitudes, in order to exemplify his ideas in this direction. He also gave some attention

to sculpture and to designing medallions. He was a very devout man, true to his faith and to his friends, and very much respected by all who knew him. His pictures are marked by considerable religious feeling, grace, tenderness, and delicacy. (For further details, see a life of the artist published privately in Brussels by Emile van Arenbergh, no date).

GEORGE CHARLES WILLIAMSON

Venerable Pierre-Julien Eymard

Venerable Pierre-Julien Eymard

Founder of the Society of the Blessed Sacrament, and of the Servants of the Blessed Sacrament, born at La Mure d'Isère, Diocese of Grenoble, France, 4 February, 1811; died there 1 Aug., 1868. From early childhood he gave evidence of great holiness and most tender devotion to the Blessed Sacrament. In 1829, he entered the novitiate of the Oblates of Mary, but illness compelled him to return home. At the age of twenty he entered the grand seminary of Grenoble, and was ordained priest 20 July, 1834. He returned to the Marist novitiate in 1839. In 1845 he was appointed Provincial of the Oblates of Mary. His entire spiritual life was centred round the Eucharist. It was the subject of his sermons and exhortations, the object of his worship and prayers. Those who fell under his spiritual direction were taught by his counsel to fix their attention on the Blessed Sacrament.

In January of 1851 Père Eymard made a pilgrimage to the shrine of Our Lady of Fourvières, and there promised Mary to devote his life to founding a congregation of priests whose principal duty should be to honour the Blessed Sacrament. Having obtained the necessary ecclesiastical permission, he procured a small house in Paris, in which he and a single companion took up their abode. Here, on 6 Jan., 1857, the Blessed Sacrament was exposed, and the nascent community of two members commenced the adoration of the Blessed Sacrament as prescribed by their rule. Their founder received his first encouragement for the work in a laudatory Brief, blessing the work and its author, and signed by Pius IX, in 1857. Five years after, in 1862, Père Eymard had enough spiritual sons to open a regular novitiate. From this date the congregation spread rapidly, until now its houses may be found in Rome, Belgium, Holland, Spain, Canada, the United States, and South America. The Servants of the Blessed Sacrament, a congregation of cloistered women who carry on perpetual adoration in their convents, were also founded by him in 1858. The Priests' Eucharistic League and the Archconfraternity of the Blessed Sacrament are evidences of his zeal among priests and the faithful. Père Eymard's writings have been collected, and form four volumes: "The Real Presence", which has been translated into English; Retreat at the Feet of Jesus

Eucharistic", "La Sainte Communion", and "L'Eucharistie et la Perfection Chrétienne". These writings have received the approbation of the Holy See. The author was declared Venerable, 11 August, 1908, and the process for Père Eymard's beatification is now in progress.

A. LETELLIER

Nicolas Eymeric

Nicolas Eymeric

Theologian and inquisitor, born at Gerona, in Catalonia, Spain, c. 1320; died there 4 January, 1399. He entered the Dominican Order at an early age, receiving the habit 4 August, 1334, from the hands of Prior Petrus Carpi, and soon won a reputation for theological knowledge. His earliest writings, which date from 1351, were of a philosophical character. Nicola Roselli, the grand inquisitor of Aragon, having been raised to the rank of a cardinal (1356), Eymeric was appointed his successor in the Inquisition early in 1357. The zeal he displayed in his new office roused much opposition and even open enmity. In spite of the support of Cardinal Legate Guido, Eymeric, in the interest of peace, was removed from office at the general chapter held at Perpignan in 1360. Two years later, at the general chapter held at Ferrara, he was chosen vicar of the Dominican province of Aragon. Shortly afterwards, when a provincial was to be elected for the same province, there was a hopeless division among the Dominicans, one party supporting Eymeric, the other Father Bernardo Ermengaudi. Pope Urban V confirmed neither, but appointed a third, Jacopo Dominici.

Meanwhile Eymeric showed great activity as a preacher, as well as a writer on theological subjects. Some years later he was inquisitor general of Aragon; we find him in this office in 1366, and several tractates on dogmatic subjects date from the years immediately following. He combated in particular Raymond Lully, in whose writings he found numerous errors. He influenced Gregory XI to forbid the faithful to read certain writings of Lully's and to condemn by a special decree (26 Jan., 1376) several theses extracted from his works. Eymeric was in high esteem with King Pedro IV of Aragon, as well as with Gregory XI. In 1376 he visited the papal court at Avignon, and accompanied the pope on his return to Rome. He was still there at the election of Urban VI and the nomination of the antipope Clement VII, whose claims he vigorously championed against those of the Roman pope. Towards the end of 1378 he returned to Aragon, but in the interests of his office as grand inquisitor often went to the court of Clement VII at Avignon. Eymeric continued his campaign against the Lullists by word as well as by pen. In his "Tractatus contra doctrinam Raymundi Lulli", dedicated to Clement VII, he indicates 135 heresies, 38 errors, and many misleading statements

of Lully. He also composed a "Dialogus contra Lullistas" and other treatises. Lully's partisans, however, won over to their side, soon after his accession, King John I of Aragon. Eymeric was banished and went to the papal court of Avignon, where he was welcomed both by Clement VII and later by Benedict XIII. He wrote numerous theological works and also special tractates defending the legitimacy of the Avignon popes, e. g. his "Tractatus de potestate papali" (1383), which he composed for Clement VII, and two tractates for Benedict XIII. Notwithstanding his sentence of banishment, he still retained his post of grand inquisitor of Aragon. As early as 1376 he had compiled, as a guide for inquisitors, his "Directorium inquisitorum", the only one of his more extensive works that was afterwards printed (Barcelona, 1503; Rome, 1578, ed. Francesco Pegna, with a copious commentary; reissued several times). Towards the end of 1397 Eymeric returned to his native land and his monastery of Gerona, where he died. His epitaph describes him as *praedicator veridicus, inquisitor intrepidus, doctor egregius*.

J.P. KIRSCH

Thomas Eyre

Thomas Eyre

First president of Ushaw College; born at Glossop, Derbyshire; in 1748; died at Ushaw, 8 May, 1810. He was the fourth son of Nathaniel Eyre and Jane Broomhead. On 24 June, 1758, he, with his brothers Edward and John, arrived at Esquerchin, near Douai, the preparatory school for the English college. Having passed through school and college alike with credit, Eyre remained after his ordination as general prefect and master of the classes known as rhetoric and poetry. In 1775 Mr. Eyre returned to England to take charge of the Stella mission near Newcastle, on the invitation of his kinsman, Thomas Eyre. While here he brought out a new edition of the works of Gother and also made a collection of materials (now in the Ushaw archives) with the intention of continuing Dodd's "Church History". His scheme for a new edition of Bishop Challoner's Bible was given as up at the request of Bishop Thomas Talbot. In 1792 he removed from Stella Hall to Wooler and thence to Pontop Hall in Durham. In 1794 Bishop Gibson desired him to take charge of the Northern students who had been expelled from Douai, and who were then temporarily at Tudhoe under Lingard, the famous historian, who had not yet been ordained priest. Mr. Eyre removed these students first to Pontop Hall and in October, 1794, to Crook Hall, where he became president of the new college. Though he was willing to resign this post in favour of Mr. Daniel, president of Douai, this suggested arrangement came to nothing and Mr. Eyre remained president. In 1803 an estate called Ushaw was bought by the bishop,

and here, early in 1804, the new college was begun, and in July, 1808, Mr. Eyre began to remove his community thither. On 2 August he himself entered and the transfer of St. Cuthbert's College from Crook Hall to Ushaw was complete. Mr. Eyre died at Ushaw, leaving a considerable sum to the college for professorships and burses. Besides the edition of Gother's works he brought out, in separate form, Gother's "Instructions for Confirmation (Newcastle, 1783), and Gobinet's "Instruction of Youth in Christian Piety".

EDWIN BURTON

Charles Eyston

Charles Eyston

Antiquary, born 1667; died 5 November, 1721; he was a member of the ancient family of Eyston, then and still of East Hendred, their house being one of the few places in England where the Blessed Sacrament has always been preserved. He was eldest son of George Eyston and of Ann, daughter of Robert Dormer of Peterley. On the death of his father in 1691 he succeeded to the family estates, and in 1692 married Winefrid Dorothy, daughter of Basil Fitzherbert of Swinnerton, Staffordshire, by whom he had a large family. He was a good scholar and it was in his antiquarian researches that he became a friend of Thomas Hearne, who wrote of him: "He was a Roman Catholic and so charitable to the poor that he is lamented by all who knew anything of him . . . He was a man of a sweet temper and was an excellent scholar and so modest that he did not care to have it at any time mentioned." (*Reliq. Hearnianae*, cit. inf.). On his death he was succeeded by his son, Charles. It is generally stated that another of his sons joined the Jesuits, but though his son, William George, entered the Society in 1736, he left it almost at once. Several of his daughters became nuns. He wrote: "A little Monument to The Once Famous Abbey and Borough of Glastonbury", published by Hearne in his "History and Antiquities of Glastonbury" (Oxford, 1722); reprinted by the Rev. R. Warner in his "History of the Abbey of Glaston and the town of Glastonbury" (Bath, 1826). There is in the library at Hendred an unpublished manuscript entitled "A Poor Little Monument to All the Old Pious Dissolved Foundations of England: or a Short History of Abbeys, all sorts of Monasteries, Colleges, Chapels, Chantries, etc." Another manuscript mentioned under his name by Gillow was merely his property and not his work; and the same writer corrects Charles Butler's error in ascribing to Eyston a "History of the Reformation", published in 1685.

EDWIN BURTON

Ezechias

Ezechias

Ezechias (Hebrew = "The Lord strengtheneth"; Septuagint *Ezekias*; in the cuneiform inscriptions *Ha-za-qi-ya-hu*).

King of Juda, son and successor of Achaz. We learn from Second Kings, Chapter 18, that he began his reign in the third year of Osee, King of Israel, that he was then twenty-five years of age, that his reign lasted twenty-nine years, and that his mother was Abi, daughter of Zecharias. The account of his reign is beset with unsolved chronological difficulties, and there exists a difference of opinion among scholars as to the year in which he ascended the throne. The commonly received computation reckons his reign from 726 to 697 B.C. In character and policy, Ezechias was pious and agreeable to God. He was a strenuous civil and religious reformer, and on this account the sacred writer compares him to King David. The events of his reign are related in the Fourth Book of Kings, and also in the parallel account in the Second Book of Chronicles, but in the latter, as might be expected, stress is laid chiefly on the religious reforms which he carried out, whereas the earlier account mentions these briefly, and dwells at greater length on the civil and political aspects of his reign.

Among the religious reforms are mentioned the purification of the Temple, which had been closed by Achaz, the irreligious predecessor of Ezechias ([II Chronicles 28-29](#)), the resumption and proper celebration of the feast of the Passover which had been neglected ([II Chronicles 30](#)), and in general the extirpation of idolatry, and the reorganization of the Hebrew worship ([II Kings 18](#), [II Chronicles 31](#)). In a title prefixed to the twenty-fifth chapter of Proverbs, it is stated that the sayings contained in the following collection (25-29) were copied out by the "men of Ezechias." This would seem to indicate, on the part of the king, some literary interest and activity, and in the Talmudic tradition these "men of Ezechias" are credited with the composition of several books of the Old Testament. Soon after his accession to the throne Ezechias threw off the yoke of the Assyrians, to whom his father had become a vassal ([II Kings 18](#)). Other notable events of his reign are his sickness and miraculous cure, the embassy of Berodach Baladan, and the invasion of Sennacherib. The story of the sickness of Ezechias is narrated in [II Kings 20](#), and in [Isaiah 28](#).

The king having been stricken with some mortal disease, the prophet Isaiah comes in the name of Yahweh to warn him to put his affairs in order, for he is about to die. But Ezechias prays to the Lord, Who sends the prophet back to announce to him that he will recover, and that fifteen years are to be added to his life. As a sign of the fulfillment of this promise, Isaiah causes the shadow to recede a distance of ten lines on the

sundial. Connected with this event is the sending of an embassy by Berodach Baladan, King of Babylon, who having heard of the illness of Ezechias, sent messengers to him with presents. The motive of this action on the part of the Babylonian king was probably to enlist the services of Ezechias in a league against Sennacherib, King of Assyria. Ezechias received the envoys with great honour, and exhibited to them his various treasures and armaments of war. This spirit of ostentation was displeasing to the Lord, and Isaiah was sent to announce that the treasures, in which the king seemed to place his confidence, would be all carried off as plunder to Babylon. Not long after (according to the cuneiform inscriptions, in the year 701), Sennacherib undertook a great campaign against Syria and Egypt. The story of this expedition is told, from the Assyrian standpoint, in the official cuneiform inscription known as the Taylor prism. The plan of Sennacherib was, first, to vanquish the kings of Ascalon, Sidon and Juda who had formed a coalition against him, and then to turn his attention to the land of the Pharaohs.

After subduing Ascalon and Accaron, the Assyrian invader captured and plundered all the fortified towns of Juda, and carried their inhabitants into exile. Then he besieged Jerusalem, and Ezechias, finding himself shut up "like a bird in a cage," resolved to come to terms with his enemy. Sennacherib demanded thirty talents of gold and three hundred talents of silver, and, in order to supply it, Ezechias was obliged to yield up not only the contents of the royal treasury, but also the silver belonging to the Temple, and the plates of gold which were on the doors thereof ([II Kings 18](#)). But when in addition to this, the Assyrian demanded the surrender of Jerusalem with a view to carrying its inhabitants into exile, the courage of Ezechias was revived, and he prepared himself for a vigorous resistance. Haughty demands of surrender were repulsed, and the king taking counsel with the prophet Isaiah turned in supplication to Yahweh; he received the assurance that the enemy would soon abandon the siege without doing any harm to the city. This prophecy was shortly verified when the angel of the Lord having slain in the night 185,000 of the besieging forces, the remainder fled with Sennacherib, and returned to Assyria. Ezechias survived this deliverance only a few years, and he was buried with great pomp in the tomb of the sons of David ([II Kings 20:21](#); [II Chronicles 32:33](#)).

JAMES F. DRISCOLL

Ezekiel

Ezekiel

Ezekiel, whose name, Yehézq'el signifies "strong is God", or "whom God makes strong" ([Ezek. i, 3](#); [iii, 8](#)), was the son of Buzi, and was one of the priests who, in the

year 598 B.C., had been deported together with Joachim as prisoners from Jerusalem (IV Kings, xxiv, 12-16; cf. Ezek. xxxiii, 21, xl, 1). With the other exiles he settled in Tell-Abib near the Chobar (Ezek. i,1; iii, 15) in Babylonia, and seems to have spent the rest of his life there. In the fifth year after the captivity of Joachim, and according to some, the thirtieth year of his life, Ezekiel received his call as a prophet (Ezek. i, 2, 4 etc) in the vision which he describes in the beginning of his prophecy (Ezek. i,4; iii, 15). From Ezek. xxix, 17 it appears that he prophesied during at least twenty-two years.

Ezekiel was called to foretell God's faithfulness in the midst of trials, as well as in the fulfilment of His promises. During the first period of his career, he foretold the complete destruction of the kingdom of Juda, and the annihilation of the city and temple. After the fulfilment of these predictions, he was commanded to announce the future return from exile, the re-establishment of the people in their own country and, especially, the triumph of the Kingdom of the Messiah, the second David, so that the people would not abandon themselves to despair and perish as a nation, through contact with the Gentiles, whose gods had apparently triumphed over the God of Israel. This is the principal burden of Ezekiel's prophecy, which is divided into three parts. After the introduction, the vision of the calling of the prophet (Ezek. i-iii,21), the first part contains the prophecies against Juda before the fall of Jerusalem (Ezek. iii, 22-xxiv). In this part the prophet declares the hope of saving the city, the kingdom, and the temple to be vain, and announces the approaching judgment of God upon Juda. This part may be subdivided into five groups of prophecies.

- After a second revelation, in which God discloses to the prophet His course of action (iii,22-27), the prophet foretells by symbolic acts (iv, v) and in words (vi-vii), the siege and capture of Jerusalem, and the banishment of Juda.
- In a prophetic vision, in the presence of the elders of Israel, God reveals to him the cause of these punishments. In spirit he witnesses the idolatry practiced in and near the temple (viii); God commands that the guilty be punished and the faithful be spared (ix); God's majesty departs from the temple (x), and also, after the announcement of guilt and punishment, from the city. With this the judgment which the prophet communicates to the exiles ends (xi).
- In the third group (xii-xix) many different prophecies are brought together, whose sole connection is the relation they bear to the guilt and punishment of Jerusalem and Juda. Ezekiel prophesies by symbolic actions the exile of the people, the flight of Sedecias, and the devastation of the land (xii, 1-20). Then follow Divine revelations regarding belief in false prophecies, and disbelief in the very presence of true prophecy. This was one of the causes of the horrors (xiii, 21-xiv, 11), to be visited upon the remnant of the inhabitants of Jerusalem (xiv, 12-23). The prophet likens

Jerusalem to the dead wood of the vine, which is destined for the fire (xv); in an elaborate denunciation he represents Juda as a shameless harlot, who surpasses Samaria and Sodom in malice (xvi), and in a new simile, he condemns King Sedecias (xvii). After a discourse on the justice of God (xviii), there follows a further lamentation over the princes and the people of Juda (xix).

- In the presence of the elders the prophet denounces the whole people of Israel for the abominations they practiced in Egypt, in the Wilderness, and in Canaan (xx). For these Juda shall be consumed by fire, and Jerusalem shall be exterminated by the sword (xxi). Abominable is the immorality of Jerusalem (xxii), but Juda is more guilty than Israel has ever been (xxiii).
- On the day on which the siege of Jerusalem began, the prophet represents, under the figure of the rusty pot, what was to befall the inhabitants of the city. On the occasion of the death of his wife, God forbids him to mourn openly, in order to teach the exiles that they should be willing to lose that which is dearest to them without grieving over it (xxiv).

In the second part (xxv-xxxii), are gathered together the prophecies concerning the Gentiles. He takes, first of all, the neighbouring peoples who had been exalted through the downfall of Juda, and who had humiliated Israel. The fate of four of these, the Ammonites, the Moabites, the Edomites, and the Philistines, is condensed in chapter xxv. He treats more at length of Tyre and its king (xxxvi-xxviii,19), after which he casts a glance at Sidon (xxviii,20-26). Six prophecies against Egypt follow, dating from different years (xxix-xxxii). The third part (xxxiii-xlvi), is occupied with the Divine utterances on the subject of Israel's restoration. As introduction, we have a dissertation from the prophet, in his capacity of authorized champion of the mercy and justice of God, after which he addresses himself to those remaining in Juda, and to the perverse exiles (xxxiii). The manner in which God will restore His people is only indicated in a general way. The Lord will cause the evil shepherds to perish; He will gather in, guide, and feed the sheep by means of the second David, the Messiah (xxxiv).

Though Mount Seir shall remain a waste, Israel shall return unto its own. There God will purify His people, animate the nation with a new spirit, and re-establish it in its former splendour for the glory of His name (xxxv-xxxvii). Israel, though dead, shall rise again, and the dry bones shall be covered with flesh and endowed with life before the eyes of the prophet. Ephraim and Juda shall, under the second David, be united into one kingdom, and the Lord shall dwell in their midst (xxxvii). The invincibility and indestructibility of the restored kingdom are then symbolically presented in the war upon Gog, his inglorious defeat, and the annihilation of his armies (xxxviii-xxxix).

In the last prophetic vision, God shows the new temple (xl-xliii), the new worship (xliii-xlvi), the return to their own land, and the new division thereof among the twelve tribes (xlvii-xlviii), as a figure of His foundation of a kingdom where He shall dwell among His people, and where He shall be served in His tabernacle according to strict rules, by priests of His choice, and by the prince of the house of David.

From this review of the contents of the prophecy, it is evident that the prophetic vision, the symbolic actions and examples, comprise a considerable portion of the book. The completeness of the description of the vision, action and similes, is one of the many causes of the obscurity of the book of Ezekiel. It is often difficult to distinguish between what is essential to the matter represented, and what serves merely to make the image more vivid. On this account it happens that, in the circumstantial descriptions, words are used, the meaning of which, inasmuch as they occur in Ezekiel only, is not determined. Because of this obscurity, a number of copyist mistakes have crept into the text, and that at an early date, since the Septuagint has some of them in common with the earliest Hebrew text we have. The Greek version, however, includes several readings which help to fix the meaning. The genuineness of the book of Ezekiel is generally conceded. Some few consider chapters xl-xlviii to be apocryphal, because the plan there described in the building of the temple was not followed, but they overlook the fact that Ezekiel here gives a symbolic representation of the temple, that was to find spiritual realization in God's new kingdom. The Divine character of the prophecies was recognized as early as the time of Jesus the son of Sirach (Eccles. xlix, 10, 11). In the New Testament, there are no verbatim references, but allusions to the prophecy and figures taken from it are prominent. Compare St. John x etc. with Ezek. xxxiv, 11 etc.; St. Matthew xxii, 32, with Ezek. xvii, 23. In particular St. John, in the Apocalypse, has often followed Ezekiel. Compare Apoc. xviii-xxi with Ezek. xxvii, xxxviii etc., xlvii etc.

JOS. SCHETS

Eznik

Eznik

A writer of the fifth century, born at Golp, in the province of Taikh, a tributary valley of the Chorokh, in Northern Armenia. He was a pupil of Isaac, the catholicos, and of Mesrop. At their request he went first to Edessa, then to Constantinople to perfect himself in the various sciences and to collect or copy Syriac and Greek manuscripts of the Bible, and the writings of the Fathers of the Church. He returned to Armenia after the Council of Ephesus (431), and is probably identical with Eznik, Bishop of Bagrevand, who took part in the Synod of Artashat in 449. In addition to his labours

in connection with the new version of the Bible (see Versions of the Bible) and various translations, he composed several works, the principal of which is his remarkable treatise "Against the Sects". It was written between 441 and 449, and contains four books or chapters. In the first, against the heathens, Eznik combats the eternity of matter and the substantial existence of evil. In the second he refutes the chief doctrines of Parseeism. The third is directed against the Greek philosophers (Pythagoreans, Platonists, Peripatetics, Stoics, and Epicureans), the writer taking his arguments from the Bible rather than from reason. The fourth book is an exposition and refutation of Marcionism. In the work Eznik displays much acumen and an extensive erudition. He was evidently as familiar with Persian as with Greek literature. His Armenian diction is of the choicest classical type although the nature of his subject-matter forced him to use quite a number of Greek words. The work "Against the Sects" was first published at Smyrna in 1762; again, much more correctly and from several manuscripts, by the Mechitarists at Venice in 1826 and in 1865. An indifferent French translation was made by LeVaillant de Florival, "Réfutation des différentes sectes", etc. (Paris, 1853). A good German translation is that by J. M. Schmid, "Eznik von Kolb, Wider die Sekten" (Leipzig, 1900). Langlois published a general introduction to the whole treatise and a translation of part of book II (section 5, 1-11, containing Magism) in his "Collection des historiens anciens et modernes de l'Arménie", II, pp. 371 sq. Eznik is also the author of a short collection of moral precepts, printed with his more important treatise.

H. HYVERNAT

Ezzo

Ezzo

A priest of Bamberg in the eleventh century, author of a famous poem known as the "Song of the Miracles of Christ" (*Cantilena de miraculis Christi*), or the "Anegenge" or "Beginning". The poem was found by Barack in a Strasburg manuscript of the eleventh century; but only a few strophes are given. The whole song, thirty-four strophes in a later version, in the Vora manuscript. The "Vita Altmanni" relates that in 1065, when rumours of the approaching end of the world were rife, many people started on a pilgrimage to Jerusalem under the leadership of Bishop Gunther of Bamberg, and that Ezzo composed the poem on this occasion. The opening strophe of the Vora manuscript does not mention the pilgrimage, but simply states that the bishop ordered Ezzo to write the song. The effect, we are told, was such that everybody hastened to take monastic vows. The poem is written in the East Franconian dialect; it relates in earnest language the Creation, Fall, and Redemption of mankind. It was edited by P.

Piper (*op. cit. infra*) and Steinmayer (in Müllenhoff and Scherer "Denkmäler deutscher Poesie und Prosa aus dem VIII-XII Jahrhundert", Berlin, 1892).

ARTHUR F.J. REMY

Francesco Faa di Bruno

Francesco Faa di Bruno

An Italian mathematician and priest, born at Alessandria, 7 March, 1825; died at Turin, 26 March, 1888. He was of noble birth, and held, at one time, the rank of captain-of-staff in the Sardinian Army. Coming to Paris, he resigned his commission, studied under Cauchy, an admirable type of the true Catholic savant, and Leverrier, who shared in the discovery of the planet Neptune, and he became intimate with Abbé Moigno and Hermite. On his return to Turin, he was ordained, but the remainder of his life was spent as Professor of Mathematics at the University. In recognition of his achievements as a mathematician, the degree of Doctor of Science was conferred on him by the Universities of Paris and Turin. In addition to some ascetical writings, the composition of some sacred melodies, and the invention of some scientific apparatus, Faa di Bruno made numerous and important contributions to mathematics. These include about forty original articles published in the "Journal de Mathématiques" (Liouville), Crelle's "Journal", "American Journal of Mathematics" (John Hopkins University), "Annali di Tortolini", "Les Mondes", "Comptes rendus de l'Académie des sciences", etc; the first half of an exhaustive treatise on the theory and applications of elliptic functions which he planned to complete in three volumes; "Théorie générale de l'élimination" (Paris, 1859); "Calcolo degli errori" (Turin, 1867), translated into French under the title of "Traité élémentaire du calcul des erreurs" (Paris, 1869); and most important of all, "Théorie des formes binaires" (Paris, 1876), translated into German (Leipzig, 1881). For a list of the memoirs of Faa di Bruno, see the "Catalogue of Scientific Papers of the Royal Society: (London, 1868, 1877, 1891), t. II, vii, and ix.

PAUL H. LINEHAN

Felix Faber

Felix Faber

German writer, born about 1441 at Zurich, of a famous family commonly known as Schmid; died in 1502 at Ulm, Germany. He made his early studies under the Dominicans at Basle and Ulm, where he spent the greater part of his life. He became a master of sacred theology, was head preacher at Ulm during 1477-78, became provincial of the German province in 1486, attended two general chapters of his order in 1480, and made a pilgrimage to Palestine and Syria in 1483-4. He wrote two accounts of his travels, one in German (Ulm, 1556); the other in Latin. The former is rather

brief; the other is very complete and accurate in its descriptions of the places visited, and is of great value to students of Palestinian topography, who recognize Faber as the most distinguished and learned writer of the fifteenth century. This work was republished by the Stuttgart Literary Society in three octavo volumes (1843-49) under the title, "Fr. Felicis Fabri Evagatorium in Terræ Sanctæ, Arabiæ et Ægypti peregrinationem". He was also the author of a versified pilgrim's book, edited by Birlinger (Munich, 1864). In 1489 Faber completed a history of the Swiss (*Historia Suevorum*) down to that year. Goldast, in his preface to the Frankfort edition of 1604 (later ed., Ulm, 1727), says of him that he was praised by few but copied by many. Faber translated a life of Blessed Henry Suso from the Latin. Some of his manuscripts are still unpublished.

ARTHUR L. McMAHON

Frederick William Faber

Frederick William Faber

Oratorian and devotional writer, b. 28 June, 1814, at Calverley, Yorkshire, England; d. in London, 26 Sept., 1863. After five years at Harrow School he matriculated at Balliol in 1832, became a scholar at University College in 1834, and a fellow of that College in 1837. Of Huguenot descent Faber was divided in his university days between a tendency to Calvinism, in the form of individual pietism, and the Church theory then being advocated by Newman. Eventually the latter triumphed, and Faber threw himself unreservedly into the Tractarian movement and cooperated in the translation of the works of the Fathers then in progress. He received Anglican ordination in 1839, and took work as a tutor, till, in 1843, he was appointed Rector of Elton, Northamptonshire. During the years 1839-1843 Faber made two continental tours, and his letters give strikingly poetic descriptions of the scenes he visited; they glow with enthusiasm for Catholic rites and devotion. On his return to Elton in 1844, he established the practice of confessions, preached Catholic doctrine, and wrote the life of St. Wilfrid, openly advocating the claims and supremacy of Rome.

In October 1845, Newman was received into the Church at Littlemore; in November, Faber was also received by Bishop Waring, at Northampton. In 1846, Faber established a religious community, the "Brothers of the Will of God" or "Wilfridians," as they were called from St. Wilfrid, their patron, at Cotton Hall, near Cheadle, Staffordshire, the gift of the Earl of Shrewsbury. In 1847 Faber was ordained priest and with his zealous community, now forty in number, converted the whole parish, except "the parson, the pew-opener, and two drunken men." In 1848, Newman arrived from Rome with his new congregation of the Oratory of St. Philip Neri, and established

himself at Old Oscott, Birmingham, then renamed Maryvale. With singular disinterestedness, Faber placed himself under Newman as a simple novice, taking with him all his community who were willing to follow his example. In 1849 he was sent by Newman to found the Oratory at King William Street, London, and was appointed its superior. In the poor chapel there, once a tavern, Faber laid the foundation of his future works. Poor schools, nightly services, and sermons with hymns and processions of the Blessed Sacrament, till then unknown, formed its chief characteristics. Faber's hymns, composed especially for these services, display a combination of accurate theological doctrine, fervent devotion, musical rhythm, and true poetic talent. As a preacher he was remarkable for his delivery, choice of expression, absence of gesticulation, and personal exhortations of surprising force.

In 1847 Faber began the publication of "Lives of the Modern Saints," not as biographies, but as showing the growth of sanctity under the operation of grace and the supernatural perfection attained. The series of forty-nine Lives supplied a great want of the time and, after some opposition, met with full approbation. His knowledge of the spiritual life and the extent of his theological and ascetic reading were seen in the eight works that now came from his pen: "All for Jesus", 1853; "Growth in Holiness", 1854; "The Blessed Sacrament", 1855; "The Creator and the Creature", 1858; "The Foot of the Cross", 1858; "Spiritual Conferences", 1859; "The Precious Blood", 1860; "Bethlehem", 1860. The many foreign translations of these works, their circulation now maintained for more than fifty years, their constant quotation by spiritual writers, have raised their author to the rank of a master in mystical theology. He wrote also two volumes of "Notes on Doctrinal Subjects" (1866), giving the skeleton of various sermons and of two projected works, "Calvary" and "The Holy Ghost." A volume of poems, various essays, and other minor works are also from his pen. The fascination and grace of his presence rendered him personally attractive, while as confessor his sympathy with souls in trouble, his spiritual insight, and his supernatural unworldliness, gave to his counsel a lifelong point and force.

The Oratory removed to South Kensington in 1854, and there Faber spent the remaining nine years of his life, occupied primarily in establishing his community on the strict observance of St. Philip's Institute, being convinced that fidelity to its Roman model was its one vital principle. The sacraments, prayer, including the reverent performance of the ecclesiastical functions, and the daily Word of God were St. Philip's weapons, and Faber would never engage in other external works, however good. Unswerving loyalty to the Holy See was his watchword, and devotion to the Mother of God was for him the safeguard of faith and the source and support of true piety.

Henry S. Bowden

Johann Faber

Johann Faber

Theologian, b. at Leutkirch, in Swabia, 1478; d. in Vienna, 21 May, 1541.

He studied theology and canon law at Tübingen and Freiburg in the Breisgau; was made doctor of sacred theology in Freiburg; became in succession minister of Lindau, Leutkirch; Vicar-General of Constance, 1518; chaplain and confessor to King Ferdinand I of Austria, 1524; was appointed Bishop of Vienna, 1530. While a canon of the cathedral of Basle he formed a friendship with Erasmus that lasted throughout their lives; Erasmus persuaded Faber to take up the study of the Fathers.

Like others of his time Faber was at first friendly with the Reformers, Melanchthon, Zwingli, and Oecolampandius, sympathizing with their efforts at reform and opposing certain abuses himself; but when he realized that neither dogma nor the Church herself was spared by the Reformers, he broke with them and became their most consistent opponent. He wrote his first polemic against Luther, "Opus adversus nova quaedam dogmata Martini Lutheri" (1552). This was soon followed by his "Malleus Haereticorum, sex libris ad Hadrianum VI summum Pontificem" (Cologne, 1524; Rome, 1569). From this latter work he is sometimes called the "hammer of heretics". He entered into public debate with Zwingli at Zurich; was prominent in all the diets held to restore peace to the Church; and was one of the committee appointed to draw up a refutation of the Confession of Augsburg. On some points, e.g. the celibacy of the clergy, he was willing to recognize certain unfortunate conditions if an agreement could be reached to prevent similar conditions in the future, but no agreement was possible. He was sent by Ferdinand to Spain and then to Henry VIII in England to seek aid against the invading Turks; Ferdinand also had him enlist the services of the University of Vienna to combat the spread of the doctrines of Luther in Austria. As bishop his zeal was unbounded; he protected his flock by frequent preaching and numerous writings, and he held regular conferences with his clergy. He founded twelve scholarships for boys who wished to become priests but did not have the means to realize their ambition.

His works (German and Latin) are homiletical and polemical in character. Besides those already mentioned he wrote treatises on faith and good works, on the Sacrifice of the Mass; an instruction and answer to Luther's work against the King of England; a treatise against the more recent tenets of Luther; a comparison of the writings of Hus and Luther; the power of the pope in the case of Luther; an answer to six articles of

Zwingli; defence of catholic belief against the chief Anabaptist, Balthasar of Friedberg; a book on the religion of the Russians; sermons on the misery of life and on the Blessed Sacrament; sermons of consolation and courage while the Turks were besieging Vienna. His works in three folio volumes (Cologne, 1537-40) do not contain his polemical writings; these are found in "Opuscula quaedam Joannis Fabri, Episcopi Viennensis (Leipzig, 1539).

M. SCHUMACHER

Johann Faber

Johann Faber

Johann Faber of Heilbronn, controversialist and preacher; b. 1504, at Heilbronn in Wittenberg; d. at Augsburg, 27 Feb., 1558. At the age of sixteen he entered the Dominican Order and made his ecclesiastical studies in the convent at Wimpfen. Of his earliest missionary labours little is known. In 1534 he was charged with the duty of preaching in the cathedral of Augsburg, but owing to the Lutheran heresies and the bitter attitude of the heretics towards the Church, in consequence of which the Catholic clergy were forbidden to preach, his usefulness there was of short duration. Thence he went to the University of Cologne, where he devoted himself for several years to the higher clerical studies. Here he published in 1535 and 1536 several unedited works of the English mystic, Richard Rolle. Returning to Wimpfen he engaged in the work of preaching and refuting the errors of the Reformers, which had already taken deep root among a large portion of the people. His unwearied zeal, however, in upholding the ancient Faith and the marvellous results attending it, caused his enemies to turn against him with such bitterness that he was forced to leave the city. In 1539, at the solicitation of the citizens of Colmar, he proceeded to that city, where the new doctrines had by this time gained considerable ground. On 2 Sept. of the same year he matriculated at the University of Freiburg as "Concionator Colmarenis", and it was at this time, in all probability, that he received the baccalaureate. In 1545 he was elected prior of the convent in Schlettstadt, but he had served only two years in this capacity when he was again appointed to take charge of the pulpit in the cathedral of Augsburg. Being compelled to abandon it once more in 1552, he proceeded to the University of Ingolstadt, where he received the degree of Doctor of Theology under the presidency of Peter Canisius, who succeeded him later in the pulpit of Augsburg. In the following year he returned again to Augsburg, where he died. Faber was a man of vast theological erudition. His zeal to stem the tide of heresy and the invincible courage he evinced in exposing the prevailing errors brought him into conflict with many heretical leaders. He is the author of a number of excellent works, including the following: (1) "Quod

fides esse possit sine caritate, expositio pia et catholica" (Augsburg, 1548); (2) "Testimonium Scripturae et Patrum B. Petrum apostolum Romae fuisse" (Antwerp, 1553); (3) "Grundliche und christliche Anzeigen aus der heiligen Schrift und heiligen Kirchenlehrern was die evangelische Messe sei" (Dillingen, 1558); (4) "Enchiridion Bibliorum concionatori in popularibus declamationibus utile" (Cologne, 1568); (5) "Precationes Christianae ex sacris litteris et D. Augustino singulario studio concinnatae et selectae" (Cologne, 1586).

JOSEPH SCHROEDER

Johann Augustanus Faber

Johann Augustanus Faber

Theologian, born at Fribourg, Switzerland, c. 1470; died about 1531. He entered the Dominican Order, probably at Augsburg, Germany, where he passed the greater part of his religious life, whence his name Augustanus. He obtained the degrees of Master and Doctor of Divinity, was made (1511) Vicar General of the Dominican Congregation of Upper Germany, and for twenty years filled the office of prior in the Augsburg Convent. He rebuilt (1512-1515) the Dominican church in that city, for which some of the funds were obtained through the preaching of a jubilee permitted by Leo X and also, after a prohibition, by the Emperor Maximilian I. Maximilian made him court preacher and royal counselor. On the recommendation of Erasmus, with whom he was very friendly, he was again appointed to these offices by Maximilian's successor, Charles V. Sympathizing with the Lutherans in their revival of classical learning, he advocated a plan for the treatment of Luther and his followers that the ecclesiastical superiors could not accept. When he withdrew this, and broke away from the humanists, he received the abuse of Luther, and also of his former supporter Erasmus, who had already been provoked by his censure, published anonymously, for adhering to the new errors. The accusation made by Erasmus, that Faber had calumniated him to Cardinal Cajetan has not been proved.

ARTHUR L. MCMAHON

Matthias Faber

Matthias Faber

Writer and preacher, born at Altomünster, Germany, 24 February, 1586; died at Tyrnau, 26 April 1653. He embraced the ecclesiastical state, became curé of the parish of St. Maurice at Ingolstadt, and was a professor at the University of that city. His

sermons had already won for him a reputation as a sacred orator when he entered the Society of Jesus at Vienna. He was then fifty years old. The sermons which he has left are remarkable for soundness of doctrine, and learning. He is even more a controversialist than orator in the ordinary sense of the word. His object in preaching was, before everything, either to convert heretics, or to safeguard Catholics from the false doctrines of the Reformation. According to the custom of the times he made excessive use of Scriptural text, which crowd his instructive sermons and render the reading of them difficult. They are all written in Latin, and have been published in many edition.

LOUIS LALANDE

Philip Faber

Philip Faber

(Or Fabri.)

Theologian, philosopher and noted commentator of Duns Scotus; born in 1564, at Spinata di Brisighella, district of Faenza, Italy, and died at Padua, 28 August, 1630. In 1582 he entered the Order of St. Francis (Conventuals), at Cremona. After completing his studies, he taught in various monastic schools till he was appointed professor of philosophy in 1603, and in 1606 professor of theology, at the University of Padua, where he was highly successful as a lecturer. In 1625 he was elected provincial of the order, and he again took up his work as professor, expounding the teachings of Duns Scotus with ability and judgment, and abandoning the superlative style of other commentators. His most important works are: "Philosophia naturalis Scoti in theoremata distributa" (Parma, 1601, revised at Venice, 1606, 1616, 1622, and at Paris, 1622). "Commentaria in quatuor libros sententiarum Duns Scoti" (Venice, 1613; 3rd ed. Paris, 1622); "De Praedestinatione" (Venice, 1623), a complement to the first book of the "Sentences"; "De restitutione, et extremâ unctione" (Venice, 1624), an addition to the fourth book of the Sentences; "A treatise `de Sacramento Ordinis, poenis et censuris ecclesiasticis'" (Venice, 1628). His work, "De Primatu Petri et Romani Pontificis" and his "Commentaries on the Metaphysics of Aristotle" were published, after Faber's death, by his friend Matthew Ferchius, O.F.M., who prefaced the "Commentaries", with a biography of the author.

MICHAEL BIHL

Pope Saint Fabian

Pope St. Fabian

(FABIANUS)

Pope (236-250), the extraordinary circumstances of whose election is related by Eusebius (Hist. Eccl., VI, 29). After the death of Anterus he had come to Rome, with some others, from his farm and was in the city when the new election began. While the names of several illustrious and noble persons were being considered, a dove suddenly descended upon the head of Fabian, of whom no one had even thought. To the assembled brethren the sight recalled the Gospel scene of the descent of the Holy Spirit upon the Saviour of mankind, and so, divinely inspired, as it were, they chose Fabian with joyous unanimity and placed him in the Chair of Peter. During his reign of fourteen years there was a lull in the storm of persecution. Little is known of his pontificate. The "Liber Pontificalis" says that he divided Rome into seven districts, each supervised by a deacon, and appointed seven subdeacons, to collect, in conjunction with other notaries, the "acta" of the martyrs, i.e. the reports of the court-proceedings on the occasion of their trials (cf. Eus., VI, 43). There is a tradition that he instituted the four minor orders. Under him considerable work was done in the catacombs. He caused the body of Pope St. Pontianus to be exhumed, in Sardinia, and transferred to the catacomb of St. Callistus at Rome. Later accounts, more or less trustworthy, attribute to him the consecration (245) of seven bishops as missionaries to Gaul, among them St. Denys of Paris (Greg. of Tours, Hist. Francor., I, 28, 31). St. Cyprian mentions (Ep., 59) the condemnation by Fabian for heresy of a certain Privatus (Bishop of Lambaesa) in Africa. The famous Origen did not hesitate to defend, before Fabian, the orthodoxy of his teaching (Eus. Hist. Eccl., VI, 34). Fabian died a martyr (20 Jan., 250) at the beginning of the Decian persecution, and was buried in the Crypt of the Popes in the catacomb of St. Callistus, where in recent times (1850) De Rossi discovered his Greek epitaph (Roma Sotterranea II, 59): "Fabian, bishop and martyr." The decretals ascribed to him in Pseudo-Isidore are apocryphal.

P. GABRIEL MEIER

St. Fabiola

St. Fabiola

A Roman matron of rank, died 27 December, 399 or 400. She was one of the company of noble Roman women who, under the influence of St. Jerome, gave up all

earthly pleasures and devoted themselves to the practice of Christian asceticism and to charitable work. At the time of St. Jerome's stay at Rome (382-84), Fabiola was not one of the ascetic circle which gathered around him. It was not until a later date that, upon the death of her second consort, she took the decisive step of entering upon a life of renunciation and labour for others. Fabiola belonged to the patrician Roman family of the Fabia. She had been married to a man who led so vicious a life that to live with him was impossible. She obtained a divorce from him according to Roman law, and, contrary to the ordinances of the Church, she entered upon a second union before the first of her first husband. On the day before Easter, following the death of her second consort, she appeared before the gates of the Lateran basilica, dressed in penitential garb, and did penance in public for her sin, an act which made a great impression upon the Christian population of Rome. The pope received her formally again into full communion with the Church.

Fabiola now renounced all that the world had to offer her, and devoted her immense wealth to the needs of the poor and the sick. She erected a fine hospital at Rome, and waited on the inmates herself, not even shunning those afflicted with repulsive wounds and sores. Besides this she gave large sums to the churches and religious communities at Rome, and at other places in Italy. All her interests were centered on the needs of the Church and the care of the poor and suffering. In 395, she went to Bethlehem, where she lived in the hospice of the convent directed by Paula and applied herself, under the direction of St. Jerome, with the greatest zeal to the study and contemplation of the Scriptures, and to ascetic exercises. An incursion of the Huns into the eastern provinces of the empire, and the quarrel which broke out between Jerome and Bishop John of Jerusalem respecting the teachings of Origen, made residence in Bethlehem unpleasant for her, and she returned to Rome. She remained, however, in correspondence with St. Jerome, who at her request wrote a treatise on the priesthood of Aaron and the priestly dress. At Rome, Fabiola united with the former senator Pammachius in carrying out a great charitable undertaking; together they erected a Porto a large hospice for pilgrims coming to Rome. Fabiola also continued her usual personal labours in aid of the poor and sick until her death. Her funeral was a wonderful manifestation of the gratitude and veneration with which she was regarded by the Roman populace. St. Jerome wrote a eulogistic memoir of Fabiola in a letter to her relative Oceanus.

J.P. KIRSCH

Joseph Fabre

Joseph Fabre

Second Superior General of the Oblates of Mary Immaculate, born 14 November, 1824, at Cuges, Bouches-du-Rhône, France; died at Royaumont near Paris, 26 October, 1892. He first studied at the Lycée of Marseilles, then entered the Grand Séminaire of the same city, and made his novitiate in the Congregation of the Oblates, pronouncing his final vows 17 February, 1845. After teaching philosophy for some time, he was ordained priest, 29 May, 1847. He was Director of the Grand Séminaire of Marseilles when, in 1850, a general chapter elected him procurator of the whole Institute. The Bishop of Marseilles, who was also the superior and founder of the Oblates, made him his trusted confidant; and when that prelate died Father Fabre was unanimously chosen to succeed him (5 December, 1861) as Superior General of his congregation in which capacity he from time to time addressed to the members of his congregation, encyclical letters which have remained models of spiritual direction. He instituted collective retreats for the superiors, and others for the simple religious, and insisted on the observance of charity and humility, which Bishop De Mazenod had made the cardinal virtues of his Institute.

He introduced his missionaries into Italy, Spain, and Holland; established new houses in France, Great Britain, and Canada, and, in 1883, canonically erected into a separate province the houses already existing in the United States. Their activities in the missions of Ceylon, South Africa, and the extreme North, as well as the far West, of America, were no less remarkable during his tenure of office.

At the time of his death, when he had been superior for thirty-one years, the roll of members had more than doubled in numbers, and the Oblates counted in their ranks ten bishops who were at the head of as many vicariates Apostolic. If Bishop De Mazenod had founded and consolidated the congregation, the last touches to the good work were given by his immediate successor. In addition to bring their superior general, Father Fabre was the Director-General of the Association of the Holy Family, a religious institute composed of seven congregations of nuns founded at Bordeaux in the first half of the nineteenth century.

A.G. MORICE

Honore Fabri

Honoré Fabri

(Lefèvre.)

Jesuit, theologian, b. about 1607 in the Department of Ain, France; d. at Rome, 8 March, 1688. He entered the Society of Jesus at Avignon, in 1626, and distinguished himself by a life of continuous mental work. He excelled especially in mathematics and physics, but he was also a formidable controversialist. For eight years he taught philosophy and for six years mathematics at the Jesuit college at Lyons, attracting many pupils by the fame of his learning. Called to Rome, he became the theologian of the court of the papal penitentiary in the Vatican basilica, a position he held for thirty years. His duties did not prevent him from writing a number of learned works on various subjects in keeping with the needs of his time. Sommervogel mentions thirty-one titles of published works in connection with Fabri's name; besides, there are fourteen of his productions in manuscript, now kept in the Library of Lyons.

The following are the more important of his publications: "Pithanophilus, seu dialogus vel opusculum de opinione probabili," etc. (Rome, 1659). This work was attacked by Stephanus Gradius, Prefect of the Vatican Library, in his "Disputatio de opinione probabili" (Rome, 1678; Mechlin, 1679). "Honorati Fabri, Societatis Jesu, apolgeticus doctrinæ moralis ejusdem Societatis (Lyons, 1670; Cologne, 1672). This treats, in eleven dialogues, of probablism, explaining its true nature, and refuting the charges of its opponents. The Cologne edition was considerably enlarged but did not meet with ecclesiastical approbation; it was placed on the Index of forbidden books soon after its appearance. "Una fides unius Ecclesiæ Romanæ contra indifferentes hujus sæculi tribus libris facili methodo asserto" (Dillingen, 1657). "Summula theologica in quâ quæstiones omnes alicujus momenti, quæ a Scholasticus agitari solent, breviter discutiuntur ac definiuntur" (Lyons, 1669). The principles on which this work constructs its theological conclusions are far different from those of Aristotle. "Euphiander seu vir ingeniosus", a little book, which may be useful to the student of literature (Lyons, 1669; Vienna, 1731; Budapest, 1749; Ofen, 1763). Most of Fabri's other works deal with philosophy, mathematics, physics, astronomy, and even zoology, In his treatise on man he claims to have discovered the circulation of the blood, prior to Harvey, but after having investigated this question, Father Bellynk arrives at the conclusion that, at best, Father Fabri may have made the discovery independently of Harvey (cf. Bellynk, *Cours de Zoologie*, 1864, p. 23).

Sommervogel, *Bibl. de la C. de J.* (Brussels and Paris, 1892), III, 511-521; Hurter, *Nomenclator Literarius* (Innsbruck 1893), tom. II, 598-600.

A.J. MAAS
Fabriano and Matelica

Fabriano and Matelica

Diocese of Fabriano and Matelica (Fabrianensis et Mathelicensis).

Fabriano, a city in the province of Macerata, Central Italy, is noted for its paper manufactories and its trade in salted fish. It is said to have been founded in the ninth century B.C. by refugees from the ancient Attidium (the modern Attigio); even as late as 1254 the baptismal font of Fabriano was in the church of San Giovanni Battista in Attigio. The history of Fabriano is closely connected with that of the Marches. In the church of San Benedetto, of the Silvestrine monks, is the tomb of Blessed Giovanni Bonelli, a Silvestrine (d. 1290). St. Silvestro Guzzoli, the founder of this order, is buried at Monte Fano, not far from Fabriano, where Blessed Giuseppe dei Conti Atti and Blessed Ugo Laico, both Silvestrines, are also buried. The relics of St. Romuald were transferred to the church of SS. Biagio and Romoaldo in 1480. The city was under the jurisdiction of Camerino until 1785, when Pius VI re-established the see of Matelica and united it *aeque principaliter* with Fabriano.

The town of Matelica possesses some ancient inscriptions. A Roman colony was established there in 89 B.C. In 487, Bishop Equitius of Matelica was at Rome; and in 551, Bishop Florentius accompanied Pope Vigilius to Constantinople. No other bishops of the ancient see are known. Until 1785 Matelica was under the jurisdiction of Camerino. Mention may be made of Blessed Gentile da Matelica, a Franciscan, martyred in Egypt in 1351, and buried in Venice (ai Frari), and of Blessed Mattia Lazano, a Benedictine nun, also of Matelica, buried in the church of Santa Maria Maddalena. The diocese is immediately subject to the Holy See, and has 32,000 inhabitants, 42 parishes, 1 male and 2 female educational institutions, 6 religious houses of men and 4 of women. The painter, Gentile da Fabriano (q.v.), is one of the most famous of the natives of Fabriano. He worked at Foggia and Bari, and later in the palace of the doges at Venice, in the Strozzi chapel at Florence, and finally at Rome.

U. BENIGNI

Fabrica Ecclesiae

Fabrica Ecclesiae

A Latin term, meaning, etymologically, the construction of a church, but in a broader sense the funds necessary for such construction. This expression may also be

used to designate the repairing and maintenance of churches, the daily expense of worship, and to the amount requisite for covering these expenses. In this particular connexion, the expression is first met with in the letter of Pope Simplicius to Gaudentius, Bishop of Aufina (19 Nov., 475); however, even then it was not new, being borrowed from profane usage.

During the first Christian centuries the temporalities intended to meet the expenses incurred by the religious services carried on throughout a diocese belonged entirely to the cathedral church, and constituted a common fund which the bishop used, at his option, in defraying the expenses of religion, supporting his ministers, and caring for the poor. But in the fifth century, particularly in Italy, this common fund was divided into four parts, one of which was set aside for the *fabrica ecclesiæ*. In Sicily, however, in 494, no portion was especially reserved for the fabric, and in Gaul, such an allotment seems to have been unknown. In Spain, a third of the ecclesiastical revenues was assigned to the *luminare* (lights), a term synonymous with *fabrica*. The increase of Christianity in the rural districts brought with it a change of discipline, according to which each church obtained a separate patrimony. In fact, benefactors no longer bestowed their gifts on the entire diocese, but on one particular church, frequently in honour of some saint specially venerated there. The common fund itself was divided among the churches of the diocese. Some writers maintain this division was owing to the establishment of ecclesiastical benefices; others claim that it followed the canonical recognition of the private ownership of churches. After vainly endeavouring to restrict the exercise of public worship to churches whose ownership had been completely renounced by the founders, the canon law eventually permitted public worship in churches that remained the private property of an individual, a monastery or even the episcopal *mensa*, or estate. The owner, however, was obliged to set apart a special fund for the needs of the church (*pro sertis tectis*, or for the *luminare*). Henceforth, when a bishop established a new parish, he was bound to provide for its needs by a specified income to be deducted from the common diocesan estate or fund—of course, if no benefactor had otherwise endowed the parish. Some hold that in consequence of the principles governing feudal society all medieval churches and their revenues became private property, and that the conflict of Gregory VII and his successors against lay investitures was in reality an effort to restore its lost possessions to the ecclesiastical domain. The result of so much strife was the transformation of former proprietary rights into the right of patronage (*Jus patronatus*).

While ecclesiastical ownership was going through these phases, the canon law decided who must contribute to the maintenance of a particular church, i. e. its owner, and all recipients of its revenues (Synod of Frankfort, 794); under pain, therefore, of forfeiting his right of patronage, the patron of a church must share the burden of its

maintenance; so too the incumbent of the ecclesiastical benefice and those to whom the tithes have been granted (*decimatores*). Finally, when the resources of the church were insufficient, the faithful themselves were bound to contribute to the expenses of Divine worship. These provisions were sanctioned by the Decretals of Gregory IX (cc. i and iv *de ecclesiis ædificandis*, III, 48), and by the Council of Trent (Sess. XXI, *de ref. c. vii*); they represent in this matter the common ecclesiastical law (see Buildings, Ecclesiastical). The *fabrica ecclesiæ* means also the persons charged with the administration of church property, usually laymen. The origin and historical development of this institution have not yet been studied very closely. Their organization, moreover, has differed from one country to another, nor have they been uniformly organized in the same country. Churches subject to the right of patronage and those incorporated, even for temporal administration, with monasteries, were more closely affected than other churches by this condition of dependency. In such churches the patron occasionally appointed an officer to administer the temporalities. It is commonly believed, however, that "church fabrics" do not antedate the thirteenth century. In the first ages of the Church the bishop administered church property with the aid of deacons and priests, but during the fourth century there appeared in the Orient and in certain countries of the West, bursars (*æconomi*), who, subject to the direction of the bishop, managed the temporal affairs of churches; in other countries the bishop continued to administer the church property with the assistance of some trustworthy man of his choice. When each church came to have its own particular patrimony, the bishop was naturally obliged to turn over the administration of such property to the local clergy, reserving nevertheless a right of control. During the long Investitures conflict this right, it may be, was completely annihilated; when peace was restored the clergy were often obliged to appeal to the inhabitants of the parish to defray the expenses of religion. In France and England especially, the assembled parishoners established the portion of expenses that ought to be borne by the community; naturally, therefore, this assembly was henceforth consulted in regard to the most important acts connected with the administration of the parish temporalities. For that purpose it selected lay delegates who participated in the ordinary administration of the ecclesiastical property set aside for parochial uses. They were called vestrymen, churchwardens, procurators (*procuratores*), mambours (*mamburni*), *luminiers*, gagers, *provisores*, *vitrici*, *operarii*, *altirmanni*, etc.

In the councils of the thirteenth century frequent mention is made of laymen, chosen by their fellow laymen to participate in the administration of temporal affairs; at the same time the rights of the parish priest and of ecclesiastical authority were maintained. A reaction is visible in the councils of the fourteenth, fifteenth, and sixteenth centuries which undertake to check the tendency towards an exclusively lay administration of the parochial property. Eventually the Council of Trent (Sess. XXII

de ref. c. ix) admitted participation in the administration of ecclesiastical property, but demanded that at all times and in all places the lay administrators render an annual account to the bishop or to his delegate. As no general law has determined either the competency or the composition of fabric committees (*conseils de fabrique*) there has been in this respect very great variations. In modern times secular power has frequently interfered in the administration of ecclesiastical property set apart for purposes of worship, and in the organization of church fabrics. Even now, in most European countries, the State regulates the administration of ecclesiastical property, and the proceedings of church fabrics. (See under Buildings, Ecclesiastical, an outline of the regulations actually in force.)

A. Van Hove

Hieronymus Fabricius

Hieronymus Fabricius

(Surnamed *ab Aquapendente*).

Distinguished Italian anatomist and surgeon, b. in the little town of Acquapendente (Aquæ-Taurinæ), twelve miles from Orvieto, in 1537; d. at Padua, 21 May, 1619. He is known by the name of his birthplace to distinguish him from his contemporary, the great German surgeon Fabricius Hildanus. In English medical literature Fabricius is best known as the teacher of Harvey, who gives him the entire credit for the discovery of the valves in the veins which meant so much for Harvey's own discovery of the circulation of the blood. Some valves in the veins, however, had been seen and described

by investigators before this, probably even by Erasistratus in ancient times. It was Fabricius' merit that he recognized the existence of a system of valves.

Sent by his parents to the University of Padua, Fabricius succeeded admirably in Greek, Latin, and philosophy. When he took up medicine he became the favourite pupil of Fallopius, being his demonstrator in anatomy at Padua when scarcely twenty. Though he was only twenty-five when Fallopius died, Fabricius was chosen his successor and a little later became professor of surgery, occupying both chairs for nearly half a century (1562-1609). His abilities were properly appreciated by the Senate of Venice, which built for him at Padua a spacious anatomical theatre bearing his name. He was created a Knight of St. Mark, and his annual salary was a thousand crowns, which was continued for ten years after his resignation. A statue was erected to his memory in Padua after his death. Fabricius was indifferent to money, refused regular fees, and accepted only such presents as wealthy patients forced on him. His work on anatomy (500 fol. pp.) is illustrated by hundreds of figures on sixty-one full-page plates, some of the best ever made. A monograph on the speech of brutes and a study of the comparative anatomy of the appendix are suggestive even for modern readers. His work on surgery is scarcely less valuable than that on anatomy and has gone through twenty editions in many languages. His principal works are: "De visione, voce, auditu" (Venice, 1600); "De brutorum loquelâ" (Padua, 1603); "De formato foetu" (Venice, 1600); "De locutione" (Venice, 1627); "Tractatus anatomicus triplex" (Frankfort, 1614). All his other works were reprinted at Frankfort shortly after this time, and all his works at Leipzig in 1687.

FISHER in *Annals of Anatomy and Surgery* (Brooklyn, 1880); FOSTER, *History of Physiology* (New York, 1901); THULIUS, *Funus Hieronymi Fabricii* (Padua, 1619); ROMITI, *Il merito anatomico di Fabrizi in Lo Sperimentale* (1883), April; DE RENZI, *Storia della Medicina in Italia* (Naples, 1845-49).

JAMES J. WALSH

Robert Fabyan

Robert Fabyan

English chronicler, died 28 February, 1513. He was a London clothier, a member of the Drapers' Company, and an alderman. He held several responsible positions, but resigned his aldermanship in 1502, probably to escape the financial burdens of the mayoralty. Fabyan belongs to the class of City chroniclers, men interested mainly in municipal life, but he is the first to take a wider view and to attempt to combine his London history with that of the country. He was not very successful. His "Concordance of Histories" begins with Brutus and goes down to the death of Richard III, but his effort

to harmonize different chroniclers is made without art or historical judgment. The work is of value mainly for its reference to London. The second edition (1533) contains a number of pithy scattered notes on municipal history under Henry VII. Dr. Busch considers that these must be an abridgment of a lost chronicle of that reign. The best edition of Fabyan is that published by Ellis in 1811.

F.F. URQUHART

Facade

Façade

The face or front of any building. In ecclesiastical architecture the term is generally used to designate the west front; sometimes the transept fronts. For ritualistic reasons, the church architect was everywhere compelled to treat the end wall of the nave as the grand façade.

EARLY CHRISTIAN PERIOD

The façades of the churches of the early period were generally built on the model of the old Roman basilicas, and were constructed according to Roman methods, and largely formed of columns and other features taken from Pagan buildings. Their interest is principally from an archæological point of view. The façades of the early Roman basilicas were exceedingly simple in their upper surfaces. There were but two types; the central gable, following usually the outline of the structure behind it, and the screen façade, usually made to overhang for purposes of protection, and formed by a gradual projection of the courses of brick both forward and sideways. In the more important churches the entire surface was concealed by a mosaic composition extending from summit to portico. Such were St. John Lateran's, St. Peter's, St. Paul's, St. Mary Major's, etc. This converted the façade above the porch into a blaze of colour. Toward the close of the Middle Ages more windows were sometimes opened in the façade. At St. Peter's, in the thirteenth century, beside the wheel window in the gable, there were two rows of three tall mullioned windows, the lower row being flanked by two more. The lower part of the façade was always covered by a projecting portico, consisting either of one side of the quadrangular atrium, or of an independent arcade or colonnade. The wall space underneath was usually broken by as many doors as there were aisles to the church, normally three, sometimes five. In the minor basilicas there was but a single door, and in exceptional cases, as at St. Peter's, there was a supplementary door for special occasions.

Byzantine façades as a rule were left comparatively plain, partly, no doubt, on account of their location and surroundings. A Byzantine church usually stood apart in

a close, and when possible trees were planted about to give shade. In towns, the church, its grounds, etc., were generally surrounded with walls. It was entered through a cloistered forecourt or atrium, in the centre of which stood the phiale, or fountain, where the required ablutions were made. Across the lower portion of the front of the church stretched the narthex or vestibule, which sometimes had a porch or portico in front of it. Many churches had a double vestibule, the outer one being called the esonarthex, generally appointed for women. The narthex communicated with the church by means of three doors; that in the centre being large and often richly ornamented. The two others, situated one on each side, were small and not remarkable. The central door was called the Beautiful Gate, sometimes the royal or basilican gate.

In the larger churches, above the narthex there was often an enclosed upper gallery for the accommodation of women, called the gynæconitis. This gallery was enclosed partly by the outside wall or walls and partly by grilles, and was reached by a staircase for the use of women only. From the outside it was lighted by a series of narrow windows, generally covered by round arches, or one or more double windows were formed by the interposition of a pillar. As a rule the windows are small and grouped together, or else they are of considerable width, and divided into three lights by columns or by thin strips of unmoulded marble. The lower portion of the windows was often filled with thin slabs of translucent marble, sculptured on the outside, which allowed the light to shine through to a certain extent. Especially in the Neo-Byzantine style, there are occasionally porches, balconies and machicolations, which give relief to the general flatness. These features are well marked with the grace peculiar to the East. Examples at Constantinople, Sts. Sergius and Bacchus (527-532), and Sancta Sophia (532-537). The church of the Virgin at Misitra and the Catholicon, at Athens (both uncertain, 11th to 13th century), and St. Mark's, Venice (1100-1350). Examples of Italian Byzantine are the cathedral at Palermo and Cefalu. The present façade of St. Mark's, Venice, is a later casing upon the original Byzantine façade, and stands alone as regards its style, although generally classed as Byzantine. The first appearance of the Byzantine in Italy was the church of San Vitale, at Ravenna. In Russia, the cathedrals of Moscow, Kiev, and Novgorod, are among the best known examples.

Lombardic (sometimes called Lombard Romanesque) façades were the most unfortunate part of Lombard churches. The designing of façades to the basilican plan and section gave much trouble to many different schools of architecture, but by none was it treated with such signal failure as by the Lombards. In declining to attach the campaniles to the church, the Italians rejected what apparently was the only possible solution. The continuous shape of the gable was used by the Pavians, even in churches where the aisle roofs were much lower than those of the nave. "False" façades, like that of San Michele Maggiore, resulted in designs that obviously belied the basilican section.

Even before this, it had been the custom, where the three aisles had been expressed, to raise the walls of the façade much above the actual roof of the church, perhaps with a view to make the church appear externally larger than it really was. This fraud continued to be practised in the churches of Verona, and indeed throughout all Italy, so that it finally became characteristic of Italian church architecture. On the false façade thus obtained, ornament, utterly irrelevant for the most part, was spread with a more or less lavish hand. The façade of S. Ambrogio, Milan, with its great open arches is, perhaps, the most successful one the Lombards ever erected.

Romanesque façades. Their characteristics, as a whole, may be summed up as follows: Buttresses formed as pilaster strips of slight projection, connected at the top by horizontal mouldings, or by a row of semicircular arches resting on a corbel-table projecting from the wall. Semicircular arches, resting on rudely formed capitals, also occur. Door and window openings are very characteristic. The principal, upon which the jambs were formed, was in receding planes, or rectangular recesses, known as "orders", in which were placed circular columns or shafts. The arches followed the same method, being built in concentric rings. A continuous abacus often occurs over these columns, and the profile of the jamb is carried round the semicircular portion of the arch. The characteristic rose (or wheel) window occurs over the principal doorway of the façade. Mouldings were often elaborately carved. The carving and ornaments are derived from many types of the vegetable and animal kingdom, and treated in a conventional way. Local influences were instrumental in producing different local characteristics.

In Central Italian Romanesque, beauty in detail was more sought after than completeness of style. Byzantine influence was strong, especially in Venice, Ravenna, and Pisa, the latter possessing a distinct style of its own, sometimes called Tuscan. San Miniato's, in Florence, is interesting as marking the period of transition, in the eleventh century, from the Basilican to the Romanesque type. In Northern Italian Romanesque, arcades are restricted to the tops of gables. The general character is less refined, owing to the use of stone and brick instead of marble. Details show a breaking away from Classic precedent. In sculpture, hunting and other scenes reflecting the life of the northern invaders are frequent, and in these a grotesque element is prevalent. S. Antonio's, in Piacenza, is an example.

Southern Italian Romanesque shows Byzantine and Mohammedan influence, as instanced in Monreale Cathedral, and the Martorana Church, in Palermo. The detail of these buildings is always refined and graceful, which may be due to some extent to the Greek descent of the inhabitants of this part of Italy. Southern French Romanesque is remarkable for its rich decorative façades. Buttresses are generally mere strips, of slight projection, and the façades were arranged in stories, with window lights in pairs

or groups. Imposing western entrances are characteristic of this period. The west fronts of the churches of the Charente District, in Aquitania, were elaborately treated with carved ornament representing foliage or figures of men and animals. On the ground story the capitals so treated were often continued as a rich, broad frieze. German Romanesque bears a strong resemblance to that of North Italy. In the façades the most richly ornamented parts are the doorways and capitals; there is also a wealth of circular and octagonal turrets and arcaded galleries. Examples: The church of the Apostles, at Cologne, the cathedrals of Worms, Mainz, Trier, and Spire.

GOTHIC FACADES

The first in point of dignity is undoubtedly that of Notre-Dame de Paris; in richness, those of Amiens and Reims. The façade of Amiens, of which only the three lower stories are of the thirteenth century, would doubtless have been the noblest of all Gothic façades, had it been finished according to the original design. The great French Gothic façades are often criticized on the ground that they somewhat disguise the true character of the edifice which they enclose; and it is, perhaps, true that an entirely satisfactory design for a western façade was hardly ever realized in a large Gothic church. As a rule, the façade rarely wholly expresses the form of the building which it encloses, except in buildings of a very simple character. In the façades of smaller churches where the towers are omitted, as at Nesle, Auvers, Heronville, and Champagne, the whole structural form of the building is expressed as fully as it can be. The west fronts of Senlis, Paris, Amiens, and Reims sufficiently illustrate the development and the characteristics of the French Gothic western façade.

In England, the Anglo-Norman western façade was, as a rule, both inappropriate as a termination to the building, and ill-composed as an independent architectural design. Very few early façades remain. The most important extant fronts of the thirteenth century are those of Lincoln, Salisbury, Wells, and Peterborough. The façade of Lincoln exhibits four different styles of architecture — the work of as many different periods of construction. The portals of English churches are in general insignificant and diminutive, and those of Wells are especially so. The façade of Peterborough is entirely unrelated to the building which it encloses. As a rule, the west front in England is devoid of Gothic character; but among exceptions is the western façade of Ripon cathedral. In the early pointed architecture of England, western towers, when they occur, are less imposing than those of the Gothic churches of France.

The western Gothic façades in Germany call for no extended remarks. The façade of the Lorenzkirche of Nuremberg, dating probably from the second half of the thirteenth century, exhibits a strange combination of Romanesque and Gothic features. Towards the close of the thirteenth century, in Germany, the west front began to receive more elaborate and peculiar treatment. Acute open gables over the portals, free-

standing mullions and tracery over the face of the wall above, and tall open gallery in front of the openings of the second stories of the towers, are among the new features. Entrances are often north or south, instead of being at the west end. Towers with spires were much used, open-work tracery in the spires is very characteristic. The typical examples of German Gothic are Strasburg, Freiburg, Ratisbon, Cologne, and Vienna cathedrals.

Italian Gothic façades show the influence of Roman tradition in their classic forms of construction and decoration, which was so great that the verticality which marks the Gothic architecture in the north of Europe does not pervade the Italian examples, to anything like the same extent. From the absence of vertical features and shadows in the façade, flatness is the predominating characteristic. There was a general absence of pinnacles. Stone or marble of different colours, carried in systematic band-courses or patterns throughout the design, gives a special character, as at Siena, Orvieto, Verona, etc. A large central circular window was a general feature. Windows are often semicircular-headed, and have shafts with square capitals of Corinthian type, often twisted and inlaid with mosaic known as "cosmatesque".

Spanish Gothic façades exhibit a variety of treatment; but in very few cases is the French form closely followed. The front of the early church of San Pedro of Avila is an entirely logical design of simple character. The façade of Burgos is composed in the French manner. Toledo is a mixture of Gothic and Renaissance, and the west front of Leon dates from the thirteenth century, the later work being characterized by extreme, and even wild, ornamentation. Traceried open-work spires, as in Germany, were favoured, those at Burgos being worthy of attention.

Renaissance façades agree essentially in architectural treatment, growing out of a close contact with ancient monuments, though with no strict conformity to them. Examples in Italy: S. Lorenzo and Santo Spirito, in Florence; Santa Maria della Pace, S. Andrea's, The Gesu, S. Peter's, St. John Lateran's, in Rome; S. Maria dei Miracoli, S. Zaccaria and S. Maria della Salute, in Venice; Milan cathedral; and the Certosa of Pavia. French Renaissance: St. Eustache, St. Etienne du Mont, the church of the Sorbonne, the Pantheon and the Madeleine, at Paris. German Renaissance: St. Michael's at Munich and the Frauenkirche at Dresden. Spanish Renaissance: Santo Domingo at Salamanca; the cathedrals of Granada, Valladolid, Santiago, Malaga, and Carmona. English Renaissance: St. Paul's, London.

THOMAS H. POOLE

Jacopo Facciolati

Jacopo Facciolati

Lexicographer and philologist, b. at Torreglia, near Padua, Italy, 4 Jan., 1682; d. at Padua, 26 Aug., 1769. He was educated in the seminary at Padua, and later was made professor of logic and regent of the schools in the university of that city, continuing in this position for forty-five years. In 1719 he brought out a revised edition of the "Lexicon Septem Linguarum", a Latin dictionary in seven languages, called the "Calepinus", from the name of its author, the monk Ambrogio Calepino. In this work Facciolati was assisted by his pupil, Forcellini. Their labours on the "Calepinus" convinced them of the need of a totally new Latin lexicon. Therefore, putting aside all other works, they undertook the compilation of a lexicon which should be the most comprehensive vocabulary of the Latin language that had ever been made. For forty years, under the supervision of Facciolati, Forcellini laboured, reading through the entire body of Latin literature, as well as the whole collection of Latin inscriptions, including those on coins and medals. Their great lexicon, which bore the title, "Totius Latinitatis Lexicon", was published in four volumes, at Padua in 1771, after the death of both the editors. This monumental work, on which all Latin lexicons now in use are based, gives every Latin word, with its Italian and Greek equivalents and copious citations illustrating the various meanings. Subsequent editions are the English one of Bailey in two volumes (London, 1828), and that of De Vit (Prato, 1858-87). Facciolati also published a new edition of the "Thesaurus Ciceronianus" of Nizolius. He left a number of letters, remarkable for their elegant Latinity, which were afterwards published. (See FORCELLINI.)

EDMUND BURKE

Canonical Faculties

Canonical Faculties

(Lat. *Facultates*)

In law, a faculty is the authority, privilege, or permission, to perform an act or function. In a broad sense, a faculty is a certain power, whether based on one's own right, or received as a favour from another, of validly or lawfully doing some action. In a more restricted sense, it means the conferring on a subordinate, by a superior who enjoys jurisdiction in the external forum, of certain ecclesiastical rights which are denied him by common law; to act, namely, in the external or internal forum validly

or lawfully, or at least safely. Faculties, then, will be classified, first of all, by reason of the object to which they relate, inasmuch as; —

- 1 jurisdiction is granted to absolve from sins and ecclesiastical censures, to dispense in vows, in irregularities relating to the reception of orders, in matrimonial impediments;
- 2 permission or licence is given to do something which would be otherwise forbidden, as the reading of prohibited books, saying two Masses on the same day; ordaining clerics under the prescribed age;
- 3 to avoid worry and qualms of conscience a precautionary dispensation or permission is granted to proceed in certain cases in relation to which the opinions of theologians may not appear sufficiently well founded, as for instance, a matrimonial dispensation may be conceded as a precaution, when it is not certain that an impediment exists, or permission to anticipate at 2 p. m. the recitation of the Divine Office is granted to a person who is unwilling to accept the opinion that anticipation at that hour is lawful.

Secondly, faculties, by reason of their source, are Apostolic, episcopal, or regular. Faculties are styled Apostolic or papal when they proceed from the pope directly, or through the ordinary channels of the Sacred Roman Congregations. They are episcopal, if the power or privilege conferred proceeds from a diocesan bishop, by virtue of his own power or ordinary jurisdiction, as for instance, the faculties of the diocese, to hear confessions, say Mass, preach, etc., granted to priests who labour in the diocese for the salvation of souls. Faculties are regular when they proceed from superiors of the regular clergy by reason of their ordinary jurisdiction, or by virtue of extraordinary powers or privileges conceded to them by the Holy See. Lastly, faculties are general or particular: general, when granted for indeterminate persons, though they may be limited by time; particular, when granted to designated persons or for particular cases. General faculties conceded to bishops and other ordinaries are also called indults.

The distance of dioceses from Rome, together with peculiar local conditions, render the granting of these general faculties a matter of necessity, and in 1637 certain new grants or lists of faculties were drawn up by the Sacred Congregation of the Holy Office, and since then have been communicated by the Holy See, through the Congregation of the Propagation of the Faith, to bishops, vicars and prefects Apostolic throughout the world, according to their various needs. These indults are given for a definite period, e. g. five years (*facultates quinquennales*), or for a definite number of cases, and are ordinary and extraordinary; the former being issued in forms or grants under

Roman numerals (Formula I, II, III . . . X), some of the latter under capital letters (Formula A, B, C, etc.), others under small letters (Formula a, b, c,), while others, finally, without special designation, begin: "In an audience with His Holiness". Formulæ V, VII, VIII, IX are no longer in use. It has been the practice to communicate to the United States grants I, C, D, and E. Of late, however, C, D, and E, with certain modifications, are combined in form T. Favours and privileges are granted likewise by the congregations in keeping with the Constitution "Sapienti Consilio" (1908), and are classified consequently in accordance with the Congregation from which they proceed. The authority of the Propaganda is not so ample in this matter as formerly, and this too in relation to countries still subject to it. Questions pertaining to the Pauline Privilege fall in every case under the sole competency of the Holy Office, while in matrimonial dispensations, for the portions of the Western Church under its jurisdiction, the Propaganda is obliged to confer with the Congregation of the Sacraments (Cong. of the Consistory, 7 Jan., 1909). Especially through the Sacred Pœnitentiaria does the pope communicate faculties for the internal forum to bishops and others, including certain confessors, in definite forms or leaflets (*pagellæ*).

Graces thus received from the Holy See do not restrict the prerogatives which the one favoured may already enjoy by virtue of ordinary jurisdiction or other title (*gratia non nocet gratiæ*). The purpose of the Holy See is to make a concession, not to lessen one's authority. Hence, for example, a bishop is authorized by the Council of Trent to dispense his subjects from the observance of the intervals prescribed in the reception of orders; consequently he is not obliged to observe the condition laid down in Form I, art. xxix, which forbids him to use this faculty in favour of a cleric actually outside the bishop's territory. While the recent legislation of the Church has sought to prevent conflict of authority between the various Roman Congregations, tribunals and offices, yet it will happen at times that two or more of these bodies will have jurisdiction in the same case.

A petition which has been rejected by one of the congregations may not be presented lawfully to another; a favour granted by another congregation, the previous refusal of the grant being concealed, is null and void. A petition in writing is not required for validity, but is usually exacted; the same may be said of application by telegraph or telephone. The form of the supplication is not prescribed except in so far as requisite data must be expressed. Petitions addressed to the Propaganda (the same is true of most of the congregations, at least to expedite matters), should be in Latin, Italian, or French. The Sacred Pœnitentiaria will accept communications in any modern tongue. The supplication is made out in the name of the petitioner, but the rescript is sent to the ordinary. The diocesan chancery office usually deals directly with the rector of the parties concerned.

Faculties can only be used in favour of members of the Church who are not disqualified by ecclesiastical penalties or censures. Hence in marriage cases where one of the contracting parties is a non-Catholic, the dispensation is given directly to the Catholic. Hence also in Apostolic rescripts absolution from penalties and censures, as far as necessary for the rescript, to be effective, is first given. Apostolic faculties granted to a bishop, which imply an act of jurisdiction in using them, can be communicated and applied only to the subjects of the bishop, and to such determinate persons as are capable of receiving the favour given by means of this faculty. Ordinarily faculties may be exercised in behalf of a subject, while both he and the bishop, or other person making the concession, are outside their own territory. When the use of faculties is restricted to the diocese, as in Forms I and C, it means that the subject, not the bishop, must be in the diocese when the indult is made use of in his behalf. In the United States any matrimonial dispensation may be conceded to one actually outside his own diocese, if he has not acquired at least a quasi-domicile elsewhere (Holy Office per Propaganda, 20 Dec., 1894). To dispense validly and lawfully by virtue of an indult, a just cause existing at the time of the dispensation is required. He who possesses general delegated power may apply it to himself, e. g. dispensing himself from fasting. There is an obligation, especially in dispensations, to be measured by the greater or less urgency of the case, of using faculties possessed. It might be noted that the Apostolic Delegate at Washington, in common with the bishops of the United States, has possessed the Propaganda Forms I, C, D, and E, together with some others, applicable of course throughout the United States. his Excellency, aside from territorial extension, possesses no greater powers in regard to matrimonial dispensations than these diocesan bishops.

A bishop cannot dispense without a special faculty, when two or more matrimonial impediments, diriment or otherwise, exist in the same case, or affect the same persons, though by reason of indults he can dispense separately in each of the impediments involved. This restriction, however, holds good only when the impediments in question are generically different, e. g. consanguinity and affinity, or where the power to dispense is given in different indults. The special faculty covering the cumulation of matrimonial impediments is usually granted with the renewal of faculties and is effective during the duration of the same. The form of this special faculty is not always identical, greater or more restricted powers being contained therein. Moreover, a bishop cannot employ this faculty when he is granting by virtue of an indult a retroactive dispensation to render a marriage valid (*sanatio in radice*). This question of cumulation affects dispensations only, not absolutions: a dispensation inflicts a wound on the law, not so an absolution. It is necessary for validity that the concession of a favour be made known to the one benefited; and it ought to be applied in such manner that its execution may be established. As faculties depend upon the will of the grantor, the

terms of the indult must be carefully studied, and obscure passages rightly interpreted. In this matter the general rules for the interpretation of law are to be observed with some additional ones. Hence in the use of faculties it must be noted whether power to dispense is granted for matrimonial alliances already contracted, or not yet contracted, or for both. A faculty granted for the internal forum only, particularly if jurisdictional, cannot be used in the external forum, and vice versa. Faculties are not to be extended to persons or cases not included in the same. The existing practice, especially of the Roman Curia (*stylus curiæ Romanæ*), will serve as a guide in this matter.

Faculties expire by the death of the grantor, his removal from office or loss of jurisdiction (certain distinctions, however, are to be borne in mind, as below); by the death of the privileged one; by lapse of time, when they are granted for a definite period; when they have been used for the number of cases specified in the grant; by revocation; by renunciation duly accepted; by the completion of the business for which one has received special authorization; by cessation of the formal cause on which the favour was based. Faculties granted absolutely (not revocable at will) by one possessing ordinary jurisdiction, and *gratiæ factæ* (i. e., the delegate is a *necessary* executor), do not expire at the death of the grantor; *gratiæ faciendæ* (i.e. the delegate is a voluntary executor, viz, commissioned to act, if he judge it expedient) cease at the death of the grantor, when no steps have as yet been taken leading to the concession requested (*re adhuc integrâ*); otherwise they do not cease. Faculties granted by one enjoying delegated power cease at the death of the one delegating, unless the Holy See expressly provides for their continuance, or unless the matter in question has already been begun (*re non integrâ*). The power given personally to a delegate, or subdelegate, expires at his death, which is not the case if he is chosen by reason of his dignity or office. When it is stated that faculties are "revocable at our will or judgment", they expire with the death of the grantor; when given in the name of the Holy See, a diocese, etc., they continue in force after the death of the pope, bishop, etc. Indults consequently found in the Propaganda forms or other general grants as above, since they are *gratiæ factæ*, do not become ineffective at the death of the pope: the same is true of the faculties conceded by the Sacred Pœnitentiaria, when the prefect of that tribunal loses his jurisdiction through death or other cause. Jurisdiction granted by a bishop to hear the confession of an individual ceases, *re adhuc integrâ*, when the bishop dies, is transferred, or resigns: the contrary is true, when jurisdiction is given to hear confessions in general. Notwithstanding the revocation of faculties, a case already begun may be completed; and by a general revocation of faculties special faculties do not expire. Neglect to use a favour does not destroy its force, as for example, a person dispensed from fasting or the recitation of the Holy Office does not lose the grace, if he meanwhile fast or recite the Office, even for a considerable time.

All special faculties granted habitually (*habitualiter*), by the Holy See to bishops and others enjoying ordinary jurisdiction within definite territorial limits, remain in force notwithstanding the loss of jurisdiction through death or other cause of the individual to whom they are granted (Cong. Holy Office, 24 Nov., 1897), but pass on to his successor in the same office. They are considered not personal but real favours, granted to the ordinary of the diocese or place, and by the ordinary are understood bishops, their vicars-general, vicars Apostolic, prelates or prefects Apostolic ruling over territory not subject to a bishop, vicars capitular or other legitimate administrators of vacant sees (Cong. Holy Office, 20 Feb., 1888). It is to be noted that since these indults are granted to the ordinary, under which appellation is included the vicar-general of a diocese, said vicar-general uses these faculties, grants dispensations and other graces contained therein, by virtue of authority received directly from Rome, equivalent to that extended to the bishop himself. The bishop may forbid the exercise of these powers, but notwithstanding the prohibition, the vicar-general would act validly, were he to use said faculties, provided nothing else were wanting to render his action invalid. (See JURISDICTION; DELEGATION; RESCRIPTS; EXECUTOR, APOSTOLIC; DISPENSATION.)

ANDREW B. MEEHAN.

Faculties of the Soul

Faculties of the Soul

I. MEANING

Whatever doctrine one may hold concerning the nature of the human soul and its relations to the organism, the four following points are beyond the possibility of doubt.

- 1 Consciousness is the scene of incessant change; its processes appear, now in one sequence now in another; and, normally, the duration of each is brief.
- 2 All do not present the same general features, nor affect consciousness in the same manner. They differ on account both of their characters as manifested in consciousness, and of the organ, either external or internal, on which their appearance depends. Yet the features they have in common under this twofold aspect, together with their differences, make it possible and necessary to group mental states in certain more or less comprehensive classes.

- 3 There is more in the mind than is actually manifested in consciousness; there are latent images, ideas, and feelings, which under given conditions emerge and are recognized even after a considerable interval of time. By reason of their innate or acquired aptitudes, minds differ in capacity or power. Hence, even if it were possible for two minds to experience processes perfectly similar, they would nevertheless differ greatly because one is capable of experiences impossible to the other.
- 4 Notwithstanding their variety and their intermittent character, these processes belong to one and the same conscious subject; they are all referred naturally and spontaneously to the self or me.

These facts are the psychological basis for admitting faculties (from *facere*, to do), capacities (*capax*, from *capere*, to hold), or powers (from *posse*, to be able; the Scholastics generally use the corresponding Latin term *potentiæ*).

Any attempt, however, to define with greater precision the meaning of faculties, is sure to call forth vigorous protest. In fact, few psychological questions of similar importance have been the object of so many animated discussions, and, it may be added, of so many misunderstandings. One extreme view looks upon faculties as real, though secondary agents, exercising an active influence on one another, and as being scientific explanations of psychological facts. Why does man see and reason? Because he has the faculties of vision and reasoning. The will acts, is free; there is an interaction of the intellect, the will, the senses, the feelings, etc. Sometimes, however, such expressions are used with the understanding that they are metaphors, and with the explicit or implicit warning that they must not be taken literally.

At the other extreme are found psychologists -- and they are numerous to-day -- who refuse to concede any kind of reality whatsoever to faculties. Processes alone are real; faculties are simply general terms used to label certain groups of processes. Like all abstractions they should never be looked upon as having any reality outside of the mind, which uses them as logical substitutes to facilitate the classification of mental facts.

That the faculty theory has no essential connection with Catholic dogma is sufficiently evidenced by the fact that it has found, and still finds, opponents as well as advocates among Catholic theologians and philosophers.

Judging, therefore, the question on its own merits, it may be said that the doctrine of St. Thomas avoids both extremes mentioned above, and is at least free from the absurdities with which modern psychologists so frequently charge the faculty theory. His expressions, taken apart from their context, and translated without a sufficient acquaintance with Scholastic terminology, might easily be given a wrong interpretation. For as the knowledge of the nature of the soul and its faculties, according to St. Thomas,

is partly negative, and, in its positive aspect, analogical, it is necessary to use expressions taken from things which are known more directly. But we are given some principles which must always be kept in mind; for instance, "the faculties act only by the energy of the soul"; they have no energy of their own, for "they are not the agents". Coming to more special applications, "it is not the intellect that understands, but the soul through the intellect" (Quæst. Disp., De Veritate, x, 9, ad 3). Again, the question is not asked whether the will is free, but whether man is free (Summa, I:83; I-II:13; De Veritate, xxiv; De Malo, vi). This shows that when a real distinction is admitted between the soul and its faculties, or between the faculties themselves, the meaning is not that of a distinction between substances or agents. In Scholastic terminology, distinction does not always mean separation nor even the possibility of separation. And the distinction between a substance and its qualities, attributes or modes, was called a real distinction.

If the soul can originate or experience states which, as everybody admits, may be widely different, it is because there are in the mind various modes of energy or faculties. Since minds differ not only by the actual contents of consciousness, but also, and chiefly, by the power which they have of experiencing different processes, it is clear that if this constitutes a real difference, it must itself be something real. So unavoidable is this conclusion, that some of the strongest opponents of faculties are at the same time the strongest defenders of the theory of psychical dispositions, which they postulate in order to explain the facts of memory, mental habit, and in general, the utilization, conscious or unconscious, of past experience. And yet, what is a psychical disposition but an acquired power or faculty? Stuart Mill's "background of possibilities" or Taine's "permanent possibility" are certainly less clear and more objectionable than faculties, for the faculty is not a mere possibility, but a real power of an agent, a *potentia* (*see ACTUS ET POTENTIA*).

Psychical dispositions are no more explanations of facts than are faculties, if by explanation is meant the assigning of an antecedent better known than, or known independently of, the facts to be explained. In both cases, the whole knowledge of the faculty, or the disposition, is derived from the processes themselves, for neither can fall under direct observation. The possibility of an experience or action, if known, is always known by direct inference or by analogy from past experiences or actions. Yet without being a scientific explanation, and without substituting itself for scientific explanations, the faculty, like the disposition, trace, subconscious activity, etc., is a legitimate postulate.

II. CLASSIFICATION

Plato admits three parts, forms, or powers of the soul, perhaps even three distinct souls: the intellect (*noûs*), the nobler affections (*thumós*), and the appetites or passions (*epithumetikón*).

For Aristotle, the soul is one, but endowed with five groups of faculties (*dunámeis*): the "vegetative" faculty (*threptikón*), concerned with the maintenance and development of organic life; the appetite (*oretikón*), or the tendency to any good; the faculty of sense perception (*aisthetikón*); the "locomotive" faculty (*kinetikón*), which presides over the various bodily movements; and reason (*dianoetikón*). The Scholastics generally follow Aristotle's classification. For them body and soul are united in one complete substance. The soul is the *forma substantialis*, the vital principle, the source of all activities. Hence their science of the soul deals with functions which nowadays belong to the provinces of biology and physiology. In more recent times, however, especially under the influence of Descartes, the mind has been separated, and even estranged, from the organism. Psychology deals only with the inner world, that is, the world of consciousness and its conditions. The nature of the mind and its relations to the organism are questions that belong to philosophy or metaphysics. As a consequence, also, modern psychology fails to distinguish between the spiritual faculties of the soul, i.e. those which the soul exercises itself without the intrinsic co-operation of the organism, and the faculties of the *compositum*, i.e. the soul and organism united in one complete principle of action, or of one special animated organ. This distinction was also an essential point in the Aristotelean and Scholastic psychology.

Finally, the Scholastics reduced affective life to the general faculty of appetites, whereas to-day, especially since Kant, a tripartite division is more commonly accepted, namely into cognitive, affective, and conative faculties. Some, however, still hold a bipartite division. Others, finally, reject both as unsatisfactory, and follow the order of development, or base their classification both on objective conditions and subjective characteristics. Without entering into the discussion, it may be said that, however useful and justifiable the tripartite classification may prove in psychology, the Scholastic reduction of feelings to "appetite" seems to be deeper and more philosophical. For feelings and emotions, pleasurable or painful, result from an agreement or conflict between certain experiences and the mind's tendency.

C.A. DUBRAY

Facundus of Hermiane

Facundus of Hermiane

A sixth-century Christian author, Bishop of Hermiane in Africa, about whose career very little is known. His place in history is due entirely to the spirited and protracted opposition which he offered to the condemnation (by the edict of Justinian in 543 or 544) of the "Three Chapters". At the instance of Theodore Ascidas, and with the ostensible purpose of reuniting to the Church the Acephali, a sect of Monophysites, Justinian

was induced to censure the "Three Chapters". By this act certain writings of the fifth-century Theodore of Mopsuestia, Theodoret of Cyrus, and Ibas of Edessa were condemned. Facundus was in Constantinople when this censure was pronounced, and shortly after its publication he and several other western bishops refused to subscribe to the decree, alleging that it was an attack on the Council of Chalcedon, which had accepted at least the letter of Ibas to the Persian Maris. This document was especially aimed at in the decree of the emperor. Facundus also drew up a memorial in protest, but was prevented from presenting it by the arrival of Pope Vigilius. The weak and vacillating conduct of this pontiff and his acquiescence in the condemnation of the "Three Chapters" spurred Facundus to complete this work, which he entitled "Pro Defensione Trium Capitulorum". It is not known when the work was completed nor when it was presented to the emperor, so that nothing can be said of its immediate effect on the controversy. After its publication Facundus was compelled to fly from Constantinople and find safety in concealment. Because of the attitude of Vigilius in acceding to the emperor's insistence that he subscribe to the censure of the "Three Chapters", Facundus and many African bishops cut themselves off from communion with him. This schism lasted for many years, and during that time Facundus wrote two other works at the request of his fellow-bishops, in response to reproaches of insubordination ("Liber contra Mocianum Scholasticum" and "Epistola Fidei Catholicae in defensione trium capitulorum"). The works of Facundus are in P.L., LXVII, 527-878; see Hefele, "History of the Church Councils", tr., IV, 229-286.

PATRICK J. HEALY

Faenza

Faenza

DIOCESE OF FAENZA (FAVENTINA)

Diocese in the province of Ravenna (Central Italy), suffragan of Ravenna. The earliest mention of this city is in the report of the victory of Sulla (82 B.C.) over the consul Cneius Papirius Carbo, who was compelled to flee from Italy. In A.D. 728 it was seized by the Lombard king, Liutprand, who later restored it to the exarchate. But the same king again attacked it, while the people were assembled in the church of Santa Maria Foris Portam for the services of Holy Saturday; the bishop himself was among the slain. With the exarchate Faenza passed under the authority of the Holy See. About 1000 it was made a commune and from 1100 was governed by the counts of Modigliana. During the struggle of Frederick II against the popes, the city belonged to the Guelph league; in 1241 the emperor took possession of it after a siege of eight months. During the thirteenth century different families, the Accarisi, the Manfredi, the Lambertazzi,

the Nordigli, and others, disputed the possession of Faenza. From 1294 it was governed by the Manfredi. Several times the Avignon popes had to summon these lords to render service as vassals, as in 1328 through Cardinal Bertrando Poggetto and in 1356 through Cardinal gil d'Albornoz. In 1378 the city was destroyed by the famous English *condottiere*, Sir John Hawkwood. In 1501 Caesar Borgia put to death the Manfredi brothers, Astorgio and Giovanni Evangelista. On the death of Caesar Borgia, Francesco Manfredi, a brother of Astorgio and Evangelista, attempted to return to Faenza, but was compelled to flee by the Venetians. In 1509 Julius II brought the city under the direct rule of the Holy See. During the thirteenth and fourteenth centuries Faenza was renowned for its pottery (whence the French *faïence*). The celebrated physicist, Torricelli, was a native of Faenza. Domitia Lucilla, a martyr, the widow of Antoninus Pius, is also said to have been born there. The first historically certain bishop is Constantius, present at a council in Rome (313), at which St. Savinus was referred to as his predecessor. Another Constantius was a contemporary of St. Ambrose. Also noteworthy are: Giovanni II, who died in 1190, as a crusader before Acre; the two distinguished theologians, Giovanni del Terma (1455), a Servite, and Pietro Andrea Gambario (1528); Ridolfo Pio of the princes of Carpi (1528), a profound student of Cicero and of Plato's philosophy. A large part of the cathedral was built by Giuliano da Maiano between 1474 and 1486; Bramante also worked there. The body of St. Peter Damian is buried in the cathedral. Faenza has (1908) 114 parishes, 347 secular and 13 regular priests, 103,962 inhabitants, 2 male and 6 female educational institutions, 6 religious houses of men and 7 of women, and a weekly Catholic paper.

U. BENIGNI

Prospero Fagnani

Prospero Fagnani

Canonist, b. in Italy, place and date of birth uncertain; d. in 1678. Some writers place his birth in 1598, others in 1587 or in 1588. It is certain that he studied at Perugia. At the age of twenty he was a doctor of civil and canon law; at twenty-two, secretary of the Congregation of the Council. He held this office for fifteen years. He fulfilled the same functions in several other Roman Congregations. It is not certain that he ever lectured on canon law at the Roman University (Sapienza). He became blind at the age of forty-four. This affliction did not prevent him from devoting himself to canonical studies and from writing a commentary of the Decretals of Gregory IX, which gained for him the title of "Doctor Caecus Oculatissimus", i.e. the blind yet most far-sighted doctor. This commentary includes interpretations of the texts of the most difficult of the Decretals of Gregory IX. It is distinguished by the clearness with which

the most complex and disputed questions of canon law are explained. The work is also of great value for the purpose of ascertaining the practice of the Roman Congregations, especially that of the Congregation of the Council, of which the author quotes numerous decisions. Bededict XIV gave this work the highest praise, and its authority is still continually appealed to in the Roman Congregations. It is divided, like the Decretals of Gregory IX, into five books. The first edition was published at Rome, in 1661, under the title of "Jus canonicum seu commentaria absolutissima in quinque libros Decretalium". It has been reprinted several times. Fagnani is reproached with excessive rigour in his commentary on the chapter of the Decretals "Ne innitaris" (Book I, De constitutionibus), in which he combats the doctrine of probabilism. St. Alphonsus calls him "magnus rigoristarum princeps", the great prince of the rigorists (Homo apostolicus, Tract. I, no. 63; Theologia Moralis, IV, no. 669).

A. VAN HOVE

Giulio Carlo De' Toschi Di

Giulio Carlo de' Toschi di Fagnano

Mathematician, born at Sinigaglia, Italy, 26 September, 1682; died there 18 May, 1766. He made his higher studies at the Collegio Clementino in Rome and there won great distinction, exception in the one subject which has made him famous; in fact his aversion to mathematics was extreme, and it was only after his college course that he took up the study of this branch, but then he did so with such earnestness and ability that, without the help of any teacher, he mastered it from its foundations. Most of his important researches were published in the current numbers of the "Giornale de' Letterati d'Italia". He is best known on account of his investigations on the length and division of arcs of certain curves, especially the lemniscate; this seems also to have been in his own estimation his most important work, since he had the figure of the lemniscate with the inscription: "Multifariam divisa atque dimensa Deo veritatis gloria", engraved on the title-page of his "Produzioni Matematiche", which he published in two volumes (Pesaro, 1750), and dedicated to Benedict XIV. The same figure and words "Deo veritatis gloria" also appear on his tomb, a testimony to the earnest devotion to science and the deeply practical piety which characterized his entire life; his attachment to the sovereign pontiff was warm and sincere, and of his twelve children one became archdeacon of the cathedral of Sinigaglia and another a Benedictine nun. As a writer he is praised by his contemporaries for his great mildness in controversy, as well as for his clearness and accuracy of thought and diction.

EDWARD C. PHILLIPS

Etienne-Michel Faillon

Etienne-Michel Faillon

Historian, born at Tarascon, France, 3 January, 1800; died at Paris, 25 October, 1870. He studied at Avignon and Aix (Provence), joined the Sulpicians (1821), and was ordained priest in 1824. While director of "La Solitude", he wrote several ascetic and biographical works and collected materials for future publications. In 1848, during an official visitation in Montreal, he conceived the plan of his "Histoire de la Colonie française au Canada". Of the twelve intended volumes of this work, destined to embrace the entire French domination (1534-1759), only three were published, the narrative closing with the year 1675. Two subsequent voyages to Canada enabled him to write several important biographies, those of Sister Marguerite Bourgeoys, of Jeanne Mance (with the history of the Hôtel-Dieu, Villemarie), of Mother d'Youville, and of Jeanne Le Ber. His chief works relating to Old France are his life of Monsieur Olier and "Monuments inédits sur l'apostolat de Sainte Marie-Madeleine en Provence". He has been repeatedly criticized for his partiality towards his society and towards Montreal. Most historians censure his appreciation of Bishop Laval and of the Jesuits. On the other hand, he is credited for giving prominence to persons and events of Villemarie, less elaborately treated by the Jesuit "Relations" and later histories.

LIONEL LINDSAY

Faith

Faith

I. THE MEANING OF THE WORD

(*Pistis*, fides). In the Old Testament, the Hebrew word means essentially *steadfastness*, cf. Exod., xvii, 12, where it is used to describe the strengthening of Moses' hands; hence it comes to mean *faithfulness*, whether of God towards man (Deut., xxxii, 4) or of man towards God (Ps. cxviii, 30). As signifying man's attitude towards God it means trustfulness or *fiducia*. It would, however, be illogical to conclude that the word cannot, and does not, mean *belief* or *faith* in the Old Testament for it is clear that we cannot put trust in a person's promises without previously assenting to or believing in that person's claim to such confidence. Hence even if it could be proved that the Hebrew word does not in itself contain the notion of belief, it must necessarily presuppose it. But that the word does itself contain the notion of belief is clear from the use of the radical, which in the causative conjugation, or *Hiph'il*, means "to believe", e.g. Gen.,

xv, 6, and Deut., i, 32, in which latter passage the two meanings -- viz. of believing and of trusting -- are combined. That the noun itself often means *faith* or *belief*, is clear from Hab., ii, 4, where the context demands it. The witness of the Septuagint is decisive; they render the verb by *pisteuo*, and the noun by *pistis*; and here again the two factors, faith and trust, are connoted by the same term. But that even in classical Greek *pisteuo* was used to signify *believe*, is clear from Euripides (Helene, 710), *logois d'emoisi pisteuson tade*, and that *pistis* could mean "belief" is shown by the same dramatist's *theon d'ouketi pistis arage* (Medea, 414; cf. Hipp., 1007). In the New Testament the meanings "to believe" and "belief", for *pisteon* and *pistis*, come to the fore; in Christ's speech, *pistis* frequently means "trust", but also "belief" (cf. Matt., viii, 10). In Acts it is used objectively of the tenets of the Christians, but is often to be rendered "belief" (cf. xvii, 31; xx, 21; xxvi, 8). In Romans, xiv, 23, it has the meaning of "conscience" -- "all that is not of faith is sin" -- but the Apostle repeatedly uses it in the sense of "belief" (cf. Rom., iv, and Gal., iii). How necessary it is to point this out will be evident to all who are familiar with modern theological literature; thus, when a writer in the "Hibbert Journal", Oct., 1907, says, "From one end of the Scripture to the other, faith is trust and only trust", it is hard to see how he would explain 1 Cor. xiii, 13, and Heb., xi, 1. The truth is that many theological writers of the present day are given to very loose thinking, and in nothing is this so evident as in their treatment of faith. In the article just referred to we read: "Trust in God is faith, faith is belief, belief may mean creed, but creed is not equivalent to trust in God." A similar vagueness was especially noticeable in the "Do we believe?" controversy- one correspondent says- "We unbelievers, if we have lost faith, cling more closely to hope and -- the greatest of these -- charity" ("Do we believe?", p. 180, ed. W. L. Courtney, 1905). Non-Catholic writers have repudiated all idea of faith as an intellectual assent, and consequently they fail to realize that faith must necessarily result in a body of dogmatic beliefs. "How and by what influence", asks Harnack, "was the living faith transformed into the creed to be believed, the surrender to Christ into a philosophical Christology?" (quoted in Hibbert Journal, loc. cit.).

II. FAITH MAY BE CONSIDERED BOTH OBJECTIVELY AND SUBJECTIVELY

Objectively, it stands for the sum of truths revealed by God in Scripture and tradition and which the Church (see FAITH, RULE OF) presents to us in a brief form in her creeds, subjectively, *faith* stands for the habit or virtue by which we assent to those truths. It is with this subjective aspect of faith that we are here primarily concerned. Before we proceed to analyze the term faith, certain preliminary notions must be made clear.

(a) The twofold order of knowledge. -- "The Catholic Church", says the Vatican Council, III, iv, "has always held that there is a twofold order of knowledge, and that these two orders are distinguished from one another not only in their principle but in their object; in one we know by natural reason, in the other by Divine faith; the object of the one is truth attainable by natural reason, the object of the other is mysteries hidden in God, but which we have to believe and which can only be known to us by Divine revelation."

(b) Now intellectual knowledge may be defined in a general way as the union between the intellect and an intelligible object. But a truth is intelligible to us only in so far as it is evident to us, and evidence is of different kinds; hence, according to the varying character of the evidence, we shall have varying kinds of knowledge. Thus a truth may be self-evident -- e.g. the whole is greater than its part -- in which case we are said to have intuitive knowledge of it; or the truth may not be self-evident, but deducible from premises in which it is contained -- such knowledge is termed reasoned knowledge; or again a truth may be neither self-evident nor deducible from premises in which it is contained, yet the intellect may be obliged to assent to it because It would else have to reject some other universally accepted truth; lastly, the intellect may be induced to assent to a truth for none of the foregoing reasons, but solely because, though not evident in itself, this truth rests on grave authority -- for example, we accept the statement that the sun is 90,000,000 miles distant from the earth because competent, veracious authorities vouch for the fact. This last kind of knowledge is termed faith, and is clearly necessary in daily life. If the authority upon which we base our assent is human and therefore fallible, we have human and fallible faith; if the authority is Divine, we have Divine and infallible faith. If to this be added the medium by which the Divine authority for certain statements is put before us, viz. the Catholic Church, we have Divine-Catholic Faith (see FAITH, RULE OF).

(c) Again, evidence, whatever its source, may be of various degrees and so cause greater or less firmness of adhesion on the part of the mind which assents to a truth. Thus arguments or authorities for and against a truth may be either wanting or evenly balanced, in this case the intellect does not give in its adherence to the truth, but remains in a state of doubt or absolute suspension of judgment; or the arguments on one side may predominate; though not to the exclusion of those on the other side; in this case we have not complete adhesion of the intellect to the truth in question but only opinion. Lastly, the arguments or authorities brought forward may be so convincing that the mind gives its unqualified assent to the statement proposed and has no fear whatever lest it should not be true; this state of mind is termed certitude, and is the perfection of knowledge. Divine faith, then, is that form of knowledge which is derived from Di-

vine authority, and which consequently begets absolute certitude in the mind of the recipient

(d) That such Divine faith is necessary, follows from the fact of Divine revelation. For revelation means that the Supreme Truth has spoken to man and revealed to him truths which are not in themselves evident to the human mind. We must, then, either reject revelation altogether, or accept it by faith; that is, we must submit our intellect to truths which we cannot understand, but which come to us on Divine authority.

(e) We shall arrive at a better understanding of the habit or virtue of faith if we have previously analysed an act of faith; and this analysis will be facilitated by examining an act of ocular vision and an act of reasoned knowledge. In ocular vision we distinguish three things: the eye, or visual faculty the coloured object, and the light which serves as the medium between the eye and the object. It is usual to term colour the formal object (*objectum formale quod*) of vision, since it is that which precisely and alone makes a thing the object of vision, the individual object seen may be termed the material object, e.g. this apple, that man, etc. Similarly, the light which serves as the medium between the eye and the object is termed the formal reason (*objectum formale quo*) of our actual vision. In the same way, when we analyze an act of intellectual assent to any given truth, we must distinguish the intellectual faculty which elicits the act the intelligible object towards which the intellect is directed, and the evidence whether intrinsic to that object or extrinsic to it, which moves us to assent to it. None of these factors can be omitted, each cooperates in bringing about the act, whether of ocular vision or of intellectual assent.

(f) Hence, for an act of faith we shall need a faculty capable of eliciting the act, an object commensurate with that faculty, and evidence -- not intrinsic but extrinsic to that object -- which shall serve as the link between faculty and object. We will commence our analysis with the object:-

III. ANALYSIS OF THE OBJECT OR TERM IN AN ACT OF DIVINE FAITH

(a) For a truth to be the object of an act of Divine faith, it must be itself Divine, and this not merely as coming from God, but as being itself concerned with God. Just as in ocular vision the formal object must necessarily be something coloured, so in Divine faith the formal object must be something Divine -- in theological language, the *objectum formale quod* of Divine faith is the First Truth in Being, *Prima Veritas in essendo* -- we could not make an act of Divine faith in the existence of India.

(b) Again, the evidence upon which we assent to this Divine truth must also be itself Divine, and there must be as close a relation between that truth and the evidence upon which it comes to us as there is between the coloured object and the light; the former is a necessary condition for the exercise of our visual faculty, the latter is the

cause of our actual vision. But no one but God can reveal God; in other words, God is His own evidence. Hence, just as the formal object of Divine faith is the First Truth Itself, so the evidence of that First Truth is the First Truth declaring Itself. To use scholastic language once more, the *objectum formale quod*, or the motive, or the evidence, of Divine faith is the *Prima Veritas in dicendo*.

(c) There is a controversy whether the same truth can be an object both of faith and of knowledge. In other words, can we believe a thing both because we are told it on good authority and because we ourselves perceive it to be true? St. Thomas, Scotus, and others hold that once a thing is seen to be true, the adhesion of the mind is in no wise strengthened by the authority of one who states that it is so, but the majority of theologians maintain, with De Lugo, that there may be a knowledge which does not entirely satisfy the mind, and that authority may then find a place, to complete its satisfaction. -- We may note here the absurd expression *Credo quia impossibile*, which has provoked many sneers. It is not an axiom of the Scholastics, as was stated in the "Revue de Metaphysique et de Morale" (March, 1896, p. 169), and as was suggested more than once in the "Do we believe?" correspondence. The expression is due to Tertullian, whose exact words are: "Natus est Dei Filius; non pudet, quia pudendum est: et mortuus est Dei Filius; prorsus credibile est, quia ineptum est; et sepultus, resurrexit; certum est, quia impossibile" (De Carne Christi, cap. v). This treatise dates from Tertullian's Montanist days, when he was carried away by his love of paradox. At the same time it is clear that the writer only aims at bringing out the wisdom of God manifested in the humiliation of the Cross; he is perhaps paraphrasing St. Paul's words in 1 Cor., i, 25.

(d) Let us now take some concrete act of faith, e.g. "I believe in the Most Holy Trinity." This mystery is the material or individual object upon which we are now exercising our faith, the formal object is its character as being a Divine truth, and this truth is clearly inevident as far as we are concerned; it in no way appeals to our intellect, on the contrary it rather repels it. And yet we assent to it by faith, consequently upon evidence which is extrinsic and not intrinsic to the truth we are accepting. But there can be no evidence commensurate with such a mystery save the Divine testimony itself, and this constitutes the motive for our assent to the mystery, and is, in scholastic language, the *objectum formale quo* of our assent. If then, we are asked why we believe with Divine faith any Divine truth, the only adequate answer must be because God has revealed it.

(e) We may point out in this connexion the falsity of the prevalent notion that faith is blind. "We believe", says the Vatican Council (III, iii), "that revelation is true, not indeed because the intrinsic truth of the mysteries is clearly seen by the natural light of reason, but because of the authority of God Who reveals them, for He can

neither deceive nor be deceived." Thus, to return to the act of faith which we make in the Holy Trinity, we may formulate it in syllogistic fashion thus: Whatever God reveals is true but God has revealed the mystery of the Holy Trinity therefore this mystery is true. The major premise is indubitable and intrinsically evident to reason; the minor premise is also true because it is declared to us by the infallible Church (cf. FAITH, RULE OF), and also because, as the Vatican Council says, "in addition to the internal assistance of His Holy Spirit, it has pleased God to give us certain external proofs of His revelation, viz. certain Divine facts, especially miracles and prophecies, for since these latter clearly manifest God's omnipotence and infinite knowledge, they afford most certain proofs of His revelation and are suited to the capacity of all." Hence St. Thomas says: "A man would not believe unless he saw the things he had to believe, either by the evidence of miracles or of something similar" (II-II:1:4, ad 1). The saint is here speaking of the motives of credibility.

IV. MOTIVES OF CREDIBILITY

(a) When we say that a certain statement is incredible we often mean merely that it is extraordinary, but it should be borne in mind that this is a misuse of language, for the credibility or incredibility of a statement has nothing to do with its intrinsic probability or improbability; it depends solely upon the credentials of the authority who makes the statement. Thus the credibility of the statement that a secret alliance has been entered into between England and America depends solely upon the authoritative position and the veracity of our informant. If he be a clerk in a government office it is possible that he may have picked up some genuine information, but if our informant be the Prime Minister of England, his statement has the highest degree of credibility because his credentials are of the highest. When we speak of the motives of credibility of revealed truth we mean the evidence that the things asserted are revealed truths. In other words, the credibility of the statements made is correlative with and proportionate to the credentials of the authority who makes them. Now the credentials of God are indubitable, for the very idea of God involves that of omniscience and of the Supreme Truth. Hence, what God says is supremely credible, though not necessarily supremely intelligible for us. Here, however, the real question is not as to the credentials of God or the credibility of what He says, but as to the credibility of the statement that God has spoken. In other words who or what is the authority for this statement, and what credentials does this authority show? What are the motives of credibility of the statement that God has revealed this or that?

(b) These motives of credibility may be briefly stated as follows: in the Old Testament considered not as an inspired book, but merely as a book having historical value, we find detailed the marvellous dealings of God with a particular nation to whom He repeatedly reveals Himself; we read of miracles wrought in their favour and as proofs

of the truth of the revelation He makes; we find the most sublime teaching and the repeated announcement of God's desire to save the world from sin and its consequences. And more than all we find throughout the pages of this book a series of hints, now obscure, now clear, of some wondrous person who is to come as the world's saviour; we find it asserted at one time that he is man, at others that he is God Himself. When we turn to the New Testament we find that it records the birth, life, and death of One Who, while clearly man, also claimed to be God, and Who proved the truth of His claim by His whole life, miracles, teachings, and death, and finally by His triumphant resurrection. We find, moreover, that He founded a Church which should, so He said, continue to the end of time, which should serve as the repository of His teaching, and should be the means of applying to all men the fruits of the redemption He had wrought. When we come to the subsequent history of this Church we find it speedily spreading everywhere, and this in spite of its humble origin, its unworldly teaching, and the cruel persecution which it meets at the hands of the rulers of this world. And as the centuries pass we find this Church battling against heresies schisms, and the sins of her own people--nay, of her own rulers -- and yet continuing ever the same, promulgating ever the same doctrine, and putting before men the same mysteries of the life, death and resurrection of the world's Saviour, Who had, so she taught, gone before to prepare a home for those who while on earth should have believed in Him and fought the good fight. But if the history of the Church since New-Testament times thus wonderfully confirms the New Testament itself, and if the New Testament so marvellously completes the Old Testament, these books must really contain what they claim to contain, viz. Divine revelation. And more than all, that Person Whose life and death were so minutely foretold in the Old Testament, and Whose story, as told in the New Testament, so perfectly corresponds with its prophetic delineation in the Old Testament, must be what He claimed to be, viz. the Son of God. His work, therefore, must be Divine. The Church which He founded must also be Divine and the repository and guardian of His teaching. Indeed, we can truly say that for every truth of Christianity which we believe Christ Himself is our testimony, and we believe in Him because the Divinity He claimed rests upon the concurrent testimony of His miracles, His prophecies His personal character, the nature of His doctrine, the marvellous propagation of His teaching in spite of its running counter to flesh and blood, the united testimony of thousands of martyrs, the stories of countless saints who for His sake have led heroic lives, the history of the Church herself since the Crucifixion, and, perhaps more remarkable than any, the history of the papacy from St. Peter to Pius X.

(c) These testimonies are unanimous; they all point in one direction, they are of every age, they are clear and simple, and are within the grasp of the humblest intelligence. And, as the Vatican Council has said, "the Church herself, is, by her marvellous

propagation, her wondrous sanctity, her inexhaustible fruitfulness in good works, her Catholic unity, and her enduring stability, a great and perpetual motive of credibility and an irrefragable witness to her Divine commission" (Const. *Dei Filius*) . "The Apostles", says St. Augustine, "saw the Head and believed in the Body; we see the Body let us believe in the Head" [Sermo ccxliii, 8 (al. cxliii), de temp., P.L., V 1143]. Every believer will echo the words of Richard of St. Victor, "Lord, if we are in error, by Thine own self we have been deceived- for these things have been confirmed by such signs and wonders in our midst as could only have been done by Thee!" (de Trinitate, 1, cap. ii).

(d) But much misunderstanding exists regarding the meaning and office of the motives of credibility. In the first place, they afford us definite and certain knowledge of Divine revelation; but this knowledge precedes faith; it is not the final motive for our assent to the truths of faith- as St. Thomas says, "Faith has the character of a virtue, not because of the things it believes, for faith is of things that appear not, but because it adheres to the testimony of one in whom truth is infallibly found" (De Veritate, xiv, 8); this knowledge of revealed truth which precedes faith can only beget human faith it is not even the cause of Divine faith (cf. Suarez, de Fide disp. iii, 12), but is rather to be considered a remote disposition to it. We must insist upon this because in the minds of many faith is regarded as a more or less necessary consequence of a careful study of the motives of credibility, a view which the Vatican Council condemns expressly: "If anyone says that the assent of Christian faith is not free, but that it necessarily follows from the arguments which human reason can furnish in its favour; or if anyone says that God's grace is only necessary for that living faith which worketh through charity, let him be anathema" (Sess. IV). Nor can the motives of credibility make the mysteries of faith clear in themselves, for, as St. Thomas says, "the arguments which induce us to believe, e.g. miracles, do not prove the faith itself, but only the truthfulness of him who declares it to us, and consequently they do not beget knowledge of faith's mysteries, but only faith" (in Sent., III, xxiv, Q. i, art. 2, sol. 2, ad 4). On the other hand, we must not minimize the real probative force of the motives of credibility within their true sphere- "Reason declares that from the very outset the Gospel teaching was rendered conspicuous by signs and wonders which gave, as it were, definite proof of a definite truth" (Leo XIII, *Aeterni Patris*).

(e) The Church has twice condemned the view that faith ultimately rests on an accumulation of probabilities. Thus the proposition, "The assent of supernatural faith . . . is consistent with merely probable knowledge of revelation" was condemned by Innocent XI in 1679 (cf. Denzinger, *Enchiridion*, 10th ed., no. 1171); and the *Syllabus Lamentabili sane* (July, 1907) condemns the proposition (XXV) that "the assent of faith rests ultimately on an accumulation of probabilities." But since the great name

of Newman has been dragged into the controversy regarding this last proposition, we may point out that, in the *Grammar of Assent* (chap. x, sect. 2), Newman refers solely to the proof of faith afforded by the motives of credibility, and he rightly concludes that, since these are not demonstrative, this line of proof may be termed "an accumulation of probabilities". But it would be absurd to say that Newman therefore based the final assent of faith on this accumulation- as a matter of fact he is not here making an analysis of an act of faith, but only of the grounds for faith; the question of authority does not come into his argument (cf. McNabb, *Oxford Conferences on Faith*, pp. 121-122).

V. ANALYSIS OF THE ACT OF FAITH FROM THE SUBJECTIVE STANDPOINT

(a) The light of faith. -- An angel understands truths which are beyond man's comprehension; if then a man were called upon to assent to a truth beyond the ken of the human intellect, but within the grasp of the angelic intellect, he would require for the time being something more than his natural light of reason, he would require what we may call "the angelic light". If, now, the same man were called upon to assent to a truth beyond the grasp of both men and angels, he would clearly need a still higher light, and this light we term "the light of faith" -- a light, because it enables him to assent to those supernatural truths, and the light of faith because it does not so illumine those truths as to make them no longer obscure, for faith must ever be "the substance of things to be hoped for, the evidence of things that appear not" (Heb., xi, 1). Hence St. Thomas (*De Veritate*, xiv, 9, ad 2) says: "Although the Divinely infused light of faith is more powerful than the natural light of reason, nevertheless in our present state we only imperfectly participate in it; and hence it comes to pass that it does not beget in us real vision of those things which it is meant to teach us; such vision belongs to our eternal home, where we shall perfectly participate in that light, where, in fine, in God's light we shall see light" (Ps. xxxv, 10)."

(b) The necessity of such light is evident from what has been said, for faith is essentially an act of assent, and just as assent to a series of deductive or inductive reasonings, or to intuition of first principles, would be impossible without the light of reason, so, too assent to a supernatural truth would be inconceivable without a supernatural strengthening of the natural light "Quid est enim fides nisi credere quod non vides?" (i.e. what is faith but belief in that which thou seest not?) asks St. Augustine; but he also says: "Faith has its eyes by which it in some sort sees that to be true which it does not yet see- and by which, too, it most surely sees that it does not see what it believes" [Ep. ad Consent., ep. cxx 8 (al. ccxxii), P.L., II, 456].

(c) Again, it is evident that this "light of faith" is a supernatural gift and is not the necessary outcome of assent to the motives of credibility. No amount of study will win

it, no intellectual conviction as to the credibility of revealed religion nor even of the claims of the Church to be our infallible guide in matters of faith, will produce this light in a man's mind. It is the free gift of God. Hence the Vatican Council (III, iii;) teaches that "faith is a supernatural virtue by which we with the inspiration and assistance of God's grace, believe those things to be true which He has revealed". The same decree goes on to say that "although the assent of faith is in no sense blind, yet no one can assent to the Gospel teaching in the way necessary for salvation without the illumination of the Holy Spirit, Who bestows on all a sweetness in believing and consenting to the truth". Thus, neither as regards the truth believed nor as regards the motives for believing, nor as regards the subjective principle by which we believe -- viz. the infused light -- can faith be considered blind.

(d) The place of the will in an act of faith. -- So far we have seen that faith is an act of the intellect assenting to a truth which is beyond its grasp, e.g. the mystery of the Holy Trinity. But to many it will seem almost as futile to ask the intellect to assent to a proposition which is not intrinsically evident as it would be to ask the eye to see a sound. It is clear, however, that the intellect can be moved by the will either to study or not to study a certain truth, though if the truth be a self-evident one -- e.g., that the whole is greater than its part -- the will cannot affect the intellect's adhesion to it, it can, however, move it to think of something else, and thus distract it from the contemplation of that particular truth. If, now, the will moves the intellect to consider some debatable point-e.g. the Copernican and Ptolemaic theories of the relationship between the sun and the earth -- it is clear that the intellect can only assent to one of these views in proportion as it is convinced that the particular view is true. But neither view has, as far as we can know, more than probable truth, hence of itself the intellect can only give in its partial adherence to one of these views, it must always be precluded from absolute assent by the possibility that the other view may be right. The fact that men hold much more tenaciously to one of these than the arguments warrant can only be due to some extrinsic consideration, e.g. that it is absurd not to hold what the vast majority of men hold. And here it should be noted that, as St. Thomas says repeatedly, the intellect only assents to a statement for one of two reasons: either because that statement is immediately or mediately evident in itself -- e.g. a first principle or a conclusion from premises -- or because the will moves it to do so. Extrinsic evidence of course comes into play when intrinsic evidence is wanting, but though it would be absurd, without weighty evidence in its support, to assent to a truth which we do not grasp, yet no amount of such evidence can make us assent, it could only show that the statement in question was credible, our ultimate actual assent could only be due to the intrinsic evidence which the statement itself offered, or, failing that, due to the will. Hence it is that St. Thomas repeatedly defines the act of faith as the assent of the intellect

determined by the will (De Veritate, xiv, 1; II-II, Q. ii, a. 1, ad 3; 2, c.; *ibid.*, iv, 1, c., and ad 2). The reason, then, why men cling to certain beliefs more tenaciously than the arguments in their favour would warrant, is to be sought in the will rather than in the intellect. Authorities are to be found on both sides, the intrinsic evidence is not convincing, but something is to be gained by assenting to one view rather than the other, and this appeals to the will, which therefore determines the intellect to assent to the view which promises the most. Similarly, in Divine faith the credentials of the authority which tells us that God has made certain revelations are strong, but they are always extrinsic to the proposition, "God has revealed this or that", and consequently they cannot compel our assent; they merely show us that this statement is credible. When, then, we ask whether we are to give in our free assent to any particular statement or not, we feel that in the first place we cannot do so unless there be strong extrinsic evidence in its favour, for to believe a thing merely because we wished to do so would be absurd. Secondly, the proposition itself does not compel our assent, since it is not intrinsically evident, but there remains the fact that only on condition of our assent to it shall we have what the human soul naturally yearns for, viz., the possession of God, Who is, as both reason and authority declare, our ultimate end; "He that believeth and is baptized, shall be saved", and "Without faith it is impossible to please God." St. Thomas expresses this by saying: "The disposition of a believer is that of one who accepts another's word for some statement, because it seems fitting or useful to do so. In the same way we believe Divine revelation because the reward of eternal life is promised us for so doing. It is the will which is moved by the prospect of this reward to assent to what is said, even though the intellect is not moved by something which it understands. Hence St. Augustine says (Tract. xxvi in Joannem, 2): *Cetera potest homo nolens, credere non nisi volens*' [i.e. other things a man can do against his will but to believe he must will]" (De Ver., xiv, 1).

(e) But just as the intellect needed a new and special light in order to assent to the supernatural truths of faith, so also the will needs a special grace from God in order that it may tend to that supernatural good which is eternal life. The light of faith, then, illumines the understanding, though the truth still remains obscure, since it is beyond the intellect's grasp; but supernatural grace moves the will, which, having now a supernatural good put before it, moves the intellect to assent to what it does not understand. Hence it is that faith is described as "bringing into captivity every understanding unto the obedience of Christ" (II Cor., x, 5).

VI. DEFINITION OF FAITH

The foregoing analyses will enable us to define an act of Divine supernatural faith as "the act of the intellect assenting to a Divine truth owing to the movement of the will, which is itself moved by the grace of God" (St. Thomas, II-II, Q. iv, a. 2). And just

as the light of faith is a gift supernaturally bestowed upon the understanding, so also this Divine grace moving the will is, as its name implies, an equally supernatural and an absolutely gratuitous gift. Neither gift is due to previous study neither of them can be acquired by human efforts, but "Ask and ye shall receive."

From all that has been said two most important corollaries follow:

- That temptations against faith are natural and inevitable and are in no sense contrary to faith, "since", says St. Thomas, "the assent of the intellect in faith is due to the will, and since the object to which the intellect thus assents is not its own proper object -- for that is actual vision of an intelligible object -- it follows that the intellect's attitude towards that object is not one of tranquillity, on the contrary it thinks and inquires about those things it believes, all the while that it assents to them unhesitatingly; for as far as it itself is concerned the intellect is not satisfied" (De Ver., xiv, 1).
- (b) It also follows from the above that an act of supernatural faith is meritorious, since it proceeds from the will moved by Divine grace or charity, and thus has all the essential constituents of a meritorious act (cf. II-II, Q. ii, a. 9). This enables us to understand St. James's words when he says, "The devils also believe and tremble" (ii, 19). "It is not willingly that they assent", says St. Thomas, "but they are compelled thereto by the evidence of those signs which prove that what believers assent to is true, though even those proofs do not make the truths of faith so evident as to afford what is termed vision of them" (De Ver., xiv 9, ad 4); nor is their faith Divine, but merely philosophical and natural. Some may fancy the foregoing analyses superfluous, and may think that they savour too much of Scholasticism. But if anyone will be at the pains to compare the teaching of the Fathers, of the Scholastics, and of the divines of the Anglican Church in the seventeenth and eighteenth centuries, with that of the non-Catholic theologians of to-day, he will find that the Scholastics merely put into shape what the Fathers taught, and that the great English divines owe their solidity and genuine worth to their vast patristic knowledge and their strictly logical training.

Let anyone who doubts this statement compare Bishop Butler's *Analogy of Religion*, chaps. v, vi, with the paper on "Faith" contributed to *Lux Mundi*. The writer of this latter paper tells us that "faith is an elemental energy of the soul", "a tentative probation", that "its primary note will be trust", and finally that "in response to the demand for definition, it can only reiterate: "Faith is faith. Believing is just believing"". Nowhere is there any analysis of terms, nowhere any distinction between the relative parts played by the intellect and the will; and we feel that those who read the paper must have risen

from its perusal with the feeling that they had been wandering through -- we use the writer's own expression -- "a juggling maze of words."

VII. THE: HABIT OF FAITH AND THE LIFE OF FAITH

(a) We have defined the act of faith as the assent of the intellect to a truth which is beyond its comprehension, but which it accepts under the influence of the will moved by grace and from the analysis we are now in a position to define the virtue of faith as a supernatural habit by which we firmly believe those things to be true which God has revealed. Now every virtue is the perfection of some faculty, but faith results from the combined action of two faculties, viz., the intellect which elicits the act, and the will which moves the intellect to do so; consequently, the perfection of faith will depend upon the perfection with which each of these faculties performs its allotted task; the intellect must assent unhesitatingly, the will must promptly and readily move it to do so.

(b) The unhesitating assent of the intellect cannot be due to intellectual conviction of the reasonableness of faith, whether we regard the grounds on which it rests or the actual truths we believe, for "faith is the evidence of things that appear not"; it must, then, be referred to the fact that these truths come to us on Divine infallible testimony. And though faith is so essentially of "the unseen" it may be that the peculiar function of the light of faith, which we have seen to be so necessary, is in some sort to afford us, not indeed vision, but an instinctive appreciation of the truths which are declared to be revealed. St. Thomas seems to hint at this when he says: "As by other virtuous habits a man sees what accords with those habits, so by the habit of faith a man's mind is inclined to assent to those things which belong to the true faith and not to other things" (II-II:4:4, ad 3). In every act of faith this unhesitating assent of the intellect is due to the motion of the will as its efficient cause, and the same must be said of the theological virtue of faith when we consider it as a habit or as a moral virtue, for, as St. Thomas insists (I-II, Q. lvi.), there is no virtue, properly so called, in the intellect except in so far as it is subject to the will. Thus the habitual promptitude of the will in moving the intellect to assent to the truths of faith is not only the efficient cause of the intellect's assent, but is precisely what gives to this assent its virtuous, and consequently meritorious, character. Lastly, this promptitude of the will can only come from its unswerving tendency to the Supreme Good. And at the risk of repetition we must again draw attention to the distinction between faith as a purely intellectual habit, which as such is dry and barren, and faith resident, indeed, in the intellect, but motivated by charity or love of God, Who is our beginning, our ultimate end, and our supernatural reward. "Every true motion of the will", says St. Augustine, "proceeds from true love" (de Civ. Dei, XIV, ix), and, as he elsewhere beautifully expresses it, "*Quid est ergo credere in Eum? Credendo amare, credendo diligere, credendo in Eum ire, et Ejus*

membris incorporari. Ipsa est ergo fides quam de nobis Deus exigit- et non invenit quod exigit, nisi donaverit quod invenerit." (Tract. xxix in Joannem, 6. -- "What, then, is to believe in God? -- It is to love Him by believing, to go to Him by believing, and to be incorporated in His members. This, then, is the faith which God demands of us; and He finds not what He may demand except where He has given what He may find.") This then is what is meant by "living" faith, or as theologians term it, *fides formata*, viz., "informed" by charity, or love of God. If we regard faith precisely as an assent elicited by the intellect, then this bare faith is the same habit numerically as when the informing principle of charity is added to it, but it has not the true character of a moral virtue and is not a source of merit. If, then, charity be dead -- if, in other words, a man be in mortal sin and so without the habitual sanctifying grace of God which alone gives to his will that due tendency to God as his supernatural end which is requisite for supernatural and meritorious acts -- it is evident that there is no longer in the will that power by which it can, from supernatural motives, move the intellect to assent to supernatural truths. The intellectual and Divinely infused habit of faith remains, however, and when charity returns this habit acquires anew the character of "living" and meritorious faith.

(c) Again, faith being a virtue, it follows that a man's promptitude in believing will make him love the truths he believes, and he will therefore study them, not indeed in the spirit of doubting inquiry, but in order the better to grasp them as far as human reason will allow. Such inquiry will be meritorious and will render his faith more robust, because, at the same time that he is brought face to face with the intellectual difficulties which are involved, he will necessarily exercise his faith and repeatedly "bring his intellect into submission". Thus St. Augustine says, "What can be the reward of faith, what can its very name mean if you wish to see now what you believe? You ought not to see in order to believe, you ought to believe in order to see; you ought to believe so long as you do not see, lest when you do see you may be put to the blush" (Sermo, xxxviii, 2, P.L., V, 236). And it is in this sense we must understand his oft-repeated words: "Crede ut intelligas" (Believe that you may understand). Thus, commenting on the Septuagint version of Isaias vii 9 which reads: "nisi credideritis non intelligetis", he says: "*Proficit ergo noster intellectus ad intelligenda quae credat, et fides proficit ad credenda quae intelligat; et eadem ipsa ut magis magisque intelligentur, in ipso intellectu proficit mens. Sed hoc non fit propriis tanquam naturalibus viribus sed Deo donante atque adjuvante*" (Enarr. in Ps. cxviii, Sermo xviii, 3, "Our intellect therefore is of use to understand whatever things it believes, and faith is of use to believe whatever it understands; and in order that these same things may be more and more understood, the thinking faculty [mens] is of use in the intellect. But this is not brought about as

by our own natural powers but by the gift and the aid of God." Cf. Sermo xliii, 3, in Is., vii, 9; P.L., V, 255).

(d) Further, the habit of faith may be stronger in one person than in another, "whether because of the greater certitude and firmness in the faith which one has more than another, or because of his greater promptitude in assenting, or because of his greater devotion to the truths of faith, or because of his greater confidence" (II-II:5:4).

(e) We are sometimes asked whether we are really certain of the things we believe, and we rightly answer in the affirmative; but strictly speaking, certitude can be looked at from two standpoints: if we look at its cause, we have in faith the highest form of certitude, for its cause is the Essential Truth; but if we look at the certitude which arises from the extent to which the intellect grasps a truth, then in faith we have not such perfect certitude as we have of demonstrable truths, since the truths believed are beyond the intellect's comprehension (II-II, Q. iv, 8; de Ver., xiv, and i, ad 7).

VIII. THE GENESIS OF FAITH IN THE INDIVIDUAL SOUL

(a) Many receive their faith in their infancy, to others it comes later in life, and its genesis is often misunderstood. Without encroaching upon the article REVELATION, we may describe the genesis of faith in the adult mind somewhat as follows: Man being endowed with reason, reasonable investigation must precede faith; now we can prove by reason the existence of God, the immortality of the soul, and the origin and destiny of man; but from these facts there follows the necessity of religion, and true religion must be the true worship of the true God not according to our ideas, but according to what He Himself has revealed. But can God reveal Himself to us? And, granting that He can, where is this revelation to be found? The Bible is said to contain it; does investigation confirm the Bible's claim? We will take but one point: the Old Testament looks forward, as we have already seen, to One Who is to come and Who is God; the New Testament shows us One Who claimed to be the fulfilment of the prophecies and to be God; this claim He confirmed by His life, death, and resurrection by His teaching, miracles, and prophecies. He further claimed to have founded a Church which should enshrine His revelation and should be the infallible guide for all who wished to carry out His will and save their souls. Which of the numerous existing Churches is His? It must have certain definite characteristics or *notes*. It must be One Holy, Catholic, and Apostolic, it must claim infallible teaching power. None but the Holy, Roman, Catholic, and Apostolic Church can claim these characteristics, and her history is an irrefragable proof of her Divine mission. If, then, she be the true Church, her teaching must be infallible and must be accepted.

(b) Now what is the state of the inquirer who has come thus far? He has proceeded by pure reason, and, if on the grounds stated he makes his submission to the authority of the Catholic Church and believes her doctrines, he has only human, reasonable,

fallible, faith. Later on he may see reason to question the various steps in his line of argument, he may hesitate at some truth taught by the Church, and he may withdraw the assent he has given to her teaching authority. In other words, he has not Divine faith at all. For Divine faith is supernatural both in the principle which elicits the acts and in the objects or truths upon which it falls. The principle which elicits assent to a truth which is beyond the grasp of the human mind must be that same mind illumined by a light superior to the light of reason, viz. the light of faith, and since, even with this light of faith, the intellect remains human, and the truth to be believed remains still obscure, the final assent of the intellect must come from the will assisted by Divine grace, as seen above. But both this Divine light and this Divine grace are pure gifts of God, and are consequently only bestowed at His good pleasure. It is here that the heroism of faith comes in; our reason will lead us to the door of faith but there it leaves us; and God asks of us that earnest wish to believe for the sake of the reward -- "I am thy reward exceeding great" -- which will allow us to repress the misgivings of the intellect and say, "I believe, Lord, help Thou my unbelief." As St. Augustine expresses it, "*Ubi deficit ratio, ibi est fidei aedificatio*" (Sermo ccxlvii, P.L., V, 1157 -- "Where reason fails there faith builds up").

(c) When this act of submission has been made, the light of faith floods the soul and is even reflected back upon those very motives which had to be so laboriously studied in our search after the truth; and even those preliminary truths which precede all investigation e.g. the very existence of God, become now the object of our faith.

IX. FAITH IN RELATION TO WORKS

(a) *Faith and no works* may be described as the Lutheran view. "Esto peccator, pecca fortiter sed fortius fide" was the heresiarch's axiom, and the Diet of Worms, In 1527, condemned the doctrine that good works are necessary for salvation.

(b) *Works and no faith* may be described as the modern view, for the modern world strives to make the worship of humanity take the place of the worship of the Deity (*Do we believe?* as issued by the Rationalist Press, 1904, ch. x: "Creed and Conduct" and ch. xv: "Rationalism and Morality". Cf. also *Christianity and Rationalism on Trial*, published by the same press, 1904).

(c) Faith shown by works has ever been the doctrine of the Catholic Church and is explicitly taught by St. James, ii, 17: "Faith, if it have not works, is dead." The Council of Trent (Sess. VI, canons xix, xx, xxiv, and xxvi) condemned the various aspects of the Lutheran doctrine, and from what has been said above on the necessity of charity for "living" faith, it will be evident that faith does not exclude, but demands, good works, for charity or love of God is not real unless it induces us to keep the Commandments; "He that keepeth his word, in him in very deed the charity of God is perfected" (1 John, ii, 5). St. Augustine sums up the whole question by saying "*Laudo*

fructum boni operis, sed in fide agnosco radicem" -- i. e. "I praise the fruit of good works, but their root I discern in faith" (Enarr. in Ps. xxxi, P.L., IV, 259).

X. LOSS OF FAITH

From what has been said touching the absolutely supernatural character of the gift of faith, it is easy to understand what is meant by the loss of faith. God's gift is simply withdrawn. And this withdrawal must needs be punitive, "*Non enim deseret opus suum, si ab opere suo non deseratur*" (St. Augustine, Enarr. in Ps. cxlv -- "He will not desert His own work, if He be not deserted by His own work"). And when the light of faith is withdrawn, there inevitably follows a darkening of the mind regarding even the very motives of credibility which before seemed so convincing. This may perhaps explain why those who have had the misfortune to apostatize from the faith are often the most virulent in their attacks upon the grounds of faith; "*Vae homini illi*", says St. Augustine, "*nisi et ipsius fidem Dominus protegat*", i. e. "Woe be to a man unless the Lord safeguard his faith" (Enarr. in Ps. cxx, 2, P.L., IV, 1614).

XI. FAITH IS REASONABLE

(a) If we are to believe present-day Rationalists and Agnostics, faith, as we define it, is unreasonable. An Agnostic declines to accept it because he considers that the things proposed for his acceptance are preposterous, and because he regards the motives assigned for our belief as wholly inadequate. "Present me with a reasonable faith based on reliable evidence, and I will joyfully embrace it. Until that time I have no choice but to remain an Agnostic" (*Medicus* in the *Do we Believe?* Controversy, p. 214). Similarly, Francis Newman says: "Paul was satisfied with a kind of evidence for the resurrection of Jesus which fell exceedingly short of the demands of modern logic, it is absurd in us to believe, barely because they believed" (*Phases of Faith*, p. 186). Yet the supernatural truths of faith, however they may transcend our reason, cannot be opposed to it, for truth cannot be opposed to truth, and the same Deity Who bestowed on us the light of reason by which we assent to first principles is Himself the cause of those principles, which are but a reflection of His own Divine truth. When He chooses to manifest to us further truths concerning Himself, the fact that these latter are beyond the grasp of the natural light which He has bestowed upon us will not prove them to be contrary to our reason. Even so pronounced a rationalist as Sir Oliver Lodge says: "I maintain that it is hopelessly unscientific to imagine it possible that man is the highest intelligent existence" (*Hibbert Journal*, July, 1906, p. 727).

Agnostics, again, take refuge in the unknowableness of truths beyond reason, but their argument is fallacious, for surely knowledge has its degrees. I may not fully comprehend a truth in all its bearings, but I can know a great deal about it; I may not have demonstrative knowledge of it, but that is no reason why I should reject that

knowledge which comes from faith. To listen to many Agnostics one would imagine that appeal to authority as a criterion was unscientific, though perhaps nowhere is authority appealed to so unscientifically as by modern scientists and modern critics. But, as St. Augustine says, "If God's providence govern human affairs we must not despair or doubt but that He hath ordained some certain authority, upon which staying ourselves as upon a certain ground or step, we may be lifted up to God" (*De utilitate credendi*); and it is in the same spirit that he says: "*Ego vero Evangelio non crederem, nisi me Catholicae Ecclesiae commoveret auctoritas*" (*Contra Ep. Fund.*, V, 6 -- "I would not believe the Gospel if the authority of the Catholic Church did not oblige me to believe").

(b) Naturalism, which is only another name for Materialism, rejects faith because there is no place for it in the naturalistic scheme; yet the condemnation of this false philosophy by St. Paul and by the author of the Book of Wisdom is emphatic (cf. *Rom.*, i, 18-23; *Wis.*, xiii, 1-19). Materialists fail to see in nature what the greatest minds have always discovered in it, viz., "*ratio cujusdam artis; scilicet divinae, indita rebus, qua ipsae res moventur ad finem determinatum*" -- "the manifestation of a Divine plan whereby all things are directed towards their appointed end" (St. Thomas, *Lect. xiv*, in *II Phys.*). Similarly, the vagaries of Humanism blind men to the fact of man's essentially finite character and hence preclude all idea of faith in the infinite and the supernatural (cf. "Naturalism and Humanism" in *Hibbert Journal*, Oct., 1907).

XII. FAITH IS NECESSARY

"He that believeth and is baptized", said Christ, "shall be saved, but he that believeth not shall be condemned" (*Mark*, xvi, 16); and St. Paul sums up this solemn declaration by saying: "Without faith it is impossible to please God" (*Heb.*, xi, 6). The absolute necessity of faith is evident from the following considerations: God is our beginning and our end and has supreme dominion over us, we owe Him, consequently, due service which we express by the term *religion*. Now true religion is the true worship of the true God. But it is not for man to fashion a worship according to his own ideals; none but God can declare to us in what true worship consists, and this declaration constitutes the body of revealed truths, whether natural or supernatural. To these, if we would attain the end for which we came into the world, we are bound to give the assent of faith. It is clear, moreover, that no one can profess indifference in a matter of such vital importance. During the Reformation period no such indifference was professed by those who quitted the fold; for them it was not a question of faith or unfaith, so much as of the medium by which the true faith was to be known and put into practice. The attitude of many outside the Church is now one of absolute indifference, faith is regarded as an emotion, as a peculiarly subjective disposition which is regulated by no known psychological laws. Thus Taine speaks of faith as "

une source vive qui s'est formee au plus profond de l'ame, sous la pousse et la chaleur des instincts immanents" -- "a living fountain which has come into existence in the lowest depths of the soul under the impulse and the warmth of the immanent instincts". Indifferentism in all its phases was condemned by Pius IX in the Syllabus *Quanta cura*: in Prop. XV, "Any man is free to embrace and profess whatever form of religion his reason approves of"; XVI, "Men can find the way of salvation and can attain to eternal salvation in any form of religious worship"; XVII "We can at least have good hopes of the eternal salvation of all those who have never been in the true Church of Christ"; XVIII, "Protestantism is only another form of the same true Christian religion, and men can be as pleasing to God in it as in the Catholic Church."

XIII. THE OBJECTIVE UNITY AND IMMUTABILITY OF FAITH

Christ's prayer for the unity of His Church the highest form of unity conceivable, "that they all may be one as thou, Father, in me, and I in Thee" (John, xvii, 21), has been brought into effect by the unifying force of a bond of a faith such as that which we have analysed. All Christians have been taught to be "careful to keep the unity of the spirit in the bond of peace, one body and one spirit, as you are called in one hope of your calling; one Lord, one faith, one baptism, one God and Father of all" (Eph., iv, 3-6). The objective unity of the Catholic Church becomes readily intelligible when we reflect upon the nature of the bond of union which faith offers us. For our faith comes to us from the one unchanging Church, "the pillar and ground of truth", and our assent to it comes as a light in our minds and a motive power in our wills from the one unchanging God Who can neither deceive nor be deceived. Hence, for all who possess it, this faith constitutes an absolute and unchanging bond of union. The teachings of this faith develop, of course, with the needs of the ages, but the faith itself remains unchanged. Modern views are entirely destructive of such unity of belief because their root principle is the supremacy of the individual judgment. Certain writers do indeed endeavour to overcome the resulting conflict of views by upholding the supremacy of universal human reason as a criterion of truth; thus Mr. Campbell writes: "One cannot really begin to appreciate the value of united Christian testimony until one is able to stand apart from it, so to speak, and ask whether it rings true to the reason and moral sense" (*The New Theology*, p. 178; cf. Cardinal Newman, "Palmer on Faith and Unity" in *Essays Critical and Historical*, vol. 1, also, Thomas Harper, S.J., *Peace Through the Truth*, London, 1866, 1st Series.)

I. Patristic. -- The Fathers in general have never attempted any analysis of faith, and most patristic treatises *De fide* consist of expositions of the true doctrine to be held. But the reader will have already noticed the precise teaching of ST. AUGUSTINE on the nature of faith. Besides the gems of thought which are scattered throughout his

works, we may refer to his two treatises *De Utilitate Credendi* and *De Fide Rerum quae non videntur*, in *P.L.*, VI, VII.

II. Scholastics. -- The minute analysis of faith was worked out by the theologians of the thirteenth century and onwards they followed mainly the lines laid down by St. Augustine. ST. THOMAS, *Summa*, II-II, QQ. i-vii; *Quaest. Disp.*, Q. xiv; HOLCOT, *De actibus fidei et intellectus et de libertate Voluntatis* (Paris, 1512); SUAREZ *De fide, spe, et charitate, in Opera*, ed. VIVES (Paris, 1878), XII; DE LUGO, *De virtute fidei divinae* (Venice, 1718); JOANNES A S. THOMA, *Comment. on the Summa especially on the De Fide*, in *Opera*, ed. VIVES (Paris, 1886), VII; CAJETAN, *De Fide et Operibus* (1532), especially his Commentary on the *Summa*, II-II, QQ i-vii.

III. Modern Writers. -- The decrees of the Vatican Council, a handy edition by McNabb (London, 1907); cf. also *Coll. Lacensis*, VIII; PIUS X, *Syllabus Lamentabili Sane* (1907); id., *Encyclical, Pascendi Gregis* (1907); ZIGLIARA, *Propaedeutica ad Sacram Theologiam* (5th ed., Rome, 1906), 1, xvi, xvii; NEWMAN, *Grammar of Assent, Essay on Development*, and especially *The Ventures of Faith* in Vol. IV of his *Sermons*, and *Peace in Believing* and *Faith without Demonstration*, VI; WEISS, *Apologie du Christianisme*, Fr. tr., V, conf. iv, *La Foi*, and VI, conf. xxi, *La Vie de la Foi*; BAINVEL, *La Foi et l'acte de Foi* (Paris, 1898); ULLATHORNE, *The Groundwork of the Christian Virtues*, ch. xiv, *The Humility of Faith*; HEDLEY, *The Light of Life* (1889), ii; BOWDEN, *The Assent of Faith*, taken mainly from KLEUTGEN, *Theologie der Vorzeit*, IV, and serving as an introductory chapter to the tr. of HETTINGER, *Revealed Religion* (1895); MCNABB, *Oxford Conferences on Faith* (London, 1905); *Implicit Faith*, in *The Month for April*, 1869; *Reality of the Sin of Unbelief*, *ibid.*, October, 1881; *The Conceivable Dangers of Unbelief* in *Dublin Review* Jan., 1902; HARENT in VACANT AND MANGENOT, *Dictionnaire de théologie catholique*, s. v. *Croyance*.

IV. Against Rationalist, Positivist, and Humanist Views. -- NEWMAN, *The Introduction of Rationalistic Principles into Revealed Religion*, in *Tracts for the Times* (1835), republished in *Essays Historical and Critical* as Essay ii; *St. Paul on Rationalism* in *The Month* for Oct., 1877; WARD, *The Clothes of Religion, a Reply to Popular Positivism* (1886); *The Agnosticism of Faith* in *Dublin Review*, July, 1903.

V. The motives of faith and its relation to reason and science. -- MANNING, *The Grounds of Faith* (1852, and often since); *Faith and Reason* in *Dublin Review*, July, 1889; AVELING, *Faith and Science in Westminster Lectures* (London, 1906); GARDEIL, *La crédibilité et l'apologétique* (PARIS, 1908); IDEM in VACANT AND MANGENOT, *Dictionnaire de théologie catholique*, s.v. *Crédibilité*.

VI. Non-Catholic writers. -- *Lux Mundi*, i, *Faith* (10th ed. 1890); BALFOUR *Foundations of Belief* (2nd ed., 1890); COLERIDGE, *Essay on Faith* (1838), in *Aids to Reflection*; MALLOCK, *Religion as a Credible Doctrine* (1903), xii.

VII. Rationalistic Works. -- The *Do We Believe* correspondence, held in the *Daily Telegraph*, has been published in the form of selections (1905) under the title, *A Record of a Great Correspondence in the Daily Telegraph*, with *Introduction* by COURTNEY. Similar selections by the *Rationalist Press* (1904); SANTAYANA, *The Life of Reason* (3 vols., London, 1905-6); *Faith and Belief* in *Hibbert Journal*, Oct. 1907. Cf. also LODGE, *ibid.*, for Jan., 1908, and July, 1906.

HUGH POPE

Sts. Faith, Hope and Charity

Sts. Faith, Hope & Charity

The names of two groups of Roman martyrs around whom a considerable amount of legendary lore has gathered; though the extent of sound historical data possessed concerning them is so slight, that until very recent times the most eminent scholars failed to distinguish between them. However, the extent and antiquity of their cult and the universality with which their names are found not only in the various early martyrologies of the Western Church, but also in the *Menaia* and *Menologies* of the Greeks, render the fact of their existence and martyrdom unquestionable. Setting aside the purely legendary accounts that have come down to us (see Migne, P.G. CXV, 497; Mombritius, *Vitae Sanctorum*, II, 204), we find that in the reign of Hadrian, a Roman matron Sophia (Wisdom), with her three youthful daughters, Pistis, Elpis, and Agape (Faith, Hope and Charity), underwent martyrdom for the Faith, and were interred on the Aurelian Way, where their tomb in a crypt beneath the church afterwards erected to St. Pancratius was long a place of resort for pilgrims, as we learn from various indubitable documents of the seventh century, such as an *Itinerarium* (or guide to the holy places of Rome compiled for the use of pilgrims) still preserved at Salzburg, the list, preserved in the cathedral archives of Monza, of the oils gathered from the tombs of the martyrs and sent to Queen Theodelinda in the time of Gregory the Great, etc.

Later surely than the reign of Hadrian, but at what time is uncertain, another band of martyrs, Sapientia (Wisdom) and her three companions, Spes, Fides and Caritas (Hope, Faith and Charity), suffered death and were buried near the tomb of St. Cecilia in the cemetery of St. Callistus on the Appian Way. Despite the meagreness of these authentic details, the explicit references in the documents cited to a band of martyrs, mother and daughters, whose names are always given in Greek, and who are buried on the Aurelian Way, and to another band of four martyrs, interred on the Via Appia, whose relationship is not indicated and whose names, though the same as those of the martyrs of the Aurelian Way, are yet always given in Latin, certainly point to distinct groups. Nor is the coincidence in names remarkable, seeing that the early Christians

so often (according to De Rossi) took in baptism mystical names indicative of Christian virtues, etc. Thus Sophia, Sapientia, Fides and the like are common names in early Christian inscriptions and martyrologies. The Roman martyrology names on 1 Aug., "the holy virgins, Faith, Hope and Charity, who won the crown of martyrdom under the Emperor Hadrian" and, on 30 Sept., "St. Sophia, widow, mother of the holy virgins, Faith, Hope and Charity". In some places, on 1 Aug., St. Sapientia is also venerated; but generally owing to the confusion of the two groups, none of the second group receives special recognition. In the Eastern Church the feast is kept on 17 September.

JNO. F.X. MURPHY

The Rule of Faith

The Rule of Faith

The word *rule* (Lat. *regula*, Gr. *kanon*) means a standard by which something can be tested, and the rule of faith means something extrinsic to our faith, and serving as its norm or measure. Since faith is Divine and infallible, the rule of faith must be also Divine and infallible; and since faith is supernatural assent to Divine truths upon Divine authority, the ultimate or remote rule of faith must be the truthfulness of God in revealing Himself. But since Divine revelation is contained in the written books and unwritten traditions (Vatican Council, I, ii), the Bible and Divine tradition must be the rule of our faith; since, however, these are only silent witnesses and cannot interpret themselves, they are commonly termed "proximate but inanimate rules of faith". Unless, then, the Bible and tradition are to be profitless, we must look for some proximate rule which shall be animate or living.

I. PRIVATE JUDGMENT AS THE RULE OF FAITH

The Reformed Churches were unanimous in declaring the Bible to be the sole rule of faith. "We believe that the only rule and standard by which all dogmas and all doctors are to be weighed and judged, is nothing else but the prophetic and apostolic writings of the Old and New Testaments" (Form. Concordiae, 1577). But men had already perceived that the Bible could not be left to interpret itself, and in 1571 Convocation had put forward what was, perhaps unwittingly, a double rule of faith: "preachers", they say, "shall see that they never teach anything . . . except what is agreeable to the doctrine of the Old and New Testament, and what the Catholic Fathers and ancient Bishops have collected out of that very doctrine" (Wilkins, "Concilia", IV, 267). Convocation thus not only laid down that the Bible was the rule of faith, but insisted upon its inanimate character as a witness to the Faith, for they declared the early Church to be its acknowledged interpreter; moreover, they were themselves exercising church

authority. A somewhat different doctrine appeared in the Westminster Confession of Faith (1643-7), which declared that the "Books of the Old and New Testaments are . . . given by inspiration of God, to be the rule of faith and life" (art. ii), but that the "authority of the Holy Scripture . . . dependeth not upon the testimony of any man or church" (art. iv). They add: "We may be moved by the testimony of the Church to an high and reverent esteem of the Holy Scripture . . . yet our full persuasion of the infallible truth and divine authority thereof is from the inward work of the Holy Spirit, bearing witness by and with the word in our hearts" (art. v). This is a clear enunciation of the principle that the judgment of each individual, moved by the assistance of the Holy Spirit, is the proximate living rule of faith. But apart from its solvent effect upon any true view of the Church, it is easy to see that such a rule could never serve as an infallible interpreter of the inanimate rule, viz., the Bible. For where does the Bible ever testify to the inspiration of certain books? And what limits does it assign to the canon? Moreover, the inward work of the Holy Spirit, being purely subjective, can never be a decisive and universal test of doctrinal divergences or critical views; thus Luther himself termed St. James's Epistle an "epistle of straw". The fruits of this principle are everywhere apparent in Protestant Biblical criticism. "The Reformation theologians treated Paul as if he were one of themselves. More recent writers do the same. In Neander and Godet Paul is a pectoral theologian, in Rückert a pious supernaturalist, in Baur a Hegelian, in Luthardt orthodox, in Ritschl a genuine Ritschlian" (*Expository Times*, 1904, p. 304). In practice, however, the Reformed Churches have never acted up to the principle of private judgment, but have, in one form or another, urged the authority of the Church in deciding the contents of the Bible, its inspiration, and its meaning.

II. THE CHURCH AS THE RULE OF FAITH

This follows necessarily from any adequate view of the Church as a Divinely constituted body, to whose keeping is entrusted the deposit of faith, but the grounds for this doctrine may be briefly stated as follows:

(1) New Testament

Christ gave His disciples no command to write, but only to teach: "going therefore, teach ye all nations, . . . teaching them to observe all things whatsoever I have commanded you" (Matt., xxviii, 19-20). "As the Father hath sent me, I also send you" (John, xx, 21). And in accordance with this, the Church is everywhere presented to us as a living and undying society composed of the teachers and the taught. Christ is in the Church, and is its Head; and He promised that the Holy Spirit should be with it and abide in it. "He will teach you all things, and bring all things to your mind, whatsoever I shall have said to you" (John, xiv, 26). Hence St. Paul calls the Church "the pillar and ground of the truth" (I Tim., iii, 15; cf. Mark, xvi, 16; Rom., x, 17; Acts, xv, 28).

(2) Tradition

The same doctrine appears in the writings of the Fathers of every age; thus St. Ignatius (ad Trall., vii), "Keep yourselves from heretics. You will be able to do this if you are not puffed up with pride, and (so) separated from (our) God, Jesus Christ, and from the bishop, and from the precepts of the Apostles. He who is within the altar is clean, he who is without is not clean; that is, he who acts any way without the bishop, the priestly body, and the deacons, is not clean in conscience". And St. Irenaeus ("Adv. Haer.", III, ii) says, of heretics, that "not one of them but feels no shame in preaching himself, and thus depraving the rule of faith" (*ton tes aletheias kanona*); and again (III, iv), "it is not right to seek from others that truth which it is easy to get from the Church, since the Apostles poured into it in fullest measure, as into a rich treasury, all that belongs to the truth, so that whosoever desires may drink thence the draught of life". A little further on, he speaks (V, xx) of the "true and sound preaching of the Church, which offers to the whole world one and the same way of salvation". Such testimonies are countless; here we can only refer to the full and explicit teaching which is to be found in Tertullian's treatises against Marcion, and in his "De praescriptionibus Haereticoum", and in St. Vincent of Lérins' famous "Commonitorium". Indeed St. Augustine's well-known words may serve as an epitome of patristic teaching on the authority of the Church. "I would not believe the Gospels unless the authority of the Catholic Church moved me thereto" (Contra Ep. Fund., V). It should be noted that the Fathers, especially Tertullian and St. Irenaeus, use the term *tradition* not merely passively, viz., of orally bestowed Divine teaching, but in the active sense of ecclesiastical interpretation. And this is undoubtedly St. Paul's meaning when he tells Timothy to uphold "the form of sound words which thou hast heard from me" (II Tim., i, 13). It is in this sense that the various formulae of faith, of which we have the earliest sample in I Cor., xv, 3-4, became the rule of faith.

(3) Theologians

The teaching of the Church's Doctors on this point has ever been the same, and it will suffice if we quote two passages from St. Thomas, who, however, has no set treatise on a question which he took for granted. "The formal object of faith", he says, "is the First Truth as manifested in Holy Scripture and in the Church's teaching. Hence if anyone does not adhere as to an infallible and Divine rule to the Church's teaching, which proceeds from the Church's truth manifested in Holy Scripture, such an one has not the habit of faith, but holds the truths of faith not by faith but by some other principle" (II-II, Q. v, a. 3). And still more explicitly when (Quodl., ix, art. 16) he asks whether canonized saints are necessarily in heaven, he says, "it is certain that the judgment of the universal Church cannot possibly err in matters pertaining to the

faith; hence we must stand rather by the decisions which the pope judicially pronounces than by the opinions of men, however learned they may be in Holy Scripture."

(4) Reason

If faith is necessary for all men at all times and in all places, and if a true saving faith demands a clear knowledge of what we have to believe, it is clear that an infallible teaching Church is an absolute necessity. Such a Church alone can speak to men of all classes and at all times; it alone can, by reason of its perpetuity and ageless character, meet every new difficulty by a declaration of the sound form of doctrine which is to be held. If the teaching of Christ and His Apostles is distorted, none but the Church can say "This is its true meaning, and not that; I know that it is as I say because the Spirit which assists me is One with the Spirit which rested on Him and on them"; the Church alone can say, "Christ truly rose from the tomb, and I know it, because I was there, and saw the stone rolled back". The Church alone can tell us how we are to interpret the words "This is My Body", for she alone can say, He Who spoke those words speaks through me, He promised to be with me all days, He pledged Himself to safeguard me from error at all times".

III. IN WHAT SENSE IS THE CHURCH THE RULE OF FAITH?

(1) All non-Catholic systems have felt the need of some such authoritative rule as that sketched out above, and the history of Anglicanism practically resolves itself into a series of attempts to formulate a theory which shall, while avoiding the Scylla of Rome, enable the Church of England to escape the Charybdis of dissolution. This has never been more painfully evident than at the present time, when an apparently destructive Biblical criticism has compelled men to look for some firmer standing ground than the Bible alone. But in formulating their various theories, non-Catholic theologians have never seemed to realize the absolutely vital character of the question at issue, and have contented themselves with illogical views, which have done more to alienate thinking men than the direct and unveiled assaults of infidels and agnostics. At the Reformation the only authority deserving of the title was overthrown, and since then men have been seeking, at all costs, to replace it by some form other than that of the Apostolic Church, from which they cut themselves adrift. All the sects are seeking an active rule of faith; the High Church in the testimony of the primitive Church; the Low Church in what we may term the spiritual intuitions of the illuminated soul; the Broad Church does the same, but refuses to be bound by any dogmatic formulae, and regards the Bible as no more than the best of all inspired books; and lastly the Ritualists appeal to the testimony of the Living Church, but naively confess that such testimony is not to be found at the present time, owing to "our unhappy divisions" which preclude the assembling of a truly representative council. The Low Church and the Broad Church content themselves with a purely subjective criterion of truth; the High Church with

one which itself needs interpreting; and the Ritualist looks to "the Church of the future", he clings to the illusory "branch theory", but forgets that none of the Churches he calls "branches" accepts the designation.

(2) Modernism

There has of late years arisen, within the pale of the Church, a school of theologians who make appeal to the conscience of the invisible Church rather than to any conciliar gathering, and appear to neglect entirely what theologians term the *quotidianum magisterium* of the Church. Thus, the Rev. G. Tyrrell writes: "It is all important to distinguish the pre-constitutional formless church from the governmental form, which it has now elaborated for its own apostolic needs" (*Scylla and Charybdis*, 49). He would even make this formless church the rule of faith. "Authority is something inherent in, and inalienable from, that multitude itself; it is the moral coerciveness of the Divine Spirit of Truth and Righteousness immanent in the whole, dominant over its several parts and members; it is the imperativeness of the collective conscience" (*op. cit.*, 370). Such doctrine inevitably leads to the individual soul as the ultimate criterion of religious truth, as is forcibly pointed out in the Encyclical "Pascendi". But the most remarkable feature of Modernism is its return to the old Protestant rule of faith, for Modernists insist, not only on the pre-eminence of the Bible, but on the independence of Biblical critics. In the Syllabus, "Lamentabili Sane", Pius X has condemned such views as that the opinions of Biblical exegetes are beyond the jurisdiction of the Church (props. i-iii, and lxi); that the teaching office of the Church does not extend to a determination of the sense of holy Scripture (prop. iv); that the office of the Church is merely to ratify the conclusions arrived at by the Church at large (prop. vi); and that the Church's dogmas are often in conflict with the plain teaching of the Bible (props. xxiii-xxiv, and lxi).

(3) The Catholic Doctrine Touching the Church as the Rule of Faith

The term *Church*, in this connection, can only denote the teaching Church, as is clear from the passages already quoted from the New Testament and the Fathers. But the teaching Church may be regarded either as the whole body of the episcopate, whether scattered throughout the world or collected in an ecumenical council, or it may be synonymous with the successor of St. Peter, the Vicar of Christ. Now the teaching Church is the Apostolic body continuing to the end of time (*Matt.*, xxviii, 19-20); but only one of the bishops, viz., the Bishop of Rome, is the successor of St. Peter; he alone can be regarded as the living Apostle and Vicar of Christ, and it is only by union with him that the rest of the episcopate can be said to possess the Apostolic character (*Vatican Council, Sess. IV, Prooemium*). Hence, unless they be united with the Vicar of Christ, it is futile to appeal to the episcopate in general as the rule of faith. At the same time, it is clear that the Church may derive from the conflicting views of

the Doctors a clearer knowledge of the Deposit of Faith committed to her, for as St. Augustine pointedly asked, when treating of the re-baptism question, "how could a question which had become so obscured by the dust raised in this controversy, have been brought to the clear light and decision of a plenary council, unless it had first been discussed throughout the world in disputations and conferences held by the bishops?" (*De Baptismo*, ii, 5).

Thus the appeal of the Ritualist to a future council, that of the Modernist to the conscience of the universal Church, and that of the High-Churchman to the primitive Church, are, besides being mutually exclusive, destructive of the true idea of the Church as the "pillar and ground of truth". If the Church is to exercise her prerogative, she must be able to decide promptly and infallibly any question touching faith or morals. Her conciliar utterances are rare, and though they are weighty with the majesty of ecumenical testimony, the Church's teaching is by no means confined to them. The Vicar of Christ can, whenever necessary, exercise the plenitude of his authority, and when he does so we are not at liberty to say, with the Jansenists, that he has not done justice to the views of those he condemns (cf. Alex. VII, "Ad Sacram", 1656); nor can we take refuge, as did the later Jansenists, and as the Modernists appear to do, in obsequious silence, as opposed to heartfelt submission and mental acceptance of such pronouncements by the supreme pastor of souls. (Cf. Clement XI, "Vineam Domini", 1705; and Pius X, "Lamentabili Sane", 1907, prop. vii) When Newman was received into the Church, he penned those famous lines which form the conclusion of the "Essay on Development". "Put not from you what you have here found; regard it not as mere matter of present controversy; set not out resolved to refute it, and looking out for the best way of doing so; seduce not yourself by the imagination that it comes of disappointment, or disgust, or restlessness, or wounded feeling, or undue sensibility, or other weakness. Wrap not yourself round in the associations of years past, nor determine that to be truth which you wish to be so, nor make an idol of cherished anticipations. Time is short, eternity is long."

Patristic writers.- IRENAEUS, *Adversus Haeres.*, ed. MIGNE, P. G., VII; TERTULLIAN, *De praescriptionibus Haereticorum*, ed. HURTER (Utrecht, 1870); CYRIL OF JERUSALEM, *Catecheses*, ed. MIGNE, P.G., XXXIII; CYRIL OF ALEXANDRIA, *Second Letter to Nestorius*, styled by Councils of Ephesus and Chalcedon "the Rule of Faith" (epistole kanonike); VINCENT OF LERINS, *Commonitorium*, ed. HURTER. See also SCHANZ, *Apologie*, tr. (New York, 1892); HARNACK, *History of Dogma*, tr. HUGH POPE

The Faithful

The Faithful

(Lat. *fideles*, from *fides*, faith.)

Those who have bound themselves to a religious association, whose doctrine they accept, and into whose rites they have been initiated. Among Christians the term is applied to those who have been fully initiated by baptism and, regularly speaking, by confirmation. Such have engaged themselves to profess faith in Jesus Christ, from Whom they received it as a gift; henceforth they will proclaim His teachings, and live according to His law. Hence the term so frequent in papal documents, *Christifideles*, "the faithful of Jesus Christ". The distinction between Christians and faithful is now very slight, not only because adult baptism has become the exception, but also because liturgically the rite of the catechumenate and that of baptism have merged into one another. On the other hand, in the Latin Church at least, confirmation and first Communion have been separated from the baptismal initiation. In the primitive Church it was otherwise; initiation into the Christian society consisted in two distinct acts, often accomplished years apart from one another. First, one became a catechumen by the imposition of hands and the sign of the cross; this was a kind of preliminary profession of Christian faith -- "eos qui ad primam fidem credulitatis accedunt"

(Council of Elvira, about 300, can.xlii), which authorized the catechumen to call himself a Christian. Only by the second act of initiation, i.e. by baptism itself, was he authorized to call himself one of the faithful, and participate immediately in all the Christian mysteries, including the Eucharist.

Strictly speaking, therefore, the term *faithful* is opposed to catechumen; hence, it is not met in the writings of these early Christian Fathers who flourished before the organization of the catechumenate. It is not found in St. Justin nor in St. Irenaeus or Lyons; Tertullian, however, uses it, and reproaches the heretics for obliterating all distinction between catechumens and the faithful: *quis catechumenus, quis fidelis incertum est* (De praeser., c. xli; P.L., II, 56). Henceforth, in the patristic writings and canons of councils we meet quite frequently the antithesis of catechumens and baptized Christians, Christians and faithful. Thus St. Augustine (Tract. in Joannem, xlv, 2; P.L., XXXV, 1714): "Ask a man: are you a Christian? If he be a pagan or a Jew, he will reply: I am not a Christian. But if he say: I am a Christian, ask him again: are you a catechumen, or one of the faithful?" Similarly the Council of Elvira considers the case of a "faithful" Christian baptizing a catechumen in case of necessity (can. xxxviii); again, of sick pagans asking for the imposition of hands of the catechumenate, and thus becoming Christians (can. xxxix); of participation in an idolatrous sacrifice on the part of a Christian, and again by one of the faithful (can. lix); of betrayal to the pagan magistrate (*delatio*), to which a difference of guilt is attached according as the crime was perpetrated by one of the faithful or by a catechumen (can. lxxiii).

The title *fidelis* was often carved on epitaphs in the early Christian period, sometimes in opposition to the title of catechumen. Thus, at Florence, a master (*patronus*) dedicates to his catechumen servant (*alumna*) the following inscription: "Sozomeneti Alumnae audienti patronus fidelis", i.e. "her master, one of the faithful, to Sozomenes, his servant and hearer", by which term he means one of the well-known degrees of the catechumenate (Martigny, Dict. des antiq. chreét., Paris, 1877). Even now the baptismal rite provides for voluntary request of baptism on the part of an *infidelis*, i.e. a non-Christian (see INFIDEL); it exhibits venerable vestiges of the primitive *scrutinium* or preliminary examination, the guarantors (*sponsors*) or god-father and god-mother, the rites of the catechumenate, the communication of the Creed (*traditio symboli*) and the Our Father, the renunciation of Satan and evil, the adhesion to Jesus Christ, and the triple profession of faith. The candidate for baptism is still asked at the entrance to the baptismal font: "Wilt thou be baptized? It was voluntary, therefore, and is so yet, that one entered the ranks of the faithful through the principal initiatory rite of baptism.

Naturally enough, even in Christian antiquity, attention was drawn to the analogous ceremonies of circumcision (the sign, if not the rite, of the admission of proselytes to

the profession of Judaism) and of the bloody bath of the *taurobolium*, by which the faithful of Mithra were initiated (Cumont, *Les Mysteères de Mithra*, Paris, 1902). The obligations of the faithful Christian are indicated by the preparatory rites of his reception and by his actual baptism. He begins by asking for faith (in Jesus Christ) and, through that faith, for eternal life. The Creed is then delivered to him, and he returns it (*redditio symboli*) i.e. repeats it aloud. At the baptismal font he recites solemnly the profession of faith. From all this it is clear that his first duty is to believe (see FAITH). His second duty is to regulate his life or conduct with his new Christian faith, i.e. having renounced Satan and evil, he must avoid all sin. "So behave", was it said to him, "that henceforth thou mayest be the temple of God." St. Gregory I says (Hom. in Evang. xxix, 3; P.L., LXXVI, 1215): "Then only are we truly the faithful when by our acts we realize the promises made with our lips. On the day of our baptism, indeed, we promised to renounce all the works and all the pomps of the ancient enemy."

Finally, since the faithful have voluntarily sought membership in the Christian society they are bound to submit to its authority and obey its rulers. As to the rights of the faithful, they consist chiefly in the fullest participation in all the Christian mysteries, so long as one does not become unworthy of the same. Thus the faithful Christian is entitled to take part in the Holy Sacrifice, to remain in the assembly after the deacon has sent away the catechumens, to offer up with the priest the *orate fidelium* or prayer of the faithful, to receive there the Body and Blood of Christ, and to receive the other rites and sacraments. He may also aspire to the highest rank of the clergy. In a word, he is a full member of the Christian society, and is such, regularly speaking, in perpetuity. If by reason of his own misdeeds he deserves to be expelled from said society, repentance and the reparatory penitential rite, a second baptism, as it were, permit his return. Finally, if he persist in the observance of his baptismal promises, he will obtain eternal life, i.e. his original petition at the moment of baptism. See BAPTISM, CATECHUMEN.

A. BOUDINHON

Juan Conchillos Falco

Juan Conchillos Falco

Painter, b. at Valencia of an ancient noble family in 1641; d. 14 May, 1711. He was a pupil of Esteban March, the eminent but eccentric Valencian painter, and was one of the first Spanish artists to start and maintain a school of design, gathering about him various youthful artists and insisting upon their working in charcoal in order to obtain freedom of draughtmanship. He was a brilliant sketcher and in his journeys through his native country made some clever and humorous pencil drawings of scenes

which took place on the road. Falco is almost the only Spanish artist of whom it can be said that he had a keen sense of humour, but he is further described by his contemporaries as "the most amiable of men, humble, modest, a model of virtue, and altogether of the stuff whereof angels are made". Two of his most important works were those executed for the church of San Salvador in Valencia; others are the "Immaculate Conception", painted for the Franciscans in the same city, the frescoes in the church of San Juan, and the two altar-pieces of the Cistercian monastery of Valdigna. The close of his life was full of sadness. He was suddenly struck with palsy and became a confirmed cripple. Soon after that he lost his sight and died completely blind.

GEORGE CHARLES WILLIAMSON

Faldstool

Faldstool

(Lat. *faldistorium*; also *facistorium*, *faudestolus*, *faudestola*).

A movable folding chair used in pontifical functions by the bishop outside of his cathedral, or within it if he is not at his throne or cathedra. Other prelates enjoying the privilege of full pontificals also use it. The rubrics prescribe it as a seat in the conferring of baptism and Holy orders, in the consecration of oils on Maundy Thursday, at the ceremonies of Good Friday, etc. It is prescribed as a *genuflexorium* at the door of the church at the solemn reception of a bishop, at the altar of the Blessed Sacrament, and before the high altar. Red, green, and violet cloths are ordered as a covering to correspond to the season or the rank of the prelate. It may have once been something like a campstool and it accompanied the bishop in his journeys. Materials, even the most costly, were employed in its construction; one wrought of gold and jewelled was presented to Pope Clement IV by Charles, King of Naples. Some were made of silver, of gilt metal, of ebony, or of wood. They were sometimes elaborately carved, ending in clawlike feet, the four corners at the top representing the neck and head of animals. Cloths of silk of a rich texture with gold and silver served to cover them. A faldstool is prescribed by the old English Ritual in the consecration of a bishop. Of Hugh Pudsey, Bishop of Durham (d. 1195), we are told that on taking the cross for the holy war he had made among other things to carry along with him a magnificent silver chair.

FRANCIS MERSHMAN

Thomas Falkner

Thomas Falkner

Born 6 Oct., 1707; died 30 Jan., 1784. He was the son of Thomas Falkner, a Manchester apothecary, and obtained his education at the Manchester grammar school. Later on, having studied medicine under the well-known Dr. Richard Mead, he became a surgeon and practised at his native place. His own health being delicate, he was advised to take a sea-voyage, and being acquainted with a ship chaplain on board the "Assiento", a vessel trading with Guinea and carrying slaves thence to Buenos Aires, he accepted an invitation to accompany the vessel as surgeon. This was in or about 1731. On reaching Buenos Aires he was so ill that the captain was compelled to leave him there in the care of Father Mahoney, the superior of the Jesuit College. Here he not only recovered his health, but was received into the Church, and on 15 May, 1732, entered the Society of Jesus, becoming a member of the Paraguay province. Having spent some time at the Jesuit College of Cordoba de Tucuman, he went as a missionary to the Puelches, near Rio Legundo. His knowledge of medicine and mechanics procured for him considerable influence among the Indians, and in 1740 or soon after he was sent to assist Father Strobel in his successful mission to the Patagonian Indians at Cape San Antonio. For more than thirty years he laboured among the Patagonians until 1768 when the Jesuits were expelled from South America. He then returned to England where, in 1771 or 1772, he joined the English province of the Society. He was appointed chaplain to Mr. Berkeley of Spetchley, and here, in addition to his priestly labours, he wrote an account of his Patagonian experiences, which was published at Hereford in 1774 under the title "A Description of Patagonia and the adjoining parts of South America, with a grammar and a short vocabulary, and some particulars relating to Falkland's Islands". The book as published was not his original work, but a compilation by William Combe, who used Falkner's papers. Kirk (see below) quotes a remark by Rev. Joseph Berington: "Mr. Falkner was a man of a vigorous mind, well exercised in various points of science, and had he been allowed to tell his story in his own way, stored as his mind was with anecdotes and incidents, on which he delighted to dwell, we should have had from him an amusing and interesting performance. But his papers were put into the hands of the late Mr. Robert Berkeley of Spetchley, who extracted from them the whole spirit of the original. He made them what they are." But though Mr. Berkeley wrote the preface, the responsibility for the taming process must rest with Combe. Even in its emasculated form the book was successful, and was translated into German, French, and Spanish. Another account of the Patagonians due to Father Falkner is found in the works of Thomas Pennant, who described his essay as "formed

from the relation of Fr. Falkner, a Jesuit, who had resided among them thirty-eight years". On leaving Spetchley, he became chaplain to Mr. Berington of Winsley in Herefordshire, and afterwards to the Plowdens of Plowden Hall in Shropshire. After his death, which occurred at the latter place, the Spanish Jesuits, who had known him in South America, were very anxious to obtain his unpublished works, which included treatises on the botanical and mineral products of America, and "American distempers as cured by American drugs". It is stated by Fr. Caballero, S.J., that he had also edited "Volumina duo de anatomia corporis humani".

EDWIN BURTON

Fall River

Fall River

DIOCESE OF FALL RIVER (RIVERORMENSIS), U.S.A.

A suffragan see of the Province of Boston; comprises the counties of Bristol, Barnstable, Dukes, and Nantucket, with the towns of Marion, Mattapoissett and Wareham in Plymouth county, Massachusetts, an area of 1194 square miles. It was created 12 March, 1904, by a division of the Diocese of Providence, which had included the entire State of Rhode Island and a portion of south-eastern Massachusetts, and has the distinction of being the first diocese erected by Pope Pius X. The total population of the diocese is 309,438, of which 151,633 are Catholics. Among the latter are Americans, Irish, French-Canadians, Portuguese, Poles, and Italians, with some few Greeks and Syrians. The heavy immigration in years past of the Irish and French-Canadian people has caused them to far outnumber the Catholics of other nationalities; but this immigration is now at a standstill, while that of Portuguese and Poles is steadily on the increase. The diocese, by reason of recent creation, has no history of its own, its records being included in the history of the Dioceses of Boston, Hartford, and Providence (q. v.), in each of which its territory has successively been included.

WILLIAM STANG, the first bishop, was born in 1854 in Langenbrücken, in the Grand Duchy of Baden, Germany. His early education was received in the gymnasias of his native land and the *petit séminaire* at Saint-Nicolas, Belgium. In October, 1875, he began the study of theology at the American College, Louvain, Belgium, where he was ordained priest in 1878. In September of the same year he emigrated to America, to labour in the Diocese of Providence, where his first assignment was to the cathedral. In 1884 he assumed charge of St. Ann's parish, Cranston, Rhode Island. Shortly after he was named rector of the cathedral and chancellor of the diocese, positions which he ably filled until 1895. In April of that year he went to Louvain to become vice-rector of the American College. Georgetown University, in 1887, had conferred upon him

the degree of doctor of theology; but a greater recognition awaited him. In August, 1898, the Belgian bishops as the governing board of the University of Louvain, to which the American College is affiliated, named him professor of fundamental moral theology in the schola minor of the university. In April, 1899, he returned to Providence, to become head of the diocesan Apostolate Band. While still head of the latter, in 1901, he was made pastor of St. Edward's church, Providence, and on 12 March, 1904, he was appointed bishop of the newly erected See of Fall River. His consecration took place in the cathedral, Providence, 1 May, 1904. In the short space of two years and nine months he proved himself to be a zealous, indefatigable worker, and charitable to an extreme. He died 2 February, 1907, in St. Mary's Hospital, Rochester, Minnesota. Bishop Stang was the author of a number of works, notably: "Pastoral Theology" (1896); "Historiographia Ecclesiastica" (1897); "Business Guide for Priests" (1899); "Pepper and Salt" (1901); "Socialism and Christianity" (1905); "Medulla Fundamentalis Theologiae Moralis" (1906). He also left many pamphlets and essays and contributed frequently to the "American Ecclesiastical Review".

DANIEL FRANCIS FEEHAN, the second incumbent of the see, was b. in 1855, at Athol, Massachusetts. His classical and philosophical studies were pursued in St. Mary's College, Montreal, Canada, from which he was graduated in June, 1876. During the three following years he studied theology at St. Joseph's Seminary, Troy, New York, where he was ordained priest 20 December, 1879. Parish work in West Brighton and Fitchburg in the Diocese of Springfield engaged his energies until 1889, when he was made permanent rector of St. Bernard's, Fitchburg. He was in charge there when, on 2 July, 1907, he was appointed second Bishop of Fall River, and consecrated 19 September following.

The diocese has a well-equipped educational system. There are 28 parochial schools with a staff of 191 teachers and an enrolment of 10, 451 pupils, 4464 boys and 5987 girls. There are three convent boarding schools conducted by the Religious of the Holy Union of the Sacred Hearts, the Sisters of St. Dominic, and the Sisters of Jesus and Mary, respectively. A boarding college for boys and young men pursuing classical and commercial courses is under the guidance of the Fathers of the Sacred Heart. The Christian Brothers have a well-established commercial day school with a register of 363 pupils. An industrial school for girls is conducted by the Franciscan Missionary Sisters of Mary.

Charity is also well organized. A large hospital, St. Ann's, at Fall River, is presided over by the Dominican Sisters of Charity of the Presentation. Three orphan asylums directed by the Sisters of Mercy, the Sisters of Charity (Grey Nuns), and the Sisters of St. Francis, respectively, shelter 600 orphans. In connexion with one of these asylums

is maintained a home for the aged. Admirable work has also been done by the St. Vincent de Paul Society.

There are 108 secular and 20 regular priests labouring in the diocese. Of the secular clergy 57 are English-speaking, 30 French-speaking, 15 Portuguese, 5 Poles, and 1 Italian. The Dominican Fathers of the Sacred Hearts, and the Christian Brothers have communities, as also have the Sisters of Charity (Grey Nuns), Dominican Sisters of Charity of the Presentation, Sisters of St. Dominic, Felician Sisters, Franciscan Missionaries of Mary, Sisters of the Holy Ghost, Sisters of Holy Cross and Seven Dolors, Religious of the Holy Union of the Sacred Hearts, Sisters of Jesus and Mary, Sisters of Mercy, Sisters of St. Joseph (Le Puy), and Sisters of St. Francis.

Diocesan Archives, Catholic Directory (Milwaukee, 1908); *Missiones Catholicae* (Rome, 1907); *American College Bulletin* (Louvain), April, 1907, *Catholic Union* (New Bedford, Feb., 1908).

EDWARD J. CARR

Gabriello Fallopio

Gabriello Fallopio

Anatomist, "one of the most important of the many-sided physicians of the sixteenth century" (Haeser); b. at Modena, Italy, 1523; d. 9 October, 1562, at Padua. Some writers have placed his birth as early as 1490, but contemporary authority is for the date mentioned. His family was noble but very poor and it was only by a hard struggle he succeeded in obtaining an education. He studied medicine at Ferrara, at that time one of the best medical schools in Europe. After taking his degree he worked at various medical schools and then became professor of anatomy at Ferrara, in 1548. He was called the next year to Pisa, then the most important university in Italy. In 1551 Fallopio was invited by Cosmo I, Grand Duke of Tuscany, to occupy the chair of anatomy and surgery at Padua. He held also the professorship of botany and was superintendent of the botanical gardens. Though he died when less than forty, he had made his mark on anatomy for all time. This was the golden age of anatomy and Fallopio's contemporaries included such great anatomists as Vesalius, Eustachius, and Columbus. It has sometimes been asserted that he was jealous of certain of the great discoverers in anatomy and that this is the reason for his frequent criticisms and corrections of their work. Haeser, whose authority in medical history is very high, declares that Fallopio was noted for his modesty and deference to his fellow-workers and especially to Vesalius. His purpose in suggesting corrections was the advance of the science of anatomy. Fallopio's own work dealt mainly with the anatomy of the head. He added much to what was known before about the internal ear and described in detail the tympanum and its relations

to the osseous ring in which it is situated. He also described minutely the circular and oval windows (*fenestræ*) and their communication with the vestibule and cochlea. He was the first to point out the connexion between the mastoid cells and the middle ear. His description of the lachrymal passages in the eye was a marked advance on those of his predecessors and he also gave a detailed account of the ethmoid bone and its cells in the nose. His contributions to the anatomy of the bones and muscles were very valuable. It was in myology particularly that he corrected Vesalius. He studied the organs of generation in both sexes, and his description of the canal or tube which leads from the ovary to the uterus attached his name to the structure. Another structure, the little canal through which the facial nerve passes after leaving the auditory, is also called after him the *aquæductus Fallopii*. He was much more than a discoverer in anatomy. His contributions to practical medicine were important. He was the first to use an aural speculum for the diagnosis and treatment of diseases of the ear. His writings on surgical subjects are still of interest. He published two treatises on ulcers and tumors; a treatise on surgery; and a commentary on Hippocrates's book on wounds of the head. His treatise on syphilis is wonderful in anticipation of what is sometimes thought most modern in this subject. Fallopio was also interested in every form of therapeutics. He wrote a treatise on baths and thermal waters, another on simple purgatives, a third on the composition of drugs. None of these works, except his anatomy (Venice, 1561), was published during his lifetime. As we have them they are from the manuscripts of his lectures and notes of his students. They were published by Koyter (Nuremberg, 1575).

Opera Omnia (Venice, 1584); TIRABOSCHI, *Biblioteca degli Scrittori Modenesi*; FISHER, *Annals of the Anatomical and Surgical Society* (Brooklyn, 1880).

JAMES J. WALSH

Vicomte de Falloux du Coudray

Vicomte de Falloux du Coudray

Frédéric Alfred Pierre, Vicomte de Falloux du Coudray

Born at Angers, 7 March, 1811; died there 6 Jan., 1885. Two persons are largely responsible for the moulding of his character, his mother, who was at the court of Louis XVI, and Madame Swetchine, whose "Life and Letters" he later published. The first works by which he drew attention to himself revealed the future statesman as a man of unyielding principles. His "Histoire de Louis XVI" (Paris, 1840) exhibits him as a staunch monarchist; in it he maintains that the needed reforms could have been accomplished by the monarchy without the Revolution. His "Histoire de Saint Pie V" (Paris, 1844) ably sustains the traditional thesis that the Church may use coercion to

prevent the spread of heresy. Nevertheless, in less than ten years this partisan of monarchy took office under President Louis Bonaparte; this defender of the coercive authority of the Church was ranked among "Liberal Catholics". To take advantage of opportunities was henceforth de Falloux's maxim as a practical statesman.

Under the monarchy de Falloux was elected (1846) deputy for Segré on a legitimist platform; in 1848 he was chosen a member of the Constitutional Assembly to represent Maine et Loire, on a platform which supported the social aspirations of the time as compatible with Christian ideas. It was at his suggestion that the Catholic members helped to elect Buchez president of the assembly. To de Falloux, as mouthpiece of the committee charged with the question of investigating the "national workshops", was assigned the perilous duty of proposing their abolition; this measure was followed by the bloody insurrection of June. Those who blame him for this action overlook the fact that he was neither the first nor the only one to insist on this inevitable measure and unjustly attribute to him a Machiavellian scheme by which, in the interest of his religious policy, he sought to goad the advanced parties to compromise their cause by disorder and rioting. As a matter of fact the sight of these excesses brought home to Thiers the necessity of moral restraint as a part of education, and thus led him to collaborate with de Falloux in promoting the educational projects of the latter. Minister of Education from December, 1848, until 31 October, 1849, de Falloux immediately determined to push vigorously against the educational monopoly of the university the campaign which Montalembert had begun during the last years of the July monarchy. As early as 4 Jan., 1849, de Falloux appointed an extra parliamentary commission to further this scheme in the legislature and in June, 1849, while the advanced parties were still smarting under the sense of defeat, he strongly advocated the passage of a law establishing liberty of education. The assembly, however, voted against it, since the bill had not the approval of the Council of State. It was only during the ministry of 1850, in which de Falloux had not a seat, that on 15 March his successor Parieu, with the help of Thiers and Dupanloup, and despite the opposition of Victor Hugo, succeeded in having the law passed. Though de Falloux could not take part in the proceedings on account of ill-health, the law bears his name, and rightly, for it was his work.

The aim of this law was twofold. It dealt with both primary and secondary education. In the first case, to conduct a primary school, a Frenchman had to be at least twenty-one years of age, with three years' experience in an elementary school, or a certificate from a commission appointed by the Minister of Education. For members of religious congregations in girls' schools the *lettres d'obédience* took the place of this certificate. In the second case the law required the candidate to be twenty-five years of age, to have had five years of experience, and a degree of Bachelor of Letters, or a

diploma from a ministerial commission. The new council of the university represented the leading philosophical opinions of France; besides a commission composed of university men proper it included 3 bishops, 1 rabbi, 1 Protestant minister, 3 councillors of the high court of appeals (*cour de cassation*), 3 councillors of state, 3 members of the institute, and 3 members of the board of free education. In two years' time 257 free schools sprang up, and it is from this law, the last remnants of which the French Parliament is now (1908) preparing to abrogate, that dates the development of the Catholic teaching orders in France. In a consistorial address (20 May, 1850) Pius IX praised it as a measure of progress. Those Catholics who opposed, as a matter of principle, all State education were disappointed at the passage of the law, and their views found an ardent exponent in Louis Veuillot. In the Constituent and in the Legislative Assembly, as minister and as deputy, de Falloux always maintained that France was obliged to protect Pius IX as a temporal ruler; he was one of the prime movers of the *expédition de Rome*. During the Second Empire, he withdrew from public life. In 1856 he was elected to the French Academy. In the discussions which took place in royalist circles during the early years of the Third Republic, de Falloux invariably declared in favour of the national flag (the tricolour) and in an article in the "Correspondant" (1873) he insisted that neither as a policy nor as a party cry should the monarchists put forth the idea of a counter-revolution. Spuller, however, declared that because of his conspicuous ability as a statesman de Falloux was one of the most dangerous opponents the Revolutionary party had to encounter during the nineteenth century. It was on the basis of liberty that de Falloux desired to combat the false principles of the Revolution. He believed that politics should take into consideration not only the "thesis" or principle, but also the "hypothesis" or actual conditions, and that certain too extreme formulas or too exacting claims were sure to prejudice rather than help the cause of the Church and the monarchy. The posthumous publication of his "Memoirs" in 1888 revived earlier controversies between the "Correspondant" and the "Univers" and provoked a sharp reply from Eugène Veuillot.

DE FALLOUX, *Mémoires d'un royaliste* (Paris, 1888); DE MAZADE, *L'opposition royaliste: Berryer, Villèle, Falloux* (Paris, 1874); DE LACOMBE, *Les débuts de la loi de 1850* (Paris, 1901); VEUILLOT, *Le comte de Falloux et ses mémoires* (Paris, 1888).

GEORGES GOYAU

False Decretals

False Decretals

(The Decretals of the Pseudo-Isidore)

False Decretals is a name given to certain apocryphal papal letters contained in a collection of canon laws composed about the middle of the ninth century by an author who uses the pseudonym of Isidore Mercator, in the opening preface to the collection. For the student of this collection, the best, indeed the only useful edition, is that of Hinschius, "Decretales Pseudo-Isidorianæ" (Leipzig, 1863). The figures in parenthesis occurring during the course of this article refer the reader to the edition of Hinschius. The name "False Decretals" is sometimes extended to cover not only the papal letters forged by Isidore, and contained in his collection, but the whole collection, although it contains other documents, authentic or apocryphal, written before Isidore's time.

The Collection of Isidore falls under three headings:

(1) A list of sixty apocryphal letters or decrees attributed to the popes from St. Clement (88-97) to Melchiades (311-314) inclusive. Of these sixty letters fifty-eight are forgeries; they begin with a letter from Aurelius of Carthage requesting Pope Damasus (366-384) to send him the letters of his predecessors in the chair of the Apostles; and this is followed by a reply in which Damasus assures Aurelius that the desired letters were being sent. This correspondence was meant to give an air of truth to the false decretals, and was the work of Isidore.

(2) A treatise on the Primitive Church and on the Council of Nicæa, written by Isidore, and followed by the authentic canons of fifty-four councils. It should be remarked, however, that among the canons of the second Council of Seville (page 438) canon vii is an interpolation aimed against *chorepiscopi*.

(3) The letters mainly of thirty-three popes, from Silvester (314-335) to Gregory II (715-731). Of these about thirty letters are forgeries, while all the others are authentic. This is but a very rough description of their contents and touches only on the more salient points of a most intricate literary question.

THEIR APOCRYPHAL CHARACTER

Nowadays every one agrees that these so-called papal letters are forgeries. These documents, to the number of about one hundred, appeared suddenly in the ninth century and are nowhere mentioned before that time. The most ancient Manuscripts of them that we have are from the ninth century, and their method of composition, of which we shall treat later, shows that they were made up of passages and quotations of which we know the sources; and we are thus in a position to prove that the Pseudo-Isidore makes use of documents written long after the times of the popes to whom he attributes them. Thus it happens that popes of the first three centuries are made to quote documents that did not appear until the fourth or fifth century; and later popes up to Gregory I (590-604) are found employing documents dating from the sixth, seventh, and eighth centuries, and the early part of the ninth. Then again there are endless anachronisms. The Middle Ages were deceived by this huge forgery, but during

the Renaissance men of learning and the canonists generally began to recognize the fraud. Two cardinals, John of Torquemada (1468) and Nicholas of Cusa (1464), declared the earlier documents to be forgeries, especially those purporting to be by Clement and Anacletus. Then suspicion began to grow. Erasmus (died 1536) and canonists who had joined the Reformation, such as Charles du Moulin (died 1568), or Catholic canonists like Antoine le Conte (died 1586), and after them the Centuriators of Magdeburg, in 1559, put the question squarely before the learned world. Nevertheless the official edition of the "Corpus Juris", in 1580, upheld the genuineness of the false decretals, many fragments of which are to be found in the "Decretum" of Gratian. As a partial explanation of this it is enough to recall the case of Antonio Agustin (died 1586), the greatest canonist of that period. Agustin seriously doubted the genuineness of the documents, but he never formally repudiated them. He felt he had not sufficient proof at hand, so he simply shirked the difficulty. And it is also to be remembered that, owing to the irritating controversies of the time, anything like an impartial and methodical discussion of such a subject was an utter impossibility. In 1628 the Protestant Blondel published his decisive study, "Pseudo-Isidorus et Turrianus vapulantes". Since then the apocryphal nature of the decretals of Isidore has been an established historical fact. The last of the false decretals that had escaped the keen criticism of Blondel were pointed out by two Catholic priests, the brothers Ballerini, in the eighteenth century.

How the Forgery was done

Isidore was too clever to invent these documents *in toto* out of his own head. For the most part he plagiarized them in substance, and often in form. For the background he made use of certain data such as the "Liber Pontificalis", a chronicle of the popes from St. Peter onward, which was begun at Rome during the first twenty years of the sixth century. For instance, in the "Liber" it is recorded that such a pope issued such a decree that had been lost or mislaid, or perhaps had never existed at all. Isidore seized the opportunity to supply a pontifical letter suitable for the occasion, attributing it to the pope whose name was mentioned in the "Liber". Thus his work had a shadow of historical sanction to back it up. But it was especially in the form of the letters that the forger played the plagiarist. His work is a regular mosaic of phrases stolen from various works written either by clerics or laymen. This network of quotations is computed to number more than 10,000 borrowed phrases, and Isidore succeeded in stringing them together by that loose, easy style of his, in such a way that the many forgeries perpetrated either by him or his assistants have an undeniable family resemblance. Without doubt he was one of the most learned men of his day. From Blondel in the seventeenth century to Hinschius in the nineteenth, even up to quite recently, efforts have been made to discover all the texts made use of in the False Decretals. They make up quite a library. It is clear that the forger could not have had at hand the entire text from which he

drew. He must have been content with extracts, selections, florilegia. But thereon we can only fall back on conjecture.

Isidore might have united the hundred documents he had forged in one single homogeneous collection, which would have been exclusively his work, and then secured its circulation, but, clever man that he was, he chose a different plan. To baffle suspicion he inserted or interpolated all his forgeries in an already existing collection. There was a genuine canonical collection which had been drawn in Spain about 633, and was known as the "Hispana", or Spanish. It contained (cf. Migne, P. L., LXXXIV, 93-848) first of all the texts of the councils from that of Nicæa; secondly the decretals of the popes from Damasus (366-384). Isidore took the volume and prefixed to it the first sixty of his forged decretals from Clement to Miltiades inclusive; these now became the first part of the collection of Isidore. As part II of his collection he retained part I of the Hispana collection, i. e. the genuine collection of councils since Nicæa (325). And as part III of his new volume added part II of the old Hispana, i. e. the genuine pontifical letters since Pope Damasus, but he inserted here and there among them the letters he had forged under the names of the various popes between Damasus and Gregory I (590-604). He was not yet safe, however. So, in order to give a more imposing appearance to the work, he inserted other documents not forged by him, but borrowed bodily from other collections of canon laws. Besides all this he interpolated many additions to authentic documents and added several prefaces to bolster up the fraud. To simplify this description it has been assumed that the forger made use of the unadulterated text of the Hispana. But as a matter of fact he used a French edition, and a very incorrect one at that, of the Hispana, and which was known on that account as the "Hispana Gallica", or French Hispana, which has never been edited, and which is to be found in the Manuscript 411 of the Latin Documents in the Library of Vienna. Furthermore, the forger tampered with the text of this French Hispana, so that his copy becomes, so to speak, a third edition or revision of the old Hispana. This is known as the "Hispana Gallica Augustodunensis", or "of Autun", so called because the Latin Manuscript, 1341, of the Vatican, which contains it, came from Autun. This collection likewise has remained unedited.

The Isidorian collection was published between 847 and 852. On the one hand it must have been published before 852, because Hincmar quotes the false decretal of Stephen I (p. 183) among the statutes of a council (Migne, P. L., CXXV, 775), and on the other hand it cannot have been published before 847, because it makes use of the false capitularies of Benedict Levitas, which were not concluded until after 21 April, 847. As to the place where the Decretals were forged, critics are all agreed that it was somewhere in France. The documents used by the forger, and especially those relating more nearly to his own epoch, are nearly all of French origin. And, as we have already

pointed out, the frame chosen for the forgeries was the French edition of the Hispana. He also makes use of the "Dionysio-Hadriana" collection, which was the code of the Frankish Church, and of the Quesnel collection, which had a French origin. Moreover, he refers to the Councils of Meaux and of Aachen of 836, and to that of Paris of 829, etc. On Legal matters he quotes the "Breviarium" of Alaric. When he refers to civil affairs it is those of France he illustrates by. Lastly, it was in France that his work was first quoted, and there it had its greatest vogue. But while critics are all agreed that the forgery was done in France, they differ very widely when it comes to fixing the locality. Some are in favour of Le Mans and the province of Tours; others incline towards the province of Reims. We shall have occasion to refer to these differences later on; for the present we may be satisfied that the false decretals were forged in the North of France between 847 and 852.

Now, what was the condition of the Church in France at that time? It was but a few brief years after the Treaty of Verdun (843), which had put a definitive close to the Carolingian empire by founding three distinct kingdoms. Christendom was a prey to the onslaught of Normans and Saracens; but on the whole the era of civil strife was over. In ecclesiastical circles Church reform was still spoken of, but hardly hoped for. It was especially after the death of Charlemagne (814) that reform began to be considered, but the abuses to be corrected dated from long before Charlemagne's time, and went back to the very beginnings of the Frankish church under the Merovingians. The personal government of the king or emperor had many serious drawbacks on religious grounds. In the mind of the bishops reform and ecclesiastical liberty were identical, and this liberty they required for their persons as well as for the Church. Doubtless Charlemagne's government had been advantageous to the Church, but it was none the less an oppressive protection and dearly bought. The Church was frankly subject to the State. Initiatives which ought to have been the proper function of the spiritual power were usurped by Charlemagne. He summoned synods and confirmed their decisions. He disposed largely of all church benefices. And in matters of importance ecclesiastical tribunals were presided over by him. While the great emperor lived these inconveniences had their compensating advantages and were tolerated. The Church had a mighty supporter at her back. But as soon as he died the Carolingian dynasty began to show signs of ever-increasing debility, and the Church, bound up with, and subordinate to, the political power, was dragged into the ensuing civil strife and disunion. Church property excited the cupidity of the various factions, each of them wished to use the bishops as tools, and when defeat came the bishops on the vanquished side were exposed to the vengeance of their adversaries. There were charges brought against them, and sentences passed on them, and not canon law, but political exigencies, ruled in the synods. It was the triumph of The lay element in the Church.

Success, even when it came, had its drawbacks. In order to devote themselves to political questions the bishops had to neglect their spiritual duties. They were to be seen more often on the embassies than on visitations. As supplies in their dioceses they had to call in auxiliaries known as *chorepiscopi*. What wonder, then, that these abuses gave rise to complaints? Especially after 829 the bishops were clamouring for ecclesiastical liberty, for legal guarantees, for immunity of church property, for regularity of church administration, for the decrease of the number of *chorepiscopi* and of their privileges. But all in vain; the Carolingian nobles, who profited by these abuses, were opposed to reform. Powerless to better itself, could the Frankish Church count on Rome? At this very time the situation of the papacy was by no means inspiring; the Church at Rome was largely subject to the lay power in the hands of the imperial *missi*. Sergius II (844-847) has not escaped the reproach of Simony. Leo IV (847-855) had to defend his person just like any simple Frankish bishop. In the face of such a wretched situation the juridical prescriptions of Isidore are ideal.

CANON LAW ACCORDING TO THE FALSE DECRETALS

We are not here concerned with the whole collection, but only with the laws contained in the forged documents. At the outset, let it be noted that Isidore's prescriptions have to do with a very limited number of cases and recur over and over again under slightly varying forms. Yet the forger's legal system is far from having any perfect cohesion. Inconsistencies, and even contradictions, are to be met within it. In the following synopsis, which is necessarily short, no notice is taken of these legal stumblings of Isidore; we are content to simply sum up the teachings of the false decretals, under their principal headings.

In matters concerning the relations of the political and ecclesiastical powers, Isidore sets forth the ordinary ideas of his time as to the supremacy of the spiritual over the temporal authority. Of his own authority alone, the ruler cannot assemble a regular synod; he must have pontifical authorization to do so (p. 228). That is a new requirement. A bishop may be neither accused nor condemned before a secular tribunal (pp. 98, 485). The Theodosian Code, from which the forger borrows in this matter, granted the *privilegium fori* only for minor faults. In such matters the Frankish law was not very explicit and was open to various interpretations. What is novel in Isidore is the general character of the law withdrawing bishops from the secular courts. Then again he recognizes in bishops a certain jurisdiction in secular matters. Roman law had already recognized this. He goes on to deal with the immunity of church property, which cannot be diverted from its original purpose without sacrilege. The evangelization of Christendom is a complex story which modern criticism has retold for us, by showing the slow onward march of the Faith. But Isidore's ideas thereon were those of his time, and therefore for the most part legendary. According to him, the organiz-

ation of parishes was laid down by Clement of Rome, as early as the close of the first century, and was to be modelled on the ecclesiastical divisions of Rome and of the catacombs. This meant that dioceses were also a primitive institution, and that metropolitan divisions also existed in primitive times. The Apostles were thought to have accepted the territorial divisions of the Roman Empire, which had been handed down since then as ecclesiastical provinces. There is not much historical basis for such an explanation. It stands to reason that in Isidore we must clearly distinguish between this fantastic view of history and his explanation of hierarchical organization. On all essential points the forger reproduces the current ideas of his time. But he deserves attention when he speaks of chorepiscopi, or those auxiliary bishops we have already referred to. According to him they are usurpers; so far as power of order goes, they have priestly orders and nothing more. Every episcopal function exercised by them is null; all their sacramental acts ought to be reiterated. As a matter of fact, Isidore was wrong; chorepiscopi had full power of order and might validly administer both confirmation and ordination. Isidore forged theology as well as letters. He strongly affirms the authority of the bishops. That is his great concern. With him nothing else counts (pp. 77, 117, 145, 243). The bishop is monarch in his own diocese, but he does not stand alone; bonds unite him to his neighbours, and thus we have the metropolitan idea. The capital of each ecclesiastical province has a juridical right or title to be a centre of assembly for the bishops; this right is derived from the primitive division made by the popes. The province is to be governed by the provincial council, presided over by the metropolitan. On the prerogatives of this dignitary Isidore reproduces the prescriptions of the ancient law prior to the eighth century. After the middle of the eighth century the metropolitans had increased their prerogatives, and Isidore tries to ignore this *de facto* situation; for him nothing counts but canonical texts; the metropolitan is *primus inter pares*, and he can do nothing without the consent of his colleagues. The forger goes on to mention higher jurisdictions, those of primates and of patriarchs. But on these matters he shows but a slight knowledge of church government in Africa and in the East, and we have one of the most glaring examples of his incoherence.

The Authority of the Pope

In the many texts where the pope is in question Isidore is true to his task of plagiarizing. Very often he copies passages borrowed from ancient sources. This fact alone helps in a great measure to explain his insistence on the rights of the papacy. In many cases Isidore is but the mouthpiece repeating the sayings of the earlier popes, and we know how clear and uncompromising those early popes were on the question of their prerogatives. For example, call to mind the popes between Innocent I (401-417) and Hormisdas (514-523) and the series of their declarations. All that was well known in

the ninth century, at least in theory. And it was all embodied by Isidore. But on the relations between pope and bishops he shows a certain inconsistency. Following the traditional teaching, he declares that the Apostolate and the episcopate were directly instituted by Jesus Christ. Yet at times he seems to be on the point of denying the *potestas ordinaria* of the bishops. He makes Pope Vigilius (p. 712) say: "Ipsa namque ecclesia quæ prima est ita reliquis ecclesiis vices suas credidit largiendas ut in partem sint vocatæ sollicitudinis non in plenitudinem potestatis."

Taking this passage strictly and by itself, it would seem to deny the *potestas ordinaria* of the bishops. But nevertheless the sentence is not an intentional forgery; it is merely another case where Isidore is a plagiarist. He had got hold of a famous text by St. Leo (Migne, P. L., LIV, 671), addressed to the Bishop of Thessalonica. From the end of the fourth century this bishop had been named by the popes as their representative in the province of Illyricum. Hence the Bishop of Thessalonica exercised by delegation certain rights belonging to the popes in these countries by reason of their title of Patriarch of the West. About 446, St. Leo had to find fault with the Bishop of Thessalonica, not in his character of bishop, but as legate, or vicar, of the Holy See. And on that occasion the pope pointed out to his vicar in Illyricum that he had received merely a partial delegation, not a plenitude of power. It is clear, then, that the text in question referred to a peculiar relation between the pope and a special bishop. Addressed to the vicar of Illyricum, St. Leo's words are quite accurate; but, applied to all bishops, they cease to be so, and might easily create much confusion. Isidore further demands that provincial councils be held at regular intervals. He asserts for the pope the right to authorize the calling of all councils and to approve their decisions. Laid down in this general and imperative manner, these claims were something new. Nothing like it had been of obligation for the holding of provincial councils; as for approving of the decrees of councils, it was a common occurrence in antiquity. When matters of serious importance were in question the popes claimed the right of approval, but there was no formal or general precept asserting such right. And in any case Isidore's legislation thereon never became the practice.

Ecclesiastical Trials

The procedure to be followed in the trial of ecclesiastics is of special interest to Isidore. According to him, the judging of clerics of all ranks up to and including the priesthood belongs as a last resource to the provincial councils and the primates. He says nothing about priests appealing to Rome, and in this he agrees with the fourteenth canon of the Council of Sardica. Apropos of the trials of bishops he shows some inconsistency in his legislation. On the one hand, he upholds the law as it existed prior to his time, and on the other hands he lays down a new law. Hence we find two series of texts which it is not easy to reconcile. The first series agrees with the existing law. A

provincial council is the ordinary judge of bishops. The pope interferes only on appeal made to him by one of the interested parties. However, in the case where the impartiality of the judge is seriously doubtful, the bishop need not wait for the council to pass sentence, but may take his case straight to Rome. Stated in this general way, the latter provision is new. But as it is based on the idea of plain justice, it is not altogether foreign to the ancient ecclesiastical law. It was expressly mentioned in Roman law, from which Isidore borrowed it. How may the pope set about hearing an appeal? The ancient law did not exclude, but did not make provision for, sentence being passed at Rome itself. It recognized the pope's right to appoint a court of appeal composed of bishops from the neighbourhood of the accused; furthermore, he had the right to be represented there by a legate, who would naturally have a preponderating rôle at the trial. Such were the rulings of the Council of Sardica. But as a matter of fact, from the fifth century we have cases where the pope summoned episcopal appeals to be heard in Rome itself. So it is not a great surprise that Isidore should leave the pope free to decide where the final trial should take place. But, as we pointed out, side by side with this first series of decisions along the lines of the ancient law, we find another series which lays down a new law. Therein it is said that in the trial of bishops, the function of the provincial council is limited to hearing both sides of the case and referring it to the pope for judgment. Sentence can only be passed with his approbation. This is new legislation. But once more Isidore is not really inventing; he is merely giving clear and direct expression to the tendencies of his day. In face of the dangers created for the bishops by political disturbances, by the fear of being condemned for party feeling or through motives of revenge, the bishops themselves were eager that charges against them should not be decided without the approval of the pope.

One of the most characteristic peculiarities of the false decretals is the procedure laid down for the trial of bishops. Isidore declares over and over that it was the will of the Apostles that there be as few charges as possible made against bishops, and that, when there are any, their trial should be made as difficult as possible. This is a point worth remembering. The accusation of bishops will be a difficult thing, their defence an easy matter. Isidore's legislation on this head, when systematized, so efficaciously hindered any judicial action against a bishop that the reader is almost inclined to treat it as a joke. However, we must be just; it was not all an invention on Isidore's part. His procedure in the main reproduces the requirements of Roman law; it draws on the decisions of the Roman apocrypha of the time of Symmachus (498-514), and it levies tribute from the laws of the Barbarian kingdoms. In a case of this kind, anything like a careful and thorough criticism requires that great attention be paid to the question of the sources employed. Isidore piles up obstacles against the accusation of bishops, but the obstacles are not all of Isidore's own devising. Any bishop dispossessed of his

see by violence, and who is summoned to the courts, has a right to raise the plea of *actio spolia*, i. e. to fall back on the fact of dispossession in order to avoid trial, until he has been provisionally restored to his possessions and dignities. This appeal before trial is one of the main points in the Isidorian procedure. The only one who is competent to bring a charge against a bishop is the council of his province. Foreign tribunals are excluded, and the provincial council must have a full quorum. The charge must be made in the presence of accused and accusers. If one of the interested parties absconds, the whole judicial machine comes to a standstill.

The following are the rules governing accusations. A layman can bring no charge against a bishop. This rule, which occurs also in the Roman apocrypha of the time of Symmachus, may be explained by the different judicial status of clerics and laymen at the time of Isidore. Clerics were judged according to Roman law, whereas many laymen were subject to Germanic law, and the procedure under these two laws was different and even hostile. Moreover, at times laymen would not recognize clerics as having the rights to accuse them in the courts; and thus the clerics might well declare laymen incompetent in their courts. Then, too, it must not be lost sight of that Isidore's principle was never observed in practice; a *modus agendi* was always found. Isidore's second principle was that a cleric could never bring a charge against his superior. It is evident that thus the number of possible accusers became very restricted. The accusation must be made not in writing, but by word of mouth. Only those might bring charges who fulfilled exceptional conditions in respect to rank and standing. In this way it was easy to get rid of a troublesome accuser. The witnesses must be of equal merit with the accuser, and it took seventy-two witnesses to condemn a bishop. This again is not an invention of Isidore's. It was an old custom that a bishop might only be condemned by a council of seventy or seventy-two bishops. The numbers are an allusion either to the seventy elders of the Jewish people or to the Seventy-Two Disciples. But Isidore managed to complicate the situation by applying the number to the witnesses; though even if it were applied to the judges, the difficulty would not be lessened in practice. It was no easy matter to get together so numerous a tribunal. In the ninth century Photius declared that these two traditional numbers were not necessary; in any case Isidore's legislation was never enforced. The hearing of the charge follows Roman law, and minute regulations were drawn up to secure all the necessary scope and impartiality to the arguments for and against. Any admission of guilt had to be absolutely spontaneous, and no signature obtained by force was valid.

In his preface Isidore declares the purpose of his work. His aim is to build up a collection of canons more complete than any other by uniting together all the canons dispersed among the various existing collections. What must we think of this declaration? There is some truth in it, but his collection takes on a character all its own by the

fact that it includes a hundred documents forged in Isidore's workshop. He might easily have made that more complete collection, without having recourse to forging documents for it. And, as a matter of fact, is his collection more complete than any other? Even a summary examination soon shows that there are many lacunæ in this collection of Canon law. It omits all mention of many important matters, governing of rural parishes, ecclesiastical benefices, tithes, simony, the monastic life, questions concerning the matrimonial laws, privileges and dispensations, and the pallium. The governing of parishes and the question of benefices were of vital interest when Isidore lived. Though not quite so acute as during the tenth and eleventh centuries, these points of law became occasions of conflict between the Church and the feudal society in progress of formation. They were already preoccupying men's minds, and as Isidore does not refer to them he can hardly claim to have wished to supply a complete ecclesiastical code. So we are driven to conclude that he had a very special object in view in composing his partial code. How are we to discover what this object was? Evidently by examining the documents he forged. There, if at all, are to be found his dominant ideas. And such an examination is by no means difficult after what we have just said concerning the legal side of the false decretals. Isidore's object is so clearly defined that it requires no very laboured analysis to discover it. His chief aim is to assure the dignity and fruitfulness of the episcopal office. In his view the diocese is the life-giving centre of the whole ecclesiastical organism, and the vitality of this centre is his chief concern. All his legislation has this same object. But perhaps it may be argued that, while he is indeed concerned to safeguard the authority of the bishops, he is even more careful to increase that of the pope. This was a view long in favour among both Gallicans and Protestants, but it is no longer the fashion. In our day critics are, on the whole, agreed that the immediate object of Isidore was to win respect for the episcopal authority. If he touches on the prerogatives of the pope, it is never in the interests of Rome, but always in those of the bishops. It was for this that he tried to facilitate appeals to Rome. But in his idea the rôle to be played by the pope would not restrict the rights of the bishops. It has been observed that Isidore does not mention the temporal power of the popes, and that he never thinks of turning to profit Constantine's pretended donation to the Church of Rome, nor does he seem to aim at increasing the French protectorate at Rome. Yet if his object had been to favour the Holy See, how differently would he have gone to work. Now, if we compare these aims of Isidore with the actual situation of the Frankish Church when the forger was at work, between the years 847 and 852, it will be evident that false decretals are directly opposed to the chief abuses of which the bishops were the victims at that time: condemnations of a political character, neglect of the episcopal office and the establishment of chorepiscopi. This explains the lacunæ in Isidore's ecclesiastical code. He was fighting against urgent and glaring

abuses. A contemporary is always at a disadvantage in forming a clear opinion of his age, of those deep causes of which the slow but measured action must inevitably transform society. And hence it was that Isidore confined himself to things that were more or less on the surface in the everyday life around him. If he foresaw other dangers in the path of the Church, he certainly made no attempt to provide against them.

It remains true, however, that Isidore was a forger. But there are forgers and forgers. Let us not forget that the false decretals are from the same workshop that forged the capitularies of Angibramne (Angilram) and the false capitularies of Benedictus Levita. When the capitularies had been forged it was but a natural step to the forging of pontifical letters. For this new work Isidore owed much to the "Liber Pontificalis", or chronicle of the popes. Thus when the Liber tells us that such a pope issued such a decree long since lost, the forger noted the fact and set to work to invent a decree for his collection along the lines hinted at by the "Liber". This is a method well known in diplomatic work, and one that has left us the *acta rescripta*, of which we have many specimens in ancient charters. These *acta rescripta* are documents which, at a date long subsequent to that they bear, and because the originals or ancient copies of them had been damaged or lost, were drawn up by the aid of the remnants of the originals, or from extracts therefrom, or analyses of them, or at times from mere tradition concerning their contents (cf. Giry, "Manuel de diplomatique", Paris, 1894, pp. 12, 867, etc.). In Isidore's opinion many of the false decretals were merely such *acta rescripta*. It was not a very honest proceeding, and Isidore was far from being scrupulous. With a faint modification it might be said of him as of another forger in the seventeenth century, the crafty Father Jérôme Vignier, "He was the greatest liar in Paris." But men of the ninth century must not be judged according to modern ideas of literary morality. Neither can the false decretals be looked at as a purely literary work. They are a landmark in the evolution of law. In every society law develops or evolves itself like other things, but under conditions of its own, and step by step with the social life it regulates, and which it must keep pace with in order to regulate. The state of society, the ensemble of its customs, change more or less according to time and place, and are never stationary. And slight changes, when multiplied to any degree, end by causing a chasm between former legislation and the newly born needs of a changed society. The written laws no longer meet the requirements of the social state they ought to regulate, and a readjustment of legal provisions becomes necessary. History shows us that this may take place in many ways, according to the nature of the desired change and the surroundings in which it takes place. It may be effected by the gradual substitution of new laws for those that have grown antiquated or, less courageously, by what is known as a creative interpretation of existing laws, of which we have many examples in Roman law; and again, in desperate cases, the change may be brought about by

forgeries, when no other means seems practicable. Now, in the middle of the ninth century, the rules of canonical legislation did not seem to be the best possible to meet the existing state of ecclesiastical affairs. The reform councils of the ninth century had tried to bring about the new laws demanded by the situation, but the lay power had blocked the way. And thus the evolution of law, finding an obstacle to its growth on one side, was constrained to seek freedom on another. Unable to advance in normal fashion, a canonist whose intentions were more commendable than his acts bethought him of calling in the aid of the forger. It is impossible to condone such forgeries, but the history of the case puts us in a better position to judge them, and even to discover extenuating circumstances in their favour, by emphasizing the powerful forces at work in the society of the period, and which were acting with what one may call historical fatalism. Moreover, the false decretals are the work of private enterprise and have no official character. The theory that they were planned in Italy has been long since abandoned. They are of purely Gallican origin, and if they deceived the Church, the Church accepted them in good faith and without any complicity.

THE SPREAD

We saw above, in the case of Hincmar, that Isidore's forgeries were known among the Franks as early as 852. In Germany we hear of them a little later. We find traces of them in the Acts of the councils of Germany dating from that of Worms in 868, but in Spain we find no reference to them, and they seem to have been hardly known there. They found their way into England towards the close of the eleventh century, probably through Lanfranc, Archbishop of Canterbury. Their reception in Italy is of greater importance. It occurred probably during the pontificate of Nicholas I (858-867). It seems certain that he knew of the decretals, and it is possible that he may have even possessed a copy of them, and showed proof of this on the occasion of the appeal to Rome made by Bishop Rothade of Soissons, who had got into difficulties with his metropolitan, Hincmar of Reims. Rothade reached Rome about the middle of 864. He had already caused his appeal to be presented to the pope, but he now explained his case in detail. It was to his interest to quote the authority of the false decretals, and he did not fail to do so. This is proved by a Letter written by Nicholas I on 22 January, 865, dealing with Rothade's appeal. Pope Adrian II (867-872) was acquainted with them, and in a letter dated 26 December, 871, he approves of the translation of Actard, Bishop of Nantes, to the metropolitan See of Tours, and quotes apropos one of the false decretals. Quotations made by Stephen V (885-891) are not conclusive proof that he directly used Isidore's text; and the same may be said of occasional references to it during the tenth century, which occur in the letters of the popes or of the papal legates. However, other authors in Italy show less reserve in using the false decretals. Thus, at the end of the ninth and the beginning of the tenth century they are quoted by Auxilius

in the treatises he wrote in defence of the ordinations performed by Pope Formosus (891-896). It is true that Auxilius was born among the Franks, as was also Rathier, Bishop of Verona, who likewise quotes Isidore. Attone of Vercelli, however, was an Italian, and he quotes him. At the end of the ninth century and during the tenth, extracts from the false decretals begin to be included in canon law collections — in the collection dedicated to Bishop Anselm of Milan, in the Réginon collection about 906, among the decrees of Burchard, Bishop of Worms. Nevertheless, until the middle of the eleventh century the false decretals did not obtain an official footing in ecclesiastical legislation. They were nothing more than a collection made in Gaul, and it was only under Leo IX (1048-1054) that they took firm hold at Rome. When the Bishop of Toul became pope and began the reform of the Church by reforming the Roman Curia, he carried with him to Rome the apocryphal collection. Anselm of Lucca, the friend and adviser of Gregory VII, composed an extensive collection of canons among which those of Isidore figure largely. The same thing happened in the case of Cardinal Deusdedit's collection made about the same time. And finally, when in 1140 Gratian wrote his "Decree" he borrowed extensively from Isidore's collection. In such manner it gained an important place in schools of law and jurisprudence. It is true that the Gratian collection had never the sanction of being the official text of ecclesiastical law, but it became the textbook of the schools of the twelfth century, and, even with the false decretals added to it, it retained a place of honour with the faculty of canon law. It was it that supplied the text of the "everyday" instructor on the things most essential to be known. And the faculty of law styled itself faculty of the Decree; which shows how important a place in the schools was given to the Isidorian texts inserted in the decretals.

INFLUENCE

For a long time the Gallicans and the Protestants dwelt on the innovation contained in these apocrypha and on the rights, altogether novel, which they conferred on the popes and which would never have come to pass had it not been for these forgeries. Nowadays Isidore's aim is understood to have been quite different. His chief concern was to defend the bishops; and if the papacy profited by what he did, it can be shown that it was a necessary consequence of the pope's being made the champion of the bishop. And even though it must be admitted that the popes benefited by the forgeries, their good faith is beyond question. Isidore wrote a long way off from Rome; he deceived his own neighbours in France, and among them the learned Hincmar of Reims. What wonder, then, that he deceived the popes also, when his work was carried to Rome by Rothade of Soissons about the summer of 864? It is true that some have hinted that Nicholas I erred against truthfulness; that he pretended that the Isidorian texts were contained in the archives of the Roman Church, an assertion not only inexact but untruthful (Migne, P. L., CXIX, 901). But as a matter of fact his words do not ne-

cessarily mean that at all. What he does say refers equally to the authentic decretals not included in the Dionysio-Hadriana collection. On the dubious interpretation of an obscure text it is not fair to bring a charge of untruthfulness against a man of character like Nicholas I. And if an unfavourable interpretation be accepted as the real one, the blame falls on the draftsman of the pontifical letters, the famous Anastasius the Librarian. Another reason for not impugning the honesty of Nicholas I under the circumstances is that he was under no necessity; he had no interest in approving of Isidore's letters. Indeed, he is much more reserved in his treatment of them than the Frankish bishops were at that very time. In that very letter of 22 January, 865, he points out to them their inconsistency, how, when it is to their own interest, they quote the letters of the early popes (i. e. Isidore's forgeries), and when the letters are unfavourable to them, they repudiate them. We saw above that according to Isidore's judicial system a bishop dispossessed of his see by violence and then haled to the courts had the right to plead the fact of dispossession in order to escape appearing before the courts, and that he must first be provisionally restored to his possessions and honours so as to arrange properly for his defence. No doubt Isidore had not invented all this. Roman law and canon law supplied him with precedents and even laws for it. But he made such procedure an essential factor in canon law. And it is an undoubted fact that from the year 864, in cases such as the one we refer to, Isidore's ideas and expressions exercised a marked influence on the conduct and decisions of Nicholas I. There is nothing calling for adverse criticism in all this as far as Nicholas is concerned. As a piece of legislation it was altogether in favour of the bishops. From another point of view it is important to consider whether, in the appeals of bishops to Rome, the conduct of Nicholas I was really influenced by Isidore's forgeries.

What we have already said concerning the forger's objects and aims limits the bearing of this question to a great extent. As a piece of general hard and fast legislation, Isidore's method of procedure was quite new. But the practice of the popes and the custom of the ecclesiastical courts supplied precedents which more or less bore out the principles laid down by Isidore. Hence we see that if Nicholas I made use of the apocrypha to justify his teaching on appeals to Rome, we must necessarily admit that he relied on a forged document; but even then we should not be obliged to admit that he was influenced by teaching altogether foreign to ecclesiastical antiquity, but only that by means of Isidore he was put in touch with teaching closely resembling that of St. Leo and of Gelasius I, two popes of the fifth century. And, as a matter of fact, did Nicholas I gain his teaching concerning appeals from these apocrypha? We have no proof whatever that he did. His firm and solid conviction of the rights of the Holy See had nothing to learn from the weak inventions of a forger among the Franks; he had learned those rights in the school of Roman traditions dating from the fifth and sixth

centuries. We can admit that, while the pope's contention is justified, the arguments with which he supports it are at times open to attack. Thus, in a letter addressed to the Council of Soissons in 863, he wishes to assert his right to intervene in the trials of bishops, even when there was no question of an appeal to Rome. This amounted to an assertion of the absolute power of the Holy See, a claim he might have supported by many solid arguments; yet what is our surprise to find him claiming in support thereof the canons of the Council of Sardica, which say nothing of the sort. The Council of Sardica (343) intended very particularly to safeguard the legal rights of bishops who were being persecuted; that was its main object, and it by no means intended to define the rights of Rome in matters of the kind. These canons mark one of the early steps in the question of church discipline.

The claim of Nicholas I ought to have been supported by texts from the fifth and sixth centuries; and in the case in question his object was much more creditable than the reasons he gave in support of it. On the whole, then, from the beginning of his pontificate, and before he knew of the Isidorian texts, Nicholas I was in full sympathy with the ideas expressed therein. Acquaintance with those texts did not seriously affect him. Yet, in his letter to the Frankish bishops, dated 22 January, 865, apropos of Rothade, he puts the theory on appeals much after the manner in which Isidore had put it; so much so, that one writer speaks of the *parfum isidorien* that letter exhales (Fournier). If the letters of the early popes (i. e. the decretals of Isidore) are not explicitly quoted, they are at least alluded to. But from all that has been said we must conclude that Nicholas I took none of his essential ideas from Isidore, and that any influence he did exercise on that pope was too insignificant to be taken into account in a pontificate so filled with enterprises of daring and of moment. And this conclusion in Nicholas's case gives us more or less the answer to the further question as to how far the apocrypha influence the subsequent history of the Church. As we have seen, even without Isidore, Nicholas I would have brought about the same mode of government. And it has been well said that the principles of Nicholas I were those of Gregory VII and of the great popes of the Middle Ages; that is to say, Isidore or no Isidore, Gregory VII and Innocent III would not have acted otherwise than they did. As a matter of history, such a conclusion is quite justifiable, and as far as apologetics go it is quite sufficient answer. In the domain of theology and canon law, Isidore's forgeries never had any serious consequences.

Having said this, we are free to confess frankly that in lesser spheres than those of theology and law, the false decretals have not always exercised a fortunate influence. On history, for instance, their influence was baneful. No doubt they do not bear all the blame for the distorted and Legendary view the Middle Ages had of ecclesiastical antiquity. During the Middle Ages it was almost an impossibility to consult all the

sources of information, and it was difficult to check and control those at hand. It was not easy to distinguish genuine documents from apocryphal ones. And this difficulty, which was the great stumbling-block of medieval culture, would have been always an obstacle to the progress of historical study. It must be admitted that Isidore's forgeries increased the difficulty till it became almost insurmountable. The forgeries blurred the whole historical perspective. Customs and methods proper to the ninth century stood out in relief side by side with the discipline of the first centuries of the Church. And, as a consequence, the Middle Ages knew very little concerning the historical growth of the rights of the papacy during those first centuries. Its view of antiquity was a very simple one, and perhaps it was just as well for the systematizing of theology. In the main, it was no easy matter to develop a historical sense during the Middle Ages. The absence of such a sense is all the more remarkable when we consider what civilization owes the Middle Ages in the realms of philosophy, theology, and architecture.

PLACE OF ORIGIN

We have purposely reserved this question for the end. In the first place, it is of lesser importance than the others; and in the second, whereas critics are for the most part in agreement concerning the questions we have been treating, they are divided into two parties on this final question. For a time the decretals were thought to have been forged at Mainz, but that theory has been altogether abandoned, and now the disputed honour lies between Reims and Le Mans in the province of Tours. Here are the arguments put forth on both sides. The majority of German critics and a section of those in France favour Reims as the place where the decretals originated. According to them, Isidore's legislation concerning the trial of bishops was intended to support the cause of Ebbon, Archbishop of Reims, and to facilitate the retrial of that dignitary. Ebbon had been deposed in 835 for political reasons. He was reinstated at Reims in 840; he had to leave his see in 845 and ended his career in 851 as Bishop of Hildesheim. According to the critics, a comparison between his case and Isidore's procedure at trials shows such agreement that it must have been intentional; thus, for instance, the provisional restoration of the accused and dispossessed bishop, the arrest of the bishop, the possibility of a translation from one see to another (from Reims to Hildesheim). Besides this, it was in the province of Reims the forgeries first appeared, and from there they were carried to Rome by Rothade of Soissons; then, too, it was in this same diocese that, ever since Ebbon's time, the struggle against chorepiscopi was most intense. Isidore's opposition to archiepiscopal authority is also very marked; and, according to the critics, the province of Reims was the birthplace of that opposition during the years that intervened between Ebbon's deposition (838-841) and Hincmar's nomination (845); hence the conclusion that the forgeries were committed between 847 and 852 by partisans of Ebbon, and probably by clerics ordained by him in 841, and against

whose ordination Hincmar, Ebbon's successor, raised objections soon after his election. This cumulative mass of argument is impressive; but to be really conclusive it would be necessary to prove that Isidore's legislation was invoked by these clerics against their archbishop, before his death in 851 or at least before 853, when the Council of Soissons was held, in which the ordinations held by Ebbon at Reims in 841 after his restoration were declared invalid. No such proof is forthcoming. The documents in favour of Ebbon in which is discovered a similarity to the teaching of the apocrypha are later than 853. At that time Isidore's work had begun to spread. That it was known and used at Reims after 853 is not at all surprising and is no proof of its having been composed in the Province of Reims. Furthermore, if these apocrypha had been composed in favour of Ebbon and of the clerics he ordained, then the question of the validity of ordinations performed by a deposed bishop ought to have been treated of. Yet not a word is said concerning it; though, on the other hand, Isidore submits all questions concerning clerics up to and including priests to the metropolitan council and to the primates. No mention is made of an appeal by priests to Rome, an omission that is inexplicable if the documents were written in favour of the clerics ordained by Ebbon, and who are supposed to have been the actual writers. Add to this that the period 847-852, when the forgery was committed, was for the clerics of Reims, Ebbon's partisans, a period pending appeal and a time of *entente* with Hincmar. or t e moment, they had no reason to need such a weapon against the archbishop. Lastly, P. Fournier points out that the theory which makes Reims the scene of the forgery in opposition to Hincmar is at variance with what we know of Hincmar's attitude. If Hincmar had the faintest suspicion that the decretals were aimed at him, he would have treated them differently. Though he had a suspicion that one or other document had been forged in part, he offered no objection to the collection as a whole. But it is certain that he would have spared no pains to discredit a code intended as a weapon against him. On the whole, then, this theory is an attractive one; but while no solid proof can be brought in its favour, many solid arguments can be brought against it.

There is another set of critics who fix on the province of Tours and the neighbourhood of Le Mans as the scene of the forgery. The principal among these critics are Langen, Döllinger, M. M. Simson, Viollet, J. Havet, P. Fournier and L. Duchesne. According to them, the forged legislation on the trial of bishops and the organization of dioceses and ecclesiastical provinces aim at a state of things existing in Brittany after 845, when Noménoé, Duke of Brittany, gained a victory over Charles the Bald. At that time Brittany was eager for independence, in the ecclesiastical as well as in the civil order. The bishoprics in Brittany were subject to the metropolitan of Tours, and the Carolingian sovereigns clung to this ecclesiastical subjection as a pledge of political subordination. On the other hand, the Duke of Brittany was anxious to get rid of four

bishops whom he suspected of favouring the Franks. He gave them a quick trial and expelled them from his domains. The affair was carried to Rome, and about 847 Leo II wrote a letter to the Duke of Brittany reminding him of the claims of Canon law. The whole thing caused much commotion among the Franks and at Rome. As it was a matter of public knowledge, and more or less contemporary with the appearance of the decretals, nearly all the critics are agreed that Isidore had this affair in his mind when he wrote, and that many of his laws presupposed some such state of affairs as existed in the province of Tours and the Church of Brittany. These are only appearances, however, and we want precise proofs, something more definite. Now the critics in question think they recognize a family likeness between two documents which were certainly written at Le Mans and the decretals of Isidore. The first of these is the apocryphal Bull of Pope Gregory IV (827-844) in favour of Aldric, Bishop of Le Mans. In this letter (Migne, P. L., CVI, 853) the pope recognizes the right of the Bishop of Le Mans to take his case to Rome whenever a charge is brought against him. The letter is supposed to have been written on 8 July, 833. It is quite after Isidore's own heart; and its style is wonderfully similar to that of the forger. The forged Bull of Gregory IV is a mosaic of authentic texts, and very often they are texts which Isidore used over and over again.

The critics are all agreed that this forged Bull and the decretals are independent documents; that is, that neither makes use of the other. But the critics we are now considering maintain that both come from the same workshop; that they are alike in materials and methods of composition. And they further point out the closeness of their dates. The forged Bull was certainly drawn up at Le Mans, they say, about 850, when Le Mans was in the hands of the Duke of Brittany. The bishop, who favoured the Franks, was in a sorry plight; and to protect him the Bull of Gregory IV was forged. We are certainly very near now to the date of the decretals, and the family likeness between the documents would be explained by the identity of their origin. The same critics argue in the same way in the case of a memoir or story of a dispute that took place in 838 between Aldric, Bishop of Le Mans and the Abbey of St-Calais (Migne, P. L., CXV, 81-82). During the course of the trial the authority of the canons is quoted after the manner of Isidore, i.e. in mosaic-fashion made up of those fragmentary passages Isidore was so fond of using. And this document belongs to the years between 842 and 846. We are still at Le Mans and about the period when the decretals appeared. Moreover, it is a fact that there were chorepiscopi at Le Mans at this time. Now, what are we to think of these arguments? They are not without value, but not all their assumptions are beyond question. Thus, we have no proof that the forged Bull of Gregory IV was written during the lifetime of Aldric. The present writer is of the opinion that it was after his time and as a support to Robert of Le Mans, successor to Aldric, in his

quarrel with the monks of St-Calais. But the question as to the date of the Bull is merely a secondary one. The most important argument is the existence at Le Mans, about the very time when the decretals were forged, not of a document, but of two documents concocted in the very style of the forger Isidore. And there seems reason to believe that Le Mans has most claim to being the scene of the forgery of the decretals. In the interests of fairness we must, however, say one thing. As we have seen, the knowledge of the decretals shown by Pope Nicholas I dates from the visit to Rothade to Rome in 864. It is a matter, for us, of some surprise, since in the previous year the same pope had to deal with the appeal of Bishop Robert of Le Mans, successor of Aldric. If the false decretals were forged at Le Mans, how comes it that Bishop Robert did not use them exactly as Bishop Rothade of Soissons did one year later? It is true that in his letter of 22 January, 865, Nicholas I declares that the Frankish bishops appeal to the decrees of the early popes (i. e. the decretals of Isidore). And it may be that Bishop Robert of Le Mans is included in this generalization.

MANUSCRIPTS AND EDITIONS

The Manuscripts of the false decretals belong to many classes, but we shall mention only three, which serve to show us how the work spread. The first class comprises twenty-five Manuscripts. Although all of them are incomplete, yet we are able to restore the full text from them, i. e. the text of the canonical collection described above, and restored in the edition of Hinschius. A second class of Manuscripts contains only a part of Isidore's work. This class comprises eighteen Manuscripts, which give Part I of the collection, i. e. the apocryphal decretals up to Melchiades, but omit Part II, and give only a portion of Part III. These Manuscripts cease at page 508 of the edition of Hinschius. Everything leads to the belief that the Manuscripts of this second class are merely extracts from the first. A third class of Manuscripts is represented only by number 1341 of the Latin Manuscripts in the Vatican Library. This Manuscript contains the "Collectio Hispana Gallica Augustodunensis", of which we have already spoken. This collection may be looked on as a first edition, a trial edition of the false decretals. It does not contain Part I, i. e. the apocryphal decretals from Clement to Melchiades, but only those parts which correspond to the genuine Hispana, namely the councils and the decretals of the popes from Damasus. In this latter part the forger has interpolated some of his apocrypha which later found their way into the completed edition of the false decretals. The principal of these apocrypha are to be found on pages 501-508 and 509-515 of the edition of Hinschius. It should be remembered that the Hinschius edition is a critical edition; i. e. one edited after a thorough study of the manuscripts of the forged texts. The text of the genuine documents has not been subjected to any criticism, the editor contenting himself with reproducing it just as he found it in already extant collections, that is to say, existing previous to Isidore's treatment of them.

An endless number of books have been written on this subject, but we give here those that are indispensable and that sum up all others of importance. The *Preface* to the edition of HINSCHIUS; SECKEL, *Pseudoisidor in Realencyck. für prof. Theol. und Kirche*; FOURNIER, *Etudes sur les fausses décrétales* in *Revue d'histoire eccl.*, VII (Louvain, 1906), pp. 33-51; 301-16; 543-64; 761-784; VIII (1907). pp. 19-56.

LOUIS SALTET

Falsity

Falsity

(Lat. *Falsitas*.)

A perversion of truth originating in the deceitfulness of one party, and culminating in the damage of another party. Counterfeiting money, or attempting to coin genuine legal tender without due authorization; tampering with wills, codicils, or such-like legal instruments; prying into the correspondence of others to their prejudice; using false weights and measures, adulterating merchandise, so as to render saleable what purchasers would otherwise never buy, or so as to derive larger profits from goods otherwise marketable only at lower figures; bribing judges, suborning witnesses; advancing false testimony; manufacturing spurious seals; forging signatures; padding accounts; interpolating the texts of legal enactments; and sharing in the pretended birth of supposititious offspring are among the chief forms which this crime assumes. The punishment determined by the laws of former times for those convicted of it could scarcely savour of greater severity, or awaken a deeper horror of the crime itself. In the first place, the Roman law inflicted the death penalty on such evil-doers as were found guilty of falsifying imperial rescripts. Traces of this kind of legislation are still to be found in the Bull of Pius IX, "Apostolicae Sedis", wherein the Holy See promulgates the sentence of excommunication specially reserved to the sovereign pontiff against all who dare to forge or interpolate Bulls, Briefs, and Rescripts of all kinds formulated in the name of the Holy Father, and signed either by the pope personally, by his vice-chancellor personally, or by his vice-chancellor's proxy, or by some other individual specially commissioned thereunto by the sovereign pontiff himself.

Moreover, whosoever are guilty of publishing surreptitious or supposititious papal Bulls, Briefs, or Rescripts, of the kind already specified, render themselves amenable to the same ecclesiastical penalty. This sentence of excommunication takes effect as soon as the work of falsification becomes an accomplished fact, even though the false letters never pass into actual use. At the same time it must be noted, in passing, that as often as there is question of forging Apostolic Letters, the censure is not incurred prior to the actual publication of such letters. Those who are guilty, not of falsifying

Apostolic Letters, but of deliberately using such as are already forged or interpolated, or of co-operating in such traffic, incur the censure of excommunication reserved to the ordinary of the diocese. According to D'Annibale (Commentary on the Constitution "Apostolicae Sedis, n.81) those who retain forged or interpolated Apostolic Letters in their possession, those who order the production of such letters, their advisers, abettors, or co-operators, are not liable to the sentence of excommunication.

In cases other than those here outlined, the enormity of the crime was emphasized by the civil law in confiscating the property of culprits and condemning them to perpetual exile. Though time has by no means lessened the intrinsic heinousness of the crime itself, it has witnessed considerable mitigation in the penalty thereunto attached; the discretion of the judge hearing the case is now the chief factor in determining the nature and the extent of punishment. While vicissitudes of time and place may suggest the expediency of modifications in the exigencies of positive law, there still remains an obligation which conscience always imposes on those guilty of this crime, an obligation founded in justice, and therefore quite independent of changes occurring in time or place. For this reason it is right to claim that as soon as the actual perpetration of this disorder begets injury to another party, the perpetrator of such damage is strictly bound in conscience to make good all such losses caused, or occasioned, by his fraud or deceit. This teaching meets with the unstinted approbation of moralists, notwithstanding the plausibility of a theory purporting to inculcate those who advance false testimony, but lifting from their shoulders the burden of repairing damages due to such false evidence. (See Forgery.)

Famagusta

Famagusta

A titular see in the Island of Cyprus. The name appears to be derived from the Greek *ammochostos* (a sandy point) rather than from Fama Augusti, the traditional etymology. The history of the city cannot be traced beyond the eighth century of our era. It is not certain, Lequien to the contrary notwithstanding (II, 1065), that it occupies the site of Arsinoe. Famagusta prospered through the destruction of the neighbouring Salamis, the former capital of the island. By the twelfth century its importance was

such that Guy de Lusignan chose to be crowned there (1191) King of Jerusalem and Cyprus. The French princes fortified the town, and in the thirteenth century built the beautiful Cathedral of St. Nicholas, transformed since then into a mosque. Famagusta was the seat of a Latin diocese from the twelfth century and had residential bishops till the end of the sixteenth. The list is given by Lequien, III, 1219-24; Ducange, "Les familles d'outre-mer", 861-864; Eubel, I, 253-54, II, 168; Hackett, "History of the Orthodox Church of Cyprus", London, 1901, 577-87.

The prosperity of Famagusta was not effected by the fall of Acre. In 1342, a German writer described it as one of the richest and most beautiful cities of the world, its wealth surpassing that of Constantinople and Venice. (See Mas-Latrie, *L'île de Chypre*, Paris, 1879, 236-40.) St. Bridget of Sweden, in her revelations, compares it to Sodom and Gomorrha. Captured by the Genoese in 1374, it fell, in 1389, into the hands of the Venetians, who retained it till 1571. Finally, after a siege of ten months, which cost the enemy 50,000 men, the city surrendered to the Turks, who, despite their treaty, massacred the garrison, burned alive the brave governor, Bragadino, and completely sacked the city. Famagusta, which formerly numbered 70,000 inhabitants, was reduced to a mere village. It is known today as Mankosta (1000 inhabitants) and is the chief town of one of the six departments of the island. Its harbour is choked with sand; its palaces, dwellings, highways, ramparts, and churches are all in ruins.

S. VAILHÉ

Familiars

Familiars

Strictly speaking, seculars subject to a master's authority and maintained at his expense. In this sense the idea embodies service rendered to masters, as well as wages, board, and lodging provided by the masters. In canon law the term usually signifies seculars residing in monasteries and other religious houses, actually employed therein as servants and subject to the authority of the regular prelate to the same extent as servants are subject to their masters. Many of the privileges and exemptions granted to religious are accorded their familiars. For this reason familiars validly receive absolution from a confessor approved by the regular prelate, or from one approved by the ordinary of the place where the house is located. In like manner, familiars actually dwelling in a monastery may receive their Easter Communion in the church or chapel of the monastery. Extreme unction and Viaticum may also be administered to them in the monastery. Boys boarding in colleges or academies supervised by religious or by diocesan clergy, and girls boarding in convents conducted by sisterhoods, practically enjoy the same privileges as familiars. According to Council of Trent (Sess. XXIII, cap.

ix, De Reformatione), "a bishop may not ordain one of his own household who is not his subject unless he has lived with him for the space of three years, and he shall really and without fraud of any kind, straightway confer on him a benefice, notwithstanding any contrary custom even immemorial".

Family

Family

A term derived from the Latin, *famulus*, servant, and *familia*, household servants, or the household (cf. Oscan *famel*, servant). In the classical Roman period the *familia* rarely included the parents or the children. Its English derivative was frequently used in former times to describe all the persons of the domestic circle, parents, children, and servants. Present usage, however, excludes servants, and restricts the word *family* to that fundamental social group formed by the more or less permanent union of one man with one woman, or of one or more men with one or more women, and their children. If the heads of the group comprise only one man and one woman we have the monogamous family, as distinguished from those domestic societies which live in conditions of polygamy, polyandry, or promiscuity.

Certain anthropological writers of the last half of the nineteenth century, as Bachofen (*Das Mutterrecht*, Stuttgart, 1861), Morgan (*Ancient Society*, London, 1877), Mc'Lennan (*The Patriarchal Theory*, London, 1885), Lang (*Custom and Myth*, London, 1885), and Lubbock (*The Origin of Civilization and the Primitive Condition of Man*, London, 1889), created and developed the theory that the original form of the family was one in which all the women of a group, horde, or tribe, belonged promiscuously to all the men of the community. Following the lead of Engels (*The Origin of the Family, Private Property, and the State*, tr. from the German, Chicago, 1902), many Socialist writers have adopted this theory as quite in harmony with their materialistic interpretation of history. The chief considerations advanced in its favour are: the assumption that in primitive times all property was common, and that this condition naturally led to community of women; certain historical statements by ancient writers like Strabo, Herodotus, and Pliny; the practice of promiscuity, at a comparatively late

date, by some uncivilized peoples, such as the Indians of California and a few aboriginal tribes of India; the system of tracing descent and kinship through the mother, which prevailed among some primitive people; and certain abnormal customs of ancient races, such as religious prostitution, the so-called *jus primæ noctis*, the lending of wives to visitors, cohabitation of the sexes before marriage, etc.

At no time has this theory obtained general acceptance, even among non-Christian writers, and it is absolutely rejected by some of the best authorities of today, e.g. Westermarck (*The History of Human Marriage*, London, 1901) and Letourneau (*The Evolution of Marriage*, tr. from the French, New York, 1888). In reply to the arguments just stated, Westermarck and others point out that the hypothesis of primitive communism has by no means been proved, at least in its extreme form; that common property in goods does not necessarily lead to community of wives, since family and marriage relations are subject to other motives as well as to those of a purely economic character; that the testimonies of classical historians in the matter are inconclusive, vague, and fragmentary, and refer to only a few instances; that the modern cases of promiscuity are isolated and exceptional, and may be attributed to degeneracy rather than to primitive survivals; that the practice of tracing kinship through the mother finds ample explanation in other facts besides the assumed uncertainty of paternity, and that it was never universal; that the abnormal sexual relations cited above are more obviously, as well as more satisfactorily, explained by other circumstances, religious, political, and social, than by the hypothesis of primitive promiscuity; and, finally, that evolution, which, superficially viewed, seems to support this hypothesis, is in reality against it, inasmuch as the unions between the male and the female of many of the higher species of animals exhibit a degree of stability and exclusiveness which bears some resemblance to that of the monogamous family.

The utmost concession which Letourneau will make to the theory under discussion is that "promiscuity may have been adopted by certain small groups, more probably by certain associations or brotherhoods" (op. cit., p. 44). Westermarck does not hesitate to say: "The hypothesis of promiscuity, instead of belonging, as Professor Giraud-Teulon thinks, to the class of hypotheses which are scientifically permissible has no real foundation, and is essentially unscientific" (op. cit., p. 133). The theory that the original form of the family was either polygamy or polyandry is even less worthy of credence or consideration. In the main, the verdict of scientific writers is in harmony with the Scriptural doctrine concerning the origin and the normal form of the family: "Wherefore a man shall leave father and mother, and shall cleave to his wife: and they shall be two in one flesh" (Gen., ii, 24). "Therefore now they are not two, but one flesh. What therefore God hath joined together, let no man put asunder" (Matt., xix, 6).

From the beginning, therefore, the family supposed the union of one man with one woman.

While monogamy was the prevailing form of the family before Christ, it was limited in various degrees among many peoples by the practice of polygamy. This practice was on the whole more common among the Semitic races than among the Aryans. It was more frequent among the Jews, the Egyptians, and the Medes, than among the people of India, the Greeks, or the Romans. It existed to a greater extent among the uncivilized races, although some of these were free from it. Moreover, even those nations which practised polygamy, whether civilized or uncivilized, usually restricted it to a small minority of the population, as the kings, the chiefs, the nobles, and the rich. Polyandry was likewise practised, but with considerably less frequency. According to Westermarck, monogamy was by far the most common form of marriage "among the ancient peoples of whom we have any direct knowledge" (*op. cit.*, p. 459). On the other hand, divorce was in vogue among practically all peoples, and to a much greater extent than polygamy.

The ease with which husband and wife could dissolve their union constitutes one of the greatest blots upon the civilization of classic Rome. Generally speaking, the position of woman was very low among all the nations, civilized and uncivilized, before the coming of Christ. Among the barbarians she very frequently became a wife through capture or purchase; among even the most advanced peoples the wife was generally her husband's property, his chattel, his labourer. Nowhere was the husband bound by the same law of marital fidelity as the wife, and in very few places was he compelled to concede to her equal rights in the matter of divorce. Infanticide was practically universal, and the *patria potestas* of the Roman father gave him the right of life and death over even his grown-up children. In a word, the weaker members of the family were everywhere inadequately protected against the stronger.

THE CHRISTIAN FAMILY

Christ not only restored the family to its original type as something holy, permanent, and monogamous, but raised the contract from which it springs to the dignity of a sacrament, and thus placed the family itself upon the plane of the supernatural. The family is holy inasmuch as it is to co-operate with God by procreating children who are destined to be the adopted children of God, and by instructing them for His kingdom. The union between husband and wife is to last until death (*Matt.*, xix, 6 sq.; *Luke*, xvi, 18; *Mark*, x, 11; *I Cor.*, vii, 10; see MARRIAGE, DIVORCE). That this is the highest form of the conjugal union, and the best arrangement for the welfare both of the family and of society, will appear to anyone who compares dispassionately the moral and material effects with those flowing from the practice of divorce. Although divorce has obtained to a greater or less extent among the majority of peoples from the begin-

ning until now, "there is abundant evidence that marriage has, upon the whole, become more durable in proportion as the human race has risen to higher degrees of cultivation" (Westermarck, *op. cit.*, p. 535).

While the attempts that have been made to show that divorce is in every case forbidden by the moral law of nature have not been convincing on their own merits, to say nothing of certain facts of Old Testament history, the absolute indissolubility of marriage is nevertheless the ideal to which the natural law points, and consequently is to be expected in an order that is supernatural. In the family, as re-established by Christ, there is likewise no such thing as polygamy (see the references already given in this paragraph, and POLYGAMY). This condition, too, is in accord with nature's ideal. Polygamy is not, indeed, condemned in every instance by the natural law, but it is generally inconsistent with the reasonable welfare of the wife and children, and the proper moral development of the husband. Because of these qualities of permanence and unity, the Christian family implies a real and definite equality of husband and wife. They have equal rights in the matter of the primary conjugal relation, equal claims upon mutual fidelity, and equal obligations to make this fidelity real. They are equally guilty when they violate these obligations, and equally deserving of pardon when they repent.

The wife is neither the slave nor the property of her husband, but his consort and companion. The Christian family is supernatural, inasmuch as it originates in a sacrament. Through the sacrament of matrimony husband and wife obtain an increase of sanctifying grace, and a claim upon those actual graces which are necessary to the proper fulfilment of all the duties of family life, and the relations between husband and wife, parents and children, are supernaturalized and sanctified. The end and the ideal of the Christian family are likewise supernatural, namely, the salvation of parents and children, and the union between Christ and His Church. "Husbands, love your wives, as Christ also loved the church, and delivered himself up for it", says St. Paul (Eph., v, 25). And the intimacy of the marital union, the identification, almost, of husband and wife, is seen in the injunction: "So also ought men to love their wives as their own bodies. He that loveth his wife, loveth himself" (Eph., v. 28).

From these general facts of the Christian family, the particular relations existing among its members can be readily deduced. Since the average man and woman are not normally complete as individuals, but are rather the two complementary parts of one social organism, in which their material, moral, and spiritual needs receive mutual satisfaction, a primary requisite of their union is mutual love. This includes not merely the love of the senses, which is essentially selfish, not necessarily that sentimental love which anthropologists call romantic, but above all that rational love or affection, which springs from an appreciation of qualities of mind and heart, and which impels each

to seek the welfare of the other. As the intimate and long association of husband and wife necessarily bring to the surface their less noble and lovable qualities, and as the rearing of children involves great trials, the need of disinterested love, the ability to sacrifice self, is obviously grave.

The obligations of mutual fidelity have been sufficiently stated above. The particular functions of husband and wife in the family are determined by their different natures, and by their relation to the primary end of the family, namely, the procreation of children. Being the provider of the family, and the superior of the wife both in physical strength and in those mental and moral qualities which are appropriate to the exercise of authority, the husband is naturally the family's head, even "the head of the wife", in the language of St. Paul. This does not mean that the wife is the husband's slave, his servant, or his subject. She is his equal, both as a human being and as member of the conjugal society, save only that when a disagreement arises in matters pertaining to domestic government, she is, as a rule, to yield. To claim for her completely equal authority with the husband is to treat woman as man's equal in a matter in which nature has made them unequal. On the other hand the care and management of the details of the household belong naturally to the wife, because she is better fitted for these tasks than the husband.

Since the primary end of the family is the procreation children, the husband or wife who shirks this duty from any but spiritual or moral motives reduces the family to an unnatural and unchristian level. This is emphatically true when the absence of offspring has been effected by any of the artificial and immoral devices so much in vogue at present. When the conjugal union has been blessed with children, both parents are charged, according to their respective functions, with the duty of sustaining and educating those undeveloped members of the family. Their moral and religious formation is for the most part the work of the mother, while the task of providing for their physical and intellectual wants falls chiefly upon the father. The extent to which the different wants of the children are to be supplied will vary with the ability and resources of the parents. Finally, the children are bound, generally speaking, to render to the parents implicit love, reverence, and obedience, until they have reached their majority, and love, reverence, and a reasonable degree of support and obedience afterward.

The most important external relations of the family are, of course, those existing between it and the State. According to the Christian conception, the family, rather than the individual, is the social unit and the basis of civil society. To say that the family is the social unit is not to imply that it is the end to which the individual is a means; for the welfare of the individual is the end both of the family and of the State, as well as of every other social organization. The meaning is that the State is formally

concerned with the family as such, and not merely with the individual. This distinction is of great practical importance; for where the State ignores or neglects the family, keeping in view only the welfare of the individual, the result is a strong tendency towards the disintegration of the former. The family is the basis of civil society, inasmuch as the greater majority of persons ought to spend practically all their lives in its circle, either as subjects or as heads. Only in the family can the individual be properly reared, educated, and given that formation of character which will make him a good man and a good citizen.

Inasmuch as the average man will not put forth his full productive energies except under the stimulus of its responsibilities, the family is indispensable from the purely economic viewpoint. Now the family cannot rightly discharge its functions unless the parents have full control over the rearing and education of the children, subject only to such State supervision as is needed to prevent grave neglect of their welfare. Hence it follows that, generally speaking, and with due allowance for particular conditions, the State exceeds its authority when it provides for the material wants of the child, removes him from parental influence, or specifies the school that he must attend. As a consequence of these concepts and ideals, the Christian family in history has proved itself immeasurably superior to the non-Christian family. It has exhibited greater fidelity between husband and wife, greater reverence for the parents by the children, greater protection of the weaker members by the stronger, and in general a more thorough recognition of the dignity and rights of all within its circle. Its chief glory is undoubtedly its effect upon the position of woman. Notwithstanding the disabilities--for the most part with regard to property, education, and a practically recognized double standard of morals--under which the Christian woman has suffered, she has attained to a height of dignity, respect, and authority for which we shall look in vain in the conjugal society outside of Christianity. The chief factor in this improvement has been the Christian teaching on chastity, conjugal equality, the sacredness of motherhood, and the supernatural end of the family, together with the Christian model and ideal of family life, the Holy Family at Nazareth.

The contention of some writers that the Church's teaching and practice concerning virginity and celibacy, make for the degradation and deterioration of the family, not only springs from a false and perverse view of these practices, but contradicts the facts of history. Although she has always held virginity in higher honour than marriage, the Church has never sanctioned the extreme view, attributed to some ascetical writers, that marriage is a mere concession to the flesh, a sort of tolerated carnal indulgence. In her eyes the marriage rite has ever been a sacrament, the married state a holy state, the family a Divine institution, and family life the normal condition for the great majority of mankind. Indeed, her teaching on virginity, and the spectacle of thousands

of her sons and daughters exemplifying that teaching, have in every age constituted a most effective exaltation of chastity in general, and therefore of chastity within as well as without the family. Teaching and example have combined to convince the wedded, not less than the unwedded, that purity and restraint are at once desirable and practically possible. Today, as always, it is precisely in those communities where virginity is most honoured that the ideal of the family is highest, and its relations purest.

DANGERS FOR THE FAMILY

Among these are the exaltation of the individual by the State at the expense of the family, which has been going on since the Reformation (cf. the Rev. Dr. Thwing, in Bliss, "Encyclopedia of Social Reform"), and the modern facility of divorce (see DIVORCE), which may be traced to the same source. The greatest offender in the latter respect is the United States, but the tendency seems to be towards easier methods in most of the other countries in which divorce is allowed. Legal authorization and popular approval of the dissolution of the marriage bond, not only breaks up existing families, but encourages rash marriages, and produces a laxer view of the obligation of conjugal fidelity. Another danger is the deliberate limitation of the number of children in a family. This practice tempts parents to overlook the chief end of the family, and to regard their union as a mere means of mutual gratification. Furthermore, it leads to a lessening of the capacity of self-sacrifice in all the members of the family. Closely connected with these two evils of divorce and artificial restriction of births, is the general laxity of opinion with regard to sexual immorality. Among its causes are the diminished influence of religion, the absence of religious and moral training in the schools, and the seemingly feebler emphasis laid upon the heinousness of the sin of unchastity by those whose moral training has not been under Catholic auspices. Its chief effects are disinclination to marry, marital infidelity, and the contraction of diseases which produce domestic unhappiness and sterile families.

The idle and frivolous lives of the women, both wives and daughters, in many wealthy families is also a menace. In the position which they hold, the mode of life which they lead, and the ideals which they cherish, many of these women remind us somewhat of the *hetæraë* of classical Athens. For they enjoy great freedom, and exercise great influence over the husband and father, and their chief function seems to be to entertain him, to enhance his social prestige, to minister to his vanity, to dress well, and to reign as social queens. They have emancipated themselves from any serious self-sacrifice on behalf of the husband or the family, while the husband has likewise declared his independence of any strict construction of the duty of conjugal fidelity. The bond between them is not sufficiently moral and spiritual, and is excessively sensual, social, and aesthetic. And the evil example of this conception of family life extends far beyond those who are able to put it into practice. Still another danger is the decline

of family authority among all classes, the diminished obedience and respect imposed upon and exhibited by children. Its consequences are imperfect discipline in the family, defective moral character in the children, and manifold unhappiness among all.

Finally, there is the danger, physical and moral, threatening the family owing to the widespread and steadily increasing presence of women in industry. In 1900 the number of females sixteen years of age and over engaged in gainful occupations in the United States, was 4,833,630, which was more than double the number so occupied in 1880, and which constituted 20 per cent of the whole number of females above sixteen years in the country, whereas the number at work in 1880 formed only 16 percent of the same division of the female population. In the cities of America two women out of every seven are bread-winners (see Special Report of the U.S. Census, "Women at Work"). This condition implies an increased proportion of married women at work as wage earners, an increased proportion of women who are less capable physically of undertaking the burdens of family life, a smaller proportion of marriages, an increase in the proportion of women who, owing to a delusive idea of independence, are disinclined to marry, and a weakening of family bonds and domestic authority. "In 1890, 1 married woman in 22 was a bread-winner; in 1900, 1 in 18" (*ibid.*). Perhaps the most striking evil result of married women in industry is the high death-rate among infants. For infants under one year the rate in 1900 over the whole United States, was 165 per 1000, but it was 305 in Fall River, where the proportion of married women at work is greatest. As the supreme causes of all these dangers to the family are the decay of religion and the growth of materialistic views of life, so the future of the family will depend upon the extent to which these forces can be checked. And experience seems to show that there can be no permanent middle ground between the materialistic ideal of divorce, so easy that the marital union will be terminable at the will of the parties, and the Catholic ideal of marriage absolutely indissoluble.

In addition to the authorities cited in the text, the following deserve particular mention: DEVAS, *Studies in Family Life* (London, 1886); RICHE, *The Family*, tr. SADLIER (New York, 1896); COULANGES, *The Ancient City*, tr. SMALL (Boston, 1901); BOSANQUET, *The Family* (London, 1906); THWING, *The Family* (Boston, 1887); BLISS, *Encyclopedia of Social Reform* (New York, 1907); ST CKL *In Kirchenlexikon; La grande encyclop dia*; PERRONE, *De Matrimonio Christiano* (Li ge, 1862); Westermarck's work contains a very large bibliography on the anthropological and sociological aspects of the subject. JOHN A. RYAN

Diocese of Fano

Diocese of Fano

(FANENSIS.)

Fano, the ancient Fanum Fortunæ, a city of the Marches in the province of Pesaro, Italy, took its name from a celebrated temple of Fortune, which also served as a light-house, on the site now occupied by the church of Santa Lucia. Near this city, in 207 B.C., Claudius Nero defeated Hasdrubal; Augustus founded a colony there called Julia Fanensis; and, in 271, Aurelian annihilated there the Alamanni. Ruins of the Temple of Fortune are still visible, also of a temple of Jupiter, the basilica designed and described by Vitruvius (*De ædific.*, V, i), and a triumphal arch of Augustus, enlarged by Constantine II in 340. Fano was part of the Pentapolis and with it passed in the eighth century under the domination of the Holy See. The Alberghetti governed it as magistrates during the thirteenth century. From 1306 the Malatesta ruled over it, but in 1463 Federigo di Montefeltro, Duke of Urbino, after having almost destroyed the city, expelled Sigismondo Malatesta. Later the Comneni held almost independent sway.

St. Paternianus is venerated as the first Bishop of Fano and is supposed to have been appointed by Pope Sylvester I. St. Vitalis flourished in the time of Pope Symmachus (498-514). Eusebius accompanied Pope John I to Constantinople (526). Leo and St. Fortunatus belong to the period of St. Gregory the Great. The date of St. Orsus is uncertain. Among the later bishops were Riccardo (1214), persecuted by the magistrate Alberghetti; and the Dominican Pietro Bertano (1537), a distinguished orator and advocate at the Council of Trent. Fano is an exempt diocese (see DIOCESE) and has 55,275 inhabitants, 45 parishes, 1 educational institution for girls, 6 religious houses of men, and 8 of women.

U. BENIGNI

Fanon

Fanon

A shoulder-cape worn by the pope alone, consisting of two pieces of white silk ornamented with narrow woven stripes of red and gold; the pieces are nearly circular in shape but somewhat unequal in size and the smaller is laid on and fastened to the larger one. To allow the head to pass through there is made in the middle a round

opening with a vertical slit running down farther. The front part of the fanon is ornamented with a small cross embroidered in gold.

The fanon is like an amice; it is, however, put on not under but above the alb. The pope wears it only when celebrating a solemn pontifical Mass, that is, only when all the pontifical vestments are used. The manner of putting on the fanon recalls the method of assuming the amice universal in the Middle Ages and still observed by some of the older orders (see AMICE). After the deacon has vested the pope with the usual amice, alb, the cingulum and sub-cinctorium, and the pectoral cross, he draws on, by means of the opening, the fanon and then turns the half of the upper piece towards the back over the pope's head. He now vests the pope with the stole, tunicle, dalmatic, and chasuble, then turns down that part of the fanon which had been placed over the head of the pope, draws the front half of the upper piece above the tunicle, dalmatic, and chasuble, and finally arranges the whole upper piece of the fanon so that it covers the shoulders of the pope like a collar.

The fanon is mentioned in the oldest known Roman Ordinal, consequently its use in the eighth century can be proved. It was then called *anabolagium* (*anagolagium*), yet it was not at that period a vestment reserved for the use of the pope. This limitation of its use did not appear until the other ecclesiastics at Rome began to put the vestment on under the alb instead of over it, that is, when it became customary among the clergy to use the fanon as an ordinary amice. This happened, apparently in imitation of the usage outside of Rome, between the tenth and twelfth centuries; however, the exact date cannot be given. But it is certain that as early as the end of the twelfth century the fanon was worn solely by the pope, as is evident from the express statement of Innocent III (1198-1216). The vestment was then called an *orale*; the name of fanon, from the late Latin *fano*, derived from *pannus*, (*penos*), cloth, woven fabric, was not used until a subsequent age. Even as early as the eighth century the pope wore the fanon only at solemn high Mass. The present usage, according to which the pope is vested, in addition to the fanon, with an amice under the alb, did not appear, at the earliest, until the close of the Middle Ages.

As to the form of the fanon and the material from which it was made in early times no positive information exists. Late in the Middle Ages it was made of white silk, as is shown by the inventory of the year 1295 of the papal treasure, as well as by numerous works of art; the favourite ornamentation was one of narrow stripes of gold and of some colour, especially red, woven into the silk. Up into the fifteenth century the fanon was square in shape; the present collar-like form seems to have appeared about the sixteenth century or even later.

Henri Faraud

Henri Faraud

Titular Bishop of Anémour and first Vicar Apostolic of Athabasca-Mackenzie, Canada; b. 17 March, 1823, at Gigondas, France; d. at St. Boniface, Manitoba, 26 September, 1890. After admission to the juniorate of the Oblates of Mary Immaculate, and while still in minor orders, he was sent to the missions of Northern America, and ordained priest, 8 May, 1847, at St. Boniface, Manitoba. Then he replaced Father (afterwards Bishop) Laflèche at Ile-à-la-Crosse, and in 1849 he proceeded further North, establishing the mission of Lake Athabasca, which he inaugurated 8 September, 1851. The following year, he visited Great Slave Lake, where no missions had ever been, and ministered to the Indians of Peace River (1858-59). On the 13th of May, 1862, he was made titular of the newly created Vicariate Apostolic of Athabasca-Mackenzie; but such was his isolation from the civilized world, that he did not know of it before July of the following year.

Mgr. Guilbert, of Tours, consecrated him Bishop of Anemour, 30 Nov., 1864, a title he bore for twenty-five years, during which he evidenced considerable administrative abilities, founding missionary posts as far as the Frozen Ocean, on the one side, and the Peace and Liard Rivers, on the other. In 1835 he repaired to France, for the General Chapter of his Congregation. In 1889 he was one of the Fathers of the Provincial Council of St. Boniface, at the termination of which his growing infirmities prevented him from returning to his distant missions in the North.

A.G. MORICE

Abbey of Farfa

Abbey of Farfa

Situated about 26 miles from Rome, not far from the Farfa Sabina Railway station. A legend in the "Chronicon Farfense" relates the foundation of a monastery at Farfa in the time of the Emperors Julian, or Gratian, by the Syrian St. Laurentius, who had

come to Rome with his sister, Susannah, and had been made Bishop of Spoleto. The legend goes on to say that he afterwards became enamoured of the monastic life, and chose a wooded hill near the Farfa stream, a tributary of the Tiber, on which he built a church to Our Lady, and a monastery. Archeological discoveries in 1888 seem to prove that the first monastic establishment was built on the ruins of a pagan temple. This first monastery was devastated by the Vandals in the fifth century, doubtless about the year 457.

In the seventh century, a wave of monasticism from the North spread over Italy. The foundation of Bobbio by St. Columbanus, and the foundation of Farfa by monks from Gaul, about 681, heralded a revival of the great Benedictine tradition in Italy. The "*Constructio Monasterii Farfensis*", a writing which dates probably from 857, relates at length the story of its principal founder Thomas de Maurienne; he had made a pilgrimage to Jerusalem and spent three years there. While in prayer before the Holy Sepulchre, Our Lady in a vision warned him to return to Italy, and restore Farfa; and the Duke of Spoleto, Faroald, who had also had a vision, was commanded to aid in this work. At a very early date we find traces of this legend in connexion with the foundation by three nobles from Beneventum of the monastery of St. Vincent on the Volturno, over which Farfa claimed jurisdiction. Thomas died in 720; and for more than a century Frankish abbots ruled at Farfa.

The Lombard chiefs, and later the Carlovingians, succeeded in withdrawing Farfa from obedience to the Bishops of Rieti, and in securing many immunities and privileges for the monastery. If we may credit the "*Chronicon Farfense*", Farfa was at this period the most important monastery in Italy both from the point of view of worldly possession and ecclesiastical dignity, with the exception of Nonantula. It had one large basilican church and five smaller ones, rich in masterpieces of religious orfèverie. The greed of the Saracens was excited: and about 890, during the government of Abbot Peter, they swooped down on the place. Peter held out against them for seven years, and then resolved to abandon the monastery. He divided his monks into three sections and shared the abbey's wealth among them — one section he sent towards Rome, one towards Rieti, and one towards the county of Fermo. The Saracens preserved Farfa as a stronghold, but some Christian robbers set fire to it by mistake.

Between 930 and 936, it was rebuilt by Abbot Ratfredus, who was afterwards poisoned by two wicked monks, Campo and Hildebrand, who divided the wealth of the abbey between them, and ruled over it until Alberic, Prince of the Romans, called in Odo of Cluny to reform Farfa and other monasteries. Campo was driven out; and a holy monk named Dagibert took his place. At the end of five years, he also died by poison — and the moral condition of Farfa was once more deplorable. The monks robbed the altars of their ornaments, and led lives of unbridled vice.

Abbot John III, consecrated, about 967, by the pope, succeeded, owing to the protection of the Emperor Otho, in re-establishing a semblance of order. But the great reformer of Farfa was Hugues (998-1010). His nomination as abbot was not secured without simony — but the success of his government palliates the vice of his election. At his instance, Odilo, Abbot of Cluny, and William, Abbot of Dijon, visited Farfa, and re-established there the love of piety and of study.

The "Consuetudines Farfenses" drawn up about 1010 under the supervision of Guido, successor to Hugues, and recently published by Albers, bear witness to the care with which Hugues organized the monastic life at Farfa. Under the title "Destructio Monasterii", Hugues himself wrote a history of the sad period previous to his rule; and again under the title "Diminutio Monasterii", and "Querimonium", he relates the temporal difficulties that encompassed Farfa owing to the ambition of petty Roman lords. These works are very important for the historian of the period.

One of Hugue's successors, Berard, Abbot from 1049 to 1089, made the abbey a great seat of intellectual activity. The monk, Gregory of Catino (b. 1060) arranged the archives. To substantiate Farfa's claims, and the rights of its monks, he edited the "Regesto di Farfa", or "Liber Gemniographus sive Cleronomialis ecclesiae Farfensis" composed of 1324 documents, all very important for the history of Italian society in the eleventh century. Ugo Balzani praised the accuracy and exactness of this work "planned", he says, "along lines quite in harmony with the best critical efforts of our own times".

In 1103, Gregory wrote the "Largitorium", or "Liber Notarius sive emphiteuticus", a lengthy list of all the concessions, or grants, made by the monastery to its tenants. Having collected all this detailed information, he set to work on a history of the monastery, the "Chronicon Farfense"; and when he was 70 years old, in order to facilitate reference to his earlier works, he compiled a sort of index which he styled "Liber Floriger Chartarum cenobii Farfensis". Gregory was a man of real learning, remarkable in that, as early as the eleventh century, he wrote history with accuracy of view-point, and a great wealth of information.

The monks of Farfa owned 683 churches or convents; two towns, Centumcellæ (Civitavecchia) and Alatri; 132 castles; 16 strongholds; 7 sea-ports; 8 salt-mines; 14 villages; 82 mills; 315 hamlets. All this wealth was a hindrance to the religious life once more between 1119 and 1125. And Farfa was troubled by the rivalries between Abbot Guido, and the monk Berard who aimed at being abbot. During the Investiture conflict, Farfa was, more or less, on the side of the Ghibellines. The "Orthodoxa defensio imperialis", written in support of the Ghibelline party, is, according to Bethmann, the work of Gregory, and of one of his disciples, according to Balzani. The collection of canonical texts contained in the "Regesto", which has been studied by Paul Fournier, seems

to omit purposely any mention of the canonical texts of the reforming popes of the eleventh century. But when, in 1262, the victory of the popes over the last of the Hohenstaufen put an end to Germanic sway in Italy, Farfa sought the protection of Urban IV, as we learn from a privilege granted on 23 Feb., 1262, and published by Jean Guiraud. At the end of the fourteenth century the Abbey of Farfa became a cardinalatial *in commendam*, and since 1842 the Cardinal Bishop of Sabina, a suburbicarian bishop, bears also the title of Abbot of Farfa.

GEORGES GOYAU

Fargo

Fargo

(FARGUS; FARGENSIS)

Diocese; suffragan of St. Paul, U.S.A., embracing the whole of the State of North Dakota, an area of 70,195 square miles. It was established in 1889.

The first Mass, in the territory now comprised in the Diocese of Fargo, was celebrated in Pembina, September, 1818, by Rev. Sévère Joseph Norbert Dumoulin, one of the two missionaries sent to the Selkirk colony by Bishop Plessis of Quebec. Father Cumoulin was born in Montreal, 5 Dec., 1793, ordained priest in the Nicolet Seminary, 23 Feb., 1817, left Quebec for the Selkirk colony, 19 May, 1818, and arrived at Fort Douglas (now St. Boniface, Manitoba), 16 July, 1818. In August, 1823, Father Dumoulin returned to Canada, where he died in 1853. The name of the diocese was originally Jamestown, which title was suppressed by the Holy See, 6 April, 1897, and changed to Fargo in accordance with the bishops request. At its formation the diocese contained a population of 19,000, of whom nearly 8000 were Indians and half-breeds. The population (1908) is about 70,000.

With the creation of the diocese the Rev. John Shanley was named its first bishop. He was born at Albion, New York, 4 Jan., 1852, and ordained priest 30 May, 1874, at Rome. His consecration as bishop took place at St. Paul, 27 Dec., 1889. There were then in the diocese 30 priests, 40 churches, an academy for girls, a hospital, and 3 parochial schools. There are now (1909) in the diocese a mitred abbot, 110 priests, 215 churches, 15 parochial schools, 4 Indian schools, 5 hospitals, an orphanage, a college for boys, and 6 academies for girls. In eighteen years the number of priests quadrupled and the number of churches more than quintupled.

The Benedictine Fathers have an abbey at Richardton, and a priory at Devils Lake, from which points they attend several missions. Connected with the Richardton Abbey is a college for boys. The Benedictine Sisters are in charge of several schools, and the Presentation Nuns in charge of schools and orphans. Other communities are: Sisters of Mercy (hospital and schools); Sisters of St. Joseph (hospitals and school); Sisters of Charity, or Grey Nuns (Indian school); Sisters of Mary of the Presentation (schools).

Diocesan records: Catholic Directory, 1909; Reuss, Biog. Encycl. Cath. Hierarchy U.S. (Milwaukee, 1898).

JOHN SHANLEY

George-Barthelemy Faribault

George-Barthélemy Faribault

An archaeologist, b. at Quebec, Canada, 3 Dec., 1789; d. 1866. He was a first cousin of Jean-Baptiste, founder of the city of Faribault, Minn., U.S.A. After attending a school taught by a Scotch veteran of Wolfe's army, he completed by personal efforts the course preparatory to the study of law and was admitted to the Bar in 1811. In 1812 he served as a militiaman during the invasion of Canada by the Americans. In 1822 he entered the civil service, attaining in 1832 the rank of assistant clerk of the Legislative Assembly, an office he continued to hold after the union of the Canadas (1841) until 1855, when ill-health forced him to resign. Passionately fond of his Country and of its past glories, he spent all his leisure in collecting documents and books pertaining to Canadian history. His fine collection (1700) of rare books and original manuscripts perished at the burning of the Parliament House in Montreal (1849). He courageously began a second collection, which he bequeathed to Laval University. Faribault published no original works, merely reproducing and annotating a series of rare historical papers in the transactions of the Quebec Literary and Historical Society, of which he was one of the chief promoters and benefactors. His principal publication is the "Catalogue of Works" relating to the history of America, with bibliographical, critical, and literary notes (Quebec, 1837), which, although superseded by

a few later catalogues, ranks among the best. In 1859 he realized the long-postponed plan, conceived in 1761 by Montcalm's companions in arms, of erecting a memorial tablet over the soldier's grave. The epitaph written by the French Academy at the time the subject was first brought up and approved by William Pitt, was duly inscribed. In private life Faribault was the type of the Christian gentleman, modest, hospitable, and charitable. He counted none but friend, and left the record of a blameless career, devoted to the service of God and country.

MORGAN, *Bibliotheca Canadensis* (Ottawa, 1867); Casgrain, *OEuvres completes* (Quebec, 1873).

LIONEL LINDSAY

Jean-Baptiste Faribault

Jean-Baptiste Faribault

A trader with the Indians and early settler in Minnesota, U.S.A.; b. 19 October, 1774, at Berthier, Lower Canada; d. at Faribault, Minnesota, 20 August, 1860. His father Barthélemy Faribault, a lawyer of Paris, France, settled in Canada towards the middle of the eighteenth century and served as military secretary to the French army in Canada. After the occupation of the country by the English he retired to private life in Berthier and he held the office of notary public. Young Jean-Baptiste received a good school education, and after several years of mercantile employment at Quebec, entered the service of the Northwest Fur Company. In May, 1798, he went with others to the island of Michilimackinac or Mackinac, one of the depots of this company. For over ten years he traded with the Pottowatomic Indians at Kankakee, with the Dakota or the Sioux, Indians at Redwood, on the Des Moines river, and at Little Rapids, on the St. Peter or Minnesota river. During his residence at Little Rapids, in 1805, he was married to Pelagia Hanse, a half-breed daughter of Major Hanse. In 1809, he settled in the small village of Prairie du Chien, Wisconsin, and commenced trading, on his own account, with the Indian tribes of the Winnebagoes, Foxes, and Sioux. In addition to that he conducted an exchange of lead with Julien Dubuque, at the point now occupied by the city of that name. During the war with England (1812-14) Faribault refused to enlist in the English army, and suffered imprisonment and the loss of all his goods in consequence. After the conclusion of the war, in 1815, he became a citizen of the United States, and recommenced his trade at Prairie du Chien. In 1819, he removed to Pike Island in the Mississippi River, and in 1826 to the village of St. Peter or Mendota, Minnesota, opposite the military post of Fort Snelling. There he remained until the last years of his life, which were spent with his children in the town of Faribault, Minnesota. A county in southern Minnesota was named after him, and the city of that

name after his eldest son. Faribault was always kind and generous to the Indians, and tried to elevate them by teaching them the useful arts of life, and by instilling into them the principles of Christianity. He was much attached to the Catholic faith of his childhood and presented a house for a chapel to Father Lucien Galtier, the first resident missionary in Minnesota (1840).

FRANCIS J. SCHAEFER

Paolo Farinato

Paolo Farinato

An Italian painter, b. at Verona 1524; d. there, 1606. He belonged to the old Florentine family of Farinata degli Uberti, the famous head of the Ghibelline party, whom Dante placed in his *Inferno*. When the Guelfs triumphed, the Uberti were expelled and part of the family settled at Verona, it was to this branch that the painter belonged in his native town Paolo was a pupil of Giolfino, who was carrying on there the artistic tradition of Liberale, there the artistic tradition of Liberale, the greatest perhaps of Italian miniaturists, whose wonderful illustrations in the choir books of the Libreria of Siena (1470-1476), his blustering Boreas, his Mass in which the celebrant is a turbaned priest with a head like Klingor the magician, his starting view of the Castle of Sant' Angelo, are well known.

It thus came about that in Verona, a town without any great artistic past, a really original school was being formed, untrammelled by traditions and therefore all the more free to indulge in those novel colour schemes in painting which had already found startling expression in the mausoleums of Cane Grande della Scala, and the barons of his family. Towards the close of the fifteenth century, in the neighbourhood of Verona, the Venetian masters, Giovanni Bellini, Giorgione, and Titian, had brought about a great artistic revolution. They had invented colouring as an essential branch of the painter's art. But great masters that they were, they were also men of intellectual genius and cared too much for the idea and its expression to give themselves up utterly to the purely sensual ideal they had discovered.

The Veronese School, on the contrary, less concerned with the higher walks of art, and untrained in the quest of lofty ideals, seized straightway on colouring as the language best suited to express its own temperament. Colouring soon became its unique preoccupation; and it was from this school the greatest colourist and painter of all time was to come forth, if the measure of greatness among painters is their ability to speak in colouring, Paolo Caliari, of Verona, known as Veronese. It is on this account that Giolfino and his pupils, Brusasorci and Farinato, are of such interest in the history of art. It is in their works that we note the blending of the two styles, and the use of

colouring as an exclusive source of pleasure in painting: they were the heralds of Veronese and his immediate precursors. More than one sketch by Brusasorci is even now masquerading as a Veronese. Moreover, in the hands of these artists painting gradually loses its moral purpose and becomes merely one of the decorative arts, giving promise already of that gaudy evolution that was to end in Tiepolo.

In this transformation Farinato played a very important part. He had a decided talent for fresco, and like Liberale, he was largely occupied on the decorations of the façades of the houses in Verona, which give that town and its famous Piazza dell' Erbe so winsome and engaging an appearance. Unfortunately Farinato did not remain faithful to his native genius. At Mantua he fell under the influence that Giulio Romano, who, with his own captivating though vulgar faults had inherited all the prestige of the divine Raphael. It was under this influence that Paolo executed his "St. Martin" in the Blessed Sacrament Chapel of the cathedral at Mantua: and from this time onward his works betray for the most part a hybrid compromise between the corrupt Roman style and the light impressionist colouring of Veronese. In Mantua also his principal work is preserved. In Santa Maria in Organo, a "Massacre of the Innocents" (1556), and a "Christ Walking on the Waters" (1558); in San Tommaso, a "Glorification of the B. Virgin" (1569); in St. Anastasia, a "Pentecost" (1598), and in San Giorgio in Braida, a "Multiplication of the Loaves" (1603).

Though four years older than Veronese, Farinato survived him by nearly twenty years, and was over eighty when he died. He was a most prolific painter and many of his works have found their way to other lands. In the United States there are two or three, one at New Haven in the Jarves Collection, "Christ Appearing to Some Saints"; and one at the Historical Society in New York, an "Abraham Driving away Hagar". The famous painting in the Louvre, representing "The Council of Trent", and generally attributed to Titian, has been assigned to Farinato by Berenson.

LOUIS GILLET

Daniele Farlati

Daniele Farlati

An ecclesiastical historian, b. at San Daniele del Friuli in the present Italian province of Udine, 22 February, 1690; d. 25 April, 1773. After having studied at Gorz he entered, in 1707, the Society of Jesus at Bologna. He was for five years teacher of classics at the Jesuit college in Padua, and then went to Rome, where he completed his theological studies, was ordained priest, in 1722, and was again sent to Padua, to assist Father Filippo Riceputi in the latter's historical labours. Riceputi intended to write ecclesiastical history of Illyria, and in 1720 had issued, at Padua, a prospectus of this monumental

enterprise. During twenty years they both searched with unwearied industry, in all the libraries and archives of ancient Illyria, for the material for their work; the matter they collected filled three hundred manuscript volumes. In 1712, just as two of the larger divisions, the martyrology of Illyria and the life of San Pietro Orseolo, were about completed, Riceputi died. Thus Farlati was left alone to work into presentable shape the prodigious amount of material collected. As co-labourer he chose Father Jacopo Coleti. The first volume of "Illyricum Sacrum" appeared at Venice, in 1751; it contained the history of the Church Salona up to the fourth century. Three further volumes appeared in rapid succession while the fifth was in press Farlati died. His assistant Coleti finished the fifth volume, which appeared in 1775, and issued three more, the last being completed in 1818. The whole work fills eight well-executed folio volumes.

J.P. KIRSCH

Alessandro Farnese

Alessandro Farnese

The name of two cardinals. For the elder see POPE PAUL III. The young Alessandro Farnese, eldest son of Pier Luigi Farnese, first Duke of Parma and brother of Pope Paul III, was born 7 Oct, 1520, and died at Rome, Feb., 1589. While yet a student at Bologna, in 1634, Clement VII appointed him administrator of the Diocese of Parma; on 18 Dec. of the same year, his uncle, Paul III, created him Cardinal-Deacon of the Title of Sant' Angelo, and conferred on him numerous offices and benefices. Thus, he was Vice-Chancellor of the Holy Roman Church, Governor of Tivoli, Archpriest of St. Mary Major's, Archpriest of St. Peter's, Administrator of Jaen, Spain, of Vizeu, Portugal, of Wurzburg, Germany and of Avignon, France. In 1536 he was made Bishop of Monreale, Sicily, where, in 1552, he founded Jesuit College, and in 1559 convoked a synod. He was also Bishop of Massa (1538), and Archbishop of Tours (1553), later exchanging this see for that of Cahors, from which he resigned in 1557; Bishop of Benevento (1556); of Montefiascone (1571); finally Cardinal Bishop of Ostia and Velletri (1580). He was papal legate for the province of the Patrimony, and afterwards of the county of Avignon, where he displayed great administrative ability, especially during the plague of 1541.

He was very zealous in behalf of the poor. Farnese was employed by the popes on various legations and embassies. In 1539, he was *legatus a latere* of Paul III at the court of Charles V, to make peace between the emperor and the King of France, and to sever the alliance with England, also to arrange for a general council. In 1543 he went again to the court of Charles V, and later to that of Francis I, and was present at the meeting of the two sovereigns in Paris, returning with Charles to Flanders. In the war between

his brother Ottavio, Duke of Parma, and Pope Julius III, he prudently held aloof, first at Florence and then at Avignon. In 1545 he went on a second embassy to Charles V in reference to the council, and in 1546 he accompanied the pontifical troops sent the aid of Charles V against the Smalkald League. In 1580, he was one of the candidates for the papacy. Charles V greatly admired his virtues and sagacity. Farnese was an ardent promoter of the Tridentine reforms. Above all he was a lover and patron of literature, science, and art, especially ecclesiastical. He used to say that "there is nothing more despicable than a cowardly soldier, or an ignorant priest". He patronized the architect Vignolo, to whom he trusted the construction both of the church of Gesu in Rome, of which he laid the corner-stone 1568, and of the superb Farnese palace of Caprarola near Lago Bracciano. He restored the monastery Tre Fontane, where he had the chapel of Santa Maria Scala Coeli erected: and he had the ceiling of San Lorenzo in Damaso magnificently decorated. He was buried in front of the high altar in the church of Gesu.

U. BENIGNI

Faro, Diocese of

Diocese of Faro

(PHARENSIS)

A suffragan of Evora, Portugal, and extending over the province of Algarve. The see was founded at Ossonoba in 306, which place falling into the hands of the Moors, in 688, the see was suppressed. It was re-established in 1188 at Siloes, and in 1218 was made suffragan to Braga, then to Seville, in 1393 to Lisbon and finally, in 1540, to Evora. The title was transferred to Faro, 30 March, 1577. Faro is the chief seaport town of the province, and is located on the Rio Feroso, near its mouth. The cathedral, an imposing structure, with nave-vaulting springing from lofty cylindrical columns, is apparently a Roman basilica altered by the Moors. Several convents, a hospital, and charitable institutions are well appointed. There are 66 parishes, 214 churches, 112 priests and 228,384 Catholics in the diocese.

WERNER, *Orbis Terrarum* (Freiburg im Br., 1890); BUCHBERGER, *Kirchliches Handlex.* (Munich, 1907).

THOMAS F. MEEHAN.

Faroe Islands

Faroe Islands

Geography and Statistics

A group of Danish islands rising from the sea some four hundred miles west of Norway and almost as far south of Iceland. It embraces fourteen inhabited and several uninhabited islands with an area of 500 square miles. Of this one-third belongs to Strömö. This archipelago is divided by a number of small sounds and consists of dark grey rocks which form plateaux usually about 300 yards high. These plateaux slope towards the sea, are fissured by streams and are here and there surmounted by lofty peaks (Slattaretinden) over 2400 ft. The sky is usually clouded, showers and storms are frequent. The surging waters make navigation dangerous generally in winter. The climate is oceanic, but as the summer heat rarely rises above 10 degree and the soil is poor, agriculture is possible only in sheltered spots. Trees are few in number, but shrubs flourish in more abundance. The chief wealth and attraction of the islands are found in their flowery pastures, while the herds of sheep which graze upon them have given their name to the archipelago. Upwards of 100,000 of these animals live always in the open air and are famous for the superior quality of their wool. A few small, raw-boned horses are employed solely as beasts of burden, for roads are unknown nor is any shelter provided for them. More attention is paid to the horned cattle which number about 5000. Besides the above mentioned quadrupeds, rats and mice are the only land animals or mammals to be found. Many species of birds and in great numbers haunt the islands. The surrounding waters abound in delicious fish and whales and dolphins rich in blubber. The yearly catch of the round-headed dolphin alone (the *Grind*) amounts to a thousand. Reptiles and frogs are unknown, and there are but few insects.

The 16,000 inhabitants of the Faroe Islands are all Lutherans. They speak a dialect akin to the Old Norse, but Danish is used in public life, the schools, and the churches. The fisheries, cattle-breeding, and the more perilous bird-catching are the chief sources of income. The few local industries scarcely suffice for the needs of the natives. Turf is used for fires, there being no coal. There is considerable commerce. The exports are fish, blubber, meat, wool, feathers, and down; the imports are wood, coal, and large quantities of cereals and fruit. Thorshaven on Strömö is the capital and seat of government, and has a Realschule, or technical school. Throughout the rest of this island there are only wooden huts covered with turf.

Political and Religious History

From the work of Dicuil, an Irish monk, "De Mensurâ orbis terrae" (ed. Parthey, Berlin, 1872), written in the ninth century, we learn that the islands were discovered by Irish monks. Not long after this they were colonized by Normans. Herold Schonhaar (872-930) united them with the Kingdom of Norway and this was their political condition until 1814. Olaf Tryggvason converted the people to Christianity; as early as 1076 they had a bishop of their own. The bishops of the Faroe islands were usually chosen from the canons of Bergen, and were originally suffragans of Hamburg-Bremen, later of Lund (1104), finally (since 1152) of the Primate of Norway in Trondjem. There were in all twenty-three Catholic bishops, from Gunmund to Amund Olafson. The latter was forced to yield to the Lutheran superintendent Jens Riber, who also took over the episcopal title. Later on only "provosts" were elected. The Catholic clergy remained steadfast in their faith, but were unable to resist the advance of Protestantism. By the end of sixteenth century the Catholic faith had disappeared; all later attempts to revive it proved vain. The mission founded some years ago in Thorshaven was abandoned and the few (mostly transient) Catholics on the land were attended once a year from Copenhagen. In the Catholic epoch, at least, no little attention paid to the construction and adornment of churches, as may be seen from the ruins of the unfinished cathedral of Kirkebö. The thick basaltic walls broken by high, massive windows are evidence that the original builders meant to erect a noble Gothic church. It remained unfinished because under the "new Gospel" the generosity of the faithful was soon extinguished. A small stone church of the twelfth century serves yet for Protestant worship. It contains sculpture belonging to Pre-Reformation times.

PIUS WITTMAN

Fast

Fast

In general abstinence from food or drink, a term common to the various Teutonic tongues. Some derive the word from a root whose primary signification means to hold, to keep, to observe or to restrain one's self. The Latin term *jejunium* denotes an animal intestine which is always empty. Such abstinence varies according to the measure of restriction circumscribing the use of food and drink. Hence it may denote abstinence from all kinds of food and drink for a given period. Such is the nature of the fast prescribed by the Church before Holy Communion (natural fast). It may also mean such abstinence from food and drink as is dictated by the bodily or mental dispositions peculiar to each individual, and is then known as moral or philosophical fast. In like manner the term comprehends penitential practices common to various religious communities in the Church. Finally, in the strict acceptation of the term, fasting denotes

abstinence from food, and as such is an act of temperance finding its *raison d'être* in the dictates of natural law and its full perfection in the requirements of positive ecclesiastical legislation.

In Christian antiquity the Eustathians (Sozomen, *Hist. Eccl.* II, 33) denied the obligation, for the more perfect Christians, of the Church fasts; they were condemned (380) by the Synod of Gangra (can. xiv) which also asserted incidentally the traditional antiquity of the ecclesiastical fasts (Hefele-Leclercq, *Hist. des Conciles. French tr.* Paris, 1908, 1, p. 1041). Contrary to the groundless assertions of these sectaries, moralists are one in maintaining that a natural law inculcates the necessity of fasting because every rational creature is bound to labour intelligently for the subjugation of concupiscence. As a consequence, rational creatures are logically obliged to adopt means commensurate with the attainment of this end (see MORTIFICATION). Amongst the means naturally subserving this purpose fasting lays claim to a place of primary importance. The function of positive law is to intervene in designating days whereon this obligation must be observed, as well as the manner in which the same obligation is to be discharged on days authoritatively appointed.

What pertains to the origin as well as to the historical development of this obligation in the Church may be gleaned easily from the articles on ABSTINENCE and BLACK FAST. The law of fasting, ecclesiastical in its genius, is unwritten in its origin, and consequently must be understood and applied with due regard for the customs of various times and places. See the corresponding historico-archaeological articles in the various modern dictionaries and encyclopedias of Christian Archaeology, e.g. Martigny, Kraus, Smith and Cheetham, Cabrol and Leclercq. Details will be found under ADVENT; LENT; VIGIL; EMBER DAYS.

In the United States of America all the days of Lent; the Fridays of Advent (generally); the Ember Days; the vigils of Christmas and Pentecost, as well as those (14 Aug.) of the Assumption; (31 Oct.) of All Saints, are now fasting days. In Great Britain, Ireland, Australia and Canada, the days just indicated, together with the Wednesdays of Advent and (28 June) the vigil of Saints Peter and Paul, are fasting days. Fasting essentially consists in eating but one full meal in twenty-four hours and that about midday. It also implies the obligation of abstaining from flesh meat during the same period, unless legitimate authority grants permission to eat meat. The quantity of food allowed at this meal has never been made the subject of positive legislation. Whosoever therefore eats a hearty or sumptuous meal in order to bear the burden of fasting satisfies the obligation of fasting. Any excess during the meal mitigates against the virtue of temperance, without jeopardizing the obligation or fasting.

According to general usage, noon is the proper time for this meal. For good reasons this hour may be legitimately anticipated. Grievous sin is not committed even though

this meal is taken a full hour before noon without sufficient reason, because the substance of fasting, which consists in taking but one full meal a day, is not imperiled. In like manner, the hour for the midday meal and the collation, may for good reasons be conscientiously inverted. In many of our larger cities this practice now prevails. According to D'Annibale (*Summa Theologiae Moralis*, 4 ed. III, 134) and Noldin (*Summa Theologiae Moralis*, n. 674) good reasons justify one in taking a collation in the morning, dinner at noon, and the morning allowance in the evening, because the substance of fasting still remains intact. Nothing like a noteworthy interruption should be admitted during the course of the midday meal, because such a break virtually forms two meals instead of one. Common sense, taking into consideration individual intention and the duration of the interruption, must finally determine whether a given interruption is noteworthy or not. Ordinarily an interruption of one half hour is considered slight. Nevertheless, an individual, after having commenced the midday meal and meeting with a bonafide interruption lasting for an hour or more is fully justified in resuming and finishing the meal after the termination of an interruption. Finally, unless special reasons suggest the contrary, it is not allowed to give immoderate length to the time of this meal. Ordinarily, a duration of more than two hours is considered immoderate in this matter.

Besides a complete meal, the Church now permits a collation usually taken in the evening. In considering this point proper allowance must be made for what custom has introduced regarding both the quantity and the quality of viands allowed at this repast. In the first place, about eight ounces of food are permitted at the collation even though this amount of food would fully satisfy the appetites of some persons. Moreover, the attention must be paid to each person's temperament, duties, length of fast, etc. Hence, much more food is allowed in cold than in warm climates, more to those working during the day than to those at ease, more to the weak and hungry than to the strong and well fed. As a general rule whatever is deemed necessary in order to enable people to give proper attention to their duties may be taken at the collation. Moreover, since custom first introduced the collation, the usage of each country must be considered in determining the quality of viands permitted thereat. In some places eggs, milk, butter, cheese and fish are prohibited, while bread, cake, fruit, herbs and vegetables are allowed. In other places, milk, eggs, cheese, butter and fish are permitted, owing either to custom or to Indult. This is the case in the United States. However, in order to form judgments perfectly safe concerning this point, the Lenten regulations of each diocese should be carefully read. Finally, a little tea, coffee, chocolate or such like beverage together with a morsel of bread or a cracker is now allowed in the morning. Strictly speaking, whatever may be classified under the head of liquids may be taken as drink or medicine at any time of the day or night on fasting days. Hence,

water, lemonade, soda, water, ginger ale, wine, beer and similar drinks may be taken on fasting days outside meal time even though such beverages may, to some extent, prove nutritious. Coffee, tea, diluted chocolate, electuaries made of sugar, juniper berries, and citron may be taken on fasting days, outside meal time, as medicine by those who find them conducive to health. Honey, milk, soup, broth, oil or anything else having the nature of food, is not allowed under either of the two categories already specified. It is impossible to decide mathematically how much food is necessary to involve a serious violation of this law. Moralists as well as canonists concur in holding that an excess of four ounces would seriously militate against the obligation of fasting, whether that much food was consumed at once or at various intervals during the day because Alexander VII (18 March, 1666) condemned the teaching of those who claimed that food so taken was not to be regarded as equalling or exceeding the amount allowed (Denzinger, *Enchiridion Symbolorum et Definitionum*, tenth ed. Freiburg im Br., 1908, No. 1129).

Though Benedict XIV (Constitutions, *Non Ambiginus*, 31 May, 1741; in *superna*, 22 Aug. 1741) granted permission to eat meat on fasting days, he distinctly prohibited the use of fish and flesh at the same meal on all fasting days during the year as well as on Sundays during Lent. (Letter to the Archbishop of Compostella, 10 June, 1745, in *Bucceroni Enchiridion Morale* No. 147). This prohibition binds all exempted from fasting either because they are compelled to labour or because they are not twenty-one years old. Furthermore this prohibition extends to those allowed meat on fasting days either by dispensation or by Indult. Sin is Committed each time the prohibited action takes place.

The ecclesiastical law of fasting embodies a serious obligation on all baptized individuals capable of assuming obligations provided they have completed their twenty-first year and are not otherwise excused. This doctrine is merely a practical application of a universally accepted principle of moralists and canonists whereby the character of obligation in human legislation is deemed serious or light in so far as the material element, involved in the law bears or does not bear a close and intimate relation to the attainment of a prescribed end. Inasmuch as fasting considered as a function of the virtue of temperance bears such a relation to the promotion of man's spiritual well-being (see *Lenten Preface* in the *Roman Missal*), it certainly embodies an obligation generally serious. To this *a priori* reason may be added what Church history unfolds concerning the grave penalties attached to transgressions of this law. The sixty-ninth of the Apostolic Canons decrees the degradation of bishops, priests, deacons, lectors or chanters failing to fast during Lent, and the excommunication of laymen, who fail in this way. The fifty-sixth canon of the Trullan Synod (692) contains similar regulations. Finally Alexander VII (24 Sept., 1665) condemned a proposition formulated in

the following terms: Whoso violates the ecclesiastical law of fasting to which he is bound does not sin mortally unless he acts through contempt or disobedience (Denzinger, op. cit., no. 1123). Though this obligation is generally serious, not every infraction of the law is mortally sinful. Whenever transgressions of the law fail to do substantial violence to the law, venial sins are committed. Inability to keep the law of fasting and incompatibility of fasting with the duties of one's state in life suffice by their very nature, to extinguish the obligation because as often as the obligation of positive laws proves extremely burdensome or irksome the obligation is forthwith lifted. Hence, the sick, the infirm, convalescents, delicate women, persons sixty years old and over, families whose members cannot have the necessaries for a full meal at the same time, or who have nothing but bread, vegetables or such like viands, those to whom fasting brings loss of sleep or severe headaches, wives whose fasting incurs their husband's indignation, children whose fasting arouses parent's wrath; in a word, all those who can not comply with the obligation of fasting without undergoing more than ordinary hardship are excused on account of their inability to fulfil the obligation. In like manner unusual fatigue or bodily weakness experienced in discharging one duty and superinduced by fasting lifts the obligation of fasting. However, not every sort of labour, but only such as is hard and protracted excuses from the obligation of fasting. These two conditions are not confined to manual labour, but may be equally verified with regard to brain work. Hence bookkeepers, stenographers, telegraph operators, legal advisers and many others whose occupations are largely mental are entitled to exemption on this score, quite as well as day-labourers or tradesmen. When these causes begetting exemption by their very nature, do not exist, lawfully constituted superiors may dispense their subjects from the obligation of fasting. Accordingly the Sovereign Pontiff may always and everywhere grant valid dispensations from this obligation. His dispensations will be licit when sufficient reasons underlie the grant. In particular cases and for good reasons, bishops may grant dispensations in their respective dioceses. Unless empowered by Indult they are not at liberty to dispense all their subjects simultaneously. It is to be noted that usually bishops issue just before Lent circulars or pastorals, which are read to the faithful or otherwise made public, and in which they make known, on the authority of the Apostolic See, the actual status of obligation, dispensations, etc. Priests charged with the care of souls may dispense individuals for good reason. Superiors of religious communities may dispense individual members of their respective communities provided sufficient reasons exist. Confessors are not qualified to grant these dispensations unless they have been explicitly delegated thereunto. They may, however, decide whether sufficient reason exists to lift the obligation.

Those who have permission from the Holy See to eat meat on prohibited days, may avail themselves of this concession at their full meal, not only on days of abstinence but also on fasting days. When age, infirmity or labour releases Christians from fasting, they are at liberty to eat meat as often as they are justified in taking food, provided the use of meat is allowed by a general indult of their bishop (Sacred Penitentiaria, 16 Jan., 1834). Finally, the Holy See has repeatedly declared that the use of lard allowed by Indult comprehends butter or the fat of any animal.

No student of ecclesiastical discipline can fail to perceive that the obligation of fasting is rarely observed in its integrity nowadays. Conscious of the conditions of our age, the Church is ever shaping the requirements of this obligation to meet the best interests of her children. At the same time no measure of leniency in this respect can eliminate the natural and divine positive law imposing mortification and penance on man on account of sin and its consequences. (Council of Trent, Sess. VI. can. xx)

J.D. O' NEILL

Fatalism

Fatalism

Fatalism is in general the view which holds that all events in the history of the world, and, in particular, the actions and incidents which make up the story of each individual life, are determined by fate.

The theory takes many forms, or, rather, its essential feature of an antecedent force rigidly predetermining all occurrences enters in one shape or another into many theories of the universe. Sometimes in the ancient world fate was conceived as an iron necessity in the nature of things, overruling and controlling the will and power of the gods themselves. Sometimes it was explained as the inexorable decree of the gods directing the course of the universe; sometimes it was personified as a particular divinity, the goddess or goddesses of destiny. Their function was to secure that each man's lot, "share", or part should infallibly come to him.

Ancient Classical Fatalism

The Greek tragedians frequently depict man as a helpless creature borne along by destiny. At times this destiny is a Nemesis which pursues him on account of some crime committed by his ancestors or himself; at other times it is to compensate for his excessive good fortune in order to educate and humble him. With Æschylus it is of the nature of an un pitying destiny; with Sophocles, that of an overruling personal will. Still, the most important feature is that the future life of each individual is so rigorously predetermined in all its details by an antecedent external agency that his own volitions or desires have no power to alter the course of events. The action of fate is blind, arbit-

rary, relentless. It moves inexorably onwards, effecting the most terrible catastrophes, impressing us with a feeling of helpless consternation, and harrowing our moral sense, if we venture upon a moral judgment at all. Fatalism in general has been inclined to overlook immediate antecedents and to dwell rather upon remote and external causes as the agency which somehow moulds the course of events. Socrates and Plato held that the human will was necessarily determined by the intellect. Though this view seems incompatible with the doctrine of free will, it is not necessarily fatalism. The mechanical theory of Democritus, which explains the universe as the outcome of the collision of material atoms, logically imposes a fatalism upon human volition. The *clinamen*, or aptitude for fortuitous deviation which Epicurus introduced into the atomic theory, though essentially a chance factor, seems to have been conceived by some as acting not unlike a form of fate. The Stoics, who were both pantheists and materialists, present us with a very thorough-going form of fatalism. For them the course of the universe is an iron-bound necessity. There is no room anywhere for chance or contingency. All changes are but the expression of unchanging law. There is an eternally established providence overruling the world, but it is in every respect immutable. Nature is an unbreakable chain of cause and effect. Providence is the hidden reason contained in the chain. Destiny or fate is the external expression of this providence, or the instrumentality by which it is carried out. It is owing to this that the prevision of the future is possible to the gods. Cicero, who had written at length on the art of divining the future, insists that if there are gods there must be beings who can foresee the future. Therefore the future must be certain, and, if certain, necessary. But the difficulty then presents itself: what is the use of divination if expiatory sacrifices and prayers cannot prevent the predestined evils? The full force of the logical difficulty was felt by Cicero, and although he observes that the prayers and sacrifices might also have been foreseen by the gods and included as essential conditions of their decrees, he is not quite decided as to the true solution. The importance ascribed to this problem of fatalism in the ancient world is evinced by the large number of authors who wrote treatises "De Fato", e.g. Chrysippus, Cicero, Plutarch, Alexander of Aphrodisias, and sundry Christian writers down to the Middle Ages.

Fatalism and Christianity

With the rise of Christianity the question of fatalism necessarily adopted a new form. The pagan view of an external, inevitable force coercing and controlling all action, whether human or divine, found itself in conflict with the conception of a free, personal, infinite God. Consequently several of the early Christian writers were concerned to oppose and refute the theory of fate. But, on the other hand, the doctrine of a personal God possessing an infallible foreknowledge of the future and an omnipotence regulating all events of the universe intensified some phases of the difficulty. A main feature,

moreover, of the new religion was the importance of the principle of man's moral freedom and responsibility. Morality is no longer presented to us merely as a desirable good to be sought. It comes to us in an imperative form as a code of laws proceeding from the Sovereign of the universe and exacting obedience under the most serious sanctions. Sin is the gravest of all evils. Man is bound to obey the moral law; and he will receive merited punishment or reward according as he violates or observes that law. But if so, man must have it in his power to break or keep the law. Moreover, sin cannot be ascribed to an all-holy God. Consequently, free will is a central fact in the Christian conception of human life; and whatever seems to conflict with this must be somehow reconciled to it. The pagan problem of fatalism thus becomes in Christian theology the problem of Divine predestination and the harmonizing of Divine prescience and providence with human liberty. (*See Free Will; PREDESTINATION; PROVIDENCE.*)

Moslem Fatalism

The Moslem conception of God and His government of the world, the insistence on His unity and the absoluteness of the method of this rule as well as the Oriental tendency to belittle the individuality of man, were all favourable to the development of a theory of predestination approximating towards fatalism. Consequently, though there have been defenders of free will among Moslem teachers, yet the orthodox view which has prevailed most widely among the followers of the Prophet has been that all good and evil actions and events take place by the eternal decrees of God, which have been written from all eternity on the prescribed table. The faith of the believer and all his good actions have all been decreed and approved, whilst the bad actions of the wicked though similarly decreed have not been approved. Some of the Moslem doctors sought to harmonize this fatalistic theory with man's responsibility, but the Oriental temper generally accepted with facility the fatalistic presentation of the creed; and some of their writers have appealed to this long past predestination and privation of free choice as a justification for the denial of personal responsibility. Whilst the belief in predestined lot has tended to make the Moslem nations lethargic and indolent in respect to the ordinary industries of life, it has developed a recklessness in danger which has proved a valuable element in the military character of the people.

Modern Fatalism

The reformers of the sixteenth century taught a doctrine of predestination little, if at all, less rigid than the Moslem fatalism. (*See CALVIN; LUTHER; FREE WILL.*) With the new departure in philosophy and its separation from theology since the time of Descartes, the ancient pagan notion of an external fate, which had grown obsolete, was succeeded by or transformed into the theory of Necessarianism. The study of physics, the increasing knowledge of the reign of uniform law in the world, as well as

the reversion to naturalism initiated by the extreme representatives of the Renaissance, stimulated the growth of rationalism in the seventeenth and eighteenth centuries and resulted in the popularization of the old objections to free will. Certain elements in the mechanical philosophy of Descartes and in the occasionalism of his system, which his followers Malebranche and Geulinx developed, confining all real action to God obviously tend towards a fatalistic view of the universe.

Modern Pantheistic Fatalism

Spinoza's pantheistic necessarianism is, however, perhaps the frankest and most rigid form of fatalism advocated by any leading modern philosopher. Starting from the idea of substance, which he so defines that there can be but one, he deduces in geometrical fashion all forms of being in the universe from this notion. This substance must be infinite. It evolves necessarily through an infinite number of attributes into an infinity of modes. The seemingly individual and independent beings of the world, minds and bodies, are merely these modes of the infinite substance. The whole world-process of actions and events is rigidly necessary in every detail; the notions of contingency, of possible beings other than those which exist, are purely illusory. Nothing is possible except what actually is. There is free will in neither God nor man. Human volitions and decisions flow with the same inexorable necessity from man's nature as geometrical properties from the concept of a triangle. Spinoza's critics were quick to point out that in this view man is no longer responsible if he commits a crime nor deserving of praise in recompense for his good deeds, and that God is the author of sin. Spinoza's only answer was that rewards and punishments still have their use as motives, that evil is merely limitation and therefore not real, and that whatever is real is good. Vice, however, he holds, is as objectionable as pain or physical corruption. The same fatalistic consequences to morality are logically involved in the various forms of recent pantheistic monism.

Modern Materialistic Fatalism

Modern materialism, starting from the notion of matter as the sole original cause of all things, endeavours to elaborate a purely mechanical theory of the universe, in which its contents and the course of its evolution are all the necessary outcome of the original collocation of the material particles together with their chemical and physical properties and the laws of their action. The more thoroughgoing advocates of the mechanical theory, such as Clifford and Huxley, frankly accept the logical consequences of this doctrine that mind cannot act upon matter, and teach that man is "a conscious automaton", and that thoughts and volitions exercise no real influence on the movements of material objects in the present world. Mental states are merely by-products of material changes, but in no way modify the latter. They are also described as subjective aspects of nervous processes, and as epiphenomena, but however conceived

they are necessarily held by the disciples of the materialistic school to be incapable of interfering with the movements of matter or of entering in any way as efficient causes into the chain of events which constitute the physical history of the world. The position is in some ways more extreme than the ancient pagan fatalism. For, while the earlier writers taught that the incidents of man's life and fortune were inexorably regulated by an overwhelming power against which it was useless as well as impossible to strive, they generally held the common-sense view that our volitions do direct our immediate actions, though our destiny would in any case be realized. But the materialistic scientist is logically committed to the conclusion that while the whole series of our mental states are rigidly bound up with the nervous changes of the organism, which were all inexorably predetermined in the original collocation of the material particles of the universe, these mental states themselves can in no way alter the course of events or affect the movements of a single molecule of matter.

The Refutation of Fatalism of all types lies in the absurd and incredible consequences which they all entail.

(1) Ancient fatalism implied that events were determined independently of their immediate causes. It denied free will, or that free will could affect the course of our lives. Logically it destroyed the basis of morality.

(2) The fatalism resting on the Divine decrees (a) made man irresponsible for his acts, and (b) made God the author of sin.

(3) The fatalism of materialistic science not only annihilates morality but, logically reasoned out, it demands belief in the incredible proposition that the thoughts and feelings of mankind have had no real influence on human history

Mill distinguished: (a) Pure or Oriental fatalism which, he says, holds that our actions are not dependent on our desires, but are overruled by a superior power; (b) modified fatalism, which teaches that our actions are determined by our will, and our will by our character and the motives acting on us--our character, however, having been given to us, (c) finally determinism, which, according to him, maintains that not only our conduct, but our character, is amenable to our will: and that we can improve our character. In both forms of fatalism, he concludes, man is not responsible for his actions. But logically, in the determinist theory, if we reason the matter out, we are driven to precisely the same conclusion. For the volition to improve our character cannot arise unless as the necessary outcome of previous character and present motives. Practically there may be a difference between the conduct of the professed fatalist who will be inclined to say that as his future is always inflexibly predetermined there is no use in trying to alter it, and the determinist, who may advocate the strengthening of good motives. In strict consistency, however, since determinism denies real initiative causality to the individual human mind, the consistent view of life and morality should

be precisely the same for the determinist and the most extreme fatalist (see Determinism).

MICHAEL MAHER

Fate

Fate

(Lat. *fatum*, from *fari*, to *tell* or *predict*). This word is almost redundant in the vocabulary of a Catholic as such, for its meaning as the prime cause of events is better expressed by the term Divine Providence, while, as a constant force at work in the physical universe, it is nothing more nor less than natural law. Hence St. Augustine says (De Civit. Dei, c. i): "If anyone calls the influence or the power of God by the name of Fate, let him keep his opinion, but mend his speech." Fate, in its popular meaning, is something opposed to chance, in so far as the latter term implies a cause acting according to no fixed laws. The unseen power that rules the destinies of men was personified by the ancient Greeks under the name of *Moirai*, or, more generally, as three sisters *Moirai*, or Fates, whose names were Clotho, Lachesis, and Atropos. Sometimes fate is described as having unlimited sway over gods and men, while at other times the gods, especially Zeus, are described as the rulers of human destiny, or as having the power to change the course of fate. With the *Moirai* the Romans identified their own *Parcae* or *Fata*.

The idea of fate as a power in the world came, as St. Thomas tells us (C.G., III, xciii), from the attempt to find a cause for events which appeared to follow no definite law and to be the result of mere chance. Many, who were not satisfied with the explanation of poets and mythologists, turned their thoughts to the heavenly bodies, which, acting according to definite and unchanging laws themselves, were supposed to impress their influence upon events in the lower world (see ASTROLOGY). St. Thomas, who was no believer in astrology, evidently supposes that, while Providence acts according to fixed laws in the sidereal system, there is no such uniformity in the case of natural phenomena on earth. These latter are therefore often the result of chance, as far as secondary causes are concerned, though not so in their relation to God's Providence.

EARLY SPECULATIONS

The Greek Philosopher Diodorus of Iasus tried to prove the universality of fate by an argument from the truth of possibles (*peri dunatô*.) The contention was that no event can happen unless it was eternally true that it was going to happen. The truth of such a proposition cannot be changed, and therefore the event to which it refers must necessarily take place. It is something like the argument which St. Augustine

employs to demonstrate the eternal intellect of God, but the fallacy of it as regards Fate is pointed out by Cicero (De Fato IX 18, 19), who shows that the truth of the proposition depends on the actuality of the event. The definition which Cicero puts into the mouth of his brother Quintus identifies Fate with the necessity of natural law (De Divinatione I, 55, par. 125). His words are: "Fatum autem id appello quod Græci *heimarméne*, id est, ordinem seriemque causarum, quum causa causæ nexa rem ex se gignat", or, as we should say, fate is the result of natural law in the physical world. Cicero himself, however, says further on (ibid., II, 3, par. 6), "What is the use of maintaining the existence of Fate when, without Fate, an explanation of everything may be found in Nature or Fortune?"

The doctrine of fate held an important position in the monistic system of the Stoics. Its universal existence was a logical consequence of their assumptions with regard to the physical universe, for they recognized nothing that was not ultimately reducible to matter and natural law. In their ethical system however, the problem of determinism presented greater difficulties; for their favourite commandment, of living according to nature, seemed to imply that "men at some time are masters of their fates", at least as regards the shaping of their souls to that conformity with Nature in which virtue was supposed to consist. The Epicureans stoutly denied the existence of fate, and the unaccountable "swerve" of the atoms, as postulated by the founder of their sect, was intended to preclude the law of necessity, not only in the case of the human will, but even in the elementary movements of primordial matter.

FATE IN THE KORAN

The idea of fate among orthodox Mohammedans is founded on the doctrine of God's absolute decree, and of predestination both for good and for evil. The prophet encouraged his followers to fight without fear, and even with desperation, by assuring them that no timidity or caution could save their lives in battle or avert their inevitable destiny. Disputes about this doctrine have given rise to various sects among the Mohammedans, some explaining away and others denying the absolute nature of the Divine Will. The Koran itself does not convey the impression that Mohammed's own views on the subject were either clear or consistent.

BUDDHISM

Though Free Will is not entirely ignored in Buddhism (q.v.), it is, at any rate, practically suppressed. According to this system, "Man acts", says St-Hilaire, "during the whole of his life under the weight, not precisely of fatality, but of an incalculable series of former existences" (The Buddha and his Religion, v 126).

MATERIALISM

In the theory of those who provide a purely materialistic explanation of the universe and maintain that the human will is just as much subject to unchanging and necessary laws as are all other phenomena, the universal sovereignty of fate is implied in the absolute reign of physical law.

CATHOLIC TEACHING

According to Catholic teaching, God, who is the Author of the universe, has made it subject to fixed and necessary laws, so that, where our knowledge of these laws is complete, we are able to predict physical events with certainty. Moreover, God's absolute decree is irrevocable, but, as He cannot will that which is evil, the abuse of free will is in no case predetermined by Him. The physical accompaniments of the free act of the will as well as its consequences, are willed by God conditionally upon the positing of the act itself, and all alike are the object of His eternal foreknowledge. The nature of this foreknowledge is a matter still in dispute between the opposing schools of Bañez and Molina. Hence, though God knows from all eternity everything that is going to happen, He does not will everything. Sin He does not will in any sense; He only permits it. Certain things He wills absolutely and others conditionally, and His general supervision, whereby these decrees are carried out, is called Divine Providence. As God is a free agent, the order of nature is not necessary in the sense that it could not have been otherwise than it is. It is only necessary in so far as it works according to definite uniform laws, and is predetermined by a decree which, though absolute, was nevertheless free.

Moreover, in the case of miracles, God interferes with the ordinary course of nature; and the supposition that, at certain periods of the world's evolution, such, for instance, as when man first appeared on the earth, there have been other providential interpositions involving new departures in the world-process, provides for certain facts in the region of organic life an explanation not less scientific than the opposite assumptions of the materialists. St. Thomas distinguishes fate from Providence, and calls it the order or disposition of secondary causes according to which they act in obedience to the First Cause.

It follows from what has been said that, in the Catholic view, the idea of fate--St. Thomas dislikes the word--must lack the note of absolute necessity, since God's decrees are free, while it preserves the character of relative necessity inasmuch as such decrees, when once passed, cannot be gainsaid. Moreover, God knows what is going to happen because it is going to happen, and not vice versa. Hence the futurity of an event is a logical, but not a physical, consequence of God's foreknowledge. See FREE WILL, GOD, MIRACLE, PROVIDENCE.

JAMES KENDAL

The Fathers of Mercy

The Fathers of Mercy

A congregation of missionary priests first established at Lyons, France, in 1808, and later at Paris, in 1814, and finally approved by Pope Gregory XVI, 18 February, 1834. The founder, Very Rev. Jean-Baptiste Rauzan, was born at Bordeaux, 5 December, 1757, and died in Paris, 5 September, 1847. After completing his ecclesiastical studies, he taught theology and sacred eloquence, and later was chosen Vicar-General of Bordeaux. Here he inaugurated a missionary movement to save the Faith to France. On the recommendation of Cardinal d'Aviau, Archbishop of Bordeaux, Cardinal Fesch, Archbishop of Lyons, who was especially interested in the project, invited Father Rauzan to Lyons, where, in 1808, he gathered around him a number of Zealous and noted preachers. So effective was their preaching in the Diocese of Troyes, that they won the favour of Napoleon I, and received from the Government, unsolicited, subsidies to defray the expenses of their missions. This favour, however, was short-lived, for, owing to Napoleon's quarrel with Pius VII, the society, which was called the Missionaries of France, was suppressed. In 1814, at the suggestion of Cardinal Fesch, Father Rauzan rallied his co-labourers, adding others, among whom were the young Vicar-General of ChambÈry, de Forbin-Janson, afterwards Bishop of Nancy, the AbbÈs Frayssinous, who founded St. Stanislaus's College and instructed the young missionaries in sacred eloquence, Legris Duval, the St. Vincent de Paul of his day, Le Vasseur, Bach, Caillau, Carboy, and others.

Starting with renewed zeal, the Missionaries of France not only evangelized the cities of OrlÈans, Poitiers, Tours, Rennes, Marseilles, Toulon, Paris, and many other places, but established the works of St. Geneviève and the Association of the Ladies of Providence, who still exist in many parts of France, rendering valuable service to the pastors. Father Rauzan founded the Congregation of the Sisters of St. Clotilde for the education of young ladies. He was befriended by the royal family, who not only assisted him financially, but gave him the celebrated Mount Valerian, at that time the center of piety, and later one of the principal forts protecting the capital.

In 1830 during the second Revolution the Missionaries of France were dispersed and exiled, and their house in Paris sacked. Father Rauzan went to Rome, where he received a paternal reception from Gregory XVI, who encouraged and authorized him to found a new society, to be known as the Fathers of Mercy. The Brief of approbation, which also contains the constitutions, was given 18 February, 1834, and on the 15th of March of the very same year a second Brief, affiliating the new society to the Propaganda, and the former Missionaries of France accepted these constitutions on the 8th

of December the following. Among its members have been such influential and eloquent preachers as Mgr. Faillet, Bishop of OrlÈans, Mgr. Duquesnay, Archbishop of Cambrai, Mgr. Bernadon, Archbishop of Sens, who later became a cardinal. The Fathers of Mercy resumed their missionary labours in France, only to meet again the disasters which befell all religious societies through the decree of expulsion in 1880. However, through the influence of their many friends in Paris, and claiming the enforcement of the authorization given to the society by Louis XVIII in 1816, the Fathers of Mercy retained their mother-house in Paris until the separation of the Church and State in 1905, when they moved to Belgium.

In 1839, at the suggestion of Bishop Hughes, of New York, Mgr. Forbin-Janson introduced the Fathers of Mercy into the United States, their first field of labour being in the Diocese of New Orleans. Bishop Potiers, of Mobile, Alabama, then invited them to take charge of Spring Hill college. Two years later, Fathers Lafont and Aubril were sent to look after the increasing French population in New York City, where the Fathers of Mercy now have charge of the parishes of St. Vincent de Paul, Manhattan, and of Our Lady of Lourdes and St. Francis de Chantal, Brooklyn. They also have a house of studies in Rome, houses in Belgium, France, and other places. By a decree of Propaganda (August, 1906) The Very Rev. Theophile Wucher was named Vicar General of the Institute for three years and took up residence in New York. In their activities the Fathers of Mercy embrace all works of apostolic zeal. One of their chief characteristics is, that they must at all times consider themselves auxiliaries of the secular clergy, and in every way conform to the will of the bishop in whose diocese they may labour. The end and mode of life the congregation imposes upon its members differs little from that of every good secular priest.

JAMES DONOHUE
